NEW SPECIAL!

Turbo Pascal® 3.0

"*For the IBM PC, the benchmark Pascal compiler is undoubtedly Borland International's Turbo Pascal*," says Gary Ray of *PC Week*. We and more than 500,000 other people around the world think Mr. Ray got that right. Since launch, Turbo Pascal has become the *de facto* worldwide standard in high-speed Pascal compilers. Described by Jeff Duntemann of *PC Magazine* as the "*Language deal of the century*," Turbo Pascal is now an even better deal than that—because we've *included* the most popular options (BCD reals and 8087 support). What used to cost $124.95 is now only $99.95! You now get a lot more for a lot less: the compiler, a completely integrated programming environment, and BCD reals and 8087 support—all for a suggested retail of only $99.95.

Borland's Business Productivity Programs:

Reflex: The Analyst™ Analytical database manager. Provides complete new look at data normally hidden by programs like 1-2-3® and dBASE.® Best report generator for 1-2-3.

NEW! ***Reflex Workshop***™ Important new addition to Reflex: The Analyst. Gives you 22 different templates to run your business right.

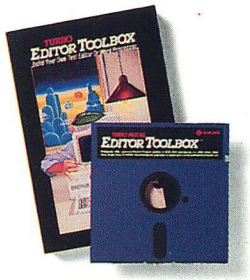
SideKick® Complete RAM-resident desktop management includes notepad, dialer, calculator and more.

Traveling SideKick™ Electronic version of business/personal diaries, daytime organizers; works with your SideKick files; important professional tool.

SuperKey® Keyboard enhancer. Simple macros turn 1000 keystrokes into 1. Also encrypts your files to keep confidential files confidential.

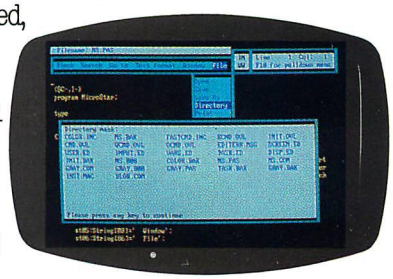
Borland's Electronic Reference Programs:

Turbo Lightning™ Works with all your programs and checks your spelling *while you type*! Includes 80,000-word Random House® Concise Dictionary and 50,000-word Random House Thesaurus. Forerunner of Turbo Lightning Library.



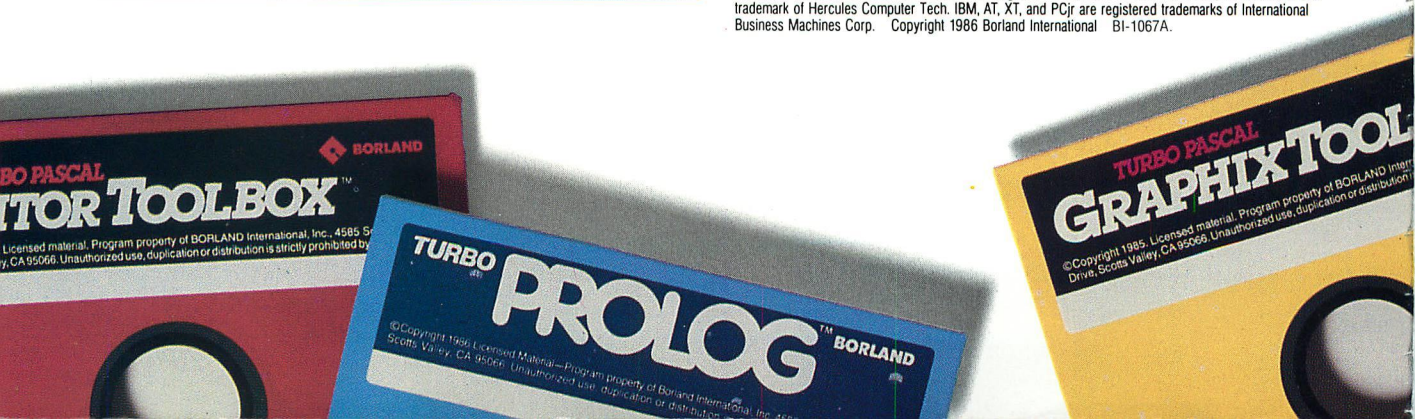
Lightning Word Wizard™ Includes ingenious crossword solver and six other word challenges. If you're into programming, Lightning Word Wizard is also a development toolbox and the technical reference manual for Turbo Lightning.

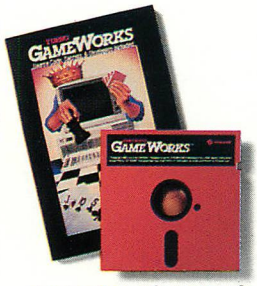
COMPLETELY NEW VERSION!



Turbo Tutor® 2.0

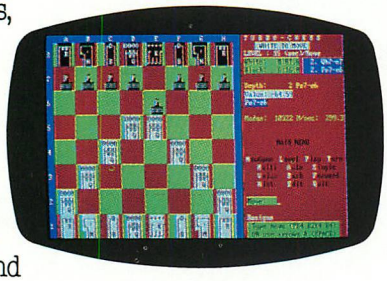
Just released (July '86), the new Turbo Tutor can take you from "What's a computer?" on through to complex data structures, assembly languages, trees, tips on writing long programs in Turbo Pascal, and a high level of expertise. Source code for everything is included. New split screens allow you to put source text in the bottom half of the screen and run the examples in the top half. There are quizzes that ask you, show you, tell you, teach you. You get a 450-page manual—which is not as daunting as it sounds, because unlike many software manuals, it was not written by orangutans. (With our all "almost-free" upgrade, you can upgrade to Turbo Tutor 2.0 by sending us your master diskettes, proof of purchase, and $10.00, which covers shipping and handling.) Suggested retail: $39.95.





Turbo Editor Toolbox™

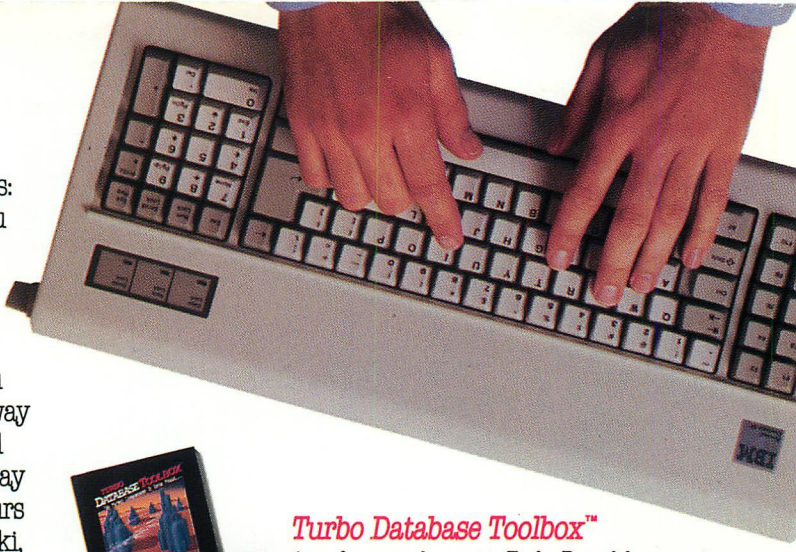
Recently released, we called our new Turbo Editor Toolbox a "construction set to write your own word processor." Peter Feldmann of *PC Magazine* covered it pretty well with, "*A 'write your own word processor' program for intermediate level programmers, with lots of help in the form of prewritten procedures covering everything from word wrap to pull-down windows.*" Source code is included, and we also include MicroStar, a full-blown text editor with pull-down menus and windowing. It interfaces directly with Turbo Lightning to let you spell-check your MicroStar files. Jerry Pournelle of *BYTE* magazine said, "*The new Turbo Editor Toolbox is the Turbo Pascal source code to just about anything you ever wanted a PC-compatible text editor to do.*" Suggested retail: $69.95.



All Borland products are registered trademarks or trademarks of Borland International, Inc. or Borland/Analytica, Inc. 1-2-3 is a registered trademark of Lotus Development Corp. dBASE is a registered trademark of Ashton-Tate. Random House is a registered trademark of Random House, Inc. Hercules is a trademark of Hercules Computer Tech. IBM, AT, XT, and PCjr are registered trademarks of International Business Machines Corp. Copyright 1986 Borland International BI-1067A.

Turbo GameWorks™

Also recently released, Turbo GameWorks is what you think it is: "Games" and "Works." Games you can play right away (like Chess, Bridge and Go-Moku), plus the Works—which is how computer games work. All the secrets and strategies of game theory are there for you to learn. You can play the games "as is" or modify them any which way you want. Source code is included to let you do that, and whether you want to write your own games or simply play the off-the-shelf games, Turbo GameWorks will give hours of diversion, education, and intrigue. George Koltanowski, Dean of American Chess, and former President, United States Chess Federation, reacted to Turbo GameWorks like this, "*With Turbo GameWorks, you're on your way to becoming a master chess player,*" and Kit Woolsey, writer, author, and twice Champion of the Blue Ribbon Pairs, wrote, "*Now play the world's most popular card game—Bridge . . . even program your own bidding or scoring conventions.*" Suggested retail: $69.95.



Turbo Graphix Toolbox™

It includes a library of graphics routines for Turbo Pascal programs. Lets even beginning programmers create high-resolution graphics with an IBM, Hercules,™ or compatible graphics adapter. Our Turbo Graphix Toolbox includes all the tools you'll ever need for complex business graphics, easy windowing, and storing screen images to memory. It comes complete with source code, ready to compile. Suggested retail: $69.95.

Recognition for Borland International has come from business, trade, and media, and includes both product awards and awards for technical excellence and marketing. Borland was named "Company of the Year" by PC Magazine; Sidekick, the #1 best seller for the IBM PC, was named "Product of the Year" by InfoWorld; Turbo Pascal was selected one of PC Week's Top 10 Products for 1984; SuperKey won one of PC Magazine's "Best of 1985" awards; Reflex, The Analyst was recognized in the "Software Products of the Year" awards by InfoWorld; and Reflex and SideKick were both nominated for British Micro Awards in 1986.

Turbo Database Toolbox™

A perfect complement to Turbo Pascal, because it contains a complete library of Pascal procedures that allows you to search and sort data and build powerful database applications. Having Turbo Database Toolbox means you don't have to reinvent the wheel each time you write a Turbo Pascal program. It comes with source code for a free sample database—right on disk. The database can be searched by keywords or numbers. Update, add, or delete records as needed. Just compile it and it's ready to go to work for you. Suggested retail: $69.95.

Technical Specifications:

TURBO PASCAL 3.0 Minimum memory:128K; includes 8087 and BCD features for 16-bit MS-DOS and CP/M-86 systems. CP/M-80 version minimum memory: 48K; 8087 and BCD features not available

TURBO DATABASE TOOLBOX Minimum memory: 128K. CP/M-80 minimum memory: 48K. Requires Turbo Pascal 2.0 or later.

TURBO GRAPHIX TOOLBOX* Minimum memory: 192K. Requires PC/MS-DOS 2.0 or later, Turbo Pascal 3.0, and IBM CGA, Hercules Monochrome Card or equivalent.

TURBO TUTOR 2.0 Minimum memory: 192K. CP/M-80 version minimum memory 48K. Requires PC/MS-DOS 2.0 or later and Turbo Pascal 3.0.

TURBO EDITOR TOOLBOX* Minimum memory: 192K. Requires PC/MS-DOS 2.0 or later and Turbo Pascal 3.0.

TURBO GAMEWORKS* Minimum memory: 192K. Requires PC/MS-DOS 2.0 or later and Turbo Pascal 3.0.

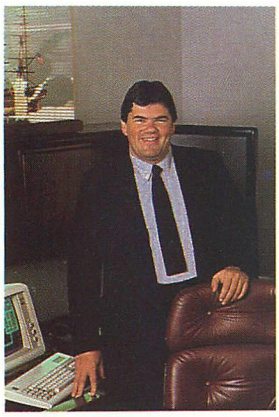
TURBO PROLOG* Minimum memory: 384K.

REFLEX: THE ANALYST* Minimum memory: 384K. Requires IBM CGA, Hercules Monochrome Card or equivalent. Works with Intel's AboveBoard-PC and -AT; AST's RAMpage! and RAMpage! AT; Quadram's Liberty-PC and -AT; Tecmar's 640 Plus; IBM's EGA and 3270/PC; AT&T's 6300 and many others.

REFLEX WORKSHOP* Minimum memory: 384K. Requires Reflex: The Analyst. Two disk drives or hard disk recommended.

TURBO LIGHTNING* Minimum memory: 256K. Two disk drives required. Hard disk recommended.

LIGHTNING WORD WIZARD* Minimum memory: 256K. Requires Turbo Lightning. Turbo Pascal 3.0 required to edit source code.



SIDEKICK* Minimum memory: 128K.

TRAVELING SIDEKICK* Minimum memory: 256K.

SUPERKEY* Minimum memory: 128K.

*For IBM PC, AT, XT, PCjr and true compatibles only, running PC/MS-DOS 2.0 or later.

We frequently surprise people with inventive, imaginative software, and people frequently surprise us with the way *they* use it.

For example, you'll read on this page how Michael J. Watkins of the Petroleum Technology Center in Houston, Texas, used Turbo Pascal® (and Turbo Graphix Toolbox™ and Turbo Tutor®) to cut down the tedium and time in creating Circular Performance Profile Charts (CPPCs).

We didn't know they existed, but you learn something new every day!

Applications like CPPCs might not fit your exact needs, but at the same time they might stimulate fresh ideas in your mind about how you can put Turbo Pascal and the Turbo Pascal family to work for you.

And thank you for your interest in and support for Borland International.

Philippe Kahn,
President, Borland International

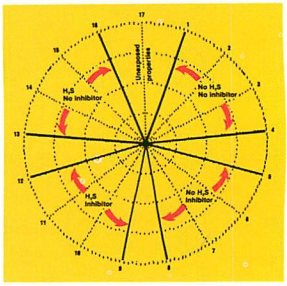
INSIDE STORIES!

- Turbo Pascal 3.0, already described by *PC Magazine* as "*Language deal of the century*," is now an even better deal than that, because we've included the most popular options (BCD reals and 8087 support). What used to cost $124.95 is now only $99.95!
- Completely new Turbo Tutor 2.0 now available. New software. New manual. New split screens. New quizzes. Only $39.95. Upgrades available under Borland's "Almost-Free" upgrade plan. Details inside.

LATE NEWS!

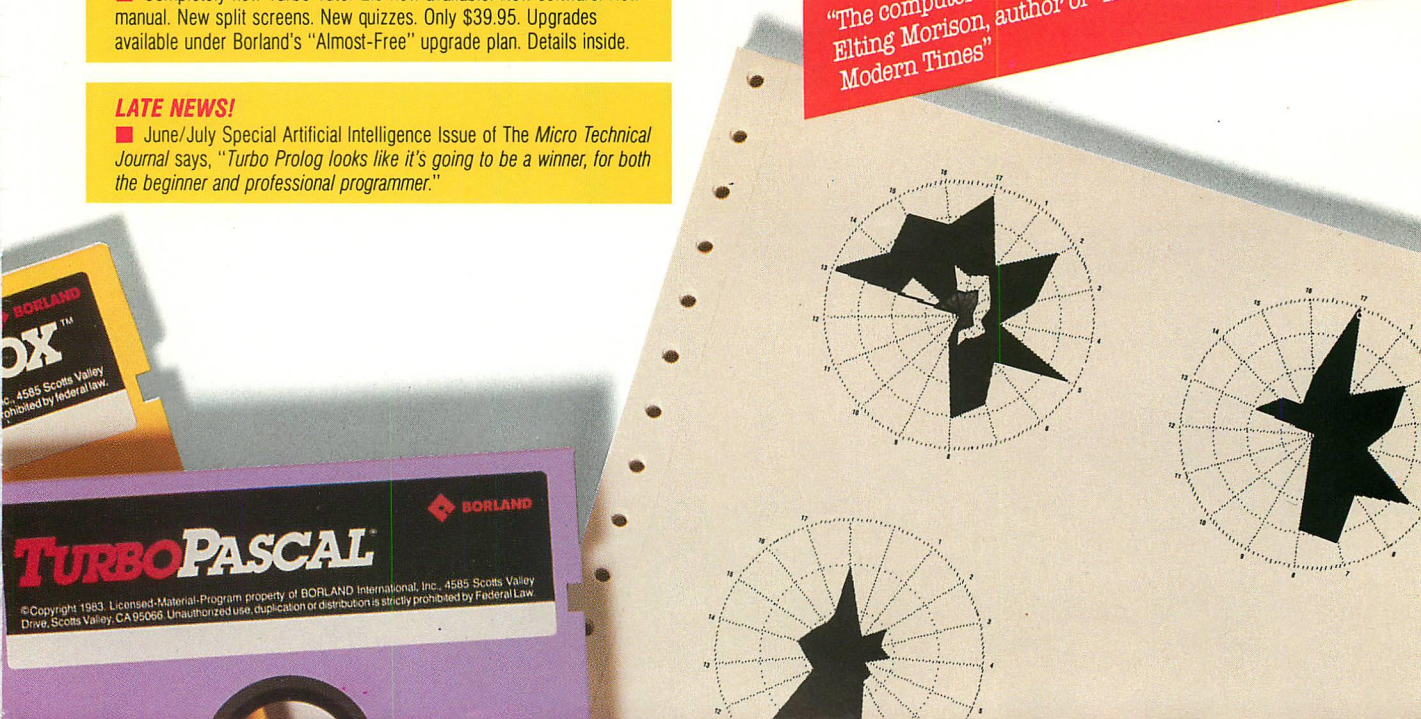
- June/July Special Artificial Intelligence Issue of The *Micro Technical Journal* says, "*Turbo Prolog looks like it's going to be a winner, for both the beginner and professional programmer.*"

Turbo Pascal deliberately programmed to go around in circles



Circular charts (or CPPCs) are used by Michael J. Watkins of the Petroleum Technology Center in Houston, Texas, to plot a single performance property for a large number of elastomers, which have elastic, rubber-like properties.

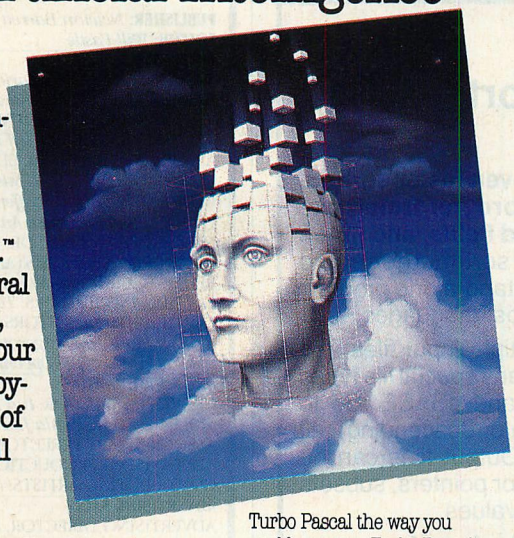
Mr. Watkins wrote us saying, "*Because CPPCs condense a lot of data in one graphic, they can be very tedious and time-consuming to draw.*"



What he did to solve those problems was to write a Turbo Pascal program for IBM® personal computers to "*generate these charts quickly and easily.*"

He used Turbo Pascal "*because it has a companion set of very powerful graphics programs (Turbo Graphix Toolbox) which greatly simplifies the required programming.*

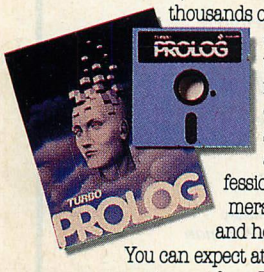
Turbo Pascal is not a difficult language to use and can be easily learned by persons who can program in FORTRAN or BASIC. An excellent tutorial (Turbo Tutor) is available for the novice or experienced programmer. The Turbo Pascal products are also very moderately priced."



"The computer is no better than its program."
Elting Morison, author of "Men, Machines and Modern Times"

Step-by-step tutorial, demo programs with source code included!

Borland's new Turbo Prolog is the powerful, completely natural introduction to Artificial Intelligence



Prolog is probably one of the most powerful computer programming languages ever conceived, which is why we've made it our *second* language—and "turbo-charged" it to create Turbo Prolog.™

Our new Turbo Prolog, the natural language of **A**rtificial **I**ntelligence, brings supercomputer power to your IBM® PC and introduces you step-by-step to the fascinating new world of **A**rtificial **I**ntelligence. And does all this for an astounding $99.95.

Turbo Prolog is to Prolog what Turbo Pascal® is to Pascal!

Our Turbo Pascal astonished everyone who thought of Pascal as "just another language." We changed all that—and now Turbo Pascal is the de facto worldwide standard, with hundreds of thousands of enthusiasts and users in universities, research centers, schools, and with professional programmers, students, and hobbyists.

You can expect at least the same impact from Turbo Prolog, because while Turbo Prolog is the most revolutionary and natural programming language, it is also a complete development environment—just like Turbo Pascal.

Minimum memory: 384K

> "Turbo Prolog offers generally the fastest and most approachable implementation of Prolog."
>
> *Darryl Rubin, AI Expert*

Even if you've never programmed before, our free tutorial will get you started right away

You'll get started right away because we have included a complete step-by-step tutorial as part of the 200-page Turbo Prolog Reference Manual. Our tutorial will take you by the hand and teach you everything you're likely to need to know about Turbo Prolog and artificial intelligence.

For example: once you've completed the tutorial, you'll be able to design your own expert systems utilizing Turbo Prolog's powerful problem-solving capabilities.

Think of Turbo Prolog as a high-speed electronic detective. First you feed it information and teach it rules. Then Turbo Prolog "thinks" the problem through and comes up with all the reasonable answers—almost instantly.

If you think that this is amazing, you just need to remember that Turbo Prolog is a 5th-generation language—and the kind of language that 21st century computers will use routinely. In fact, you can compare Turbo Prolog to Turbo Pascal the way you could compare Turbo Pascal to machine language.

You get the complete Turbo Prolog programming system for only $99.95

You get a complete Turbo Prolog development system including:

- The lightning-fast Turbo Prolog incremental compiler and the interactive Turbo Prolog editor.
- The 200-page reference manual which includes the step-by-step Turbo Prolog tutorial.
- The *free* GeoBase™ natural query language database including commented source code on disk—ready to compile. GeoBase is a complete database designed and developed around U.S. geography. It includes cities, mountains, rivers, and highways, and comes complete with natural query language. Use GeoBase immediately "as is," or modify it to fit your own interests.

So don't delay—don't waste a second—get Turbo Prolog now. $99.95 is an amazingly small price to pay to become an immediate authority—an instant expert on artificial intelligence! The 21st century is only one phone call away.

YES! I want the best!

Turbo Prolog 1.0 Technical Specifications

Compiler: *Incremental compiler generating native in-line code and linkable object modules. The linking format includes a linker and is compatible with the PC-DOS linker. Large memory model support. Compiles over 2500 lines per minute on a standard IBM PC.*

Interactive Editor: *The system includes a powerful interactive text editor. If the compiler detects an error, the editor automatically positions the cursor appropriately in the source code. At run-time, Turbo Prolog programs can call the editor, and view the running program's source code.*

Type System: *A flexible object-oriented type system is supported.*

Windowing Support: *The system supports both graphic and text windows.*

Input/Output: *Full I/O facilities, including formatted I/O, streams, and random access files.*

Numeric Ranges: *Integers: −32767 to 32767; Reals: 1E−307 to 1E+308.*

Debugging: *Complete built-in trace debugging capabilities allowing single stepping of programs.*

PRODUCTIVITY TOOLS

From Opt-Tech Data Processing

NEW Version

Opt-Tech Sort™

NEW Version

ALL NEW Version 3.0 features even faster sorting, record selection, output record reformatting, dBASE III files, comma delimited fields, and much more. This high performance sort/merge/record selection utility can be used as a stand-alone program or called as a subroutine from most languages.

Supports unlimited filesizes, multiple input files and fixed or variable length records. Many special file types are supported including Btrieve and dBASE. Up to nine sort control fields (ascending or descending), all common data types supported. Output files can be combinations of full records, keys or pointers, subsets of the input file fields, and literal values.

Written in assembly language for **high performance.** Example: 4,000 128 byte records sorted to give key and pointer in 30 seconds. **$149.**

On-Line Help™

A comprehensive utility for adding help windows to your programs. It provides efficient utilities and routines for interfacing your programs with the help system routines and help message libraries.

Help windows are displayed in a fraction of a second. You have total control over the contents of the window, its size and its position on the screen, including the display and border colors.

On-Line Help can be interfaced with interpreted Basic and all popular compilers. **$149.**

Scroll & Recall™

Allows you to conveniently scroll back through data that has gone off the top of your display screen. Up to 27 screens of data can be recalled or written to a disk file (great for documenting systems operations).

Allows you to easily recall and edit your previously entered DOS commands and data lines without re-typing.

Scroll & Recall is very easy to use. It's a resident utility that's always there when you need it! **$69.**

All programs IBM PC/XT/AT & MS-DOS compatible.

Visa, M/C, AMEX, Check, Money Order, COD or Purchase Orders accepted.

Business Partners.

Choosing the right business partners can be a delicate task. You want partners that fit your style. Partners that work as hard as you. You want business partners like WordPerfect 4.1, WordPerfect Library and MathPlan.

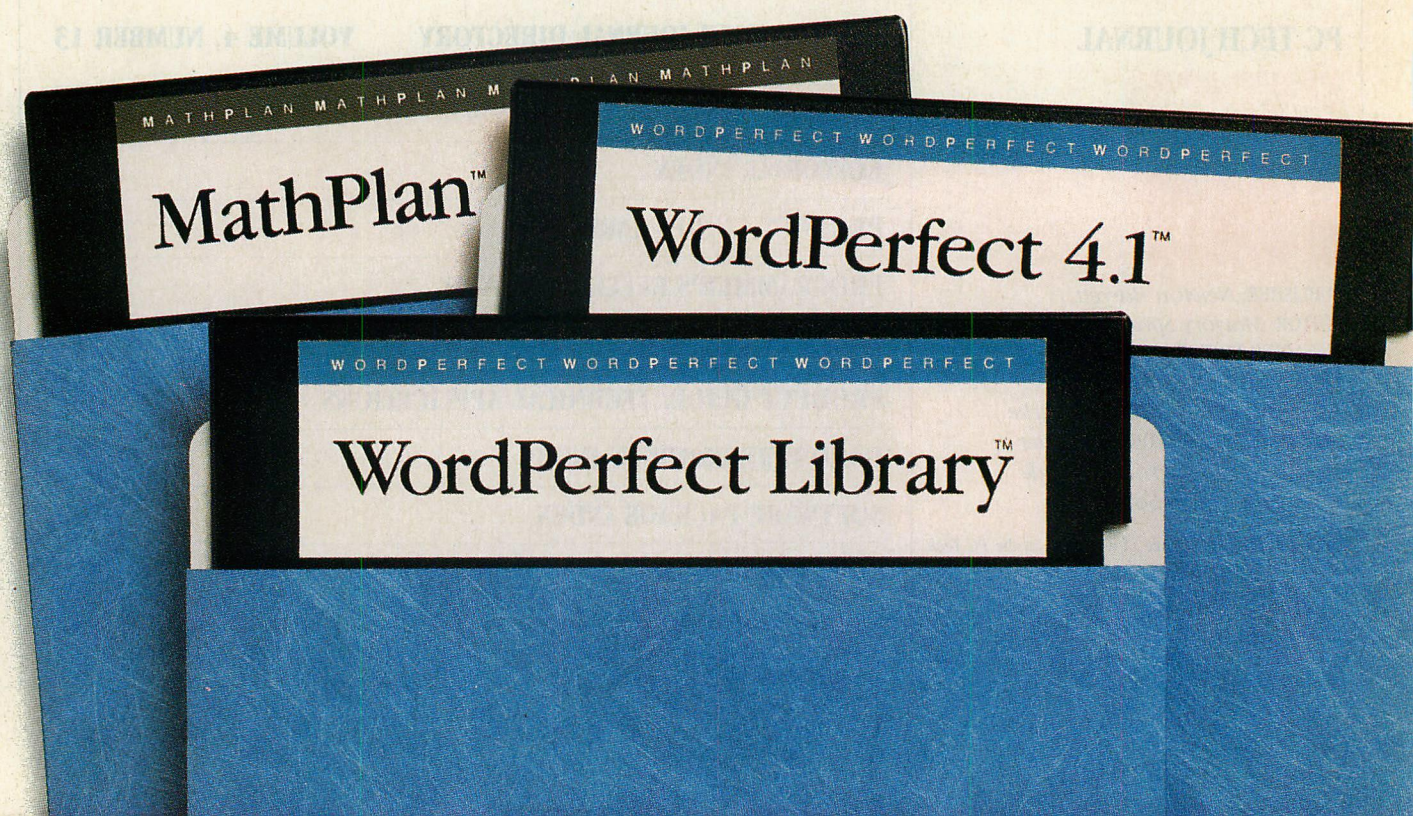
A best seller.

According to market research firm InfoCorp, WordPerfect 4.1 is now the best-selling word processor for the IBM PC. For good reason. In response to user feedback, WordPerfect has been perfected and re-perfected until it is now unsurpassed in business features and functionality.

Impeccable partners.

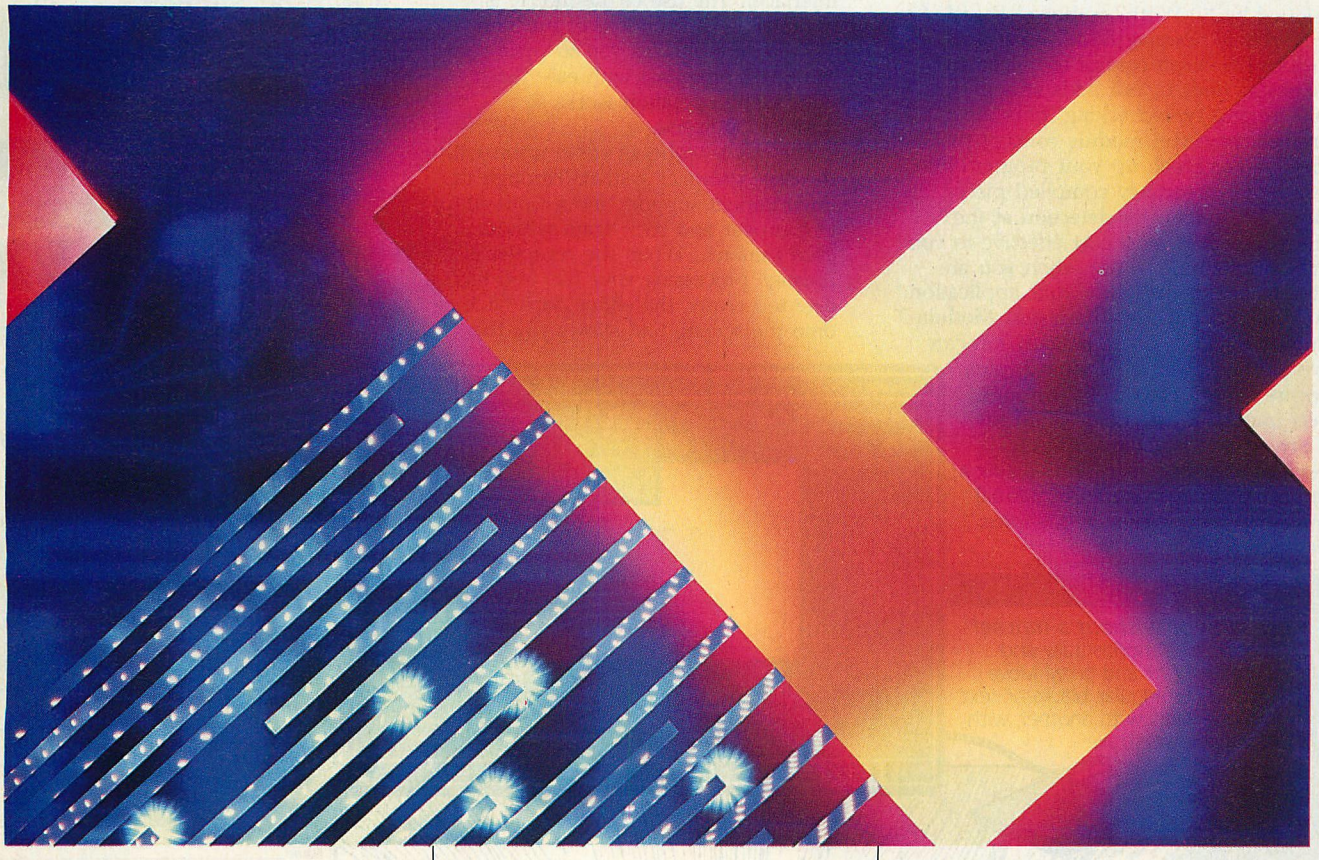
With WordPerfect Library and MathPlan, the best seller now has two unbeatable partners.

Called "almost a must buy" for WordPerfect users (PC Week, June 3, 1986), WordPerfect Library is a comprehensive collection of utilities and functions which make it easy to integrate WordPerfect, MathPlan and other programs. The Library Shell allows you to put multiple programs from WordPerfect Corporation into memory so you can switch back and forth quickly and easily. The Clipboard lets you move information between programs. The Library also includes a multi-function Calculator, Calendar, File Manager, Macro Editor, Notebook and Program Editor.



MathPlan is the spreadsheet program that is comparable to the number one spreadsheet, with one important plus: compatibility with WordPerfect. MathPlan graphs and charts can be integrated with WordPerfect text—a perfect combination.

Start your partnership.



Get together with three partners that will add corporate strength to your company. WordPerfect 4.1, WordPerfect Library and MathPlan. The perfect business partners. For more information, call or write WordPerfect Corporation, 288 West Center St., Orem, Utah 84057, (801) 227-4000.

Versions also available for Data General.
Features and prices vary.

A USER'S GUIDE

Stop here for a moment before you try to figure out what's in this tome and how to go about using it. In your hands is the *PC Tech Journal Directory*, a combination editorial index, guide to products for technical users, and assembly language reference card for 80286 machines—all important and useful tools for *PC Tech Journal* readers.

Think of it as a companion to our regular issues: the Editorial Index is a guide through the back issues that we know so many readers are keeping. The Product Guide, the major part of the issue, lists products likely to be of interest to advanced technical users. The reference card is printed on heavier paper so it can be removed, folded into a convenient size, and kept near your computer. We expect to update and publish the *Directory* on an annual basis.

We prepared the Editorial Index in the mold of the *Reader's Guide to Periodical Literature*. Starting from volume 1, number 1, we indexed each article four ways: article title (with abstract), author, subject, and product reviewed, if any. Knowing any one piece of information about an article or subject will lead to the important information: when it was published in *PC Tech Journal*. Our editorial staff wrote the abstracts to articles. It was an extremely time-consuming task but we consider the information held in our back issues too important to stand without the benefit of a first-class index.

Now the format of the mammoth Product Guide. There are three main product sections: Hardware (p. 63), Systems Software (p. 529), and Technical Applications (p. 403). Entries in each of these sections are grouped by type of product. Individual entries include a product description, vendor name, and—of great interest to readers—the date the product was reviewed in *PC Tech Journal*, if in fact it was.

Following the three main sections are three indexes: Hardware (p. 499), Software (p. 529), and Company (p. 565). Hardware and software indexes list the products and the page numbers where they appear in the three main sections. The third index, the Company Index, includes the name, address, and telephone number of any company whose product is listed in the *Directory*. Following all this is the Product Guide Addendum, which includes products added to the *Directory* after the main sections were completed.

Bound in between pages 64 and 65 is the Assembly Language Reference Card, which we expect the programmers among our readers to remove immediately and place near a computer. As for the *Directory* itself, we are confident it will be given a place on a bookshelf next to an ever-expanding set of *PC Tech Journals*.

—MARJORY SPRAYCAR

The most advanced Compiler System for the PC now has partners!

***Modula-2PC*, the most versatile, fastest Modula-2 compiler introduces two new companion products: A Windowing/Mouse Editor and Environment, plus 8087/80287 direct support!**

Modula-2, the language which programmers world-wide have sought to overcome the limitations of C and Pascal, comes to you in the form of *Modula-2PC from PCollier Systems.* Modula-2 was designed by N. Wirth, author of Pascal, *for the purpose of replacing Pascal. Modula-2PC* provides the direct control of machine facilities as does C, but adds strong structure and type-checking, plus the extremely powerful module concept that allows you to break up your program into meaningful, separately compiled pieces. *Modula-2PC* puts error detection at the point where it is most cost effective to you — at compile time — not when you are trying to use or distribute your application.

Modula-2PC provides the fastest Modula-2 compiler for the PC - *worldwide.* You can have all the power of Modula-2, plus *extensive* control of your PC through direct import of assembler COM files, PC screen and keyboard control, advanced memory allocation — *plus* a complete language reference manual containing many pages of examples. *And much more!*

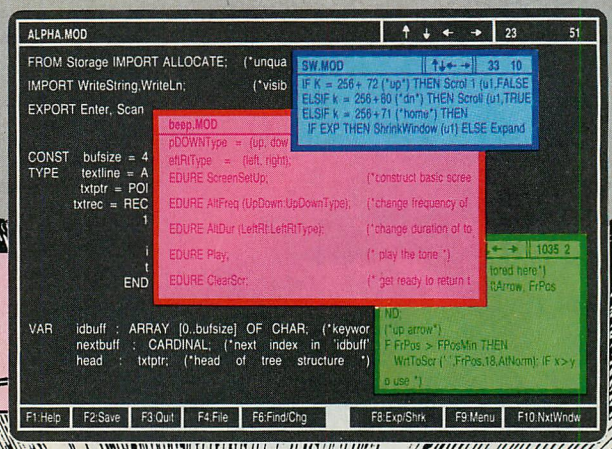
© 1986 P.Collier Systems, Inc.

The Modula-2PC Editor and Environment:

In addition to the standard compiler system, you can also order our new Editor/Environment support program. This full-functioned editor supports multiple windows, and a Mouse of your choice (your mouse driver must be compatible with the Microsoft mouse interface). The use of the mouse is optional — with no loss of function.

The editor enables you to write your Modula-2 programs with ease. Each windowing operation works at astonishing speed.

The editor works in conjunction with the base compiler system. Through the Environment support, move from editor to compiler and back again without even thinking. When the compiler is finished processing your file, and has detected errors, the editor pops back onto the screen, and shows you the location of the problems. Once you've corrected your source, it takes you back to the compiler again smoothly and efficiently.



PCollier Systems has designed the Editor and Environment product to satisfy the most demanding programmers we know: our staff. We know you'll find it to be an invaluable aid!

8087/80287 Support

Adds onto the standard compiler system, and provides you with instant access to your 8087 or 80287 chip, *with no changes to your source code.*

modula-2PC

Modula-2PC is a Trademark of P.Collier Systems, Inc.

Use with or without a mouse!
Windows scroll horizontally and vertically, shrink and grow! Move lines and rectangular blocks of text from one window to another, with just a single keystroke!

"Seven Utilities for dBASE II." 1:9 (Jun 1984):111.

"ACCELERATED KEYSTROKES"
Rollins, Dan. Programming Practices. 4:9 (Sep 1986):179-185.
A program called KWIKKEY.ASM is presented that can be installed to help the PC repeat keystrokes three times faster than normal. One routine monitors the keystroke buffer to sense the auto-repeat condition, then triggers a second routine, which adds a key code to the buffer at every timer tick. A figure shows the structure of the keystroke buffer. Repeat-key acceleration can be accomplished more simply on the PC/AT because the keyboard cable is bidirectional, making the AT's 8048 keyboard controller programmable. A second listing provides a BASIC program to accelerate repeat-key action on the AT.

"ACCELERATING 2.1"
Rodabaugh, Robin. Tech Notebook. 4:3 (Mar 1986):43.
Diskette head settle time was increased to 15 milliseconds in DOS 2.1. Reducing this to 0 (which is the time in DOS 1.1 and 2.0) significantly speeds up certain DOS utilities, such as FORMAT. DOS Patches are presented that reduce the head settle time to 0. A listing gives the DEBUG session used to accomplish the patch.

"ACCESSING DOS FROM PASCAL"
Levaro, Richard A. Tech Notebook. 1:2 (Sep/Oct 1983):83.
IBM Pascal provides an external function, DOSXQQ that allows the user to call DOS functions from Pascal programs. This Tech Notebook elaborates on the description of DOSXXQ in the IBM Pascal manual.

"ACCESSING THE PRINT QUEUE"
Finan, Patrick. Programming Practices. 4:6 (Jun 1986):187-193.
DOS 3.0's improved PRINT.COM utility lets a program invoke background printing. A listing is provided for an IBM Pascal library that can: check that the correct version of PRINT.COM is resident; add a file to the print queue; delete a file from the print queue; display or clear the print queue. A second listing calls the library.

"ACCESSING THE SERIAL PORT FROM COBOL"
Carter, Tom. 1:2 (Sep/Oct 1983):90-103.
COBOL can be used to send and receive ASCII files through a serial port, with the aid of the COBOL and assembly language routines listed here. Three tables show the submit/recieve data structures used, error messages, and asynchronous protocol.

ACKERMAN, MARK S.
"Good Find, A." 3:10 (Oct 1985):85-91.

"ACKNOWLEDGING OWNERSHIP"
Oppenheimer, Max Stul. Legal Brief. 3:10 (Oct 1985): 185-186.
When someone else's work is used, attention must be paid to protecting the owner's *intellectual property* interests. Another company's trademark may be used as long as it is acknowledged as such. If someone else's copyrighted work is used as the basis for a new product, appropriate credit needs to be given to the original author. When a trade secret of another company is used, its confidentiality must be maintained.

"ACS OR PCM: THE BETTER TO COMMUNICATE WITH"
Hansen, Augie. 2:2 (Aug 1984):155-177.
Asynchronous Communications Support (ACS)2.0 and Personal Communications Manager (PCM) are two communications software packages from IBM. Both are menu-driven, and screen display figures show some menus. ACS is a dumb terminal emulator, while the PCM adds "smart" features and electronic mail handling features. Tables list features and commands.

"ADVENTURES IN COMDEXLAND"
Fastie, Will. Directions. 3:1 (Jan 1985):5-6.
The expected industry shakeout was not in evidence at the COMDEX '84 trade show. The industry has not reconciled human interface with data management software. Local area networks have not become as popular as expected because of a dearth of applications suited for LAN use. 2400-baud modems have arrived. COMDEX showed very few developments in graphics. COMDEX and other trade shows will grow as their focus changes from technology to marketing. A new department for *PC Tech Journal*, Product of the Month, is announced.

AFSE—Nota Bene Software
"Program Editors." 1:2 (Sep/Oct 1983):110-123.

"AFTER BUBBLESORT"
Naddor, Eliezer. 1:7 (Apr 1984):40-59.
An analysis of eight sorting algorithms determines that shell, quick, singleton, and tree sort are all uniformly fast; selection, bubble, and insertion sort are all uniformly slow. Twenty-four figures show the algorithms as BASIC fragments along with execution times for both interpreted and compiled BASIC. Most of the algorithms come from *The Art of Computer Programming* by Donald Knuth. *Letter References—2:4 (Oct 1984):14-15.*

"AI CHALLENGE, THE"
Schwartz, Richard L. and Robert E. Shostak. Expert Consultant. 4:9 (Sep 1986):195-197.
Perhaps the most important lesson artificial intelligence (AI) researchers have learned over the past few decades is how difficult it is to emulate or reproduce the effect of human thinking. However, progress has been made by focusing on specific problem areas rather than searching for general solutions. AI techniques have been applied in areas from vision understanding to computer program verification. Commercial products incorporating AI techniques and tools for developing AI programs, as well as several implementations of LISP and Prolog are now available for the IBM PC. Future columns will include discussions of the tangible benefits that can be expected from current and future applications of AI.

"ALARM FOR THE AT, AN"
Scanlon, Leo J. Programming Practices 4:4 (Apr 1986):179-182.
An assembly language program is presented that accesses the PC/AT's CMOS alarm clock function to beep the speaker at a time specified by the user. Simple modifications allow the system to execute a particular program when the alarm time is reached. A listing provides the SETALARM.ASM program.

ALPHA 10 CARTRIDGE DRIVE SUBSYSTEM—IOMEGA
"Bernoulli Box, The." 3:6 (Jun 1985):144-156.

"ALTERNATIVE LICENSES"
Oppenheimer, Max Stul. Legal Brief. 3:7 (Jul 1985): 165-166.
Alternatives to shrink-wrapped licenses are offered by Borland International Inc. and the fictional Mother Jones' Son's Software Corp. Borland's license states that its software must be treated like a book; it can be used on any computer, but by only one person at a time. Mother Jones' Son's Software license also states that it be treated like a book and grants the right to use the software on multiple machines by multiple users, but still only one user at a time. Mother Jones invokes a new standard in copy protection techniques, stating that 30 days after violating the agreement, ownership of the user's soul automatically passes to Mother Jones. Neither company offers a satisfactory agreement for expensive software.

AMDEK MULTIPLE ADAPTER INTERFACE—Amdek
"Four Multifunction Display Adapters." 1:4 (Jan 1984): 32-43.

AMX86 MULTITASKING EXECUTIVE—Kadak Products
"Preemptive Scheduling on DOS." 4:4 (Apr 1986): 98-122.

"ANALYZING THE ADVANCED TECHNOLOGY"
Hoffmann, Thomas V. 2:6 (Dec 1984):40-56.
The IBM PC/AT is the fastest, most powerful microcomputer manufactured by IBM. The AT will bring multiuser, multitasking capabilities to the IBM PC world, and is compatible with the rest of the IBM personal computer family. A technical review of the AT examines systems features and components, including the Intel 80286 processor, the keyboard, memory organization, and system expansion capabilities. Numerous photos of the AT system hardware are provided, as well as 11 tables detailing AT functions and capabilities. A special section is included on AT compatibility with other IBM personal computers. *Letter References—3:2 (Feb 1985):14.*

"ANATOMY and CONSTRUCTION OF XB, THE"
Foard, Richard M. 1:1 (Jul/Aug 1983):61-69, 159-161, 184-191.
Experimental BASIC (XB) was developed to help BASIC programmers handle complex programming tasks by adding structured features to the language. XB eliminates line numbers and uses label and procedure names instead. XB also provides enhancements to IF statements and conditional loops. Its disadvantages include the following: the BASIC output code is difficult to read; on-line programming changes cannot be made; processing errors is difficult; and the product is slow. Included are a listing of the XB compiler and one example of XB source code with corresponding generated BASIC code.

"AND THE WINNERS ARE"
Duntemann, Jeff. Product of the Month. 3:6 (Jun 1985):23.
Five multifunction boards for the IBM PC/AT are highlighted: Advantage! (AST), AT Combo Card (Apparat), Challenger (ALR), Maestro AT (Tecmar), and Rio Grande (STB). The Challenger can carry as much as 4MB on a piggyback board. The Rio Grande is limited to 1.5MB, but appears to be more reliable. Each of the boards has at least one parallel and one serial port. The Challenger board comes with a print spooler program. The Advantage! includes a sophisticated diagnostic program. The Maestro AT includes Tecmar's popular Treasure Chest program anthology, including a checkbook manager, calculator, RAM disk, and print spooler.

ANGELL, RICHARD
"ProDesign II." Product Watch. 4:4 (Apr 1986):194-197.

"ANIMATION TECHNIQUES"
Abrash, Michael and Dan Illowsky. 4:7 (Jul 1986): 46-71.
Possible methods for producing graphics animation on the IBM PC are covered from brute-force methods in C to more refined techniques in assembly language using novel algorithms. The final animation system, using a byte-move graphics driver with self-erasure, is nearly 20 times faster than the original system, an XOR driver written in C. The IBM Color Graphics Adapter (CGA) running in 320-by-200, four-color mode is used throughout. Listings provide code for all drivers and sample screen photos are included in the article. Figures show byte/pixel mapping for the CGA, CGA buffer structure, form data structure, XOR driver logic, and shift/add multiplication by 80. A table lists benchmark timings.

"Out from the Shadow of IBM." 4:8 (Aug 1986):52-75.

"ARRGH! I DIDN'T SAVE MY PROGRAM!"
Rollins, Dan. 2:5 (Nov 1984):134-148.
A utility for recovering unsaved BASIC programs is explained. DEBUG is used to locate the tokenized program, which is still in memory. A header is improvised and the program is written to disk. BASIC's optimization of GOTO addresses complicates recovery. A figure shows how to reconstruct GOTOs. Another figure shows a DEBUG session to rescue a program. This process is automated in a listing, SAVEBAS.BAS.

ARTIFICIAL INTELLIGENCE
"AI Challenge, The." Expert Consultant. 4:9 (Sep 1986):195-197.

"ASCENT OF DOS, THE"
Mirecki, Ted. 4:10 (Oct 1986):92-104.
Since the introduction of DOS in 1981, IBM has released a new version of the operating system about every nine months. The new release 3.2 supports the PC Convertible's 3½-inch, 720KB diskette format. The article provides a brief history of the evolution of DOS, as well as a summary of DOS 3.2's new features. Further analysis explores the upward and downward compatibility issues arising out of IBM's simultaneous support of both DOS 2.1 and DOS 3.2.

"ASSEMBLERS WITHOUT ULCERS"
Raymond, Eric S. 2:3 (Sep 1984):173-186.
A brief tutorial is provided for BASIC and Pascal programmers who need to use ASM-86 for short assembly language subroutines. A program listing provides interfacing ASM-86 macros powerful enough to handle CONST and VAR declarations in calls from Pascal. Tables show simple ASM-86 commands and macros.

"ASSEMBLY LANGUAGE ROUTINES TO CONTROL SOUNDS ON THE IBM PC"
Morgan, Christopher L. 1:7 (Apr 1984):95-102.
Subroutines are described that program the 8253 timer chip to turn the speaker of an IBM PC on and off, to control its frequency, and to produce various sounds and musical tones. Listings of the four assembly language subroutines are included. This is an excerpt from Morgan's *Bluebook of Assembly Routines for the IBM PC.*

"ASYNCHRONOUS X.25"
Duntemann, Jeff. Product of the Month. 3:11 (Nov 1985):39.
The Tymnet division of McDonnell Douglas has created an asynchronous emulation of the International Consultative Committee for Telephone and Telegraph (CCITT) X.25 specification called X.PC. The X.PC protocol established error-protected data transmission for asynchronous communications. X.PC is not a product but a standard for the development of future products. The X.PC protocol specification document is available from PCTECHline and is in the public domain.

AT COMBO CARD—Apparat, Inc.
"And the Winners Are." Product of the Month. 3:6 (Jun 1985):23.

"AT vs RT"
Fastie, Will. Directions. 4:4 (Apr 1986):7-8.
IBM has been demonstrating its seriousness about the technical market. It appeared that the AT was IBM's weak entry into the technical workstation market, until the recent announcement of the RT/PC. The intimidating price of the RT/PC may be overcome by bundling it into a mainframe purchase.

AT/RTX—Real-Time Computer Science Corp.
"PC Versions of iRMX." 4:6 (Jun 1986):126-150.

"Emulating the 3278." 4:2 (Feb 1986):48-63.

"ATTENTION TO DETAIL"
Fastie, Will. Directions. 2:6 (Dec 1984):5-6.
IBM has shown an impressive attention to detail in the PC/AT except for two shortcomings: lack of good backup capability and several flaws in the keyboard layout. The announcements of the Enhanced Graphics Adapter and Professional Graphics subsystems make it possible to turn the AT into a graphics workstation. The AT uses a dual bus to take advantage of the expanded bus of the 80286 microprocessor, without sacrificing compatibility with most existing hardware for the 8088-based PC. The BIOS has been designed to preserve maximum compatibility with the PC. The AT has an impressive performance lead over the PC and XT. DOS 3.0 fixes an irritating problem and smooths the way toward use with the newly announced PC Network, IBM's endorsement of LAN. *Letter References—3:3 (Mar 1985):14-17.*

"AUDIO DEBUGGING"
Duntemann, Jeff. Tech Notebook. 3:1 (Jan 1985):177.
An FM radio can be used to listen for malfunctions in a program. Disk access, polling loops, and timer interrupts all have distinctive, audible frequency signatures.

AUTOCAD—AutoDesk, Inc.
"Drafting by Design." 4:1 (Jan 1986):50-65.

"Shell Game, The." 1:3 (Nov/Dec 1983):30-41.

"AUTOMATIC PCs"
Fastie, Will. Directions. 4:3 (Mar 1986):11-12.
A visit to IBM's manufacturing plant in Boca Raton, Florida is described, including a detailed description of a computer's journey down the assembly line. A sidebar follows that includes readers' reactions to the way in which *PC Tech Journal* covers programming languages.

"AUTOMATIC SCREEN DUMPS FROM BASIC"
Fastie, Will. Tech Notebook. 1:1 (Jul/Aug 1983):147.
A BASIC subroutine is presented that allows the DOS PrtSc key sequence to work when BASIC is running. The subroutine pokes a machine language into a safe spot in memory. A call to the assembly language routine created actually prints the screen. The BASIC subroutine and the assembly language routine it produces are listed.

"AVOIDING 'REDO FROM START' PROBLEMS"
Duntemann, Jeff. Tech Notebook. 1:9 (Jun 1984):178.
GETSTRNG.BAS, a bulletproof input subroutine for BASICA to handle string input, is listed. GETSTRNG interprets all characters as strings—an improvement over INPUT, which disrupts screen forms when even it encounters invalid numeric input.

"BACKING UP THE AT WITH FILESAFE"
Sandler, Corey. 2:6 (Dec 1984):150-153.
Mountain Computer's AT-FileSafe Tape is a streaming tape backup system for the PC/AT. Tape storage is not accessible directly from DOS. The internally mounted subsystem has a capacity of 27MB per tape cartridge. Under test, it backed up 20MB of data from the AT to a backup tape in six minutes, and then restored the same data to the original disk in six minutes. A similar backup test using IBM's BACKUP utility took 31 minutes.

BACKTRACK—Tallgrass Software Technologies
"Backup Utility Performance." 4:3 (Mar 1986):78-83.

"Backup Utility Performance." 4:3 (Mar 1986):78-83.

"BACKUP UTILITY PERFORMANCE"
Armbrust, Steven and Ted Forgeron. 4:3 (Mar 1986):78-83.
This review of software-only, hard-disk backup utilities considers five packages: BACKUP (Software Integration, Inc.); DSBackup (Design Software, Inc.); Dump/Restore (Cogitate, Inc.); Fastback (Fifth Generation Systems); and BackTrack (Tallgrass Software Technologies). All are copy protected. Tables compare features and performance benchmarks of the products.

BARNES, ROBERT
"Considering PL/1." 3:8 (Aug 1985):82-102.

BASIC_C—C Source Inc.
"BASIC To C." 2:4 (Oct 1984):117-140.

"BASIC DEVELOPMENT SYSTEM"
Hultquist, Paul. Product Watch. 4:6 (Jun 1986):196-198.
BetaTool System's BASIC Development System (BDS) is a debugging package recommended to programmers working with large BASIC programs. BDS functions include trace, dump, compress, undo, and many kinds of cross-referencing. A figure shows file compression. Other BDS implementations are available for IBM BASIC and versions of Microsoft BASIC bundled with compatibles.

"BASIC ELEGANCE"
Bauman, Ron. 2:4 (Oct 1984):181-189.
A BASIC program called BASLDR allocates memory for assembly language subroutines, loads them, and then loads the BASIC interpreter. Any BASIC programs loaded thereafter can call the subroutines without the bother of BLOADing or POKEing. When the user leaves BASIC, BASLDR returns all memory to DOS. A figure shows the memory allocation process. Listings include BASLDR, a sample assembly language subroutine, and a sample BASIC program that calls the subroutine. *Letter References—3:1 (Jan 1985):14.*

BASIC PROGRAMMING DEVELOPMENT SYSTEM—IBM
"IBM's BASIC Programming Development System." 1:1 (Jul/Aug 1983):107-114.

"BASIC STRING MANIPULATION"
Rollins, Dan. Tech Notebook. 2:4 (Oct 1984):193.
Several BASIC fragments for standard string manipulations are featured. The techniques include the padding and truncating of strings, and upshifting. A trick is given to minimize the time that BASIC needs in order to reorganize its limited string space.

"BASIC TABLE LOOKUPS"
Volkstorf, J. Edward Jr. Tech Notebook. 1:3 (Nov/Dec 1983):171.
BASIC's string handling capabilities provide rapid access to small tables. The simple strategy presented encodes tables as strings. The three programs listed implement a very simple invoicing system.

"BASIC TO C"
Tello, Ernest. 2:4 (Oct 1984):117-140.
Two new development tools designed to aid in BASIC to C translation are reviewed: BASIC_C from C Source, Inc. and BASTOC from JMI Software Consultants. BASIC_C is a library of C functions that correspond to common BASIC statements and functions. Translation is done manually using programmer-generated calls to the library. It is insufficiently documented and requires considerable prior knowledge of C. BASTOC is a translator that produces C source code from MS BASIC ASCII files. BASTOC does not recognize the PC-specific features of IBM BASIC, and its C output code requires editing before it will compile and run reliably. Both products are useful, but neither does the whole job for the programmer. *Letter References—3:2 (Feb 1985):17-22.*

"BASIC TOOLS OF U.S. INTELLECTUAL PROPERTY LAW, THE"
Oppenheimer, Max Stul. Legal Brief. 1:3 (Nov/Dec 1983):213-220.
The differences between methods used by manufacturers to protect their software—copyrights, patents, trademarks, and trade secrets—are presented. A table lists the legal protections afforded by each method. A listing provides a BASIC program that is intended as an all-purpose pseudo-legal emulator.

BASICA (bundled with DOS)—IBM
"Six New Shapes of BASIC." 4:6 (Jun 1986):52-75.

"BASICA SCREENS TO TURBO"
Duntemann, Jeff. Tech Notebook. 3:2 (Feb 1985):50.
A Turbo Pascal program converts a file saved with BASICA's BSAVE into Turbo Pascal format. The listed example program demonstrates conversion of a screen bit map, but an array or other structure that is saved with BSAVE also can be converted.

BASTOC—JMI Software Consultants, Inc.
"BASIC To C." 2:4 (Oct 1984):117-140.

BAUMAN, RON
"BASIC Elegance." 2:4 (Oct 1984):181-189.

BEALE, DAN
"PC Scheme." Product of the Month. 4:8 (Aug 1986):29.
"WindowDOS." Product Watch. 4:3 (Mar 1986):185-186.

"BEHIND BASIC'S BACK"
Rollins, Dan. Tech Notebook. 2:3 (Sep 1984):198.
The BASIC fragments listed here perform several useful functions with an IBM PC: change text and background colors, switch between two printers, and mimic a print screen keystroke in software.

BENSKY, SY
"Dynamic Memory Management." Programming Practices. 4:10 (Oct 1986):173-181.

BENTLEY, MICHAEL and JEFF DUNTEMANN
"Pascal Times Four." 2:1 (Jul 1984):58-72.

"BERNOULLI BOX"
Perrone, Giovanni. Product Watch. 4:4 (Apr 1986): 197-98.
The new Bernoulli Box models use IOMEGA's half-height, eight-inch cartridge drives in a cabinet half the size of and 20 pounds less than the original. The new models are available with one 10MB drive (A110H), two 10MB drives (A210H), one 20MB drive (A120H), or two 20MB (A220H) drives. A table shows benchmark timings (the average access time of the new system is 38 milliseconds). The new models can read data from cartridges written on older systems but cannot write data back.

BERNOULLI BOX—IOMEGA
"Bernoulli Box, The." 3:6 (Jun 1985):144-156.

"BERNOULLI BOX, THE"
Perrone, Giovanni. 3:6 (Jun 1985):144-156.
The Bernoulli Box is an external drive system that contains two eight-inch 10MB cartridge drives. It is complete with power supply and housed in an enclosure that matches the design of the PC. The Bernoulli Box provides higher performance and reliability than the PC/XT hard disk, allows virtually unlimited storage in 10MB segments, and includes the capability to archive or back up from one cartridge to another. Tables compare the Bernoulli Box to an XT diskette, RAM, and hard disk, as well as a PC/AT diskette, RAM, and hard disk.

"BEST OF BOTH WORLDS, THE"
Pettit, Gregg L. 2:3 (Sep 1984):151-166.
Macros for looping and branching add some high-level language readability to assembly language programs. Provided are IF...ELSE, bounded looping with DO and DO FROM, and conditional looping with DO WHILE and DO UNTIL. Tables and figures give a definition and example for each macro. *Letter References—3:1 (Jan 1985):13.*

BESTUL, THOR, TOM WOTEKI, ALAN FRIEDEN, DOV LEVY, and ROBERT STINE
"Modular Constructions." 2:5 (Nov 1984):72-94.
"Modular Implementations." 2:6 (Dec 1984):154-182.

"BETTER CGA, A"
Covington, Michael A. 4:7 (Jul 1986):137-140.
Two hardware modifications for the IBM Color Graphics Adapter (CGA) are described. One removes the striping effect that occurs on monochrome monitors running color programs. The addition of three resistors allows the CGA to render its 16 colors as distinct shades of gray. The second modification inserts a jumper wire in position P3. This allows users to access the alternative typeface for text mode on the CGA. Figures show the original CGA and the CGA after the circuit changes are made.

BETTERBASIC—Summit Software Technology
"Six New Shapes of BASIC." 4:6 (Jun 1986):52-75.

"BEYOND COM2"
Hansen, Augie. 4:9 (Sep 1986):68-79.
Nine add-in boards for the PC, PC/XT, and PC/AT are reviewed: LAMB (American Micronics, Inc.); FourPort/XN (AST Research, Inc.); HOSTESS 8 Multiport Network Adapter (Control Systems, Inc.); DigiCom/8 (Digiboard, Inc.); Quadport-AT (Quadram Corp.); Comm +4 (Sealevel Systems, Inc.); SMF/AT210 Multifunction Board (Sigma Information Systems); OC4000 and OC8000 (Star Gate Technologies, Inc.). Each provides multiple serial ports that can be assigned beyond the two ports supported by DOS and BIOS. Tables provide a multiport board summary and I/O addresses for AMI, AST FourPort/XN, Quadram Quadport-AT, Sigmation SMF/AT210, and Star Gate OC8000. Figures show serial adapter I/O addresses and communications interrupts.

BIG ED—Irohnic Systems
"Program Editors." 1:2 (Sep/Oct 1983):110-123.

"BIGGER, SMALLER, FASTER, SLOWER"
Fastie, Will. Directions. 4:6 (Jun 1986):11-12.
After a period of relative silence, IBM announced a number of hardware and software products, including the PC Convertible—the first true portable from IBM. The Convertible features 3½-inch diskette drives, 512KB RAM, and a detachable LCD display. An 8-MHz PC/AT with a 30MB hard-disk drive and a PC/XT with a half-height 5¼-inch diskette drive, a 20MB hard-disk drive, a half-height 3½-inch diskette drive, and up to 640KB RAM on the system board also were announced. The new AT and XT models have enhanced keyboards. The new AT is seen as a catch-up machine, but the new XT is competitive.

Two great reasons to buy Turbo Pascal:

System Builder™ $99.95 and Report Builder™ $75.00

From the Designer Series™ by Royal American Technologies.

State-Of-The-Art Program Generators that automatically build a Relational Database system without coding. Entry level "coders" can produce Database systems without coding. Developers have more flexibility and horsepower than any development tool on the market.

Self-documenting program includes screen schematics. System Builder will generate 2,000 lines of program code in approximately 6 seconds.

"I think it's wonderful . . . prospective buyers should seriously consider DESIGNER even before dBASE III."
Mr. Greg Weale
Corporate Accounts Manager, Computerland

"We used DESIGNER last year to program a major application. It saved our programmers so much time. We now use DESIGNER instead of dBASE III as our development standard."
Mr. Peter Barge, Director Services Division, Horwath & Horwath (10th largest accounting firm in U.S.)

SYSTEM BUILDER FEATURES:
• Automatically generates Indented, Structured, Copy Book Source Code ready for compiling with Turbo Pascal (no programming needed) • Paint Application and Menu screens using Keyboard • Screens all use In-Line machine code for exceptional speed • 16 Datafiles and 16 Index Keys per application • Paint functions include: —Center, copy, move, delete, insert or restore a line with one keystroke —Cut and paste blocks of text screen to screen —Draw and erase boxes —Access special graphic characters and character fill —Go straight from screen to screen —Define colors and intensities • Support an unlimited number of memory variables • File Recovery Program • automatically modify existing datafiles • Experienced developers can modify the System Builder • Develop systems for Floppy or Hard Disk • Modify System Builder's output source code to include External Procedures, Functions and Inline Code • Easy-to-use Interface Program included to access ASCII and Dbase Files

REPORT BUILDER FEATURES:
• Automatically generates Indented, Structured Source Code ready for compiling Turbo Pascal (no programming needed) • Automatically interfaces to a maximum of 16 Datafiles created with System Builder • Supports Global Parameters such as Headings, Footers, Lines Per Page, Print Size and Ad Hoc Sorting • Page breaks on Sub-Totals • Reports can also include Text Strings, Variables or Computed expressions containing references from up to 16 Datafiles • Use range input screens allow End Users to select portions of a report as needed (i.e. specific account ranges can be requested) • Easy-to-use Interface Program included to access dBase Files

SYSTEM BUILDER PERFORMANCE
(Typical 10 screen 8 file/index application)

TASK	SYSTEM BUILDER	DBASE III™
Planning and Design	60 minutes	60 minutes
Screen Painting	15 minutes	3 hours
Programming	2 minutes	10 hours
Elapsed time to completed system	**1 hour and 17 minutes**	**14 hours**

CIRCLE 202 ON READER SERVICE CARD

"BIT ROTATION SPEEDS"
Abrash, Michael. Tech Notebook. 4:5 (May 1986):47.
When programming for the PC, rotations of more than four bits can be accomplished faster by loading the count in the CX register and using the instruction ROL AX,CL rather than repetitively using the instruction ROL AX,1. A table lists rotation benchmarks. A figure shows part of an assembly language benchmark code.

"BLINKING CURSOR, THE"
Volkstorf, J. Edward Jr. Tech Notebook. 3:4 (Apr 1985):44.
In BASIC graphics modes, the cursor is a solid block character rather than a blinking line. A BASIC program is given that changes the cursor to a blinking cursor. The program is designed for individual character input in any graphics mode on a PC.

BLUELYNX 5251-11 I—Techland Systems, Inc.
"5251 Connection, The." 4:7 (Jul 1986):76-89.

"BLUELYNX ADVANCED COAX"
Addelson, Roger. Product Watch. 4:4 (Apr 1986):189.
Techland Systems, Inc.'s BLUELYNX Advanced COAX provides 3278 emulation on a PC. It can emulate models 2, 3, 4, and 5. Typical hot-key switches between DOS and 3270 sessions are provided. The capture of a screen image to printer and disk is offered as well as macro definition and user profiles. The HFT file-transfer package offers TSO, CMS, and CICS options. The HFT mainframe component is distributed on 1,600-bpi magnetic tape. A 3720-PC look-alike keyboard is optional. The BLUELYNX does not support 3279 color graphics.

"BOILERPLATE DEAL KILLERS"
Oppenheimer, Max Stul. Legal Brief. 3:8 (Aug 1985):175-176.
Standard contracts for sales and services of hardware and software often contain legal language, conditions, and disclaimers that can kill or cripple a purchase agreement between a vendor and a client. Example phrases, which disclaim warranties of merchantability and fitness for purpose of the product, or declare any prior written or oral agreements superceded, illustrate the destructive effect of legal stock phrases on an agreement that may have begun with mutual understanding.

"BOMB PROOFING"
Hansel, James C. 1:9 (Jun 1984):64-68.
Bomb proofing is built-in protection against incorrect inputs by the user. If a reply beyond the computer's limited set of expected answers is entered, input validation allows the software to respond positively and clearly, helping the user understand why a reply cannot be accepted. A figure shows a sample editing session. Listings provide programs that illustrate three examples of dBASE II validation code: a simple test for two possible legal values; verification that the input falls within an acceptable range of values; and a complex validation in which the value of one field depends upon the value input in another field.

"BONA FIDE BUG, A"
Mirecki, Ted. Tech Notebook. 3:5 (May 1985):41.
Two bugs in the DOS 2.x linker and one in MASM 1.0 are revealed. The linker bugs concern allocation of uninitialized structures (by MASM's STRUC pseudo-op). The MASM bug fails to flag invalid STRUC syntax. An assembly language listing reveals each bug.

"BORLAND MAGIC"
Fastie, Will. Directions. 3:6 (Jun 1985):9-10.
The Borland International philosophy, as symbolized by the mythical programmer Frank Borland, has given us more than its fair share of innovation in the company's two-year life. Turbo Pascal is an example; Borland has sold more than 300,000 copies. With SideKick, Borland demonstrates success in a different software market area. The low prices of Borland's products caught the public's attention, but the quality of the goods held it. Borland has taken innovative steps to ward off illegal copying without inconveniencing its legitimate customers.

"BREAKING OUT WITH PERISCOPE"
Christensen, Ward. 4:3 (Mar 1986):65-73.
Periscope is a hardware-assisted debugger equipped with a breakout button the user can press to access Periscope from anywhere within an operating system or a specific application. Periscope also features an optional protected memory board that shields the debugger from applications that can wipe out memory. Periscope is available in two models, I and II. Both include the debugging software and a breakout button equipped with a five-foot cable. Because Periscope I includes a memory board, it allows debugging of non-DOS operating systems. Figures show a sample of source code interleaved by a symbolic debugger, assembly language symbols, high-level language symbols, and record definitions. A table lists selected Periscope commands.

"BREAKING THE 32MB BARRIER"
Hoffmann, Thomas V. 4:5 (May 1986):94-108.
Although DOS limits the capacity of disk volumes to 32MB, methods have been devised to circumvent this limitation. Seven products are reviewed that provide volumes larger than 32MB: Vfeature Deluxe (Golden Bow Systems); B86 internal hard disk (Bell Technologies, Inc.); Core ATplus (Core International); Emerald Series 4000/1 PS70 (Emerald Systems Corp.); Express 72F-1 external hard-disk system (Express Systems, Inc.); GAW 65MB external drive (GAW Systems); Racet PCMS-150 external system (Racet Computers, Ltd.); and TG-6180 83MB external drive with tape backup (Tallgrass Technologies). Tables cover the BIOS parameter block and compare product performance.

"BREAKPOINTS IN BIOS"
Mirecki, Ted. Tech Notebook. 3:9 (Sep 1985):35.
The wealth of system information in BIOS is hidden from many users because DEBUG breakpoints cannot be set in ROM (they insert instructions into the traced code). The assembly language listing presented makes BIOS breakpointing possible by copying BIOS into RAM and reinitializing pointers to the new copy of BIOS.

"BUBBLE BOARDS"
Awalt, Don. 3:5 (May 1985):123-136.
Bubble memory is a nonvolatile solid-state memory device. It has no moving parts and is impervious to environmental disturbance. Several bubble memory board products for the PC are reviewed; all use the Intel bubble memory component: the Helix Systems' PC Bubble Disk, the HICOMP MBM-504 Bubble Drive, and Pure Data's PDIB-512 Bubble Memory Board. Figures illustrate bubble memory operation. Tables of controller commands and benchmark timings are included. *Letter References—3:7 (Jul 1985):19; 3:11 (Nov 1985):29-30.*

"BUILDING DEVICE DRIVERS"
Mitchell, Stanley. 3:5 (May 1985):76-95.
The structure and function of DOS 2.0's character device drivers are explained. Such drivers let a programmer interface an unsupported keyboard, video adapter or (more typically) printer to DOS. A printer driver is used as an example of device driver construction and testing. Figures show the structure of the device header chain, attribute details, and DEBUG sessions. Assembly language listings include the printer driver and many ready-to-use segments of a generic character device driver. *Letter References—4:1 (Jan 1986):15-16; 4:3 (Mar 1986):15.*

"BUSINESS NON-ADVICE"
Oppenheimer, Max Stul. Legal Brief. 1:7 (Apr 1984): 176-178.
A written contract is required for a transaction only if stipulated by state law. However, a written contract is advisable in all situations as protection against problems in the future. In some cases, a standard contract is sufficient; in other cases users may want to write their own contracts. Without a written contract, the manufacturer is responsible during a reasonable period of time to fix or replace goods that do not work as intended.

C

"C AND THE PC, PART 1"
Hunt, William J. 1:3 (Nov/Dec 1983):110-130.
This article reviews five C compilers: C86 (Computer Innovations), Lattice C (Lifeboat Associates), Microsoft C, C Ware Corp. C, and Manx Aztec C86. Tables compare prices, features, and benchmark test results. The C program used for benchmark testing is included. All the compilers are judged acceptable; the Computer Innovations C86 is judged the best because of its error handling and library functions. A bibliography of books about C is included as a sidebar. A second sidebar covers C-Food Smorgasbord, a collection of C utility routines for use with Lattice C. *Letter References—1:6 (Mar 1984):22; 1:7 (Apr 1984):22-26.*

"C AND THE PC, PART 2"
Hunt, William J. 1:4 (Jan 1984):91-140.
Four C Language compilers are evaluated in part two of a series that evaluates nine C compilers in all: Mark Williams CC86, Whitesmith's C Native Compiler, Digital Research C, and C-Systems C. Tables compare features, benchmark results, and memory models.

"CADD SOLUTION, A"
Wright, Victor E. 4:3 (Mar 1986):86-108.
CADVANCE is a production drafting system from Calcomp. CADVANCE allows for symbols to be created and used; facilities for symbol library management are included. Macros can be created from a sequence of CADVANCE commands and macro programming language (MPL) expressions and functions. A database extraction program manages nongraphic data; it provides database management and report generation features normally associated with larger systems. CADVANCE's plotting facility is excellent, and its drawing production is paramount. The MPL provides the means to customize the package for certain applications. Photos show screen display, dimensioning and window facilities, and the macro feature.

"CALENDAR FOR THE AGES, A"
Covington, Michael A. 3:12 (Dec 1985):136-142.
A set of generic Pascal date routines is presented that can provide accurate calendrical calculations using any date between 4713 B.C. and 5000 A.D. When provided with a day, a month, and a year, the routines supply the user with a date code. Using the date code, the routines determine the day, the month, the year, and the day of the week. A history of Julian and Gregorian calendars, leap years, and astronomical formulae are used to help reveal the complexity of the calculations performed by the routines. A listing gives source code for the routines.

"CALIFORNIA 10-PACK, THE"
Glinert-Cole, Susan. 1:3 (Nov/Dec 1983):78-83.
The California 10-Pack is a set of ten utility programs for the IBM PC that permits viewing files and memory, directory sorting, and object code file disassembly. The package provides valuable utilities for the novice as well as the advanced programmer. Documentation is adequate. Figures show sample output from some utilities.

"CCP/M-86"
Awalt, Don. 1:6 (Mar 1984):64-76.
CCP/M-86 is a new version of CP/M that includes concurrent processing capabilities. The advantages of multitasking over single-tasking within CCP/M-86 are many. CCP/M-86 is slower than MS-DOS, even when running in a single-task environment. Tables of commands and function calls are provided. Figures show diagrams of concurrent CCP/M-86 resident software and a dispatch algorithm. A sidebar covers on CCP/M-86 performance.

"CHANGE IN COMMAND, A"
Nisley, Edward. 3:7 (Jul 1985):149-156.
The SET COMSPEC command, which is intended to allow the user to put the string that describes the location of COMMAND.COM on a VDISK or hard disk, does not work in DOS 2.0 and 2.1. These versions of DOS continue to try and reload COMMAND.COM from the root directory of the disk drive used during system initialization. This bug can be fixed using the COMZAP.ASM program, which forces DOS 2.0 and 2.1 to reload COMMAND.COM using the file name specified by SET COMSPEC. A listing provides the code for the program.

"CHECKING OUT THE LIBRARIANS"
Thomas, Kuryan. 2:4 (Oct 1984):80-90.
This evaluation of two object module librarian programs, PolyLibrarian (Polytron Corp.) and SR-LIB (Software Research), considers the documentation, user friendliness, and general capabilities of each. While SR-LIB is recommended to users whose programming needs are relatively small, PolyLibrarian is a powerful and polished product. A table shows PolyLibrarian's functions.

"CHIPS IN TRANSITION"
Smith, Bob. 4:4 (Apr 1986):56-69.
The Intel 8086/88, 80186/88, and 80286, and the NEC V20 and V30 are compared. The differences are described between the instruction sets in the various microprocessors, including the ways each component implements the same instruction. The article also encompasses the differences between the 8087 and 80287 numeric coprocessors. An assembly language listing is given that allows the CPU in a machine to be uniquely identified. *Letter References—4:7 (Jul 1986):15-18.*

COBOL—IBM
"12 Functional Modules of ANS COBOL, The." 1:7 (Apr 1984):76-82.

"COBOL PERFORMS, PART 1"
Mirecki, Ted. 3:6 (Jun 1985):58-83.
Two COBOL compilers are reviewed in this first of a series of three articles: Realia COBOL and Ryan-McFarland RM COBOL. Compile-time and runtime performance is analyzed, as is the compilers' adherence to the ANSI standard. Realia is a big, capable compiler, faster than most others. It falls short of high-level certification, but provides everything needed for serious application development. Ryan-McFarland COBOL is a capable performer, but is overpriced in comparison to its capabilities. *Letter References—3:11 (Nov 1985):15-18.*

"COBOL PERFORMS, PART 2"
Mirecki, Ted. 3:7 (Jul 1985):111-133.
This is the second of three articles on COBOL compilers. Reviewed are: Microsoft COBOL version 2.0, Micro Focus Level II COBOL version 2.62, and Digital Research Level II COBOL version 3.0. Tables compare the compilers' performance, runtime system size, benchmarks, and computational data types. A listing shows the program used to test the internal sort of the compilers.

"COBOL PERFORMS, PART 3"
Mirecki, Ted. 3:8 (Aug 1985):107-136.
This third of three articles on COBOL reviews IBM COBOL version 1.0, mpb COBOL version 9.0, and Micro Focus Professional COBOL version 1.1. Tables compare features, compilation speeds, code sizes, benchmark results, and computational data types for these three compilers as well as the five compilers reviewed in the first two parts of the series. Micro Focus professional COBOL is rated the best of the eight products reviewed. *Letter References—3:10 (Oct 1985):15; 4:2 (Feb 1986):15-16.*

"CODING IN A NEW LIGHT"
Mirecki, Ted. 4:9 (Sep 1986):84-99.
Clarion from Barrington Systems, Inc. is a business-oriented programming language, similar in some ways to COBOL and PL/1. The language is embedded within a system of interactive utilities that facilitates fast creation and testing of business-oriented applications. Screen generation and help system generation are particularly strong, while file management is not as impressive. Developers license the system for distribution with application packages by purchasing hardware execution keys that are required to run the program.

"COLOR, PLUS"
Hoffmann, Thomas V. 1:2 (Sep/Oct 1983):66-81.
The Colorplus Graphics Adapter is functionally equivalent to the IBM Color Graphics Adapter, with the addition of two extended graphics modes and a parallel printer interface. The two extended graphics modes are 320-by-200 in 16-color and 640-by-200 in 4-color. The bitmap is divided into two parallel planes, with half the bits for a given pixel in each plane. Details on programming the board are given, and a BASIC program for exercising the various modes is shown. Tables give colors and pixel mapping schemes, and graphics software is listed.

"COMPAQ DESKPRO 286"
Armbrust, Steven and Ted Forgeron. 4:8 (Aug 1986): 80-91.
This first in *PC Tech Journal*'s series on AT-compatible machines considers the Compaq Deskpro 286. The machine is fully compatible with the IBM PC/AT and offers additional features as well. The Deskpro 286 can run as a 6- or an 8-MHz machine and users can switch from 6 to 8 MHz from the keyboard or using the DOS MODE command. The machine offers three modes of operation, and a tape backup system is standard. All Compaq models have a dual-mode monitor and display adapter (similar to the IBM Color Graphics Adapter but with the extra capability of supporting high-resolution characters). A table lists results of compatibility and performance tests. A sidebar covers the Compaq Portable II.

COMPAQ PORTABLE II, MODEL 3—Compaq
"Compaq Deskpro 286." 4:8 (Aug 1986):86-87.
"Portable II, The." Product of the Month. 4:6 (Jun 1986):31.

"COMPARING GREAT THINGS WITH SMALL"
Gleckler, Arthur A. 2:3 (Sep 1984):65-75.
The low-end IBM PC Compact Printer and IBM Color Graphics Printer are reviewed. The Compact Printer is a thermal printer suitable for use with the PC*jr*. It lacks many features of the Color Graphics Printer and includes only a subset of the latter's commands. The Color Graphics Printer is a large, sturdy, and expensive device that prints text and graphics in red, blue, yellow, black, or any combination thereof. Figures show sample output produced by the three text modes of the Color Graphics printer. Tables list the printers' functions.

"COMPARING STRUCTURES"
Swan, Tom. Tech Notebook. 3:7 (Jul 1985):36.
A Turbo Pascal function compares arbitrary record structures for equality by treating them as arrays of bytes. Swan's method does not always work because Turbo does not reinitialize string fields. Readers and the author provide solutions to this problem in the referenced letters. *Letter References—3:9 (Sep 1985):18-19.*

"COMPATIBILITY RISK, THE"
Oppenheimer, Max Stul. Legal Brief. 3:4 (Apr 1985): 179-181.
To avoid accusations of copyright infringement, a manufacturer of compatibles may have to prove that its code has been produced by a team that had access only to the requirements for compatibility without having any access to the code of the target for compatibility. Another procedure is to arrive at some agreements with the target company in advance to forestall lawsuits. Having failed in this approach, NEC (Nippon Electric Corp.) is suing Intel to prevent Intel from suing NEC for infringement. The outcome of this suit will have far-reaching consequences for compatible manufacturers. The author also reviews income tax laws pertaining to PC use.

"COMPATIBILITY TRAP, THE"
Fastie, Will. Directions. 3:2 (Feb 1985):9-10.
IBM has done an excellent job of maintaining compatibility in its line of personal computers. As IBM supports more hardware, program developers must decide what they will support. IBM will probably soon announce machines and operating environments that do not support all the options of the current PC family. If so, the company should announce a set of core standards that it will support in the future.

"COMPATIBLES AND COPYRIGHTS"
Oppenheimer, Max Stul. Legal Brief. 2:6 (Dec 1984): 210-215.
Copyright protects artistic expression, not ideas. The author discusses the problems of developing a ROM BIOS for a PC-compatible microcomputer that is functionally equivalent to the IBM ROM BIOS, yet does not infringe upon IBM's copyright.

"COMPILED/INTERPRETED BASIC CHECK"
Ford, Nelson. 1:5 (Feb 1984):178-179.
IBM Compiled BASIC and Interpreted BASIC have incompatibilities. While the interpreter can pass USR statement arguments, the compiler cannot. ERASE can only reclaim memory in the interpreted version. Program listings provide tests to determine whether a BASIC program is compiled or interpreted.

"COMPLEX APPLICATIONS, A DATA MANAGER DESIGNED FOR"
Phelps, Kent. 4:2 (Feb 1986):160-176.
Revelation by Cosmos is an excellent development platform for serious projects. Based on the minicomputer PICK operating system, it is compatible with many PICK-based minicomputers and their software and file structures. The article details minicomputer interfacing, the Revelation/PC-DOS interfaces, file structure, query and database manipulation languages, system security, multiuser applications, and system performance. The *PC Tech Journal* sample application is implemented in Revelation. Benchmark results are given in a table; the code for one of the benchmark programs is listed. A table and figure show a sample dictionary definition and examples of automatically generated file documentation. A sidebar summarizes the capabilities of the data manager. *Letter References—4:7 (Jul 1986):15.*

"COMPUTER CRIME"
Oppenheimer, Max Stul. Legal Brief. 2:3 (Sep 1984): 188-190.
Operators of computer bulletin boards are warned that they may be held responsible for illegal messages left on their boards. An update is given on a law that prohibits imports of products bearing a federally registered trademark; Apple has used the law to prosecute manufacturers of illegally produced Apple look-alikes. The results of an American Bar Association survey on computer crime are given. The survey was sent to Fortune 500 companies in order to uncover the extent of computer crime and to determine ways to prevent or diminish its occurrence.

"COMPUTER-GENERATED STEREOSCOPIC IMAGES"
Camazine, Scott and Westy Dain. 1:1 (Jul/Aug 1983): 57-60, 191-194.
Mechanisms that allow humans to perceive objects as three-dimensional, including binocular disparity, are discussed. Equations are included that can be used to convert one set of points in space to two sets of points: one to be viewed by the left eye and one by the right. Also included are three program listings that use these equations to generate example three-dimensional figures. A fourth program generates two squares of random dots that do not show a pattern until viewed stereoscopically. Drawings of output from all four programs are shown.

"CONCURRENT ENVIRONMENTS"
Awalt, Don. 3:12 (Dec 1985):52-65.
Eight products that bring concurrency to the IBM PC family are reviewed: APX Core Executive (Application Executive Corp.); Concurrent PC-DOS (Digital Research, Inc.); DESQview (Quarterdeck Office Systems); DoubleDOS (Soft Logic Solutions, Inc.); E-Z-DOS-IT (Hammer Computer Systems, Inc.); MultiLink Advanced (The Software Link, Inc.); TopView (IBM); and Windows (Microsoft). Tables compare product features and list interrupts. *Letter References—4:5 (May 1986):17-21.*

"CONCURRENT PC-DOS"
Awalt, Don. 3:3 (Mar 1985):45-54.
Concurrent PC-DOS 3.2, by Digital Research, Inc., boasts five significant features: support for multitasking with up to four windows; a multiuser capability that allows up to three people to use a single PC; the ability to run DOS

programs with no change to source code; the ability to be installed on a hard disk formatted for CCPM-86 or DOS with applications programs of either type. Tables list DOS programs tested under C/PC-DOS, C/PC-DOS commands, and DRTALK program commands. A figure shows multiuser performance benchmarks. *Letter References—3:6 (Jun 1985):15; 3:9 (Sep 1985):19-20.*

CONCURRENT PC-DOS—Digital Research, Inc.
"Concurrent Environments." 3:12 (Dec 1985):52-65.
"Concurrent PC-DOS." 3:3 (Mar 1985):45-54.

"CONFIGURATIONS AND PRICING IN THE IBM FAMILY"
Fastie, Will. 2:6 (Dec 1984):58-70.
The configuration and pricing of the PC/AT is examined, in comparison with other IBM personal computers, as well as five systems manufactured by other vendors. The two models of the AT, the base and enhanced version, are compared first, and are subsequently examined in relation to the PC and PC/XT. Two tables provide detailed price breakdowns as well as total costs for each of the three IBM systems. A figure illustrates price differences between the systems, and tables provide detailed price information and available system features. A comprehensive IBM product center price list is also included.

"CONSIDERING PL/1"
Barnes, Robert. 3:8 (Aug 1985):82-102.
The PL/1 programming language was created in the 1960s as a universal programming language for commercial, scientific, and systems work. Digital Research Inc's three-pass PL/1-86 compiler version 1.0 contains most of the essential mainframe PL/1 features, including a proprietary assembler and linker for performing low-level system interface. Tables show compile times, program sizes, and execution speed for sample PL/1 programs run using PL/1-86. A figure shows a sample RECORD I/O. Listings present sample programs and benchmarks.

CONSTELLATION 60 ETP—Orion Computer Products
"Moving up to Tape." 3:11 (Nov 1985):62-83.

"CONTROLLED PLOTTING USING THE IBM PC"
Hockswender, Thomas. 1:1 (Jul/Aug 1983):101-103, 194-196.
A graph with *x* and *y* values can be plotted on the IBM Color Graphics Adapter (CGA) with linear transformations of data. Three types of variables are used in the transformation equations: data space variables that define the maximum and minimum values of *x* and *y*; window variables that define limits for the display unit; and hardware variables that define limits set by the hardware. Included are the linear transformation equations and two BASIC programs that use the equations to plot sine curves. Output screen plots are reproduced.

"CONTROLLING FROM AFAR"
Hansen, Augie. 4:4 (Apr 1986):84-93.
The remote features of Carbon Copy (Meridian Technology), LYNC (Norton-Lambert) and REMOTE (Microstuf Inc.) are discussed. The controlled PC is connected to the remote PC by standard telephone circuits via modems. The issues involved with the operation of various types of programs (including transferring of graphics or data, the unattended and attended remote machine) and how each program implements the solution are described. A figure diagrams copying files across the systems, and a table compares the remote control features. Sidebars describe the remote mail system available with REMOTE and the telecommunications facilities of LYNC. *Letter References—4:7 (Jul 1986):24.*

"CONTROLLING INPUT USING INKEY$"
Ford, Nelson. 2:2 (Aug 1984):32-39.
A BASIC keyboard input routine allows a program to process numeric pad keystrokes without disrupting screen layout. The INKEY$ function provides the control. The program is listed and described in detail. *Letter References—2:5 (Nov 1984):20.*

CORE ATPLUS—Core International
"Breaking the 32MB Barrier." 4:5 (May 1986):94-108.

"COURIER 2400"
Duntemann, Jeff. Product of the Month. 3:5 (May 1985):25.
The Courier 2400 (U.S. Robotics) is a 2400-baud direct-connect modem. In addition to offering increased speed of communications, it has help screens built into its ROM. The Courier 2400 also returns a result code to indicate what kind of response it got to an attempt to dial a number. Its switches are conveniently located. The modem works well and is an excellent value. *Letter References—3:7 (Jul 1985):19.*

"Some Technical Aspects of dBASE II." 1:9 (Jun 1984): 56-63.

"CRC CALCULATION"
Schwaderer, W. David. 3:4 (Apr 1985):118-133.
The message cyclic redundancy check (CRC) is the most common method of detecting transmission errors. A value is generated from data characters in the transmission, sent as the final part of the message, and then regenerated at the receiving end for comparison with the transmitted value. If the original and regenerated values match, then the transmission can be assumed to have been without error. Polynomials are considered and their suitability for CRC purposes is examined. Listings to compute a CRC value are given in BASIC and C. Figures and tables illustrate these methods. *Letter References—3:8 (Aug 1985):16-21; 3:8 (Aug 1985):24.*

"Intel Bibliography for iAPX 286, An." 2:6 (Dec 1984): 140-144.
"Limited Joys of Translated Software, The." 3:1 (Jan 1985):142-160.

"CREATING A STANDARD LISP"
Bridger, Mark and John Frampton. 3:12 (Dec 1985): 98-117.
Golden Common LISP (GCLISP) from Gold Hill Computers is a mainframe-like LISP for the IBM PC that uses the LISP standard, Common LISP. GCLISP comes with a mulit-buffered full screen editor (GMAS) and a limited tutorial called the San Marcos LISP Explorer. Due to PC memory limitations, GCLISP is mainly a learning tool. A table shows Common LISP's SETF macro, which replaces REPLICA! and SELECT-ELEMENT in other LISPs. A second table shows benchmark timings for iterative, recursive, and floating-point operations on the PC/XT and PC/AT. A listing provides benchmark source code.

"CREATING BOUNCE BAR MENUS"
Duntemann, Jeff. 1:7 (Apr 1984):75.
A bounce bar menu is a menu using a reverse-video-highlighted bar. If the user presses the Enter key while a bar is highlighted, a menu selection is made. A BASIC subroutine lists the bounce bar technique. Ideas are given for customizing the program.

CRENSHAW, KEVIN M.
"Rev Up the AT Keyboard." Tech Notebook. 3:5 (May 1985):39.

"Drop-In Modules for C, Part 2." 3:7 (Jul 1985):135-146.

CROSSTALK XVI—Microstuf, Inc.
"Crosstalking." 2:1 (Jul 1984):90-108.
"High-tech Mimicry." 2:3 (Sep 1984):46-55.

"CROSSTALKING"
Hansen, Augie. 2:1 (Jul 1984):90-108.
Crosstalk XVI (Microstuf Inc.) is a communications software package requiring 96KB of memory. It is command-driven, but menus are available that list the commands. Photos show screen displays of menus, and tables list the commands. The documentation is helpful to the new user. Crosstalk provides two binary file transfer protocols: XMODEM and a proprietary protocol that was available on earlier versions of the program. Although it is more expensive than most communications software packages, Crosstalk is recommended.

CRYPT MASTER—Digital Signatures
"Encryption Software." 3:6 (Jun 1985):162-179.

"CURVES MADE SIMPLE"
Leiber, Frank G. 4:1 (Jan 1986):159-170.
GRAPH-2D.BAS is a BASIC program that permits the user to plot data without becoming involved in the technical aspects of the PC's graphics commands. The program accepts a list of data points contained in a sequential data file and generates a completed graph. The article describes the operation of the program, the data file format, and several sample graphs. Figures show curves generated by the program. The BASIC program listing accompanies the article.

"CUSTOM CHARACTERS"
DeLoach, Allen. Tech Notebook. 3:10 (Oct 1985):45.
A method is described to create custom graphics characters on the IBM PC. The user creates a table defining the characters' shapes and storing the address of the first byte of the table in the BIOS data area in the external pointer interrupt location (label EXT_PTR at 7CH). A listing

shows a demonstration program that uses the absolute address extensions of Turbo Pascal. A figure shows the definition of a hollow box character.

"CUSTOM COMMANDS"
Mirecki, Ted. Tech Notebook. 3:3 (Mar 1985):37.
DEBUG can be used to patch COMMAND.COM and rename DOS internal commands at the user's discretion. This makes it possible to replace internal commands with external ones and to eliminate the original DOS version of the command from the system.

"CUSTOMIZED BOOTS"
Abrash, Michael and Dan Illowsky. 3:2 (Feb 1985): 150-159.
The system disk's boot record typically loads DOS, but custom boot record modifications can speed the booting process, save space on the disk, and permit faster disk production. A sample customized boot is listed in assembly language. Step-by-step instructions are provided for creating a specialized boot record.

"CUSTOMIZED SCROLLING"
Keller, Harry E. Programming Practices. 4:1 (Jan 1986):173-187.
Scrolling the screen of a PC can be accomplished using software and the registers of the 6845 display controller chip. These methods allow only vertical scrolling, not horizontal. BASIC and the assembly language programs are presented to correct this limitation and allow the user to scroll the screen horizontally. The programs move the characters within the display area so the upper left corner of the screen is always at the beginning of the buffer. Scrolling on both monochrome and graphics displays is detailed. Listings are included.

"DASHED CURSOR, THE"
Pierce, Paul. Tech Notebook. 3:12 (Dec 1985):47.
Programs that are run on a monochrome display sometimes return the cursor to the screen as a dash instead of an underline. The problem arises when BIOS sets the video mode for the CGA and a monochrome adapter actually is in use. An assembly language program that accompanies the article can be used to detect and correct an incorrect RAM cursor mode.

"DATA ACQUISITION"
Murray, William H. 3:7 (Jul 1985):101-108.
The IBM Data Acquisition and Control Adapter and supporting software for the PC/XT and PC/AT family permits four channels of multiplexed analog input, two channels of analog output, one 16-bit binary input port, one 16-bit binary output port, and one 16-bit addressable counter. The software support allows programming in FORTRAN (version 2.0 or Professional), C (Lattice version 2.0), and BASIC (compiled or interpreted). Listings explain how the adapter is accessed in each language.

"DATA INTERCHANGE"
Fastie, Will. Directions. 3:10 (Oct 1985):9-10.
Data interchange is the biggest problem facing developers today, yet little is being done to standardize data formats. Integrated software packages were designed to address the problem; they exchange data internally using proprietary data formats. However, integrated packages do not offer the same functionality as stand-alone products. Two text processing formats may be the seed for the broader standard: IBM's Document Content Architecture (DCA) and Adobe's PostScript language. The industry must agree to adhere to one format.

Relate and Report. Then Rest and Relax. With R&R, the Relational Report Writer™ for dBASE.®

The report writer dBASE is missing.

R&R helps prepare reports faster, easier, without programming — and without dBASE. Or print reports from your own dBASE programs with the R&R Runtime, *included with an unlimited-use license.*

More flexibility than you'll ever need.

Relate and report from up to 10 files at once, using one-to-one relations and one-to-many scans through dBASE indexes.

Free-form layout of text and fields anywhere on the report.

Calculate new fields with more than 60 predefined functions, including IF/THEN logic.

Eight sort levels. Eight independent record grouping levels. Compute running totals, or subtotals by group or by page.

Plain-English query, even allows date "wildcards".

The ease of use that saves you time.

1-2-3®-like commands. Move fields and text freely around on the screen. Timesavers like automatic trim and alignment.

Predefined field formats such as currency and commas, or create your own. Word-wrap character and memo fields within any width you specify.

Print selectively: underline, *italic,* **bold, combinations.**

Saved reports work even after file STRUCTUREs are MODIFYed.

Instant on-line HELP. Fully-indexed User's Guide. Tutorial.

Only $99. Satisfaction guaranteed.

Try R&R. If you aren't satisfied, just return it within 30 days for a full refund.

Order now. Call 800-325-9035.

Or call (617) 366-1122. Visa, MasterCard, check, COD, PO. Add $3 shipping, plus $2 if COD and 5% tax in Mass. Refunds only for purchases made directly from Concentric and Concentric Authorized Dealers. Works with dBASE III® and III PLUS.™ Not copy-protected.

Relate and report, then rest and relax — with R&R. A timesaving tool from the authors of 1-2-3 Report Writer™, dB Report Writer,™ and C.I.P® File Manager.

18 Lyman Street, PO Box 4063
Westboro, MA 01581-4063

Trademarks: dBASE, dBASE III, and dBASE III PLUS by Ashton-Tate; 1-2-3 and 1-2-3 Report Writer by Lotus Development Corporation; R&R, dB Report Writer, and C.I.P by Concentric Data Systems, Inc.

CIRCLE NO. 260 ON READER SERVICE CARD

"DAVONG'S MULTILINK: VERSATILITY AT A MODERATE PRICE"
Glinert-Cole, Susan. 1:6 (Mar 1984):78-87.
Davong's MultiLink is a powerful, token-passing, high-performance, reasonably priced, local area network for the IBM PC. Installation of the network is more complicated than a straight-line bus configuration. Figures show MultiLink's topology and directory structures. Benchmark results of MultiLink running with hard disks from IBM and Davong are given in tables.

dBASE II—Ashton-Tate
"Some Technical Aspects of dBASE II." 1:9 (Jun 1984):56-63.

"dBASE II BECOMES C-WORTHY"
Foard, Richard M. 1:9 (Jun 1984):194-198.
C to dBASE II (Computer Innovations, Inc.) is a subroutine library that manipulates dBASE II files using the C language. Seventy-eight C subroutines are supplied on disk in both source form and relocatable code. The package consists of four C source modules. C2DBASE is a sample application program that serves as the documentation for the package. A figure shows a sequence of calls to C to dBASE II.

"dBASE II FILE STRUCTURES"
Townsend, Carl. 1:9 (Jun 1984):46-55.
The internal format of dBASE II data files and index files are discussed as well as the B-tree indexing system. Figures illustrate various kinds of data management systems and the B-tree indexing system. A program to recover damaged dBASE II data files is listed. A sidebar describes query operations in dBASE II using the relational algebra operations of permutation, select, join, and project.

"dBASE II HANGS ON"
Fastie, Will. Directions. 1:9 (Jun 1984):5-6.
Despite the decline of VisiCalc, both WordStar and dBASE II continue to have strong presences in the PC marketplace. dBASE II's success stems from its competent implementation, the strong aftermarket of support tools, and the number of people able to write dBASE II programs.

"dBASE II PROGRAMMING TECHNIQUES"
Lakner, Peter and Doug Sherman. 1:9 (Jun 1984):72-78.
A procedure is discussed that overcomes dBASE II's limitation of seven active indexes per file. An eighth index can be maintained as a separate .DBF file containing limited data. Tables illustrate creation of the eighth key. Listings provide programs for accessing and maintaining data in the special key file.

"dBASE II WITH AMBITION"
Olfe, Michael. 1:9 (Jun 1984):181-191.
Three screen/report generators for use with dBASE II are evaluated: SED (Ashton-Tate); MAPGEM (Lambda Associates); and EZdBASE (Automated Office Systems). Benchmark test results are given in the article. Figures show sample screens generated by each one.

dBASE III—Ashton-Tate
"Take III." 3:1 (Jan 1985):64-84.

dBASE III PLUS—Ashton-Tate
"Evolving Standard, A Data Manager with an." 4:5 (May 1986):166-188.

dCLOCK—Microsync, Inc.
"Slotless Clock, A." Product of the Month. 4:9 (Sep 1986):29.

DEBUG (included with PC-DOS)—IBM
"Entomological Explorations." 3:1 (Jan 1985):88-105.

"DEBUGGING"
Fastie, Will. Directions. 1:8 (May 1984):5-6.
Debugging is an art that requires practice, experience, intuition, and creativity. Debugging tools are essential to producing reliable software. Most processors are built with facilities for the construction of powerful software debugging tools. *Letter References—2:2 (Aug 1984):26.*

"DEBUGGING DUO"
Brecheen, Cole. Product Watch. 4:3 (Mar 1986):180-182.
Major Software's Debugging Duo consists of two utilities, Tidy and PascalPac, designed to help with programming in Pascal. Tidy accepts any error-free Turbo Pascal source file and produces indented code with well-placed comments and capitalized reserved words. PascalPac consists of four utilities: X-REF, a source file cross referencer; X-RAY, which uses the output of X-REF to find identifiers and display them in context; X-PRINT, a program for printing text files; and X-PEEK, a version of X-RAY that does not use the output of X-REF.

"DEFINING FUNCTION KEYS USING ANSI.SYS"
Gleckler, Arthur A. Tech Notebook. 1:6 (Mar 1984):77.
An IBM Pascal program lets the user define keyboard macros for the function keys (a listing of the program is included). The program passes definition strings to ANSI.SYS, the keyboard device driver that first appeared with DOS 2.0. A device driver stands between a program and the device the program operates. These ANSI.SYS keyboard definitions do not hold under IBM BASIC.

DESKPRO 286—Compaq
"Compaq Deskpro 286." 4:8 (Aug 1986):80-91.

"DESKTOP MAINFRAME"
Greenfield, Steven and Alan Pendleton. 3:11 (Nov 1985):86-97.
The IBM AT/370 can act as a PC/AT, a dumb terminal connected to a mainframe, or an independent workstation that is compatible with the standard System/370 mainframe. The machine described is actually an Enhanced PC/AT with the 370 option, which emulates the System/370 instruction set; and the 3278/79 emulation board, which is responsible for all mainframe communications. The AT/370 uses the VM/PC (Virtual Machine/Personal Computer) operating system. Figures illustrate the system and tables show the CP and CMS commands supported and benchmark test results.

DESMET C DEVELOPMENT PACKAGE—C Ware
"State of C, The." 4:1 (Jan 1986):82-108.

DESQVIEW—Quarterdeck Office Systems
"Concurrent Environments." 3:12 (Dec 1985):52-65.

"Beyond COM2." 4:9 (Sep 1986):68-79.

"DIGITAL DESIGNS"
Murray, William H. 3:3 (Mar 1985):112-121.
Micro-Logic version 2.5 (Spectrum Software) is computer-assisted circuit analysis and design software for digital electronic circuits with an IBM PC. Two main modules create and simulate the circuit. Tables list the program's key commands and supported maximum design specifications. The program is menu driven with defaults for common circuit features. Figures diagram the program's design and analysis features.

DIGITAL RESEARCH C—Digital Research, Inc.
"C and the PC, Part 2." 1:4 (Jan 1984):91-140.
"State of C, The." 4:1 (Jan 1986):82-108.

"DIGITAL-TO-ANALOG, ANALOG-TO-DIGITAL"
Aitken, Peter G. 1:6 (Mar 1984):104-116.
Tecmar, Inc.'s Lab Master provides a powerful and flexible interface for the IBM PC. The board has 16 single-ended or 8 differential A/D channels, two D/A channels, five 16-bit counter/timers, and 24 digital I/O lines. The Lab Master performs very well in a lab but is not software supported and should not be considered unless the requisite programming skills are available. A photo shows the Lab Master board. The motherboard and the register access for the 9513 timer are shown in figures. A table gives port assignments for the Lab Master.

"DIGITIZING ANALOG DATA"
Miller, Eric M. 4:5 (May 1986):52-71.
Various boards made by the following companies are reviewed: Burr-Brown; Data Translation; IBM; MetraByte; Scientific Solutions, Inc.; Strawberry Tree Computers; and Western Telecomputing. An ideal data acquisition board is described. The various stages of the board—input protection circuitry, multiplexer, instrumentation amplifier, sample-and-hold amplifier, analog-to-digital converter, analog output, and parallel and timer I/O channels—are all detailed. Tables list features of the various boards, significant components used in the boards, electrical charac-

teristics, and digital-to-analog characteristics. A figure shows a block diagram of a typical data acquisition system. *Letter References—4:10 (Oct 1986):24-26.*

"DIPPING INTO DIRECTORIES"
Mirecki, Ted. 3:2 (Feb 1985):67-77.
The file allocation table (a vestige of DOS 1.1) can be used to treat subdirectories (a new feature of DOS 2.0) as files. This gives the programmer complete control over subdirectory structure. The listing PACKDIR.ASM demonstrates the concepts by eliminating wasted space in subdirectory entries. A sidebar with a listing shows how to code .COM files with multiple segments.

DIRECT.CONNECT—Direct.aid Inc.
"High-tech Mimicry." 2:3 (Sep 1984):46-55.

"DISAPPEARING CURSOR, THE"
Forgeron, Ted. Tech Notebook. 3:7 (Jul 1985):35.
Three different ways to remove the cursor from a text display are presented. Placing the cursor below the bottom of the screen or giving it nonexistent scan lines often works, but the most reliable method is to give an invalid argument to the BIOS set-cursor-type routine. Assembly language examples of the techniques are listed.

"DISARMING DOS FORMAT"
Folts, James A. Tech Notebook. 2:1 (Jul 1984):32.
If the user executes the DOS FORMAT command without specifying a drive, and the hard disk is the default drive, the entire hard disk will be reformatted. However, the FORMAT.COM program can be modified to issue an "Invalid drive parameter" error message if the user accidentally attempts to format the hard disk. If the disk really needs to be reformatted, the original, unpatched version of FORMAT can be used. *Letter References—2:3 (Sep 1984):20; 2:4 (Oct 1984):14; 2:5 (Nov 1984):21-22.*

"DISKETTE CLEANING"
Fastie, Will. Tech Notebook. 1:3 (Nov/Dec 1983):85.
Many products are available to clean the disk drive's read/write head, which accumulates deposits during use. A typical head cleaner consists of a normal diskette jacket with a fabric-based cleaning disk mounted inside instead of a mylar storage diskette. A cleaning solution is applied to the cleaning disk, and the drive motor spins the disk against the heads to remove contamination. A utility program is provided that spins the disks for a specified period of time during cleaning.

"DISKETTE COPY SERVICES"
Woram, John W. 1:6 (Mar 1984):154-163.
Disk duplication services are available that will copy and serialize computer disks, design and package individual software programs, and advise the programmer about marketing and distribution techniques. A table compares the offerings of eight disk duplication services: Allenbach Industries, Inc., Computer Media Products, DisCopy Labs, IBM, I/O Management, Wabash Data Tech, Logic General Corp., and Hoffman Computer Products.

DISKETTE/FIXED-DISK ADAPTER FOR THE AT—IBM
"Analyzing the Advanced Technology." 2:6 (Dec 1984): 40-56.

"DISPLAY CHARACTER SET CUSTOMIZATION"
Brink, Dan. 1:1 (Jul/Aug 1983):121-129, 196, 199.
A resident routine to print foreign language characters to the screen is presented. This program works only with WordStar, DOS 1.1 or earlier, and 64KB of memory or more. A translation table determines which regular characters are displayed as foreign language characters. The article also gives instructions for preparing a screen customizer. Assembly language listings shows how to modify and use the table. A figure also shows conversions from hexadecimal to decimal.

DISPLAY MANAGER—Digital Research, Inc.
"Screen Composure." 3:4 (Apr 1985):149-159.

"DISPUTING THE RIGHTS TO CUSTOM-DESIGNED SOFTWARE"
Oppenheimer, Max Stul. Legal Brief. 2:1 (Jul 1984): 185-186.
Ownership rights in custom software must be identified. The parties' rights should be listed in a contract, including: the rights to sell, resell, use, license, or sublicense the software "as is;" control over software marketing; the translation of software into other languages; and future modification of software.

"DIVERSE ENVIRONMENTS, A DATA MANAGER FOR"
Christian, Chris. 3:8 (Aug 1985):52-71.
DataFlex from Data Access Corp. combines effective multi-database managment with a fourth generation language to meet the needs of microcomputer application developers. DataFlex is compatible with most Intel-based 8- and 16-bit single- and multiuser operating systems. Files are composed of fixed-length records. An indexed sequential access method with a B-tree stucture is used for multikey indexes. A listing provides a program that allows the novice end user to create ad hoc multifile reports in DataFlex. Benchmark results are listed in a table, and a sidebar provides an overview of the package. *Letter References—3:11 (Nov 1985):20-29.*

"DIVERSIONARY BENCHMARK, A"
Glinert-Cole, Susan. 1:1 (Jul/Aug 1983):95-98, 116, 194.
Four versions of the NCR Pascal p-System are timed against the IBM BASIC compiler. The benchmark program HAT is listed in BASIC and Pascal incarnations. Assembly language optimizations of p-System commands, details of real number implementation, and 8087 usage affected the benchmark times. Tables list two- and four-word reals. *Letter References—1:3 (Nov 1985):26-28.*

"DO-IT-YOURSELF DIGITAL-INPUT PORT, A"
DeMers, Raymond. 2:5 (Nov 1984):193-195.
Figures illustrate how to adapt the IBM PC's serial port to generate an external interrupt and accept a four-bit input from switch or relay contacts. A table lists the four bits and their related pins. A BASIC program is listed to test the port's operation. External controllers may be used to input information into the computer via this port.

"DOCUMENTATION THAT WORKS"
Covington, Michael A. 3:1 (Jan 1985):165-172.
Since software becomes usable only through its documentation, the documentation must be well written. A writer should know who the users are and address them at their level of proficiency. Suggestions are made for organization, clarity, and readability, as well as for dealing with printers and typesetters. *Letter References—3:5 (May 1985):18-20.*

DOS 3.0—IBM
"Irresistible DOS 3.0." 2:6 (Dec 1984):74-87.

"DOS COMMAND IBM FORGOT, THE"
Ritari, Douglas. 2:3 (Sep 1984):79-89.
EPSON.COM is an assembly language program that initalizes Epson MX-family printers to parameters selected by the user. Virtually all Epson parameters can be specified. Although designed for use with Epson printers, the program can be used to send command codes to any printer via a hexadecimal input mode. This mode allows a user to set up an arbitrary command sequence by entering hexadecimal numbers directly. A table shows segments, groups, and symbols used. *Letter References—2:5 (Nov 1984):14-20; 2:6 (Dec 1984):29-30.*

DOS COMMANDER—Connecticut Software Systems
"DOS Shells Continued." 2:4 (Oct 1984):36-48.

DOS EASE—Software Solutions, Inc.
"DOS Shells Continued." 2:4 (Oct 1984):36-48.

DOS SHELL—XTC Handcrafted Software
"DOS Shells Continued." 2:4 (Oct 1984):36-48.

"DOS SHELLS CONTINUED"
Gleckler, Arthur A. 2:4 (Oct 1984):36-48.
Various shell programs are available to make DOS easier to use. Each provides its own syntax and method of operation. Three DOS shells are compared and reviewed in this article: DOS Commander (Applitek), DOS Ease (Software Solutions, Inc.), and DOS Shell (XTC Handcrafted Software). DOS Commander and DOS Ease are designed for use on all PC Systems; DOS Shell requires a hard disk. Tables summarize features of the three products and function key assignments for a DOS shell. A figure shows a diagram of a DOS shell subdirectory map.

DOUBLEDOS—Soft Logic Solutions, Inc.
"Concurrent Environments." 3:12 (Dec 1985):52-65.

"DOUBLY CAREFUL"
Hultquist, Paul F. Tech Notebook. 3:11 (Nov 1985):56.
BASIC programmers must be especially careful when working with double-precision quantities, or they will produce only single-precision results. Listings show subtle programming errors that can cause calculations to lose precision, plus ways to avoid them.

DR FORTRAN-77—Digital Research, Inc.
"FORTRAN Options." 3:10 (Oct 1985):149-169.

"DRAFTING BY DESIGN"
Wright, Victor E. 4:1 (Jan 1986):50-65.
Autodesk, Inc.'s AutoCAD 2.1 incorporates many features found in larger computer-aided drawing (CAD) systems. It will run on several 16-bit microcomputers. AutoCAD is available in three configurations, ranging from a basic drawing program to one that includes two Advanced Drafting Extensions overlays. The full package is composed of a drawing editor, a plot program, and several utilities. The article describes program operation, drawing size, display control, layered drawings, nongraphic object attributes, special features, design extensions, plotting, communication, and performance. Photos demonstrate AutoCAD's capability. A figure outlines a piping menu.

"DRAWING AND ANALYZING CIRCUITS WITH MICRO-CAP"
Murray, William H. 1:6 (Mar 1984):88-102.
Micro-Cap (Microcomputer Circuit Analysis Program,

Spectrum Software) is an analog design program for electrical engineering work. The user can analyze a drawn circuit on the screen using any of three techniques. Analysis types are DC, AC, or transient. The results of an analysis can be typed as a data table or can be presented as a graph. The major limitation of this program is the limited number of components offered and the size of the circuit that can be viewed. Figures show screen displays of circuits and their analyses. Tables list components supplied by Micro-Cap and parameter values.

"DRAWING CIRCUITS"
Murray, William H. 3:5 (May 1985):113-118.
SMARTWORK (Wintek Corp.) is a computer-aided design (CAD) tool for designing printed circuit boards. The use of the program is illustrated with figures that follow step-by-step the stages in the design of a game adapter board. The designer can trace the path through a circuit by using a function key and the cursor. With an RGB monitor, the user can switch between viewing single-and dual-layer designs. A table of SMARTWORK commands is included.

"DRAWING TOWARD MONOCHROME"
Aitken, Peter G. 4:1 (Jan 1986):70-77.
The following five graphics cards, capable of displaying 640-by-200 or 320-by-200 resolution IBM Color Graphics Adapter (CGA) graphics on an IBM monochrome monitor, are reviewed: the Everex Graphics Edge, Genoa Spectrum, Paradise Modular Graphics Card, STB Chauffeur, and Tseng UltraPAK. Each is nearly 100-percent compatible with the CGA and resembles the monochrome adapter when in text mode. A sidebar covers the Everex Edge monochrome/color graphics adapter.

DRI LEVEL II COBOL—Digital Research, Inc.
"COBOL Performs, Part 2." 3:7 (Jul 1985):111-133.

"DROP-IN MODULES FOR C, PART 1"
Hunt, William J. 3:6 (Jun 1985):100-127.
This first of three articles reviews general-purpose libraries for the C programming language. The following libraries are reviewed: Building Blocks I (Software Horizons), C-Food Smorgasbord (Lifeboat Associates), C TOOLS (XOR Corp.), C Tools and C Tools 2 (Blaise Computing), C Utilities (Software Labs), C Utility Library (Essential Software), and Greenleaf Functions (Greenleaf Software). Most provide BIOS-level machine interface for C programs. *Letter References—3:10 (Oct 1985):16-20.*

"DROP-IN MODULES FOR C, PART 2"
Hunt, William J. 3:7 (Jul 1985):135-146.
Windowing packages for the C language were tested: Building Blocks II (Software Horizons), C-lib (Vance Info Systems), CRIOS (LRM Systems), VSI-The Window Machine (Amber Systems), and Windows for C (Creative Solutions). Windows for C provides good general window support but does not support incremental updating. C-lib does not resolve overlapping window collisions but has extensive support for full-window and incremental updating. Building Blocks II provides many functions but little or no explanation. The Window Machine provides elaborate overlapping windows support with satisfactory performance but the manual is of little help. CRIOS implements only basic windowing. Tables summarize product features, ratings, and benchmark results.

"DROP-IN MODULES FOR C, PART 3"
Hunt, William J. 3:8 (Aug 1985):141-159.
This last of three articles evaluating C library products features three libraries devoted to IBM PC asynchronous communications support: Async Manager (Blaise Computing), Communications Library version 1.2 (Greenleaf Software), and Power Pack 3 (Software Horizons). Product features and benchmark test results are summarized in tables. Listings show sample programs.

DSBACKUP—Design Software, Inc.
"Backup Utility Performance." 4:3 (Mar 1986):78-83.

"DSD87"
Mitchell, Stanley. Product Watch. 4:10 (Oct 1986): 183-185.
Though functional for complex tracing tasks, the powerful symbolic debugger DSD87 is too clumsy for general use. Seven kinds of windows show registers, stack, 8087, and memory with source code symbols. The DSD87 macro language allows parameter passing, looping, and subroutine calling. Available in macros are keyboard scan codes, source code line executing, next breakpoint location, executing opcode, and address of next instruction. A table compares DSD87 to the standard for a symbolic debugger, Microsofts' SYMDEB.

EGA PAINT—RIX SoftWorks, Inc.
"Elegant Iconoclasm." Product of the Month. 4:10 (Oct 1986):31.

EGA PLUS—STB Systems, Inc.
"EGA Spectrum, The, Part 1." 4:10 (Oct 1986):80-86.

"EGA SPECTRUM, THE, PART 1"
Cockerham, John T. 4:10 (Oct 1986):80-86.
IBM's original Enhanced Graphics Adapter (EGA) and seven EGA-compatible boards are reviewed. The compatible boards incorporate the Chips & Technologies EGA chip set without IBM Color Graphics Adapter (CGA) emulation. Vendors reviewed include AST, PCs Limited, Genoa, STB, Tecmar, American Mitac, and Basic Time. A custom program was written for this article to test the more arcane features of the EGA at performance limits; all boards except IBM's original EGA passed all portions of the test. Assuming full CGA emulation is not required, all boards performed well.

"EGA STANDARD, THE"
Cockerham, John T. 4:10 (Oct 1986):48-79.
The architecture of the IBM Enhanced Graphics Adapter (EGA) is reviewed. IBM's documentation for the EGA has been minimal at best. As a result, many features of the board have not been understood. Several little-known features, such as soft text fonts and graphics blinking, are explained. Compatibility issues are discussed, focusing on the Chips & Technologies EGA chip set. An EGA testing program is presented that benchmarks EGA performance and compatibility and provides a code model for the use of most EGA-specific functions.

EGADS!—PCs Limited
"EGA Spectrum, The, Part 1." 4:10 (Oct 1986):80-86.

"8088 vs V20"
Jimenez, Juan and Steve King. 4:4 (Apr 1986):73-79.
The performance of NEC's V20/30 is compared to Intel's 8088/86. The additional instructions available on the V20/30 are described. Tables show the V20/30 versus 8088/86 register nomenclature, the V20/30 status word nomenclature, mappings, and benchmark performances. Two sidebars are concerned with the future of the V family and the compatibility and performance of the V20. Two Pascal listings show the benchmark tests. *Letter References—4:7 (Jul 1986):24.*

8088/8087—Intel Corp.
"8087 Performance Considerations." 1:2 (Sep/Oct 1983):30-47.

"8087 PERFORMANCE CONSIDERATIONS"
Sarnak, Neil and Eric Jaffe. 1:2 (Sep/Oct 1983):30-47.
The 8087 numeric data processor may be used in an IBM PC as a companion to the 8088 chip. The 8087 is able to perform arithmetic and transcendental mathematical operations on 18-digit integers and real numbers. The 8087 instruction set contains more sophisticated constants than the 8088's. A table lists speed of calculation using 8087 chips for various Pascal and BASIC programs. A photo shows the 8087 chip. A directory lists various suppliers of 8087 chips and related software.

87 DEBUG—Microway, Inc.
"Entomological Explorations." 3:1 (Jan 1985):88-105.

"ELECTRONIC MESSAGING"
Hansen, Augie. 3:2 (Feb 1985):141-149.
HOSTCOMM, HOST PCE-Mail, and HOST Conferencing System and Utilities III (Janadon Inc./WBS and Associates Inc.) are a set of software packages for bulletin boards or information services. Tables list public access HOSTCOMM Systems and Hayes Smartmodem switch settings. Photos show screen displays of user menus. Custom programs that may be added to HOSTCOMM with the programming shell feature are listed.

"ELEGANT ICONOCLASM"
Duntemann, Jeff. Product of the Month. 4:10 (Oct 1986):31.
EGA Paint from RIX SoftWorks, Inc. does not offer icons or obtrusive menus in an elegant paint program. EGA Paint works only on the IBM EGA or compatibles. It offers a low-profile command structure with removable pop-up menus using a mouse. Other features include pixel zoom features, text manipulation, and color adjustment.

"ELUSIVE ACQUISITION"
Miller, Eric M. Tech Notebook. 4:3 (Mar 1986):46.
A signal preconditioning circuit is described that can measure AC amplitude at high frequencies, outside the specified range of a data acquisition board. The circuit determines the RMS value of the AC waveform and converts it to a DC voltage that can be handled by the analog input channel on the data acquisition board. A figure illustrates the circuit.

EMERALD SERIES 4000/1 PS70—Emerald Systems
"Breaking the 32MB Barrier." 4:5 (May 1986):94-108.

"EMULATING THE 3278"
Addelson, Roger. 4:2 (Feb 1986):48-63.
The IBM 3278/79 is a high-speed intelligent terminal with full-screen capability, usually connected to a mainframe over high-speed binary synchronous lines. The article describes the functions of a 3278/79 emulation board and reviews eight coaxially connected 3278/79 emulation hardware software packages: Attachmate 3-N-1 COAX Adapter (Attachmate Corp.); FORTE PJ (Forte Data Systems); 3278/79 Emulation Adapter (IBM); IDEAcomm (IDEAssociates); IRMA 3270 board (Digital Communications Associates); LINKUP System Coax (Information Technologies); PCOX/PLUS (CXI); and Persyst/Emulex COAX/3270 (Emulex Corp.). A table compares the features of each product. *Letter References—4:9 (Sep 1986):17.*

ENCORE 1200B—Omnitel
"Communicating from Within." 3:9 (Sep 1985):60-77.

Can a small company with some exciting solutions for micro-mainframe communications take on a giant corporation like IBM and win?

Of course not. We'd be crazy to even try. IBM® is the standard. And it's becoming more so every day. That's why our powerful 3270-PC® Emulator is true blue. And that's why our emulator is the only system available that's 100% compatible with IBM's 3278/79® Emulation Adapter.

Attachmate is 100% compatible and we plan to stay that way. But compatibility doesn't mean that we can't improve on a good idea. That's why our emulator does a few things that the industry standard doesn't do.

Our 3-N-1™ Adapter is IBM *and* IRMA® compatible. It also gives you multiple sessions, windows, file transfer, graphics and IBM-standard API. And with Attachmate, you can mix coax, remote SDLC, and LAN workstations in the same network and make it work.

There are some other things that we do that give you more than 100%. You can find them out by asking for our free *Quick Reference Guide for Micro-Mainframe Communications*—complete with a chart comparing IBM, IRMA, and Attachmate.

1-800-426-6283

Attachmate

Micro-Mainframe Technology: We put our heart in it!

Attachmate Corporation
3241 118th S.E.
Bellevue, WA 98005
(206) 644-4010

Copyright ©1986, Attachmate Corporation. 3-N-1 is a trademark of Attachmate Corporation. IRMA is a registered trademark of Digital Communications Associates, Inc. IBM, 3270-PC, and 3278/79 are registered trademarks of International Business Machines Corporation.

CIRCLE NO. 296 ON READERS SERVICE CARD

"ENCRYPTION METHODS, PART 1"
Mansfield, Victor. 3:4 (Apr 1985):96-114.
A general ciphertext method is presented that explains frequency lists, Vigenere substitution alphabets, and columnar transpositions. Figures, tables, and photos illustrate encoding methods—from ancient to modern—along with active and passive code-breaking schemes. Listed Turbo Pascal programs perform simple substitution and transposition encryption on files. *Letter References—3:8 (Aug 1985):16.*

"ENCRYPTION METHODS, PART 2"
Mansfield, Victor. 3:5 (May 1985):157-167.
Two widely used encryption algorithms are discussed in general terms. They are the public key algorithm of Rivest/Shamir/Adleman (RSA) and the federal government's data encryption standard (DES). Tables and a flowchart explain RSA. The topic of secure digital signatures is included. The exact workings of DES are secret, but an illustrated discussion of permutation boxes and substitution boxes explains what is known about DES.

"ENCRYPTION SOFTWARE"
Mansfield, Victor. 3:6 (Jun 1985):162-179.
Private key encryption systems rely on the secrecy of a key specifying the character substitutions and transpositions that accomplish the encryption. Public key systems have two keys: a public key that anyone can use to encrypt a message to the encryption key owner, and a private decryption key known only to its owner for decrypting messages encrypted with the public key. The private key systems reviewed are Data Encoder (IBM); Data Padlock (Glenco Engineeering); P/C Privacy (MCTel); Super Encrypter II (Obsidian Computer Systems), and SuperKey (Borland). The public key systems reviewed are Crypt Master (Digital Signature) and PhasorCode 1000 (International Phasor Telecom).

"END-USER DEVELOPMENT, A DATA MANAGER FOR"
Browning, Dave. 4:9 (Sep 1986):146-174.
DataEase from Software Solutions, Inc. is a menu- and form-driven, single-user data management system based on the entity-relationship model. The product uses a structured procedural language, yet it is optimized for the end user. DataEase is distinguished by its use of forms, which are the visual representation of data. Two report facilities are provided, including a data query and a reporting language. Benchmark results are listed in a table, and a sidebar provides an overview of the package. Figures show a form definition and a sample query.

"ENHANCED STANDARD, THE"
Fastie, Will. Directions. 4:10 (Oct 1986):13-14.
The editor considers the IBM Enhanced Graphics Adapter (EGA) as an industry standard. He takes into account the history of the EGA and its compatibles and looks toward the future of the EGA. In a sidebar, he criticizes IBM for its handling of the PC Convertible.

"ENHANCEMENT BY JRAM-2"
Awalt, Don. 3:3 (Mar 1985):92-99.
JRAM-2 (Tall Tree Systems) is a memory and multifunction board that uses memory by sharing address space. The JRAM technology uses software to map 64KB of memory to be used as PC memory. Sixteen "pages" of 64KB memory are possible. Software for a RAM disk, spooling, and archiving files is sold separately as are hardware options for a clock and parallel and serial ports. A table lists options and prices. Tables compare performance and features of the JRAM software and PC-DOS utility progams. A photo shows the board. *Letter References—3:6 (Jun 1985):18-19; 3:7 (Jul 1985):15.*

"ENSURING DATA INTEGRITY"
Daetwyler, Dan. Tech Notebook. 4:3 (Mar 1986):44.
A technique involving dual file handles is presented that protects against data loss even if a power surge occurs when a file is left open. A single file is accessed with two file handles. One handle is used to close the file and write the records, the file allocation table, and the directory safely to disk; the other handle maintains the file control block in memory at the same time, allowing the user to perform read or write operations.

"ENTITY-RELATIONSHIPS, A DATA MANAGER USING"
Foard, Richard M. 3:10 (Oct 1985):96-126.
ZIM from Zanthe Information, Inc. is an application development system written around a database management system. The package uses an entity-relationship database model. ZIM includes a full programming language that can invoke all of its data management, forms management, and report generating facilities. An integrated, comprehensive forms facility also is included. Benchmark results are listed in a table, and a sidebar provides an overview of ZIM. Listings show portions of the code used to implement the sample application. Figures show the entity-relationship and relational database models and the ZIM data dictionary.

"ENTOMOLOGICAL EXPLORATIONS"
Armbrust, Steven and Ted Forgeron. 3:1 (Jan 1985): 88-105.
Nineteen program debuggers are reviewed: BUGSCREEN (RDT Software); CodeSmith-86 (Visual Age); DEBUG (IBM); 87DEBUG (MicroWay, Inc.); GeneScope (Genesis Microsystems); ICE-88 (Intel); Mylstar Symbolic Debugging Program (Mylstar Electronics, Inc.); PC-Test (A.J.M. Associates); PDT-PC (Answer Software); Periscope (Data Base Decisions); Pfix86 and PfixPlus (Phoenix Computer Products); Soft-Scope (Concurrent Sciences); Software Probe, Software Source Probe, PC Probe, and Source Probe (Atron); SYMD (D+V Systems); and Trace86 (Morgan Computing Company, Inc.). *Letter References—3:5 (May 1985):16.*

"ENVIRONMENTAL ENGINEERING"
Fastie, Will. Directions. 3:3 (Mar 1985):9-10.
Several operating environments are available from IBM, including: PC-DOS, TopView, the 3270-PC window environment, and PC-Network. IBM is expected to settle on TopView. If IBM expects to promote TopView as a standard, consistent environment, it must improve TopView's performance. Readers are invited to submit their comments on *PC Tech Journal*, their observations on the market, and their experiences with IBM PCs.

"ENVIRONMENTAL EXCAVATIONS"
Stam, Robert B. 3:2 (Feb 1985):90-98.
IBM Pascal routines give access to the DOS 2.0 environment string, a system storage area where the user can store defaults for the printer or directory. IBM Pascal pointers and string types are discussed in the explanation of the routines. A figure shows the format of the environment string, and the listings provide an access procedure in the form of an easily integrated Pascal UNIT.

EPSON MX-80 III—Epson America Inc.
"Epson Technical Comparison." 1:2 (Sep/Oct 1983): 130-134.

"EPSON TECHNICAL COMPARISON"
Gleckler, Arthur A. 1:2 (Sep/Oct 1983):130-134.
Although the Epson FX-80, RX-80, MX-80, and the IBM Graphics Printer are all manufactured by Epson, they are not completely compatible with respect to control codes. Tables compare the features and commands of the four printers. Suggestions for maintaining program compatibility with all four printers are provided. *Letter References—1:4 (Jan 1984):16.*

"EPSON'S NEW RX-80 AND FX-80"
Gleckler, Arthur A. 1:2 (Sep/Oct 1983):125-128.
The Epson RX-80 and FX-80 are PC-compatible dot matrix printers. The RX-80 prints at 80 characters per second (cps) and the FX-80 at 160 cps. Both have a high-density 1,920-dot graphics mode that operates more quickly on the FX-80 because of its nine-pin printhead. The most significant feature of the FX-80 is its ability to download character sets and to operate in a proportional print mode. Photos show the Epson RX, FX, and older MX-80 printers. Whereas the RX-80 is essentially nothing more than a fast version of the MX-80 III, the FX-80 is a distinct advance in Epson printer technology.

"EQUATION SOLVING BY FORMULA/ONE"
Wright, Victor E. 4:6 (Jun 1986):110-125.
A spreadsheet for engineers, Formula/One from Alloy Computer Products, Inc. is a simultaneous equation solver with extra functions for scientific and economic calculations. A photo of a sample screen shows that memory is organized in sheets, with equations, variables, units, and graphics each located on a different sheet. Figures show the step-by-step problem solving process, and a table lists special functions. A sidebar considers the similar equation solving capabilities of TK!Solver.

ERA 2—Microcom, Inc.
"Communicating from Within." 3:9 (Sep 1985):60-77.

ETHERLINK—3COM Corp.
"EtherSeries." 1:3 (Nov/Dec 1983):86-106.
"Two Views of the LANscape." 1:4 (Jan 1984):54-65.

ETHERMAIL—3COM Corp.
"EtherSeries." 1:3 (Nov/Dec 1983):86-106.
"Two Views of the LANscape." 1:4 (Jan 1984):54-65.

ETHERNET—3COM Corp.
"EtherSeries." 1:3 (Nov/Dec 1983):86-106.
"Sharing Files." 2:5 (Nov 1984):99-115.

ETHERPRINT—3COM Corp.
"EtherSeries." 1:3 (Nov/Dec 1983):86-106.
"Two Views of the LANscape." 1:4 (Jan 1984):54-65.

"ETHERSERIES"
Churchill, Bruce W. 1:3 (Nov/Dec 1983):86-106.
EtherSeries is a local area network (LAN) from 3COM for use with IBM PCs. It is a baseband-modulated, distributed-bus-topology network. Hardware consists of coaxial cable, EtherLink adapter cards, and EtherShare network servers. Software is managed by the EtherShare adminis-

trative program. Password protection is documented. Figures illustrate protocol models and hardware configurations. Tables list network capacities and costs.

ETHERSHARE—3COM Corp.
"EtherSeries." 1:3 (Nov/Dec 1983):86-106.
"Two Views of the LANscape." 1:4 (Jan 1984):54-65.

"EVALUATING DATA MANAGERS AS DEVELOPMENT TOOLS"
Anderson, Julie A. 3:8 (Aug 1985):46-51.
A series of articles that reviews and evaluates data management software packages for the IBM PC begins with this article. Each review is to be written according to a standard format that considers the database model used and the data types supported, internal programming features, file and screen generation utilities, data protection and security facilities, and date import/export capabilities. For packages that are PC versions of mainframe products, compatibility and interchangeability of data formats and program code are evaluated. As part of the review process, the editorial inventory system described in the sidebar accompanying this article will be implemented and tested. Tables show sample files. *Letter References—3:11 (Nov 1985):20-29.*

"EVOLUTION OF THE iAPX 286, THE"
Greene, Bob. 2:6 (Dec 1984):118-136.
Intel's iAPX 286 has two modes of operation, Real Address Mode and Protected Virtual Address Mode, and is the most powerful microprocessor to date in the iAPX family. The 80286 is designed for multitasking capabilities and high-performance systems. An evaluation of the 80286 is presented, beginning with a history of the modern day microprocessors. Design of the iAPX 286 concentrates on performance, virtual memory support, and multitasking support including protection. Enhancements, such as functional partitioning, segmentation, pipelining, and memory management, are examined. A compatibility guide is given for programmers writing code to run on the iAPX line of microprocessors.

"EVOLVING STANDARD, A DATA MANAGER WITH AN"
Dave Browning. 4:5 (May 1986):166-188.
dBASE III PLUS from Ashton-Tate improves on the dBASE product line by adding local area network support, more features for developers, and a new interface for end users. It is a relational database manager; linkages can be established between data files in 10 different work areas. The command language includes the features of a general purpose structured language with additional commands for the manipulation of data files. Benchmark results are listed in a table, and a sidebar provides an overview of the package. A listing provides the sample application program to print labels. Figures show interfile relationships and the interactive query process. *Letter References—4:9 (Sep 1986):24; 4:9 (Sep 1986):10.*

"EXCEEDING THE SPEED LIMIT"
Puckett, Thomas. 3:6 (Jun 1985):87-97.
The reviewed accelerator boards add hardware to the computer to make the CPU run faster. Kamerman Labs' Superflight board replaces the PC's 8088 with an 8086 chip. Orchid Technology's PCturbo-186 supplements the 8088 with an 80186. The speed of I/O-bound tasks will not be appreciably increased by these boards, but in areas where raw computational speed is important, these boards can reap dramatic performance improvements. The article details the Superflight and PCturbo-186 boards, analyzing their performance compared to a standard IBM PC and PC/AT. A figure illustrates the organization of a PC, showing how an accelerator board can increase the PC's speed. Tables show the features and test results. *Letter References—3:10 (Oct 1985):23.*

EXCEL—Everex Systems, Inc.
"Moving up to Tape." 3:11 (Nov 1985):62-83.

"EXPANDABLE MEMORY"
Mirecki, Ted. 4:2 (Feb 1986):66-83.
The Lotus/Intel/Microsoft Expanded Memory Specification (LIM EMS) provides a standard bank-switching approach for developers to follow in creating software for PCs with expanded memory. This article tests AST's RAMpage! and Intel's Above Board, and gives a complete description of the EMS standard and implementation. The differences between the LIM EMS and enhanced EMS put out by AST Research, Quadram, and Ashton-Tate are shown in figures. Although the enhanced specification is a superset of the LIM EMS, the support of Microsoft indicates that the LIM EMS version will be the most accepted at present. A sidebar considers the I/O address space.

"EXPERIMENT IN SOFTWARE MARKETING: FREEWARE, AN"
Foard, Richard M. 1:2 (Sep/Oct 1983):158-161.
Andrew Fluegelman's marketing plan for PC-TALK is reviewed. The plan allows users to try the product before sending in a voluntary contribution. The "freeware" philosophy is based on the assumption that most people are willing to pay for quality in a software product if it is offered for a reasonable price.

"EXPORTING TECHNOLOGY"
Oppenheimer, Max Stul. Legal Brief. 3:6 (Jun 1985):191-192.
Because of complex regulations from the U.S. Commerce Department, the export of technical data to foreign countries is not for amateurs. The regulations were established for reasons of national security, the furtherance of U.S. foreign policy, and the protection of the domestic economy. The degree of control exercised over exports depends on the type of commodity and the destination country. The regulations are extremely complex, and should not be negotiated without legal help.

"Sixteen-color Graphics." Programming Practices. 4:8 (Aug 1986):159-171.

"FEDERAL ENCOURAGEMENT"
Oppenheimer, Max Stul. Legal Brief. 4:1 (Jan 1986): 189-192.
The Congressional Budget Office (CBO) has issued a report entitled "Federal Financial Support for High Technology Industries." The report analyzes what federal encouragement exists for high-tech companies to do more research and development. Federal support can take many forms: direct spending, tax benefits, favorable regulatory environment, tariffs, and government-sanctioned monopolies.

"FIELDING WITH BASIC"
Volkstorf, J. Edward Jr. Tech Notebook. 3:6 (Jun 1985):42.
Two clever uses of the BASIC FIELD statement are given in program listings. Multiple FIELD statements allow a single record's data to be interpreted in several not-so-obvious ways. A modification of the technique allows creation of binary records in a random access file.

"FIELDS, ITEMS, and SYSTEMS"
Naddor, Eliezer. 2:5 (Nov 1984):117-131.
INFORM is an information storage and retrieval system written by the author in BASIC. The organization of the INFORM system is explained, including the field types and validation criteria supported. Date and alphanumeric fields are stored in a packed format to conserve disk space. Tables describe items and fields. Program listings illustrate packing and unpacking these field types.

"58 EASY PIECES"
Gleckler, Arthur A. 1:5 (Feb 1984):180-183.
Peeks 'n Pokes for the IBM PC is a collection of programs and techniques for assembly language, BASIC, and Pascal programmers. Twenty-two programs that can be executed from a main menu program are provided. One of the programs (DOS) allows the menu-driven execution of 35 DOS/BIOS function call programs. A table lists the contents of Peeks 'n Pokes. Figures show the program's main menu and the DOS/BIOS function calls menu.

"5251 CONNECTION, THE"
Kaplan, Gerry. 4:7 (Jul 1986):76-89.
This article provides an introduction to 5251 connectivity technology. Seven 5251 emulation products for the IBM PC are reviewed: AST-5251/11 and AST-5251/11 Plus (AST Research); BlueLynx 5251-11 I, II, and III (Techland Systems); CXI PCOX/5251 TWINAX Emulator (CXI, Inc.); IDEA 5251 Emulator and 5251D Monitor Adapter Card (IDEAssociates); PC-Mini (Ampak Business Systems, Inc.); Quad5251 (Quadram Corp.); and Smart Alec (Digital Communications Associates). A table compares features. Figures show the asynchronous terminal/host connection scheme, the System/36 twin-axial connection scheme, and the 5251/12 cluster connection scheme.

5251 MONITOR ADAPTER CARD—IDEAssociates
"5251 Connection, The." 4:7 (Jul 1986):76-89.

FIGUERAS, JOHN
"Saving Space in Turbo." Tech Notebook. 3:6 (Jun 1985):39.

"FILE-SEARCH HELP FOR PC-DOS"
Gleckler, Arthur A. 3:4 (Apr 1985):138-145.
FilePath (SDA Associates), SCOUT (Computer Insights, Inc.), and EasyPath (Polygon Software Corp.) are three programs intended to enhance the file-search capabilities of DOS 2.0 by providing directory-management features, such as possible use of aliases and search rules. Of the three programs, FilePath is the best bet for novices, and EasyPath is the most flexible. A table provides acomparison of the programs' features.

FILECOMMAND—IBM
"Shell Game, The." 1:3 (Nov/Dec 1983):30-41.

"FILE-NAME EXTENSIONS"
Gleckler, Arthur A. Tech Notebook. 1:3 (Nov/Dec 1983):203.
DOS uses file-name extensions in order to describe various types of files. Twenty-nine file-name extensions and their meanings are listed.

FILEPATH—SDA Associates
"File-search Help for PC-DOS." 3:4 (Apr 1985):138-145.

FILESAFE—Mountain Computer
"Backing Up the AT With FileSafe." 2:6 (Dec 1984): 150-153.

"FILTERS AND FINITE MACHINES"
Loen, Larry W. Programming Practices. 4:2 (Feb 1986):181-190.
A tutorial is presented that describes the filter method (a file processing technique used in UNIX) and finite machines (an input stream-processing algorithm used in compilers). A listing provides a program written in Turbo Pascal that uses both techniques to sum file sizes. The algorithms make the program very readable, which allows it to interface cleanly with DOS.

FINAN, PATRICK
"Accessing the Print Queue." Programming Practices. 4:6 (Jun 1986):187-193.
"Packing the Date and Time." 3:1 (Jan 1985):46-54.

"FINDING DISK PARAMETERS"
Roberts, Glenn F. 4:5 (May 1986):112-150.
DOS maintains information about the nature, capacity, and organization of each storage device with which it interfaces. This article summarizes the various sources that provide information on DOS storage devices, including documented DOS function calls, the file allocation table (FAT), the DOS boot record, the master boot record, and the undocumented DOS function call 32H. Two utilities in C—INFO and SHOW—demonstrate access to the DOS information. Figures show the format of the DOS boot record header, a FAT chain, and sample output from INFO and SHOW. A table lists disk information sources. *Letter References—4:10 (Oct 1986):19.*

FIRST MATE—Tecmar, Inc.
"Multifunction Boards for the PC." 1:4 (Jan 1984):66-73.

"FIX FOR DOS USERS WITH UNIX HABITS, A"
Roskos, J. Eric. Tech Notebook. 2:2 (Aug 1984):73.
SWITCHAR=x is an undocumented DOS command that can be included in a CONFIG.SYS file to allow use of the forward slash (/) as a directory name delimiter.

"FIXED-DISK BENCHMARKS"
Hunt, William J. 2:5 (Nov 1984):64-70.
Utility programs written in C are provided for testing hard-disk performance. Tests measure sequential read performance across 1, 8, 16, and 24 sectors, and random read performance of 1 or 8 sectors across .1, .33, .5, and .9 of the width of the disk. A comparison charts summarizes the performance of the IBM diskette, RAM disk, PC/XT hard disk, and the Compaq Plus hard disk. *Letter References—3:5 (May 1985):14-16.*

"FLEXIBLE DESIGNS, A DATA MANAGER FOR"
Aarons, Richard N. 4:6 (Jun 1986):156-182.
KnowledgeMan/2 (KMAN) from Micro Database Systems, Inc. is an application development system using a relational database, a structured programming language, an SQL-like query language, and an integrated spreadsheet. Any KMAN command or feature can be invoked from anywhere in the KMAN environment. KMAN has its own Pascal-like program control structures and commands. The documentation is a strong point. Benchmark results are listed in a table, and a sidebar provides an overview of KMAN. A figure shows sample screen definitions.

"FLICKER-FREE SCROLLING"
Abrash, Michael. Tech Notebook. 4:9 (Sep 1986):43.
A program called SCROLLER.ASM eliminates the BIOS-related flicker that is produced by the Color Graphics Adapter and compatibles when scrolling in text mode.

"Emulating the 3278." 4:2 (Feb 1986):48-63.

"FORTH"
Kelly, Mahlon G. and Nicholas Spies. 4:9 (Sep 1986): 48-61.
This article presents a detailed tutorial showing how to write a FORTH interpreter. In the process, useful assembly language techniques, such as programming with short functions, threading, and efficient subroutine calling on the 8088, are explained. Figures show threaded execution of a FORTH program, a FORTH memory map, word format, various child-word structures, the hierarchy of FORTH words, the FORTH outer interpreter. A sidebar examines various FORTH standards and demonstrates a typical but nonstandard DOS interface with an address entry program. The program is listed.

"FORTH PROGRAMMING"
Kelly, Mahlon G. and Nicholas Spies. 4:10 (Oct 1986):133-143.
Instructions are provided for writing a text editor in FORTH that demonstrates proper top-down and bottom-up programming style. The editor processes text in FORTH program format. A circular deletion buffer allows an unlimited UNDO command. Step-by-step instructions show why FORTH generates efficient code with few bugs. Figures illustrate design specifications and the memory layout of the screen buffer and the deletion buffer.

"FORTRAN OPTIONS"
Howard, Alan. 3:10 (Oct 1985):149-169.
Four FORTRAN 77 compilers are reviewed: Digital Research, Inc.'s FORTRAN; IBM FORTRAN; Lahey Computer Systems, Inc.'s F77L compiler; and Microsoft FORTRAN. Tables compare compiler features and benchmark results. Listings show null-program, trigonometric, and Eratosthenes' sieve benchmarks, as well as a FORTRAN-adapted version of the Pentathlon benchmark. *Letter References—4:2 (Feb 1986):20-24; 4:3 (Mar 1986):18-22.*

"FORTRAN PITFALLS"
Press, Larry, Aki Runchal, and Clement Tam. 1:2 (Sep/Oct 1983):150-156.
The limitations of the IBM/Microsoft FORTRAN version 1.0 compiler are examined. The compiler places a 64KB limit on any labeled common block; a 32KB limit on any dimensioned array; and a general limit of 300KB on final .EXE file size. IBM FORTRAN is a subset of the FORTRAN-77 standard (the shortcomings of which are discussed). A table provides standard Whetstone benchmark test results for IBM FORTRAN and compares these with similar FORTRAN products running on various mini- and microcomputers. A table lists 23 bugs found in IBM FORTRAN version 1.0. *Letter References—1:5 (Feb 1984):26.*

"FORTRAN SCIENTIFIC SUBROUTINE LIBRARY"
Lima, Tony. Product Watch. 4:5 (May 1986):201.
The FORTRAN Scientific Subroutine Library, by Wiley Professional Software, is for programmers using FORTRAN to develop applications in the areas of science, engineering, or advanced statistics. Algebraic functions include operations for real and complex matrices, interpolation, and polynomial differentiation. Statistical functions include probability, linear regression, variance, and time series. Other functions deal with utilities and graphics. DOS 2.0 or later and 128KB of RAM is required; an 8087 coprocessor is recommended.

"FORWARD-LOOKING VDI"
Armbrust, Steven and Ted Forgeron. 3:9 (Sep 1985): 42-55.
Virtual device interface (VDI) is a proposed ANSI standard for a graphics system interface. VDI would enable "device-driver factories" to produce device drivers to operate with any programs that conform to VDI calling conventions. A VDI program can perform five different graphics functions: workstation control, graphics output, graphics attribute, graphics input, and status inquiry. Figures show the device driver/program relationship, and graphics standards. Figures and photos show the same graphics image generated by different output devices. Tables compare memory requirements and VDI performance. Listings show sample programs.

"FOUR MULTIFUNCTION DISPLAY ADAPTERS"
Hoffmann, Thomas V. 1:4 (Jan 1984):32-43.
Four multipurpose display adapter cards for the IBM PC are reviewed: Multi-Display Adapter (Paradise Systems), MasterGraphics Adapter (MicroGraphics Technology), Multiple Adapter Interface (Amdek), and PC-Mate Graphics Master (Tecmar). All adapters but the Graphics Master include a parallel port. A table compares the features of the various adapters. An accompanying sidebar gives a description of character generator formats. *Letter References—1:8 (May 1984):14.*

"Beyond COM2." 4:9 (Sep 1986):68-79.

"FRACTALS FOR THE PC"
Lee, Eui In. 3:11 (Nov 1985):165-178.
Fractals are curves with irregularities, breaks, or fragmentation; they are generated recursively by breaking each successively smaller curve segment in the same manner. The process of creating a fractal curve begins with a line segment, called the initiator. The initiator is replaced by a simple shape, called the generator, and each line segment in this shape is replaced by a smaller replica of the generator. Three methods for producing fractal curves are presented: direct angle, array expansion, and string array. Photos and figures show sample curves. Listings show sample programs for generating the curves. *Letter References—4:3 (Mar 1986):18.*

"Program Editors." 1:2 (Sep/Oct 1983):110-123.

"FUTILITY OF COPY PROTECTION, THE"
Small, David. 3:12 (Dec 1985):71-77.
Several copy-protection techniques are explained. These methods include omitting a sector, generating a cyclic redundancy check (CRC) error, changing the sector interleave, numbering sectors in a nonstandard way, and altering the length of sectors. Other techniques involve changing the rotation speed of the disk, writing data on one track with a known spatial relationship to the next track, or writing nonstandard codes, as well as removing the ability to hold a magnetic field from a small area of the diskette, and writing data of different strengths onto the diskette. Hard disks are marked when the program is installed. Techniques for copy protection are being countered by more sophisticated copy programs. Flow charts show how one type of copy program works.

"GENSCREEN"
Noland, John C. Product Watch. 4:8 (Aug 1986): 180-181.
GENSCREEN is a screen generator for use with IBM COBOL version 1.0 and Microsoft COBOL version 2.0 and later. It is intended to reduce the time required to develop and maintain the screen section of a Microsoft COBOL program. It does not include a screen painter for screen format entry, relying instead on screen formats edited under ordinary DOS full-screen text editors.

"Creating a Standard LISP." 3:12 (Dec 1985):98-117.

"GOOD FIND, A"
Ackerman, Mark S. 3:10 (Oct 1985):85-91.
A program called WHERE.C can help users locate a misplaced file on a hard disk by searching through every subdirectory for the file. The program works with DOS 2.x and 3.x.; typical DOS wild cards are accepted. A listing provides code for the program. Figures show a sample screen print, a file attribute byte, and a disk transfer address. *Letter References—4:2 (Feb 1986):16-18.*

"GRABBING PARAMETERS"
Stam, Robert B. Tech Notebook. 3:2 (Feb 1985):46.
A very short IBM Pascal utility accesses the command line arguments with which a program was invoked. The arguments are to be found in the invoked program's PSP (program segment prefix).

"GRAPHIC ENHANCEMENT"
Hoffmann, Thomas V. 3:4 (Apr 1985):58-77.
IBM's Enhanced Graphics Adapter (EGA) is given a technical review. The EGA provides graphics to the monochrome screen and higher resolution in both color text and color graphics modes. It offers new features including smooth horizontal and vertical scrolling. EGA BIOS functions and I/O address usage are summarized in two sidebars. Tables describe the operating modes, the usage of BIOS and registers, the color palette, color mixing, and supported monitor specifications. Figures with block diagrams illustrate graphics memory organization and chip layout. EGA programming techniques are demonstrated with BASIC and assembly language examples. Photos show sample video display, the circuitry, and switches. *Letter References—3:7 (Jul 1985):19; 3:9 (Sep 1985):15; 3:10 (Oct 1985):15-16.*

"GRAPHICS"
Fastie, Will. Directions. 2:4 (Oct 1984):5-6.
SIGGRAPH '84 is discussed. Seeing PCs being used in graphics systems for a variety of purposes indicates that the PC has gained tremendous acceptance in the graphics community, not so much as a machine that can handle graphics, but as a standard frame upon which to build graphics systems. Significantly, the graphics applications are using high-powered graphics subsystems, not the IBM graphics adapter and monitor. Other hot items are the integration of video with computer-generated graphics and animation, and graphics hard-copy devices.

"GRAPHICS (AGAIN)"
Fastie, Will. Directions. 3:7 (Jul 1985):9.
At Spring '85 COMDEX some vendors were showing prototypes compatible with IBM's Enhanced Graphics Adapter (EGA) and IBM's Professional Graphics Controller (PGC). EGA is a powerful concept that provides high resolution and color, plus support for old operational modes. To make an EGA, a company must invest as much as $1.5 million. These companies are doing so in the belief that IBM has set a standard in the industry for EGAs and that non-IBM versions will help to proliferate the standard. The PGC on the other hand should not be a standard

because of its more limited market. Companies offering PGCs for less than $3,000 make graphics workstations on the AT possible for less than $10,000.

GRAPHICS DEVELOPMENT TOOLKIT—IBM
"Forward-Looking VDI." 3:9 (Sep 1985):42-55.

GRAPHICS EDGE—Everex Systems, Inc.
"Drawing Toward Monochrome." 4:1 (Jan 1986):70-77.

"GRAPHICS ON THE IBM MONOCHROME DISPLAY"
Duncan, Ray. 1:6 (Mar 1984):142-153.
Two all-points-addressable monochrome graphics boards are reviewed: the Hercules Graphics Card and the Orchid Technology Monochrome Graphics Adapter. While the Hercules board is intended as a replacement for IBM's Monochrome Display and Printer Adapter, the board from Orchid Technology resides in an adjacent slot and connects to the monochrome adapter via several cables. Although the two boards plot at essentially the same speed, software support from Orchid, intended primarily for the assembly language programmer, is better than that from Hercules.

"HARD (OR IS IT FIXED?) DISK REVOLUTION, THE"
Fastie, Will. Directions. 2:5 (Nov 1984):5-6.
When IBM introduced the XT in early 1983, 10MB became the industry standard for microcomputer storage. The 20MB disk drive of the new PC/AT has better performance characteristics than any available previously. IBM has established a de facto standard of hard-disk controllers for the XT, but not all third-party controllers are completely compatible. They all run PC-DOS without fail, but for true compatibility they must run PC/IX as well. *Letter References—3:3 (Mar 1985):17.*

"HEAD START ON PROGRAM GENERATION, A"
Christian, Chris. 1:9 (Jun 1984):146-177.
Autocode 1 from Axel Johnson Corp. is a program development tool for use with dBASE II. Although it is easy to use, its limitations may be disappointing. Autocode 1 generates dBASE II code for adding, finding, editing, and deleting records in a single file. It can handle a maximum of 32 fields. Simple columnar reports may also be generated. Autocode 1 is worth considering as a head start on writing dBASE II code. An editor's note briefly describes the additional features of Autocode Plus.

"Bubble Boards." 3:5 (May 1985):123-136.

HELIX RS-232 PORT, PASSWORD FEATURE—Helix Systems and Development Corp.
"Bubble Boards." 3:5 (May 1985):123-136.

"HELP!"
Fastie, Will. Directions. 2:1 (Jul 1984):5-6.
The trend in on-line help assistance techniques has been from plain menus to context-sensitive text. Context-sensitive help tends to be easier to dispense with as the user learns more about the software. Help facilities included with software should be designed to help the experienced user as well as the novice.

"HIGH-TECH MIMICRY"
Hansen, Augie. 2:3 (Sep 1984):46-55.
Ten communications software packages are evaluated in terms of their use as terminal emulation software. The programs are: Communique (Computerized Office Services, Inc.), Crosstalk XVI (Microstuf, Inc.), direct.connect (Direct.aid, Inc.), IBM 3101 Emulation Program (IBM), The Impersonator (Direct.aid, Inc.), Omniterm2 (Lindbergh Systems, Inc.), PC/InterComm (Mark of the Unicorn, Inc.), Relay (VM Personal Computing), SmarTerm 100 (Persoft Inc.) and SIMTERM (Jim Holtman). Tables compare the types of terminals emulated, VT 100 and 3101 terminal features. Recommendations: for VT 100 emulation, Smart Term 100 and PC/InterComm; for general use, The Impersonator, Omniterm 2, and Crosstalk XVI. *Letter References—3:1 (Jan 1985):13.*

"HOW TO CHOOSE A C COMPILER"
Hunt, William J. 1:1 (Jul/Aug 1983):78-91, 177-178.
The C programming language is a serious alternative to BASIC because it produces faster, more efficient code. A good compiler requires 128KB of RAM and two double-sided 360KB disk drives. Factors to examine when choosing a C compiler are size of compiler disk files, compiler speed, error messages, compatibility with DOS, support of the full C language, included library functions, interface with assembly language functions, and memory usage. Other criteria to examine are documentation quality, support of separate compilation, and production of .OBJ files. Included are tables with selection criteria for C compilers, disk drive set-up for a C compiler, and library functions. An index of available C compilers is included. *Letter References—1:3 (Nov/Dec 1983):26.*

HOWARD, ALAN
"FORTRAN Options." 3:10 (Oct 1985):149-169.

"HP VECTRA"
Armbrust, Steven and Ted Forgeron. 4:10 (Oct 1986):110-130.
The Hewlett-Packard Vectra, an IBM PC/AT-compatible computer, is reviewed. Some incompatibilities with the AT when running certain applications are noted. HP Vectra's hard-disk performance is comparable to that of the PC/XT but not to that of the AT. The machine's disk-mounting system is convenient, with the exception of third-party hard-disk drives, which may be difficult to install. The footprint of the HP Vectra is smaller than that the AT. Features such as the touchscreen, the multimode video adapter, soft keys, and the HP-HIL interface make the machine an attractive alternative for some users.

"IBM COLOR GRAPHICS ADAPTER, THE"
Hoffmann, Thomas V. 1:1 (Jul/Aug 1983):26-46, 135-145, 163-166.
This article provides a complete technical description and critique of IBM's Color Graphics Adapter (CGA). The CGA is built around the Motorola 6845 CRT controller and provides 25-by-40 text, 25-by-80 text, and two graphics modes: 320-by-200 four-color and 640-by-200 two- color. Screen/memory mapping is detailed in a figure. 6845 control registers and register bit functions are described in text and tables. Tables detail raster and retrace timings, color composition, definition of display positions with character code/attribute format, medium-resolution color sets, and standard video modes. Four demonsration programs illustrate CGA program techniques in BASIC. *Letter References—1:2 (Sep/Oct 1983):27; 1:3 (Nov/Dec 1983):26.*

"IBM SOFTWARE LICENSE, THE"
Oppenheimer, Max Stul. Legal Brief. 1:1 (Jul/Aug 1983):149-156.
The IBM Program License Agreement, which is attached to all IBM PC software and its legal implications are discussed. According to the agreement, IBM leases software programs to the user; the programs are not purchased outright. In addition, the agreement limits use of a program to a particular machine. IBM asserts that users accept the terms of this agreement when they open the package. However, the agreement may or may not be considered a legal and binding contract, depending upon the situation and state law. Figures show the agreement and a translation by the author.

IBM 3101 EMULATION PROGRAM—IBM
"High-tech Mimicry." 2:3 (Sep 1984):46-55.

IBM 3278/79 EMULATION ADAPTER—IBM

"IBM'S BASIC PROGRAMMING DEVELOPMENT SYSTEM"
Awalt, Don. 1:1 (Jul/Aug 1983):107-114.
IBM's BASIC Programming Development System was designed to provide development tools for BASICA programmers. It includes a structured preprocessor, text editor, listing formatter, and cross referencer. The preprocessor's structured macros (key words) are limited in power, and some of them are more confusing than their expanded BASIC code. The text editor is awkward, limited in power, and edits only 999 lines at a time.

"IBM'S NEW ALTERNATIVE TO LETTER-QUALITY PRINTING"
Gleckler, Arthur A. 1:8 (May 1984):162-166.
The IBM Typewriter Attachment Device is a small printed circuit board that is installed in IBM's Electronic 65 and 85 typewriters, allowing them to be connected to a standard PC parallel port. After a simple driver program is installed on the PC, characters can be sent to the typewriter as if it were a printer. It still can be used as a typewriter without being disconnected from the computer. This printing method lacks the convenience of an automatic single-sheet feeder or tractor-feed mechanism.

"Up, Down, Right, Left, and Check, Part 1." 1:4 (Jan 1984):46-52.
"Up, Down, Right, Left, and Check, Part 2." 1:5 (Feb 1984):93-116.

IMPERSONATOR, THE—Direct.aid Inc.
"High-tech Mimicry." 2:3 (Sep 1984):46-55.

"IMPRESSIONS FROM COMDEX"
Fastie, Will. Directions. 4:2 (Feb 1986):11-12.
The Fall '85 COMDEX is discussed. The Atari 520ST was present along with many third-party developers showing their wares for the machine. The Lotus/Intel/Microsoft Expanded Memory Specification (LIM EMS) has become a de facto standard; 30 major programs either are compatible now or will be soon. TheSys announced an 8MB CMOS RAM memory board and a 16MB solid-state hard disk with an access time of 10 microseconds. Microsoft Windows, heavily promoted at the show, now runs on many different machines. Network activity was high in the wake of the IBM Token-Ring announcement.

"IMPROVING TURBO'S I/O"
Brecheen, Cole. 3:9 (Sep 1985):104-132.
A large library of Pascal routines corrects the I/O deficiencies of the otherwise excellent Turbo Pascal version 2.0 compiler. The routines bring Turbo up to date by incorporating the enhanced file-handling and I/O functions of DOS 2.x and 3.x. The routines also provide terminal-independent screen I/O, a major improvement over Turbo's method of patching program .COM files to accommodate a new console. *Letter References—4:1 (Jan 1986):15; 4:3 (Mar 1986):16.*

"IN THE ISPF TRADITION"
Spraycar, Rudy S. 4:3 (Mar 1986):113-138.
Four implementations of ISPF for the PC are reviewed: APS/SPF 2.2 (Arrix Logic Systems, Inc.); HCS Editor (Heuristic Computer Systems); micro/SPF 3.2 (PHASER Systems, Inc.); and SPF/PC 1.82 (Command Technology Corp.). Each of the four implementations for the PC is compared to the IBM ISPF mainframe full-screen editor. Tables list function and control key defaults for the four editors, scrolling commands, edit and browse primary commands, find and change parameters, line commands, general features, and the results of performance benchmarks. *Letter References—4:6 (Jun 1986):17.*

"INDUCING COLD REBOOTS"
Gleckler, Arthur A. Tech Notebook. 1:2 (Sep/Oct 1983):157.
On the IBM PC, a cold boot causes both a hardware self-test and memory test. During a warm boot, however, the memory is not tested. A program utility written in BASIC is presented that performs the hardware and memory tests during a warm boot.

INFORMIX-SQL—Relational Database Systems, Inc.
"UNIX Heritage, A Data Manager with a." 3:12 (Dec 1985):118-131.

"INFRINGEMENT BY COMPATIBLES"
Oppenheimer, Max Stul. Legal Brief. 4:4 (Apr 1986): 201-203.
Early programmers tried in vain to patent their products. Copyrights appear to be the only protection available to programmers; copyrights, however, do not protect the idea, only the expression of it.

"INLINE INTERRUPTS"
Edwards, Charles C. Programming Practices. 3:12 (Dec 1985):181-187.
Guidelines to writing Turbo Pascal interrupt handlers are offered. The example is given of a dumb terminal emulator that uses interrupts to buffer input from the PC's serial port. Figures compare Turbo Pascal's entry and exit code with revised entry and exit code. A listing provides a fully functional dumb terminal program. *Letter References—4:6 (Jun 1986):24-27.*

"INSIDE 1-2-3 WORKSHEET FILES"
Sharpe, William F. 2:4 (Oct 1984):155-172.
Information is provided to allow BASIC programs to access the data in a Lotus 1-2-3 file or create new 1-2-3 worksheet files from BASIC. This allows more efficient processing of 1-2-3 data than the Lotus Translate Facility, especially for numeric processing. A figure shows the format of records within a worksheet file. A BASIC program to print the data in a spreadsheet file is listed.

"INSIDE *jr*"
Hoffmann, Thomas V. 1:8 (May 1984):52-80.
The IBM PC*jr* differs from the PC in that it offers a new system package with unique peripheral connectors, dedicated internal option connectors, bolt-on bus expansion modules, and an external power transformer. The PC*jr* keyboard is a wireless infrared with only 62 keys, but it has the ability to generate all the codes obtainable from the PC's 83-key keyboard. The keyboard, however, is not full-stroke and the Keytronic Deluxe KB 515*jr* is a good replacement keyboard. Photos show internal and external parts of the PC*jr*. Tables include a *jr* address map, ROM BIOS software interrupts, ROM formats, and internal modem commands. The features of the PC and the PC*jr* are compared in a table.

"INSIDE LOOK AT MICROSOFT BASIC ON THE IBM PC, AN"
Metzger, Robert. 1:3 (Nov/Dec 1983):62-71.
A technical summary of Microsoft BASIC internals is presented, including tokenization, data representation, storage use, and interpreter scanning algorithms. The methods used to explore the BASIC interpreter are provided, along with tips on how to optimize BASIC programs. Tables summarize token values in all versions of BASIC, including cassette, storage of array and scalar variables, and allocation of space in the interpreter work area. Example programs explore tokenized BASIC programs. *Letter References—1:6 (Mar 1984):26.*

INSTANT-C—Rational Systems, Inc.
"State of C Interpreters, The." 4:5 (May 1986):153-163.

"INSTANT RELAY"
Hansen, Augie. 2:4 (Oct 1984):94-112.
VM Personal Computing, Inc.'s Relay features terminal emulation (VTR-100), file transfer protocols, keyboard customization, an unattended answering mode, a dialing directory, script commands, translation tables, and a full-screen editor. Screen photos display viewing windows and menus. One figure shows a high-level view of a PC-to-PC session using Relay, and another gives a sample script file. *Letter References—3:1 (Jan 1985):14.*

"INSTANT SCREENS"
Hansen, Augie. 4:6 (Jun 1986):96-107.
A method is discussed for obtaining fast text display changes on the IBM Color Graphics Adapter without producing visual interference. The new display information is put into the active page during the vertical and horizontal retrace periods of the display scan. Then, when all the information is present, the active page is made the visual page, and the visual page is made the new active page. This updates the screen almost instantaneously, thus eliminating snow. Figures show the raster scan, block

transfers, double buffering, and page flipping. Listings provide the necessary code for the programming technique. *Letter References—4:10 (Oct 1986):19-24.*

"INTEL BIBLIOGRAPHY FOR iAPX 286, AN"
Creane, James. 2:6 (Dec 1984):140-144.
A bibliography of Intel literature on the 80186, 80286, and 8089 microprocessors is presented to iAPX users. The literature can be ordered directly from Intel. Address and price information is included.

"INTELLIGENT SCREEN FORMS, A DATA MANAGER FOR"
Christian, Chris. 4:1 (Jan 1986):126-142.
Q-PRO4, from Q-N-E International, uses a forms processing approach to data management. It is particularly appropriate for business applications that require a highly controlled user interface with familiar office forms. The package combines a data entry language with a sophisticated report generator and offers an optional query package. The total package also includes an application generator and the runtime interpreter. Benchmark results are given in a table. Figures show a sample file description, a program fragment, and annotated query parameters. Photos depict the format builder menu, a report field definition, and a report region definition. *Letter References—4:6 (Jun 1986):20-22; 4:8 (Aug 1986):15.*

INTELLIMODEM XT—Bizcomp Corp.
"Communicating from Within." 3:9 (Sep 1985):60-77.

"INTERACTIVE CAD"
Wright, Victor E. 4:9 (Sep 1986):102-129.
T&W Systems, Inc.'s product line, which includes VersaCAD, VersaDATA, and VersaLINK, is reviewed. VersaCAD is a two-dimensional system. VersaDATA offers database management interactively with the drawing package. Nonvisible attributes can be assigned and organized into a report format without exiting the drawing. Changes made to the drawing are reflected immediately in the database and vice versa. VersaLINK generates bills of material automatically. Photos and figures show sample screens produced by the package.

INTERROGATOR—Dysan Corp.
"Testing 1,2,3,4,5." 3:5 (May 1985):142-152.

"INTERRUPTS AND THE IBM PC, PART 1"
Dunford, Chris. 1:3 (Nov/Dec 1983):173-199.
The IBM PC uses some of the features of the Intel 8259A interrupt controller. Drawing on Intel technical manuals, the author provides a description of the chip's capabilities. The 8259 chip oversees the PC's eight interrupt lines and sends them to the central 8088 processor one at a time. Maskable interrupts, nonmaskable interrupts, and order of servicing interrupts are described. Figures show the interrupt process, mask modes, and initialization of command words.

"INTERRUPTS AND THE IBM PC, PART 2"
Dunford, Chris. 1:4 (Jan 1984):144-186.
A practical example of an interrupt-driven communications program is presented. The 8259 chip must interface with the serial board's INS 8250 Asynchronous Communications Element in order to process serial port interrupts correctly. The assembly language program is a dumb terminal emulator, and a listing is provided. In addition, a short assembly language program to generate data-ready interrupts on the 8250 is given.

INTRODUCING C—Computer Innovations
"State of C Interpreters, The." 4:5 (May 1986):153-163.

IQ LISP—Integral Quality
"PC Speaks LISP, The." 1:7 (Apr 1984):112-148.

"Emulating the 3278." 4:2 (Feb 1986):48-63.

"IRRESISTIBLE DOS 3.0"
Anderson, Julie A. 2:6 (Dec 1984):74-87.
DOS 3.0 is evaluated. Although it is upwardly compatible with version 2.1, the newer version is much larger—IBM recommends a minimum of 96KB of user memory (128KB with a hard disk) to run 3.0 successfully. It includes the international support feature, which provides the date, time, and currency formulas for 15 different countries. The new version's file sharing and disk structure features, as well as other enhancements are discussed. Tables show new or enhanced DOS commands and interrupts, a list of country-dependent information, DOS 3.0 formatting parameters, and new parameters for the print command. A sidebar covers new commands in BASIC 3.0. *Letter References—3:5 (May 1985):20.*

"IT'S PC PROBE!"
Hoffmann, Thomas V. 1:8 (May 1984):86-96.
PC Probe from Atron Corp. offers powerful hardware trace and breakpoint capabilities as well as an excellent debug program complete with facilities for symbolic debugging of high-level language programs. Photos show sample screen displays.

"Plot Thickens, The." 1:9 (Jun 1984):117-127.

"JOYSTICK METRICS"
Covington, Michael A. 3:5 (May 1985):99-109.
The joystick port of an IBM PC can be used with analog-to-digital converters in order to measure physical conditions such as heat, resistance, capacitance, and voltage. No modification to the PC is necessary. BASIC listings are presented that allow the circuit to transform the PC into an oscilloscope. With further programming, the PC oscilloscope can generate logarithmic scales, transform data before displaying them, edit wave forms, store readings, or compare predicted readings against those measured by the device. Figures illustrate the joystick port operation and output from the listings.

"KERMIT"
Hansen, Augie. 3:1 (Jan 1985):110-123.
Kermit (Columbia University Center for Computing Activities) is a file transfer protocol using packet-communications technology. It is not machine-, architecture-, language-, or transmission-dependent. It uses *eighth-bit quoting*, which permits binary files to be treated as if they were ASCII text. Kermit permits detection and correction of errors. It can use a 1- or 2-byte checksum or a 3-byte CRC in error detection. Figures illustrate the packet data transfer method. Tables list functions, features, and commands. *Letter References—3:4 (Apr 1985):15-16.*

"KERNEL CODE GENERATION, A DATA MANAGER WITH"
Armbrust, Steven and Ted Forgeron. 3:9 (Sep 1985): 82-101.
R:base 5000 from Microrim is the successor to R:base 4000 and the company's answer to Ashton-Tate's dBASE III. R:base 5000 includes Application EXPRESS, a source code generator; File Gateway, the R:base data transfer program; RBEDIT, a source code editor; the R:base interpreter program; and a compiler. A table gives benchmark results; a sidebar provides an overview. A listing gives the code used to accept data from the sample data entry screen. *Letter References—3:12 (Dec 1985):15-17.*

"KEYBOARD AND DISPLAY INTERFACING"
Cole, John. 1:7 (Apr 1984):182-194.
Listed programs form a user-friendly interface to the powerful, but hard-to-use, ROM BIOS and DOS calls. Functions include screen control for monochrome and color adapters, sound control, and time and date query.

"KEYBOARD SCAN CODES"
Mirecki, Ted. Tech Notebook. 3:6 (Jun 1985):40.
A program is presented for obtaining keyboard scan codes. The assembly language program reacts to each keystroke with a four-character display of the form XXYY, where XX is the hexadecimal representation of the scan code, and YY is the ASCII code for the key pressed. *Letter References—3:9 (Sep 1985):18.*

"KEYBOARD SHORTCUTS"
Walkenbach, John. 3:10 (Oct 1985):131-144.
Keyboard macro processing programs allow users to express complicated functions in a single keystroke. Although most large software packages provide built-in macro functions, separate macro processors, designed to work in conjunction with other software, are also available. Six such programs are reviewed: KEYSWAP (Rickerdata, Inc.); Keyworks (Alpha Software Corp.); ProKey (RoseSoft, Inc.); RE/Call (Yes Software, Inc.); SmartKey (Software Research Technology); and SuperKey (Borland International Inc.). A table compares the programs' features. Figures show macro definition files.

"KEYSTROKE AUTOMATION"
Singer, John. 4:1 (Jan 1986):113-122.
The IBM High-Level Language Application Program Interface (API) allows a 3270-PC with the 3270-PC Control Program 1.2 to act as a 3278/79 terminal operator. The article describes the 3278 terminal and operating environment, the API function set, and a sample API application program that extracts data from an IBM mainframe database and stores it on disk. Figures show the 3270-PC software environment and a sample 3270-PC API application.

"LAN OF IBM, THE"
Fastie, Will. Directions. 4:1 (Jan 1986):9-10.
IBM's announcement of the token-ring LAN means the death of the PC Network. PC Network uses broadband technology, which is difficult to install and maintain. Response to IBM's newly announced Token-Ring Network has been strong. The new network supports the NET BIOS interface and the newer APPC interface, so software designed for the PC Network is compatible with the new network. The Token-Ring network is faster than the PC Network, will probably have significantly better throughput, cannot be connected incorrectly, and allows physical connections to be made or broken at any time. *Letter References—4:6 (Jun 1986):22-23.*

"LANGUAGE INTEGRATION"
Duntemann, Jeff. Product of the Month. 4:7 (Jul 1986):29.
Program code ported from mini- or mainframe computer environments in older languages such as FORTRAN is often difficult to support in its present form or to translate into newer languages such as C. Microsoft solves this problem by allowing code written in Microsoft C, FORTRAN, and Pascal compilers to be linked freely within single programs if certain conventions are met.

"LANGUAGE LEARNING TOOLS"
Mallozzi, John S. 3:2 (Feb 1985):126-139.
The WATCOM Languages and Editor were created for the teaching of computer science. BASIC, Pascal, FORTRAN, COBOL, and APL are available. The languages are interpreters, making source code and data values available at any time. Good integration of the editor with the languages makes debugging easy. Sample program code in Pascal and BASIC and associated output are given. The languages are of uneven quality. COBOL and BASIC are the best implementations; FORTRAN the weakest.

"LICENSE TO SELL"
Oppenheimer, Max Stul. Legal Brief. 4:3 (Mar 1986): 189-190.
After years of reviewing software license agreements, the author reexamines the license agreement, focusing on how a publisher might evalute the pros and cons of such an agreement for the sale of software. Software license agreements seek to limit warranties, limit the publisher's liability, apply state law to the enforcement of the license, and control distribution of the software.

"LIFE IN THE FAST LANE"
Smith, Bob and Thomas Puckett. 1:7 (Apr 1984):62-74.
The IBM PC's 8253 timer chip makes it possible to time microsecond, rather than millisecond, intervals. Six counting modes are available. DOS and the PC BIOS support and use the 8253-5 timer. Assembly language listings are included. *Letter References—1:9 (Jun 1984):24; 2:2 (Aug 1984):14.*

"LIFE IS SIMPLE WITH APL"
Wynn, Pardner. 2:3 (Sep 1984):129-147.
APL is an interpreted programming language that is similar in concept to BASIC: both are line-oriented interpreters with built-in editors and debugging facilities. APL redefines the ASCII character set to provide a complete set of single-character operators for data manipulation. Data and programs are stored in a workspace that may be saved as a disk file. Life, the game as devised by J.H. Conway, is used as an exercise in APL program development. Figures summarize common APL operators and compare data handling by APL to that by BASIC. *Letter References—2:5 (Nov 1984):20.*

"LIMITED JOYS OF TRANSLATED SOFTWARE, THE"
Creane, James. 3:1 (Jan 1985):142-160.
The software translated from CP/M-80, which provided most of the IBM PC's base when the machine first appeared, was severely limited in many ways. The problems may be the result of the method of translation used by the software manufacturers. Two examples are given of a translation strategy that does not compromise quality for expediency: a word processing program similar in concept to WordStar; and a sort module for a database manager similar to dBASE II. A figure illustrates two code translation examples. Tables give elapsed times for various types of sorts. *Letter References—3:4 (Apr 1985): 19-21; 3:5 (May 1985):18.*

"LINKING ASSEMBLY SUBROUTINES TO BASIC PROGRAMS"
Brack, Frederick. 1:6 (Mar 1984):118-140.
Step-by-step instructions are given for incorporating MASM-produced machine language subroutines into BASIC. The assembly language subroutine is assembled with MASM. The .EXE file produced by MASM and LINK is loaded under DEBUG and modified for BASIC compatibility. Then BASIC is loaded (also under DEBUG) and tested with the subroutine. If all is well, the subroutine can be saved with BSAVE for easy loading with BLOAD later. A sample assembly language subroutine is listed. A figure details parameter passing with the stack.

"LINKING LIBRARY ROUTINES"
Mirecki, Ted. Tech Notebook. 4:4 (Apr 1986):49.
By separating the two segments of a resident program (the resident portion and the initialization code), users

can ensure that the two parts appear in the .COM file in the proper order. The technique is useful whenever the modules in an assembly language library must enter an executable program in a particular order. Listings provide assembly language templates for the two modules.

LINKUP SYSTEM COAX—Information Technologies
"Emulating the 3278." 4:2 (Feb 1986):48-63.

"LIVIN' IN THE D.O.S"
Fastie, Will. Directions. 3:12 (Dec 1985):9-10.
The IBM PC is mature enough that software developers should have developed good habits, but most have not. A program should determine the type of display through software. Many programs are written to interpret keystrokes into sequences of their own. When more than one of these programs is resident, unexpected results can occur. Problems exist with the way programs find their files and navigate between directories. Many are not designed to interface correctly with printers and some are so printer specific that they will work with only one type of printer. *Letter References—4:4 (Apr 1986):27.*

"LOAD AND GO: COM AND EXE FILES EXPLAINED"
Carter, Tom. 1:2 (Sep/Oct 1983):136-149.
The .COM and .EXE file formats are compared and the differences are explained. Listings show a memory dump program in .EXE format and the same program reorganized into .COM format. The .EXE format permits multiple segments for program, data, and a stack segment. The .COM format allows only a single segment (64KB) for program, data, and stack. Though less flexible, a .COM format file has the advantage of loading faster than an .EXE file. Furthermore, a .COM file may be loaded anywhere in memory while several restrictions limit .EXE file placement. Loading multiple .COM files into memory is much easier than multiple .EXE files. *Letter References—2:5 (Nov 1984):20-21.*

LOEN, LARRY W.
"Filters and Finite Machines." Programming Practices. 4:2 (Feb 1986):181-190.

"LONG LIVE THE 286"
Fastie, Will. Directions. 4:8 (Aug 1986):9-10.
IBM dominates the market with its PC and PC/XT, but it has a smaller share of the PC/AT market. Software developers and users looking for high performance are moving to 286-based machines more rapidly than the market at large. In light of these developments, *PC Tech Journal* plans a series covering non-IBM computers beginning in this issue with a review of the Compaq Deskpro 286. The editor discusses the differences between the 286- and the 386-based machine and urges less emphasis on 386 machines until the investment in 286 machines has been returned and more attention to expanding to the outer limits of 286 functionality.

"MACHINE SPECIFICS"
Forgeron, Ted. Programming Practices. 3:6 (Jun 1985):181-186.
An assembly language routine aids program portability by checking the machine identification byte and reporting the machine type—IBM PC, PC/XT, Portable PC, PC*jr*, PC/AT, or compatible. Another routine reports whether a numeric coprocessor is present. The programs are listed. *Letter References—3:9 (Sep 1985):16.*

MACRO ASSEMBLER 2.0—IBM
"Same Language, New Architecture." 3:10 (Oct 1985): 48-59.

"MACRO ASSEMBLER 4.0"
Quedens, Guy. Product Watch. 4:7 (Jul 1986):169-172.
Release 4.0 of Microsoft's Macro Assembler (MASM) is optimized and boasts new features, such as conditional error directives, .EXE file packing, and 11 new command line options. Performance is improved by about 300 percent, and larger source files can be assembled. Some minor bugs identified in version 3.01 remain, and a few new ones have been identified. MASM's MAKE utility has been improved greatly. Overall, the product is excellent and lacks only a reference for 8086 assembly language.

"MAINFRAME COMPATIBILITY, A DATA MANAGER WITH"
Casey, William. 3:11 (Nov 1985):124-144.
Information Builders, Inc.'s PC/FOCUS is a mainframe data management system squeezed into a PC package. PC/FOCUS includes data description and report definition languages; a terminal graphics subsystem; two related end-user languages; a file access and update facility; a maintenance language; and four front ends. Benchmarks remarks are listed in a table, and a sidebar provides an overview of the package. Figures show data hierarchies, sample file definitions and structures, and sample command procedures and reports.

"MAINFRAME STRATEGY"
Fastie, Will. Directions. 3:5 (May 1985):9-10.
IBM's release of its Series/1 operating system for the PC reveals a clever marketing strategy. New hardware provides a gateway from one PC network to another or to a mainframe. The new Series/1 thus makes available a low-cost entry into a Series/1 network and suggests that IBM hopes to use the popularity and established base of Series/1 to increase sales of not only ATs and PCs, but also more mainframes to support the Series/1 networks.

"MAKING CONNECTIONS"
Foard, Richard M. 3:5 (May 1985):47-51.
TURN-ON (Skyland Systems) is a power line controller that is activated by a telephone call to turn on a computer to receive communications. A PC can be configured with an AUTOEXEC.BAT file to load a communications program, answer the phone, and greet the caller. The device can be purchased with a communications program that includes file management, log-on control, and user screening. TURN-ON facilitates setting up remote file transfer systems. A photo of the system is included.

"MAKING OF AN XT, THE"
Hansen, Augie. 3:3 (Mar 1985):161-171.
A do-it-yourself guide is provided for converting an IBM PC into a hard-disk-based machine similar to the PC/XT. A hard-disk drive controller, IBM ROM BIOS upgrade, and higher capacity power supply are needed. A table lists specifications for the hard disk and power supply. A BASIC program is given to initialize a hard disk.

"MAKING YOUR SCREENS SPEAK FOR THEMSELVES"
Stephens, Jessie Gunn. 2:1 (Jul 1984):148-158.
A series of practical suggestions help programmers fashion an understandable user interface. Among the suggestions: keep program messages short and clear, explain each message in the user manual, and use consistent key sequences in all parts of the program.

MALLIN, JAY
"Three-dimensional Graphics for the IBM PC." 1:8 (May 1984):36-48.

MALLOZZI, JOHN S.
"Language Learning Tools." 3:2 (Feb 1985):126-139.

"MANAGING MEMORY"
Redmond, William J. 2:2 (Aug 1984):42-62.
An effort to cut power-up memory check time leads to an examination of memory management. False memory switch settings fool BIOS into checking less memory in less time. A program then determines how much memory actually exists and informs DOS. DOS 2.0's linked list of memory control blocks must be searched before free memory can be increased. A figure and table show the memory layout, and the program listing is included. *Letter References—2:6 (Dec 1984):16.*

"MATCHING REGULAR EXPRESSIONS"
Forrest, Jon. Programming Practices. 4:5 (May 1986):191-199.
The regular expression syntax can be used to find a specified string in a given block of text. The syntax can be used even with complex search conditions. The regular expression algorithm requires a two-phase solution: first, the search conditions are compiled into an internal matching template; second, this template is compared to the text to be searched and any matches are printed. Tables show the proper syntax for sample search patterns. Listings provide Turbo Pascal programs that implement the syntax as a DOS filter similar to the DOS FIND command. *Letter References—4:8 (Aug 1986):24.*

"MATHEMATICAL MODELING WITH TUTSIM"
Murray, William H. 2:1 (Jul 1984):40-55.
Applied i's TUTSIM is a mathematical modeling software package that simulates the dynamics of systems. The program produces block diagrams of variations in a system. Modeling parameters may be entered and changed. Although documentation is poor and the graphics could be improved, the program is judged to be good. Tables list TUTSIM model blocks and commands. Photos show screen displays of the program's output.

"MICE ARE NICE"
Fastie, Will. Directions. 2:2 (Aug 1984):5-6.
Although the computer mouse was invented almost 20 years ago, the introduction of the Apple Macintosh and the MacPaint program have brought the mouse into the public eye. Many argue that the mouse is an effective user input device for almost any task. However, the mouse is truly useful for only two types of computer operations: graphics applications and marking. Mice require hand-eye coordination to operate and are not effective devices for selecting operations such as those used in pop-up menus. Performance and responsiveness are important for general acceptance of mice as computer input devices. *Letter References—2:5 (Nov 1984): p. 20.*

"MIX C"
Franz, Marty. Product Watch. 4:9 (Sep 1986):191-193.
MIX C from MIX Software is a full implementation of the C language. Its object format is proprietary, preventing use of DOS LINK; however, the linker can generate overlays to allow the user to run large programs as .COM files. Generated code runs as much as ten times slower than programs produced by Microsoft C. Overall, the slow code speed and general quirkiness of this product make it unsuitable for professional software development. Tables list compiler specifications, functions, documentation quality, and benchmark test results.

"MIXING SYSTEMS COMPONENTS"
Goldberg, Morton. 1:7 (Apr 1984):106-110.
Printing graphics screens on a Star Micronics Gemini-10 dot-matrix printer via DOS 2.0's GRAPHICS.COM utility produces images distorted by an overly large line feed following each print-head scan. A DEBUG patch is given that allows GRAPHICS.COM to work with the Gemini-10 printer. *Letter References—2:1 (Jul 1984):14.*

"Nine-track Tape Systems." 4:8 (Aug 1986):94-108.

"MODEMS DEMYSTIFIED"
Schwaderer, W. David 2:1 (Jul 1984):73-88.
This excerpt from Schwaderer's book, *Digital Communications Programming on the IBM PC,* explains the use and technology of modems. A modem makes a microcomputer act like Data Terminal Equipment (DTE). Figures feature the Bell-103, -202 -212A and Racal-Vadic 3400 protocols and illustrate modulation techniques.

MODULA-2/86—Logitech, Inc.
"Modular Implementations." 2:6 (Dec 1984):154-182.

"MODULA-2/86 BASE LANGUAGE SYSTEM"
Cockerham, John T. Product Watch. 4:9 (Sep 1986):188-190.
Release 2.0 of the Logitech Modula-2 Base Language System (BLS) includes a four-pass compiler, a linker, a text editor, and runtime libraries in object form. The compiler and linker can be invoked from within the multifile, multiwindow editor. Although BLS generates 8086 native code, it does so in a proprietary format that requires a loader module (M2) to load and execute linked object code. Code performance is good—better than that of Turbo Pascal but not on par with Microsoft Pascal. A table lists benchmark test results.

MODULA-2 COMPILER—Volition Systems
"Modular Implementations." 2:6 (Dec 1984):154-182.

"MODULA-2 SOFTWARE DEVELOPMENT SYSTEM"
Brecheen, Cole and Charles Bradford. Product Watch. 4:9 (Sep 1986):187-188.
Interface Technologies Corp.'s Modula-2 Software Development System (M2SDS) is an environment-based, native-code Modula-2 compiler with a built-in syntax-directed editor. While early releases of the product were so bug-ridden as to be virtually unusable, the current release 2.0cv is an acceptable product. Code performance is good, equal to Logitech Modula-2 and faster than Borland's Turbo Pascal. Program size is limited only by available memory. M2SDS's user interface is excellent. A table lists benchmark test results.

"MODULAR CONSTRUCTIONS"
Woteki, Tom, Alan Freiden, Dov Levy, Thor Bestul, and Robert Stine. 2:5 (Nov 1984):72-94.
Modula-2 is a programming language designed by Niklaus Wirth and derived from Pascal. It is a strongly typed language that emphasizes modular programming. Mod-

ules, which facilitate software maintenance, may be compiled individually and hide details of data representatives from other modules. Examples of Modula-2 statement syntax and module structure are given. Sample Modula-2 program listings are provided.

"MODULAR IMPLEMENTATIONS"
Woteki, Tom, Alan Freiden, Dov Levy, Thor Bestul, and Robert Stine. 2:6 (Dec 1984):154-182.
Three Modula-2 compilers—Modula-2/86 (Logitech), Modula-2 Compiler (Volition Systems), and M2M-PC (Modula Research Institute)—are reviewed. The products are judged on high-level features, low-level access, native code generation, integration with DOS, and provided library modules. Logitech's Modula 2/86 is the only native code compiler of the three, and it scored highest in the overall ratings. Volition System's product generates p-code and runs well only under the UCSD p-System. The MRI product is slow and not well integrated with DOS. A table of performance benchmarks is provided.

"MOM & POP HI-TECH, INC."
Oppenheimer, Max Stul. Legal Brief. 2:4 (Oct 1984): 197-201.
Guidelines are given for creating a corporation. Incorporating may accomplish several objectives: limiting personal liability (although this may also be established through a limited partnership); easing the transfer of stock; centralizing and simplifying management; and obtaining tax advantages.

"MORE PORTS"
Wright, Jack. Tech Notebook. 3:3 (Mar 1985):32.
Program listings in BASIC provide a way to initialize extra serial ports on the IBM PC and switch over to them. The sharing method that is described permits the addition of two ports using two unused I/O addresses: one shared by COM1 and the other by COM2. *Letter References—3:6 (Jun 1985):19.*

"MORE WITHOUT REDIRECTION"
Lesser, Murray. Tech Notebook. 2:4 (Oct 1984):148.
The MORE command is a useful substitute for the DOS TYPE command. MORE allows users to keep a displayed ASCII file from scrolling off the screen, but it does not function properly unless the user inserts the redirectional symbol. This problem is solved by using DEBUG to patch MORE.COM with the source code presented.

"Multifunction Boards for the PC." 1:4 (Jan 1984):66-73.

"MULTITALENTED"
Roskos, J. Eric. 2:4 (Oct 1984):64-74.
Multilink from The Software Link, Inc. adds multitasking capabilities to DOS. It installs itself between the operating system and the software programs running on the PC. It requires at least 128KB of memory to work effectively. Multilink's performance is not flawless because the PC was not designed to run as a multitasking machine. A sidebar on debugging Multilink and listings showing sample Multilink code are included. *Letter References—2:6 (Dec 1984):30-32.*

"MULTITASKING METHODS"
Foard, Richard M. 4:3 (Mar 1986):49-61.
This first in a series of articles about multitasking operating systems that can be used in realtime applications introduces the reader to the basics of multitasking. TJ/OS (Tech Journal co-Operating System), a multitasking toolkit assembled by the author, is examined as an example of multitasking in its simplest form. It is designed to be used with version 3.0 of the Microsoft C compiler. CX/PC from INTRSoft Company, a commercially available package, also is reviewed. Both TJ/OS and CX/PC embody a non-preemptive task scheduling discipline. CX/PC is suitable for small, PC-based instrumentation and control systems. *Letter References—4:5 (May 1986):21-22.*

"NAME, RANK, AND SERIAL NUMBER"
Glinert-Cole, Susan. Tech Notebook. 1:8 (May 1984):192.
A short BASIC program distinguishes an IBM PC from an XT or PC*jr*. It also prints the date of creation of the ROM BIOS, the BIOS copyright date, and IBM's part number.

"NAME THAT VOLUME"
Koehler, Ernest S. Tech Notebook. 3:9 (Sep 1985):37.
DOS 3.0 allows users to write a volume label after a disk is formatted, but under DOS 2.x, users can write the label only during disk formatting. The VOLABEL program corrects this and allows users working under DOS 2.x to define volume labels without reformatting the disk. The assembly language program is provided.

"NESTED BATCH FILES"
Garbers, Jeff. Tech Notebook. 1:3 (Nov/Dec 1983):223.
A DOS 2.0 batch file cannot directly invoke another batch file without relinquishing control of the system; however, control can be retained if the second batch file is invoked using COMMAND/C. Some examples of nested batch files are provided. *Letter References—1:6 (Mar 1984):26; 2:4 (Oct 1984):15-21.*

NETWARE—Novell, Inc.
"NetWare in Control." 3:11 (Nov 1985):102-119.

"NETWARE IN CONTROL"
Krumrey, Art. 3:11 (Nov 1985):102-119.
Novell's NetWare is a PC network operating system that runs on 24 different makes of local area network (LAN) hardware. The software is designed in a layered structure so that it may be converted to work with a variety of network hardware. NetWare is a true file server in that directories or files on the server's hard disk are mapped to network drives, like virtual diskettes. All versions of NetWare are compatible with DOS 3.1 definitions for interrupt 21H operations; the NetWare/PCN version runs on the IBM PC Network. Photos show NetWare menus and directories; tables give program interfaces and commands; and figures diagram various networks.

"NETWORK FOR ALL REASONS, A"
Glinert-Cole, Susan. 2:6 (Dec 1984):90-106.
The IBM PC Network is reviewed. The product can be used by the IBM PC, PC/XT, PC Portable, and PC/AT. Each PC on the network requires 128KB, one double-sided disk drive, an 80-column display, and DOS 3.1. Users can share hard disks, diskettes, files, printers, and modems across the network. The basic components, network hardware, and network software are examined, with five figures illustrating network components. Prices for the PC Network are included.

"NEW TWIST ON NETWORKING, A"
Glinert-Cole, Susan. 1:8 (May 1984):168-185.
X-NET is a low-cost network featuring file server emulation without a dedicated file server for use on an IBM PC or PC/XT. It is well designed, easy to set up, and uses inexpensive twisted pair wire to link the network together. An electronic mail package is available. Figures illustrate X-NET network topology and the distributed file system, and a table gives benchmarks with PC-DOS 2.0.

"NEW WEAPONS FOR FIGHTING SOFTWARE PIRACY"
Frank, Werner L. 1:5 (Feb 1984):71-74.
The Association of Data Processing Service Organizations (ADAPSO) is working to find ways to stop software piracy. Cost, ease of installation, effect on the computer system, and degree of protection must be considered. Prolok, a promising, low-cost method of software protection, encrypts a program and copies it onto a Prolok diskette with an identifying fingerprint. The Prolok protection scheme requires that the Prolok diskette be inserted into the diskette drive whenever the protected program is being executed. Prolok is available for CP/M, MS-DOS, and Apple-DOS operating systems. It does not provide a suitable solution for LANs. *Letter References—1:9 (Jun 1984):16-21; 2:1 (Jul 1984):26.*

"NIBBLER, THE"
Swan, Tom. Product Watch. 4:7 (Jul 1986):168-169.
The Nibbler, a programmers toolkit from Tachyon Systems, Inc., offers several disk utility operations. It can display sorted disk directories, copy files, change bytes, and collect memory and disk information into memory buffers. The program also can read and write disk sectors directly. Problems with The Nibbler include poor documentation and a tendency to hang the system when the Diskette Map command is used.

"NINE-TRACK TAPE SYSTEMS"
Addelson, Roger. 4:8 (Aug 1986):94-108.
Nine-track tape technology is summarized, and eight subsystems for the PC are reviewed: Q-TIP with PC-9 (Alloy Computer Products, Inc.); PCT-9S Tape Subsystem (Catamount Corp.); Tape Subsystem (Cipher Data Products, Inc.); 2000 PC (Digi-Data Corp.); Series MTM80-7000 (Emerald Systems Corp.); Model 8820 (Flagstaff Engineering); Model 1012 (Innovative Data Technology); and Model 1052 (Overland Data, Inc.). Transport speed is one of the few strong distinguishing characteristics among the systems reviewed. Figures show labeled and unlabeled tape formats. Tables list system features, controller specifications, and benchmark test results.

NOLAND, JOHN C.
"GENSCREEN." Product Watch. 4:8 (Aug 1986):180-181.

"NONLINEAR LEAST-SQUARES FITTING"
Schreiner, Walter, Michael Kramer, Simon Krischer, and Yedidyah Langsam. 3:5 (May 1985):170-190.
A BASIC program fits a set of data points to a curve using the Marquart algorithm for least-squares fitting. The user supplies the data and a suggested function with a set of initial values for parameters. The program calculates the best value for the parameters consistent with the data, gives a statistical report of how good the fit is, and plots the curves to allow the user to compare data with the fitted function. The article provides a step-by-step outline with figures and tables for using the listed program. A compiled version of the program was tested and found to be on a par with a FORTRAN minicomputer version of the program. *Letter References—3:8 (Aug 1985):16-21; 3:10 (Oct 1985):24-26; 3:12 (Dec 1985):24.*

NORMAN, RICHARD
"Video Function Call Fix." Tech Notebook. 4:7 (Jul 1986):41.

NORTON, PETER
"Tinkering with DOS 2.0." Tech Notebook. 1:1 (Jul/Aug 1983):93.

NORTON UTILITIES, THE—Peter Norton Computing
"Norton Utilities, The." 1:1 (Jul/Aug 1983):70-77.

"NORTON UTILITIES, THE"
Glinert-Cole, Susan. 1:1 (Jul/Aug 1983):70-77.
Thoughtful design and good documentation distinguish the Norton Utilities, a collection of 14 utility programs. Half of them are simple routines useful in batch files. The others sort files, arrange directory entries to optimize access, and recover undamaged regions of a diskette. Four programs are included that manipulate disk files: FILEHIDE hides and reveals files; UNERASE can unerase a file; SECMOD allows the user to modify a file; and DISKLOOK provides information about diskette files.

O

".OBJ LESSONS"
Armbrust, Steven and Ted Forgeron. 3:10 (Oct 1985): 61-81.
The format of the Microsoft object module (or .OBJ file) determines the behavior of the linker and the symbol support of the debugger. All IBM PC compilers and assemblers translate programs into Microsoft .OBJ files, which contain records of as many as 15 different types. Tables show record types and fields, and memory dumps show the actual hexadecimal layout of the .OBJ file produced for a Microsoft Pascal program (listing included). A flow chart shows the linking process. Also discussed are debugging information and the Intel object module format, which is a superset of the Microsoft format.

"OBJECTS AND ATTRIBUTES"
Fastie, Will. Directions. 4:7 (Jul 1986):9-10.
Most computer files allow only a limited set of attributes to be assigned to them, but users should be able to assign any attributes they choose. SmartNotes addresses this need by allowing a user to "stick" an arbitrary note in a file that pops up when the file is examined. However, a more general facility is needed to attach symbolic attributes to objects associated with the desktop computer.

OC4000—Star Gate Technologies, Inc.
"Beyond COM2." 4:9 (Sep 1986):68-79.

OC8000—Star Gate Technologies, Inc.
"Beyond COM2." 4:9 (Sep 1986):68-79.

OKI 84P—OKIDATA
"Oki Dokey: from PC to Okidata 84." 2:3 (Sep 1984): 92-106.

"OKI DOKEY: FROM PC TO OKIDATA 84"
Garbers, Jeff. 2:3 (Sep 1984):92-106.
The Okidata Microline 84p printer can print the PC's line-drawing characters using codes different from those used by printers in the Epson family. X20KI.COM is a resident program that intercepts calls to IBM BIOS interrupt 17H parallel printer routines and translates appropriate characters from the Epson character set to the Okidata character set, allowing the Microline 84p to print line-drawing characters correctly. The assembly language program is listed. An accompanying sidebar regarding Okidata compatibility is included.

"dBASE II with Ambition." 1:9 (Jun 1984):181-191.

OMNINET—Corvus Systems, Inc.
"Omnium-Gatherum." 2:3 (Sep 1984):56-62.

OMNITERM2—Lindbergh Systems, Inc.
"High-tech Mimicry." 2:3 (Sep 1984):46-55.

"OMNIUM-GATHERUM"
Glinert-Cole, Susan and Julie A. Anderson. 2:3 (Sep 1984):56-62.
Omninet (Corvus Systems) is a Carrier Sense Multiple Access (CSMA) network using RS-422 twisted pair wire in a linear bus configuration. Omninet refers to the lower four protocol layers of the ISO/OSI protocol model. The higher levels are provided by the Constellation II software that, combined with Omninet, comprise the whole network system. A transporter card is required for each station. Stand-alone disk servers are available in various sizes ranging from a 5MB disk to a 45MB disk. Tables list benchmark tests and supported commands. Omninet integrates utility servers with mass storage backup.

"ON THE MATTER OF PERFORMANCE"
Fastie, Will. Directions. 1:2 (Sep/Oct 1983):10-15.
The IBM PC has been criticized for its slow speed. Proponents of the 68000 microprocessor correctly point out that it is significantly faster than the PC's 8088 processor. In addition, for some applications, a 4-MHz Z-80 runs faster than the 8088. Nonetheless, the PC is more than adequate for 95 percent of microcomputer applications. When shopping for a microcomptuer, users should remember that performance is more a function of software than hardware. They also should recognize the difference between programs with superior display speed and those with superior computing speed. *Letter References—1:5 (Feb 1984):22-26.*

"Shell Game, The." 1:3 (Nov/Dec 1983):30-41.

128KB MEMORY EXPANSION BOARD FOR THE AT—IBM
"Analyzing the Advanced Technology." 2:6 (Dec 1984): 40-56.

"ONWARD, FORTH"
Fastie, Will. Directions. 4:9 (Sep 1986):9-10.
Although FORTH often is perceived as esoteric, it has a definite place among microcomputer languages. FORTH applications are typically small, but their functionality is high. The language is popular for dedicated microprocessor applications. A sidebar contains an apology to Realia, Inc. for rating Realia COBOL "not recommended" in the August 1985 issue, because of its copy-protected status; *PC Tech Journal*'s opposition to software methods of copy protection notwithstanding, the rating is amended to "recommended." A second sidebar announces the debut of a new column called "Expert Consultant." A third sidebar announces *PC Tech Journal*'s relocation from Baltimore to Columbia, Maryland.

"Moving up to Tape." 3:11 (Nov 1985):62-83.

"OUT FROM THE SHADOW OF IBM"
Armbrust, Steven, Ted Forgeron, and Paul Pierce. 4:8 (Aug 1986):52-75.
This introduction to *PC Tech Journal*'s evaluation of IBM PC/AT compatibles describes the Evaluation Suite, which consists of several programs that: check the BIOS data area for the date, machine ID, and copyright statement; check the keyboard compatibility; check the instruction fetch time; check the RAM read and write times, wait state times for an IBM Color Graphics Adapter, ROM read, RAM read and write, and expanded memory, as well as the processor speeds and the video refresh time; check the performance and speed of the coprocessor; and test the hard disk. Listings provide code for all test programs.

P

"PACKING THE DATE AND TIME"
Finan, Patrick. 3:1 (Jan 1985):46-54.
A shift and mask algorithm packs the date and time into 16 bits to put a date and time stamp on data records. Pascal programs with listings demonstrate the technique. Figures show the binary numbers involved. Tables show packing and unpacking of binary date/time code. *Letter References—3:5 (May 1985):14; 3:8 (Aug 1985):24.*

"PAINTER'S ALGORITHM, THE"
Chandler, Richard and Gary Faulkner. 3:11 (Nov 1985):181-187.
The Painter's Algorithm is a means of plotting hidden lines in a three-dimensional graph. The elements of the graph are drawn in order from background to foreground. Some lines are hidden in the finished graph as a result of the rules of visual perspective. Figures show steps in the process. A listing provides a Pascal program that can be used to implement the algorithm.

New "WONDER" PLUS

The NEW STANDARD in the World of DOS "Shells"

FILE MANAGEMENT - "Power Beyond DOS"
1dir+ is the most powerful and flexible DOS utility available. Without customizing it at all, it gives you a set of tools that enable you to organize and manage your directories and files, beyond the limitations of DOS and other system utilities.

Its functions include all the necessary "standard" commands for copying, erasing, moving, renaming, viewing, editing, locating... files. **1dir+** also includes a Directory Tree making it easy to change, create or remove directories.

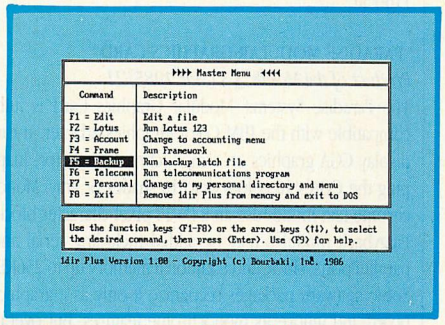
Regain wasted space by deleting ALL your BAK files in a single operation, or by finding and erasing duplicate copies of files in different directories. Back up and Restore directories by selecting them from the Directory Tree. The list goes on...

The "Faces" of **1dir+** gives you eight instantly available screens to display the information the way YOU want it. They range from the simple Menu Only Face, to the powerful Global Directory Face.

MENUING System - "Have it YOUR Way"
1dir+'s Menuing system enables you to customize YOUR system to suit your needs and applications. If you're a "power" user, the Menuing System Command Language, nicknamed MuSCLe, gives you the ability to program more powerful commands. (MuSCLe and its compiler are available for a nominal charge.)

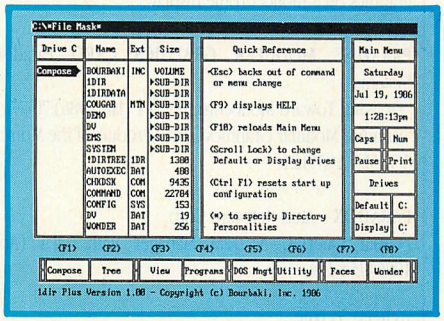
VIEW / EDITOR - "Next Best Thing to a Word Processor"
1dir+'s powerful View / Editor enables you to view and / or edit files in ASCII, Extended ASCII and HEX modes. It includes block operations, string search capability variable speed bi-directional auto-scrolling, print options and more.

UNIQUE - "Customized Directory Displays"
The most unique thing about **1dir+** is its Directory Personality feature. Typically, directories include files that you don't need or want to see. The solution - Customize each of your directories with a Personality to show only the files you want, in the order that you want them and within a specified date range. Needless to say, these can easily be changed or disabled as the situation requires.



HELP System - "Making it All Easy"
Not only does **1dir+** provide instant access to context related and general system Help for all its commands, it also gives you the ability to develop your own comprehensive and instanly available Help for any commands that you create, using the Menuing System.

All this in one integrated package, **1dir+**.



SPECIAL INTRODUCTORY OFFER $89.00 + $5.00 shipping

"Simple Circuits, Better Circuits." 1:5 (Feb 1984): 118-156.

"PARADISE MODULAR GRAPHICS CARD"
Product of the Month. 3:3 (Mar 1985):21.
The Paradise Systems' Modular Graphics Card is fully compatible with the IBM Color Graphics Adapter. It can display CGA graphics on a monochrome monitor, mapping the CGA's 16 colors onto 16 shades of gray. Monochrome text modes use an 8-by-14 pixel character block. Piggyback modules may be added including serial and parallel ports, clock, and additional memory up to 256KB. Some software packages recognize it only as a graphics board and ignore its monochrome features, but overall the board is an excellent solution to the problem of graphics on a monochrome display.

PARADISE MODULAR GRAPHICS CARD—Paradise Systems
"Drawing Toward Monochrome." 4:1 (Jan 1986):70-77.
"Paradise Modular Graphics Card." Product of the Month. 3:3 (Mar 1985):21.

PARADOX—Ansa Software Corp.

"Using ROM Characters." Tech Notebook. 4:8 (Aug 1986):47.

PASCAL APPLICATION DEVELOPMENT TOOLS—Blaise Computing, Inc.
"Pascal Tools Review." 1:5 (Feb 1984):161-171.

"PASCAL BUGS"
Forgeron, Ted. 3:5 (May 1985):199-208.
IBM Pascal 2.0 and Microsoft Pascal 3.2—different releases of Microsoft's compiler—have at least five serious bugs. Unnecessary parentheses enclosing REAL8 expressions cause incorrect expression evaluation. Real numbers declared at a higher nesting level than an assignment statement may not be assigned correctly. REAL8 VAR parameters passed to library functions can cause the compiler to crash. Code is generated incorrectly for multiplication results assigned to an INTEGER4 variable. Automatic coprocessor detection does not work correctly on the PC/AT. Pascal programs are given that demonstrate each of the bugs and suggest ways to handles the problems. Figures show compiler output. *Letter References—3:8 (Aug 1985):22; 3:9 (Sep 1985):20.*

"PASCAL TIMES FOUR"
Duntemann, Jeff and Michael Bentley. 2:1 (Jul 1984): 58-72.
IBM/Microsoft Pascal, version 3.2, Pascal/MT+86 version 3.2 (Digital Research), SBB Pascal version 2.0 (Software Building Blocks), and Turbo Pascal version 1.0 (Borland) are reviewed. All are native code compilers. Microsoft Pascal generates the fastest code, but its documentation is dense and disorganized. Pascal/MT+86 has incomplete documentation and cannot be used with DOS LINK. SBB Pascal generates excellent code and supports graphics and other PC features. Turbo Pascal is termed remarkable in performance and features; however, it is difficult to generate large programs with this compiler because it lacks a linkable object format. Tables compare the compilers' features and benchmark test results. Listings of the benchmarks are included. *Letter References—2:3 (Sep 1984):21; 2:4 (Oct 1984):12.*

"PASCAL TOOLS REVIEW"
Gleckler, Arthur A. 1:5 (Feb 1984):161-171.
Blaise Computing's Pascal Application Development Tools is an anthology of function and procedure libraries for use with the IBM Pascal Compiler. The tools fall into six groups: basic numeric functions, string manipulation routines, screen handling routines, fast form utilities, graphics routines, and application routines, including a command-line access function and a command-line parser. A table lists the functions and procedures that are included in the package. A figure shows interdependencies of the Pascal Tools units. The package is recommended for serious Pascal programmers.

PASCAL UTILITIES—Seven Valleys Software
"Well-formatted Pascal, The." 2:4 (Oct 1984):22-33.

PASCAL/MT+86—Digital Research, Inc
"Pascal Times Four." 2:1 (Jul 1984):58-72.

PASCALPAC—Major Software
"Debugging Duo." Product Watch. 4:3 (Mar 1986): 180-182.

PASM—Phoenix Software Associates
"PASM, TASM, and CHASM." 3:12 (Dec 1985):161-169.

"PASM, TASM, AND CHASM"
Mirecki, Ted. 3:12 (Dec 1985):161-169.
Three new assemblers, Phoenix Software's macro assembler (PASM), Speedware's TURBO EDITASM (TASM), and Whitman Software's Cheap Assembler (CHASM), are judged against the standard, the IBM/Microsoft Macro Assembler (MASM) version 3.01. Tables compare features and benchmark performances of the four assemblers. *Letter References—4:4 (Apr 1986):22-24.*

"PASSING THE LAB TEST"
Aitken, Peter G. 1:4 (Jan 1984):75-84.
An IBM PC can be used to collect laboratory data. At the Integrative Neurophysiology Laboratory of the Duke University Medical Center, the PC was selected because of its fast processing speed and large memory capacity. The Tecmar Labmaster I/O board was added. A RAM disk, IBM Macro Assembler, and IBM BASIC compiler were used. Assembly and BASIC programs are listed. These programs provide routines for collecting and analyzing data using the I/O device.

"PATCHING A BUG IN DOS 2.1"
Awalt, Don. 2:5 (Nov 1984):71.
Improper handling of the segment register and stack pointer in DOS 2.1 can cause the PC*jr* to hang after any key is pressed. However, a patch has been provided by IBM to fix this problem. The operation involves changing the six instances in IBMDOS.COM in which the two stack registers are modified incorrectly. The necessary patch is provided in a figure. *Letter References—3:1 (Jan 1985):25; 3:3 (Mar 1985):17.*

"PATCHWORK"
Frank, Daniel M. Tech Notebook. 2:2 (Aug 1984):113.
Although the undocumented SWITCHAR= statement can be used to allow the UNIX-like slash character in path names, it causes problems when RESTORE is used to reload files. The solution is to use DEBUG to patch RESTORE to performs correctly with the alternate path character. Source code for the patch is included.

PC MODEM HALF CARD—Ven-Tel, Inc.
"Communicating from Within." 3:9 (Sep 1985):60-77.
"PC Modem Half Card." Product Watch. 4:10 (Oct 1986):185-188.

"PC MODEM HALF CARD"
Hansen, Augie. Product Watch. 4:10 (Oct 1986): 185-188.
A new version of the Ven-Tel modem incorporates new hardware features and is supported by improved documentation and release 3.6 of Crosstalk XVI.

PC MOUSE—Mouse Systems Corp.
"Tale of Two Mice, A." 1:7 (Apr 1984):150-172.

"PC POWER-UP ERROR CODES"
Wright, Jack. 2:2 (Aug 1984):115-118.
When the IBM PC is powered up, it performs various parity checks, which indicate to the user if anything is wrong. A table lists parity errors, messages, and possible causes of the problems. The parity check process is explained. *Letter References—2:6 (Dec. 1984):26-29.*

P/C PRIVACY—MCTel, Inc.
"Encryption Software." 3:6 (Jun 1985):162-179.

PC PROBE—Atron
"Entomological Explorations." 3:1 (Jan 1985):88-105.
"It's PC Probe!." 1:8 (May 1984):86-96.
"Untangling Programs." 3:4 (Apr 1985):81-93.

"PC SCHEME"
Beale, Dan. Product of the Month. 4:8 (Aug 1986):29.
PC Scheme from Texas Instruments is a complete and inexpensive LISP compiler. It implements Scheme, a standardized version of LISP, and includes extensions for vectors, arrays, streams, structures, graphics, and interlanguage calling. An EMACS editor and a pop-up, full-screen debugger also are included. Benchmark times show that PC Scheme has faster execution times than any other LISP for the IBM PC.

"PC SPEAKS LISP, THE"
Wong, William G. 1:7 (Apr 1984):112-148.
IQ LISP version 1.4.5 (Integral Quality), muLISP/muStar-82 version 3.13 (Microsoft), and TLC LISP version 1.26 (The LISP Company) are reviewed. Tables and figures show how IQ LISP uses tagged memory for object formats. Another figure shows the closed data space of the muLISP compiler. A table compares the features of the various compilers. A sidebar lists various reference books available on programming in LISP. *Letter References—2:1 (Jul 1984):24; 2:2 (Aug 1984):14.*

"PC VERSIONS OF IRMX"
Foard, Richard M. 4:6 (Jun 1986):126-150.
PC/RTX (for the PC) and AT/RTX (for the PC/AT) from Real-Time Computer Science are IBM-specific implementations of Intel's iRMX86 6.0. iRMX provides object-oriented architecture and exception handling techniques that encourage good system design. PC/RTX and AT/RTX reduce the work necessary to use iRMX in a PC-based system. Tables list UDI system calls and interrupt procedure relationships. Figures show the hierarchy of communications within the system and interrupt management.

PC/AT FIXED-DISK DRIVE OPTION—IBM
"Replacement Disks for the AT." 3:8 (Aug 1985):74-79.

PC-DOS—IBM
"Ascent of DOS, The." 4:10 (Oct 1986):92-104.

PCEXTENDER—Falcon Technology
"Ten By Ten." 2:5 (Nov 1984):52-63.

PC/FOCUS—Information Builders, Inc.
"Mainframe Compatibility, A Data Manager with." 3:11 (Nov 1985):124-144.

"PC*jr*"
Fastie, Will. Directions. 1:4 (Jan 1984):10-11.
The long-awaited PC*jr* arrives. At first glance, it seems very compatible with the PC, although the keyboard is quite different. *PC Tech Journal* is working to gather the detailed, technical information concerning the machine that is necessary for a quality review.

PC/INTERCOMM—Mark of the Unicorn, Inc.
"High-tech Mimicry." 2:3 (Sep 1984):46-55.

"PC/IX"
Fastie, Will. Directions. 1:7 (Apr 1984):11-16.
IBM has introduced PC/IX, a UNIX-like operating system for the PC/XT and in so doing has decided to ignore XENIX, Microsoft's version of the UNIX operating system. Because of several drawbacks, PC/IX is not likely to have mass market appeal. Several other firms also are announcing implementations of UNIX for the XT.

"PC/IX"
Hansen, Augie. 3:7 (Jul 1985):80-87.
PC/IX (Interactive Executive) is the first single-user UNIX system for the IBM PC family. It was ported to the 8088 microprocessor from AT&T System III sources by Interactive Systems. Version 1.1 runs on the PC equipped with a hard-disk expansion unit, the PC/XT, the PC/XT-370, and the PC/AT in real address mode only. It is a multitasking system with a full-screen editor called INed, which is covered in a sidebar. The package includes a core system and seven subsets: programming, communications, Source Code Control System (SCCS), text processing, special-purpose programs, games, and system accounting. Tables show hardware requirements, DOS-PC/IX interface commands, and PC/IX benchmarks on the XT and the AT. *Letter References—3:9 (Sep 1985): p. 20.*

PC/IX—IBM
"PC/IX." 3:7 (Jul 1985):80-87.
"Reflections of UNIX." 3:5 (May 1985):54-73.

"PC-TALK: COMMUNICATIONS CONTROL"
Fastie, Will. 1:2 (Sep/Oct 1983):162-166.
PC-TALK is a communications software package for the IBM PC. PC-TALK III, the third version, is highly recommended. The program may be used for terminal emulation or intercomputer communications. Most commands require a single keystroke. A directory can store up to 60 numbers. Although its standard configuration is to work with a Hayes-compatible modem, other modems can be accommodated. Files can be received and transmitted easily. XMODEM protocol is also supported.

PC-TALK—FREEWARE
"PC-TALK: Communications Control." 1:2 (Sep/Oct 1983):162-166.

PC10—Qubié
"Ten By Ten." 2:5 (Nov 1984):52-63.

"Bernoulli Box." Product Watch. 4:4 (Apr 1986):197-98.
"Bernoulli Box, The." 3:6 (Jun 1985):144-156.

"PERSONAL CICS"
DeShazo, Brandy C. 3:12 (Dec 1985):171-178.
Unicorn Systems' MicroCICS is a development and testing tool that provides a CICS (customer information control system) for a personal computer. It requires an IBM XT-370 or AT-370 with 640KB; comparisons are shown in a table. A programmer using MicroCICS can download and upload data from a mainframe, work with VSAM (virtual sequental access method) files, generate BMS (basic mapping support) maps, and revise system table data. MicroCICS provides more consistent response times, isolates users from programmers developing new programs, and serves as a training resource. A table lists CMS (conventional monitor system) commands.

PERSONAL COMMUNICATIONS MANAGER—IBM
"ACS or PCM: The Better to Communicate with." 2:2 (Aug 1984):155-177.

"PERSONALLY DEVELOPED SOFTWARE"
Product of the Month. 3:2 (Feb 1985):26.
IBM's Personally Developed Software consists of 36 different programs developed by individual authors and offered at very attractive prices through a direct marketing program. A table lists the entertainment, education, business, and productivity-oriented software packages in this series and gives their prices.

"PERSPECTIVE ON DATA MODELS, A"
Holsapple, Clyde W. 2:1 (Jul 1984):113-142.
A data model provides conventions for specifying the structure of data used to represent the real world and is described in terms of entities, attributes, and relationships. Each of the five formal models—relational, hierarchical, shallow-network, postrelational and CODASYL-network—is described. A table lists existing data management programs based on the various schemas.

"Out from the Shadow of IBM." 4:8 (Aug 1986):52-75.

PL/1 COMPILER—Digital Research, Inc.
"Considering PL/1." 3:8 (Aug 1985):82-102.

"PLAN 4000"
Churchill, Bruce W. 1:5 (Feb 1984):58-70.
The Personal Local Area Network (PLAN 4000) is a local area network for connecting IBM PC, Apple II, and Apple III microcomputers. Figures illustrate PLAN 4000's distributed-star physical layout. File servers, filetransfer servers, and 3270 emulator servers are available. Tables list network commands.

PLAN 4000—Nestar
"PLAN 4000." 1:5 (Feb 1984):58-70.

PLINK86—Phoenix Software Associates
"Program Orchestration." 2:5 (Nov 1984):28-44.

"PLOT THICKENS, THE"
Johnson, Steve and Bob Kephart. 1:9 (Jun 1984): 117-127.
DGRAPH from Fox & Geller, Inc. is a graphics plotting utility for generating graphs using dBASE II data. It displays graphs on the IBM Color Graphics Adapter screen but is intended primarily for plotting graphs on paper. It can operate from a monochrome screen without screen display. The program is entirely menu driven, but the menus are inconsistent and poorly designed. Figures show sample graphs produced by the product. A listing provides a program that demonstrates how to use a printing device not recognized by DGRAPH.

"PLOTTING DATA"
Aitken, Peter G. 3:3 (Mar 1985):123-129.
Assembly language utility programs that digitize and store waveforms are listed and described. The programs are able to manipulate and graphically display the digitized data. Figures show the various waveform displays produced by the programs. The IBM Color Graphics Adapter may be used in the high-resolution mode to display the waveforms. These programs may be used in engineering and scientific applications.

"PLOTTING, DRAWING, AND FILLING"
Morgan, Christopher L. 1:6 (Mar 1984):38-58.
The article is an excerpt from the author's *Bluebook of Assembly Language Subroutines*. The nine assembly language routines presented perform basic plotting funcitons on the IBM Color Graphics Adapter, including screen clear, point plot, point plot via XOR, read pixel color, box fill, box fill via XOR, and line draw. The programs are not as fast as routines incorporating self-modifying code but represent good programming practice.

PLUG 'N PLAY INTERFACE KIT—Okidata
"Oki Dokey: from PC to Okidata 84." 2:3 (Sep 1984): 92-106.

PMATE—Lifeboat Associates
"Program Editors." 1:2 (Sep/Oct 1983):110-123.

"POCKET APL"
Wynn, Pardner. 3:7 (Jul 1985):90-98.
STSC's Pocket APL is a simplified subset of STSC's APL*Plus product. The Del editor included with the package is similar to the DOS BASIC line editor, but the lack of a full-screen editor is an inconvenience. Pocket APL lacks graphics and communications support, DOS/BIOS calls, and utility workspaces; it is not powerful or complete enough for serious APL program development. Tables provide features and performance benchmarks comparisons between Pocket APL, APL*Plus, and IBM APL. A figure shows a piece of a sample program.

POCKET APL—STSC
"Pocket APL." 3:7 (Jul 1985):90-98.

POLYLIBRARIAN—Polytron Corp.
"Checking Out the Librarians." 2:4 (Oct 1984):80-90.

PONTIUS, CASEY
"12 Functional Modules of ANS COBOL, The." 1:7 (Apr 1984):76-82.

"POOR RICHARD'S CONVERTER: FROM A TO D"
Murray, William H. 2:3 (Sep 1984):30-41.
DASCON-1 (Metrabyte) is an analog-to-digital converter expansion board for the IBM PC. The dual-slope A/D converter (12 bits plus a sign bit) has four channels and a battery clock. A well-documented owner's manual describes operation and applications. Photos show various configurations of the converter. BASIC programs are listed for monitoring applications. Tables and figures show function data, test data, and specifications.

"POP (UP) GOES THE MOUSE MENU"
Anderson, Julie A. 2:2 (Aug 1984):74-84.
Three software packages that present pop-up menus for use with a mouse are evaluated: Designer Pop-Up Menus 3.0 (Mouse Systems); visuALL 3.09A (Trillian Computer); and Mouse Menu 200.101 (Microsoft). VisuAll is not easy to use because of its complicated command language. The Mouse Menu 200.101 package, which includes both the mouse and the necessary software, is best used when control over physical menu design and screen placement are required. Photos show sample screen displays, and listings provide sample program code.

POPCOM C100—Prentice Corp.
"Communicating from Within." 3:9 (Sep 1985):60-77.

"PORTABLE APPROACH, THE"
Foard, Richard M. 4:5 (May 1986):75-89.
Hunter & Ready, Inc.'s VRTX/86 (Versatile Real-Time Executive) family of silicon software components offers portability both from one operating environment to another and from one set of hardware to another. The device support package (DSP) included with VRTX/86 allows developers to begin one step past the hurdle of configuring for the PC's hardware set. Figures show dimensions of portability, and DSP and VRTX/OS in the PC/XT environment. A table lists TRACER commands. A sidebar highlights PC/VRTX from DYAD Technology Corp., a memory card designed for use with VRTX.

"PORTABLE II, THE"
Fastie, Will. Product of the Month. 4:6 (Jun 1986):31.
Compaq's Portable II, Model 3, is a lightweight PC/AT in a suitcase. It is 30-percent smaller and 17-percent lighter than other Compaq portables on the market and features an 8-MHz, 80286 processor that can be adjusted from the keyboard while the machine is running to operate at 6 MHz. The Portable II comes with 640KB of memory, a 360KB third-height disk drive, a serial and a parallel port, a realtime clock, and two expansion slots. Memory can be increased to 2.1MB without using an expansion slot.

"POWER GRAPHICS"
Hoffmann, Thomas V. 3:7 (Jul 1985):56-77.
The Vectrix VX/PC Color Card Set and the IBM Professional Graphics Controller (PGC) are reviewed. The PGC displays 256 different colors from a 4,096-color palette in 640-by-480 resolution; the VX/PC displays 512 colors also from a 4,096-color palette in 672-by-480 resolution. VX/PC is faster in emulator text mode, but the PGC displays higher quality graphics. Tables compare features, commands, benchmarks, and drawing times. Photos show sample screen displays from both systems. Sample program listings and an output driver for the PGC accompany the article. *Letter References—3:10 (Oct 1985):15; 3:12 (Dec 1985):18; 3:12 (Dec 1985):24.*

"POWER OF TURBO PASCAL, THE"
Covington, Michael A. 3:2 (Feb 1985):112-123.
Turbo Pascal 2.0B (Borland) is an excellent compiler distinguished by fast code, ease of use, low price, and access to low-level functions previously available only from assembly language. Listed programs to get command line parameters, manipulate the date and time, access subdirectories and implement pop-up windows demonstrate Turbo Pascal's low-level power. A photo shows the pop-up windows. *Letter References—3:5 (May 1985):18; 3:6 (Jun 1985):15-16.*

POWER PACK 3—Software Horizons, Inc.
"Drop-in Modules for C, Part 3." 3:8 (Aug 1985): 141-159.

"POWERS THAT BE, THE"
Hultquist, Paul F. Programming Practices. 3:5 (May 1985):213-214.
Standard Pascal does not have built-in exponentiation routines. This problem can be fixed with two listed, optimized exponentiation programs. Two programs are required because optimization strategy depends on whether the exponent is integer or floating point.

"POWERSTAT"
Aitken, Peter. Product Watch. 4:10 (Oct 1986):189-190.
A good statistics package, PowerStat supports all basic functions and many kinds of regression analysis. It has three parts: the data set module, the user program module, and the menu-driven statistical function module. A BASIC-like programming language, PowerStat can convert of data imported from other statistics packages.

"PREEMPTIVE SCHEDULING ON DOS"
Foard, Richard M. 4:4 (Apr 1986):98-122.
The AMX86 Multitasking Executive from KADAK Products, Ltd. can be used to build dedicated, realtime applications systems on Intel 8088- or 8086-based computers. Modules written in C, Pascal, or PL/M can call upon any of AMX's services directly. AMX is not intended to support general purpose systems with highly dynamic requirements, such as UNIX-like time-sharing systems; it is best suited for building lean, dedicated realtime systems. A sidebar features the C/Sharp Realtime Toolkit from Systems Guild, Inc., which provides five families of subroutines to tackle realtime jobs. A figure shows AMX86 components. Tables list basic AMX86 services, PC interrupt processing, and AMX86 system configuration.

PRESS, LARRY, AKI RUNCHAL, and CLEMENT TAM
"FORTRAN Pitfalls." 1:2 (Sep/Oct 1983):150-156.

"PRINT SCREEN SWITCH, A"
Swan, Tom. Programming Practices. 3:7 (Jul 1985): 162-163.
Because the PC's Shift and PrtSc keys are adjacent it is possible to hit both keys together accidentally. A listed program eliminates this problem by disabling the print screen keystrokes. It modifies a status byte at 50:0 to indicate that a print screen operation is already in progress.

"PRINTER CONTROL"
Walkenbach, John. Tech Notebook. 3:8 (Aug 1985):41.
A pop-up editor can be used to send printer control codes from within an application. A file containing printer control code sequences (specific to a particular printer) can be created and loaded into the pop-up editor. When the user wants to send a control sequence to the printer, the desired control string in the file is marked as a block then printed as a portion of an ordinary file. Figures show example control code files for the IBM Graphics Printer and the Gemini 10X printer. *Letter References—3:10 (Oct 1985):23.*

"PRINTER STANDARDS"
Fastie, Will. Directions. 2:3 (Sep 1984):5-6.
For printers to eventually become as interchangeable as stereo components, the industry must develop standards for communications between printers and computers. Good standards have been developed in other areas, such as serial communcations (RS-232), the 5¼-inch diskette, and displays. Only the ASCII character set is standard on printers. Type styles, graphics, paper movement, and other printer functions are controlled differently on almost every brand of printer.

"PROBLEM OF COMPUTER SEMANTICS, THE"
Fastie, Will. Directions. 1:3 (Nov/Dec 1983):10-12.
General-purpose microcomputer programs are not able to handle the semantics (the meaning and the context) of a particular application. For example, Ashton-Tate's Lotus 1-2-3 can take data from the spreadsheet and graph it quickly and effectively. However, it cannot label each axis of a line graph using data entered in the spreadsheet. Although 1-2-3 is advertised as an integrated package, the user actually must perform the integration. A sidebar offers a profile of current readers and solicits readers' suggestions concerning the magazine.

"PRODESIGN II"
Angell, Richard. Product Watch. 4:4 (Apr 1986): 194-197.
ProDesign II from American Small Business Computers is reviewed. It is a low-end, low-cost CAD package that qualifies as an entry-level, computer-aided drafting tool. It operates by creating graphics primitives. The database limits allow drawings of a reasonable size to be created. One of its limitations is in environmental definition. The lack of continuous coordinate displays from user-defined datum lines is also mentioned.

PROFESSIONAL BASIC—Morgan Computing
"Six New Shapes of BASIC." 4:6 (Jun 1986):52-75.

PROFESSIONAL DEBUG FACILITY—IBM
"Professional Debugging." 3:3 (Mar 1985):60-70.

"PROFESSIONAL DEBUGGING"
Daetwyler, Dan. 3:3 (Mar 1985):60-70.
The IBM Professional Debug Facility is a hardware/software debugging tool that consists of two packages. The Resident Debug Tool (RDT) provides enhanced monitoring of program execution, including full trace facilities and the use of up to 18 breakpoints. The Disk Repair Utility is a circuit board that can be used to create nonmaskable interrupts. Figures show RDT memory window display, disassembly window display, partial trace window display, numeric math coprocessor window display, and the Disk Repair Utility main menu. Tables show an RDT command summary and disk repair commands.

PROFESSIONAL GRAPHICS CONTROLLER—IBM
"Power Graphics." 3:7 (Jul 1985):56-77.

PROFESSIONAL PASCAL—Metaware, Inc.
"Approaching the Optimum Pascal." 4:7 (Jul 1986): 94-133.

"PROGRAM EDITORS"
Glinert-Cole, Susan. 1:2 (Sep/Oct 1983):110-123.
Eighteen ASCII file editors, useful for program development, are compared: AFSE (Nota Bene Software), DataText (Datatek), Edit (Mc/clain Software), Edit Smith (Symmetric Software), Edix (Emerging Technology), Full Screen Editor (Frank Shiele Software), Professional Editor (IBM), I-Edit (Innovative Technology), P-Edit (Satellite Software), PMate (Lifeboat Associates), SCREEN (Basic Business Software), StarEedit (Supersoft, Inc.), TED (Morgan Computing Co.), TEXTRA Jr. (Ann Arbor Software Associates), VEDIT (Compuview), XyWrite (Xyquest), Big Ed (Irohnic Systems), and Easy Edit (Norell Data Systems. Most of them may be used as unsophisticated word processors. Tables compare the features of the editors.

PROGRAM EXECUTION ANALYZER—Micro Integrations Engineering, Inc.
"Stalking the Software Bug." 1:8 (May 1984):100-108.

"PROGRAM ORCHESTRATION"
Armbrust, Steven and Ted Forgeron. 2:5 (Nov 1984): 28-44.
Phoenix Software Associates' Plink86 is a program development tool that uses an overlaying method to allow different parts of a program to occupy the same area of memory at different times. Thus, a large program can run in less memory. Plink86 can be used as a substitute for IBM LINK or MS-LINK from Microsoft. It can link any object modules that adhere to the Microsoft or Intel relocatable object-module formats. Tables compare Plink86 with MS-LINK and show benchmark results for Plink86 using a 250KB program. Figures show the process of overlaying and give examples of commands.

"PROGRAMMER PRODUCTIVITY"
Fastie, Will. Directions. 4:5 (May 1986):11-12.
Programmers today, like programmers 13 years ago, still are responsible for reducing an abstract problem to a set of instructions that can be understood by some computer language. However, this finally may be changing. A number of packages now on the market, such as MDBS's Guru and Texas Instrument's Personal Consultant, are tools for building expert systems. Soon, an expert programming assistant may be able to turn a bunch of rules and descriptions into program code. Sidebars note the highlights of Esther Dyson's annual Personal Computer Forum in Phoenix and the First International Conference on CD ROM in Seattle.

"PROGRAMMING FOR THE 3270-PC"
Harian, Armen and Jeffrey Krantz. 3:3 (Mar 1985): 74-88.
Many PC-DOS programs will run unmodified on the 3270-PC, but some must be modified because of the concurrent (seven task) 3270 Control Program and subtle I/O differences between the PC and the 3270-PC. Tables show 3270 display characteristics, asynchronus communications details, and a communications buffer design.

"PROGRAMMING IN 1-2-3"
Wagner, Jordan Lee. 3:11 (Nov 1985):149-161.
With the help of some clever programming, the user can realize extra mileage out of Lotus 1-2-3. The macros inherent to 1-2-3 can be used to create a programming language with easy application to data processing operations and very user-friendly interfaces. In addition, the programming techniques presented make debugging in 1-2-3 less difficult. Figures provide source code for the programming of a stack and an iterative loop.

"PROGRAMMING IN LOGIC, PART 1"
Covington, Michael A. 3:12 (Dec 1985):82-95.
Prolog is a nonprocedural programming language that solves problems by taking a set of facts and working through rules of logic to reach a conclusion. Prolog is able to deduce additional facts on its own. The language is used to write expert systems, parsers, and other artificial intelligence applications. Its limitations include the need to mix procedural and nonprocedural programming styles and its inability to provide negative conclusions or embedded conditionals. Listings show sample programs for a parser and a small expert system; figures show screen display produced by the programs. An accompanying sidebar compares Prolog's two syntaxes. *Letter References—4:6 (Jun 1986):18-20.*

"PROGRAMMING IN LOGIC, PART 2"
Covington, Michael A. 4:1 (Jan 1986):145-155.
Prolog programming language is designed to solve problems using logic. It is neither procedural nor numerical. Eleven Prolog implementations for the PC are reviewed: A.D.A. Public Domain Prolog, A.D.A. Educational Prolog, and VML Prolog (Automata Design Associates); Arity/Prolog (Arity Corp.); Micro-Prolog (Logic Programming Associates); MProlog (Logicware, Inc.); Prolog-1 (Expert Systems International); PROLOG-86 (Solution Systems); and Prolog V (Chalcedony Enterprises). Arity/Prolog is the only native-code compiler reviewed. Tables compare benchmark times and implementation features of each of the products. Listings show sample programs.

"PROPRIETARY RIGHTS AND SOFTWARE"
Oppenheimer, Max Stul. Legal Brief. 3:12 (Dec 1985):189-191.
A report published by the American Bar Association's Computer Law Division regarding proprietary rights in software addresses six issues. The members are split on whether Section 109 of the Copyright Act is applicable to software. They have proposed amending the copyright law so that loading a program into RAM will be considered copying the program. The committee opposes amending the Act to prohibit reverse engineering. The members split evenly on whether complete source code should be required when filing for a software copyright. The committee supports the use of *c* as the software copyright symbol and the idea that state trade secret laws are not preempted by the Copyright Act.

"PROTECTING THE CORPORATE FLANK"
Oppenheimer, Max Stul. Legal Brief. 3:1 (Jan 1985): 179-183.
Trade secrets need protection from employees who might leave a company to start a competitive firm or go to work for a competitor. In most states a "covenant not to compete" or a "noncompetition agreement" is enforceable. Employees agree not to compete for a certain time period after termination of employment.

"PROTOTYPES IN MOTION"
Duntemann, Jeff. Product of the Month. 4:3 (Mar 1986):29.
Dan Bricklin's Demo Program, produced by Software Garden, Inc., is an interface prototyping tool that allows the user to design a text screen using the program's built-in editor. The screen is then compressed and stored in RAM, not as a disk file. Users can devise hollow programs without doing any actual programming. The product can be used to determine the bounds of acceptability of program complexity and computational delay by varying the programmable delays between screens.

"Moving up to Tape." 3:11 (Nov 1985):62-83.

"QISORT"
Mirecki, Ted. Product Watch. 4:5 (May 1986):201-203.
A sorting utility for Ryan-McFarland (RMCOBOL), QISort from Quantumn Information Systems can be invoked from the DOS prompt or called as from a COBOL program. QISort makes up for tedious and error-prone formatting codes with its functionality and speed (faster than most sort utilities). There are three types of QISort parameters: fields to sort on (required), record selection criteria (optional), and output file format (optional). QISort accepts all RMCOBOL file types.

"QUICKCODE FOR 1-2-3"
Richardson, Ronny. Product Watch. 4:8 (Aug 1986): 175-176.
QUICKCODE for 1-2-3 from Fox & Geller, Inc. provides a useful macro language, called PL/123, for Lotus 1-2-3, which is similar to BASIC and dBASE. Code is saved in standard text files and is accessible from any editor. QUICKCODE for 1-2-3 also includes a keystroke macro processor and a facility for developing databases written with Lotus macros. Design flaws make both programs unusable.

"QUICKCODE: INSTANT GRATIFICATION"
Glinert-Cole, Susan. 1:9 (Jun 1984):129-145.
From a user-designed data entry screen, Fox & Geller, Inc.'s QUICKCODE generates dBASE II data files and dBASE II programs to add, delete, print, and edit records; print labels; and output data in delimited format for use with WordStar. The screens may contain line drawing characters, and default values may be defined for designing screens quickly. The QuickMenu facility allows menus to be created. Figures show sample screens and menus.

QUIETWRITER PRINTER—IBM
"Uptown Printers." 3:4 (Apr 1985):49-55.

R

R:BASE 5000—Microrim
"Kernel Code Generation, A Data Manager with." 3:9 (Sep 1985):82-101.

"R:BRIDGE"
Lima, Anthony K. Product Watch. 4:10 (Oct 1986): 188-189.
R:Bridge from Synchronicity Research is a memory-resident utility that provides access to R:base 4000 and 5000 data as well as some R:base commands, from any of four popular languages—APL(APL*Plus/CP), BASIC (Microsoft and IBM), C (Lattice, RUN/C, Microsoft, and C86), and Pascal (Turbo Pascal 2.0 and 3.0). The program works independently of R:base; however, R:base is required to set up databases and tables. R:Bridge is recommended for those working with R:base who need improved performance or added flexibility, and who have some familiarity with one of the four languages supported.

"R&D TAX INCENTIVES"
Oppenheimer, Max Stul. Legal Brief. 3:5 (May 1985): 223-224.
Until December 31, 1985, a taxpayer is entitled to a Research and Development Tax Credit established by the Economic Recovery Tax Act of 1981. The amount of tax incentive available depends on the amount by which base period research expenses exceed qualified research expenses. Definition of these terms and the methods of calculating the tax credit are presented. Applicability of research and development tax incentives to private consultants and contractors is also considered.

"Multifunction Boards for the PC." 1:4 (Jan 1984):66-73.

"RANDOM NUMBER GENERATORS"
Hultquist, Paul F. 2:2 (Aug 1984):86-110.
Performance of the random number generator in interpreted BASIC is tested, and its algorithm is compared theoretically with other algorithms. PC BASIC uses the linear congruential method, a standard algorithm of limited use with BASIC's short 16-bit integers. Figures show the scatter plots of the relative performance of eight different algorithms. Listings and references are also included. *Letter References—2:5 (Nov 1984):22.*

"RAPID SCREENS IN TURBO"
Louderback, Joseph G. Tech Notebook. 3:9 (Sep 1985):39.
Two programming tricks in Turbo Pascal are used to flash data to and from the screen quickly. One technique allows more than 100 screen images to be stored. Images are stored on the heap, a larger area than Turbo's 64KB code and data segment. The second technique uses Turbo's fast MOVE command for the data transfers.

RASM-86—Digital Research, Inc.
"RASMatazz without the Jazz." 2:2 (Aug 1984):120-150.

"RASMATAZZ WITHOUT THE JAZZ"
Dunford, Chris. 2:2 (Aug 1984):120-150.
Digital Research, Inc.'s RASM-86 is an assembler that is intended to compete with IBM's Macro Assembler (MASM). RASM-86 is well documented; it uses less memory than MASM and has significantly fewer bugs. However, RASM-86 is not a macro assembler and performs only limited conditional assembly. It lacks an ASSUME statement and has considerably less flexibility than MASM when setting up complex data structures. Figures show RASM-86 language samples and an example of MASM macro use. A table compares the program sizes of MASM and RASM-86; a second table compares assembly times.

"RECURSIVE CURVES"
Lee, Eui In. 3:4 (Apr 1985):171-174.
Fractal curves are best drawn using the techniques of recursive programming. Unlike Pascal, BASIC does not permit easy use of recursive techniques. IBM BASICA's DRAW statement, with its Graphics Definition Language (GDL), permits the use of recursive concepts without incorporating actual recursion in BASICA code. Two BASICA programs are provided that use GDL to plot Hilbert and Sierpinski curves. A third program plots a quadratic Koch curve. Figures show sample curve plots.

REDMOND, WILLIAM J.
"Managing Memory." 2:2 (Aug 1984):42-62.

"REFLECTIONS OF UNIX"
Hansen, Augie. 3:5 (May 1985):54-73.
The multitasking, multiuser UNIX operating system is ahead of competing operating systems, such as DOS, in areas of flexibility, convenience, and overall capability. Three licensed versions of UNIX are reviewed: PC/IX 1.0 (IBM); VENIX/86 2.0 (UniSource Software); and XENIX 3.0 (The Santa Cruz Operation); as well as three look-alike products: COHERENT 2.3.35 (Mark Williams); QNX 1.2 (Quantum Software Systems); and uNETix SFS 2.0 (Lantech Systems). Tables summarize the six products, as well as the commands of UNIX, system administration, text processing, and program development.

"REFLEX"
Casey, William. Product Watch. 4:4 (Apr 1986): 189-194.
Reflex, a simple file manager with a well-designed user interface, was built by Analytica Corp. and later bought by Borland International. Reflex provides five views of data: list, form, graph, crosstab, and report. Because it is a file manager, Reflex does not support relationships between files and has no programming language. For its price, Reflex is a functionally robust system. *Letter References—4:7 (Jul 1986):18-21.*

RELAY—VM Personal Computing
"High-tech Mimicry." 2:3 (Sep 1984):46-55.
"Instant Relay." 2:4 (Oct 1984):94-112.

REMOTE—Microstuf, Inc.
"Controlling from Afar." 4:4 (Apr 1986):84-93.

"REPLACEMENT DISKS FOR THE AT"
Hansen, Augie. 3:8 (Aug 1985):74-79.
Prior to July 1985, only two non-IBM hard-disk drives compatible with the IBM PC/AT met IBM's specification for an average access time of 40 milliseconds or less: CORE International's ATplus and Express Systems' 20MB disk. IBM's drive is produced by Computer Memories Inc. (CMI). The CORE and Express Systems drives are made by Control Data Corp. (CDC). Benchmarks for each system were performed on an AT running DOS 3.0; the results are summarized in a table. The performance of the three systems was nearly identical. A figure shows the CMI head positioning system, and a sidebar is devoted to the meaning of the term "AT compatible."

"REPLACING RENAME"
Mirecki, Ted. Tech Notebook. 3:4 (Apr 1985):41.
DOS 2.x does not allow the user to rename subdirectories and volume labels. An assembly language program is presented that permits subdirectories and volume labels, as well as files, to be renamed. The program accepts wildcard characters in both the original and new names.

"RESET THE PRINTER"
Covington, Michael A. Tech Notebook. 4:4 (Apr 1986):52.
A method is provided to reset most PC-compatible parallel printers by lowering the INIT line in the parallel port. Code is provided in BASIC, assembly language, and Turbo Pascal that is used to perform the operation.

"REV UP THE AT KEYBOARD"
Crenshaw, Kevin M. Tech Notebook. 3:5 (May 1985):39.
New with the PC/AT is the bi-directional keyboard cable that allows a program to modify the registers of the keyboard controller chip, speeding up repeat-key action. The assembly language program listed can shorten the delay before a key starts to repeat and increase the autorepeat rate to 30 characters per second. *Letter References—3:10 (Oct 1985):26.*

PC BRAND™: CAREFULLY CHOSEN PROGRAMMER TOOLS

BRIEF *Is Anything But. A Whopper of an Editor*

With a name that belies its thoroughness, Brief™ has every feature you've ever contemplated for your editor-in-chief. Text, from keyboard or files, is housed in multiple buffers, and scrolled through one or more windows you open, close, resize. A text buffer may be called to different windows to view two areas at once. A change in one changes both. Text blocks may be marked for printing, writing to files, movement to scrap buffers for cut and paste into other buffers, or deletion, with as many "undo" levels as you want.

Brief has text search abilities rivaling "grep", with wildcards for matching, indifference to intervening characters, acceptance of character ranges.

If you use Lattice, C86™, or Wizard, and have 320k, you can compile your C program without ever leaving Brief. It finds the lines with errors, and marches you through the text for repairs.

Parts of Brief were written with its own Lisp-like macro language which has structure, 32-character variable names, conditional execution, loops, and you can actually read it! Nothing like the hieroglyphs we've seen elsewhere. Bulletin board and public domain disks with macros. "Simply the best text editor you can buy", Dvorak *Infoworld*. (Needs 192k.)

U0590	$195	**Call**

HALO GRAPHICS SYSTEM *Multi-Board Graphics Library*

The premier graphics library that got the ball rolling for PC-based graphics and has grown so omnipotent that it supports over 25 graphics boards — including IBM's EGA and Nr. 9 Revolution's hi-res series — and has a multitude of mouse and printer drivers. All that in each box. Separate C versions for Lattice, M'soft, Aztec, CI86. What does Multi-Halo do? A down to the last pixel graphics library plus functions to reset drivers so distributed program can run on anything. Wonderful value for single license. Flexible licensing available for redistribution. Specify: S0315 & Language. List: **$300.** We: **$219.** With Dr. Halo II, a free-standing "paint": List: **$440,** Us: **$299.**

WINDOWS for C/WINDOWS for DATA *Microsoft Windows™ and TopView™ Compatible*

CALL FOR FREE DEMO!

Windows for C™is a library of over 80 functions to add the pizazz and practicality of window partitioning to your application. Unlimited windows, each defined in a C structure for easy reference throughout your program, can be made either to pop up or permanently overwrite the screen. Routines will scroll and highlight lists with arrow keys, will read and scroll ASCII files vertically and horizontally in windows, and even write to memory-loaded files off the screen.

Logical treatment of video attributes permits unchanged programs to run on color or monochrome. Colors of windows are set individually.

All functions are in separate modules; only those used are linked. Only buffers holding on-screen or temporarily obscured windows occupy RAM; others released dynamically. Best overall rating and fastest display in Bill Hunt's 7/85 *Tech Journal* review of five windowing products.

Windows for Data comprises all of Windows for C but takes in data through the windows as well. At the high level a single function lets you specify prompt string, field length, data type, screen location, picture, target variable, then sets lesser functions scurrying to get and process a user's input. There are utilities to get system date and time, mess with strings, create your own masks for fields.

Field options can require entry, prevent entry, permit insert or overtype, beeping on invalid or overflow keystrokes, and attachment of field-specific help messages and functions you want called to display messages or validate entries. And you decide which keys will clear a field, jump to the next or prior, quit, etc. Options diverse enough that a set of "fields" can be made to behave like a Lotus™ menu.

Specify Compiler:	List:	PC Brand:
T0100 Windows for C	$195	$149
T0150 Windows for Data	$295	$259

MICROSOFT C 4.0 *A Great C Battle Rages and You're Winning*

As the dreadnaughts pound each other with ever heavier ordnance, today's programmers reap the spoils of this war. Bundling a source debugger and a "make", and sporting a "huge" memory model permitting single data objects larger than 64k, the Microsoft C compiler has jumped a full version number to 4.0. But what's really impressive are the benchmarks reported in Dr. Dobb's (8/86) encyclopaedic survey of 17 C compilers. Microsoft's and IBM's C (licensed from Microsoft) run away with the contest winning 11 of 27 benchmarks.

The CodeView™ debugger, free for a limited time, uses windows to show everything on one screen: source alongside disassembled object, variables, stack and registers. Drop down windows—use a mouse if you like—obviate learning of commands. "A source-level debugger that puts the rest to shame" (Dobb's),

Microsoft C now has five memory models for code and data, plus non-library support for another thirteen, and boasts alternate math packages for speed versus accuracy, with or without 8087/80287 chips. A big plus in multi-language settings: call from this C any routine written in later versions of M'soft Pascal, FORTRAN, or Macro Assembler. Object code of all four may be intermixed come link time or commingled into libraries.

Both linker and library manager are part of the package, as is the "make", a UNIX™ name for a smart batch program which knows to expend minimum effort to rebuild any size of project by compiling and assembling only elements affected by new or changed modules.

It is reportedly used by Lotus, Ashton-Tate and, fittingly, Microsoft itself to develop Windows. Dobb's calls it "the best MS-DOS C development environment value today [for] virtually any kind of program conceivable." 320k suggested.

Ask for:	List:	PC Brand:
G0500	$450	$295

C-TREE *B-Tree File Manager, Source Code, No Royalties!*

C-tree is sturdy code that has weathered many seasons of prolonged and widespread use. It comes in C source, so you can modify it to fit a special case. No royalties provided you bind it into your binary application.

C-tree's design splits nodes to allow any number of users to access an index file simultaneously even when updates are in progress. So multi-user configurations and adaptation to networks are possible. Record-locking routines are provided for DOS 3.1/3.2, UNIX and XENIX.

Thanks to source code which does not deviate from the K&R standard, C-tree can travel. Tests in many environments prove that C-tree gives your application a ticket to anywhere.

C-tree permits any number of keys for a data file, supports duplicate keys, alphanumeric or numeric, supports files of variable record length; multiple keys in one index file, and keys of variable length. Both high level ISAM routines which handle details with minimum coding, and decomposed step-by-step functions you can access directly. It's comprehensive.

Ask for:	List:	PC Brand:
F0660	$395	$329

CURSES *Unix Style Screen Management*

Curses from Lattice™ manages the screen of the PC like Unix™ curses. Library of 84 functions and macros parallels Unix with matching parameter lists. So Unix programs are at home on the PC, and vice versa. Keeps any number of screens in memory, supports color, vast function set to get characters, wrap lines, scroll, blank lines, highlight, etc. Like Unix refreshes screen only on your command. Ask for: L0850. List: **$125**. Here: **$99**. With Source: L0860, **$250/$199**

dBC *Lattice Library Maintains dBASE Compatible Files With the Power and Speed of C*

dBC™ links C to dBASE. It creates and maintains files and their indexes which exactly replicate dBASE file design. So dBASE can read and update them. And the reverse. dBC can use any files created by dBASE. Now C and dBASE can operate on the same data bases interchangeably.

That opens up the widespread culture of dBASE installations to exploitation by C programmers. Tap that market, avoid the resident dBASE language, and gain the advantages of C with this single product.

dBC's functions parallel all dBASE's file handling commands, many decomposed to give closer control. Each backed by demo source files on disk.

Use dBC for custom work for clients, or on its own. It's a complete ISAM file manager for C whether or not dBASE will be used in tandem, supports all four memory models, and can have sixteen index and data files open. Big discount to buyers of both dBASE II and III versions. Specify Lattice, Microsoft 3.x, or DeSmet.

Versions:		List:	PC Brand:
L00II	For dBASE II	$250	$195
LCCII	With Source	$500	$390
L0III	For dBASE III	$250	$195
LCIII	With Source	$500	$390

PANEL *Feature-Laden Screen Design Tool*

Writing your own screenware can blow completion dates and profits. Panel™ works with you interactively to set up foolproof screen displays and data entry forms rapidly. Output is C source code.

Not just single plane: layer your screen designs with up to ten overlapping images: Background pop-up lists, help boxes, and alternate input fields.

Panel builds in a user interface for keystroke movement within and between fields, supplies validation routines for checking user field entries. Diverse attributes may be selected for any field — size, data type, color, conversion of input to upper case; clearance of existing data when new entry is started; masks for standard formats (eg, dates); phrases which fill in when their first letter is typed; multiple-choice lists from which to choose by cursoring a highlighted bar. Fields may be multi-lined and scrolled if larger than the screen space allotted them. Specify: S0400 & Compiler. List: **$295**, Us: **$229**

30-DAY MONEY-BACK GUARANTEE

We refund the purchase price of any product returned within 30 days in entirely resalable condition. **You can even try out programs themselves** if product code begins with E, T, or L through N — even if it means breaking the disk seal. Some developers do pose limits, so for products beginning with other letters, opening sealed disks constitutes acceptance. But you can at least review the manual. There's just nothing stopping your buying from PC Brand.

WHY US?

• Latest versions of all products • Everything listed is in stock • Shipped 24 hours or sooner • No surcharge for credit card or COD purchase. **NEED TERMS?** On-the-spot credit to most public companies, government, educational, medical institutions. **LOOKING FOR SOMETHING?** We can get many more products — just ask! **NEED MORE INFO?** Our Catalog and literature cover just about everything.

For Orders, Literature, or Catalogs, Call Us at...

TODAY's TOP QUALITY AIDS TO PROGRAMMING PRODUCTIVITY

GREENLEAF FUNCTIONS *Bountiful Harvest*

C source, assembler source, and binary libraries of 225 functions for many compilers. Emphasizes tight functional groupings to minimize loading code which your application may never use. Manual helps select functions, bulletin board, too.

A sampling: *DOS* extensions for file and directory manipulation; *Screen:* to select mode, page, monochrome or color, palette; cursor shape, positioning; clearing and scrolling; pixel get and put; read light pen. *Strings:* Center, justify, etc.; efficient list operations which add, delete, sort string pointers for top speed. *Other:* graphics character primitives, keyboard status, function key assignment, time/date, read registers and memory size, peek and poke. Mature best-seller. Specify: S0770 & Compiler. List: $185, Here: $139

PFORCE *Phoenix Pfunction Pfestival*

Lotus® didn't do badly pulling it all together in one place. Phoenix has followed suit with the ultimate integrated C library, offering everything from low level functions for hardware access to complete b-tree database management. Along the way are prerequisites such as string manipulation, time/date, field and screen editing, but also four styles of menus (Lotus included), windowing, background tasking, DOS interfaces, directory management, even interrupt-driven communications. Design emphasizes objects, so characteristics of windows, databases, records and fields can be initiated and changed outside functions.

One large collection in place of bits and pieces means one set of instructions and PforCe™ has tutorials, extensive examples, quick reference, and on-line help.

Everything in source, no royalties, all memory models of Lattice, M'soft. Specify: S0220 & Compiler. List: $475, PCB: $349

GREENLEAF COMMUNICATIONS *Hello World*

Want your application to communicate with other users or remote date bases by asynchronous communications built right into your C programs! Even if you don't need it now, that's a skill to have at the ready!

120 functions *and demo programs in both C and assembler source code* set up separate transmit and receive ring buffers for up to 16 simultaneous channels. Interrupt driven so you can halt an incoming record, display it, file it, let the user edit it, then continue. Goodbye separate communications software.

Supports up to 9600 baud, ASCII or binary, any parity or word length, 8250 UARTs, Xon/Xoff and Xmodem, WideTrack receive. Specify: S0750 & Compiler. List: $185, Us: $139

PRE-C *Pick the Lint from Your Program*

PRICE SLASHED!

Pre-C is like UNIXs lint. It finds problems your compiler won't. Problems that a debugger will have trouble figuring out. Even problems which will cause trouble with other compilers.

Compilers see one module at a time. Modules only meet at link time. Pre-C looks at *all modules at once* and reports conflicts in data type declarations; function call parameters which disagree with functions, machine-dependent expressions which inhibit portability. It spots obsolete usage (even C changes), casts with suspect conversions, variables never used, functions never called, unreachable code. Adheres to UNIX System III compile standard to ensure your portability. Ask for: P0590, List: $295, Ours: $208

DAN BRICKLIN'S DEMO PROGRAM *Storyboard Your Program*

The Legendary One has created Metaphor Two when the rest of us are still on Zero. Dan's first was the original electronic spreadsheet (VisiCalc™). This one is for programmers.

Words don't express program ideas because programs are screens! Dan's Demo creates slide shows. Create a screen — a snapshot of your planned product as it runs. Anything goes: words, borders, box rules, inverse and underlining of monochrome, fore- and background color. Copy this "slide" to an empty screen. Change it a little, to show the next instant of run-time. Do it again. Presto, a whole slide show of your program in action.

All 250 characters and attributes are available from scrollable lists which pop to the screen. All commands are layered in Lotus-style pop-up menus. Frequent choices mapped to function keys as well. 80x25 character mode, not bit-mapped.

Screen areas can be blocked for cut and paste or filled with color or characters, even blink. Slides can overlay on others, can be shuffled, deleted. Slides can proceed at time intervals or branch anywhere in the slide sequence depending on user keyhits.

Invaluable to prototype the program you are about to write, to position the labels, choose the color decor, smoothe out the keystroke interface. Or load the "capture" utility and snapshot the screens of any running program for an instant slide show.

Each copy entitles you to redistribute fifty of the slide projector program that runs demos. Plain manual, no binder keeps price of big product small. "Might . . . become *the* essential tool in . . . user interface prototyping," *Tech Journal.* Ask for: N0100. List: $75 US: $69

BASTOC OPTIMIZES! *Translates BASIC Into C*

For a trifling price, BASTOC™ moves truckloads of BASIC code over to C. It's a translator which takes in Microsoft Extended BASIC and emits pure K&R C for Lattice 3.0. It will optionally convert your program into a single monolithic C function or decompose it into separate functions, one for each GOSUB label.

Version 2's optimization dramatically reduces execution time. Converts to integers those variables in BASIC programs which do not need floating point. Where BASIC uses full assignment statements to increment counters, BASTOC converts to C's compact form. Strings dynamically allocated ridding your application of BASIC's catatonic halts for garbage collection. Creates structure of even convoluted BASIC code. Huge worksaver.

RYAN-McFARLAND FORTRAN

NEW!

A Mighty Fortress Is Their FORTRAN

Picking over features of rival products is not necessary if FORTRAN is your need, still the citadel of scientific and engineering work. Ryan-McFarland has left the competition battering at the gates.

RM/FORTRAN™ is a complete implementation of FORTRAN-77 (ANSI X3.9-1978), the only PC FORTRAN certified by the General Services Administration at the highest test level. The reason: it's a big mainframe compiler moved to PCs, with the bonus that mainframe and mini applications can wander between environments.

Now, on your PC, you can develop large applications, with programs up to 640k (bigger using overlays), arrays over 64k, and using a long list of VS, VAX and FORTRAN-66 extensions you may have grown fond of — long symbolic names, "include", IRT bit functions — because R-M has left out nothing.

But what really sets RM/FORTRAN apart is optimization. The compiler reduces the number of instructions to the minimum which will actually execute, and even takes advantage of each processor's features to deliver lightning-fast object code. It runs 30%-40% faster than Microsoft 3.2, and could make your mainframe not worth the trouble.

Comes with an interactive symbolic debugger like that accompanying IBM VS FORTRAN, Plink86 subset, has a cross reference compile option, supports assembler and C subroutine calls, IEEE floating point, 8087 and 80287 chips.

"Compiler's documentation, ease of use, speed of execution, and debugger facilities place it first for recommendation" said the *Tech Journal* (10/85).

R-M has been writing FORTRAN compilers for IBM, DEC, etc. for 20 years. There is no greater expert.

I0300	$595	**Call**

RUN/C PRO

C Interpreter Links Binary Libraries

Run/C comes in an apprentice and pro version. The professional model dynamically loads and unloads multiple binary function libraries like C-Food Smorgasbord™ and Halo Graphics™ — potentially any library compiled with Lattice's large model. Inside this interpreter your C program can reach for functions in the best of commercial libraries.

This C interpreter behaves like PC BASIC meets WordStar® . Use fullscreen editing to create a program. RUN it. If it stumbles, LIST it, EDIT it, RUN it again, fix it again. Use familiar commands like LOAD, MERGE, SAVE, FILES, even TRON and TRACE.

Ideal for program development. Put up code at high speed, try out things devil-may care, let RUN/C find your malaprops. Blast away until tight little code segments are undyingly faithful.

Lots more features: system interrupts, a shell command to invoke any operating system command without leaving Run/C, debugging aids ingeniously installed as a Run/C function. Call for debugging conditionally from within your program, a specific function or a menu of aids including immediate mode, single-step tracing, changing of variable values.

Manual shows how to develop the interface to a commercial library, using the Lattice compiler (a must!). Link your own function archive the same way. (320k minimum; 512k recommended to fit libraries.)

Ask for: S0950 List: $250 PCB: $185

PLINK86 PLUS

Cached Overlays Maximize Memory Use

Long the overlord of overlay linkers, Plink86 shoehorns large programs into small machines by swapping program segments in from disk to save memory. A 512k program could run in a 128k machine, for example. But Plink86 Plus is smarter still: if it finds itself in a larger machine, it moves program overlays into leftover memory. Overlays now swap at memory speed not disk speed. Can automatically restore a displaced overlay to which a subsequently called overlay must now return, and assign library modules to the root segment or overlay areas. Plink86-Plus: List: $495. Us: $359.

LATTICE C COMPILER

Major Upgrades to the Best Selling C Compiler

Lattice now embraces key UNIX™ enhancements which have entered the language since K&R: void functions returning no value, enumerated data types to assign stepped values to variables, data passing between structures by assignment.

The greatly expanded libraries (325 functions!) enable the file sharing and record locking provisions of DOS 3.1, provide a full complement of transcendentals, and a host of utilities to mimic the UNIX and XENIX™ environments.

Lattice 3.0 defaults to the ANSI proposed standard when you need strict adherence, but command line options restore leniency. And it adopts ANSI checking of external function arguments by data type to kill bug swarms when modules join up at link time.

Lattice now delivers smaller .EXE files, boasts very fast link times and a more efficient aliasing algorithm. New options generate code to use 80186 and 80286 features; 8087 of course sensed and utilized. Lattice has enjoyed pre-eminence so long that developers have created far more snap-on tools for Lattice C than any other compiler. William Hunt's *PC Tech Journal* review of 12 compilers awarded Lattice the only "very good" rating for add-on library availability.

FOREIGN POLICY

We ship anywhere. Phone or Telex your order. Credit cards: We need card number, expiry date, name and address of card. Or wire funds to PC BRAND, c/o Chemical Bank, 126 East 86th St., NY NY 10028, Account No: 034-016058. **We'll ship immediately** and confirm by Telex if you provide number.

BETTER BASIC

Convert Microsoft BASIC. Structured, Compilable.

Combines the familiarity of BASIC with the best features of C, Pascal, and Modula 2, yet BetterBASIC is 100% compatible with Microsoft's GW™ BASIC and IBM BASICA including graphics, sound, and assembly language calls. So load your old programs and RUN. SAVE and they are converted automatically to BetterBASIC!

It's big: Needs 192k; programs can go to the PC's full 640k. It's comfy: Behaves like M'soft BASIC at the interactive level, with a full-screen editor, direct statement execution, and always poised to RUN. It's fast: Each statement checked and compiled once, not every time encountered. Sieve runs *6 times faster* than with M'soft.

C-like structures house file records so goodbye to FIELD, MKI$, CVD, LSET, etc. Named "procedures" replace GOSUBs to linenumbers. Lots more features: built-in linker for compiled modules; trace; debugging breakpoints; cross-reference command; 32k strings; DOS and BIOS calls and interrupts; recursion. Run-time module stores object code for redistribution.

S1205 Btrieve Interface	$ 99	$ 85

GSS GRAPHICS SYSTEM

ANSI CGI STANDARD!

PRICES CUT!

Leave the Device Driving to GSS

GSS™ has reconfigured two components of its comprehensive graphics tools to conform with the ANSI Computer Graphics Interface (CGI) standard.

At the heart of the system is the Development Toolkit which contains all language interfaces and device drivers for keyboards, mice, joysticks, tablets, printers, plotters, cameras, and more. Drivers house management of vector graphics (plotters) and bitmaps used by raster input devices (scanners) to insulate the application program from concern for device idiosyncracy. No one else has implemented CGI that way. It means your programming remains generic; just switch drivers and the same program will drive a different device.

GSS Kernel™ conforms to level 2b of ANSI's Graphical Kernel System (GKS) and contains all its needed drivers and language bindings. Kernel has macro level tools to draw and color an object, store the sequential instructions, and recreate the object on its own, as well as segment it, transform it, etc. So powerful, a single command may represent several score lower level statements.

Plotting has the equivalent GKS tools for graph and chart generation and their captioning: hand it apples and oranges, say "pie", and it bakes the numbers into a digestible display for screen or plotters.

Kernel and Plotting have tools to convert images they create to ANSI Computer Graphics Metafiles (CGMs), a tokenized standard for storing every form of graphic image as data. The Metafile Interpreter reads the contents of a CGM and interprets it with full CGI capability for recreation on various devices.

Quality software? IBM thinks so. They sell the GSS series under their own label.

Unit royalties and annual fees have been instituted for redistribution. Needs 256k.

GS040 Metafile Interpreter	$295	$235

BTRIEVE

ASK ABOUT XTRIEVE & RTRIEVE

Queen B-tree File Manager Abdicates Royalties

There's no longer a tithe to incorporate Btrieve™ in applications, a welcome proclamation if royalties would ruin your profit margins. Btrieve takes complete charge of all file creation, indexing, reading, writing, insertion, deletion, space recapture, forward and backward searching. It builds function call "commands" right into the language you use: interfaces to C, Pascal, BASIC, and COBOL, with sample programs in all four, come with each copy.

Btrieve has mainframe specifications! Its balanced-tree indexing scheme finds any key in a million in four or less accesses. Files may have up to 24 indexes; fixed record length to 4090 characters; indexes up to 255 characters; files of 4 billion bytes. Can even extend a file across two drives — even two hard disks!

Version 4.x speeds DOS interaction for large multiply-keyed files; enables variable length records of virtually any length; verifies accuracy (optionally) with read after write, useful in gritty environments; offers password and data encryption.

There's also Xtrieve, for Btrieve file inquiry and data manipulation, and Rtrieve for report writing. All three in versions for any network that supports the MS-DOS 3.1 file sharing function.

TERMS AND CONDITIONS OF SALE

Licenses: Each price is for a license to use a product on a single computer and does not constitute its ownership. We will inquire for you about site licenses. Except as otherwise indicated or where "#" follows the Product Code, products may be used to create programs for distribution without royalty payments or additional licenses, provided said programs do not substantially replicate the products themselves.

Compatibility: PC BRAND's standard products are designed to operate with the IBM® PC, XT or AT under PC-DOS and require no more than 128k of RAM unless indicated. Non IBM machines using MS-DOS: contact manufacturer about precise differences so we can advise.

Returns: See box page one. Defective parts will be replaced. Please call for authorization to return a product for refund.

Payment: We honor MasterCard, Visa, American Express (no surcharge), checks in advance, or funds wired to PC Brand, c/o Chemical Bank, 126 East 86 St., New York, Account 034-016058. COD (U.S. only) for cash, money order, certified check (no fee). NY State, add sales tax. Purchase orders accepted from larger corporations and institutions at our discretion if you agree to net 30 days plus 2% a month late penalty thereafter.

Shipping & Handling: U.S.: UPS Surface: 1st product $6, each add'l $3. UPS 2nd Day Air: 1st product $10, each add'l $4.50. UPS Next Day Air or Federal Express 1-2 Day Air: 1st product $18, each add'l $6. FedEx Next Day 10 AM: 1st product $28, each add'l $7. International: Charges vary by destination and carrier. $10 per shipping container for export forms. Air parcel post at your risk beyond collected insurable amount.

CIRCLE NO. 359 ON READERS SERVICE CARD

"RTDs AND THERMOCOUPLES"
Miller, Eric M. Tech Notebook. 4:6 (Jun 1986):47.
Platinum resistance temperature detectors (RTDs) are highly accurate when measuring temperatures within the range of −200 to +600 degrees Celsius. Accuracies to 0.1 degree Celsius are obtainable, and repeatability can be within .01 degree. Thermocouples are suitable for measuring temperatures with wide ranges or for high temperatures of up to +2,300 degrees Celsius. Figures illustrate methods for interfacing each type of temperature measurement to a data acquisition board.

S

"SAFE LANDING FOR HARD DISKS"
Lesser, Murray. 3:12 (Dec 1985):147-157.
When moving a hard disk, it is a good idea to position the hard-disk head over an empty cylinder on the disk. By doing this, data are not lost if the head is jarred into physical contact with a data track. A short assembly language program called LANDER.COM is described that provides a fast and easy way to reposition the hard-disk head. LANDER cannot be used with the PC/AT and may not work correctly with all IBM compatibles. Figures show copies of screen displays produced by the program. *Letter References— 4:4 (Apr 1986):21.*

"SALES TAX AND SOFTWARE: NOTHING IS SIMPLE"
Oppenheimer, Max Stul. Legal Brief. 1:4 (Jan 1984): 196-198.
One of the most important questions being raised in the computer industry concerns the status of software; should it be considered a service or a good? Some states tax software only if it is "transactional" (a program designed to perform specific functions). "Operational" software, programs that control the hardware of the computer, is not taxed. No general decision has been made, and courts deal with the issue on a case-by-case basis.

"SAME LANGUAGE, NEW ARCHITECTURE"
Mirecki, Ted. 3:10 (Oct 1985):48-59.
The IBM Macro Assembler 2.0 and the Microsoft Macro Assembler 3.01 are new versions of long-established products that provide support for the 80186/286 processors and the 8087/287 numeric coprocessors. The Microsoft assembler is considered superior because it supports the 80286 processor in all modes, while the IBM assembler supports the processor in real-address mode only. Microsoft's product supports the full 80287 instruction set, while the IBM assembler supports only the 8087 subset of the 80287. The assembly speed of the two products is essentially identical. Several comparison tables and a benchmark program listing accompany the article, as does a sidebar on 8087 emulation.

"SCIENTIFIC GRAPHICS WITH THE EGA"
Mansfield, Victor. Programming Practices. 3:9 (Sep 1985):163-170.
The high-resolution modes of IBM's Enhanced Graphics Adapter (EGA) are not compatible with older Color Graphics Adapter software. Listings provide procedures and demonstration software that allow users to perform basic scientific graphics using an EGA with a monochrome monitor, including screen dump to Epson-family printers. Performance is enhanced by precalculating row addresses to avoid the need for repetitive multiplications. *Letter References—4:4 (Apr 1986):27-28.*

SCOUT—Computer Insights, Inc.
"File-search Help for PC-DOS." 3:4 (Apr 1985):138-145.

"SCREEN COMPOSURE"
McNamee, Thomas. 3:4 (Apr 1985):149-159.
Display managers are utilities that aid the user in screen design. Two such utilities are the IBM Applications Display Management System (ADMS) and the Digital Research Display Manager 1.0. ADMS can be used with any language that can make machine calls, although the C language is not specifically supported (as it is in the Display Manager). While the Display Manager is a powerful tool, it limits the user to Digital Research products. ADMS is more flexible and easier to use. Tables compare features and list display manager function library calls and control block and variable table structure.

SCREEN—Basic Business Software
"Program Editors." 1:2 (Sep/Oct 1983):110-123.

"SCREEN OF MANY COLORS, A"
Awalt, Don. 2:4 (Oct 1984):145-146.
Using DOS and the PC's ROM BIOS interrupt 10H routines, users cannot display text characters in medium-resolution graphics mode and retain the background color. Assembly language routines are presented that allow users to display ASCII characters in any medium-resolution color without destroying the original color of the screen's background.

"SCREENSPEAK"
Hansen, Augie. 2:5 (Nov 1984):151-170.
Smartcom II (Hayes Microcomputer Products, Inc.) is a communications software package that comes with the Hayes 1200B internal modem for the IBM PC or is available by itself. In addition to the usual communications features, Smartcom II uses the XMODEM protocol and

supports several terminal emulations. File transfer, data capture, terminal emulation, remote access, and construction of macros are described. The documentation is not always easy to use. Screen photos show some menus encountered in using the product. A sidebar with figures describes the XMODEM file transfer protocol.

SDI-ESC—Sigma Designs, Inc.
"Multifunction Boards for the PC." 1:4 (Jan 1984):66-73.

"SEARCHING WITH SOUNDEX"
Madron, Thomas W. 3:4 (Apr 1985):163-168.
The Soundex Algorithm is a method of coding words that sound alike or are spelled similarly so that they can be easily retrieved. The algorithm is briefly described. A spelling checker or any data retrieval system that uses proper names or alphabetic characters as keys can benefit from the application of the algorithm. A BASIC program demonstrates how the algorithm works. *Letter References—3:7 (Jul 1985):18-19.*

SED—DBASE II—Ashton-Tate
"dBASE II with Ambition." 1:9 (Jun 1984):181-191.

"SELF RELIANT, A DATA MANAGER FOR THE"
Roberts, James. 4:10 (Oct 1986):146-165.
TAS-Plus, from Business Tools, Inc. is a data manager that serves as the engine for a modifiable accounting system. The core of the system is written in assembly language; many of the utilities are written in TAS-Plus's internal procedural language. The developer's version includes the source code for these utilities. TAS-Plus is a partial implementation of the relational data model. Benchmark results are listed in a table, and a sidebar provides an overview of the package. Figures show the two forms of TAS-Plus's internal procedural language. Photos show TAS-Plus's main menu and internal menu-driven editor.

"SELF-INSTALLING SOFTWARE"
Mirecki, Ted. Tech Notebook. 3:11 (Nov 1985):55.
The installation of Lotus 1-2-3 from Ashton-Tate can be made an automatic procedure using the assembly language program and batch file that accompany this article. The user no longer needs to specify whether the system is using a monochrome or a color/graphics display. The program determines the video mode, and the batch file installs the appropriate 1-2-3 video driver. This set-up can be modified easily to allow programs other than 1-2-3 to run on different hardware without reconfiguration.

SERIAL/PARALLEL ADAPTER FOR THE AT—IBM
"Analyzing the Advanced Technology." 2:6 (Dec 1984): 40-56.

SERIES 9000 TAPE SUBSYSTEM—Cipher Data Products
"Nine-track Tape Systems." 4:8 (Aug 1986):94-108.

SERIES MTM 80-7000—Emerald Systems Corp.
"Nine-track Tape Systems." 4:8 (Aug 1986):94-108.

"SET IMPLEMENTATION"
Swan, Tom. 4:2 (Feb 1986):108-130.
The use of sets in assembly language programs helps to simplify many applications. The construction of sets, how they are represented in memory, and how to include them in programs are described. An assembly language library of routines dealing with set operations is presented. It can be used in many cases to make users' programs more readable and programming much easier. Figures show sample test code, sample sets, the representation of a set in memory, and sample operations performed on sets. Listings accompany the article.

"SETTING THE AT'S CLOCK"
Fastie, Will. Tech Notebook. 2:6 (Dec 1984):57.
A listing of an assembly language program to set the date and time on the PC/AT's realtime clock is presented. IBM's initialization program will perform the same function, but not as conveniently.

"SEVEN UTILITIES FOR dBASE II"
Lima, Anthony K. 1:9 (Jun 1984):80-112.
Seven utility programs that expand the capabilities of Ashton-Tate's dBASE II are evaluated: dBPlus (Software Banc); dBRx (Gryphon Microproducts); dB/RA (Gryphon Microproducts); dSECUR (Microclear); dUTIL (Fox & Geller); dCROSS (Radix 2 Software); and E/dBASE II (Micro Business Systems). A table compares the features of the utilities. Figures show the dUTIL tree structure and a sample piece of code from dCROSS. A sidebar features ABSTAT (Anderson-Bell), a statistical software package for dBASE II. A table in the sidebar lists the statistical functions of ABSTAT. Listed programs used to test the seven utilities are given.

SHARENET—Novell
"Two Views of the LANscape." 1:4 (Jan 1984):54-65.

"SHARING FILES"
Colsber, William L. 2:5 (Nov 1984):99-115.
EtherNet is a local area network (LAN) available from the 3Com Corp. for use with IBM PCs. EtherNet provides private, public, and shared file types to remove the possibility of overwriting files that may occur in a LAN environment. The semaphore facilities of EtherNet are LOCK, UNLOCK, and WAIT/LOCK, the software controllers of the file handling system. All present software is compatible to this system. Program listings in BASIC and assembly language provide a semaphore facility and illustrate its use. A sidebar briefly covers the approach that Novell is taking with its NetWare series to reduce file contention. *Letter References—3:2 (Feb 1985):23-25.*

SHARPE, WILLIAM F.
"Inside 1-2-3 Worksheet Files." 2:4 (Oct 1984):155-172.

"SHELL GAME, THE"
Glinert-Cole, Susan. 1:3 (Nov/Dec 1983):30-41.
AUTODEX (AutoDex), 1DIR (Bourbaki, Inc.), and FileCommand (IBM) are three menu-driven shell programs for use with DOS. 1DIR and AUTODEX perform well, but AUTODEX's error recovery abilities are limited. FileCommand has fewer features and does not live up to its documentation. Figures show sample screen displays.

SHERMAN, DOUG and PETER LAKNER
"dBASE II Programming Techniques." 1:9 (Jun 1984): 72-78.

SHOSTAK, ROBERT E. and RICHARD L. SCHWARTZ
"AI Challenge, The." Expert Consultant. 4:9 (Sep 1986):195-197.

"SHRINK-WRAPPED ENFORCEMENT"
Oppenheimer, Max Stul. Legal Brief. 3:9 (Sep 1985): 177-179.
The Louisiana Software License Enforcement Act (SLEA) specifies that a software purchaser is deemed to have accepted and agreed to the terms of a shrink-wrapped license. This shrink-wrapped license law may be unfair to purchasers, who may not read or understand the license agreements. In California, a bill has been introduced that will require purchases to be covered by minimum warranties and allow the buyer product return and refund privileges. While the Louisiana bill is thought to be too restrictive, the California proposal may be too protective of the consumer. Enforced protection that strikes a balance between the two approaches is advocated.

"SHRINK-WRAPPED MAGAZINES"
Oppenheimer, Max Stul. Legal Brief. 3:2 (Feb 1985): 169-170.
Wrapping software in plastic shrink-wrap provides the publisher with the opportunity to say that the user read the licensing or other agreement printed on the package before opening it. Publishing source code in magazines may lead to the shrink-wrapping of the magazines for the same protection, which might provide publishers with a redress for programs purchased with a magazine that are not intended as an object to be sold later. Section 117 of the Copyright Act permits copying source code only if it is essential to the operation of the software.

"SIGNIFICANT FIGURES I"
Gray, Robert. 2:4 (Oct 1984):54-62.
An assembly language program is presented to add and subtract floating-point numbers (listing included). What follows is a thorough discussion of the algorithms. A figure shows the algorithms in machine-independent pseudo-code. *Letter References—3:1 (Jan 1985): 14-25; 3:2 (Feb 1985):14; 3:6 (Jun 1985):16-18.*

"SIGNIFICANT FIGURES II"
Gray, Robert. 2:5 (Nov 1984):173-186.
Algorithms for floating-point multiplication and division are illustrated with figures and listings. Listed assembly language multiplication and division routines operate on 32-bit floating point numbers with a 24-bit mantissa. *Letter References—3:6 (Jun 1985): p. 16-18.*

"SIGNIFICANT FIGURES III"
Gray, Robert. 2:6 (Dec 1984):187-206.
Floating-point conversions for I/O are described. Eight assembly language routines (listings included) convert floating-point numbers from ASCII decimal to binary and visa versa. Figures show the decimal number 10.75 in floating-point notation and the binary number 10.75 in integer form. *Letter References—3:4 (Apr 1985):16-19.*

"SIM8051"
Fastie, Will. Product of the Month. 3:4 (Apr 1985):25.
The Sim8051 from Cybernetic Micro Systems is an interactive debugger that allows the PC to run Intel hex format files produced by the CYS-8501 cross assembler. The program divides the screen display into several windows that show past, current, and future code, a flow chart derived from markers in the listing file, the currently selected memory segment, and other information about the program being run. The Sim8051 performs well without additional hardware and gives the 8051/52 software developer the means to test any 8051/52-based product on a PC. A screen display shows Sim8051's features.

"SIMPLE CIRCUITS, BETTER CIRCUITS"
Murray, William H. and Chris H. Pappas. 1:5 (Feb 1984):118-156.
A program that implements the Quine-McCluskey

method for the reduction of Boolean algebraic expressions used in the design of digital circuits is shown. This method is suitable for computer-aided design because it is a tabular technique that is exactly specified. Figures and tables show logical analysis using truth, cube, prime implicant tables, and miniterms. Program listings in Pascal and assembly language routines provide realtime analysis for testing circuits.

SIMTERM—Jim Holtman
"High-tech Mimicry." 2:3 (Sep 1984):46-55.

SINGER, JOHN
"Keystroke Automation." 4:1 (Jan 1986):113-122.

"SINGLE-STEPPING AND TRACING"
Korkut, D. Z. 1:8 (May 1984):130-144.
TRACE is a simple BASIC program that reads an ASCII version of a BASIC program and then produces a new version of the program with trace statements inserted between lines. A listing provides the TRACE program along with recommended debugging procedures.

"SIX NEW SHAPES OF BASIC"
Mirecki, Ted. 4:6 (Jun 1986):52-75.
Seven BASIC interpreters are reviewed: BASICA, bundled with DOS, (IBM); BetterBASIC (Summit Software Technology); Business Basic Extended (BASIS); MEGABASIC (American Planning); Professional BASIC (Morgan Computing); True BASIC (True BASIC); and WATCOM BASIC (WATCOM Products). Tables compare features and list benchmark times. A sidebar concerning the ANSI standard for BASIC accompanies the article. Listings show the same source code written in different dialects of the language. *Letter References—4:9 (Sep 1986):17-22.*

SIXPAKPLUS—AST Research, Inc.
"Multifunction Boards for the PC." 1:4 (Jan 1984):66-73.

"SIXTEEN-COLOR GRAPHICS"
Chandler, Richard, Michael Davis, and Gary Faulkner. Programming Practices. 4:8 (Aug 1986):159-171.
Clever programming provides 16-color, 80-by-100 graphics on the IBM Color Graphics Adapter (CGA). A text mode with 2-by-8 pixel characters is used in the process, which involves splitting each character into two blocks for higher resolution. The demonstration program, written in Turbo Pascal, plots a fractal curve. Figures show a sample screen produced by the program and the process by which a 2-by-8 character is split into two graphics blocks. The program listing accompanies the article.

"SLEEK BACKUP"
Duntemann, Jeff. Product of the Month. 3:10 (Oct 1985):31.
Fastback by Fifth Generation Systems uses sophisticated multitasking techniques to provide extremely rapid and space-efficient hard-disk backups for the PC, PC/XT, and PC/AT. Tests show that Fastback can back up 7.5MB of files to a diskette in 6 minutes on an XT. Backup of 9.4MB of files from an AT to high-density diskettes took 4 minutes. Fastback copies file by file to a proprietary diskette format that saves 10 to 15 percent more disk space than the standard DOS format. The backup program is copy protected; the restore program is not. *Letter References—4:1 (Jan 1986):20-22.*

"SLIMMER PASCAL, A"
Armbrust, Steven and Ted Forgeron. Programming Practices. 3:10 (Oct 1985):173-183.
Seven steps are given that will reduce the size and increase the speed of Microsoft Pascal programs. The basic ideas are to remove debugging features after a program is made fault-free and to replace big runtime routines with customized assembly language routines. When applied to a sample program, the seven steps caused a 70 percent size reduction coupled with a considerable increase in execution speed. Listings show the program before and after size optimization. A table shows the the size decrease brought about by each step. *Letter References—4:4 (Apr 1986):26.*

"SLOTLESS CLOCK, A"
Duntemann, Jeff. Product of the Month. 4:9 (Sep 1986):29.
Clock from Microsync, Inc. is a small circuit board containing only a clock chip and a battery. It plugs into the PC/XT's 8088 socket; the 8088, in turn, plugs into a socket on dClock. Thus, users can complete their XT system with a battery-operated clock/calendar without having to tie up an expansion slot with an entire (and perhaps unnecessary) multifunction board.

SMITH, BOB and THOMAS PUCKETT
"Life in the Fast Lane." 1:7 (Apr 1984):62-74.
"Time on Your Hands." 1:8 (May 1984):146-161.

"SMOOTH CURVES"
Covington, Michael A. 4:8 (Aug 1986):110-120.
Humans find it easy to link a string of dots together in a smooth curve. However, mathematically this is a more difficult process. The most fundamental method can cause unexpected kinks; the spline curve fitting model is more dependable. The subroutine SPLINE illustrates the principle of the procedure. A listing in Turbo Pascal, which accompanies the article, shows a simple use of the subroutine to draw curves between selected points. A figure shows polynomial interpolation between 10 points.

"SMOOTH SAILING"
Brown, Roland M. III. 1:9 (Jun 1984):200-207.
FastBASE from Fourcolor Data Systems, Inc. is a program development tool for use with dBASE II. It is menu driven and creates dBASE II command files for file management, merging multiple files, and creating form letters, reports, and screens. Figures are included to show the fastBASE file maintenance generator and sample operations.

"SNA STRATEGIES"
Krumrey, Art. 3:7 (Jul 1985):40-53.
System Network Architecture (SNA) is made up of clusters of terminals connected by coaxial cables to a controller; the physical network is connected by data lines called logical units (LUs), which in turn are connected by sessions independent of the physical nature of the connection. The seven layers of SNA correspond to the ISO Reference Model for Open System Connection. Three groups of LU types and initiating an LU session are discussed. Four methods for hooking up a PC to an SNA network are included. Figures show various SNA configurations and tables list prices for connections to SNA. *Letter References—3:10 (Oct 1985):20-23; 3:12 (Dec 1985):15.*

"SNOBOL4"
Larson, Richard. 3:1 (Jan 1985):32-43.
Berstis International's Minnesota SNOBOL4 and Catspaw's SNOBOL4+ for the PC are reviewed. SNOBOL4 is a language used for nonnumeric computation, list processing, and string manipulation. It matches patterns easily, redefines the meaning of operators, and is able to manipulate tables directly rather than define them as array variables. Tables summarize SNOBOL4 execution times on Eratosthenes' Sieve and a syntactic recognizer benchmark. SNOBOL4+ is slightly faster, but both compilers are recommended. A sidebar analyzes the utility of SNOBOL4 in humanities and linguistics research. *Letter References—3:8 (Aug 1985):24.*

SNOBOL4+—Catspaw, Inc.
"SNOBOL4." 3:1 (Jan 1985):32-43.

SOFTSTRIP SYSTEM READER—Cauzin Systems
"Softstrip System, The." Product of the Month. 4:5 (May 1986):29.

"SOFTSTRIP SYSTEM, THE"
Duntemann, Jeff. Product of the Month. 4:5 (May 1986):29.
Because paper is the only universal channel for moving information from one set of hands to another, any plans for network penetration must include an interface to paper. Cauzin Systems has produced a data encoding/paper reading system that could make paper a viable channel in the corporate data communications network. A Softstrip is a variable-length pattern that can encode as

much as 30KB of data on an 8½-by-11-inch sheet of paper. The reader is placed over the strip, and a scanning carriage within the reader traverses the strip and reads information under the control of a resident DOS utility.

"SOFTWARE GOODS OR SERVICES"
Oppenheimer, Max Stul. Legal Brief. 4:5 (May 1986): 207-208.
One of the fundamental questions of computer law, whether software constitutes goods or services, is discussed. The issue is significant because the Uniform Commercial Code (UCC) creates rights and rules of conduct applicable only to goods, not to services. In the case of RRX Industries, Inc. v. Lab-Con, Inc., the user entered into an agreement to license software and to acquire support. The appeals court concluded that the transaction between the two companies involved goods and that, as a result, the UCC of California applied. This case could set a precedent in this area of computer law.

SOFTWARE PROBE—Atron
"Entomological Explorations." 3:1 (Jan 1985):88-105.
"Untangling Programs." 3:4 (Apr 1985):81-93.

"SOFTWARE PROTECTION"
Fastie, Will. Directions. 1:6 (Mar 1984):11-16.
Three major issues involving software copy protection are examined. First, vendors want to be paid for each copy of the software that they sell. Second, purchasers desire at least one backup copy to protect against the possibility of disk wear and loss of the program. Third, purchasers also want flexibility and ease of use. Most vendors have adopted some form of copy protection to protect their software from being illegally copied.

SOFTWARE SOURCE PROBE—Atron
"Entomological Explorations." 3:1 (Jan 1985):88-105.

"SOFTWARE SPRITES"
Abrash, Michael and Dan Illowsky. 4:8 (Aug 1986): 125-157.
The article discusses ways to make software emulation of the hardware animation capabilities of game machines a realizable goal for the PC. A graphics sprite and a sprite engine are defined, and the design and implementation of a software sprite driver is traced. The Enhanced Graphics Adapter's (EGA) vertical interrupt for regeneration of prioritized sprites during vertical retrace is presented. Emulation of the vertical interrupt is used to implement the engine on the Color Graphics Adapter (CGA). A sidebar discusses the EGA's vertical interrupt status bit. Figures show an electron beam scan, AND/OR driver operation. Listings and sample programs are provided for both the EGA and the CGA version of the driver.

"SOLVING CUBIC EQUATIONS"
Lether, Frank G. Tech Notebook. 3:5 (May 1985):42.
A BASIC program solves general cubic polynomial equations. Using Cardan's formulas, the program calculates the roots of a cubic equation to five significant digits.

"SOME TECHNICAL ASPECTS OF dBASE II"
Cowart, Robert. 1:9 (Jun 1984):56-63.
The author explains various technical aspects of dBASE II and gives suggestions for making better use of the product. Methods are described for overcoming the limitations of 32 fields per file, 64 active memory variables, and 64 pending GET commands. Three dBASE II features that aid in debugging are noted. Tables list dBASE II specifications and functions and benchmark test results.

"SONY VERSUS UNIVERSAL STUDIOS: SO WHAT"
Oppenheimer, Max Stul. Legal Brief. 1:8 (May 1984): 197-201.
The Supreme Court's decision in the Sony v. Universal Studios case regarding copyright infringement may have important implications for the computer industry. Universal Studios and Walt Disney Products sued Sony, claiming that Sony was liable for "contributory infringement" when some Betamax owners taped the plaintiffs' copyrighted movies. The Court found in favor of Sony.

"SPINNING YOUR OWN VDISK"
Nisley, Edward. 3:3 (Mar 1985):100-109.
Explanations and modifications make the RAM disk program VDISK.ASM (listed in the DOS 2.0 manual) easier to use. A RAM disk, which emulates a diskette in RAM, is much faster than a physical diskette. Tables and figures show RAM disk space usage and list a configuration batch file. A listing shows 23 changes that make DOS's VDISK.ASM more flexible. Another listing provides RAM disk directory information. See also 3:7 (Jul 1985): 149-156. *Letter References—3:7 (Jul 1985):15.*

SPRAYCAR, RUDY S.
"In the ISPF Tradition." 4:3 (Mar 1986):113-138.

"SQL ON THE IBM PC"
Holsapple, Clyde W. 1:3 (Nov/Dec 1983):72-77.
Structured Query Language/Data System (SQL/DS) is a relational database management tool developed by IBM for use with mainframe data managers. Nonprocedural commands retrieve and process data from tables. Microcomputer SQL as implemented in the data manager KnowledgeMan is discussed and differences are noted between it and mainframe SQL/DS. Figures show how data are organized and queried in the SQL/DS system.

SR-LIB—Software Research
"Checking Out the Librarians." 2:4 (Oct 1984):80-90.

"STALKING THE SOFTWARE BUG"
Hoffmann, Thomas V. 1:8 (May 1984):100-108.
The Program Execution Analyzer (PXA) from Micro Integrations Engineering, Inc. is a single-board logic analyzer. It captures data from the bus with software that allows the user to control the collection and subsequent display and analysis of the data. The data captured by the PXA can be confusing because the view from the bus does not quite match the view from the execution path. Partial listings illustrate these limitations.

STAM, ROBERT B.
"Grabbing Parameters." Tech Notebook. 3:2 (Feb 1985):46.
"Environmental Excavations." 3:2 (Feb 1985):90-98.

"Program Editors." 1:2 (Sep/Oct 1983):110-123.

"STATE OF C, THE"
Hunt, William J. 4:1 (Jan 1986):82-108.
Twelve C compilers are reviewed: Aztec C86 3.2d (Manx Software Systems); C Programming System 2.14 (Mark Williams); c-systems C Software Development Package 2.08a (c-systems); Datalight C Compiler 1.06 (Datalight); DeSmet C Development Package 2.41 (C Ware); Digital Research C 1.1 (Digital Research); Eco-C88 2.7 (Ecosoft); Lattice iAPX 86 C 3.06 (Lattice); Microsoft C Compiler 3.0 (Microsoft); Optimizing C86 2.3a (Computer Innovations); Toolworks C for MS-DOS 3.2 (The Software Toolworks); Wizard C Compiler 2.1b (Wizard Systems Software). Tables compare specifications, features, documentation, and benchmarks. *Letter References—4:3 (Mar 1986):15; 4:6 (Jun 1986):17-18; 4:7 (Jul 1986):21.*

"STATE OF C INTERPRETERS, THE"
Franz, Marty. 4:5 (May 1986):153-163.
Four C interpreters are reviewed: C-terp 2.131 (Gimpel Software); Instant-C 1.61 (Rational Systems, Inc.); Introducing C 1.0H (Computer Innovations); and Run/C Professional 1.0P (Lifeboat Associates). Introducing C can be considered no more than an educational tool. Instant C lies at the opposite extreme—it is a powerful, fast, and professional interpreter. Tables compare features and documentation of the four interpreters. Additional tables list restrictions of the C language, editing and debugging features, and performance benchmark resuts. *Letter References—4:5 (May 1986):22.*

"STATISTICAL CORRELATION"
Madron, Thomas W. 4:4 (Apr 1986):126-152.
The uses of multivariate statistics on microcomputers are described. The concepts of a relationship and the measure of association between numbers are introduced. FORTRAN is considered the best language for handling large quantities of numbers. Figures describe positive and negative correlation coefficients; the formula for correlation and its simplifications; means, standard deviations, and correlation matrices. A glossary of statistical terms is provided in an accompanying sidebar. Extensive FORTRAN listings provide a method of performing Pearson product moment correlation on a data sample. *Letter References—4:8 (Aug 1986):15-21.*

"Modular Implementations." 2:6 (Dec 1984):154-182.

"STORAGE EXPANSION FOR THE AT"
Hoffmann, Thomas V. 4:2 (Feb 1986):147-150.
IBM has introduced a 30MB disk as standard equipment in the model 239 PC/AT. The disk and new ROM BIOS are available in an upgrade kit for the original AT. The article describes the installation procedure, disk types that are supported by the AT BIOS, and changes in the ROM supplied with all new ATs. Tables show the disk types supported by the AT BIOS as well as benchmark results for sequential and random read tests on the 20MB hard disk, 30MB hard disk, and PC/XT hard disk.

"STORAGE ON A CARD"
Hoffmann, Thomas V. 4:2 (Feb 1986):139-144.
The Hardcard (Plus Development Corp.) integrates a 10MB 3.5-inch Winchester disk and controller on a single expansion card. Installation involves just one screw that secures the card to the rear panel—no cables or connectors are needed. Tables show technical specifications, space allocation under DOS, and benchmark results for sequential and random reads of the disk. The Hardcard is marginally faster than the hard disk of the PC/XT for sequential transfers but considerably faster for longer random seeks. The Hardcard's simplicity of design implies a longer mean time between failures.

STORAGEPLUS—Data Storage Solutions (DDS)
"Ten By Ten." 2:5 (Nov 1984):52-63.

STREAMING TAPE BACKUP—Sigma Designs
"Moving up to Tape." 3:11 (Nov 1985):62-83.

"STRINGS"
Morgan, Christopher L. 2:3 (Sep 1984):111-126.
Nine assembly language string routines that are useful in text editing and database management are listed and explained. Functions are provided for individual strings: case conversion, search, insertion, and alphabetizing. Alphabetizing, comparision, moving, and sorting are implemented for strings in the program listings. *Letter References—2:6 (Dec 1984):26.*

"STRUCTURED BASIC PROGRAMS"
Naddor, Eliezer. 2:1 (Jul 1984):161-182.
User Command Language (UCL) is a user interface specification that encourages good program design and structured programming in BASIC. UCL, first presented in the Nov/Dec 1983 *PC Tech Journal*, is based on a simple command language. This language can be cleanly implemented in BASIC using the block structured programming style. Tables describe the syntax of UCL. A block-structured BASIC program and its blocks are listed and explained. *Letter References—2:6 (Dec 1984):21-26.*

"STRUCTURED DEBUGGING"
Duntemann, Jeff. Product of the Month. 4:1 (Jan 1986):29.
Data Base Decisions' Periscope I and Periscope II are high-end debuggers that provide a hardware solution to the problem of debugging. Periscope's most noteworthy feature is its write-protected memory board called the Submarine, which contains 8KB of static RAM, a push-button switch on the board bracket, and an RCA jack for a remote switch on a cable. Periscope II does not include the protected RAM board but does include a breakout switch that does not require an expansion slot. The Periscope software builds on the debugging standard of IBM DEBUG. *Letter References—4:7 (Jul 1986):21-24.*

"SUCCESSFULLY SEEKING INTERRUPTS"
Duntemann, Jeff. Product of the Month. 3:12 (Dec 1985):29.
IBM's PCWatch allows interrupts to be treated as individual machine events that can be observed, trapped for, and single-stepped. It is not a debugger but is intended for use during the debugging process. An interface to resident debuggers allows PCWatch to drop into the debugger either before a selected interrupt begins executing or after it has executed but before it returns. The program can be useful both when developing software and when customizing commercial software programs.

"SWITCHING MODES"
Quedens, Guy and Gary Webb. Programming Practices. 3:8 (Aug 1985):163-173.
The 80286's on-chip memory management is discussed, and listings illustrate two ways to switch between the standard real mode and virtual protected mode. The functions of the 8042 eight-bit microcomputer-chip and the MC146818 RAM chip in this activity are described. A table lists the registers and contents for processor RESET, and a figure shows how CMOS RAM is accessed. *Letter References—3:11 (Nov 1985):32.*

SYMD—D + V Systems
"Entomological Explorations." 3:1 (Jan 1985):88-105.

"SYNTHESIZES TEXT AND DATA, A DATA MANAGER THAT"
Bowman, Joseph V. 4:7 (Jul 1986):142-164.
Metafile from Metafile Information Systems, Inc. is a data manager that integrates text and data management. It is not a relational database system. Screens are generated in the text area and can consist of multiple pages. Metafile provides four methods of producing report output. Queries are built by qualifying records in the currently active data file. Metafile is well suited to applications that use files independently. Benchmark results are listed in a table, and a sidebar provides an overview of the package. Photos illustrate Metafile's data entry and validation and report generation capabilities.

"SYSTEM/34 FOR THE MICROCOMPUTER"
Sanford, Robert. 3:5 (May 1985):193-197.
BABY/34 from California Software Products transports the System/34 minicomputer operating environment to the PC. It is designed to match the System/34 in the use of the RPG II compiler, the Operation Control Language, SORT, the SEU editor, the Screen Format Generator, and the Data File Utility. Good documentation, excellent technical support, graceful error handling, and a robust, easy-to-use system make this an attractive product for those who need a transition from the System/34 to the PC. *Letter References—3:8 (Aug 1985):21.*

"SYSTEMATIC PROGRAMMING IN EDISON"
Hansen, Per Brinch. 1:2 (Sep/Oct 1983):84-88.
The Edison-PC System is an experimental development environment that includes the Edison compiler, an 8088 assembler, an Edison operating system, an editor, and a text formatter. Edison is conceptually similar to Pascal. The Edison-PC System is written in Edison, with the exception of a minimal kernel interpreter that interprets Edison p-code; thus, the system is very portable.

T

"TABLE LOOK-UP WITH THE PC"
Brickner, Ralph G. 1:7 (Apr 1984):196-207.
An analysis determines the best algorithm for table look-up in BASIC. The three BASIC algorithms timed are

sequential look-up, modified sequential look-up, and binary search. An assembly language version of binary search is also timed. Binary search proves 100 times faster than sequential search for large tables. Surprisingly, the assembly language version of binary search is not much faster than the BASIC version. Listings show all four programs, and tables show benchmark times.

"TAKE III"
Christian, Chris. 3:1 (Jan 1985):64-84.
dBASE III from Ashton-Tate is not a new release of dBASE II but an entirely new program designed for the address space and DOS functions found in the 16-bit environment. dBASE III has many new functions, improved capacities, and faster operation. Conversion from dBASE II to III is difficult because dBASE II has an inconsistent function format. The conversion process consists of converting the dBASE II files to dBASE III files using the Ashton-Tate-supplied dCONVERT program, modifying program files to remove inconsistent format notation, then reorganizing program files to take advantage of dBASE III's conceptual differences. Tables compare commands, functions, and capacities. Figures show sample files.

"TAKETWO"
Forgeron, Ted. Product Watch. 4:6 (Jun 1986):198-200.
TakeTwo (United Software Security) is a hard-disk backup program. It is a replacement for DOS BACKUP and RESTORE and is faster and more convenient to use than the DOS commands. However, TakeTwo is not as fast as Fifth Generation Systems' Fastback. The product uses DOS-formatted diskettes and can format new disks while backing up. TakeTwo is copy protected.

"TAKING COMMAND IN TURBO PASCAL"
Steiner, David D. Programming Practices. 4:3 (Mar 1986):161-177.
An assembly language library of subroutines is presented that allows the user to access COMMAND.COM from within Turbo Pascal. The library uses DOS's memory-management functions to free memory for the command processes and for further subprocesses. Using these routines to work with DOS facilities, Turbo programs can release unneeded memory to the system, instruct DOS to load and run any other executable program, and continue processing after the subprocess is finished. A figure illustrates the freeing up of memory for a DOS application. A table lists the memory-management calls used in the routines. Listings provide the routines and a sample program that makes use of the routines' capabilities. *Letter Reference—4:8 (Aug 1986):21-24.*

"TALE OF TWO MICE, A"
Duntemann, Jeff. 1:7 (Apr 1984):150-172.
Microsoft's Mouse for the PC expansion bus and Mouse Systems' serial PC Mouse are reviewed. The two-button Microsoft Mouse is a mechanical (roller-based) mouse that requires an expansion slot for the interface board. The three-button optical PC Mouse requires an 8-inch-by-9-inch aluminum pad and connects to a serial port. The PC Mouse package contains no graphics support; instead, Mouse Systems gathered all the graphics support into the optional Mouse Window. Tables summarize Microsoft Mouse function calls and Mouse Window functions and procedures. *Letter References—2:2 (Aug 1984):14-16; 4:3 (Mar 1986):186.*

"TALKING TO A MOUSE FROM TURBO PASCAL"
Duntemann, Jeff. Tech Notebook. 2:4 (Oct 1984):63.
Turbo Pascal 2.0 provides a clean interface to the software interrupts, as shown by MOUSKETCH, a computerized etch-a-sketch that interfaces with a mouse driver through interrupt calls. A listing of MOUSKETCH is included.

"Self-reliant User, A Data Manager for the." 4:10 (Oct 1986):146-165.

"TAXES BY THE PC"
Oppenheimer, Max Stul. Legal Brief. 1:6 (Mar 1984): 186-192.
Three software packages intended to help prepare tax returns are reviewed: CAL-Q-TAX (Tax Management, Inc.); Micro-Tax (Microcomputer Tax Systems, Inc.); and SofTax (Design Trends). All three are better suited to the tax professional than to the casual user—a simple income tax return can be completed faster using a calculator and a pen. A table compares the products' main features.

"TAXING SOFTWARE"
Oppenheimer, Max Stul. Legal Brief. 4:8 (Aug 1986): 185-186.
Some states treat software encoded on disks the same as music encoded on records and tax the sale to the user; others view computer programming as a service and do not impose a sales tax. California's State Board of Equalization (SBE) has proposed an illogical method for applying sales tax to software. According to SBE Draft Regulation 1502, the sale of software on diskettes as well as software license fees would be subject to tax; however, custom computer programs and programs transferred to the purchaser via telecommunications would not. Four ways to deal with the new regulation are discussed.

"TELIOS"
Hansen, Augie. 3:1 (Jan 1985):130-139.
Telios version 2.0 (Genasys Corp.) is a communications software package for the IBM PC. Telios uses the Kermit protocol for file transfer. Data capture is limited by available memory only. XMODEM protocol is also available to the user. The program is not only reliable but also error-tolerant. Minimum configuration: 96KB RAM; single or double-sided disk drive; 80-column monochrome or color monitor; and PC-DOS starting with 1.1. A table lists commands and files. Null-modem cable wiring is diagrammed in a figure. A program listing using Telios commands shows how to logon to a source.

TELIOS—Genasys Corp.
"Telios." 3:1 (Jan 1985):130-139.

TELLO, ERNEST
"Basic To C." 2:4 (Oct 1984):117-140.

"TEN BY TEN"
Hoffmann, Thomas V. 2:5 (Nov 1984):52-63.
Ten 10MB hard disk drives for the IBM PC are reviewed. Tables compare performance of the drives using the Hunt fixed-disk benchmarks listed in the same issue. Hardware, software, and documentation features also are compared. Photos show controller cards and power supplies. Drives recommended for their enhanced function are the Falcon PCeXTender and Maynard WS-2. The best price/performance units are Data Storage Solutions' StoragePlus, Kamerman Megaflight and Qubie PC10. Rated acceptable were the two Sigma drives: HHK-10 and HDK-10. The Mountain Computer and Quadram Quad Disk were not recommended. *Letter References—3:1 (Jan 1985):13; 3:2 (Feb 1985):14.*

"TEN TIPS FOR IMPROVING YOUR DOCUMENTATION"
Stephens, Jessie Gunn. 1:5 (Feb 1984):83-90.
Ten methods that can be used to improve software documentation are presented. The tips include writing the program in clear English, not in jargon; writing to the intelligence level of the intended audience; explaining what the program does, not how it does it; providing practice exercises; using the imperative mood and the active voice; writing short chapters; using an outline; checking spelling, grammar, and punctuation; providing an index; and allowing potential users to read the documentation before it is published.

"THIRD DRIVE, THE"
Wright, Jack and David Zarodnansky. 3:6 (Jun 1985): 47-55.
An inexpensive alternative to a hard disk is a third diskette drive. A third drive can hold a disk containing frequently used programs, making them instantly available, and cutting down dramatically on diskette shuffling. The required circuitry for two additional diskette drives is already in place on the IBM disk adapter card. The article outlines four steps needed to add external disk drives: setting up the system board, setting up the disk drive, making the power cables, and connecting the drive. *Letter References—3:9 (Sep 1985):15-16.*

"Checking Out the Librarians." 2:4 (Oct 1984):80-90.

"THREE-DIMENSIONAL GRAPHICS FOR THE IBM PC"
Mallin, Jay. 1:8 (May 1984):36-48.
A BASIC program is described that creates and rotates three-dimensional objects on an IBM PC graphics monitor. The objects are vectors defined by sets of points. Hidden lines are not supported. The LINE statement is used to perform the actual drawing operations. Included are data listings for drawing a cube, a diamond, or a pyramid. *Letter References—2:3 (Sept 1984):14.*

"THREE-DIMENSIONAL MODELING"
Wright, Victor E. 4:2 (Feb 1986):88-103.
MEGA CADD's Design Board Professional is a three-dimensional modeling system for the IBM PC. The article details the drawing database, modeling concepts, creation of basic objects, modifying and viewing models, plotting drawings, advanced modeling, and use with other programs. Screen photos display some of the Design Board Professional's capabilities. The product is a conceptual modeling tool and produces wire frame models with or without hidden-line elimination. It is excellent for the creation of details as a supplement to working drawings created with a production drafting system.

"TIME ON YOUR HANDS"
Smith, Bob and Thomas Puckett. 1:8 (May 1984): 146-161.
A common but mysterious DEBUG problem is explained and resolved. The problem is that DEBUG freezes when a single-step interrupt (SSI) and an asynchronous interrupt (ASI) occur simultaneously. The solution is a patch to DEBUG that prevents the SSI - ASI collision. Figures show ASI and SSI behavior before and after the patch. Listings give DEBUG sessions that implement the necessary patch in DOS 1.1 and DOS 2.0. References are also included. *Letter References—2:3 (Sep 1984):14.*

TIME SPECTRUM—Persyst
"Multifunction Boards for the PC." 1:4 (Jan 1984):66-73.

"TINKERING WITH DOS 2.0"
Norton, Peter. Tech Notebook. 1:1 (Jul/Aug 1983):93.
DOS messages and data delimiters can be changed to meet personal preferences. For example, users may want to insert a hyphen between the hour and minutes in the system start-up time rather than a colon. Instructions are provided that alter the COMMAND.COM of DOS 2.0 and allow it to accept the hyphen in place of the colon.

"TK!SOLVER EQUATES"
Wright, Victor E. 3:9 (Sep 1985):137-159.
Software Arts' TK!Solver is a mathematical modeling tool that solves equation and engineering problems. Equations that describe the system to be modeled are entered into a spreadsheet-type form using Visicalc-like syntax. Two methods are used: the direct solve method, which works like a manual method solving the equations with one unknown variable first and the iterative solver, and a numerical method for solving engineering problems. TK!Solver does not have explicit programming constructs, nor does it provide symbolic differentiation or integration, but it can be programmed to behave as if there are IF...THEN or REPEAT...UNTIL constructs.

TK!SOLVER—Software Arts
"TK!Solver Equates." 3:9 (Sep 1985):137-159.

TK!SOLVER—Universal Technical Systems, Inc.
"Equation Solving by Formula/One." 4:6 (Jun 1986): 110-125.

TLC-LISP—The LISP Co.

"TO SUPPORT OR NOT TO SUPPORT"
Fastie, Will. Directions. 3:8 (Aug 1985):9-10.
IBM, known for its support and service, is criticized for its shortcomings in supporting PC dealers and software developers. Criticisms include the slow update service for manuals and software, the shipment of machines with processors having documented bugs, and defects in the EGA. Apple Computer Inc. is reputed to give better attention to its software developers.

"TOOLS FOR THE PASCAL PROGRAMMER"
Duntemann, Jeff. 3:2 (Feb 1985):102-111.
The Turbo Toolbox is a set of utility routines for use with Turbo Pascal 2.0. Turbo Access manages binary trees, automatically updating index files as keys are added or removed. Turbo Sort uses the Quicksort algorithm to sort data records. The General Installation utility allows installation of compiled Turbo Pascal programs on various computers. A table shows benchmark tests using Turbo Sort routines. Figures illustrate the process of searching for records using tree structures.

"TRACING A BUG IN THE 8088"
Fastie, Will. Tech Notebook. 1:2 (Sep/Oct 1983):106.
A bug in the 8088 microprocessor, copyright 1978, permits an interrupt during MOV SS, MOV SP instead of not allowing an interrupt to be recognized until after the the instruction following the MOV to segment register. Visually checking the 8088 chip for the 1978 date is one way to detect the chip. Another method uses DEBUG to display the bug. The DEBUG commands used to trace the bug are provided. *Letter References—1:4 (Jan 1984):16.*

"TRACING EXPANDED MEMORY"
Mirecki, Ted. Tech Notebook. 4:2 (Feb 1986):45.
Users may find it helpful to keep track of the amount of memory provided by an expanded memory specification board that actually is being used. A listing shows the program XMEM.ASM that displays the total expanded memory in the system, the amount allocated for particular applications, and the amount remaining.

"TRANSACTION PROCESSING, A DATA MANAGER FOR"
Karaman, Mark. 4:3 (Mar 1986):142-158.
Data Language Corp.'s PROGRESS is a fourth generation language integrated within a multiuser database development environment that includes an editor, data dictionary, compiler, and security facilities. It has many mainframe-like features. PROGRESS applications can be transported among a variety of systems. This data manager is an effective programming tool. A sample application was implemented in PROGRESS; benchmark results are given in a table. A figure shows PROGRESS files, and a table gives field types and storage requirements. Photos show the help menu and sample displays of data.

TREASURE CHEST—Tecmar, Inc.
"Memory Sidecars." 3:2 (Feb 1985):54-63.

"TREE STRUCTURES, PART 1"
Chaturvedi, Atindra N. 3:2 (Feb 1985):78-87.
Tree structures have many advantages and disadvantages of tree structures. They are an effective way to organize data in a file management system. A B-tree is a data structure that allows insertion and retrieval of data in large files from the keyboard using simple algorithms. B-tree nodes can contain keys, data records, and pointers to other nodes. In a B+tree structure, nonleaf nodes contain only keys and pointers to other nodes (not entire records), permitting more keys in a node of a given size. Figures show a linked list as a tree, a binary search tree, degenerate and unbalanced trees, and record insertion into B+tree and B-tree structures. A table compares the number of seeks required to locate a key using various structures. *Letter References—3:7 (Jul 1985):15-16.*

"TREE STRUCTURES, PART 2"
Chaturvedi, Atindra N. 3:3 (Mar 1985):131-158.
A B+tree file management system called **btsys** gives the user a standard and simple interface to use for keyed access to data files. The program, written in C, is loaded into memory and made resident as an extension of the operating system that is invoked using interrupt 60H. Use of the system and its data structures is described. Figures show interface structures and file-control block structure. Tables list function codes, return codes, and an index file record structure. Source code listings for the modules that make up the system are provided.

TRUE BASIC—True Basic, Inc.
"Six New Shapes of BASIC." 4:6 (Jun 1986):52-75.

"TRUTH ABOUT BASIC, THE"
Volkstorf, J. Edward, Jr. 1:4 (Jan 1984):188-189.
Logical values in IBM PC-BASIC can be treated as numbers, so logical expressions can be placed in arithmetic expressions. This realization permits new ways of writing standard constructs; for example, the IF...THEN operator may be recoded using "less than" and "greater than" operators. The result of these suggested transformations often saves memory at the expense of readability. *Letter References—1:9 (Jun 1984):21.*

"TURBO PASCAL"
Editors. Product of the Month. 3:1 (Jan 1985):187.
Borland International's Turbo Pascal compiler is recognized for its high performance, clear documentation, and low cost. Turbo Pascal includes all of the necessary program development tools in one smoothly integrated and bug-free package. The editor, compiler, and runtime system operate very quickly within a consistent and well-engineered environment. Turbo Pascal's language extensions permit a degree of hardware portability that is not usually found in language systems.

TURBO PASCAL—Borland International
"Approaching the Optimum Pascal." 4:7 (Jul 1986): 94-133.
"Pascal Times Four." 2:1 (Jul 1984):58-72.

TURBO TOOLBOX—Borland International
"Tools for the Pascal Programmer." 3:2 (Feb 1985): 102-111.

"TURBOREF"
Bradford, Charles. Product Watch. 4:3 (Mar 1986):179.
Gracon Services' TurboRef is a utility for Pascal programmers that prints source code and cross references variables. It generates printer rather than screen output. The lister draws boxes around BEGIN/END blocks, highlights reserved words and comments, and places the current procedure name and source file name on every line. Numerous bugs and design flaws mar TurboRef.

TURN-ON—Skyland Systems, Inc.
"Making Connections." 3:5 (May 1985):47-51.

TUTSIM—Applied i
"Mathematical Modeling with TUTSIM." 2:1 (Jul 1984): 40-55.

"12 FUNCTIONAL MODULES OF ANS COBOL, THE"
Pontius, Casey. 1:7 (Apr 1984):76-82.
Four COBOL compilers are tested for adherence to the 12 functional modules of the ANS COBOL 1974 specification: Micro Focus Level II COBOL, IBM COBOL, Ryan-McFarland Corp. RM/COBOL, and mbp COBOL. The 12 modules of the standard are: the nucleus; table handling; sequential I/O; relative I/O; indexed I/O; sort/merge; report writer; segmentation (overlays); libraries; debugging facilities; interprogram communications; and communications. Tables summarize the compilers' features as well as their compliance with the standard. *Letter References—2:1 (Jul 1984):14; 2:4 (Oct 1984):12-14.*

20MB DISK—Express Systems, Inc.
"Replacement Disks for the AT." 3:8 (Aug 1985):74-79.

"TWO APL SYSTEMS: A COMPREHENSIVE REVIEW"
Smith, Bob. 1:3 (Nov/Dec 1983):135-167.
This article reviews IBM APL 1.0 and STSC's APL*PLUS/PC Applications Development System 2.6. IBM APL resembles VS APL with PC-specific additions. To support the APL character set, IBM requires the Color Graphics Adapter in graphics mode, and STSC provides a modified character ROM that generates APL characters in both monochrome and graphics modes. Both provide 8087 support, but IBM's product has serious problems with numeric accuracy. Both have comparable system commands and features. Tables illustrate APL output to the printer. APL*PLUS is judged to be the better product. *Letter References—1:7 (Apr 1984):22; 1:9 (Jun 1984):21.*

"TWO NEW WAYS TO DRIVE THE BUGS AWAY"
Duncan, Ray. 1:8 (May 1984):110-128.
Codesmith-86 and Trace86 are two powerful memory-mapped program-tracing utilities intended for debugging in assembly language. Codesmith is superior to Trace86 for work on programs that perform extensive video output; however, because of its lack of adequate disk commands, Codesmith should be a second choice otherwise. Tables compare the main features of the utilities, and listings show program excerpts for both products.

"TWO VIEWS OF THE LANSCAPE"
Glinert-Cole, Susan. 1:4 (Jan 1984):54-65.
EtherSeries and ShareNet are two local area networks (LANs) for use with IBM PCs. Tables show benchmark tests using DOS 2.0 and hard disks. The two LANs are suitable for a starter system. Though both systems are similar, ShareNet provides file/record locking. A description of the International Standards Organization Open Systems Interconnection Model (ISO-OSI Protocol) is provided in a sidebar. *Letter References—1:8 (May 1984):14.*

U

"UCL: A USER COMMAND LANGUAGE"
Naddor, Eliezer. 1:3 (Nov/Dec 1983):44-58.
The author describes a User Command Language (UCL) of his invention. A UCL is a simple, standard set of commands that can be used without change in numerous programming languages. The author's UCL is implemented as a parser and interpreter composed of BASIC subroutines, which are listed with example applications.

UCSD PASCAL—Pecan Software Systems
"Approaching the Optimum Pascal." 4:7 (Jul 1986): 94-133.

"ULTRALOCK"
Mansfield, Victor. Product Watch. 4:3 (Mar 1986): 179-180.
Ultralock (Business Simulations, Ltd.) is a RAM-resident encryption program that operates transparently by intercepting DOS function calls to the disk. Despite its good user interface and clear documentation, Ultralock is criticized for its proprietary encryption algorithm and for not purging memory when a program is exited.

ULTRAPAK—Tseng Laboratories, Inc.
"Drawing Toward Monochrome." 4:1 (Jan 1986):70-77.

UNETIX—Lantech Systems
"Reflections of UNIX." 3:5 (May 1985):54-73.

"UNIX HERITAGE, A DATA MANAGER WITH A"
Hansen, Augie. 3:12 (Dec 1985):118-131.
INFORMIX-SQL from Relational Database Systems is a single-user DOS version of the company's UNIX-based data manager. INFORMIX-SQL is a relational data management system using a file access system called C-ISAM. The program uses the language RDSQL, an extended version of IBM's structured query language (SQL). INFORMIX-SQL is well suited to the development of demanding and complex applications. Benchmark results are listed in a table, and a sidebar provides an overview of the package. Listings provide sample tests. Figures illustrate INFORMIX-SQL's form and report specification structures.

"UNTANGLING PROGRAMS"
Armbrust, Steven and Ted Forgeron. 3:4 (Apr 1985): 81-93.
Two hardware-assisted debuggers for the PC are reviewed: PDT-PC version 2.2 (Answer Software Corp.) and PC PROBE version 2.0 (Atron). Both use debugging soft-

ware along with a board to provide debugging power formerly possible only with in-circuit emulators. Both products support hardware breakpoints, without affecting the speed of program execution, to accumulate program traces and to recover easily from program crashes. Photos show sample screens. Tables provide performance benchmarks, a sample debugging session, and lists of PDT-PC and PC PROBE commands. A figure shows a sample INITIALIZE macro. A listing provides code for the benchmark program DUMP.PAS.

"UNTYPED VAR PARAMETERS"
Duntemann, Jeff. Tech Notebook. 3:8 (Aug 1985):43.
Turbo Pascal boasts the unique ability to handle untyped variable parameters. The programmer can manipulate the contents of the unknown structure in binary format, a capability that is most useful when debugging. A listing provides a program to dump the bytes of the unknown variable to the screen or to a printer.

"UP, DOWN, RIGHT, LEFT, AND CHECK, PART 1"
Illowsky, Dan and Michael Abrash. 1:4 (Jan 1984): 46-52.
The IBM PC Game Adapter, which supports two joysticks with two buttons each, is reviewed. The theory of joystick operation is explained, and joysticks produced by different manufacturers are analyzed. Joystick programming in BASIC is discussed; listings provide sample program code. *Letter References—2:1 (Jul 1984):26.*

"UP, DOWN, RIGHT, LEFT, AND CHECK, PART 2"
Illowsky, Dan and Michael Abrash. 1:5 (Feb 1984): 93-116.
Advanced BASIC interface to the IBM PC Game Adapter as well as interface to the adapter from assembly language is covered. ON STRIG event trapping in BASIC is explained in detail. A low-level description of the Game Adapter from both an electrical and a software perspective is provided. Figures show memory usage of a joystick and the Game Adapter, and a table shows joystick connector pin assignments. Assembly language listings for joystick interface routines are included.

"UPGRADING A PC TO AN 'XTRA T' "
Glinert-Cole, Susan. 1:5 (Feb 1984):75-82.
Three expansion chassis/hard-disk products for the PC are reviewed: the IBM Expansion Chassis, which comes with a replacement ROM BIOS that permits booting from the hard disk; the Tecmar Expansion Chassis with a 10MB hard disk; and the I-Bus Expansion Chassis, which has no disk of its own. I-Bus can be combined with the Apparat hard-disk drive for a system that is equivalent to the others. A table compares the features of the products. *Letter References—2:1 (Jul 1984):24.*

"UPTOWN PRINTERS"
Foard, Richard M. 3:4 (Apr 1985):49-55.
IBM's Quietwriter and Wheelprinter are reviewed. The Quietwriter, a thermal transfer printer, runs quietly at 40-60 cps. It stores fonts in removable electronic font modules. The Wheelprinter is a daisywheel printer that supports continous forms, hand feeding, and automatic sheet feeding, with rapid switching between paper-feed modes. Photos show special features of both printers. A table summarizes control codes.

"USER'S RIGHTS"
Fastie, Will. Directions. 3:9 (Sep 1985):9-10.
While software users want to run their software conveniently and safely, vendors also demand fair compensation for each copy of their software and the right to market their product fully. Current methods of software protection are unacceptable. A sidebar presents the Bill of Rights for Software Users drawn up and approved by the Capital PC User Group, Inc.

"USING A SWITCH-TYPE JOYSTICK ON THE IBM PC"
McCann, Scott. Tech Notebook. 1:8 (May 1984):195.
The IBM PC resistive-type of joystick is slower than switch-contact joystick used by Atari computers. However, a switch-type joystick can operate in a PC using the circuit provided. *Letter References—2:3 (Sept 1984):20.*

"USING DOS LOOPS"
Hansen, Augie. Tech Notebook. 4:4 (Apr 1986):50.
Sophisticated batch file capabilities, such as looping (FOR and GOTO) were introduced first in DOS 2.0. The general form of the FOR command is discussed, and several examples of its use are given.

"USING ROM CHARACTERS"
Parsly, James. Tech Notebook. 4:8 (Aug 1986):47.
A BASIC program is presented that can label tic marks, plot titles, and *y*-axis titles. GLABEL.BAS is made up of three subroutines. Each takes characters from a table in the ROM BIOS. The first subroutine prints the characters anywhere on the 640-by-200 high-resolution graphics grid; the second prints double-width characters; the third prints the characters rotated by 90 degrees.

"Program Editors." 1:2 (Sep/Oct 1983):110-123.

"VEGA BOARD, THE"
Duntemann, Jeff. Product of the Month. 4:4 (Apr 1986):33.
The VEGA Board from Video 7, Inc. is a cover-all-bases display adapter that handles all four recognized PC display standards. The adapter occupies a short slot in the PC and uses surface-mount technology in order to increase board yields and board reliability.

"VENIX: SETTING UNIX STANDARDS"
Hansen, Augie. 4:2 (Feb 1986):153-159.
VenturCom's VENIX 2.0 is the first UNIX System-V compatible operating system to run on the PC/XT and PC/AT. The AT&T System V interface definition is the intended standard for UNIX systems development. The interface between VENIX and DOS, VENIX's overall performance, and system differences between VENIX and the UNIX System V standard are detailed. Tables list VENIX commands that do not run correctly under UNIX System V, VENIX enhancements, DOS interface commands, and a VENIX system performance summary. A sidebar covers the AT&T System V interface definition.

VENIX—VenturCom, Inc.
"VENIX: Setting UNIX Standards." 4:2 (Feb 1986): 153-159.

"Breaking the 32MB Barrier." 4:5 (May 1986):94-108.

"VIDEO FUNCTION CALL FIX"
Norman, Richard. Tech Notebook. 4:7 (Jul 1986):41.
Interrupt 10H, the video service call, does not preserve the BP register contents when the screen is scrolled. An assembly language program is presented that can be installed as a resident program for correcting this problem. VIDFIX.ASM acts as a patch that replaces the interrupt 10H routine in order to allow the BP register to be preserved even in high-level languages.

"VIDEO I/O AND GRAPHICS WITH IBM PASCAL"
Clinger, Barbara. 1:6 (Mar 1984):179-182.
Video output can be controlled using an undocumented function of IBM Pascal. An interrupt call to VIDEO interrupt 10H is stored in PASCAL.LIB. Without this function, performing full-screen control from IBM Pascal is nearly impossible. A listing of the function VDOXQQ and a table of commands are included.

"VIRTUAL GRAPHICS SCREEN, A"
Chandler, Richard and Gary Faulkner. 4:9 (Sep 1986):134-143.
A Turbo Pascal program called VSCREEN.PAS, can be used in association with a user-supplied draw routine to produce high-resolution graphics output to a printer. A virtual graphics screen image is created in RAM, and the image is sent one byte at a time to the printer head. The program is menu driven and provides several modes that allow the screen being created to be viewed or changed. A table shows modifications to the program SURFACE.PAS, which illustrates a typical application of the program. Figures show sample printer plots produced by VSCREEN.PAS when SURFACE.PAS is integrated into the Auto_Draw section.

"VIRTUES OF PATIENCE, THE"
Oppenheimer, Max Stul. Expert Consultant. 4:10 (Oct 1986):199-200.
"There ought to be a law" is not always the answer in the emerging computer industry. The author offers four caveats in seeking simple laws for complicated problems, such as the software copyright issue.

"VISIBLE COMPUTER: 8088"
Duntemann, Jeff. Product of the Month. 3:9 (Sep 1985):25.
Visible Computer: 8088 (Software Masters, Inc.) is a com-

prehensive software course in 8088 architecture and assembly language for the IBM PC. The book/diskette package includes an interactive full-screen debugger, an 8088 simulator, and sample programs in 8088 machine code. The software can simulate internal activities of the 8088 that are not accessible by ordinary programming methods. The product operates on any version of DOS.

"VISIBLE RAM DISK"
Rollins, Dan. Tech Notebook. 4:10 (Oct 1986):43.
RAM disks generally lack a read/write indicatior light. A procedure for patching VDISK.SYS to remedy this omission is given. With this modified version of VDISK the two top leftmost characters of the PC display appear in reverse video whenever the RAM disk is accessed. The commands required to make the patch are included.

"VISUAL QUERIES, A DATA MANAGER WITH"
Fastie, Will. 4:4 (Apr 1986):154-174.
Paradox (Ansa Software) is a powerful data manager with competitive performance and is distinguished by an innovative query-by-example facility easily operated by a novice. The query system and the Paradox Application Language, which can perform all the functions in the interactive environment through the recording of scripts, are examined in detail. A sample application is implemented in Paradox; benchmark results are given in a table. Photos show a typical screen, the report design tool, and a multitable query. Figures illustrate a programmed query and examples of menu sequences. A sidebar summarizes the capabilities of Paradox.

"VROOM! PERFORMANCE BENCHMARKS FOR THE PC/AT"
Glinert-Cole, Susan. 2:6 (Dec 1984):108-110.
Performance benchmarks for the IBM PC/XT and PC/AT have been collected and are provided here. Benchmarks selected for this comparison include I/O, loading a word processor, compiling and linking a program plus numerous others. Results indicate that the PC/AT is two to three times faster than the PC/XT at most tasks. Three tables detail benchmark results and disk performance. *Letter References—3:12 (Dec 1985):18-20.*

"Switching Modes." Programming Practices. 3:8 (Aug 1985):163-173.

"WELL-FORMATTED PASCAL, THE"
Armbrust, Steven and Ted Forgeron. 2:4 (Oct 1984): 22-33.
Two Pascal source code formatters, Tidy and Pascal Utilities, are reviewed. Pascal formatters convert unformatted source code to more readable form by enforcing standard rules of indentation and capitalization, aligning comments, and increasing white space where needed. Tidy is recommended because of its greater speed and reliability. A listing of a Pascal program before and after using both products is provided.

"WHAT DO BASIC ERROR MESSAGES REALLY MEAN?"
Ford, Nelson. Tech Notebook. 1:7 (Apr 1984):174.
BASIC error messages often say one thing but mean another. Situations that can cause BAD FILE NUMBER, TOO MANY FILES, LINE BUFFER OVERFLOW, or INPUT PAST END are described in a short quiz.

"WHAT HATH Z-D WROUGHT?"
Fastie, Will. Directions. 1:1 (Jul/Aug 1983):5,10,14,180.
The editor recounts how he was recruited by Ziff-Davis Publishing Co. to start *PC Tech Journal* and explains why the magazine is needed. The IBM PC is a complicated machine that can support many third-party products, which *PC Tech Journal* will review. It also will examine complex technical issues and provide information for both software developers and users. The magazine will focus on five major areas: communications, distributed processing, office automation, networking, and the process of connecting small computers to larger systems.

"WHAT IBM DID RIGHT/WRONG"
Fastie, Will. 1:1 (Jul/Aug 1983):50-56, 169-172.
A review of the IBM PC evaluates all of its components: the keyboard, Epson printer, color and monochrome displays, system board, peripherals, firmware, and software. Reliability and economy are considered important in IBM's design. The conclusion is that despite its failings, the PC is a system of flexibility and power. *Letter References—1:2 (Sep/Oct 1983):27. 1:3 (Nov/Dec 1983):26.*

WHEELPRINTER PRINTER—IBM
"Uptown Printers." 3:4 (Apr 1985):49-55.

"WHERE AM I?"
Fastie, Will. Tech Notebook. 1:2 (Sep/Oct 1983):197.
The DOS 2.0 PROMPT command allows the user to customize the system prompt and use it as a query for the current directory. Figures show PROMPT metacommands as well as several examples of PROMPT commands and the accompanying results. *Letter References—1:4 (Jan 1984):16; 1:5 (Feb 1984):22.*

"WHITESMITH'S C COMPILER"
Franz, Marty. Product Watch. 4:6 (Jun 1986):200-205.
The powerful Whitesmith's C compiler from Whitesmith's Ltd. is crippled by a nonstandard syntax. It has flexible configuration files, complete documentation, and many low-level functions, including memory allocation functions. Some low-level functions have nonstandard names, while others perform different actions than their standard counterparts. Whitesmith's has ported its runtime environment to 30 different systems. Tables list compiler specifications, features, notes on the documentation, and benchmark test results.

"WHITESMITH'S LTD. FIGHTING THE PIRATES OF SOFTWARE"
Oppenheimer, Max Stul. Legal Brief. 1:2 (Sep/Oct 1983):205-209.
In an effort to stop the pirating of software, Whitesmith's Ltd. offers a license/copyright agreement with its products. An authorization seal is affixed to the particular computer where the licensed software is to be used. The seal substitutes for a written agreement and constitutes a contract between the user and Whitesmith's, Ltd. The terms of the agreement limit use of the specified software to the computer bearing the authorization seal.

"XENIX FOR THE XT"
Hansen, Augie. 3:6 (Jun 1985):129-140.
The Microsoft-developed XENIX 3.0, release 1.2, distributed by The Santa Cruz Operation (SCO), is a port of AT&T System III UNIX to the Intel 8086/88 microprocessor. SCO XENIX is UNIX System III bolstered by some of the most popular Berkeley UNIX programs (vi, more, csh) and Microsoft's visual shell. The system is sold in three major pieces: the operating system, the development system, and the text processing system. XENIX is ideal for single-user, multitasking operation. A photo shows Microsoft's visual shell. Tables provides DOS/XENIX interface commands and a performance summary. Figures show sample XENIX operations.

"XENIX LIVES"
Hansen, Augie. 2:6 (Dec 1984):114-115.
This article compares XENIX with UNIX System III. XENIX is a faithful implementation of UNIX System III, with the exception that some commands and capabilities associated with UNIX equipped to run on larger host machines have been left out. The minimum hardware configuration for XENIX is a PC/AT with .5MB of primary storage, a 1.2MB diskette drive, a 20MB hard disk, a serial/parallel adapter, and one or more display systems. Tables show available commands for user access and commands for the program development environment.

XENIX—The Santa Cruz Operation

Single-user **Memory:** 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985

☐ **AMT 286**
Single-user **Memory:** 640K **CPU:** 8088 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985

☐ **AMT 286-e**
Single-user **Memory:** 640K to 1M **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985

AMERICAN MITAC CORP.

☐ **Computitan 286**
Single-user **Memory:** 512K to 4M **CPU:** 80286 **Graphics:** Monochrome **Interface(s):** RS-232C; Parallel **Introduced:** 1986

☐ **MPC160S**
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1986

APOLLO COMPUTER, INC.

☐ **DOMAIN Series 3000 Personal Workstation**
Single-user **Memory:** 2M to 4M **CPU:** MC68020 **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 1,024 X 800; 1,280 X 1,024 pixels **Interface(s):** RS-232C; IEEE-488 **Introduced:** 1986 **Cost:** $9,900-$21,400

APPLIED DIGITAL DATA SYSTEMS, INC. (ADDS)
(subsidiary of NCR Corp.)

☐ **ADDS PC/I**
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 3,000 since 1984

☐ **ADDS PC/II**
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 3,000 since 1984

☐ **Mentor 1500**
Multiuser-multiprogramming **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4 MHz **Users:** 3 **Graphics:** Monochrome; Color **Introduced:** 1985

APRICOT, INC.

☐ **Apricot F10**
Single-user **Memory:** 512K to 1M **CPU:** 8086 **Clock:** 4.67 MHz **Display:** 24 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Infrared mouse **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985

☐ **Apricot PC**
Single-user **Memory:** 256K to 1M **CPU:** 8086 **Clock:** 5 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Function keys **Graphics:** Monochrome; Color; 800 X 400 pixels **Interface(s):** 1 RS-232C; 1 Centronics **Units sold:** 60,000 since 1983

☐ **Apricot XEN**
Multiuser-multiprogramming **Memory:** 512K to 1M **CPU:** 80286 **Clock:** 7.5 MHz **Users:** 16 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Centronics **Introduced:** 1986

☐ **Apricot xi-10; xi-20**
Single-user **Memory:** 256K to 1M **CPU:** 8086 **Clock:** 5 MHz **Display:** 24 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; LCD microscreen on keyboard **Graphics:** Monochrome; Color; 640 X 200 or 256; 800 X 400 pixels **Interface(s):** RS-232C; Centronics **Units sold:** 50,000 since 1984 **Cost:** $2,495-$3,195

AT&T INFORMATION SYSTEMS

☐ **PC 6300**
Single-user **Memory:** 640K **CPU:** 8086 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Low-profile keyboard **Graphics:** Monochrome; Color; 640 X 200 or 400; 320 X 200 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1984 **Cost:** $2,580-$3,420

☐ **PC 6300 PLUS**
Memory: 512K to 7M **CPU:** 80286 **Clock:** 6 MHz **Display:** 25 lines X 80 chars. **Features:** Numeric keypad; Function keys **Graphics:** Monochrome; Color; 640 X 400 or 200; 320 X 200 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985

☐ **UNIX PC Model 7300**
Multiuser-multiprogramming **Memory:** 512K to 2M **CPU:** MC68010 **Clock:** 10 MHz **Display:** 29 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Mouse; Low-profile keyboard **Graphics:** Monochrome; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $5,095-$6,590

BASIC TIME

☐ **BT/AT**
Single-user **Memory:** 640K **CPU:** 80286 **Clock:** 6 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 350; (color) 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Cost:** $4,495-$6,785

☐ **BT/XT**
Single-user **Memory:** 256K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $1,195-$1,995

BECTERM, INC.

☐ **AZ-1400 DT Series**
Multiuser-multiprogramming **Memory:** 64K to 2M **CPU:** 6502; MC68000 **Interface(s):** RS-232C; Parallel **Introduced:** 1986

☐ **AZ-1400 Series**
Multiuser-multiprogramming **Memory:** 64K to 2M **CPU:** 6502; MC68000 **Interface(s):** RS-232C; Parallel **Introduced:** 1986

☐ **AZ-400 Series**
Multiuser-multiprogramming **Memory:** 64K to 2M **CPU:** 6502; MC68000 **Interface(s):** RS-232C; Parallel **Introduced:** 1986

BONDWELL, INC.

☐ **Model 32/34/36 XT**
Single-user **Memory:** 64K to 256K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** Centronics **Introduced:** 1985 **Cost:** $1,000-$2,500

ASSEMBLY LANGUAGE REFERENCE CARD

OPCODE		DESCRIPTION	JUMP CONDITION
JC	shortlbl	Jump if carry	CF = 1
JCXZ	shortlbl	Jump CX=0	CX = 0
JE/JZ	shortlbl	Jump =/0	ZF = 1
JG/JNLE	shortlbl	Jump >/Not ≦	SF=OF and ZF=0

JL/JNGE	shortlbl	Jump </Not ≧	SF <> OF
JLE/JNG	shortlbl	Jump ≦/Not >	(SF <> OF) or (ZF = 1)
JMP	target	Unconditional jump	
JNC	shortlbl	Jump not carry	CF = 0
JNE/JNZ	shortlbl	Jump not=/Not 0	ZF = 0
JNO	shortlbl	Jump not overflow	OF = 0
JNP/JPO	shortlbl	Jump not parity/Parity odd	PF = 0
JNS	shortlbl	Jump not sign	SF = 0
JO	shortlbl	Jump if overflow	OF = 1
JP/JPE	shortlbl	Jump if parity/Parity even	PF = 1
JS	shortlbl	Jump if sign	SF = 1

OPCODE		DESCRIPTION	FLAGS O D I T S Z A P C
LAHF		Load AH from flags	. . . . .
LDS	dest, source	Load pointer using DS	. . . . .
LOCK		Lock bus	. . . . .
LODS/B/W	[source-string]	Load string	. . . . .
LOOP	shortlbl	Loop	. . . . .
LOOPE/Z	shortlbl	Loop equal/zero	. . . . .
LOOPNE/NZ	shortlbl	Loop not equal/Not zero	. . . . .
LEA	dest,source	Load effective address	. . . . .
LES	dest,source	Load pointer using ES	. . . . .
MOV	dest,source	Move	. . . . .
MOVS/B/W	[dest,source]	Move string	. . . . .
MUL	source	Multiplication unsigned	X . . . U U U U X
NEG	dest	Negate	X . . . X X X X X
NOP		No operation	. . . . .
NOT	dest	Logical NOT	. . . . .
OR	dest,source	Logical inclusive OR	0 . . . X X U X 0
OUT	port,accum	Output byte or word	. . . . .
POP	dest	Pop word off stack	. . . . .
POPF		Pop flags off stack	R R R R R R R R R
PUSH	source	Push word onto stack	. . . . .
PUSHF		Push flags onto stack	. . . . .
RCL	dest,count	Rotate left through carry	X X
RCR	dest,count	Rotate right through carry	X X
REP		Repeat string operation	. . . . .
REPE/Z		Repeat string operation while =/0	. . . . .
REPNE/NZ		Repeat string operation while not =/not 0	. . . . .
RET	optional pop	Return from procedure	. . . . .
ROL	dest,count	Rotate left	X X
ROR	dest,count	Rotate right	X X
SAHF		Store AH into flags	. . . . R R R R R
SAL/SHL	dest, count	Shift left arithmetic/logical	X . . . X X U X X
SAR	dest,count	Shift arithmetic right	X . . . X X U X X
SBB	dest,source	Subtract with borrow	X . . . X X X X X
SCAS/B/W	[dest-string]	Scan string	X . . . X X X X X
SHR	dest,count	Shift logical right	X X

OPCODE		DESCRIPTION	FLAGS O D I T S Z A P C
STC		Set carry flag	 1
STD		Set direction flag	. 1 . . . . .
STI		Set interrupt enable flag	. . 1 . . . . .
STOS/B/W	[dest-string]	Store byte/word string	. . . . .
SUB	dest,source	Subtract	X . . . X X X X X
TEST	dest,source	Test/Nondestructive logical AND	0 . . . X X U X 0
WAIT		Wait for 8087 not busy	. . . . .
XCHG	dest,source	Exchange	. . . . .
XLAT	source table	Translate	. . . . .
XOR	dest,source	Logical exclusive OR	0 . . . X X U X 0

II. NEW 80286 INSTRUCTIONS (Real Mode)

OPCODE		OPERATION	FLAGS O D I T S Z A P C
BOUND	reg, mem	Detect value out of range	. . . . .
ENTER	imm16, imm8	Enter procedure	. . . . .
IMUL	reg, imm	Integer multiply	X . . . U U U U X
INS/B/W	mem, DX	Input string from DX	. . . . .
LEAVE		Leave procedure	. . . . .
OUTS/B/W	DX, mem	Output string to port	. . . . .
POPA		Pop all registers	. . . . .
PUSH	imm	Push immediate data	. . . . .
PUSHA		Push all registers	. . . . .
RCL/RCR/ROL/ROR	r/m, imm	Rotate by immediate	X X
SAL/SAR/SHL/SHR	r/m, imm	Shift by immediate	X . . . X X U X X

III. DATA ADDRESSING MODES

MODE	EXAMPLE	RESULT
Register	MOV AX, BX	(BX) → AX
Immediate	MOV AX, 5	5 → AX
Direct	MOV AX, ADDR	(ADDR) → AX
Indirect	MOV AX, [BX]	ADDR=(BX) (ADDR) → AX
Indirect + Displacement	MOV AX, [BX+5]	ADDR=(BX) (ADDR+5) → AX
Base + Index	MOV AX, [BX + SI]	ADDR=(BX)+(SI) (ADDR) → AX
Base + Index + Displacement	MOV AX, [BX+S/I+5]	ADDR=(BX)+(SI) (ADDR+5) → AX

Notes:

a. (n) = contents of location n.

b. Indirect registers—both base registers: BX BP; both index registers: DI SI.

c. All modes usable as source or destination except immediate (source only).

d. DS is assumed as the segment register for all data except: (1) where BP is the base register, then SS is used; (2) for string operations, ES is the destination segment; (3) where a segment override is stated.

IV. STACK OPERATIONS

1. Segment pointed to by SS.
2. Last-in, first-out type.
3. The top of the stack is the lowest address; the stack grows downward in memory.
4. SP register always used:
   SP − 2 → SP ; PUSH dest
   dest → (SP)

   (SP) → dest ; POP dest
   SP + 2 → SP

V. SPECIFIC INSTRUCTION CLASSES

String manipulation MOVS CMPS SCAS LODS STOS

1. B or W is appended for byte/word.
2. Operands are always implied:
   String source in DS : SI
   String dest in ES : DI
3. CX is the counter for REP MOVSB.
   REP MOVSB repeats CX times.
4. SI and DI are incremented unless DF = 1, then SI and DI are decremented.

Loop Instructions

1. The LOOP instructions use CX as counter.
2. Each time through, CX = CX − 1. If CX Not 0, then jump to shortlbl.

VI. SELECTED BIOS INTERRUPTS (Hex)

0	Divide by zero	14	Serial I/O
1	Single step	15	Extended memory (PC/AT only)
2	Nonmaskable interrupt (NMI)	16	Keyboard input
3	Breakpoint	17	Printer output
5	Print screen	19	Boot strap loader
10	Video display	1A	Time of day
11	Equipment list	1D	Video initialization
12	Memory size	1E	Diskette parameters
13	Disk I/O	1F	Video graphics characters

VII. SELECTED DOS INTERRUPTS (Hex)

20	Program terminate	25	Absolute disk read
21	Function call (see section XII)	26	Absolute write
22	Terminate address	27	Terminate, stay resident
23	Break address	2F	Print spool control
24	Critical error handler		

VIII. ASSEMBLY LANGUAGE PSEUDO-OPERATIONS

LISTING PSEUDO-OPS	INSTRUCTION SET PSEUDO-OPS
.CREF/.XCREF	.8086/.186/.286c/.286p
.LALL/.SALL/.XALL	.8087/.287
.LFCOND/.SFCOND/.TFCOND	
.LIST/.XLIST	
%OUT text	
PAGE length, width / +	
SUBTTL text	
TITLE text	

DATA PSEUDO-OPS

ASSUME	segreg : segname
GROUP	segname [, segname . . .]
SEGMENT	align-type combine-type class
INCLUDE	filename
NAME	name
COMMENT	delimiter comment delimiter
.RADIX	2/8/10/16
ORG	expression
EVEN	
name EQU/=	expression
DB	byte values
DW	word values

DATA PSEUDO-OPS

DD	doubleword values
DQ	quadword values
DT	ten-byte values
RECORD	fieldname ; width
STRUC	
LABEL	define-type
EXTRN	name : define-type
PUBLIC	name
PROC	[NEAR/FAR]
END/ENDP/ENDS	

ALIGN TYPES	COMBINE TYPES	DEFINE TYPES
BYTE	PUBLIC	BYTE
WORD	COMMON	WORD
PARA	STACK	DWORD
PAGE	MEMORY	QWORD
	AT address	TBYTE
		NEAR
		FAR
		ABS (used with EXTRN only)

IX. PROGRAM SEGMENT PREFIX (PSP)

OFFSET (Hex)	LENGTH (bytes) (Decimal)	CONTENTS
0	2	INT 20H instruction
2	2	Memory size (paragraphs)
5	5	Long call to DOS; #bytes in segment at offset 6
A	4	Terminate vector
E	4	Ctrl-break vector
12	4	Critical error vector
2C	2	Environment segment address
50	3	INT 21 and far return
5C	16	FCB 1
6C	16	FCB 2
80	1	Length of parameter string
81	127	Command parameter string

X. DOS FUNCTION CODES (Hex)

Place function code in AH, invoke INT 21H.

00	Program terminate	12	Search next entry
01	Keyboard input	13	Delete file
02	Display output	14	Sequential read
03	Auxiliary input	15	Sequential write
04	Auxiliary output	16	Create file
05	Printer output	17	Rename file
06	Direct console I/O	19	Current disk
07	Direct console input, no echo	1A	Set DTA
08	Console input, no echo	1B	FAT information, current disk
09	Print string	1C	FAT information, any disk
0A	Buffered string input	21	Random read
0B	Check standard input status	22	Random write
0C	Clear keyboard buffer	23	File size
0D	Disk reset	24	Set relative record field
0E	Select disk	25	Set interrupt vector
0F	Open file	26	Create new program segment
10	Close file	27	Random block read
11	Search first entry	28	Random block write
29	Parse file name	45	Duplicate file handle
2A	Get date	46	Force duplicate handle
2B	Set date	47	Get current directory
2C	Get time	48	Allocate memory
2D	Set time	49	Free allocated memory
2E	Set/reset verify switch	4A	Modify allocated blocks
2F	Get DTA	4B	Load/exec program (EXEC)
30	Get DOS version number	4C	Terminate process
31	Terminate, stay resident	4D	Get subprocess return code
33	Ctrl-break check	4E	Find first matching file
35	Get interrupt vector	4F	Find next matching file
36	Get free disk space	54	Get verify setting
38	Get/set country information	56	Rename file
39	Create subdirectory	57	Get/set file date/time
3A	Remove subdirectory	59	Get extended error [a]
3B	Change current dir	5A	Create unique file [a]
3A	Create file	5B	Create new file [a]
3D	Open file	5C	Lock/unlock file access [a]
3E	Close file handle	5E00	Machine type [b]
3F	Read from file/device	5E02	Set up printer [b]
40	Write to file/device	5E03	Get printer set up [b]
41	Delete file	5F02	Get redirection list [b]
42	Move file pointer	5F03	Redirect device [b]
43	Get/set file attributes	5F04	Cancel redirection [b]
44	I/O control for devices	62	Get PSP address [a]

[a] *Introduced in DOS version 3.0.*
[b] *Introduced in DOS version 3.1.*

XI. I/O CONTROL SUBFUNCTIONS (hex)

Load 44H into AH, function code into AL, load CX if function ODH, invoke INT 21H.

AL = 00 Get device information
AL = 01 Set device information
AL = 02 Read from character device
AL = 03 Write to character device
AL = 04 Read from block device
AL = 05 Write to block device
AL = 06 Get input status
AL = 07 Get output status
AL = 08 Is device removable? [a]
AL = 09 Is device local or remote? [b]
AL = 0A Is handle local or remote? [b]
AL = 0B Set sharing retry count [a]
AL = 0D Generic IOCTL request: [c]
CX = 0840 Set device parameters
CX = 0841 Write track
CX = 0842 Format track
CX = 0860 Get device parameters
CX = 0861 Read track
CX = 0862 Verify track layout
AL = 0E Get logical drive id [c]
AL = 0F Set logical drive id [c]

[a] *Introduced in DOS version 3.0.*
[b] *Introduced in DOS version 3.1.*
[c] *Introduced in DOS version 3.2.*

ASSEMBLY LANGUAGE REFERENCE CARD

I. 8088 INSTRUCTION SET

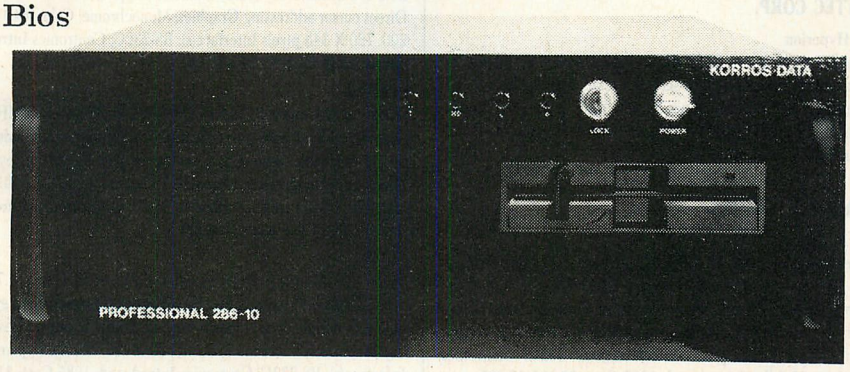
FLAG	DESCRIPTION	FLAGS BIT
OF	Overflow	11
DF	Direction	10
IF	Interrupt enable	9
TF	Trap	8
SF	Sign	7
ZF	Zero	6
AF	Auxiliary carry	4
PF	Parity	2
CF	Carry	0

Key to Flag Codes

1 Unconditionally set
0 Unconditionally cleared
X Altered to reflect operation result
U Undefined
R Replaced from memory (e.g., SAHF)
. Unaffected

OPCODE		DESCRIPTION	FLAGS O D I T S Z A P C
AAA		ASCII adjust addition	U . . . U U X U X
AAD		ASCII adjust division	U . . . X X U X U
AAM		ASCII adjust multiply	U . . . X X U X U
AAS		ASCII adjust subtract	U . . . U U X U X
ADC	dest,source	Add with carry	X . . . X X X X X
ADD	dest,source	Addition	X . . . X X X X X
AND	dest,source	Logical AND	0 . . . X X U X 0
CALL	target	Call a procedure	. . . . .
CBW		Convert byte to word	. . . . .
CLC		Clear carry flag	 0
CLD		Clear direction flag	. 0 . . . . .
CLI		Clear interrupt flag	. . 0 . . . . .
CMC		Complement carry flag	 X
CMP	dest,source	Compare destination to source	X . . . X X X X X
CMPS/B/W	dest,source	Compare string	X . . . X X X X X
CWD		Convert word to doubleword	. . . . .
DAA		Decimal adjust addition	U . . . X X X X X
DAS		Decimal adjust subtraction	U . . . X X X X X
DEC	dest	Decrement by 1	X . . . X X X X .
DIV	source	Division, unsigned	U . . . U U U U U
ESC	opcode,source	Escape	. . . . .
HLT		Halt	. . . . .
IDIV	source	Integer divide	U . . . U U U U U
IMUL	source	Integer multiply	X . . . U U U U X
IN	accum,port	Input byte or word	. . . . .
INC	dest	Increment by 1	X . . . X X X X .
INT	int-type	Interrupt	. . 0 0 . . . . .
INTO		Interrupt if overflow	. . 0 0 . . . . .
IRET		Interrupt return	R R R R R R R R R

JUMP INSTRUCTIONS



Note: No flags are affected by any of the jump instructions.

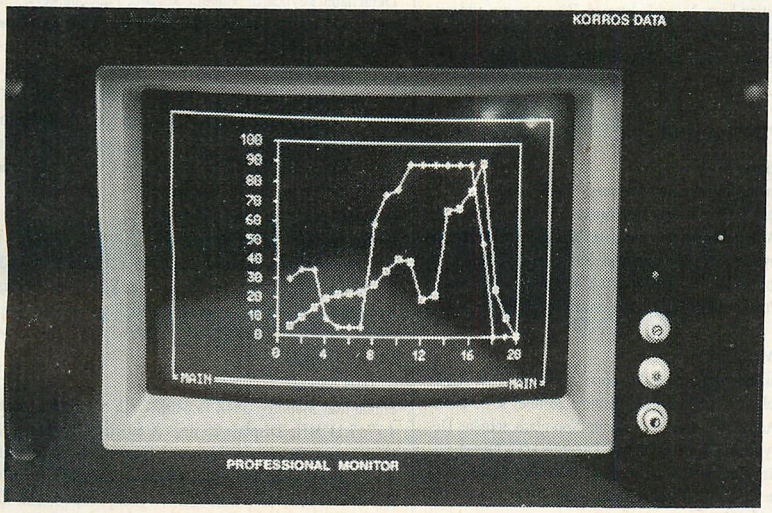
OPCODE		DESCRIPTION	JUMP CONDITON
JA/JNBE	shortlbl	Jump >/Not ≦	CF = 0 or ZF = 0
JAE/JNB	shortlbl	Jump ≧/Not <	CF = 0
JB/JNAE	shortlbl	Jump </Not ≧	CF = 1
JBE/JNA	shortlbl	Jump ≦/Not >	CF = 1 or ZF = 1

KORROS-DATA

PROFESSIONAL INDUSTRIAL COMPUTERS LOW PRICED YET HIGH RELIABLE

100% IBM compatible, Phoenix Bios

Technical Data : Professional 286-10



Intel 80286 Microprocessor 8/10 MHZ

- Math coprocessor (80287)
- Seven channel DMA
- 16 level interrupt
- System clock
- Three programmable timers
- 64 kB ROM
- One MB RAM on board
- CMOS RAM for system configeration
- Real time clock
- Battery backup for CMOSRAM
- Eight slots
- Two parallel printerports
- One serial port
- Floppy drive 1.2 MB
- Rugged hard disk drive 20 MB/30MB
- Enhanced graphics adapter 720 x 350/16 (64) colors
- EGA compatible high resolution monitor
- Membrane type keyboard IBM-AT compatible, 98 keys

80386 32 Bit AVAILABLE

- Without floppy drive
- With two floppy drives
- 3.5 inch disk drives available
- uninterruptable power supply
- Bubble memory
- Custom designed hardware add ons
- Special analog preamplifiers
- Power amplifier outputs
- Telephone modem for service
- LAN's available
- Air conditioning

Runs with MS-DOS 3.1 or higher and can handle all software products available for PC/AT systems

- Energy Management
- Laboratory automation
- Pressure Measurement
- Flow Measurement
- Level monitoring and control
- Product testing
- Data logging
- Process Control
- Servocontrol
- Robotics
- Chromatography
- Signal Analysis
- FFT
- Vibration Analysis
- Transient Analysis
- Your special application

12-bit to 14-bit AD/DA cards designed for industrial applications with I/0 lines, frequency counters and individual preamplifiers per channel are available.

Single-user **Memory:** 256K to 640K **CPU:** 8086 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Mouse **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,995-$3,595

☐ Athena
Single-user **Memory:** 256K to 512K **CPU:** 8086 **Display:** 25 lines X 40 or 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; (color) 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1984

CARINT, LTD.

☐ ECS-286
Single-user **Memory:** 256K to 720K **CPU:** 80286-1 **Clock:** 10; 8 MHz **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Mouse **Graphics:** Monochrome; Color; 720 X 384; (color) 320 X 200 pixels **Interface(s):** 2 RS-232C; Centronics

CHALLENGER COMPUTER, INC.

☐ XT-186; XT-88T; XAT-286; AT-286
Multiuser-multiprogramming **Memory:** 256K to 4M **CPU:** 8088-2; 80186; 80286 **Clock:** 8; 10 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Color **Interface(s):** RS-232C; Parallel **Units sold:** 1,000 since 1985

CHAMPION BUSINESS SYSTEMS

☐ CHAMPION PC
Single-user **Memory:** 1M **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Mouse **Graphics:** Monochrome; Color; 640 X 352; 320 or 640 X 200 pixels pixels **Interface(s):** 2 RS-232C; 2 Parallel

CHESAPEAKE DATA SYSTEMS CORP.

☐ AT-01
Single-user **Memory:** 512K to 2M **CPU:** 80286 **Clock:** 6 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $2,595-$2,970

☐ AT-20
Single-user **Memory:** 512K to 2M **CPU:** 80286 **Clock:** 6 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $3,195-$3,920

☐ AT-30
Single-user **Memory:** 512K to 2M **CPU:** 80286 **Clock:** 6 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $3,745-$4,120

☐ AT-40
Single-user **Memory:** 512KB to 2M **CPU:** 80286 **Clock:** 6 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $3,945-$4,320

☐ TG-1
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Function keys; Numeric keypad; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $1,145-$1,485

☐ TG-10
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Function keys; Numeric keypad; Adjustable screen position; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $1,895-$2,240

☐ TG-2
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Function keys; Numeric keypad; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $1,295-$1,640

☐ TG-20
Single-user **Memory:** 512K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Function keys; Numeric keypad; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $1,995-$2,340

CLASSIC TECHNOLOGY, INC.

☐ AT Multiuser System
Multiuser-multiprogramming **Memory:** 256K to 16M **CPU:** 80286 **Clock:** 8 MHz **Users:** 16 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 720 X 348; 640 X 400 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 1,500 since 1985 **Cost:** $395-$2,495

☐ PC/XT Multiuser System
Multiuser-multiprogramming **Memory:** 256K to 16M **CPU:** 80286 **Clock:** 8 MHz **Users:** 16 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 348 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 1,500 since 1985 **Cost:** $395-$2,495

COMMODITY SYSTEMS, INC.

☐ QUICKPC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,045-$1,195

COMPAQ COMPUTER CORP.

☐ COMPAQ DESKPRO Model 1
Single-user **Memory:** 128K to 640K **CPU:** 8086 **Clock:** 4.77; 7.14 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1984

☐ COMPAQ DESKPRO Model 2
Single-user **Memory:** 256K to 640K **CPU:** 8086 **Clock:** 4.77; 7.14 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1984

☐ COMPAQ DESKPRO Model 286 Model 1A
Single-user **Memory:** 128K to 640K **CPU:** 8086 **Clock:** 4.77; 7.14 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Direct cursor addressing; Function keys **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1986

☐ COMPAQ DESKPRO Model 3
Single-user **Memory:** 256K to 640K **CPU:** 8086 **Clock:** 4.77; 7.14 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1984

☐ COMPAQ DESKPRO Model 4
Single-user **Memory:** 640K **CPU:** 8086 **Clock:** 4.77; 7.14 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1984

☐ COMPAQ DESKPRO Model 5
Single-user **Memory:** 640K **CPU:** 8086 **Clock:** 4.77; 7.14 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Interface(s):** Parallel **Introduced:** 1985

☐ COMPAQ DESKPRO 286 Model 1
Multiuser-multiprogramming **Memory:** 256K to 8.2M **CPU:** 80286 **Clock:** 6; 8 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1985

☐ COMPAQ DESKPRO 286 Model 2
Multiuser-multiprogramming **Memory:** 256K to 8.2M **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1985 **Cost:** $5,999-$6,254

☐ COMPAQ DESKPRO 286 Model 2A
Multiuser-multiprogramming **Memory:** 256K to 8.3M **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1986

☐ COMPAQ DESKPRO 286 Model 3
Reviewed Aug 1986 p. 80.
Multiuser-multiprogramming **Memory:** 256K to 8.3M **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1985

☐ TeleCompaq
Single-user **Memory:** 384K to 640K **CPU:** 8086; Z80 **Clock:** 4; 4.77; 7.14 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $4,195-$6,395

COMPUTER CONSOLES, INC.

☐ CCI PC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Non-glare screen; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 348; 640 X 400; 320 or 640 X 200 pixels **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1984 **Cost:** $2,500-$5,800

FORTUNE SYSTEMS CORP.

☐ Fortune BASIC Workstation
Single-user **Memory:** 128K to 640K **CPU:** MC68000; 8088 **Clock:** 4.7; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 350 pixels **Interface(s):** 2 RS-232C **Introduced:** 1984 **Cost:** $995

FOUNTAIN TECHNOLOGIES, INC.

☐ Fountain AT-286
Multiuser-multiprogramming **Memory:** 512K to 1M **CPU:** 80286 **Interface(s):** RS-232C; Parallel; Centronics **Introduced:** 1986

☐ Fountain Turbo PC/XT
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Interface(s):** RS-232C; Parallel **Introduced:** 1986

☐ Fountain XT
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Adjustable screen position; Detachable keyboard; Function keys; Direct cursor addressing **Graphics:** Monochrome; 720 X 348 pixels

☐ Fountain XT Model II
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Adjustable screen position; Detachable keyboard; Function keys; Direct cursor addressing **Graphics:** Monochrome; 720 X 348 pixels

☐ The Fountain Office Pro
Multiuser-multiprogramming **Memory:** 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Adjustable screen position; Detachable keyboard; Function keys; Direct cursor addressing **Graphics:** Monochrome; 720 X 348 pixels

☐ XT-186
Single-user **Memory:** 256K to 640K **CPU:** 80186 **Clock:** 8 MHz **Features:** Adjustable screen position; Detachable keyboard; Function keys; Direct cursor addressing **Graphics:** Color

FRANKLIN COMPUTER CORP.

☐ PC-8000
Single-user **Memory:** 512K **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $999

FULLER COMPUTER CORP.

☐ Fuller-AT
Single-user **Memory:** 256K **CPU:** 8088 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Cost:** $2,695-$3,595

☐ Fuller-XT
Single-user **Memory:** 256K **CPU:** 8088 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Cost:** $995-$2,495

GOLDEN STAR TECHNOLOGY, INC.

☐ G.S.T. AT
Single-user **Memory:** 640K to 1M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986

GULFSTREAM MICRO SYSTEMS, INC.

☐ APC/286
Multiuser-multiprogramming **Memory:** 256K to 1M **CPU:** 80286 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Units sold:** 100 since 1985 **Cost:** $3,495-$7,659

☐ PC/286
Multiuser-multiprogramming **Memory:** 640K **CPU:** 80286 **Clock:** 8 MHz **Users:** 8 **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad **Graphics:** Monochrome; Color **Interface(s):** 2 RS-232C; RS-449/422; Parallel **Units sold:** 100 since 1985 **Cost:** $2,995-$7,000

☐ PC/88
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color **Interface(s):** 2 RS-232C; Parallel **Units sold:** 300 since 1985 **Cost:** $1,895-$6,000

☐ PC/88-2
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 4.77; 7.5 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Units sold:** 100 since 1985 **Cost:** $1,495-$5,000

HARRIS/LANIER
(formerly Lanier Business Products, Inc.)

☐ Lanier Concept 2000
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad **Graphics:** Monochrome; Color; 640 X 200 or 720 X 350 pixels **Interface(s):** 2 RS-232C **Introduced:** 1985

HEWLETT-PACKARD CO.

☐ Vectra PC
Multiuser-multiprogramming **Memory:** 256K to 3.64M **CPU:** 80286 **Clock:** 8 MHz **Features:** Adjustable screen position; Nonglare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 400 pixels **Introduced:** 1985 **Cost:** $3,199-$6,604

HEXACE TECHNOLOGIES, INC.

☐ Hexace System II
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 24 lines x 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Color; 640 or 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 500 since 1985 **Cost:** $2,495

HITECH INTERNATIONAL, INC.

☐ SAM 2001 XT; SAM 3001 AT
Multiuser-multiprogramming **Memory:** 640K to 1M **CPU:** 80286 **Clock:** 8 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color **Interface(s):** 2 RS-232C; Parallel **Units sold:** 1,595 since 1985 **Cost:** $795-$1,595

HONEYWELL INFORMATION SYSTEMS, INC.

☐ PC AP
Single-user **Memory:** 256K to 640K **CPU:** 80286 **Clock:** 8 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Color **Introduced:** 1985

☐ PC EP
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** 1 RS-232C; 1 Parallel; 20/60 mA; RS-422 **Cost:** $1,450-$2,650

☐ PC XP
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Interface(s):** RS-232C; Centronics

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Personal Computer AT 5170 Model 239
Multiuser-multiprogramming **Memory:** 512K **CPU:** 80286 **Clock:** 6 MHz **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys **Introduced:** 1985 **Cost:** $5,295

☐ Personal Computer AT 5170 Model 68
Multiuser-multiprogramming **Memory:** 256K to 3M **CPU:** 80286 **Clock:** 6 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color **Interface(s):** Parallel; RS-232C **Introduced:** 1984 **Cost:** $3,995

☐ Personal Computer AT 5170 Model 99
Multiuser-multiprogramming **Memory:** 512K to 3M **CPU:** 80286 **Clock:** 6 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1984 **Cost:** $4,895

☐ Personal Computer AT 5170 Models 319, 339
Multiuser-multiprogramming **Memory:** 128K to 640K **CPU:** 80286 **Clock:** 8 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $5,295

☐ Personal Computer AT/370 Models 919 and 939
Multiuser-multiprogramming **Memory:** 512K to 2M **CPU:** 80286 **Clock:** 8 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $8,985

☐ Personal Computer AT/370 5170 Model 599
Reviewed Nov 1985 p. 86.
Multiuser-multiprogramming **Memory:** 512K to 8M **CPU:** 80286 **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys **Interface(s):** RS-232C; Parallel **Introduced:** 1984 **Cost:** $8,585

☐ Personal Computer AT/370 5170 Model 739
Memory: 512K **CPU:** 80286 **Clock:** 6 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys **Introduced:** 1985 **Cost:** $8,985

☐ Personal Computer XT 5160 Model 470
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Introduced:** 1985 **Cost:** $3,065

☐ Personal Computer XT 5160 Model 68
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Introduced:** 1985 **Cost:** $2,145

☐ Personal Computer XT 5160 Model 78
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Introduced:** 1985 **Cost:** $2,295

☐ Personal Computer XT 5160 Model 87
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Non-glare screen; Adjustable screen position; Numeric keypad; Function keys **Graphics:** Monochrome; Color **Introduced:** 1983

☐ Personal Computer XT 5160 Models 267, 268, 277, 278, 088, 089
Multiuser-multiprogramming **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Weight:** 27.4-30.6 lbs. **Introduced:** 1986 **Cost:** $2,145-$2,895

☐ Personal Computer XT/370 5160 Model 589
Multiuser-multiprogramming **Memory:** 256K to 4M **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard **Graphics:** Monochrome; Color **Introduced:** 1983

☐ Personal Computer 5150
Single-user **Memory:** 64K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Non-glare screen; Numeric keypad; Function keys; Light pen; Joystick **Graphics:** Monochrome; Color; 640 X 200; 320 X 200 pixels **Interface(s):** RS-232C; 20/60 mA **Units sold:** 30,000 since 1981 **Cost:** $1,845-$1,995

☐ RT Personal Computer 6150 Models 20, 25, A25
Multiuser-multiprogramming **Memory:** 1M to 4M **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 512; 1,024 X 768 pixels **Interface(s):** RS-232C **Introduced:** 1986 **Cost:** $14,945-$19,510

☐ RT Personal Computer 6151 Model 10
Single-user **Memory:** 1M to 3M **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 512; 1,024 X 768 pixels **Interface(s):** RS-232C **Introduced:** 1986 **Cost:** $11,700

☐ System/36 PC Model 5364
Multiuser-multiprogramming **Memory:** 256K to 512K **Users:** 4 **Cost:** $5,995-$8,090

☐ 3270 Personal Computer
Reviewed Mar 1985 p. 74.
Single-user **Memory:** 256K to 640K **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 350 pixels **Introduced:** 1983 **Cost:** $3,520-$6,800

☐ 3270 Personal Computer AT (XMA)
Multiuser-multiprogramming **Memory:** 1M to 2MB **CPU:** 80286 **Clock:** 8 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $7,140-$7,870

☐ 3270 Personal Computer AT/G, AT/GX
Single-user **Memory:** 512K to 2M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $7,510

☐ 3270-PC (5271 and XMA)
Memory: 640K to 2M **CPU:** 80286 **Clock:** 8 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $3,860-$5,445

☐ 3270-PC/G
Single-user **Memory:** 384K to 640K **CPU:** 8088 **Display:** 32 or 49 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Tablet; Mouse **Graphics:** Monochrome; Color; 720 X 512 pixels **Interface(s):** IEEE-488 **Introduced:** 1984 **Cost:** $9,535

☐ 3270-PC/GX
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Display:** 50 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard **Graphics:** Monochrome; Color; 1,024 X 1,024; 960 X 1,000 pixels **Interface(s):** IEEE-488 **Introduced:** 1984 **Cost:** $16,785

INNOVATIVE COMPUTER LEASING, INC.

☐ FAST-1; FAST+
Single-user **Memory:** 640K to 1M **CPU:** 80286 **Clock:** 8 MHz **Display:** 26 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Cost:** $2,380-$2,935

INTELLIGENT DATA SYSTEMS, INC.

☐ PC-286AT
Memory: 512K to 15M **CPU:** 80286 **Clock:** 6 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel

☐ PC-8088
Memory: 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel

INTELLIGENT TECHNOLOGIES INTERNATIONAL CORP.

☐ Kennet Business Computer
Single-user; Multiuser-multiprogramming **Memory:** 256K to 1M **CPU:** 8086 **Clock:** 8 MHz **Users:** 3 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 800 X 400 pixels **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1984 **Cost:** $2,800-$5,900

INTERFACE ELECTRONICS, INC. (MI)

☐ Neptune Business Computer
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Detachable keyboard; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** 2 RS-232C; Centronics **Units sold:** 183 since 1983 **Cost:** $2,700-$4,950

INTERNATIONAL TECHNOLOGY CORP.

☐ ITC PC-AT (Tempest)
Multiuser-multiprogramming **Memory:** 256K to 3M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $5,500-$13,000

☐ ITC PC-XT (Tempest)
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $4,200-$8,000

ITT INFORMATION SYSTEMS

☐ ITT XTRA
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; 1 Parallel **Introduced:** 1984 **Cost:** $1,395-$2,345

TALL TREE SYSTEMS
1120 San Antonio Road
Palo Alto, CA 94303
415-964-1980

JRAM-RT - 8MB Memory board for the IBM RT. Uses 1MB chips. Fits in one of the two RT expansion slots. 32 bit memory board with Error Correcting Code (ECC). No software or hardware modifications necessary. Increases RT performance. Applications execute faster.

☐ ITT XTRA XP
Single-user **Memory:** 512K to 1.64M **CPU:** 80286 **Clock:** 6 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 or 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $2,995-$3,125

IVY MICROCOMPUTER CORP.

☐ DT-20
Multiuser-multiprogramming **Memory:** 512K to 1M **CPU:** 80286 **Clock:** 8 MHz **Users:** 32 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200 or 400 pixels **Interface(s):** 2 RS-232C; RS-449/422 **Units sold:** 350 since 1985

JADE COMPUTER PRODUCTS, INC.

☐ JADE XPC
Multiuser-multiprogramming **Memory:** 64K to 4M **CPU:** 8088 **Clock:** 4.77; 7 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Function keys **Graphics:** Monochrome; Color; 720 X 400 pixels **Interface(s):** RS-232C; Centronics **Units sold:** 1,000 since 1984 **Cost:** $1,000-$6,000

KAMERMAN LABS

☐ AT-Plus-1800
Single-user **Memory:** 1M to 16M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986

KAYPRO CORP.

☐ Kaypro PC
Memory: 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** RS-232C; Centronics **Cost:** $1,595

☐ Kaypro 286i
Multiuser-multiprogramming **Memory:** 512K to 640K **CPU:** 80286 **Clock:** 6 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Color; 640 X 200 pixels **Interface(s):** RS-232C; 2 Centronics **Introduced:** 1985 **Cost:** $2,995-$5,995

LASERMASTER, LTD.

☐ LaserMaster 286/Raster Master CAD/CAP
Single-user **Memory:** 1M to 6M **CPU:** 80286 **Clock:** 8 MHz **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 1,280 X 1,024 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 40 since 1986 **Cost:** $11,000-$15,000

LEADING EDGE HARDWARE PRODUCTS, INC.

☐ Leading Edge Model D PC
Single-user **Memory:** 512K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 720 X 350 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985 **Cost:** $1,295-$1,995

LEE DATA CORP.

☐ Model 073 Personal Workstation
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 24 or 32 lines X 80 chars. **Features:** Detachable keyboard; Function keys **Graphics:** Monochrome; Color; 720 X 408 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $3,200-$3,500

L/F TECHNOLOGIES, INC.

☐ Model 1610
Multiuser-multiprogramming **Memory:** 1M **CPU:** Z80B; Z80H; 8087; 80186 **Clock:** 8 MHz **Users:** 4 **Display:** 24 lines X 132 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 720 X 300 pixels **Interface(s):** 10 RS-232C; Centronics; RS-422 **Units sold:** 1,000 since 1985

☐ Model 810
Multiuser-multiprogramming **Memory:** 128K **CPU:** Z80B; Z80H; 80186; 8087 **Clock:** 6 MHz **Users:** 5 **Display:** 25 lines X 132 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 720 X 300 pixels **Interface(s):** 12 RS-232C; IEEE-696; Centronics; RS-422 **Units sold:** 1,000 since 1985

LOGICAL BUSINESS SYSTEMS

☐ L-XT
Single-user **Memory:** 256K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Low-profile keyboard **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** 2 RS-232C; 1 Parallel **Introduced:** 1983

MAD INTELLIGENT SYSTEMS, INC.

☐ MAD-2, Model D1000
Multiuser-multiprogramming **Memory:** 1M to 16M **CPU:** 80286 **Clock:** 6; 8 MHz **Users:** 5 or 6 **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Function keys **Graphics:** Color; 640 or 320 X 200 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985

MAGNUM COMPUTER, INC.
ComX Division

☐ Magnum XT/Mark 2
Single-user **Memory:** 640K **CPU:** 8088-2 **Graphics:** Monochrome; Color **Interface(s):** 2 RS-232C; Centronics **Introduced:** 1986 **Cost:** $1,295-$2,095

MAI BASIC FOUR, INC.

☐ MAI 1500
Multiuser-multiprogramming **Memory:** 640K **CPU:** 80286 **Clock:** 8 MHz **Users:** 3 **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 350 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1986

MAINSTREET COMPUTER CORP.

☐ ADEPT AT
Single-user **Memory:** 640K **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Cost:** $1,975-$2,-304

☐ ADEPT DC 286
Single-user **Memory:** 512K **CPU:** 80286 **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,975-$2,294

☐ ADEPT DC 88T
Single-user **Memory:** 640K **CPU:** 8088 **Cost:** $699-$1,828

☐ ADEPT PC
Single-user **Memory:** 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Cost:** $749-$1,228

☐ AT plus
Single-user **Memory:** 512K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Cost:** $3,988-$4,211

☐ Enhanced XT
Single-user **Memory:** 256K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Cost:** $2,284-$2,504

MAXTRON

☐ AT Basic System
Single-user **Memory:** 512K to 1M **CPU:** 80286 **Interface(s):** RS-232C; Parallel

☐ Turbo System XT-A1
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel

MET-CHEM INTERNATIONAL CORP.

☐ Met-Chem PC-AT
Single-user **Memory:** 640K **CPU:** 80286 **Graphics:** Monochrome **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,595-$2,950

☐ Met-Chem PC-XT
Single-user **Memory:** 640K **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $495-$2,350

☐ Met-Chem PC-XT Turbo
Single-user **Memory:** 640K **CPU:** 8088-2 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $560-$2,415

MICRO CONNECTIONS, INC.

☐ MC-88
Multiuser-multiprogramming **Memory:** 256K to 512K **Clock:** 8 MHz **Users:** 8 **Display:** 24 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 640 X 400 pixels **Interface(s):** RS-232C; 2 Parallel **Units sold:** 35 since 1984 **Cost:** $1,595

MICRO FIVE CORP.

☐ Series 5000
Memory: 512K to 16M **CPU:** 80286 **Clock:** 10 MHz **Users:** 16 **Interface(s):** 1 RS-232C; 1 Centronics **Introduced:** 1985

MICRO 1

☐ Micro 1 AT
Single-user **Memory:** 640K to 1M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,685

☐ Micro 1 XT
Single-user **Memory:** 25K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $499-$610

THE MOM CORP.

☐ Smartstation
Single-user **Memory:** 1M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986

MONROE SYSTEMS FOR BUSINESS

☐ System 2000
Multiuser-multiprogramming **Memory:** 128K to 896K **CPU:** 80186 **Clock:** 8 MHz **Users:** 4 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 400 pixels **Interface(s):** 2 RS-232C; Centronics **Introduced:** 1983 **Cost:** $3,095-$13,995

MULTITECH ELECTRONICS, INC.
SEE AD ON PAGE 71

☐ Accel 900
Single-user **Memory:** 512K **CPU:** 80286 **Graphics:** Monochrome **Interface(s):** 2 RS-232C; Centronics **Introduced:** 1986 **Cost:** $2,459-$2,589

☐ Plus 700
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 720 X 300 pixels **Interface(s):** RS-232C; Centronics **Units sold:** 30,000 since 1986 **Cost:** $1,269-$1,359

All the bells and whistles are yours for a song.

	CPU Speed	Mother-board Memory	Max. # of Half-Ht Drives	Display	Operating System	Expanded Memory/ Multifunction Board	Warranty Period	Suggested List
Multitech 900	**10 or 8MHz**	**512K RAM Up to 1MB**	**5**	**Hi-Res. Soft-white**	**MS-DOS 3.1**	**Lotus/Intel/ Microsoft EMS Up to 3MB RAM**	**12-Months**	**$2395.00†**
IBM PC/AT	8MHz Only	512K RAM	3	Not Included	Not Included	Not Included	12-Months	$5295.00*
Epson Equity III	6 or 8MHz	640K RAM	4	Not Included	MS-DOS 3.1	Not Included	12-Months	$3195.00
Compaq Deskpro 286	6 or 8MHz	256K RAM Up to 640K	4	Not Included	Not Included	Not Included	3-Months	$2999.00
Sperry PC/IT	6 or 8MHz	512K RAM Up to 1MB	4	Not Included	MS-DOS 3.1	Not Included	12-Months	$3395.00
Tandy 3000	8MHz Only	640K RAM Up to 1MB	3	Not Included	Not Included	Not Included	3-Months	$4299.00**

* Includes 30MB Hard Disk Drive
** Includes 40MB Hard Disk Drive
† Multitech 900 with 30MB Hard Disk Drive, $3,295;
Multitech 900 with 40MB Hard Disk Drive, $3,595.

Speed that makes you more productive. Compatibility that makes you more comfortable. Reliability that makes you more confident. And a price that's music to your ears.

It's all yours in our 286-based Multitech 900.

You get 30% faster processing than an IBM PC/AT® from the 900's 10/6 MHz 80286 (selectable by keyboard, hardware or software). And up to a full megabyte of on-board RAM.

With Multitech 900 expansion is easy. You have 5 spaces for half-height 5.25" storage devices and a Lotus®/Intel®/Microsoft® EMS multifunction board adding up to 3 MB of RAM. Plus, the Multitech 900 is so compatible, you can count on trouble-free operation from your software and add-on boards.

So when you're looking for a machine with all the bells and whistles, give us a ring. Performance, quality and nationwide TRW service are all yours. Just call toll-free (800) 538-1542; in California, (408) 773-8400. We'll have you singing a happy song in no time at all.

☐ **Popular 500**
Single-user **Memory:** 256K to 512K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200 pixels (monochrome); 320 X 200 pixels (color) pixels **Interface(s):** RS-232C; Centronics **Units sold:** 10,000 since 1985 **Cost:** $819-$1,095

NBI, INC.

☐ **OASys 2000 Personal Computing Workstation**
Multiuser-multiprogramming **Memory:** 256K to 1M **CPU:** 80186 **Clock:** 8 MHz **Users:** 32 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position **Graphics:** Monochrome; 800 X 400 pixels **Interface(s):** RS-232C **Introduced:** 1983 **Cost:** $2,995

☐ **OASys 4100S, 4100X**
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 X 200; 640 X 200 pixels **Interface(s):** 2 RS-232C; Centronics **Introduced:** 1984 **Cost:** $2,725-$5,875

NCR CORP.

☐ **InteracTV**
Single-user **Memory:** 128K to 512K **CPU:** Z80; 8088 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Touch screen **Graphics:** Color; 640 X 400 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $8,730-$10,730

☐ **InteracTV-2**
Single-user **CPU:** Z80; 8088 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Touch screen **Graphics:** Color; 640 X 400; 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $8,500

☐ **PC4**
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200 (color); 720 X 350 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1984 **Cost:** $2,400-$4,960

☐ **PC4i**
Multiuser-multiprogramming **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Numeric keypad; Function keys **Interface(s):** Parallel **Introduced:** 1985 **Cost:** $2,485

☐ **PC6**
Single-user **Memory:** 40M **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel

☐ **PC8**
Single-user; Multiuser-multiprogramming **Memory:** 256K to 4M **CPU:** 80286 **Clock:** 8 MHz **Users:** 16 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Numeric keypad; Function keys; Detachable keyboard; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 400 pixels **Interface(s):** **Introduced:** 1985 **Cost:** $3,795-$5,505

NEC INFORMATION SYSTEMS, INC.

☐ **APC III**
Single-user **Memory:** 128K to 640K **CPU:** 8086 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Low-profile keyboard **Graphics:** Monochrome; Color; 640 X 400 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1984 **Cost:** $1,595-$4,295

☐ **APC IV**
Single-user **Memory:** 640K to 10.5M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1986 **Cost:** $3,645-$5,970

NELMA INFORMATION, INC.

☐ **Persona 16**
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.2 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 320 pixels **Interface(s):** RS-232C; Parallel; Centronics **Units sold:** 1,000 since 1984

☐ **Persona 16XT**
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.2 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Low-profile keyboard **Graphics:** Monochrome; Color; 640 X 320 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 750 since 1984 **Cost:** $2,995

NIXDORF COMPUTER CORP.

☐ **8810 Model 65**
Single-user **Memory:** 256K to 768K **CPU:** 80186 **Display:** 24 or 27 lines X 80 or 132 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 800 X 450 pixels **Interface(s):** RS-232C **Introduced:** 1984 **Cost:** $4,810-$8,610

NORTH AMERICAN MICROTECH, INC.

☐ **Solution 5000 PC**
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 X 640 pixels **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1984 **Cost:** $1,250-$2,600

NORTH STAR COMPUTERS, INC.

☐ **DIMENSION 15; DIMENSION 30**
Multiuser-multiprogramming **Memory:** 512K **CPU:** 80186 **Users:** 12 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard **Graphics:** Monochrome; Color; 640 X 200 or 400 pixels **Interface(s):** 2 RS-232C; Centronics; Parallel **Units sold:** 3,000 since 1984 **Cost:** $5,000-$25,000 (file-server); $1,795 (Workstation)

☐ **DIMENSION 300; DIMENSION 1200**
Multiuser-multiprogramming **Memory:** 1M **CPU:** 80186 **Clock:** 8 MHz **Users:** 2-12 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard **Graphics:** Monochrome; Color; 640 X 200 or 400 pixels **Interface(s):** RS-232C; Centronics; Parallel **Introduced:** 1985 **Cost:** $12,900-$19,900

☐ **DIMENSION 36**
Multiuser-multiprogramming **Memory:** 512K **CPU:** 80186 **Features:** Adjustable screen position; Detachable keyboard **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Centronics **Introduced:** 1986 **Cost:** $6,150-$19,900 (Fileserver); $1,795 (Workstation)

NORTHEASTERN SOFTWARE

☐ **Northeastern Software Turbo 286**
Single-user **Memory:** 640K **CPU:** 8088 **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1986

OLIVETTI USA
Office Products Division

☐ **Olivetti M24 PC**
Single-user **Memory:** 256K to 512K **CPU:** 8086-2 **Clock:** 7.44 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 400 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 400,000 since 1985 **Cost:** $2,420-$4,995

☐ **Olivetti M28 Advanced Technology PC**
Single-user **Memory:** 512K to 1M **CPU:** 80286 **Clock:** 7.44 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard **Graphics:** Monochrome; Color; 640 X 400 pixels **Interface(s):** RS-232C; Centronics **Units sold:** 60,000 since 1985

OSBORNE COMPUTER CORP.

☐ **Osborne 2100**
Memory: 256K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel

PANASONIC INDUSTRIAL CO.
Computer Products Division

☐ **Business Partner**
Single-user **Memory:** 256K to 640K **CPU:** 8086-2 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,295-$1,495

☐ **Business Partner 286**
Multiuser-multiprogramming **Memory:** 512K to 1M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $2,795-$2,995

☐ **Executive Partner FT-70**
Single-user **Memory:** 256K to 640K **CPU:** 8086-2 **Clock:** 7.16; 4.77 MHz **Display:** 25 lines X 80 or 40 chars. **Features:** Numeric keypad; Function keys **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985

☐ **RL-H7100 Sr. Partner**
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; (color) 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1984 **Cost:** $3,495

☐ **RL-7000W Sr. Partner**
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; (color) 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1984 **Cost:** $2,195

PASCO INTERNATIONAL, INC.

☐ **ATLANTIS Model 256/64-PC**
Single-user **Memory:** 512K **CPU:** 80286 **Clock:** 4; 6 MHz **Display:** 24 lines X 130 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Color; 640 X 400 pixels **Interface(s):** RS-232C; RS-449/422; IEEE-696; 20/60 mA; Parallel **Introduced:** 1980

PC DESIGNS, INC.

☐ **FD-1000**
Single-user **Memory:** 64K to 1M **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 690 X 240 pixels **Interface(s):** 2 RS-232C; 2 Centronics **Units sold:** 2,000 since 1985

☐ **HD-1000**
Single-user; Multiuser-multiprogramming **Memory:** 64K to 1M **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 690 X 240 pixels **Interface(s):** 2 RS-232C; 2 Parallel; 2 Centronics **Units sold:** 1,500 since 1985 **Cost:** $2,250-$2,600

☐ Plain Vanilla
Memory: 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** 2 RS-232C; 2 Centronics **Cost:** $995-$1,495

☐ Turbo AT
Single-user **Memory:** 1M **CPU:** 80286 **Graphics:** Monochrome **Interface(s):** 2 RS-232C; 2 Centronics **Introduced:** 1986

PC'S LIMITED

☐ PC's 286
Single-user **Memory:** 1M **CPU:** 80286 **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $2,295-$2,695

☐ Turbo PC
Memory: 640K **CPU:** 8088-2 **Clock:** 4.77; 6.66 MHz **Introduced:** 1985

☐ Turbo PC AT
Memory: 1M **CPU:** 80286 **Clock:** 6 MHz **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1985

PENTABS

☐ PENTABS PC
Single-user **Memory:** 512K **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1985

PERIPHERALS PLUS

☐ XT Plus
Single-user **Memory:** 64K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 24 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 350 pixels **Interface(s):** RS-232C; 2 Parallel **Units sold:** 1,000 since 1985 **Cost:** $995-$2,995

PERSONAL COMPUTER PRODUCTS, INC. (PCPI)

☐ PC Solution
Single-user **Memory:** 64K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 or 132 chars. **Graphics:** Monochrome; Color; 720 X 350 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1984 **Cost:** $995-$2,495

PHILIPS INFORMATION SYSTEMS, INC.

☐ P3100
Single-user **Memory:** 256K to 512K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 325 or 400 pixels **Interface(s):** 1 RS-232C; 1 Parallel **Introduced:** 1984

☐ P3102
Single-user **Memory:** 512K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Centronics **Introduced:** 1986 **Cost:** $1,752-$2,750

☐ P3200
Single-user **Memory:** 512K to 1M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Centronics **Introduced:** 1986 **Cost:** $3,795-$4,650

PRONTO COMPUTERS, INC.

☐ Series 16
Single-user **Memory:** 256K to 1M **CPU:** iAPX 186 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Non-glare screen **Graphics:** Monochrome; Color; 640 X 480 pixels **Interface(s):** 2 RS-232C; Parallel **Units sold:** 2,200 since 1983

PS COMPUTERS

☐ PS Turbo 640
Memory: 640K **CPU:** 8088-2 **Clock:** 4.77; 7.5 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** 2 RS-232C; Centronics **Cost:** $1,700-$2,300

QDP COMPUTER SYSTEMS, INC.

☐ QDP-16 Series
Multiuser-multiprogramming **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 8 MHz **Users:** 32 **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Function keys **Graphics:** Monochrome; Color; 640 X 400; 1,024 X 1,024 pixels **Interface(s):** RS-232C; Centronics **Units sold:** 650 since 1984 **Cost:** $1,295-$5,195

QIC RESEARCH, INC.

☐ QIC 286-AT
Single-user **Memory:** 512K to 1M **CPU:** 80286 **Graphics:** Monochrome **Interface(s):** RS-232C; Parallel **Introduced:** 1986

QUANTEK CORP.

☐ QUANTEK System 2000
Multiuser-multiprogramming **Memory:** 640K to 1M **CPU:** 80286 **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Centronics **Units sold:** 1,000 since 1985

SAMSUNG ELECTRONICS AMERICA, INC.

☐ AT Alternative
Single-user **Memory:** 640K to 5M **CPU:** 80286 **Interface(s):** 8 RS-232C; Parallel **Introduced:** 1985

SANTA CLARA SYSTEMS, INC.

☐ ATterminal
Single-user **Memory:** 64K to 1M **CPU:** 80286 **Clock:** 10 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 or 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $1,195-$1,995

☐ PCterminal (Networking Station)
Single-user **Memory:** 64K to 256K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Adjustable screen position; Non-glare screen **Graphics:** Monochrome; 640 or 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1984 **Cost:** $1,195-$1,995

SANYO BUSINESS SYSTEMS CORP.
(Computer Division)

☐ MBC-555-2
Single-user **Memory:** 128K to 512K **CPU:** 8088 **Clock:** 3.6 MHz **Display:** 25 lines X 80 chars. **Features:** Joystick **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** Centronics **Units sold:** 75,000 since 1984

☐ MBC-855/HD-20
Single-user; Multiuser-multiprogramming **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Users:** 3 **Display:** 25 lines X 80 chars. **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** Centronics **Introduced:** 1985

☐ MBC-880/885
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** Centronics **Units sold:** 10,000 since 1985

☐ MBC-990
Multiuser-multiprogramming **Memory:** 512K to 1.2M **CPU:** 80286 **Clock:** 6; 8 MHz **Users:** 3 **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985

SCOTTSDALE SYSTEMS

☐ IDS PC-8088
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Interface(s):** RS-232C; Parallel

SENTINEL COMPUTER CORP.

☐ PCX Base XT System
Multiuser-multiprogramming **Memory:** 256K **CPU:** 8088 **Clock:** 4.7 MHz **Users:** 5 **Display:** 24 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome **Interface(s):** 4 RS-232C **Units sold:** 125 since 1985 **Cost:** $13,995

☐ PCX-AT Level 2 System
Multiuser-multiprogramming **Memory:** 256K to 640K **CPU:** 8088 **Users:** 9 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** RS-232C; RS-449/422; Parallel **Units sold:** 12 since 1986

STAR TECHNOLOGIES, INC.

☐ STAR PC
Single-user **Memory:** 128K **CPU:** 8088; Z80A; Fairchild 9445 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 400 pixels **Interface(s):** 1 RS-232C; 1 Parallel **Units sold:** 25 since 1984

STEARNS COMPUTER SYSTEMS

☐ Stearns Desktop Computer
Single-user **Memory:** 128K to 896K **CPU:** 8086; 8087 **Clock:** 8 MHz **Display:** 26 lines X 89 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200 (color); 720 X 348 pixels **Interface(s):** RS-232C **Introduced:** 1983

STM ELECTRONICS CORP.

☐ STM AT
Multiuser-multiprogramming **Memory:** 1M **CPU:** 80286 **Clock:** 6 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Adjustable screen position **Graphics:** Monochrome **Introduced:** 1985 **Cost:** $3,495-$4,994

☐ STM Desktop PC
Multiuser-multiprogramming **Memory:** 256K to 512K **CPU:** 80186 **Clock:** 8 MHz **Display:** 25 lines X 80 chars **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels pixels **Interface(s):** Centronics **Introduced:** 1984 **Cost:** $1,759

SUPER COMPUTER, INC.

☐ Super EXT
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; 720 X 400 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $4,495

☐ Super XT Plus
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 400 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 1,000 since 1984 **Cost:** $2,395

SUPERCOM

☐ APC-AT
Single-user **Memory:** 640K to 1M **CPU:** 80286 **Clock:** 6; 8 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Interface(s):** RS-232C; Parallel **Cost:** $549-$1,590

☐ APC-XT
Single-user **Memory:** 640K **CPU:** 8088 **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Cost:** $549-$1,590

TALBOTT DEVELOPMENT CORP.

☐ COMET AT
Single-user **Memory:** 640K to 3M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $2,995-$3,995

☐ COMET XT
Single-user **Memory:** 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,295-$2,295

TANDEM COMPUTERS, INC.

☐ Dynamite 6541
Single-user **Memory:** 256K to 640K **CPU:** 8086 **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Low-profile keyboard **Graphics:** Monochrome; 320 or 640 X 200; 800 X 300 pixels **Interface(s):** RS-232C; RS-449/422; 20/60 mA **Introduced:** 1984

☐ Dynamite 6546
Single-user **Memory:** 256K to 640K **CPU:** 8086 **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Low-profile keyboard **Graphics:** Monochrome; 320 or 640 X 200; 800 X 300 pixels **Interface(s):** RS-232C; RS-449/422; 20/60 mA **Introduced:** 1984

☐ 6AT/20 Workstation
Multiuser-multiprogramming **Memory:** 512K to 11M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Centronics **Introduced:** 1986

☐ 6AT/40 Workstation
Multiuser-multiprogramming **Memory:** 640K to 11M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Centronics **Introduced:** 1986

TANDON CORP.

☐ PCA
Multiuser-multiprogramming **Memory:** 512K to 2M **CPU:** 80286 **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $2,695-$3,595

☐ PCX
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,115-$1,795

TANDY/RADIO SHACK

☐ Tandy 1000 (25-1000)
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Light pen; Joystick **Graphics:** Monochrome; Color; 320 X 200 pixels **Interface(s):** Parallel **Introduced:** 1984

☐ Tandy 1000 EX
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1986

☐ Tandy 1000 HD (25-1001)
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Light pen **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1985

☐ Tandy 1000 SX
Single-user **Memory:** 384K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1986

☐ Tandy 1200 (25-3001)
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.7 MHz **Display:** 25 lines x 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 400; (color) 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985

☐ Tandy 1200 HD
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.7 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985

☐ Tandy 2000 (26-5103), Tandy 2000 HD (26-5104)
Single-user **Memory:** 256K to 768K **CPU:** 80186 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Function keys; Mouse **Graphics:** Monochrome; Color; 640 X 400 pixels **Interface(s):** RS-232C; Parallel **Cost:** $1,599-$2,499

☐ Tandy 3000 (25-4000), Tandy 3000 HD (25-4010)
Multiuser-multiprogramming **Memory:** 512K to 12M **CPU:** 80286 **Clock:** 8 MHz **Users:** 4 **Display:** 25 lines X 80 chars. **Features:** Numeric keypad; Function keys **Graphics:** Monochrome; Color; 640 X 400; (color) 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $2,599-$3,599

☐ Tandy 3000 HL
Single-user **Memory:** 512K to 640K **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** Parallel **Introduced:** 1986

☐ Tandy 3000 40
Multiuser-multiprogramming **Memory:** 640K to 1M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986

TAVA U.S.A., INC.

☐ TAVA PC Gold Series
Single-user **Memory:** 256K to 1M **CPU:** 8088-2 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 350; 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Units sold:** 30,000 since 1983

TECH PC

☐ TECH PC/AT
Single-user **Memory:** 512K **CPU:** 80286 **Clock:** 6 MHz **Graphics:** Monochrome **Cost:** $1,999-$2,599

☐ TECH PC/XT
Single-user **Memory:** 256K **CPU:** 8088 **Clock:** 4.77 MHz **Graphics:** Monochrome **Cost:** $799-1,499

☐ TECH TURBO PC/AT
Single-user **Memory:** 512K **CPU:** 80286 **Clock:** 6; 8 MHz **Graphics:** Monochrome **Cost:** $2,299-$2,899

☐ TECH TURBO PC/XT
Single-user **Memory:** 640K **CPU:** 8088 **Clock:** 4; 7 MHz **Graphics:** Monochrome **Cost:** $1,099-$1,799

TECONOMICS, INC.

☐ XT/Turbo/AT
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $600-$10,000

TELEVIDEO SYSTEMS, INC.

☐ PM/16
Multiuser-multiprogramming **Memory:** 256K **CPU:** Z80A; 80186 **Clock:** 4; 8 MHz **Interface(s):** 2 RS-232C; 4 RS-449/422; Centronics **Units sold:** 3,000 since 1984 **Cost:** $8,995

☐ PM/16T; PM/16T-85
Multiuser-multiprogramming **Memory:** 512K to 1M **CPU:** Z80; 80186 **Users:** 16 **Interface(s):** RS-232C; RS-449/422 **Introduced:** 1985 **Cost:** $8,995-$10,995

☐ PM/4T
Multiuser-multiprogramming **Memory:** 256K **CPU:** Z80A; 80186 **Clock:** 4; 8 MHz **Users:** 4 **Interface(s):** 2 RS-232C; 4 RS-449/422; Centronics **Introduced:** 1984

☐ PM/4T Plus
Multiuser-multiprogramming **Memory:** 512K to 1M **CPU:** Z80A; 80186 **Clock:** 4; 8 MHz **Users:** 12 **Interface(s):** RS-232C; RS-449/422; Centronics **Introduced:** 1985 **Cost:** $7,495

☐ Tele-PC Plus/Tele-XT Plus
Single-user **Memory:** 256K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Color; Monochrome; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1984 **Cost:** $2,995-$4,495

☐ TeleColor-PC
Single-user **Memory:** 256K **CPU:** 8088 **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Cost:** $2,995

☐ TeleColor-XT
Single-user **Memory:** 256K **CPU:** 8088 **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Cost:** $4,595

☐ TeleVideo-AT
Multiuser-multiprogramming **Memory:** 640K **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; 320 or 640 X 200 or 400 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985

TELEX COMPUTER PRODUCTS, INC.

(subsidiary of Telex Corp.)

☐ Telex 1260
Single-user; Multiuser-multiprogramming **Memory:** 256K to 640K **CPU:** 80186 **Clock:** 8 MHz **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985

☐ Telex 1280
Single-user **Memory:** 512K to 2.1M **CPU:** 80286 **Clock:** 6 MHz **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1985

TEXAS INSTRUMENTS

☐ Business-Pro
Multiuser-multiprogramming **Memory:** 512K to 15M **CPU:** 80286 **Clock:** 6 MHz **Users:** 8 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 300 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985 **Cost:** $3,995-$10,785

☐ Business-Pro XENIX System
Multiuser-multiprogramming **Memory:** 15M **CPU:** 80286 **Features:** Adjustable screen position; Non-glare screen **Graphics:** Monochrome; Color **Cost:** $9,935-$12,180

☐ Professional Computer
Single-user **Memory:** 128K to 768K **CPU:** 8088 **Clock:** 5 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Adjustable screen position; Low-profile keyboard **Graphics:** Monochrome; Color; 720 X 300 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1983 **Cost:** $2,395-$5,505

TOSHIBA AMERICA, INC.
Information Systems Division

☐ T300
Single-user **Memory:** 192K to 512K **CPU:** 8088 **Clock:** 6 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 500 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1983 **Cost:** $1,650-$2,395

TOWER SYSTEMS INDUSTRIES (T.S.I.)

☐ PC-TOWER/AT
Multiuser-multiprogramming **Memory:** 1M to 16M **CPU:** 80286 **Clock:** 6; 8; 10 MHz **Users:** 64 **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 1,024 X 1,024 pixels **Interface(s):** 2 RS-232C; Centronics **Units sold:** 500 since 1984

☐ PC-TOWER/ET
Multiuser-multiprogramming **Memory:** 4M to 16M **CPU:** 80386 **Clock:** 20 MHz **Interface(s):** RS-232C; Parallel **Introduced:** 1986

☐ PC-TOWER/XT
Multiuser-multiprogramming **Memory:** 640K **CPU:** 8088 **Clock:** 4.77 MHz **Users:** 64 **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 1,024 X 1,024 pixels **Interface(s):** 2 RS-232C; Centronics **Units sold:** 2,000 since 1983

☐ TSI Desktop/AT Computer
Single-user **Memory:** 640K **CPU:** 80286 **Clock:** 8 MHz **Features:** Detachable keyboard **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Units sold:** 1,200 since 1984 **Cost:** $1,295 and up

☐ TSI Desktop/XT Computer
Single-user **Memory:** 640K **CPU:** 8088 **Clock:** 4.77 MHz **Features:** Detachable keyboard **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1983 **Cost:** $695 and up

☐ TSI Workstation-AT
Single-user **Memory:** 1M to 3M **CPU:** 80286 **Clock:** 6; 8 MHz **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 1,024 X 1,024 pixels **Interface(s):** RS-232C; Centronics **Units sold:** 1,000 since 1985 **Cost:** $1,495-$2,195

☐ TSI Workstation-XT
Single-user **Memory:** 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 1,024 X 1,024 pixels **Interface(s):** RS-232C; Centronics **Units sold:** 1,500 since 1984

TRIEX TECHNOLOGY

☐ PC11 XT TURBO
Multiuser-multiprogramming **Memory:** 640K **CPU:** 8088 **Clock:** 4.77; 6.77 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Cost:** $1,365-$2,235

☐ Triex PC2/XT
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Cost:** $1,065-$1,935

TRIGEM COMPUTER, INC.

☐ TriGem 88
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 348 pixels **Interface(s):** RS-232C; Parallel

UNILOGIC, INC.

☐ ZEuS PC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1983

☐ ZEuS V.I. PC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1983 **Cost:** $6,345-$7,245

☐ ZEuS XPC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1983

☐ ZEusMate
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 720 X 348 pixels **Interface(s):** RS-232C; Parallel **Introduced:** 1985

UNITEX CO.

☐ Unitex AT
Single-user **Memory:** 512K to 1M **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1986

☐ Unitex PC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $595-$995

☐ Unitex TURBO
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1986

UNITRON COMPUTER USA, INC.

☐ U-2900ST
Single-user **Memory:** 640K **CPU:** 8088-2 **Graphics:** Monochrome; Color **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1986

☐ U-3600
Single-user **Memory:** 640K **CPU:** 80186 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986

☐ U-3900
Single-user **Memory:** 1M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986

VICTOR TECHNOLOGIES, INC.

☐ Victor VI
Single-user **Memory:** 256K to 1M **CPU:** 8088 **Clock:** 5 MHz **Display:** 25 lines X 80 or 40 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 400 X 800; 320 X 200; 640 X 200 pixels **Interface(s):** 2 RS-232C; Parallel; Centronics **Introduced:** 1985

☐ Victor VPC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 or 40 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Color; Monochrome; 560 X 240 pixels **Introduced:** 1985 **Cost:** $1,995-$4,295

☐ Victor VPC II
Single-user **Memory:** 640K **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,095

WANG LABORATORIES, INC.

☐ Advanced Professional Computer
Multiuser-multiprogramming **Memory:** 512K to 2M **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Centronics **Units sold:** 7,500 since 1985 **Cost:** $3,990-$18,000

☐ Professional Computer
Single-user **Memory:** 256K to 768K **CPU:** 8086 **Clock:** 8 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Mouse **Graphics:** Monochrome; Color; 800 X 300; 640 X 225; 320 X 200 pixels **Interface(s):** RS-232C; Centronics **Units sold:** 200,000 since 1982 **Cost:** $2,220-$7,265

WELLS AMERICAN

☐ A Star
Multiuser-multiprogramming **Memory:** 256K to 1M **CPU:** 80286 **Graphics:** Monochrome **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $1,495-$2,495

WESTERN COMPUTER

☐ Western AT 286 Turbo
Single-user **Memory:** 1M **CPU:** 80286 **Clock:** 6; 8 MHz **Interface(s):** 2 RS-232C; Centronics **Introduced:** 1986 **Cost:** $2,175-$2,795

☐ Western XT Turbo
Single-user **Memory:** 640K to 1M **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Interface(s):** RS-232C; Centronics **Cost:** $1,325-$1,850

WYSE TECHNOLOGY

☐ WY-1100-1, 2
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Users:** 1 **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Numeric keypad **Graphics:** Monochrome; Color; 640 or 320 X 200 pixels **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1984 **Cost:** $1,264-$2,370

☐ WYSEpc Family
Single-user **Memory:** 256K-640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Adjustable screen position **Graphics:** Monochrome; Color; 640 or 320 X 200 pixels **Interface(s):** 2 RS-232C; Parallel **Introduced:** 1984 **Cost:** $1,225-$2,310

☐ WYSEpc 286 WY-2200-01, 20, 40
Multiuser-multiprogramming **Memory:** 640K **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $2,499-$4,199

XEROX CORP.

☐ 6085 Professional Computer System
Memory: 640K to 3M **CPU:** 8088 **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** RS-232C; Parallel **Introduced:** 1986

ZENITH DATA SYSTEMS
(subsidiary of Zenith Electronics Corp.)

☐ Z-148
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77; 8 MHz **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 or 320 X 200 pixels **Introduced:** 1985 **Cost:** $1,299-$1,499

☐ Z-158 PC
Single-user **Memory:** 256K to 10M **CPU:** 8088 **Clock:** 4.77; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 or 320 X 200 pixels **Introduced:** 1985 **Cost:** $1,999-$2,799

☐ Z-200 Advanced PC
Multiuser-multiprogramming **Memory:** 512K to 1.5M **CPU:** 80286 **Clock:** 6 MHz **Users:** 16 **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color **Introduced:** 1985 **Cost:** $3,499-$4,499

Z-NIX CO., INC.

☐ Z-NIX PC
Single-user **Memory:** 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 or 320 X 200 pixels **Interface(s):** RS-232C; Parallel

PORTABLE/HAND-HELD

AMERICAN MICRO TECHNOLOGY

☐ Associate
Single-user **Memory:** 512K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Weight:** 9 lbs. **Introduced:** 1986

AMERICAN MITAC CORP.

☐ VISO
Single-user **Memory:** 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Function keys; Adjustable screen position **Graphics:** Color **Interface(s):** 2 RS-232C; 1 Centronics **Weight:** 9 lbs. **Introduced:** 1986

AMQ COMPUTER CORP.

☐ Amqute AT286
Single-user **Memory:** 704K **CPU:** 8088 **Graphics:** Color **Interface(s):** RS-232C; Parallel **Weight:** 27 lbs. **Introduced:** 1984 **Cost:** $4,995

APRICOT, INC.

☐ Apricot FP
Single-user **Memory:** 512K to 1M **CPU:** 8086 **Clock:** 5 MHz **Display:** 25 lines X 80 chars. (LCD) **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; Infrared mouse; Voice recognition **Graphics:** Monochrome; Color; 640 X 200 or 256 pixels **Interface(s):** RS-232C; Centronics **Weight:** 13 lbs. **Introduced:** 1984

BONDWELL, INC.

☐ Bondwell 18
Memory: 512K **CPU:** 8088 **Clock:** 4.7 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Centronics **Weight:** 29 lbs. **Introduced:** 1986

☐ Bondwell 8
Single-user **Memory:** 512K **CPU:** 80C88 **Graphics:** Monochrome **Interface(s):** RS-232C; Centronics **Weight:** 10 lbs. **Introduced:** 1986

CANON U.S.A., INC.

☐ A-200 Transportable
Single-user **Memory:** 512K to 640K **CPU:** 80C88 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** RS-232C; Centronics **Weight:** 19 lbs. **Introduced:** 1985 **Cost:** $2,295

COMPAQ COMPUTER CORP.

☐ COMPAQ PLUS
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 320/640 X 200 pixels **Interface(s):** Parallel; RS-232C; RS-449/422 **Weight:** 31.6 lbs. **Introduced:** 1983

☐ COMPAQ Portable Computer
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Numeric keypad; Function keys; Direct cursor addressing; Non-glare screen **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel; RS-449/422 **Weight:** 31.3 lbs. **Introduced:** 1982

☐ COMPAQ Portable II PC Model 1
Single-user **Memory:** 256K to 640K **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 640 X 200 pixels **Interface(s):** Parallel **Weight:** 23.6 lbs. **Introduced:** 1986

☐ COMPAQ Portable II PC Model 2
Single-user **Memory:** 256K to 640K **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 640 X 200 pixels **Interface(s):** Parallel **Weight:** 25.6 lbs. **Introduced:** 1986

☐ COMPAQ Portable II PC Model 3
Reviewed Jun 1986 p. 31.
Single-user **Memory:** 256K to 640K **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 640 X 200 pixels **Interface(s):** Parallel **Weight:** 23.6 lbs. **Introduced:** 1986

☐ COMPAQ Portable 286 Model 1
Multiuser-multiprogramming **Memory:** 256K to 2.7M **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars **Features:** Numeric keypad; Function keys; Direct cursor addressing; Non-glare screen **Graphics:** Monochrome; Color **Interface(s):** Parallel **Weight:** 30.5 lbs. **Introduced:** 1985

☐ COMPAQ Portable 286 Model 2
Multiuser-multiprogramming **Memory:** 256K to 2.7M **CPU:** 80286 **Clock:** 6; 8 MHz **Display:** 25 lines X 80 chars. **Features:** Numeric keypad; Function keys; Direct cursor addressing; Non-glare screen **Graphics:** Monochrome; Color **Interface(s):** Parallel **Weight:** 33 lbs. **Introduced:** 1985

CORDATA

☐ AT Portable Q
Single-user **Memory:** 512K **CPU:** 80286 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; 640 X 400 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1985

☐ AT Portable Q20
Single-user **Memory:** 512K **CPU:** 80286 **Graphics:** Monochrome **Interface(s):** RS-232C; Parallel **Introduced:** 1985

☐ Portable PC 400
Single-user **Memory:** 512K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; 640 x 400 pixels **Interface(s):** 1 RS-232C; 1 Centronics **Introduced:** 1984

☐ Portable PC 400 Model 205
Single-user **Memory:** 512K **CPU:** 8088 **Graphics:** Monochrome **Interface(s):** RS-232C; Centronics **Weight:** 38 lbs. **Introduced:** 1984

☐ Portable PC-XT
Single-user **Memory:** 256K to 512K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; 640 X 400 pixels **Interface(s):** RS-232C; Centronics **Introduced:** 1984

CORVUS OEM GROUP

☐ OTI-3
Multiuser-multiprogramming **Memory:** 640K to 1M **CPU:** 80286 **Clock:** 8 MHz **Weight:** 33 lbs. **Introduced:** 1985 **Cost:** $1,895-$3,495

DATA GENERAL CORP.

☐ Data General One
Single-user **Memory:** 128K to 512K **CPU:** 80C88 **Clock:** 4 MHz **Display:** 25 lines X 80 chars. (LCD) **Features:** Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 256 pixels **Interface(s):** RS-232C; RS-449/422 **Weight:** 12 lbs. **Introduced:** 1984

☐ Data General One Model 2
Single-user **Memory:** 256K to 640K **CPU:** 80C88 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel; RS-422 **Weight:** 10.5; 11.5 lbs. **Cost:** $1,795 (LCD screen); $2,795 (EL screen)

DATAVUE

☐ Datavue 25
Single-user **Memory:** 128K to 640K **CPU:** 80C88 **Graphics:** Monochrome **Interface(s):** RS-232C; Centronics **Weight:** 12.1 lbs. **Introduced:** 1984 **Cost:** $1,695-$3,495

DELTA DATA SYSTEMS CORP.

Service Division

☐ Tote PC Tempest
Single-user **Memory:** 128K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 640 X 200 pixels **Interface(s):** RS-232C; Parallel; RS-422; Mil Std. 188-C; Mil Std. 188-144 **Weight:** 38 lbs. **Introduced:** 1985

ENGEBRETSEN ENGINEERING

☐ PC-3
Single-user **Memory:** 64K to 256K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** 2 RS-232C; Parallel

GOLDEN STAR TECHNOLOGY, INC.

☐ G.S.T. PC/XT
Single-user **Memory:** 640K **CPU:** 8088 **Interface(s):** RS-232C; Parallel **Introduced:** 1986

GRID SYSTEM CORP.

☐ Grid Case 1
Single-user **Memory:** 128K to 512K **CPU:** 80C86 **Clock:** 5 MHz **Display:** 25 lines X 80 chars. (LCD) **Features:** Function keys **Graphics:** Monochrome **Interface(s):** RS-232C; Centronics; RS-422; PC-10 Bus **Weight:** 12 lbs. **Introduced:** 1985 **Cost:** $2,975

☐ Grid Case 2
Single-user **Memory:** 128K to 512K **CPU:** 8086 **Clock:** 5 MHz **Display:** 25 lines X 80 chars. (LCD) **Features:** Function keys **Graphics:** Monochrome **Interface(s):** RS-232C; Centronics; PC-10 Bus **Weight:** 12 lbs. **Cost:** $3,150

☐ Grid Case 3
Single-user **Memory:** 128K to 512K **CPU:** 8086 **Clock:** 5 MHz **Display:** 25 lines X 80 chars. plasma **Graphics:** Monochrome **Interface(s):** RS-232C; Centronics; RS-422; PC-10 Bus **Weight:** 12 lbs. **Introduced:** 1985 **Cost:** $4,350

HEWLETT-PACKARD CO.

☐ HP 110, The Portable
Single-user **Memory:** 272K **CPU:** 80C86 **Clock:** 5.3 MHz **Display:** 16 lines X 80 chars. **Features:** Function keys **Graphics:** Monochrome; 128 X 480 pixels **Interface(s):** RS-232C; HPIL **Weight:** 8.7 lbs. **Introduced:** 1984

☐ HP 94
Single-user **Memory:** 64K to 256K **CPU:** 80C88 **Interface(s):** RS-232C **Introduced:** 1986

☐ Portable PLUS
Memory: 256K to 1M **CPU:** 80C86 **Clock:** 5.33 MHz **Display:** 25 lines x 80 chars. (LCD) **Features:** Non-glare screen; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 200 X 480 pixels **Interface(s):** RS-232C; HPIL, HPIB **Weight:** 9 lbs. **Introduced:** 1985 **Cost:** $2,695-$3,880

I.Q. COMPUTER CORP.

☐ IQ 9242C
Single-user **Memory:** 640K **CPU:** 80186 **Interface(s):** RS-232C; Centronics **Weight:** 15 lbs. **Introduced:** 1985

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ PC Convertible
Single-user **Memory:** 128K to 512K **CPU:** 80C88 **Clock:** 4.77 MHz **Display:** 25 lines X 80 or 40 chars. **Features:** Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 or 320 X 200 pixels **Interface(s):** RS-232C; Parallel **Weight:** 12.2 lbs. **Introduced:** 1986

☐ Portable PC 5155 Model 68
Single-user **Memory:** 256K to 512K **CPU:** 8088 **Display:** 25 lines X 80 chars. **Graphics:** Monochrome; Color **Weight:** 30 lbs. **Introduced:** 1984 **Cost:** $2,595

INTERNATIONAL SYSTEMS MARKETING, INC. (ISM)

☐ ISM Express PC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Graphics:** Color **Interface(s):** RS-232C; Parallel **Weight:** 35 lbs. **Introduced:** 1985

☐ ISM Express XT
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Graphics:** Color **Interface(s):** RS-232C; Parallel **Weight:** 35 lbs. **Introduced:** 1985 **Cost:** $3,995-$4,995

☐ ISM Express 286
Single-user **Memory:** 512K to 1M **CPU:** 80286 **Interface(s):** RS-232C; Parallel **Weight:** 35 lbs. **Introduced:** 1986

☐ ISM Express 286 Plus
Single-user **Memory:** 512K to 1M **CPU:** 80286 **Graphics:** Color **Interface(s):** RS-232C; Parallel **Weight:** 35 lbs. **Introduced:** 1986

JONOS INTERNATIONAL, INC.

☐ I4100
Single-user; Foreground-background **Memory:** 256K **CPU:** 8088 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** 2 RS-232C; Parallel; STDBUS **Weight:** 7.25 lbs. **Introduced:** 1984 **Cost:** $3,695

☐ I4300
Single-user; Foreground-background **Memory:** 256K **CPU:** 8088 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** 2 RS-232C; Parallel; STDBUS **Introduced:** 1984 **Cost:** $3,895

☐ I4500
Single-user; Foreground-background **Memory:** 256K **CPU:** 8088 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** 2 RS-232C; Parallel; STDBUS **Introduced:** 1984 **Cost:** $5,995

☐ I4550
Single-user; Foreground-background **Memory:** 256K **CPU:** 8088 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** 2 RS-232C; Parallel; STDBUS **Introduced:** 1984 **Cost:** $6,295

☐ I4700
Single-user; Foreground-background **Memory:** 256K **CPU:** 8088 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** 2 RS-232C; Parallel; STDBUS **Introduced:** 1984 **Cost:** $5,695

☐ I4750
Single-user; Foreground-background **Memory:** 256K **CPU:** 8088 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome **Interface(s):** 2 RS-232C; Parallel; STDBUS **Introduced:** 1984 **Cost:** $5,995

KAYPRO CORP.

☐ Kaypro 16
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Weight:** 35 lbs. **Introduced:** 1984

☐ Kaypro 2000
Single-user **Memory:** 256K to 760K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. (LCD) **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing; 640 X 200 pixels **Interface(s):** RS-232C **Weight:** 11.5 lbs. **Introduced:** 1985

MELARD TECHNOLOGIES, INC.

☐ ACCESS
Single-user **Memory:** 56K to 120K **Display:** 8 lines X 40 chars. **Features:** Function keys; Direct cursor addressing **Graphics:** Monochrome; 64 X 240 pixels **Interface(s):** RS-232C **Cost:** $499-$995

NATIONAL DATACOMPUTER

☐ Datacomputer
Single-user **Memory:** 64K to 256K **CPU:** 8088 **Interface(s):** RS-232C **Weight:** 2.5 lbs. **Introduced:** 1985 **Cost:** $1,795-$2,995

OMNI-SERVE, INC.

☐ Chameleon
Single-user **Memory:** 128K to 640K **CPU:** Z80A; 8088 **Clock:** 2.5; 5 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; (color) 320 X 200 pixels **Interface(s):** 2 RS-232C; Parallel **Weight:** 28 lbs. **Introduced:** 1982 **Cost:** $1,695

☐ Chameleon Plus
Single-user **Memory:** 256K to 640K **CPU:** Z80A; 8088 **Clock:** 2.5; 5 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; (color) 320 X 200 pixels **Interface(s):** 2 RS-232C; Parallel **Weight:** 28 lbs. **Introduced:** 1983 **Cost:** $2,195

POLYMATHIC COMPUTER CORP.

☐ Polymathic Portable Computer
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986

ROCKY MOUNTAIN TRADING CO.
Systems Division

☐ Portable Powerhouse
Single-user **Memory:** 128K to 704K **CPU:** 8088; 8088-2 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Adjustable screen position; Non-glare screen; Numeric keypad; Function keys; Direct cursor addressing; Detachable keyboard **Graphics:** Monochrome; 640 X 400 or 200 pixels **Interface(s):** RS-232C; 1 Centronics **Units sold:** 8 since 1984 **Cost:** $2,995-$10,000

SANYO BUSINESS SYSTEMS CORP.
(Computer Division)

☐ MBC-675
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** Centronics; RS-232C **Units sold:** 7,000 since 1985

☐ MBC-675/HD-20
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** RS-232C; Centronics **Weight:** 25 lbs. **Introduced:** 1985

☐ MBC-775-e
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Display:** 25 lines X 40 or 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Color; 640 X 200 pixels **Interface(s):** Centronics **Units sold:** 5,000 since 1985

☐ MBC-775/HD-20
Single-user **Memory:** 256K to 640K **CPU:** 8088-2 **Clock:** 4.77; 8 MHz **Display:** 25 lines X 80 chars. **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** Centronics **Weight:** 35 lbs. **Introduced:** 1985

SHARP ELECTRONICS CORP.
Systems Division

☐ PC-5000
Single-user **Memory:** 128K to 320K **CPU:** 8088 **Clock:** 4 MHz **Display:** 8 lines X 80 chars. (LCD) **Features:** Adjustable screen position; Function keys **Graphics:** Monochrome; 640 X 80 pixels **Interface(s):** RS-232C **Introduced:** 1983

☐ PC-7000
Single-user **Memory:** 320K to 704K **CPU:** 8086 **Clock:** 7.37; 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard **Graphics:** Monochrome; Color; 640 X 200; 320 X 200 (color) pixels **Interface(s):** RS-232C; Centronics **Weight:** 18.8 lbs. **Introduced:** 1985 **Cost:** $1,795

STM ELECTRONICS CORP.

☐ Pied Piper I
Single-user **Memory:** 64K **CPU:** Z80A **Clock:** 4 MHz **Display:** 24 lines X 80 chars. (monitor); 24 lines X 40 chars. (TV) **Graphics:** Monochrome **Interface(s):** Parallel; STDBUS **Weight:** 12.5 lbs. **Introduced:** 1982 **Cost:** $799

☐ STM PC
Single-user **Memory:** 256K to 512K **CPU:** 80186 **Clock:** 8 MHz **Display:** 25 lines X 80 chars. (LCD) **Features:** Detachable keyboard; Numeric keypad; Function keys **Graphics:** Monochrome; Color; 640 X 200 pixels (LCD) or 720 X 350 pixels **Interface(s):** 2 RS-232C; Centronics **Weight:** 17 lbs. **Introduced:** 1984

TALBOTT DEVELOPMENT CORP.

☐ Portable AT
Single-user **Memory:** 640K **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $640

☐ Portable XT
Single-user **Memory:** 640K **CPU:** 8088 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Introduced:** 1986 **Cost:** $640

TANDY/RADIO SHACK

☐ Tandy 600 (26-3901)
Single-user **Memory:** 32K to 224K **CPU:** 80C88 **Clock:** 3.07 MHz **Display:** 16 lines X 80 chars. **Graphics:** Monochrome; 240 X 128 pixels **Interface(s):** RS-232C; Parallel **Weight:** 11 lbs. **Introduced:** 1985

TAVA U.S.A., INC.

☐ TAVA Gold Series Transportable Executive
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.75 MHz **Display:** 25 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 720 X 350; 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Weight:** 8 lbs.

☐ TAVA Triumph LT
Single-user **Memory:** 256K to 640K **CPU:** 80186 **Clock:** 4.75 MHz **Display:** 25 lines X 80 chars. (LCD) **Features:** Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Weight:** 15 lbs. **Units sold:** 5,000 since 1985

TELEVIDEO SYSTEMS, INC.

☐ TPC II
Single-user **Memory:** 256K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 24 lines X 80 chars. **Features:** Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Color; Monochrome; 320 or 640 X 200 pixels **Interface(s):** RS-232C; Centronics **Weight:** 28 lbs. **Introduced:** 1984 **Cost:** $2,095 (1 drive); $2,395 (2 drives)

☐ TPC IIS; TPC IID
Memory: 256K **CPU:** 8088 **Clock:** 5 MHz **Features:** Adjustable screen position; Non-glare screen; Detachable keyboard; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200; 300 X 200 pixels **Interface(s):** RS-232C; Parallel **Cost:** $2,095-$2,395

TOSHIBA AMERICA, INC.
Information Systems Division

☐ T1100
Single-user **Memory:** 512K to 720K **CPU:** 8088 **Display:** 25 lines X 80 chars. **Features:** Non-glare screen; Numeric keypad; Function keys; Direct cursor addressing **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** Parallel **Weight:** 9 lbs. **Cost:** $1,999

☐ T1100 Plus
Single-user **Memory:** 256K to 640K **CPU:** 80C88 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Weight:** 9.15 lbs. **Introduced:** 1986 **Cost:** $1,999-$2,399

☐ T3100
Single-user **Memory:** 640K **CPU:** 80286 **Graphics:** Monochrome; Color **Interface(s):** RS-232C; Parallel **Weight:** 15 lbs. **Introduced:** 1986

TOWER SYSTEMS INDUSTRIES (T.S.I.)

☐ TSI Portable Computer (XT/AT compatible)
Single-user **Memory:** 1M **CPU:** 8088; 80286 **Clock:** 4.77; 8 MHz **Features:** Detachable keyboard **Interface(s):** RS-232C; Parallel **Weight:** 29 lbs. **Introduced:** 1985 **Cost:** $895 and up

ZENITH DATA SYSTEMS
(subsidiary of Zenith Electronics Corp.)

☐ Z-171 PC
Single-user **Memory:** 256K to 640K **CPU:** 8088 **Clock:** 4.77 MHz **Display:** 25 lines X 80 chars. **Features:** Function keys; Direct cursor addressing; LCD screen **Graphics:** Monochrome; Color; 640 X 200 pixels **Interface(s):** RS-232C; Parallel **Weight:** 14.3 lbs. **Introduced:** 1985 **Cost:** $2,399

GRAPHICS EQUIPMENT

DIGITIZERS

ALTEK CORP.

☐ AC 30 DATATAB Controller
Input: Tablet **Resolution:** 0.001 inches **Accuracy:** (±)0.005; 0.001; 0.01 inch **Repeatability:** 0.001 inch **Support equip:** Cables **Units sold:** 300 since 1984 **Cost:** $450

☐ AC 35 PC DATATAB Controller
Input: Tablet **Resolution:** 0.001 inches **Accuracy:** (±)0.005; 0.003; 0.010 inch **Repeatability:** 0.001 inch **Support equip:** Cables; Software **Introduced:** 1986

☐ AC 40 DATATAB Controller
Input: Tablet **Includes:** Digitizer **Resolution:** 0.001 inch **Accuracy:** 0.005; 0.003; 0.01 inch **Repeatability:** 0.001 inch **Firmware avail.:** Scaling; Translation; Rotation; Length and area calculations **Support equip:** Cables **Units sold:** 150 since 1984 **Cost:** $900 and up

☐ DATATAB Table/Tablet
Technology: Electromagnetic **Input:** Cursor **Resolution:** 0.001 inch **Accuracy:** 0.003; 0.005; 0.01 inch **Repeatability:** 0.001 inch **Support equip:** Cables; Software **Units sold:** 3,000 since 1978 **Cost:** $1,300 and up

☐ 60" X 90" Digitizer; 42" X 130" Digitizer
Resolution: 0.001 inches **Accuracy:** (±)0.005; (±)0.01 inch **Repeatability:** 0.001 inch **Support equip:** Cables

CALCOMP
(subsidiary of Sanders Associates, Inc.)

☐ Model 9100
Technology: Tablet or table; Electromagnetic **Input:** Cursor; Stylus **Resolution:** 1,000 lines/inch **Accuracy:** (±) 0.005 inch **Software supported:** CAD/CAM applications **Units sold:** 1,500 since 1984 **Cost:** $3,000-$10,000

☐ 2000 Series
Technology: Electromagnetic **Input:** Cursor; Stylus **Resolution:** 200 lines/inch **Accuracy:** (±) 0.025 inch **Software supported:** Business applications; CAD/CAM applications **Units sold:** 30,000 since 1982 **Cost:** $726

☐ 2200 Series
Technology: Electromagnetic **Input:** Cursor; Stylus **Software supported:** Business applications; CAD/CAM applications **Introduced:** 1986 **Cost:** $695-$1,100

☐ 2500 Series
Technology: Electromagnetic **Input:** Cursor; Stylus **Resolution:** 200 to 1,000 lines/inch **Accuracy:** (±)0.025 inch **Software supported:** Business applications; CAD/CAM applications **Introduced:** 1985 **Cost:** $1,000-$1,375

CHORUS DATA SYSTEMS

☐ CA-1600
Technology: Camera **Input:** Camera **Color:** supported **Support equip:** Software **Software supported:** Video production applications **Cost:** $1,495

☐ PC-EYE Series 1000
Technology: Raster display **Input:** Camera; VCR **Resolution:** 640 X 512 matrix **Color:** supported **Maximum colors:** 16.8M in palette; 256 displayable **Support equip:** Software **Software supported:** High-level languages; Operating system; Scientific or medical applications; CAD/CAM applications; Graphic arts; Communications; Data base management applications **Units sold:** 1,500 since 1984 **Cost:** $495

☐ PC-EYE Series 1500 Video Frame Grabbers
Technology: Video **Input:** Video **Resolution:** 256 X 256; 768 or 640 X 512 **Color:** supported **Introduced:** 1986 **Cost:** $1,295-$2,495

COLORADO VIDEO, INC.

☐ 270A Video Digitizer
Input: Keyboard **Resolution:** 512 X 512 **Introduced:** 1977 **Cost:** $4,500

☐ 491 Video Frame Store
Input: Keyboard; Button device **Resolution:** 512 X 512 **Support equip:** Interface card **Introduced:** 1984 **Cost:** $5,000-$7,000

COMPOSITION TECHNOLOGY INTERNATIONAL (CTI)

☐ PageScan 200
Technology: Flatbed; Raster display; Camera **Input:** Keyboard; Mouse **Resolution:** 200 dots/inch **Support equip:** Cables; Software; Controller card **Software supported:** Typesetting applications **Units sold:** 200 since 1984 **Cost:** $3,995

☐ PageScan 300
Technology: Flatbed; Raster display; Camera **Input:** Keyboard; Mouse **Resolution:** 300 dots/inch **Support equip:** Cables; Software; Controller card **Software supported:** Typesetting applications **Units sold:** 200 since 1984 **Cost:** $4,995

COMPUTER TALK, INC.

☐ 600 Cursor Digitizer
Technology: Tablet or table; 12 X 18 to 63 X 86 inches **Input:** Cursor **Includes:** Plotter or hard copy device **Resolution:** 0.0025 to 0.001 inch **Accuracy:** 0.01-0.005 inch **Repeatability:** (±) 0.005 inch **Software supported:** High-level languages; Scientific or medical applications; CAD/CAM applications; Engineering applications **Units sold:** 47 since 1980 **Cost:** $2,594-$16,000

DATACOPY CORP.

☐ Model 620/620F
Technology: CCD Camera **Resolution:** 3,456 X 4,472 pixels **Accuracy:** (±) 0.0005 inch **Color:** supported **Capability:** 3D **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications; Word Image Processing System **Introduced:** 1985 **Cost:** $11,950-$13,950

☐ 322 Electronic Digitizing Camera
Technology: Camera **Resolution:** 1,720 X 2,592 X 256 **Color:** supported **Capability:** 3D **Introduced:** 1982 **Cost:** $7,850

☐ 610 Electronic Digitizing Camera
Technology: Camera **Resolution:** 1,728 X 2,846 pixels **Color:** supported **Capability:** 3D **Software supported:** CAD/CAM applications; Word Image Processing System **Units sold:** 150 since 1983 **Cost:** $7,850

ECRM

☐ Autokon 1000
Technology: Laser scanner **Input:** Control panel **Resolution:** 1,016 to 2,032 lines/inch **Accuracy:** (±) 0.01 inch **Units sold:** 200 since 1984 **Cost:** $50,000

EIKONIX CORP.
(a Kodak Co.)

☐ E-Z SCAN Model 4434
Technology: Flatbed **Input:** Keyboard; Tablet; Camera **Resolution:** 110 lines/inch **Accuracy:** (±) 0.00001 inch **Color:** supported **Support equip:** Cables; Software **Software supported:** Operating system **Introduced:** 1985 **Cost:** $35,000

☐ Series 78/99
Technology: Flatbed **Input:** Keyboard; Tablet; Camera **Resolution:** 50-1,694 lines/inch **Accuracy:** (±) 0.00001 inch **Color:** supported **Maximum colors:** Up to 16M in palette **Support equip:** Cables; Software **Software supported:** Operating system **Introduced:** 1982 **Cost:** $18,500

☐ Series 785
Technology: Flatbed **Input:** Keyboard; Tablet; Camera **Resolution:** 409-8,192 lines/inch **Accuracy:** (±) 0.00001 inch **Color:** supported **Maximum colors:** Up to 16M in palette **Software supported:** Operating system **Introduced:** 1981 **Cost:** $89,500

☐ Series 850
Technology: Flatbed **Input:** Keyboard; Tablet; Camera **Resolution:** 50-3,600 lines/inch **Accuracy:** (±) 0.00001 inch **Color:** supported **Maximum colors:** Up to 16M in palette **Support equip:** Cables; Software **Software supported:** Operating system **Introduced:** 1984 **Cost:** $18,500

ELECTRONIC INFORMATION TECHNOLOGY, INC.

☐ PS 2000
Input: Keyboard **Resolution:** 300 dots/inch **Color:** supported **Introduced:** 1986 **Cost:** $2,495

ELOGRAPHICS

☐ E230
Technology: Tablet or table **Accuracy:** 0.08-0.18 inch **Introduced:** 1972 **Cost:** $600

GENTIAN ELECTRONICS, LTD.

☐ Hi-State
Technology: Tablet or table **Input:** Keyboard; Cursor **Resolution:** 0.0008 inch **Accuracy:** (±) 0.003; 0.005; 0.01 inch **Repeatability:** (±) 0.001 inch **Firmware avail.:** Area; Volume and length calculations; Document de-skewing; Coordinate transformation applications **Support equip:** Cables **Software supported:** High-level languages; Operating system; Business applications; Scientific or medical applications; CAD/CAM applications **Units sold:** 270 since 1979 **Cost:** $3,155; Lease (mo.) —$315

GEOGRAPHICS

☐ Clamp-On Drafting Board Digitizer
Technology: Tablet or table **Input:** Keyboard; Cursor; Footswitch; Puck **Resolution:** 100; 200; 400; 800 lines/inch **Support equip:** Cables; Software **Software supported:** High-level languages; Operating system; Business applications; Scientific or medical applications; CAD/CAM applications; Engineering and mapping applications **Introduced:** 1985 **Cost:** $3,000

GTCO CORP.

☐ Digi-Pad A Series
Technology: Tablet or table; Electromagnetic scanning; 11 X 11 to 42 X 60 inches **Input:** Cursor; Stylus; Pressure pen **Resolution:** 0.001 **Accuracy:** (±) 0.005; 0.003 inch **Repeatability:** (±) 0.0005 inch **Software supported:** High-level languages; CAD/CAM applications; Mapping; Image analysis applications

☐ Graphic Analysis Package 1
Input: Cursor; Stylus **Resolution:** 0.001 inch **Introduced:** 1982

☐ Micro Digi-Pad
Technology: Tablet or table; Electromagnetic scanning; 6 X 6 and 12 X 12 inches **Input:** Cursor; Stylus **Resolution:** 0.005 inch **Repeatability:** 0.0025 inch **Introduced:** 1983

HITACHI AMERICA, LTD.
DGPP Division

☐ DIGITIGER
Input: Cursor; Stylus **Resolution:** 0.001 inch **Accuracy:** (±) 0.005 inch

☐ HICOMSCAN Line
Technology: Tablet or table; Electromagnetic inductive **Input:** Cursor; Stylus **Includes:** Plotter or hard copy device **Resolution:** 1,000 lines/inch **Accuracy:** (±) 0.005 inch **Units sold:** 1,500 since 1981 **Cost:** $700-$8,500

☐ Tiger Tablet HDG-1111
Technology: Tablet or table; 11 X 11 inches; Electromagnetic inductive **Input:** Cursor; Stylus **Includes:** Plotter or hard copy device **Resolution:** 0.001 inch **Accuracy:** (±) 0.01 inch

☐ Tiger Tablet II
Technology: Tablet or table **Input:** Cursor; Stylus **Resolution:** 0.001 inch **Accuracy:** (±) 0.01 inch **Repeatability:** (±) 0.0015 inch **Introduced:** 1984

HOUSTON INSTRUMENT
(division of AMETEK, Inc.)

☐ HIPAD DT-11; DT-114
Technology: Tablet or table; Electromagnetic **Input:** Button device; Cursor; Stylus **Resolution:** 0.005 inch or 0.01 inch (selectable) **Accuracy:** (±) 0.015 inch **Steps/inch:** 200 **Software supported:** CAD/CAM applications **Introduced:** 1979 **Cost:** $840-$920

☐ Series 7000
Technology: Tablet or table; Electromagnetic **Input:** Cursor; Stylus **Resolution:** 0.001 inch **Accuracy:** (±) 0.005 inch **Repeatability:** (±) 0.001 inch **Steps/inch:** 1,000 **Software supported:** CAD/CAM applications **Introduced:** 1981 **Cost:** $3,800-$6,750

☐ True Grid 1005
Technology: Electromagnetic **Input:** Button device; Cursor; Stylus **Resolution:** 0.005 inches **Accuracy:** (±) 0.015 inch **Steps/inch:** 200 **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1985 **Cost:** $385

☐ True Grid 1011
Technology: Electromagnetic **Input:** Button device; Cursor; Stylus **Resolution:** 0.005 inches **Accuracy:** (±) 0.015 inch **Steps/inch:** 200 **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1985 **Cost:** $685

☐ True Grid 8011
Technology: Electromagnetic **Input:** Button device; Cursor **Resolution:** 0.001 inches **Accuracy:** (±) 0.01 inch **Steps/inch:** 1,000 **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1985 **Cost:** $850

☐ True Grid 8017
Technology: Electromagnetic **Input:** Button device; Cursor **Resolution:** 0.001 inches **Accuracy:** (±) 0.01 inch **Steps/inch:** 1,000 **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1985 **Cost:** $1,695

☐ True Grid 8024
Technology: Electromagnetic **Input:** Button device; Cursor **Resolution:** 0.001 inches **Accuracy:** (±) 0.01 inch **Steps/inch:** 1,000 **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1985 **Cost:** $2,995

☐ True Grid 8036
Technology: Electromagnetic **Input:** Button device; Cursor **Resolution:** 0.001 inches **Accuracy:** (±) 0.01 inch **Steps/inch:** 1,000 **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1985 **Cost:** $3,995

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ 3117 Scanner
Technology: Flatbed **Input:** Keyboard **Resolution:** 240 dots/inch **Introduced:** 1986 **Cost:** $1,095

☐ 3118 Scanner
Technology: Flatbed **Input:** Keyboard **Resolution:** 240 dots/inch **Introduced:** 1986 **Cost:** $2,350

INDUSTRIAL VISION SYSTEMS

☐ E/SCAN Model ES150
Technology: Raster display **Input:** Camera **Resolution:** 150 dots per inch **Software supported:** CAD/CAM applications **Introduced:** 1985 **Cost:** $40,000

☐ E/SCAN Model ES200
Technology: Raster display **Input:** Camera **Resolution:** 200 dots per inch **Software supported:** CAD/CAM applications **Units sold:** 15 since 1985 **Cost:** $50,000

☐ E/SCAN Model ES400
Technology: Raster display **Input:** Camera **Resolution:** 400 dots per inch **Software supported:** CAD/CAM applications **Introduced:** 1985 **Cost:** $68,000

INTERFACE ELECTRONICS, INC. (MI)

☐ DATATRAK DIGITIZER
Technology: Tablet or table **Input:** Keyboard; Cursor **Resolution:** 0.001 inch **Accuracy:** (±) 0.005 inch **Repeatability:** (±) 0.001 inch **Support equip:** Cables **Software supported:** High-level languages **Units sold:** 85 since 1975 **Cost:** $3,500-$5,555

JANDEL SCIENTIFIC

☐ Digital Paintbrush System
Technology: Electromagnetic **Input:** Tablet; Light pen; Puck; Stylus **Resolution:** 0.001 inches **Accuracy:** (±)0.3; 0.01 inch **Software supported:** Scientific or medical applications **Introduced:** 1984 **Cost:** $495-$1,195

KURTA CORP.

☐ Series I
Input: Cursor; Pen/stylus **Resolution:** 200 points/inch **Accuracy:** (±) 0.035 inch **Repeatability:** (±) 0.005 inch **Color:** supported **Support equip:** Cables; Driver **Software supported:** High-level languages; Operating system; Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1983 **Cost:** $545-$895

☐ Series II-1000
Input: Cursor; Pen/stylus **Resolution:** 1,000 points/inch **Accuracy:** 0.025 inch **Repeatability:** (±) 0.005 inch **Support equip:** Cables; Driver **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1983 **Cost:** $895-$1,095

☐ Series II-400
Input: Cursor; Pen/stylus **Resolution:** 400 points/inch **Accuracy:** 0.025 inch **Repeatability:** (±) 0.005 inch **Support equip:** Cables; Driver **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1983 **Cost:** $835-$960

☐ Series III
Input: Cursor; Stylus **Resolution:** 1,000 points/inch **Accuracy:** 0.01 inch **Repeatability:** (±) 0.001 inch **Support equip:** Cables **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1983 **Cost:** $3,530-$6,500

LODGE ELECTRONICS

☐ Image Ace II
Technology: Camera; Video **Input:** Keyboard **Resolution:** 320 X 200 **Introduced:** 1986 **Cost:** $295

MICRO CONTROL SYSTEMS

☐ Perceptor
Technology: Tablet or table **Input:** Robotic arm **Resolution:** 0.0072-0.01 inch **Accuracy:** (±) 0.007-0.02 inch **Capability:** 3D **Software supported:** CAD/CAM applications; Field mapping; Molecular; Modeling; Robotics applications **Units sold:** 100 since 1984 **Cost:** $9,500

☐ Space Tablet
Technology: Tablet or table **Input:** Robotic arm **Resolution:** 0.04 inch **Accuracy:** (±) 0.03 inch **Color:** supported **Capability:** 3D **Software supported:** Operating system; Scientific or medical applications; CAD/CAM applications **Units sold:** 1,200 since 1982 **Cost:** $995-$2,495 (with software)

THE MICRO WORKS, INC.

☐ DS-88 Digisector
Input: Standard video signal **Resolution:** 256 X 256 matrix **Support equip:** Software **Introduced:** 1984 **Cost:** $350

NEW IMAGE TECHNOLOGY, INC.

☐ MAGIC
Technology: Camera **Input:** Mouse **Includes:** Digitizer **Resolution:** 512 X 342 **Color:** supported **Units sold:** 2,500 since 1984 **Cost:** $399-$549

NUMONICS

☐ Model 1210
Technology: Tablet or table; 24 X 24 inches **Input:** Keyboard; Restrained cursor **Resolution:** 0.005 to 0.01 inch **Accuracy:** (±) 0.005 inch **Firmware avail.:** Average end area volume; Area justification **Software supported:** Operating system; Scientific or medical applications; Geologic; Construction applications **Units sold:** 203 since 1979 **Cost:** $1,750

☐ Model 1211H
Technology: Tablet or table; 24 X 24 inches **Input:** Keyboard; Restrained cursor **Resolution:** 0.005 inch **Accuracy:** (±) 0.005 inch **Software supported:** Operating system; Scientific or medical applications; Agriculture; Tax mapping applications **Units sold:** 3,537 since 1979 **Cost:** $3,500

☐ Model 1220
Technology: Tablet or table; 24 X 24 inches **Input:** Keyboard; Restrained cursor **Resolution:** 0.005 to 0.01 inch **Accuracy:** (±) 0.005 inch **Firmware avail.:** Scaling **Software supported:** Operating system; Scientific or medical applications **Units sold:** 170 since 1979 **Cost:** $2,500

☐ Model 1224
Technology: Tablet or table; 24 X 24 inches **Input:** Keyboard; Restrained cursor **Resolution:** 0.005 to 0.01 inch **Accuracy:** (±) 0.005 inch **Firmware avail.:** Simultaneous area and length; Average end area volume; Area justification **Software supported:** Operating system; Scientific or medical applications; Geologic; Construction; Tax mapping; Agriculture applications **Units sold:** 1,345 since 1976 **Cost:** $3,950

☐ Model 1240
Technology: Tablet or table; 24 X 24 inches **Input:** Keyboard; Restrained cursor **Resolution:** 0.01 inch **Accuracy:** (±) 0.005 inch **Software supported:** Operating system; Scientific or medical applications **Units sold:** 74 since 1979 **Cost:** $1,750

☐ Model 1250
Technology: Tablet or table; 24 X 24 inches **Input:** Keyboard; Restrained cursor **Resolution:** 0.005 to 0.01 inch **Accuracy:** (±) 0.005 inch **Firmware avail.:** Simultaneous area and length; Average end area volume; Area justification **Software supported:** High-level languages; Scientific or medical applications; Geologic; Construction applications **Units sold:** 539 since 1979 **Cost:** $2,250

☐ Model 2200
Technology: Tablet or table; 6 X 6 to 36 X 48 inches **Input:** Stylus; 1, 4, or 16 button cursor **Resolution:** 0.001 inch (switch selectable) **Accuracy:** (±) 0.01 inch **Firmware avail.:** Scaling; Axis rotation **Units sold:** 3,418 since 1983 **Cost:** $775-$4,260

☐ Model 2300
Technology: Tablet or table; 11 X 11 or 42 X 60 inches **Input:** Keyboard; Cursor **Resolution:** 1,000 lines/inch **Accuracy:** (±) 0.005 inch **Repeatability:** (±) 0.005 inch **Software supported:** Operating system **Units sold:** 622 since 1981 **Cost:** $2,250-$6,-025

☐ Model 2400
Technology: Tablet or table; 11 X 11 or 42 X 60 inches **Input:** Keyboard; Cursor **Resolution:** 1,000 lines/inch **Accuracy:** (±) 0.005 inch **Repeatability:** (±) 0.005 inch **Software supported:** Operating system; Scientific or medical applications; Geologic; Construction; Tax mapping; Agriculture applications **Units sold:** 256 since 1981 **Cost:** $3,825-$8,000

PANASONIC INDUSTRIAL CO.
Computer Products Division

☐ Image Scanner
Technology: Flatbed **Input:** Keyboard **Resolution:** 400 dots/inch **Introduced:** 1986 **Cost:** $2,000

PENTEL OF AMERICA, LTD.

☐ DST-3A; DST-4A
Technology: Tablet or table; Electrostatic **Input:** Universal pen stylus **Pts/inch resolution:** 80 **Resolution:** 0.1 mm **Accuracy:** (±) 0.04 inch **Capability:** 3D **Software supported:** High-level languages; Business applications; CAD/CAM applications **Introduced:** 1986 **Cost:** $598-$1,298

POLHEMUS NAVIGATION SCIENCES
(division of McDonnell Douglas Electronics Co.)

☐ 3SPACE Digitizer
Technology: Electromagnetic **Input:** Stylus; Sensors **Resolution:** 0.016 inch **Accuracy:** 0.031 inch **Repeatability:** 0.016 inch **Capability:** 3D **Software supported:** High-level languages **Units sold:** 100 since 1982 **Cost:** $13,900

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ Pallette Capture
Input: Camera **Color:** supported **Introduced:** 1985 **Cost:** $795

RICOH CORP.

☐ CS 30
Technology: Flatbed **Input:** Keyboard **Resolution:** 180-300 dots/inch **Color:** supported **Introduced:** 1986

☐ IS 30
Technology: Flatbed; CCD scan **Input:** Keyboard **Resolution:** 180-300 dots/inch

☐ IS 30-M2
Technology: Flatbed **Input:** Keyboard **Resolution:** 180-300 dots/inch **Introduced:** 1986 **Cost:** $1,900

☐ SS 30
Technology: Flatbed **Input:** Keyboard **Resolution:** 100-380 dots/inch **Introduced:** 1986

SCIENCE ACCESSORIES CORP.

☐ GP-6 Graf/Pen

REQUIRED READING FOR ALL IBM PC SYSTEMS EXPERTS

If you're a systems expert, microcomputer specialist, or MIS/DP professional working with IBM PCs, you need the comprehensive information PC TECH JOURNAL provides 13 times a year!

It's the only magazine that provides you with the technical information to help you increase the performance of your multi-component system. It talks to systems experts and systems designers in the language you understand—about the applications and products you have to know about!

As part of your annual subscription to PC TECH JOURNAL, you'll receive the special PC TECH JOURNAL Directory issue published in November, the most comprehensive guide and index to the products in the PC marketplace and PC TECH JOURNAL's coverage!

Don't leave a gap in your required reading, subscribe to PC TECH JOURNAL now and *save 50%!*

For faster service call Toll-Free 1-800-852-5200 today!

Send me PC TECH JOURNAL for:
☐ One year (13 issues) for $26.70. **SAVE 50%!**
☐ *Two years for $53.35.*

Technology: Sonic **Input:** Touch screen; Button device; Cursor; Tablet; Stylus **Resolution:** 0.005 inch **Accuracy:** (±) 0.01 inch **Repeatability:** (±) 0.01 inch **Support equip:** Cables **Units sold:** 8,050 since 1969 **Cost:** $3,000-$6,000

☐ GP-7 GRAFBAR
Technology: Sonic **Input:** Touch screen; Button device; Cursor; Tablet; Stylus **Resolution:** 0.01 inch **Accuracy:** (±) 0.04 inch **Repeatability:** (±) 0.01 inch **Support equip:** Software **Software supported:** High-level languages **Units sold:** 3,500 since 1981 **Cost:** $995

☐ GP-7 GRAFBAR MK II
Technology: Sonic **Input:** Touch screen; Button device; Cursor; Tablet; Stylus **Resolution:** 0.01 inch **Accuracy:** (±)0.04 inch **Repeatability:** (±)0.01 inch **Support equip:** Cables **Software supported:** High-level languages **Units sold:** 200 since 1985 **Cost:** $1,315

☐ GP-8 Sonic Digitizer
Technology: Sonic; 60 X 72 inch maximum **Input:** Cursor; Stylus **Resolution:** 0.005 inch **Accuracy:** (±) 0.01 inch **Repeatability:** (±) 0.01 inch **Support equip:** Software **Software supported:** High-level languages **Units sold:** 2,500 since 1983 **Cost:** $1,800-$3,185

☐ GP-8-3D-P
Technology: Sonic **Input:** Cursor; Wand **Resolution:** 0.01 cm **Accuracy:** (±)0.008 inch **Repeatability:** (±) 0.01 inch **Color:** supported **Support equip:** Software **Software supported:** Scientific or medical applications; CAD/CAM applications; Modeling; Robotic applications **Units sold:** 100 since 1979 **Cost:** $7,500

SCRIPTEL CORP.

☐ SPD Series
Technology: Resistive decoding technology **Input:** Button device; Cursor; Tablet; Stylus **Resolution:** 0.001 inch **Accuracy:** (±) 0.025 inch **Repeatability:** 0.002 inch **Color:** supported **Capability:** 3D **Support equip:** Cables **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Units sold:** 1,000 since 1984 **Cost:** $1,095-$3,795

SEIKO INSTRUMENTS U.S.A., INC.
Graphics Devices & Systems Division

☐ DT-3103 Landscape Style Tablet
Technology: Electromagnetic **Input:** Two-button cursor; Ballpoint cartridge; Stylus **Plot speed:** 200 points/sec **Resolution:** 0.005 inch **Accuracy:** 0.006 inch **Repeatability:** 0.005 inch **Software supported:** High-level languages **Introduced:** 1983 **Cost:** $595

☐ DT-4103 Portrait Style Tablet
Technology: Electromagnetic **Input:** 2, 4-button cursor; Ballpoint cartridge; Stylus **Plot speed:** 100 points/sec **Resolution:** 0.005 inch **Accuracy:** 0.006 inch **Repeatability:** 0.004 inch **Software supported:** High-level languages **Introduced:** 1983 **Cost:** $800

SPECTRAFAX CORP.

☐ SpectraFAX
Technology: Flatbed **Input:** Scanner **Resolution:** 200 points/inch **Color:** supported **Introduced:** 1985 **Cost:** $3,995

SUMMAGRAPHICS CORP.

☐ Bit Pad One
Technology: Magnetostrictive tablet **Input:** Cursor; Stylus **Resolution:** 0.005 inch **Accuracy:** (±) 0.009 inch **Software supported:** Business applications; CAD/CAM applications; Scientific or medical applications **Units sold:** 60,000 since 1979 **Cost:** $730-$1,395

☐ Bit Pad Two
Technology: Electromagnetic **Input:** Cursor; Stylus **Resolution:** 200; 500 lines/inch **Accuracy:** (±) 0.025 inch **Software supported:** Business applications; CAD/CAM applications; Paintbrush; Mapping applications **Units sold:** 5,000 since 1983 **Cost:** $499

☐ ID Intelligent Digitizer
Technology: Magnetostrictive tablet **Input:** Cursor; Stylus **Resolution:** 0.005 inch **Accuracy:** (±) 0.004 inch **Support equip:** Cables **Software supported:** Scientific or medical applications; CAD/CAM applications; Mapping applications **Units sold:** 17,000 since 1976 **Cost:** $2,400-$6,600

☐ Microgrid II
Technology: Electromagnetic **Input:** Cursor; Stylus **Resolution:** 1,000 lines/inch **Accuracy:** (±) 0.005 to 0.010 inch **Software supported:** Scientific or medical applications; CAD/CAM applications; Mapping; Textile; Architectural design applications **Units sold:** 500 since 1983 **Cost:** $2,400-$6,000

☐ MM Digitizer Series
Technology: Electromagnetic tablet **Input:** Cursor; Stylus **Resolution:** 100, 200, 400, 500, or 1,000 lines/inch (selectable) **Accuracy:** (±) 0.025 inch **Firmware avail.:** Scaling **Software supported:** Business applications; CAD/CAM applications; Paintbrush; Mapping applications **Units sold:** 20,000 since 1983 **Cost:** $290-$450

☐ SummaSketch
Technology: Electromagnetic **Input:** Stylus **Resolution:** Up to 1,000 lines/inch **Accuracy:** (±) 0.025 inch **Support equip:** Cables **Software supported:** Business applications; CAD/CAM applications; Paintbrush; Mapping applications **Units sold:** 5,500 since 1985 **Cost:** $549

SUN-FLEX CO., INC.

☐ Touchpen
Input: Touch screen; Stylus operated touch pad **Resolution:** 4,096 X 4,096 **Software supported:** CAD/CAM applications **Units sold:** 2,000 since 1983 **Cost:** $495

SYSSCAN, INC.

☐ KartoScan
Technology: Automatic free standing **Input:** Keyboard; Scan head **Resolution:** 0.001 to 0.008 inch **Accuracy:** (±) 0.0004 inch **Repeatability:** (±) 0.0004 inch **Software supported:** Vectorizing; Raster editing applications **Units sold:** 50 since 1980 **Cost:** $120,000

TECMAR, INC.

☐ eSCAN
Technology: Glass window; Optical scanner **Input:** Keyboard **Resolution:** 240 X 240 dpi **Color:** supported **Cost:** $2,495

VERSA COMPUTING, INC.

☐ VersaWriter Drawing System
Technology: Tablet or table **Input:** Pointer **Accuracy:** 0.031 inch **Repeatability:** 0.031 inch **Color:** supported **Support equip:** Cables; Software **Units sold:** 9,000 since 1979 **Cost:** $149-$299

VIDAR SYSTEMS CORP.

☐ VIDAR 4200 Series
Input: Keyboard **Resolution:** 40,000 dots per inch **Software supported:** CAD/CAM applications **Introduced:** 1985

VISION RESEARCH

☐ VR-300 Image Scanner
Technology: Flatbed **Input:** Keyboard; Mouse **Resolution:** 300 dots/inch **Color:** supported **Introduced:** 1986

XYZTEK CORP.

☐ E 960/480
Input: CCD array **Resolution:** 480 or 960 lines/inch **Accuracy:** (±) 0.001 inch **Repeatability:** 0.002 inch **Software supported:** High-level languages **Introduced:** 1984 **Cost:** $36,250-$60,000

☐ High Resolution Optical Scanner
Input: CCD array **Resolution:** 0.001 inch **Accuracy:** 0.001 inch **Repeatability:** 0.0002 inch **Software supported:** Operating system **Introduced:** 1984 **Cost:** $6,250-$60,000

CARL ZEISS, INC.

☐ ZIDAS
Technology: Electromagnetic **Input:** Tablet **Includes:** Plotter or hard copy device **Software supported:** Scientific or medical applications; Quality control; Fibers; Plastics; Paper applications

GRAPHICS SYSTEMS/ DISPLAYS

ADAC CORP.

☐ Model 2200 C1/C2
Technology: Vector display **Input:** Keyboard **Screen size:** 7 inches **Matrix screen:** 512 X 240 **Pixel size:** 1 bits **Capability:** 3D **Support equip:** Cables **Software supported:** Industrial applications **Introduced:** 1983 **Cost:** $1,495-$1,995

ADVANCED COLOR TECHNOLOGY, INC.

☐ System 2001
Technology: Raster display; Vector display **Includes:** Plotter or hard copy device **Color:** supported **Capability:** 3D **Software supported:** CAD/CAM applications; 2D rotation/translation; CAD/CAE applications **Introduced:** 1986 **Cost:** $2,995

ADVANCED LOGIC RESEARCH, INC.

☐ DART
Technology: Raster display **Input:** Keyboard; Cursor **Screen size:** 12 inches **Matrix data space:** 650 X 400 **Color:** supported **Introduced:** 1986 **Cost:** $2,495-$11,595

ALLOY COMPUTER PRODUCTS, INC.
SEE AD ON PAGE 129

☐ PCST/G
Technology: Raster display **Input:** Keyboard **Screen size:** 14 inches **Matrix screen:** 720 X 348 **Cost:** $995

AMDEK CORP.
(subsidiary of Wyse Technology Corp.)

☐ 1280 Monochrome Graphics Display Subsystem
Technology: Raster display **Input:** Keyboard **Screen size:** 15 inches **Matrix data space:** 1,280 X 800 **Matrix screen:** 640 X 200 **Introduced:** 1986 **Cost:** $1,595

AMERICAN CADIX, INC.

☐ AD-4001 Digitizer System
Technology: Flatbed; Drum; Electrostatic; Raster display; Vector display **Input:** Keyboard; Tablet **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 20 inches **Pts/inch resolution:** 1,024 x 780 **Color:** supported **Maximum colors:** 7 displayable **Software supported:** Operating system; Business applications; Scientific or medical applications; CAD/CAM applications; PCB; Mechanical applications; Mapping **Units sold:** 60 since 1983 **Cost:** $230,000-$290,000

APOLLO COMPUTER, INC.

☐ DN570 TURBO
Technology: Vector display **Input:** Keyboard **Screen size:** 15; 19 inches **Matrix screen:** 1,024 X 800 **Color:** supported **Introduced:** 1986 **Cost:** $43,900

☐ DN580 TURBO
Technology: Vector display **Input:** Keyboard **Screen size:** 19 inches **Matrix screen:** 1,280 X 1,024 **Introduced:** 1986 **Cost:** $66,900

ARISTO GRAPHIC CORP.

☐ ARISTO tool-CAD
Input: Keyboard; Tablet; Mouse **Screen size:** 12 inches **Matrix screen:** 640 X 400 **Color:** supported **Maximum colors:** 4 displayable **Support equip:** Cables **Software supported:** CAD/CAM applications **Units sold:** 100 since 1985 **Cost:** $18,000

☐ Signus System - Display Graphics Production System
Technology: Vector display **Input:** Keyboard; Cursor; Tablet **Includes:** Plotter or hard copy device; Digitizer **Matrix screen:** 1,024 X 780 **Software supported:** CAA; Logo/decal and geometric design applications **Units sold:** 80 since 1983 **Cost:** $50,000-$350,000

ARRIGONI TECHNOLOGY, INC.

☐ Touch 'N Draw II
Technology: Raster display **Input:** Keyboard; Touch screen; Cursor; Tablet; Stylus **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix data space:** 1,280 X 1,024 **Matrix screen:** 1,280 X 1,024 **Pts/inch resolution:** 93 **Color:** supported **Maximum colors:** 256 in palette; 8 displayable **Capability:** 3D **Software supported:** CADD **Introduced:** 1983 **Cost:** $3,500-$42,000

ARTRONICS, INC.

☐ Artron PC-2000 24 Plane Studio Computer
Technology: Raster display **Input:** Keyboard; Tablet **Includes:** Digitizer **Screen size:** 13 inches **Matrix data space:** 512 X 512 **Matrix screen:** 485 X 485 **Pixel size:** 24 bits **Zoom ratio:** 4:16 **Color:** supported **Maximum colors:** 16.7M in palette; 230,400 displayable **Software supported:** Business applications **Units sold:** 300 since 1984 **Cost:** $41,000

☐ Artron PC-2000 8 Plane Studio Computer
Technology: Raster display **Input:** Keyboard; Tablet **Includes:** Digitizer **Screen size:** 13 inches **Matrix data space:** 512 X 512 **Matrix screen:** 512 X 485 **Pixel size:** 8 bits **Zoom ratio:** 4:16 **Color:** supported **Maximum colors:** 16.7M in palette; 256 displayable **Software supported:** Business applications **Units sold:** 300 since 1984 **Cost:** $29,000

☐ Slide System
Technology: Raster display; Camera **Input:** Tablet **Includes:** Plotter or hard copy device **Screen size:** 13 inches **Pts/inch resolution:** 4,000 line **Color:** supported **Maximum colors:** 256 displayable **Support equip:** Software **Software supported:** Operating system **Introduced:** 1985 **Cost:** $29,000

AT&T INFORMATION SYSTEMS

☐ OMNIDRAFT
Technology: Raster display **Input:** Mouse **Includes:** Digitizer **Screen size:** 12 inches **Matrix screen:** 640 X 400 **Color:** supported **Maximum colors:** 16 displayable **Software supported:** 2D rotation/translation; 3D rotation/translation; CAD; Architectural; Engineering applications **Introduced:** 1985 **Cost:** $10,400

AUTO-TROL TECHNOLOGY CORP.

☐ Advanced Color Graphics Workstation (AGW) 22
Technology: Vector display **Input:** Keyboard; Mouse **Screen size:** 19; 15 inches **Matrix data space:** 1,280 X 1,024 **Matrix screen:** 1,024 X 800 **Pixel size:** 4 bits **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Software supported:** High-level languages; CAD/CAM applications; 2D rotation/translation; 3D rotation/translation; Building design, process plant design, industrial plant design, automated publishing, mechanical design, NC and sheet metal fabrication applications **Introduced:** 1986 **Cost:** $40,000

☐ Advanced Graphics Workstation (AGW) 32
Technology: Raster display **Input:** Keyboard; Tablet **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 17 inches **Matrix screen:** 1,024 X 800 **Pixel size:** 1 bits **Pts/inch resolution:** 75 **Capability:** 3D **Software supported:** High-level languages; CAD/CAM applications; Mechanical design and manufacturing; Architectural, engineering, construction; Electronic technical publishing applications **Introduced:** 1984 **Cost:** $39,900

☐ Advanced Graphics Workstation (AGW) 52
Technology: Raster display **Input:** Keyboard; Mouse; Tablet **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix screen:** 1,024 X 800 **Pixel size:** 4; 8 bits **Pts/inch resolution:** 75 **Color:** supported **Maximum colors:** 16M in palette; 256; 16 displayable **Software supported:** Mechanical design; Manufacturing; Architectural, engineering, construction; Electronic technical publishing applications **Introduced:** 1985

☐ Advanced Graphics Workstation (AGW) 57
Technology: Raster display **Input:** Keyboard; Mouse; Thumbwheel; Tablet; Joystick **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix screen:** 1,280 X 1,024 **Pixel size:** 4 bits **Pts/inch resolution:** 86 **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Capability:** 3D **Software supported:** CAD/CAM applications; 3D rotation/translation; High-level languages; Architectural, engineering, construction; Mechanical design and manufacturing; Electronic technical publishing applications **Introduced:** 1985

☐ Advanced Graphics Workstation (AGW) 70
Technology: Raster display **Input:** Keyboard; Joystick; Thumbwheel; Tablet **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix screen:** 1,024 X 800 or 1,024 **Pixel size:** 4 or 8 bits **Pts/inch resolution:** 75 **Color:** supported **Maximum colors:** 16M in palette; 16; 256 displayable **Capability:** 3D **Software supported:** High-level languages; Operating system; CAD/CAM applications; Mechanical design and manufacturing; Architectural, engineering, construction; Electronic technical publishing applications **Units sold:** 500 since 1982

☐ Advanced Personal Workstation (APW) 15
Technology: Raster display **Input:** Keyboard; Joystick **Includes:** Plotter or hard copy device **Screen size:** 13 inches **Matrix screen:** 1,024 X 768 **Pixel size:** 32 bits **Pts/inch resolution:** 19 **Color:** supported **Maximum colors:** 256 displayable **Capability:** 3D **Software supported:** High-level languages; Operating system; CAD/CAM applications; 3D rotation/translation; Architectural, engineering, construction; Mechanical design and manufacturing; Electronic technical publishing applications **Introduced:** 1985

☐ Advanced Raster Workstation
Technology: Raster display **Input:** Keyboard; Joystick; Thumbwheel; Tablet **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix screen:** 1,024 X 1,024 **Pixel size:** 4 or 6 bits **Color:** supported **Maximum colors:** 16M in palette; 16; 64 displayable **Capability:** 3D **Software supported:** High-level languages; Operating system; CAD/CAM applications; Mechanical design and manufacturing; Architectural, engineering, construction; Electronic technical publishing applications **Units sold:** 300 since 1983

AUTOGRAPHIX, INC.

☐ Autographix-150
Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Includes:** Digitizer; Plotter or hard copy device **Screen size:** 13 inches **Matrix screen:** 340 X 512 **Pixel size:** 8 bits **Pts/inch resolution:** 51 **Color:** supported **Maximum colors:** 64 displayable **Software supported:** Business applications **Introduced:** 1985 **Cost:** $19,900

☐ Autographix 200A
Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Includes:** Digitizer; Plotter or hard copy device **Screen size:** 13 inches **Matrix data space:** 512 X 736 **Matrix screen:** 512 X 720 **Pixel size:** 8 bits **Pts/inch resolution:** 68.5 **Color:** supported **Maximum colors:** 4,096 in palette; 64 displayable **Software supported:** Business applications **Introduced:** 1985 **Cost:** $43,900

AVL

☐ Starburst
Technology: Raster display **Input:** Keyboard; Button device; Tablet; Puck **Includes:** Digitizer **Screen size:** 12 or 19 inches **Matrix screen:** 720 X 352 (monochrome); 702 X 480 (color) **Pixel size:** 8 bits **Color:** supported **Maximum colors:** 16.7M in palette; 240 displayable **Capability:** 3D **Software supported:** Operating system **Introduced:** 1984 **Cost:** $26,500

AYDIN CONTROLS
(division of Aydin Corp.)

☐ 2010 Tribune
Technology: Raster display **Input:** Keyboard **Includes:** Digitizer **Screen size:** 19 inches **Matrix data space:** 64K X 64K **Matrix screen:** 1,024 X 1,024; 1,024 X 768; 640 X 480 **Pixel size:** 8 bits **Pts/inch resolution:** 53 **Zoom ratio:** 1:12 **Color:** supported **Maximum colors:** 4,096 in palette; 256 displayable **Software supported:** High-level languages; Operating system **Units sold:** 100 since 1985 **Cost:** $9,300

AZTEK, INC.

☐ Artcenter 20
Technology: Raster display **Input:** Keyboard; Tablet; Stylus; Video scanner **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix screen:** 1,024 X 768 **Pixel size:** 8 bits **Zoom ratio:** 0.1:10 **Color:** supported **Maximum colors:** 16M in palette; 256 displayable **Software supported:** High-level languages; Operating system; Graphic arts applications **Units sold:** 120 since 1979 **Cost:** $98,000

☐ Studio System
Technology: Raster display **Input:** Keyboard; Tablet; Stylus; Video scanner **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix screen:** 1,024 X 768 **Pixel size:** 8 bits **Zoom ratio:** 0.1:10 **Color:** supported **Maximum colors:** 16M in palette; 256 displayable **Software supported:** High-level languages; Operating system; Business applications; Graphic arts applications **Units sold:** 120 since 1981 **Cost:** $46,000

BELL & HOWELL CO.
Quintar Division

☐ Q1000
Technology: Raster display **Input:** Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 14; 19 inches **Matrix data space:** 512 X 512 **Matrix screen:** 512 X 512 **Pixel size:** 4 bits **Zoom ratio:** 16X **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Capability:** 3D **Support equip:** Cables; Software **Software supported:** Business applications; CAD/CAM applications **Introduced:** 1983 **Cost:** $1,995

☐ Q1080
Technology: Raster display **Input:** Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 14; 19 inches **Matrix data space:** 832 X 630 **Matrix screen:** 832 X 630 **Pixel size:** 4 bits **Zoom ratio:** 16X **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Capability:** 3D **Support equip:** Cables; Software **Software supported:** Business applications; CAD/CAM applications **Introduced:** 1983 **Cost:** $2,195

CAD COUNSEL

☐ PROTEAN
Input: Keyboard; Tablet **Includes:** Digitizer **Screen size:** 12 inches **Matrix screen:** 640 X 480 **Color:** supported **Maximum colors:** 16 in palette **Capability:** 3D **Support equip:** Cables; Software **Software supported:** Operating system; CADD; Electrical applications; Mechanical applications; Architecture applications **Units sold:** 1,000 since 1983 **Cost:** $6,950

CADNETIX CORP.

☐ CDX-50000S CAD Workstation
Technology: Raster display **Input:** Keyboard; Mouse **Includes:** Plotter or hard copy device **Screen size:** 19 inches **Matrix data space:** 1,024 X 800 **Matrix screen:** 1,024 X 800 **Pixel size:** 6 bits **Pts/inch resolution:** 73.1 **Zoom ratio:** 2 to 32:1 **Color:** supported **Maximum colors:** 4,096 in palette; 64 displayable **Software supported:** High-level languages; Operating system **Units sold:** 100 since 1983 **Cost:** $82,900

CAMBRIDGE COMPUTER GRAPHICS

☐ MICRO 1024
Technology: Vector display **Input:** Keyboard **Screen size:** 20 inches **Matrix screen:** 1,024 X 780 **Color:** supported **Software supported:** CAD/CAM applications **Introduced:** 1985

CASCADE GRAPHICS SYSTEMS

☐ Cascade X
Technology: Raster display **Input:** Keyboard; Tablet; Stylus **Includes:** Plotter or hard copy device **Screen size:** 19 inches **Matrix screen:** 1,024 X 798 **Pixel size:** 32 bits **Pts/inch resolution:** 170 **Zoom ratio:** 10 to 1 **Color:** supported **Maximum colors:** 8 displayable **Software supported:** Operating system; CAD/CAM applications **Units sold:** 475 since 1984 **Cost:** $32,000

CHANCELLOR COMPUTER CORP.

☐ Chancellor 1000
Technology: Raster display **Input:** Keyboard; Mouse **Screen size:** 13 inches **Matrix screen:** 640 X 400 **Color:** supported **Software supported:** CAD/CAM applications

☐ Chancellor 2000
Technology: Raster display **Input:** Keyboard; Mouse **Screen size:** 19 inches **Matrix screen:** 1,024 X 768 **Color:** supported **Software supported:** CAD/CAM applications **Units sold:** 250 since 1984

CHANCELLOR CORP.

☐ Graphics Workstation
Technology: Raster display **Input:** Keyboard **Includes:** Plotter or hard copy device **Software supported:** Operating system; CAD/CAM applications; Engineering applications **Introduced:** 1983 **Cost:** $30,000

CHARTPAK
(subsidiary of Times Mirror Co.)

☐ System 640
Technology: Raster display **Input:** Tablet **Includes:** Digitizer **Screen size:** 14 inches **Matrix data space:** 640 X 480; 4,000 X 4,000 **Matrix screen:** 640 X 480 **Pixel size:** 3; 4; 8 bits **Pts/inch resolution:** 60; 360 **Zoom ratio:** 16:1 **Color:** supported **Maximum colors:** 16.8M in palette; 256 displayable **Capability:** 3D **Support equip:** Cables; Software **Software supported:** High-level languages; Business applications **Units sold:** 40 since 1984 **Cost:** $7,995-$10,995

COLORGRAPHIC COMMUNICATIONS CORP.

☐ XL-13; XL-19
Technology: Raster display **Input:** Keyboard **Screen size:** 13; 19 inches **Matrix data space:** 1,024 X 512 **Matrix screen:** 640 X 480 **Pixel size:** 4 bits **Pts/inch resolution:** 80 **Zoom ratio:** 2:X; 4:X **Color:** supported **Maximum colors:** 8 in palette **Support equip:** Adapter card **Software supported:** High-level languages; Business applications; CAD/CAM applications **Units sold:** 725 since 1983 **Cost:** $2,800 (13 inch); $3,200 (19 inch)

☐ XL-13K; XL-19K
Technology: Raster display **Input:** Keyboard **Screen size:** 13; 19 inches **Matrix data space:** 1,024 X 512 **Matrix screen:** 640 X 480 **Pixel size:** 4 bits **Pts/inch resolution:** 80 **Zoom ratio:** 2:X; 4:X **Color:** supported **Maximum colors:** 8 in palette **Support equip:** Adapter card **Software supported:** High-level languages; CAD/CAM applications **Units sold:** 500 since 1985 **Cost:** $3,000 (XL-13K); $3,400 (XL-19K)

COLORGRAPHICS SYSTEMS, INC.

☐ LiveLine P/C
Technology: Tablet or table; Raster display; Vector display **Input:** Keyboard; Cursor; Tablet; Mouse; Joystick; Laser disk **Matrix data space:** 4,000 X 4,000 **Color:** supported **Cost:** $29,900

COMMSOFT

☐ PI-101 PhotoImager
Technology: Camera **Input:** Keyboard; Tablet **Includes:** Digitizer **Matrix screen:** 320 X 200 **Pixel size:** 8; 4 bits **Zoom ratio:** 2:1 **Color:** supported **Maximum colors:** 256 in palette; 256 displayable **Software supported:** High-level languages **Units sold:** 300 since 1984 **Cost:** $995

THE COMPLETE CADD CO., INC.

☐ CADD-PC; CADD-AT
Technology: Tablet or table **Input:** Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 13 inches **Matrix screen:** 720 X 360; 640 X 400 **Support equip:** Cables; Software **Software supported:** CAD/CAM applications **Cost:** $2,695-$4,595

COMPUTER SYSTEMS

☐ PC CAD/Graphix System
Technology: Raster display **Input:** Keyboard; Light pen; Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 9-25 inches **Matrix data space:** 2,048 X 2,048 **Matrix screen:** 1,024 X 1,024; 700 X 350; 650 X 200 **Pixel size:** 8 bits **Color:** supported **Capability:** 3D **Software supported:** High-level languages; CAD/CAM applications **Introduced:** 1984 **Cost:** $2,880

COMPUTER TALK, INC.

☐ Model 428
Technology: Raster display **Input:** Keyboard; Light pen; Cursor **Includes:** Digitizer **Screen size:** 11 inches; (optional) 19 inches **Matrix data space:** 512 X 512; 512 X 1,024 **Matrix screen:** 512 X 512; 512 X 1,024 **Pixel size:** 1 or 3 bits **Pts/inch resolution:** 50 **Color:** supported **Capability:** 3D **Software supported:** High-level languages; Operating system; Business applications; Scientific or medical applications; CAD/CAM applications; Engineering applications **Units sold:** 2 since 1981 **Cost:** $19,824

CORPORATE DATA SCIENCES, INC.

☐ GD/P Display/Processor
Input: Keyboard **Includes:** Plotter or hard copy device **Screen size:** 17 inches **Matrix screen:** 1,024 X 1,024 **Support equip:** Cables; Software; Interface card **Software supported:** CAD/CAE **Units sold:** 50 since 1985 **Cost:** $4,995

CUBICOMP CORP.

☐ ModelMaker
Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Includes:** Plotter or hard copy device **Screen size:** 13; 19 inches **Matrix screen:** 512 X 512 **Pixel size:** 16 bits **Color:** supported **Maximum colors:** 16M in palette **Capability:** 3D **Software supported:** Scientific or medical applications; CAD/CAM applications; Animation; 3D Modeling applications **Introduced:** 1983 **Cost:** $11,900

☐ PictureMaker
Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Includes:** Plotter or hard copy device **Screen size:** 13; 19 inches **Matrix screen:** 512 X 512 **Pixel size:** 16 bits **Color:** supported **Maximum colors:** 16M in palette **Capability:** 3D **Software supported:** Video and film animation; 3D Modeling applications **Units sold:** 400 since 1982 **Cost:** $31,950

DAISY SYSTEMS CORP.

☐ BOARDMASTER
Technology: Vector display **Input:** Keyboard; Cursor **Matrix screen:** 1,022 X 824 **Color:** supported **Introduced:** 1986 **Cost:** $15,000-$110,000

☐ CHIPMASTER
Technology: Vector display **Input:** Keyboard; Cursor **Matrix screen:** 1,022 X 824 **Color:** supported **Introduced:** 1984 **Cost:** $124,000

☐ GATEMASTER
Technology: Vector display **Input:** Keyboard; Cursor **Matrix screen:** 1,022 X 824 **Color:** supported **Introduced:** 1983 **Cost:** $100,000

☐ LOGICIAN
Technology: Raster display **Input:** Keyboard; Cursor **Matrix screen:** 1,022 X 824 **Color:** supported **Introduced:** 1982 **Cost:** $85,000

☐ MegaLOGICIAN and PMX
Technology: Vector display **Input:** Keyboard; Cursor **Matrix screen:** 1,022 X 824 **Color:** supported **Introduced:** 1984 **Cost:** $128,000

☐ Personal LOGICIAN
Technology: Raster display **Input:** Keyboard; Cursor **Matrix screen:** 1,022 X 824 **Color:** supported **Introduced:** 1985 **Cost:** $20,000

☐ SILICONMASTER
Technology: Vector display **Input:** Keyboard; Cursor **Matrix screen:** 1,022 X 824 **Color:** supported **Introduced:** 1986

DATACOPY CORP.

☐ Model 500
Technology: Raster display **Input:** Camera **Includes:** Plotter or hard copy device **Screen size:** 15 inches **Matrix data space:** 1,728 X 2,200 **Matrix screen:** 1,728 X 2,200 **Pixel size:** 1 bits **Pts/inch resolution:** 200 **Capability:** 3D **Software supported:** High-level languages; Business applications **Units sold:** 100 since 1982 **Cost:** $22,950

DATAVISION CORP.

☐ Capture Station/Videograph Station
Technology: Raster display; Camera **Input:** Keyboard **Includes:** Digitizer **Matrix data space:** 660 X 480 **Pixel size:** 1 bits **Software supported:** Operating system; Business applications **Units sold:** 200 since 1983 **Cost:** $35,000

DICOMED CORP.

☐ IMAGINATOR
Technology: Raster display **Input:** Keyboard; Tablet; Stylus **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix data space:** 64K X 64K **Matrix screen:** 640 X 480 **Pixel size:** 8 bits **Pts/inch resolution:** 50 **Zoom ratio:** 50:1 **Color:** supported **Maximum colors:** 16.7M in palette; 124 displayable **Software supported:** Business applications; Graphic arts applications **Introduced:** 1983

☐ PRODUCERxp
Technology: Raster display **Input:** Keyboard; 4-button puck **Includes:** Digitizer **Screen size:** 13 inches **Matrix data space:** 65,000 X 65,000 **Matrix screen:** 640 X 480 **Pixel size:** 16 bits **Color:** supported **Maximum colors:** 16M in palette **Software supported:** Operating system; Business applications **Introduced:** 1985 **Cost:** $79,900

DIGITAL EQUIPMENT CORP.

☐ VT240
Technology: Raster display **Input:** Keyboard; Cursor; Digitizer **Screen size:** 12 inches **Matrix screen:** 800 X 240 **Pixel size:** 2 bits **Cost:** $1,980

☐ VT241
Technology: Raster display **Input:** Keyboard; Cursor; Digitizer **Screen size:** 13 inches **Matrix screen:** 800 X 240 **Pixel size:** 2 bits **Color:** supported **Maximum colors:** 64 in palette; 4 displayable **Cost:** $2,980

EUTECTIC ELECTRONICS, INC.

☐ VDP3 Vector Display Processor
Technology: Vector display **Input:** Mouse; Bit pad **Includes:** Plotter or hard copy device **Screen size:** 15 inches **Pts/inch resolution:** 400 **Capability:** 3D **Support equip:** Cables; Software **Software supported:** High-level languages; Scientific or medical applications **Units sold:** 14 since 1984 **Cost:** $7,975

FARADAY ELECTRONICS

☐ HiRez 100XL
Technology: Vector display **Input:** Keyboard; Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 15 inches **Matrix data space:** 4K X 4K **Matrix screen:** 1,024 X 780 **Zoom ratio:** Up to 300X **Software supported:** High-level languages **Units sold:** 3,000 since 1985 **Cost:** $1,995

FORWARD TECHNOLOGY, INC.

☐ GraphText I
Technology: Raster display; Windowing; Video **Input:** Keyboard; Mouse **Screen size:** 15 inches **Matrix screen:** 1,024 X 768 **Introduced:** 1985

GENERAL PARAMETRICS CORP.

☐ VideoShow 150, 150F
Technology: Vector display **Input:** Keyboard; VCR **Matrix data space:** 2,048 X 484 **Matrix screen:** 720 X 348 **Color:** supported **Maximum colors:** 1,000 displayable **Capability:** 3D **Introduced:** 1984 **Cost:** $3,150-$3,650

☐ VideoShow 160
Technology: Vector display **Input:** Keyboard; VCR **Matrix data space:** 2,048 X 1,024 **Matrix screen:** 720 X 348 **Color:** supported **Introduced:** 1985 **Cost:** $4,350

GEO BASED SYSTEMS, INC.

☐ GWS Model 3
Technology: Vector display **Input:** Keyboard; Tablet **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix screen:** 1,024 X 1,024; 640 X 480 **Color:** supported **Maximum colors:** 16 in palette; 16 displayable **Software supported:** High-level languages; Operating system; STRINGS database; Mapping applications **Units sold:** 70 since 1979 **Cost:** $30,000-$300,000

HMW ENTERPRISES, INC.

☐ 9081 Rainbow Integrated Terminal
Technology: Raster display **Input:** Keyboard; Light pen; Touch screen **Screen size:** 19 inches **Matrix data space:** 480 X 384 **Matrix screen:** 480 X 384 **Pixel size:** 3 X 2; 1 X 1 bits **Color:** supported **Maximum colors:** 8 in palette **Support equip:** Software **Software supported:** Process control; Batch processing applications **Units sold:** 500 since 1982 **Cost:** $5,000

☐ 9083 Color Graphics Display Terminal
Technology: Raster display **Input:** Keyboard; Touch screen; Light pen **Screen size:** 13 inches **Matrix data space:** 480 X 384 **Matrix screen:** 480 X 384 **Pixel size:** 3 X 2; 1 X 1 bits **Color:** supported **Maximum colors:** 8 in palette **Support equip:** Software **Software supported:** Process control; Batch processing applications **Units sold:** 300 since 1983 **Cost:** $3,995-$4,045

☐ 9203 Rainbow Dust, Oil, Watertight Terminal
Technology: Raster display **Input:** Keyboard **Screen size:** 13 inches **Matrix data space:** 480 X 384 **Matrix screen:** 480 X 384 **Pixel size:** 3 X 2; 1 X 1 bits **Color:** supported **Maximum colors:** 8 in palette **Support equip:** Software **Software supported:** Process control; Batch processing applications **Units sold:** 100 since 1983 **Cost:** $5,500

☐ 9204 Rainbow Terminal for Class 1 & 2 Explosive Environments
Technology: Raster display **Input:** Touch sensitive keypad **Screen size:** 13 inches **Matrix screen:** 480 X 384 **Pixel size:** 3 X 2 bits **Color:** supported **Maximum colors:** 8 in palette **Software supported:** Process control; Batch processing applications **Units sold:** 10 since 1984 **Cost:** $7,000-$12,000

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Model 6153
Technology: Raster display **Input:** Keyboard; Tablet **Screen size:** 12; 14 inches **Matrix screen:** 720 X 512 **Maximum colors:** 16 displayable **Introduced:** 1986 **Cost:** $610

☐ Model 6154
Technology: Raster display **Input:** Keyboard; Tablet **Screen size:** 14 inches **Matrix screen:** 720 X 512 **Color:** supported **Maximum colors:** 16 displayable **Introduced:** 1986 **Cost:** $1,550

☐ Model 6155
Technology: Raster display **Input:** Keyboard; Tablet **Screen size:** 15 inches **Matrix screen:** 1,024 X 768 **Introduced:** 1986 **Cost:** $1,150

☐ 3277 Graphics Attachment Workstation
Technology: Vector display; Storage tube **Input:** Keyboard; Tablet **Includes:** Plotter or hard copy device; Digitizer **Software supported:** High-level languages; Operating system; CAD/CAM applications; Circuit design

☐ 3278/3279 Display Station
Technology: Raster display; Plasma display **Input:** Keyboard; Light pen **Color:** supported **Maximum colors:** 4; 7 displayable **Capability:** 3D **Software supported:** High-level languages; Operating system; Business applications; Statistical analysis; Wire diagramming applications

☐ 5080 Graphics System
Technology: Raster display **Input:** Keyboard; Cursor; Tablet; Stylus **Screen size:** 19 inches **Matrix screen:** 1,024 X 1,024 **Color:** supported **Maximum colors:** 4,096 in palette; 256 displayable **Capability:** 3D **Software supported:** Operating system; Scientific or medical applications; CAD/CAM applications; Stress analysis; Mathematical modeling applications **Introduced:** 1983 **Cost:** $19,750-$24,750; Lease (mo.) —$385

☐ 5175 PC Graphics Display
Technology: Raster display **Input:** Graphics controller **Screen size:** 13 inches **Matrix screen:** 640 X 480 **Pixel size:** 4 bits **Color:** supported **Capability:** 3D **Software supported:** Business applications; CAD/CAM applications; CAE; Image processing applications **Introduced:** 1984 **Cost:** $1,295

☐ 581 Plasma Display
Technology: Plasma display **Screen size:** 10.7 X 13.4 inches **Matrix screen:** 960 X 768 **Software supported:** CAD/CAM applications; Land and architectural mapping; Commercial and military applications **Introduced:** 1982

☐ 7534 Industrial Graphics Display
Matrix screen: 640 X 350 **Color:** supported **Maximum colors:** 64 in palette; 16 displayable **Introduced:** 1985 **Cost:** $1,175

ID SYSTEMS CORP.

☐ ID-1024
Technology: Raster display **Input:** Keyboard; Touch screen; Light pen; Joystick; Tablet; Mouse **Screen size:** 14; 19 inches **Matrix data space:** 32K X 32K **Matrix screen:** 1,024 X 780 **Pixel size:** 4 bits **Zoom ratio:** 16:1 **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Software supported:** High-level languages **Units sold:** 200 since 1985 **Cost:** $4,995-$6,995

☐ ID-200
Technology: Raster display **Input:** Keyboard; Touch screen; Light pen; Cursor; Trackball; Mouse; Tablet; Joystick **Screen size:** 14; 19; 25 inches **Matrix data space:** 2,000 X 512 **Matrix screen:** 1,280 x 480 **Pixel size:** 3 or 4 bits **Zoom ratio:** 16:1 **Color:** supported **Maximum colors:** 8; 16 displayable **Software supported:** High-level languages; CAD/CAM applications **Units sold:** 3,500 since 1984 **Cost:** $3,295-$5,295

IEV CORP.

☐ IEV-60
Technology: Raster display **Input:** Keyboard; Touch screen; Light pen; Button device; Cursor; Trackball; Joystick; Thumbwheel; Tablet; Mouse **Includes:** Digitizer **Matrix screen:** 640 X 408; 544 X 480 **Pixel size:** 4 bits **Color:** supported **Maximum colors:** 16 displayable **Support equip:** Cables; Software **Software supported:** High-level languages; Operating system; Business applications; Scientific or medical applications; CAD/CAM applications **Units sold:** 150 since 1984 **Cost:** $2,-600

INOVION CORP.

☐ Personal Graphics Systems
Technology: Raster display **Input:** Keyboard; Optical mouse **Includes:** Digitizer **Screen size:** 19 inches **Matrix data space:** 512 X 512 **Matrix screen:** 512 X 483 **Pixel size:** 24 bits **Zoom ratio:** 8:1 **Color:** supported **Maximum colors:** 2.1M in palette; 0.25M displayable **Capability:** 3D **Support equip:** Software **Units sold:** 250 since 1985 **Cost:** $4,995-$7,995

INTEGRATED TECHNOLOGIES, INC.

☐ Ani-Maker
Technology: Tablet or table; Video **Input:** Keyboard; Cursor; Tablet; Mouse **Includes:** Digitizer **Screen size:** 19 inches **Matrix screen:** 672 X 482 **Color:** supported **Cost:** $37,500

☐ Ani-Maker PLUS
Technology: Tablet or table; Video **Input:** Keyboard; Cursor; Tablet; Mouse **Includes:** Digitizer **Screen size:** 19 inches **Matrix screen:** 672 X 482 **Color:** supported **Cost:** $44,500

☐ Image-Maker
Technology: Tablet or table; Video **Input:** Keyboard; Cursor; Tablet; Mouse **Includes:** Digitizer **Screen size:** 19 inches **Matrix screen:** 672 X 482 **Color:** supported **Cost:** $59,500

☐ News-Maker
Technology: Tablet or table; Video **Input:** Keyboard; Cursor; Tablet; Mouse **Includes:** Digitizer **Screen size:** 19 inches **Matrix screen:** 672 X 482 **Color:** supported **Cost:** $33,500

☐ Weather-Maker
Technology: Tablet or table; Video **Input:** Keyboard; Cursor; Tablet; Mouse **Includes:** Digitizer **Screen size:** 19 inches **Matrix screen:** 672 X 482 **Color:** supported **Cost:** $24,995

INTERGRAPH CORP.

☐ InterPro 32
Technology: Raster display **Input:** Keyboard **Screen size:** 15; 19 inches **Matrix data space:** 1,184 X 884 **Pts/inch resolution:** 100 **Color:** supported **Maximum colors:** 4,096 in palette; 256 displayable **Capability:** 3D **Software supported:** Operating system; CAD/CAM applications **Introduced:** 1985 **Cost:** $20,000

ITT QUME CORP.

☐ QVT-511GX
Technology: Raster display **Input:** Keyboard; Cursor; Mouse **Includes:** Plotter or hard copy device **Screen size:** 14 inches **Matrix data space:** 4,096 X 4,096 **Matrix screen:** 480 X 360 **Pixel size:** 3 bits **Color:** supported **Maximum colors:** 64 in palette; 8 displayable **Software supported:** High-level languages; Operating system; Business applications; CAD/CAM applications **Introduced:** 1984 **Cost:** $2,995

JUPITER SYSTEMS, INC.

☐ Jupiter 7 PLUS
Technology: Raster display **Input:** Keyboard; Joystick; Tablet; Mouse; Hex keypad **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 13; 19 inches **Matrix data space:** 1,024 X

1,024 **Matrix screen:** 768 X 585; 1,024 X 780; 768 X 575; 640 X 483; 512 X 512 **Pixel size:** 4 to 8 bits **Pts/inch resolution:** 60 to 75 **Zoom ratio:** 1:X to 16:X **Color:** supported **Maximum colors:** 16.7M in palette; 256 displayable **Support equip:** Cables **Software supported:** High-level languages **Units sold:** 400 since 1982 **Cost:** $9,500-$19,000

KEL, INC.

☐ J1014

Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 14 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 1,024 X 780 **Pixel size:** 1 bits **Pts/inch resolution:** 107 **Software supported:** High-level languages **Units sold:** 150 since 1983 **Cost:** $2,595

☐ J1014C

Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 14 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 1,024 X 780 **Pts/inch resolution:** 107 **Color:** supported **Maximum colors:** 8 in palette; 8 displayable **Software supported:** High-level languages **Units sold:** 100 since 1983 **Cost:** $4,950

☐ J1019C

Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 1,024 X 780 **Pts/inch resolution:** 71 **Color:** supported **Maximum colors:** 8 in palette; 8 displayable **Software supported:** High-level languages **Units sold:** 15 since 1983 **Cost:** $6,750

KINETIC VISION SYSTEMS

☐ 4D Color Graphics System

Technology: Vector display **Input:** Keyboard; Tablet; 3D pen; Digitizer; Communications port **Screen size:** 19 inches **Matrix screen:** 4,096 X 4,096; 512 X 512; 1,024 X 1,024 **Pixel size:** 24 bits **Pts/inch resolution:** 500 **Zoom ratio:** 10:1 **Color:** supported **Maximum colors:** 16.7M in palette; 4,096 displayable **Capability:** 3D **Support equip:** Cables; color monitor **Software supported:** High-level languages **Units sold:** 20 since 1985 **Cost:** $4,200; Lease (mo.) —$630

LASERMASTER, LTD.

☐ LaserMaster 286/CTC

Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Screen size:** 19 inches **Matrix screen:** 1,280 X 1,024 **Pixel size:** 2 bits **Pts/inch resolution:** 100 **Support equip:** Cables; Software **Units sold:** 40 since 1986 **Cost:** $5,495; Lease (mo.) —$300

LEXIDATA

(division of Adage, Inc.)

☐ PG 90

Technology: Raster display **Input:** Tablet; Mouse; Puck **Screen size:** 15; 19 inches **Matrix data space:** 2,048 X 1,024 **Matrix screen:** 1,280 X 1,024 **Color:** supported **Maximum colors:** 16.7M in palette; 16; 256 displayable **Capability:** 3D **Introduced:** 1986 **Cost:** $7,995-$9,395

MCDONNELL DOUGLAS INFORMATION SYSTEMS GROUP

(component of McDonnell Douglas Corp.)

☐ DFDdraw

Input: Keyboard; Thumbwheel **Includes:** Plotter or hard copy device **Color:** supported **Software supported:** High-level languages; Operating system **Units sold:** 300 since 1984 **Cost:** $500

MEDIA CYBERNETICS, INC.

☐ Angel Graphics Workstation

Technology: Raster display **Input:** Keyboard; Cursor; Trackball; Joystick; Mouse; Tablet **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 13; 19 inches **Matrix data space:** 640 X 480; 512 X 512; 1,024 X 1,024 **Matrix screen:** 640 X 480 **Pixel size:** 4 and 8 bits **Zoom ratio:** 16:1 **Color:** supported **Maximum colors:** 16.8M in palette; 256 displayable **Capability:** 3D **Software supported:** High-level languages; Operating system; Business applications; Scientific or medical applications; CAD/CAM applications; Architectural design applications **Units sold:** 500 since 1982 **Cost:** $8,000-$32,025

METHEUS CORP.

☐ Omega 2000 Series

Technology: Raster display **Input:** Button device; Cursor **Includes:** Digitizer **Screen size:** 15; 19 inches **Matrix screen:** 1,280 X 1,024; 640 X 512; 1,024 X 768; 1,024 X 1,024; 736 X 552; 640 X 480 **Pixel size:** 4; 8; 32 bits **Zoom ratio:** 1:X - 16:X **Color:** supported **Maximum colors:** 16.7M in palette; 16; 256; 16.7M displayable **Capability:** 3D **Support equip:** Cables; Interface; Driver **Software supported:** High-level languages; 2D rotation/translation; 3D rotation/translation **Units sold:** 100 since 1985 **Cost:** $13,900-$17,900

☐ 300/400 Series

Technology: Raster display **Input:** Tablet; Mouse; Keyboard; Joystick **Includes:** Digitizer **Screen size:** 15;19 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** (33 Hz.) 1,024 X 768; (60 Hz., non-interlaced) 736 X 552; (30 Hz.) 1,024 X 1,024; (30 Hz., RS-170) 640 X 480 **Pixel size:** 4 or 8 bits **Zoom ratio:** 1X:16X **Color:** supported **Maximum colors:** 256 displayable **Capability:** 3D **Support equip:** Cables; Interface; Driver **Software supported:** High-level languages **Units sold:** 1,000 since 1982 **Cost:** $5,950 (300); $8,950 (400)

☐ 500 Series

Technology: Raster display **Input:** Tablet; Keyboard; Joystick; Mouse **Includes:** Digitizer **Screen size:** 19; 15 inches **Matrix data space:** 1,280 X 1,024; 640 X 512 **Matrix screen:** (60 Hz., non-interlaced) 1,280 X 1,024 or 640 X 512; (30 Hz.) 1,280 X 1,024 **Pixel size:** 4; 8; 32 bits **Zoom ratio:** 1X:16X **Color:** supported **Maximum colors:** 16M in palette; 256 or 16M displayable **Capability:** 3D **Support equip:** Cables; Interface; Driver **Software supported:** High-level languages; PLOT-10; Axia; GKS **Units sold:** 800 since 1983 **Cost:** $12,950

MICROGRAPHIC IMAGES CORP.

☐ MicroImager

Technology: Raster display; Camera **Input:** Keyboard; Mouse; Tablet **Includes:** Plotter or hard copy device; Digitizer **Matrix data space:** 640 X 480; 512 X 512 **Matrix screen:** 640 X 480; 512 X 512; 1,024 X 1,024 **Pixel size:** 3 bits **Color:** supported **Maximum colors:** 16M in palette; 256 displayable **Capability:** 3D **Software supported:** High-level languages; Operating system **Units sold:** 15 since 1984 **Cost:** $2,000-$5,500

MINDSET CORP.

☐ Mindset II Advanced Professional Videographics System

Technology: Tablet or table; Camera; Video **Input:** Keyboard; Tablet; Mouse; Joystick; Video tape; Camera; TV broadcast **Matrix screen:** 640 X 400; 320 X 200 **Color:** supported **Cost:** $3,495

☐ Mindset Professional Videographics System

Technology: Tablet or table; Camera; Video **Input:** Keyboard; Joystick; Tablet; Mouse; Video tape; Camera; TV broadcast **Matrix screen:** 320 X 200 **Color:** supported **Cost:** $1,499

☐ Mindset Video Production System

Technology: Tablet or table; Camera; Video; Laser disk **Input:** Keyboard; Joystick; Tablet; Mouse; Video tape; Camera; TV broadcast **Matrix screen:** 320 X 200 **Color:** supported **Cost:** $1,299

MONITERM CORP.

☐ Viking 1

Technology: Raster display **Input:** Keyboard **Screen size:** 19 inches **Matrix data space:** 1,024 X 768 **Matrix screen:** 1,280 X 960 **Color:** supported **Introduced:** 1986 **Cost:** $23,000

NEC HOME ELECTRONICS (U.S.A.), INC.

Personal Computer Products Division

☐ MultiSync

Technology: Raster display **Input:** Keyboard; Cursor **Screen size:** 13 inches **Matrix data space:** 800 x 560 **Matrix screen:** 640 X 200 **Pts/inch resolution:** 800 **Color:** supported **Introduced:** 1986 **Cost:** $799

NEW MEDIA GRAPHICS CORP.

☐ GraFlex

Technology: High resolution graphics accelerator **Input:** Keyboard; Touch screen; Light pen; Joystick; Tablet; Mouse **Screen size:** 5 to 25 inches **Matrix data space:** 4,096 X 3,072 **Matrix screen:** 640 X 480; 1,280 X 1,024 **Pts/inch resolution:** 70 **Color:** supported **Introduced:** 1986 **Cost:** $3,795

☐ PC/GraphOver

Technology: Raster display; Overlays graphics on NTSC video; Analog RGB and/or NTSC output **Input:** Keyboard; Touch screen; Light pen; Joystick; Tablet; Mouse **Screen size:** 5 to 25 inches **Matrix data space:** 640 X 400 **Matrix screen:** 640 X 400 **Pts/inch resolution:** 70 **Color:** supported **Units sold:** 700 since 1985 **Cost:** $2,190

NORTHWEST DIGITAL SYSTEMS

☐ GP-29

Technology: Flatbed **Input:** Keyboard; Mouse **Screen size:** 14 inches **Matrix screen:** 1,024 X 500 **Zoom ratio:** 1:8 **Introduced:** 1984 **Cost:** $1,695

OMNICOMP GRAPHICS CORP.

☐ Omni 2000 GDS

Technology: Raster display **Input:** Keyboard; Cursor; Tablet; Mouse **Matrix data space:** 1,280 X 1,024 **Matrix screen:** 1,280 X 1,024 **Pixel size:** 8 bits **Color:** supported **Maximum colors:** 16.7M in palette; 256 displayable **Capability:** 3D **Support equip:** Cables; Parallel interface **Software supported:** High-level languages; 2D rotation/translation; 3D rotation/translation **Introduced:** 1985 **Cost:** $9,800

QYTEL

(division of Consolidated Data Systems, Ltd.)

☐ Qytel 5278-2

Technology: Raster display **Input:** Keyboard **Includes:** Plotter or hard copy device **Screen size:** 12; 15 inches **Matrix screen:** 640 X 480 **Color:** supported **Maximum colors:** 16 displayable **Software supported:** CAD/CAM applications **Units sold:** 3,000 since 1983 **Cost:** $1,795; Lease (mo.) — $80

RAMTEK CORP.

☐ RM-9460

Technology: Raster display **Input:** Keyboard; Trackball; Joystick; Tablet; Mouse; Touch screen **Screen size:** 13 to 25 inches **Matrix data space:** 32K X 32K **Matrix screen:** 1,280 X 1,024; 640 X 512 **Pixel size:** 4-16 bits **Zoom ratio:** 1:1; 1:16 **Color:** supported **Maximum colors:** 16.7M in palette; 4,096 displayable **Support equip:** Cables; Software; ROM **Software supported:** High-level languages; Weather image processing; CAD electronic and mechanical business control applications **Units sold:** 500 since 1981 **Cost:** $19,300-$94,600

☐ RM-9465
Technology: Raster display **Input:** Keyboard; Light pen; Tablet; Joystick; Mouse; Touch screen **Screen size:** 19 to 25; 13 to 25 inches **Matrix data space:** 32K X 32K **Matrix screen:** 1,280 X 1,024; 640 X 512 **Pixel size:** 4 to 24; 4 to 16 bits **Zoom ratio:** 1:1; 1:16 **Color:** supported **Maximum colors:** 16.7M in palette; 4,096 displayable **Support equip:** Cables; Software; ROM **Software supported:** High-level languages; Weather processing; CAD electrical and mechanical control; Architectural design applications **Units sold:** 500 since 1983 **Cost:** $19,300-$94,600

SCION CORP.

☐ FAX640
Technology: Raster display **Input:** Video camera; VCR **Matrix data space:** 640 X 408; 544 X 480 **Pixel size:** 4 bits **Color:** supported **Support equip:** Cables; Software **Software supported:** High-level languages **Introduced:** 1984 **Cost:** $1,595

☐ LIVE640
Technology: Raster display **Input:** Video camera; VCR **Matrix data space:** 640 X 800 **Color:** supported **Support equip:** Cables; Software **Software supported:** High-level languages **Units sold:** 50 since 1984 **Cost:** $2,250

SEIKO INSTRUMENTS U.S.A., INC.
Graphics Devices & Systems Division

☐ GR-1104 Color Graphic Terminal
Technology: Raster display **Input:** Keyboard; Tablet; Mouse **Includes:** Digitizer **Screen size:** 14 inches **Matrix data space:** 32K X 32K **Matrix screen:** 1,024 X 780 **Pixel size:** 3 bits **Zoom ratio:** 128:1 **Color:** supported **Maximum colors:** 512 in palette; 8 displayable **Software supported:** High-level languages; 2D rotation/translation **Introduced:** 1983 **Cost:** $4,350

☐ GR-2414 Color Graphic Terminal
Technology: Raster display **Input:** Keyboard; Tablet **Includes:** Digitizer **Screen size:** 20 inches **Matrix data space:** 32K X 32K **Matrix screen:** 1,280 X 1,024 **Pixel size:** 4-10 bits **Zoom ratio:** 128:1 **Color:** supported **Maximum colors:** 16M in palette; 1,024 displayable **Support equip:** Cables **Software supported:** High-level languages **Introduced:** 1983 **Cost:** $15,950

☐ GR-2424 Color Workstation
Technology: Raster display **Input:** Keyboard; Tablet **Screen size:** 20 inches **Matrix data space:** 32K X 32K **Matrix screen:** 1,280 X 1,024 **Pixel size:** 4-10 bits **Zoom ratio:** 128:1 **Color:** supported **Maximum colors:** 16M in palette; 1,024 displayable **Support equip:** Cables **Software supported:** High-level languages **Introduced:** 1984 **Cost:** $16,950

SIGMA DESIGN, INC.

☐ SIGMA III
Technology: Raster display **Input:** Keyboard; Joystick; Tablet; Stylus **Includes:** Plotter or hard copy device **Screen size:** 19 inches **Matrix screen:** 640 X 480; 900 X 1,100; 1,280 X 1,024 **Pixel size:** 8 bits **Pts/inch resolution:** 75-42 **Color:** supported **Maximum colors:** 16.7M in palette; 256 displayable **Capability:** 3D **Software supported:** Operating system; 3D rotation/translation; Architectural and space-planning/facilities management; Structural drafting analysis and design applications **Units sold:** 300 since 1983 **Cost:** $58,000 and up

SILICON GRAPHICS, INC.

☐ Iris 3000 Series
Technology: Raster display **Input:** Keyboard; Button device; Cursor; Mouse **Includes:** Digitizer **Screen size:** 15; 19 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 1,024 X 768 **Color:** supported **Introduced:** 1986

SKOK SYSTEMS, INC.

☐ Artech System
Technology: Tablet or table; Electronic stylus **Input:** Keyboard; Tablet; Stylus **Includes:** Plotter or hard copy device **Screen size:** 19; 12 inches **Matrix screen:** 1,024 X 768 **Color:** supported **Maximum colors:** 16M in palette; 256 displayable **Capability:** 3D **Support equip:** Cables **Software supported:** High-level languages; 3D rotation/translation; 2D rotation/translation; Networking applications; CADD **Units sold:** 1,400 since 1979 **Cost:** $25,900-$74,900

SUMITRONICS, INC.
(subsidiary of Sumitomo Corp.)

☐ Sumicom 2120
Technology: Raster display **Input:** Keyboard **Screen size:** 12 inches **Matrix screen:** 640 X 200 **Color:** supported **Maximum colors:** 16 displayable **Capability:** 3D **Introduced:** 1985 **Cost:** $499

SUPERSET, INC.

☐ PGM (Professional Graphics Mainframe)
Technology: Raster display; Vector display **Input:** Keyboard; Tablet **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix data space:** 4,096 X 4,096 **Matrix screen:** 1,024 X 768 **Pixel size:** 3 to 6 bits **Pts/inch resolution:** 1,000 **Color:** supported **Maximum colors:** 16.7M in palette; 16.7M displayable **Capability:** 3D **Software supported:** High-level languages; Graphics utilities **Units sold:** 200 since 1979 **Cost:** $37,-500

☐ XP/48
Technology: Raster display; Electrostatic; Camera **Input:** Light pen; Keyboard; Mouse **Includes:** Digitizer **Matrix data space:** 4,096 X 4,096 **Matrix screen:** 4K X 4K **Pixel size:** 48 bits **Color:** supported **Maximum colors:** 16.7M in palette; 80,000-100,000 displayable **Capability:** 3D **Software supported:** High-level languages; Operating system; Business applications; 2D rotation/translation; 3D rotation/translation; Solid modeling; Computer animation; Image processing; Mapping; Custom type-font generation applications **Cost:** $12,500

SYSTEMS MODELING CORP.

☐ Cinema Simulation/Animation System
Input: Mouse **Includes:** Digitizer **Screen size:** 19 inches **Matrix screen:** 832 X 624 **Zoom ratio:** 16:1 **Color:** supported **Maximum colors:** 4,096 in palette **Capability:** 3D **Software supported:** 2D rotation/translation; Simulation/animation applications **Units sold:** 15 since 1985 **Cost:** $28,000

TAT GRAPHICS GROUP, INC.

☐ Sextant 1019
Technology: Raster display **Input:** Keyboard; Light pen **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 1,024 X 768 **Pixel size:** 4 bits **Color:** supported **Maximum colors:** 4,-096 in palette; 16 displayable **Support equip:** Cables; Software **Software supported:** High-level languages; Business applications; CAD/CAM applications **Units sold:** 100 since 1985 **Cost:** $5,395

☐ Sextant 814
Technology: Raster display **Input:** Keyboard; Light pen **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 14 inches **Matrix data space:** 800 X 600 **Matrix screen:** 800 X 600 **Pixel size:** 4 bits **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Support equip:** Cables; Software **Software supported:** High-level languages; Business applications; CAD/CAM applications **Units sold:** 400 since 1984 **Cost:** $3,-795

☐ Sextant 819
Technology: Raster display **Input:** Keyboard; Light pen **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix data space:** 800 X 600 **Matrix screen:** 800 X 600 **Pixel size:** 4 bits **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Support equip:** Cables; Software **Software supported:** High-level languages; Business applications; CAD/CAM applications **Units sold:** 200 since 1985 **Cost:** $4,-995

TELEVIDEO SYSTEMS, INC.

☐ NetWorkStation
Technology: Raster display; Vector display **Input:** Keyboard; Cursor **Screen size:** 14 inches **Matrix screen:** 640 X 200 or 400 **Introduced:** 1986 **Cost:** $995

TEXAS INSTRUMENTS

☐ Pro-CAD 286
Input: Keyboard; Mouse **Includes:** Plotter or hard copy device **Matrix screen:** 720 X 300 **Color:** supported **Software supported:** CAD/CAM applications **Introduced:** 1986 **Cost:** $9,950-$11,-200

TEXET CORP.

☐ Live Image Publishing System
Technology: Raster display; Vector display **Input:** Keyboard; Cursor; Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 20 inches **Matrix screen:** 1,100 X 1,400 **Pixel size:** 1 bits **Pts/inch resolution:** 100 **Software supported:** High-level languages; Operating system **Units sold:** 50 since 1984 **Cost:** $70,000

TIME ARTS, INC.

☐ Lumena Graphics System
Technology: Raster display **Input:** Keyboard; Tablet; Stylus **Screen size:** 13; 19 inches **Matrix data space:** 512 X 512 **Matrix screen:** 512 X 480 **Pixel size:** 8 bits **Zoom ratio:** 16:1 **Color:** supported **Maximum colors:** 16.7M in palette; 256 displayable **Software supported:** Operating system **Introduced:** 1984 **Cost:** $2,500-$35,000

☐ Lumena Video Tools
Technology: Raster display **Input:** Keyboard; Tablet; Joystick; Mouse; Stylus; Digitizer **Includes:** Digitizer **Screen size:** 13; 19 inches **Matrix screen:** 512 X 512 **Pixel size:** 8 bits **Zoom ratio:** 16:1 **Color:** supported **Maximum colors:** 256 displayable **Capability:** 3D **Support equip:** Cables; Software; ROM **Introduced:** 1984 **Cost:** $13,000-$22,500

VAXON, INC.

☐ ConCur400
Input: Keyboard; Light pen; Cursor **Matrix data space:** 640 X 400 **Color:** supported **Maximum *colors: 16 displayable*** **Support equip:** Cables **Software supported:** High-level languages; Operating system; Business applications

VECTOR AUTOMATION, INC.

☐ CADMAX-II
Technology: Vector display **Input:** Keyboard; Tablet **Includes:** Plotter or hard copy device **Screen size:** 21 inches **Matrix data space:** 16K X 16K **Matrix screen:** 4,096 X 4,096 **Pts/inch resolution:** 195 **Zoom ratio:** 256:1 **Color:** supported **Maximum colors:** 4,096 in palette **Capability:** 3D **Support equip:** Cables **Software supported:** CAD/CAM applications; 2D drafting/design mechanical, electrical and architectural applications **Units sold:** 229 since 1982 **Cost:** $53,800

VECTRIX CORP.

☐ Pepe
Technology: Raster display **Input:** Keyboard **Screen size:** 19 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 1,024 X 1,024 **Pixel size:** 4, 8 or 12 bits **Color:** supported **Maximum colors:** 16 or 256 displayable; 4,096 or 16.8M in palette **Capability:** 3D **Software supported:** High-level languages; Operating system; CAD/CAM applications **Introduced:** 1985 **Cost:** $2,495-$4,495

☐ VX/PC
Technology: Raster display **Input:** Light pen; Tablet **Screen size:** 13; 19 inches **Matrix data space:** 672 X 480 **Matrix screen:** 672 X 480 **Pixel size:** 9 bits **Zoom ratio:** 1-16 **Color:** supported **Maximum colors:** 16.8M or 4,096 in palette **Capability:** 3D **Software supported:** High-level languages; Operating system; Business applications; Scientific or medical applications; CAD/CAM applications **Units sold:** 2,000 since 1984 **Cost:** $1,995-$2,495

☐ VX128A
Technology: Raster display **Input:** Keyboard; Light pen; Tablet; Mouse **Includes:** Plotter or hard copy device **Screen size:** 13; 19 inches **Matrix data space:** 672 X 480 **Matrix screen:** 672 X 480 **Pixel size:** 3 bits **Color:** supported **Maximum colors:** 8 displayable **Capability:** 3D **Software supported:** High-level languages; Business applications; Scientific or medical applications; CAD/CAM applications; Image processing applications **Units sold:** 350 since 1982 **Cost:** $2,295

☐ VX384A
Technology: Raster display **Input:** Keyboard; Light pen; Tablet **Includes:** Plotter or hard copy device **Screen size:** 13; 19 inches **Matrix data space:** 672 X 480 **Matrix screen:** 672 X 480 **Pixel size:** 9 bits **Color:** supported **Maximum colors:** 512 in palette **Capability:** 3D **Software supported:** High-level languages; Business applications; Scientific or medical applications; CAD/CAM applications; Image processing applications **Units sold:** 450 since 1983 **Cost:** $3,295

VERTICOM, INC.

☐ CD-1
Technology: Raster display **Input:** Keyboard **Screen size:** 13 inches **Matrix screen:** 640 X 480 **Color:** supported **Introduced:** 1985 **Cost:** $995

☐ VG-07
Technology: Tablet or table **Input:** Keyboard; Cursor; Trackball; Tablet; Mouse **Screen size:** 13 inches **Matrix data space:** 4,096 X 4,096 **Matrix screen:** 640 X 480 **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Software supported:** High-level languages; Operating system; Business applications **Introduced:** 1986 **Cost:** $4,495

☐ VG-09
Technology: Tablet or table **Input:** Keyboard; Cursor; Trackball; Tablet; Mouse **Screen size:** 19 inches **Matrix data space:** 4,096 X 4,096 **Matrix screen:** 640 X 480 **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Software supported:** High-level languages; Operating system; CAD/CAM applications **Introduced:** 1986 **Cost:** $6,695

VMI - VERMONT MICROSYSTEMS, INC.

☐ VM-8861 Intelligent Monitor
Technology: Raster display **Input:** Tablet; Mouse **Screen size:** 19 inches **Matrix data space:** 640 X 480 **Matrix screen:** 640 X 480 **Pixel size:** 8 bits **Zoom ratio:** 1:1 **Color:** supported **Maximum colors:** 256K in palette; 256 displayable **Capability:** 3D **Software supported:** High-level languages **Units sold:** 1,200 since 1986 **Cost:** $4,995

WESTWARD TECHNOLOGY, INC.

☐ Model 2215B
Technology: Raster display **Input:** Keyboard; Tablet; Joystick **Screen size:** 15 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 1,024 X 784 **Capability:** 3D **Software supported:** High-level languages; CAD/CAM applications; 2D rotation/translation; 3D rotation/translation **Introduced:** 1985 **Cost:** $3,495

☐ Model 2216
Technology: Raster display **Input:** Keyboard; Joystick; Tablet **Screen size:** 15 inches **Matrix screen:** 640 X 490 **Color:** supported **Maximum colors:** 4,096 in palette; 16 displayable **Capability:** 3D **Software supported:** CAD/CAM applications; 2D rotation/translation; 3D rotation/translation **Introduced:** 1986 **Cost:** $4,995

☐ Model 2219/2219W
Technology: Raster display **Input:** Keyboard; Tablet; Joystick **Screen size:** 19 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 1,024 X 784 **Capability:** 3D **Software supported:** High-level languages; CAD/CAM applications; 2D rotation/translation; 3D rotation/translation; CAE applications **Introduced:** 1985 **Cost:** $6,950-$7,950

☐ Model 3219W
Technology: Raster display; Tablet or table **Input:** Keyboard; Tablet; Joystick **Screen size:** 19 inches **Matrix data space:** 2,048 X 2,048 **Matrix screen:** 2,048 X 1,568 **Capability:** 3D **Software supported:** High-level languages; CAD/CAM applications; 2D rotation/translation; 3D rotation/translation **Introduced:** 1984 **Cost:** $14,950

☐ Model 3220W/3320W
Technology: Raster display; Tablet or table **Input:** Keyboard; Joystick; Tablet **Screen size:** 19 inches **Matrix data space:** 4,096 X 4,096 **Matrix screen:** 1,024 X 784; 2,048 X 1,568 **Pixel size:** 4 or 8 bits **Color:** supported **Maximum colors:** 16M or 4,096 in palette; 256 or 16 displayable **Capability:** 3D **Software supported:** CAD/CAM applications; 2D rotation/translation; 3D rotation/translation **Introduced:** 1984 **Cost:** $13,950-$15,450

WYSE TECHNOLOGY

☐ WY-700
Technology: Raster display **Input:** Keyboard **Screen size:** 15 inches **Matrix data space:** 1,280 X 800 **Matrix screen:** 1,280 X 800 **Pixel size:** 4 bits **Pts/inch resolution:** 120 points/inch **Support equip:** Monitor; Board **Software supported:** High-level languages; Operating system; Business applications; CAD/CAM applications **Units sold:** 500 since 1986 **Cost:** $1,595

XTAR ELECTRONICS, INC.

☐ POLYGONE PG-1000
Technology: Raster display **Input:** Keyboard; Touch screen; Light pen; Cursor; Trackball; Joystick; Thumbwheel; Tablet; Mouse **Matrix data space:** 64K X 16 **Matrix screen:** 640 X 400 **Pixel size:** 4 bits **Color:** supported **Capability:** 3D **Software supported:** High-level languages **Introduced:** 1985 **Cost:** $3,500

IMAGE PROCESSORS

ADS IMAGING SYSTEMS

☐ PIP-4000
Technology: Camera; Video; Windowing **Input:** Keyboard; Cursor; Mouse **Includes:** Digitizer **Matrix data space:** 128 X 128; 2,048 X 2,048 **Matrix screen:** 512 X 512 **Color:** supported **Introduced:** 1986 **Cost:** $8,000-$30,000

BELL & HOWELL SERVICE CO.

☐ Copiscan 2000
Technology: Beltbed; Raster display; Camera **Input:** Keyboard; Mouse **Screen size:** 15 inches **Matrix data space:** 2,048 X 2,048 **Matrix screen:** 1,024 X 1,536; 1,664 X 2,200 **Pts/inch resolution:** 20-400 **Zoom ratio:** 0.5 to 2 **Support equip:** Interface board and drivers **Software supported:** High-level languages **Units sold:** 200 since 1984 **Cost:** $10,000-$20,000

COLORADO VIDEO, INC.

☐ Model 274D
Technology: Raster display **Input:** Host dependent **Matrix screen:** 512 X 480 **Pixel size:** 8 bits **Color:** supported **Support equip:** Interface card **Introduced:** 1982 **Cost:** $7,600

☐ 492 Video Subtractor
Matrix screen: 512 X 240; 512 X 480 **Color:** supported **Support equip:** Interface card **Introduced:** 1984 **Cost:** $6,500-$8,800

CORECO, INC. (THE COMPUTER RESEARCH COMPANY)

☐ oculus 100
Technology: Camera **Input:** Keyboard; Video signal **Matrix data space:** 480 X 512 **Matrix screen:** 200 X 512 **Pixel size:** 1 bits **Color:** supported **Maximum colors:** 256 displayable **Software supported:** High-level languages **Cost:** $995

☐ oculus 150
Technology: Camera; Video **Input:** Keyboard; Video signal **Matrix data space:** 480 X 512 **Color:** supported

☐ oculus 200
Technology: Video **Input:** Keyboard **Matrix data space:** 480 X 512 **Pixel size:** 21 bits **Color:** supported **Maximum colors:** 256 displayable **Software supported:** High-level languages

DATACOPY CORP.

☐ Integrated Imaging System (Models 912, 914, 920)
Technology: Camera **Pixel size:** 8 bits **Color:** supported **Capability:** 3D **Software supported:** High-level languages; Word Image Processing System **Introduced:** 1985 **Cost:** $12,950-$16,950

☐ 50-1 Enhanced Imaging System
Technology: Raster display **Input:** Camera **Screen size:** 15 inches **Matrix data space:** 1,728 X 2,200 **Matrix screen:** 2,846 X 1,728 X 256 **Software supported:** Word Image Processing System **Introduced:** 1983 **Cost:** $25,500

☐ 700 Word Image Processing System
Technology: Flatbed **Matrix data space:** 1,728 X 2,235 **Matrix screen:** 720 X 340; 1,728 X 2,846 **Pixel size:** 1 bits **Pts/inch resolution:** 203 **Software supported:** Word Image Processing System; Character Image Recognition **Introduced:** 1985 **Cost:** $3,950

☐ 730 Word Image Processing System
Technology: Flatbed **Pts/inch resolution:** 300 **Support equip:** Cables; Software **Software supported:** Word Image Processing System; Image Recognition **Units sold:** 1985 **Cost:** $3,950

☐ 800 Integrated Imaging System
Input: Camera **Matrix screen:** 720 X 348; 1,728 X 2,846 **Pixel size:** 8 bits **Pts/inch resolution:** 203 **Software supported:** Word Image Processing System **Introduced:** 1984 **Cost:** $9,945

☐ 90 Integrated Imaging System
Input: Camera **Matrix screen:** 720 X 348; 1,728 X 2,846 **Pixel size:** 8 bits **Capability:** 3D **Software supported:** Word Image Processing System; Character Image Recognition **Introduced:** 1983 **Cost:** $9,945

☐ 900 Integrated Imaging System Model 924
Input: Camera **Includes:** Digitizer **Matrix screen:** 1,728 X 2,-846; 720 X 348 **Pixel size:** 8 bits **Software supported:** Word Image Processing System **Introduced:** 1984 **Cost:** $19,950

DATACUBE

☐ 128 Family
Technology: Camera **Input:** Keyboard **Includes:** Digitizer **Matrix screen:** 384 X 512 **Pixel size:** 8 bits **Color:** supported **Maximum colors:** 256 in palette **Support equip:** Cables; Software **Software supported:** High-level languages **Units sold:** 1,000 since 1984 **Cost:** $2,995

EARTH GUIDE CO.

☐ Pixelcaster Vision System
Technology: Raster display **Input:** Keyboard **Includes:** Plotter or hard copy device **Matrix data space:** 910 X 525 **Matrix screen:** 910 X 525 **Pixel size:** 4 bits **Color:** supported **Capability:** 3D **Software supported:** High-level languages **Units sold:** 80 since 1982 **Cost:** $650-$12,500

GOULD, INC.
Imaging & Graphics Division

☐ FD5000
Technology: Raster display **Input:** Cursor; Trackball; Joystick **Includes:** Digitizer **Screen size:** 9 to 19 inches **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 512 X 512 **Pixel size:** 8 to 32 bits **Pts/inch resolution:** 40 to 100 **Color:** supported **Capability:** 3D **Support equip:** Software **Software supported:** High-level languages; Operating system; Scientific or medical applications; Interactive image processing **Introduced:** 1983 **Cost:** $10,500-$84,000

IMAGING TECHNOLOGY, INC.

☐ PCVisionplus
Technology: Gate arrays **Input:** Video camera **Matrix data space:** 1,024 X 512 **Matrix screen:** 640 X 480 **Color:** supported **Introduced:** 1986 **Cost:** $1,995

☐ PCVisionplus Frame Grabber
Technology: Raster display **Input:** Standard video camera **Matrix data space:** 1,024 X 512 **Matrix screen:** 640 or 512 X 480 **Color:** supported **Introduced:** 1986 **Cost:** $1,995

☐ Series 100 Single Board Real-time Image Processor
Technology: CMOS Gate array **Matrix data space:** 1,024 X 1,-024 or 512 **Matrix screen:** 640 or 512 X 512 **Pixel size:** 6; 8; 12 bits **Zoom ratio:** 2X; 4X; 8X **Color:** supported **Support equip:** Software **Software supported:** Inspection; Graphics; Paint systems; Medical imaging; Research and development applications **Introduced:** 1986 **Cost:** $3,995-$4,495

☐ Series 151 Image Processor
Technology: Camera; Gate arrays **Includes:** Digitizer **Matrix data space:** 1,024 X 512; 640 X 512 **Matrix screen:** 512 X 512 **Pixel size:** 8; 16 bits **Zoom ratio:** 16:1 **Color:** supported **Software supported:** Operating system; Scientific or medical applications; Machine vision, medical imaging, research and development applications **Introduced:** 1986 **Cost:** $11,495

KONTRON ELECTRONICS

☐ I.P.S.
Technology: Raster display **Input:** Keyboard; Tablet; Video **Includes:** Digitizer **Screen size:** 12; 13 inches **Matrix data space:** 4,096 X 4,096; 64K X 64K **Matrix screen:** 512 X 256; 780 X 540 **Pixel size:** 8 bits **Zoom ratio:** 1:2:4 **Color:** supported **Maximum colors:** 16.7M in palette **Capability:** 3D **Software supported:** High-level languages; Operating system **Units sold:** 600 since 1980 **Cost:** $50,000-$100,000

MATROX ELECTRONIC SYSTEMS, LTD.

☐ PIP-512
Technology: Raster display **Input:** Cursor **Matrix data space:** 1,024 X 1,024 **Matrix screen:** 512 X 512 **Pixel size:** 8 bits **Color:** supported **Maximum colors:** 16.7M in palette; 256 displayable **Support equip:** Software **Introduced:** 1985 **Cost:** $1,995

MEGAVISION, INC.

☐ 1024-XM
Technology: Raster display; Camera **Input:** Keyboard; Button device; Cursor; Trackball; Joystick; Tablet; Mouse **Includes:** Plotter or hard copy device; Digitizer **Screen size:** 19 inches **Matrix data space:** 4K X 4K **Matrix screen:** 1,024 X 1,024 **Pixel size:** 32 bits **Pts/inch resolution:** 100 **Zoom ratio:** 16:1 **Color:** supported **Maximum colors:** 16M in palette; 16M displayable **Support equip:** Cables; Software; I/O Board **Software supported:** High-level languages; Operating system; Scientific or medical applications **Units sold:** 20 since 1984 **Cost:** $40,000-$70,000

RECOGNITION CONCEPTS, INC.

☐ Trapix
Technology: Raster display **Input:** Keyboard; Cursor; Trackball; Joystick; Camera; VCR **Includes:** Digitizer **Screen size:** 13; 19 inches **Matrix data space:** 2K X 2K **Matrix screen:** 256 X 256; 512 X 512; 1,024 X 1,024 **Pixel size:** 8 to 16 bits **Zoom ratio:** 8:1 **Color:** supported **Maximum colors:** 16M in palette **Support equip:** Cables; Software; Interface card **Software supported:** High-level languages; Scientific or medical applications **Units sold:** 250 since 1982 **Cost:** $16,900-$50,000

UNITRON IMAGETEK SYSTEMS
(division of Unitron, Inc.)

☐ System IA 1000
Input: TV camera **Screen size:** 9 inches **Software supported:** Operating system **Cost:** $14,800

PLOTTERS/HARD-COPY DEVICES

ADVANCED COLOR TECHNOLOGY, INC.

☐ ACT II Color Ink Jet Printer
Technology: Ink jet **Zoom ratio:** 8:1 **Plot speed:** 90 seconds/page **Resolution:** 85 X 140 dots/inch **Accuracy:** (±) 0.004 inch **Repeatability:** (±) 0.004 inch **Color:** supported **Maximum colors:** 125 in palette **Capability:** 3D **Software supported:** CAD/CAE applications **Introduced:** 1983 **Cost:** $6,150

☐ ACT IV (Chromajet 4000)
Technology: Drum; Tablet or table **Input:** Tablet **Resolution:** 60-250 dots/inch **Repeatability:** 0.01 inch **Color:** supported **Introduced:** 1986 **Cost:** $5,995

ALLEN DATAGRAPH

☐ 700 Series
Technology: Flatbed **Input:** Keyboard **Plotting method:** Line **Plot speed:** 9 inches/second **Resolution:** 0.005 inch **Pens:** 1 Fibertip **Firmware avail.:** Character Set **Units sold:** 1,000 since 1983 **Cost:** $1,195-$1,595

☐ 900 Series
Technology: Flatbed **Input:** Keyboard **Plotting method:** Line **Plot speed:** 9 inches/second **Resolution:** 0.005 inch **Units sold:** 1,000 since 1984 **Cost:** $1,595-$1,895

ALPHA MERICS CORP.

☐ Alphaplot I
Technology: Flatbed **Input:** Keypad **Plotting method:** Internal vector generation **Plot speed:** 10 inches/sec **Resolution:** 0.001 inch **Accuracy:** (±) 0.001 inch **Repeatability:** 0.002 inch **Pens:** 6 Liquid ink; Fibertip; Felt-tip; Roller ball **Firmware avail.:** Character Set; Curve; Scaling; Window; Circle **Color:** supported **Software supported:** High-level languages **Units sold:** 2,000 since 1979 **Cost:** $4,590

☐ Alphaplot II
Technology: Flatbed **Input:** Keypad **Plotting method:** Internal vector generation **Plot speed:** 10 inches/sec **Resolution:** 0.001 inch **Accuracy:** (±) 0.001 inch **Repeatability:** 0.002 inch **Pens:** 6 Liquid ink; Fibertip; Felt-tip **Firmware avail.:** Character Set; Curve; Scaling; Window **Color:** supported **Units sold:** 2,000 since 1983 **Cost:** $5,990

☐ Complete (Plotter/Digitizer System)
Technology: Flatbed **Input:** Joystick **Plotting method:** Internal vector generation **Plot speed:** 10 inches/sec **Resolution:** 0.001 inch **Accuracy:** (±) 0.003 inch **Repeatability:** 0.001 inch **Pens:** 6 Fibertip; Roller ball; Wet ink **Firmware avail.:** Character Set; Curve; Scaling; Chart mode **Color:** supported **Software supported:** High-level languages **Units sold:** 400 since 1984 **Cost:** $6,-395

☐ Datascribe 5 Drafting System
Technology: Flatbed **Input:** Keyboard **Plotting method:** Line **Plot speed:** 8 inches/sec **Resolution:** 0.00125 inch **Accuracy:** (±) 0.001 inch **Repeatability:** (±) 0.00125 inch **Pens:** Wet ink; Felt-tip; Fibertip **Firmware avail.:** Character Set **Color:** supported **Software supported:** CAD/CAM applications **Units sold:** 3,000 since 1984 **Cost:** $8,350

☐ Datascribe 5D
Technology: Flatbed **Input:** Keyboard **Plotting method:** Line **Plot speed:** 8 inches/sec **Resolution:** 0.00125 inch **Accuracy:** (±) 0.00125 inch **Repeatability:** (±) 0.00125 inch **Pens:** Wet ink; Felt-tip; Fibertip **Firmware avail.:** Character Set **Color:** supported **Software supported:** CAD/CAM applications **Units sold:** 500 since 1984 **Cost:** $9,450

ARISTO GRAPHIC CORP.

☐ ARISTOMAT 100
Technology: Flatbed **Input:** Keyboard **Plotting method:** Line **Plot speed:** 2.8 inches/sec **Resolution:** 0.0002 inch **Accuracy:** (±) 0.0008 inch **Repeatability:** (±) 0.0004 inch **Pens:** 1 Scribe; Cutting blade; Rapidograph; Ballpoint; Pentel **Firmware avail.:** Character Set; Scaling **Software supported:** CAD/CAM applications; Numeric control applications **Units sold:** 75 since 1975 **Cost:** $60,000-$85,000

BESELER CORP.

☐ 4500 Series Film Recorder
Technology: Raster display **Input:** Camera **Color:** supported **Capability:** 3D **Units sold:** 400 since 1984 **Cost:** $2,995-$3,995

C. ITOH ELECTRONICS, INC.

☐ CIE-2400
Technology: Electrostatic **Plotting method:** Point **Plot speed:** 1 inch/second **Resolution:** 400 dots/inch **Capability:** 3D **Software supported:** Scientific or medical applications; CAD/CAM applications **Introduced:** 1984 **Cost:** $55,000

☐ CIE-3600
Technology: Electrostatic **Plotting method:** Point **Plot speed:** 1 inch/second **Resolution:** 400 dots/inch **Capability:** 3D **Software supported:** Scientific or medical applications; CAD/CAM applications **Introduced:** 1984 **Cost:** $65,000

CALCOMP
(subsidiary of Sanders Associates, Inc.)

☐ Model 1042 GT
Technology: Drum **Plotting method:** Line **Plot speed:** 14 inches/sec **Resolution:** 0.001 inch **Accuracy:** 0.01 inch **Repeatability:** 0.005 inch **Pens:** Disposable liquid ink; Fibertip; Liquid ballpoint; Plastic tip; Refillable liquid ink **Steps/inch:** 1,016 **Firmware avail.:** Character Set; Scaling; Rotation; Windowing; Mirroring **Color:** supported **Support equip:** Software **Introduced:** 1985

☐ Model 1043 GT
Technology: Drum **Plotting method:** Line **Plot speed:** 14 inches/sec **Resolution:** 0.001 inch **Accuracy:** 0.01 inch **Repeatability:** 0.005 inch **Pens:** Disposable liquid ink; Liquid ballpoint; Fibertip; Plastic tip; Refillable liquid ink **Steps/inch:** 1,016 **Firmware avail.:** Character Set; Scaling; Rotation; Windowing; Mirroring **Support equip:** Software **Introduced:** 1985 **Cost:** $8,-905

☐ Model 1044 GT
Technology: Drum **Resolution:** 0.001 inch **Accuracy:** 0.01 inch **Repeatability:** 0.005 inch **Pens:** Disposal liquid ink; Liquid ballpoint; Fibertip; Plastic tip; Refillable liquid ink **Steps/inch:** 1,-016 **Firmware avail.:** Scaling; Multiple character sets; Rotation; Windowing; Mirroring **Color:** supported **Support equip:** Software **Introduced:** 1985 **Cost:** $13,900

☐ Model 1077
Technology: Drum; Beltbed **Plotting method:** Line **Plot speed:** 37 inches/sec **Resolution:** 0.0005 inch **Accuracy:** (±) 0.01 inch **Repeatability:** (±) 0.005 inch **Pens:** 4 Pressurized ballpoint; Conventional liquid ink; Refillable liquid ink; Plastic tip; Ceramic tip; Fibertip; Liquid ballpoint **Steps/inch:** 2,032 **Firmware avail.:** Character Set; Curve; Scaling; Rotation; Mirroring; Deskewing **Color:** supported **Software supported:** Business applications; Scientific or medical applications; Drafting applications **Introduced:** 1982 **Cost:** $24,800

☐ Samurai
Technology: Digital film recorder; 35mm slides **Input:** Keyboard **Includes:** Plotter or hard copy device; Digitizer **Pts/inch resolution:** 4,096 X 4,096 **Color:** supported **Maximum colors:** 16M in palette **Capability:** 3D **Support equip:** Cables; Software; Interface board **Software supported:** High-level languages **Introduced:** 1985 **Cost:** $11,950

☐ 1040GT Series
Technology: Drum **Input:** Joystick **Plotting method:** Line **Plot speed:** 14 inches/sec **Resolution:** 0.001 inches **Accuracy:** (±)0.1 inch **Repeatability:** 0.005 inch **Pens:** 8 Ballpoint; Liquid ink; Nylon tip; Ceramic tip **Steps/inch:** 1,016 **Firmware avail.:** Character Set; Scaling; Rotation; Windowing; Mirroring; Deskewing **Color:** supported **Support equip:** Software **Software supported:** Plot Manager **Introduced:** 1985 **Cost:** $8,905-$13,900

CELTIC TECHNOLOGY, INC.

☐ VFR 2000
Technology: Camera; 35mm film **Resolution:** 800 lines per in. **Color:** supported **Capability:** 3D **Support equip:** Cables **Units sold:** 2,000 since 1983 **Cost:** $2,795

COLORPIX, INC.

☐ TC1040
Technology: Ink-jet **Plotting method:** Point **Resolution:** 85 or 120 dots/inch (selectable) **Pens:** 1 Disposable ink cartridge **Firmware avail.:** Character Set **Color:** supported **Software supported:** Business applications; Scientific or medical applications; PCB layout; Engineering; Presentation graphics applications **Introduced:** 1983 **Cost:** $5,995

COMPUTER TALK, INC.

☐ Model 500
Technology: Flatbed **Input:** Keyboard **Includes:** Digitizer **Plotting method:** Line **Plot speed:** 20 inches/sec **Resolution:** 2,000 points/inch **Accuracy:** 0.01 inch **Repeatability:** 0.0005 inch **Pens:** 4 Ballpoint; Cutter; Drill; Ink **Firmware avail.:** Character Set; Curve; Scaling **Color:** supported **Software supported:** High-level languages; Scientific or medical applications; CAD/CAM applications; Engineering applications **Units sold:** 3 since 1982 **Cost:** $42,500

COMREX INTERNATIONAL, INC.

☐ CR-1810 Plotter
Technology: Flatbed **Plotting method:** Line **Accuracy:** 0.004 inch **Pens:** 1 Fibertip **Color:** supported **Cost:** $695

DATA TECHNOLOGY, INC.

☐ DP 4060
Technology: Flatbed **Input:** Cursor **Includes:** Digitizer **Resolution:** 0.001 inch **Accuracy:** (±) 0.001 inch **Repeatability:** 0.001 inch **Pens:** 2 Fibertip; Pencil; Pressurized ballpoint; Scribe; Liquid ink **Support equip:** Cables **Software supported:** CAD/CAM applications; Geometrics, Drafting; Mapping applications **Units sold:** 50 since 1980 **Cost:** $39,500

☐ DT 3454
Technology: Flatbed **Input:** Console **Plotting method:** Line **Plot speed:** 16 inches/sec. **Resolution:** 0.0025 inch **Accuracy:** (±) 0.004 inch **Repeatability:** (±) 0.0025 inch **Pens:** 2 Liquid ink; Pressurized ballpoint **Support equip:** Cables **Software supported:** CAD/CAM applications **Units sold:** 1,000 since 1970 **Cost:** $25,000

☐ DT 5544
Technology: Flatbed **Resolution:** 0.002 inches **Accuracy:** 0.002 inch **Repeatability:** 0.002 inch **Pens:** 3 Fibertip; Scribe; Pencil; Pressurized ballpoint; Liquid ink **Support equip:** Cables **Units sold:** 3 since 1986 **Cost:** $40,000

DATAPORT/CS

☐ MP 101
Technology: Flatbed **Resolution:** 0.00008 inch **Pens:** 3 Fibertip; Wet ink; Ballpoint **Firmware avail.:** Character Set; Curve; Scaling **Color:** supported **Support equip:** Cables; Software; ROM **Units sold:** 5,800 since 1985 **Cost:** $395

DUNN INSTRUMENTS, INC.
(division of DBA Systems, Inc.)

☐ MicroColor
Technology: Camera **Input:** Video signal **Plotting method:** Raster **Resolution:** 1,024 X 1,280 **Color:** supported **Support equip:** Cables **Software supported:** High-level languages **Units sold:** 200 since 1984 **Cost:** $3,500-$4,500

☐ MultiColor
Technology: Camera **Input:** Video signal **Plotting method:** Raster **Resolution:** 1,400 lines **Color:** supported **Software supported:** CAD/CAM applications **Units sold:** 200 since 1984 **Cost:** $4,500-$9,000

ENTER COMPUTER, INC.

☐ SP1000
Technology: Flatbed **Plotting method:** Line **Plot speed:** 16 inches/sec. **Resolution:** 0.001 inches **Accuracy:** 0.004 inch **Repeatability:** 0.004 inch **Pens:** 1 Fibertip; Rollerball; Liquid ink **Color:** supported **Software supported:** High-level languages **Introduced:** 1986 **Cost:** $3,995

☐ SP1200
Technology: Flatbed **Plotting method:** Line **Plot speed:** 10 inches/sec **Resolution:** 0.0025 inches **Accuracy:** 0.005 inch **Repeatability:** 0.005 inch **Pens:** 1 Fibertip; Rollerball; Liquid ink **Color:** supported **Software supported:** High-level languages **Units sold:** 1,000 since 1985 **Cost:** $4,995

☐ SP600
Technology: Flatbed **Plotting method:** Line **Plot speed:** 14 inches/sec **Resolution:** 0.004 inch **Accuracy:** 0.008 inch **Repeatability:** 0.004 inch **Pens:** 6 Rapidograph-type; Fibertip **Firmware avail.:** Character Set **Color:** supported **Maximum colors:** 10 displayable **Software supported:** High-level languages **Units sold:** 6,000 since 1984 **Cost:** $1,095

☐ Sweet-P 100
Technology: Flatbed **Plotting method:** Line **Plot speed:** 6 inches/sec **Resolution:** 0.004 inch **Accuracy:** (±) 0.004 inch **Repeatability:** (±) 0.004 inch **Pens:** 1 Fibertip **Firmware avail.:** SPGL **Color:** supported **Maximum colors:** 10 displayable **Support equip:** Cables; Software **Software supported:** Business applications; Engineering applications **Units sold:** 10,000 since 1982 **Cost:** $395

FACIT, INC.

☐ Model 4550
Technology: Hybrid **Plotting method:** Vector **Plot speed:** 6 inches/sec **Resolution:** (±) 0.004 inch **Repeatability:** 0.008 inch **Pens:** 6 Ballpoint; Fibertip; Ceramic tip **Color:** supported **Maximum colors:** 12 in palette; 6 displayable **Capability:** 3D **Support equip:** Cables; Software **Software supported:** Business applications; CAD/CAE; Architectural applications **Introduced:** 1985 **Cost:** $795

☐ Model 4551
Technology: Hybrid **Plotting method:** Vector **Plot speed:** 8 inches/sec **Resolution:** (±) 0.004 inch **Repeatability:** 0.008 inch **Pens:** 6 Ballpoint; Fibertip; Ceramic tip **Color:** supported **Maximum colors:** 12 in palette; 6 displayable **Capability:** 3D **Support equip:** Cables; Software **Software supported:** Business applications; CAD/CAE; Engineering; Architectural applications **Introduced:** 1985 **Cost:** $995

FOCUS GRAPHICS, INC.

☐ VideoSlide35
Technology: Photographics, 35mm; Polaroid SX-70 **Input:** Video **Resolution:** 1,024 X 768 **Color:** supported **Capability:** 3D **Support equip:** Cables **Units sold:** 1,500 since 1982 **Cost:** $3,-299-$3,899

GOULD, INC.
Recording Systems Division

☐ Colorwriter Model 6120
Technology: Flatbed; Electrostatic **Input:** Keyboard **Plotting method:** Line **Plot speed:** 7.8 inches/sec **Resolution:** 0.002 inch **Accuracy:** 0.002 inch **Repeatability:** 0.008 inch **Pens:** 7 Fibertip; Roller ball; Ceramic tip **Steps/inch:** 0.002 **Firmware avail.:** Character Set **Color:** supported **Support equip:** Cables **Software supported:** Business applications; CAD/CAM applications; Scientific or medical applications; Engineering applications **Introduced:** 1985 **Cost:** $995

☐ Colorwriter Model 6310
Technology: Flatbed; Electrostatic **Input:** Keyboard **Plotting method:** Line **Plot speed:** 7.8 inches/sec **Resolution:** 0.001 inch **Accuracy:** 0.001 inch **Repeatability:** 0.002 inch **Pens:** 7 Fibertip; Roller ball; Drafting **Steps/inch:** 0.001 **Firmware avail.:** Character Set **Color:** supported **Support equip:** Cables **Software supported:** Business applications; CAD/CAM applications; Scientific or medical applications; Engineering applications **Introduced:** 1984 **Cost:** $1,695

☐ Colorwriter Model 6320
Technology: Flatbed; Electrostatic **Input:** Keyboard **Plotting method:** Line **Plot speed:** 15.75 inches/sec **Resolution:** 0.001 inch **Accuracy:** 0.001 inch **Repeatability:** 0.002 inch **Pens:** 10 Fibertip; Roller ball; Drafting **Steps/inch:** 0.001 **Firmware avail.:** Character Set **Color:** supported **Support equip:** Cables **Software supported:** Business applications; CAD/CAM applications; Scientific or medical applications; Engineering applications **Introduced:** 1984 **Cost:** $1,895

HEWLETT-PACKARD CO.

☐ Color Pro
Technology: Flatbed **Plot speed:** 15.7 inches/sec **Resolution:** 0.001 in. **Accuracy:** 0.004 inch **Repeatability:** 0.004 inch **Pens:** 8 Fibertip **Color:** supported **Cost:** $1,295

☐ HP 7470A
Technology: Microgrip vector **Plotting method:** Line **Resolution:** 0.001 inch **Repeatability:** 0.004 inch **Pens:** 2 Fibertip **Color:** supported **Software supported:** Business applications; Scientific or medical applications **Introduced:** 1982 **Cost:** $1,-095

☐ HP 7475A
Technology: Microgrip vector **Plotting method:** Line **Resolution:** 0.001 inch **Repeatability:** 0.004 inch **Pens:** 6 Fibertip; Liquid ink **Color:** supported **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications **Introduced:** 1983 **Cost:** $1,895

CROSSPOINT SYSTEMS, INC.
1710 Willow Creek Circle
Eugene, OR 97402
(503) 485-4254

Share peripherals among multiple PCs in any combination up to 8, all under automatic software control. See the Crosspoint Systems ad under the heading Local Area Networks for the ultimate solution in data switching.

☐ HP 7550A

Technology: Microgrip vector Plotting method: Line Resolution: 0.001 inch Repeatability: 0.004 inch Pens: 8 Fibertip; Rollerball; Liquid ink Color: supported Software supported: Business applications; Scientific or medical applications; CAD/CAM applications Introduced: 1984 Cost: $3,900

HOUSTON INSTRUMENT
(division of AMETEK, Inc.)

☐ DMP-29

Technology: Flatbed Input: Keyboard; Tablet Plotting method: Line Plot speed: 1 to 22 inches/sec Resolution: 0.001; 0.005 inch Accuracy: 0.008 inch Repeatability: (±) 0.004 inch Pens: 8 Drafting; Fibertip; Ballpoint; Hard-nib Firmware avail.: Character Set Color: supported Software supported: Business applications; CAD/CAM applications Introduced: 1982 Cost: $2,295

☐ DMP-29-3

Technology: Flatbed Input: Keyboard; Tablet Plotting method: Line Plot speed: 22 inches/sec Resolution: 0.005 inch Accuracy: 0.008 inch Repeatability: (±) 0.004 inch Pens: Fiber-tip; Drafting Steps/inch: 200 Firmware avail.: Character Set Color: supported Introduced: 1983 Cost: $2,790

☐ DMP-40

Technology: Grit-wheel Input: Keyboard; Tablet Plotting method: Line Plot speed: 4.2 inches/sec Resolution: 0.005 inch Accuracy: 0.005 inch Repeatability: (±) 0.005 inch Pens: 1 Hard-nib; Ballpoint; Film ink Firmware avail.: Character Set Color: supported Software supported: Business applications; CAD/CAM applications Introduced: 1982 Cost: $1,195

☐ DMP-41/42

Technology: Grit-wheel Input: Keyboard; Tablet Plotting method: Line Plot speed: 4.2 inches/sec Resolution: 0.005 inch Accuracy: (±) 0.35 inch Repeatability: (±) 0.005 inch Pens: 1 Hard-nib; Ballpoint; Film ink Firmware avail.: Character Set Color: supported Software supported: CAD/CAM applications Introduced: 1983 Cost: $3,295

☐ DMP-51/52

Technology: Grit-wheel Input: Keyboard; Tablet Plotting method: Line Plot speed: 22 inches/sec Resolution: 0.001 inch Accuracy: 0.01 inch Repeatability: (±) 0.002 inch Pens: 1 Drafting Steps/inch: 1,000 Firmware avail.: Character Set; Curve; Scaling; Windowing Color: supported Software supported: CAD/CAM applications Introduced: 1984 Cost: $4,995

☐ DMP-51/52 MP

Technology: Grit-wheel Input: Keyboard; Tablet Plotting method: Line Plot speed: 22 inches/sec Resolution: 0.001 inch Accuracy: 0.01 inch Repeatability: (±) 0.002 inch Pens: 14 Drafting; Hard-nib; Tungsten-tip; Stainless steel Steps/inch: 1,000 Firmware avail.: Character Set; Curve; Scaling; Windowing Color: supported Software supported: CAD/CAM applications Introduced: 1984 Cost: $6,495

☐ DMP-56

Technology: Grit-wheel Input: Keyboard; Tablet Plotting method: Line Plot speed: 17 inches/sec. Resolution: 0.001 inch Repeatability: (±)0.002 inch Pens: 1 Stainless steel; Tungsten tip; Water-based hard-nib Color: supported Software supported: CAD/CAM applications; Business applications; Engineering and architecture applications Introduced: 1986 Cost: $5,995

☐ PC Plotter Model 595

Technology: Grit-wheel Input: Keyboard; Tablet Plotting method: Line Plot speed: 4.2 inches/sec Resolution: 0.004 inch Repeatability: (±) 0.004 inch Pens: 4 Hard-nib Firmware avail.: Character Set; Curve; Scaling Color: supported Software supported: Business applications; CAD/CAM applications Introduced: 1984 Cost: $699

☐ PC Plotter Model 695

Technology: Grit-wheel Input: Keyboard; Tablet Plotting method: Line Plot speed: 4.2 inches/sec Resolution: 0.004 inch Repeatability: (±) 0.004 inch Pens: 4 Hard-nib Firmware avail.: Character Set; Curve; Scaling Color: supported Software supported: Business applications; CAD/CAM applications Introduced: 1984 Cost: $799

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Model 6180

Technology: Flatbed Pens: 8 Color: supported Software supported: Scientific or medical applications Introduced: 1986 Cost: $1,285

☐ Model 7372

Technology: Flatbed Input: Keyboard Pens: 6 Fibertip Color: supported Software supported: Business applications; CAD/CAM applications Introduced: 1984 Cost: $1,900

☐ 7375 Model 2

Technology: Flatbed Input: Joystick Resolution: 0.00012 inch Repeatability: 0.004 inch Pens: 8 Fibertip; Roller ball; Liquid ink; Drafting Color: supported Software supported: CAD/CAM applications Introduced: 1985 Cost: $17,200; Lease (mo.) — $1,600

IOLINE CORP.

☐ LP3700

Technology: Drum; Vector display Input: Keyboard Plotting method: Line Plot speed: 10 inches/sec. Resolution: 0.0025 inch Repeatability: 0.0025 inch Pens: Liquid ink; Fibertip; Roller ball Steps/inch: 0.0025 Firmware avail.: Character Set; Curve; Scaling Color: supported Support equip: Cables; ROM Software supported: CAD/CAM applications; CAE applications Units sold: 2,000 since 1985 Cost: $4,995

MANAGEMENT GRAPHICS, INC.

☐ TTS Plus

Technology: 35mm slides Input: Keyboard; Tablet Resolution: 1,000 points/inch Color: supported Maximum colors: 16M in palette; 256 displayable Capability: 3D Support equip: Software Introduced: 1984 Cost: $79,000

MATRIX INSTRUMENTS, INC.

☐ Model 3000

Technology: Camera; 35mm slides; 4 X 5, 8 X 10 format Input: Video Color: supported Capability: 3D Support equip: Cables Software supported: Operating system Introduced: 1980 Cost: $9,865-$10,865

☐ PCR

Technology: Camera; 35mm slides Color: supported Maximum colors: 16M in palette Support equip: Cables; Software; Interface card Software supported: Operating system Introduced: 1984 Cost: $11,795

☐ QCR-D4/2

Technology: Camera; 35mm slides; 4 X 5, 8 X 10 format Color: supported Maximum colors: 16M in palette Support equip: Cables; Software; Interface card Software supported: Operating system Introduced: 1982 Cost: $22,800

MITSUBISHI INTERNATIONAL CORP.

☐ CHC-65

Technology: Thermal transfer Resolution: 8 dot/mm Color: supported Introduced: 1986 Cost: $8,990

MUTOH AMERICA, INC.
(subsidiary of Mutoh Industries, Ltd.)

☐ IP-100 Desktop Plotter

Technology: Flatbed; Electrostatic Resolution: 0.025mm Repeatability: 0.0004 inch Pens: 8 Ink; Fibertip; Ballpoint; Ceramic-tip Steps/inch: 0.001 Units sold: 2,000 since 1984

NICOLET COMPUTER GRAPHICS DIVISION

☐ ZETA Sprint

Technology: Flatbed Input: Keyboard Plotting method: Line Plot speed: 14 inches/sec Resolution: 0.004 inch Accuracy: 0.008-0.004 inch Repeatability: 0.004 inch Pens: Fibertip Color: supported Introduced: 1984 Cost: $995

☐ ZETA 5400

Technology: Drum Input: Keyboard Plotting method: Line Plot speed: 35 inches/sec Resolution: 0.00049 inch Accuracy: (±) 0.002 inch Repeatability: (±) 0.002 inch Pens: 4 Ballpoint; Liquid ink; Liquid roller; Nylon-tip Steps/inch: 2,000 Firmware avail.: Character Set; Curve; Scaling Color: supported Software supported: High-level languages Introduced: 1980 Cost: $41,900; Lease (mo.) —$2,514

☐ ZETA 8

Technology: Drum Input: Keyboard Plotting method: Line Plot speed: 25 inches/sec Resolution: 0.001 inch Accuracy: (±) 0.002 inch Repeatability: (±) 0.001 inch Pens: 8 Liquid roller; Nylon-tip; Ballpoint; Liquid ink Steps/inch: 1,000 Firmware avail.: Character Set; Curve; Scaling Color: supported Software supported: High-level languages Introduced: 1982 Cost: $5,950

☐ ZETA 824

Technology: Drum Input: Keyboard Plotting method: Line Plot speed: 25 inches/sec Resolution: 0.001 inch Accuracy: (±) 0.002 inch Repeatability: (±) 0.004 inch Pens: 8 Liquid roller; Nylon-tip; Ballpoint; 4 Liquid ink Steps/inch: 1,000 Firmware avail.: Curve; Scaling; Plug-in character sets Color: supported Software supported: High-level languages Introduced: 1983 Cost: $8,900

☐ ZETA 824CS

Technology: Drum Input: Keyboard Plotting method: Line Plot speed: 25 inches/sec Resolution: 0.001 inch Accuracy: (±) 0.010 inch Repeatability: (±) 0.001 inch Pens: 8 Liquid roller; Nylon-tip; Ballpoint; 4 Liquid ink Steps/inch: 1,000 Firmware avail.: Curve; Scaling; Plug-in character sets Color: supported Software supported: High-level languages Introduced: 1985 Cost: $9,900

☐ ZETA 836

Technology: Drum Input: Keyboard Plotting method: Line Plot speed: 25 inches/sec Resolution: 0.001 inch Accuracy: (±) 0.010 inch Repeatability: (±) 0.001 inch Pens: 8 Liquid roller; Nylon-tip; Ballpoint; 4 Liquid ink Steps/inch: 1,000 Firmware avail.: Curve; Scaling; Plug-in character sets Color: supported Software supported: High-level languages Introduced: 1984 Cost: $11,900

☐ ZETA 836CS

Technology: Drum Input: Keyboard Plotting method: Line Plot speed: 25 inches/sec Resolution: 0.001 inch Accuracy: (±) 0.010 inch Repeatability: (±) 0.001 inch Pens: 8 Liquid roller; Nylon-tip; Ballpoint; 4 Liquid ink Steps/inch: 1,000 Firmware avail.: Curve; Scaling; Plug-in character sets Color: supported Software supported: High-level languages Introduced: 1985 Cost: $12,900

☐ ZETA 887

Technology: Drum Input: Keyboard Plotting method: Line Plot speed: 25 inches/sec Resolution: 0.001 inch Accuracy: (±) 0.002 inch Repeatability: (±) 0.001 inch Pens: 8 Liquid roller; Nylon-tip; Ballpoint; 4 Liquid ink Steps/inch: 1,000 Firmware avail.: Scaling; Plug-in character set Color: supported Maximum colors: 8 displayable Software supported: High-level languages Introduced: 1983 Cost: $7,950

NUMONICS

☐ Model 5412

Technology: Low inertia; Embossed roller Plotting method: Line Plot speed: 5-6 inches/sec Resolution: (Programmable) 0.005; (Transport) 0.0025 inch Accuracy: (±) 0.005 inch Pens: Ballpoint; Fibertip; Liquid ink; Ceramic Firmware avail.: Shape tables; Emulators Software supported: Operating system Units sold: 290 since 1982 Cost: $1,295

☐ Model 5424
Technology: Low inertia; Embossed roller **Plotting method:** Line **Plot speed:** 5-6 inches/sec **Resolution:** (Programmable) 0.005; (Transport) 0.0025 inch **Pens:** Ballpoint; Fibertip; Liquid ink; Ceramic **Steps/inch:** 0.0025 **Firmware avail.:** Shape tables; Emulators **Software supported:** Operating system **Units sold:** 282 since 1983 **Cost:** $2,975

☐ Model 5624
Technology: Low inertia; Embossed roller **Plotting method:** Line **Plot speed:** 9.8 inches/sec **Resolution:** 0.004 inch **Repeatability:** 0.008 inch **Pens:** Fibertip; Ballpoint; Ceramic; Liquid ink **Steps/inch:** 0.004 **Firmware avail.:** Emulator **Software supported:** Operating system **Units sold:** 104 since 1984 **Cost:** $6,000

☐ Model 5624R
Technology: Flatbed **Plotting method:** Line **Plot speed:** 13.75 inches/sec **Resolution:** 0.004 inch **Accuracy:** 0.008 inch **Pens:** Fibertip; Ballpoint; Liquid ink; Ceramic **Firmware avail.:** Character Set; Curve **Software supported:** Operating system **Introduced:** 1985 **Cost:** $8,000

POLAROID CORP.

☐ Palette
Technology: CRT image recorder; 35mm slides; Reflective print camera **Input:** Keyboard **Resolution:** 920 pixels X 700 lines **Accuracy:** 0.015 inch **Repeatability:** 0.0005 inch **Color:** supported **Maximum colors:** 72 displayable **Capability:** 3D **Support equip:** Cables; Software **Software supported:** Business applications; CAD/CAM applications **Introduced:** 1983 **Cost:** $1,999

☐ VideoPrinter Model 48
Technology: CRT image recorder; 35mm; 4 X 5 or 8 X 10 inch camera **Input:** Display **Resolution:** 1,400 X 1,024 matrix **Accuracy:** 0.015 inch **Repeatability:** 0.0005 inch **Color:** supported **Maximum colors:** 256 displayable **Capability:** 3D **Software supported:** Business applications; CAD/CAM applications; Image processing applications **Introduced:** 1985 **Cost:** $6,800

☐ VideoPrinter Model 8
Technology: CRT image recorder; 8 X 10 film system **Input:** Display **Resolution:** 1,280 X 1,024 matrix **Accuracy:** 0.015 inch **Repeatability:** 0.0005 inch **Color:** supported **Maximum colors:** 256 displayable **Capability:** 3D **Software supported:** Business applications; CAD/CAM applications; Image processing applications **Introduced:** 1983 **Cost:** $4,699

PRINTRONIX, INC.

☐ MVP
Technology: Impact matrix **Input:** Keyboard **Plotting method:** Point **Resolution:** 100 X 96; 60 X 72; 50 X 48 matrix **Accuracy:** (±) 0.005 inch **Repeatability:** (±) 0.005 inch **Firmware avail.:** Character Set **Software supported:** Business applications **Introduced:** 1982 **Cost:** $3,745

☐ 4160 Printer/Plotter
Technology: Impact matrix **Input:** Keyboard **Plotting method:** Point **Plot speed:** 13.6 inches/min **Resolution:** 160 X 168 dots/inch **Accuracy:** 0.003 inch **Software supported:** Business applications; Scientific or medical applications; CAD/CAM applications; Engineering; Bar code generation applications **Units sold:** 5,000 since 1983 **Cost:** $5,380

PROTOCAD

☐ CAD/Magic 3000
Input: Keyboard **Accuracy:** (±)0.003 inch **Repeatability:** 0.008 inch **Pens:** Resist ink **Cost:** $39,500

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ Quadjet
Technology: Ink jet **Input:** Keyboard **Resolution:** 640 points/line **Color:** supported **Introduced:** 1984 **Cost:** $895

ROLAND DG
(division of Roland Corp. US)

☐ DPX-2000
Technology: Flatbed **Plotting method:** Line **Plot speed:** 400mm/sec. **Resolution:** 0.0125mm **Accuracy:** (±)0.3% + 0.04 inch **Repeatability:** (±)0.02 inch **Pens:** 8 Fibertip; Oil-base; Ballpoint; Ceramic **Firmware avail.:** Scaling **Color:** supported **Support equip:** Cables **Software supported:** High-level languages; Operating system; Business applications **Introduced:** 1985 **Cost:** $4,795

☐ DXY-101
Technology: Flatbed **Plot speed:** 175mm/sec **Resolution:** 0.1mm **Pens:** 1 Fibertip **Color:** supported **Cost:** $595

☐ DXY-800
Technology: Flatbed **Plot speed:** 175mm/sec **Resolution:** 0.1mm **Repeatability:** 0.012 inch **Pens:** 8 Fibertip **Firmware avail.:** Character Set **Color:** supported **Cost:** $895

☐ DXY-880
Technology: Flatbed **Plotting method:** Line **Plot speed:** 8 inches/sec **Resolution:** 0.002 inch **Accuracy:** (±) 0.012 inch **Pens:** 8 Water base; Felt tip; Oil base **Color:** supported **Software supported:** Business applications **Cost:** $1,295

☐ DXY-980
Technology: Flatbed **Plotting method:** Line **Plot speed:** 10 inches/sec **Resolution:** 0.05mm/step; 0.002 inch **Repeatability:** (±)0.012 inch **Pens:** 8 Fibertip; OHP; Ballpoint; Ceramic tip; Ink **Color:** supported **Support equip:** Cables **Software supported:** High-level languages; Business applications **Cost:**

SEIKO INSTRUMENTS U.S.A., INC.
Graphics Devices & Systems Division

☐ CH-5201 Color Hard Copier
Technology: Thermal ink transfer **Zoom ratio:** 2X **Resolution:** 150 dots/inch **Accuracy:** 0.006 inch **Repeatability:** 0.006 inch **Color:** supported **Maximum colors:** 8 displayable **Introduced:** 1983 **Cost:** $12,650

SHARP ELECTRONICS CORP.
Systems Division

☐ CE-515P
Technology: Hybrid-grit wheel **Input:** Keyboard **Plotting method:** Point; Line **Plot speed:** 3.2 inches/sec **Resolution:** 0.008 inch **Accuracy:** 0.008 inch **Repeatability:** 0.008 inch **Pens:** 4 Water base; Ballpoint; Oil base; Felt-tip **Firmware avail.:** Character Set **Color:** supported **Support equip:** Software **Software supported:** Business applications **Introduced:** 1984 **Cost:** $399

SOLTEC DISTRIBUTION
(subsidiary of Soltec Corp.)

☐ Digital Plotter SPL-430
Technology: Drum **Input:** Keyboard **Includes:** Plotter or hard copy device; Digitizer **Plotting method:** Line **Plot speed:** 21.6 inches/sec. **Resolution:** 0.003 inches **Accuracy:** 0.008 inch **Repeatability:** 0.016; 0.008 inch **Pens:** 6 Fibertip; Roller; Drafting **Firmware avail.:** Character Set; Curve; Scaling; Grids; Window plot **Color:** supported **Support equip:** Software **Software supported:** High-level languages; Business applications; CAD/CAM applications; CAE applications **Units sold:** 100 since 1985 **Cost:** $1,595

SYSSCAN, INC.

☐ GT5000 Automatic Drafting Machine
Technology: Flatbed **Input:** Keyboard **Plotting method:** Line **Plot speed:** 40 inches/sec **Resolution:** 0.0004 inch **Accuracy:** (±) 0.002 inch **Repeatability:** (±) 0.0006 inch **Pens:** 4 Ballpoint; Liquid ink; Pressurized liquid ink; Felt-tip **Firmware avail.:** Scaling; Rotation; Windowing; Transformation; Interpolation **Color:** supported **Software supported:** High-level languages **Units sold:** 85 since 1978 **Cost:** $140,000

TAXAN CORP.

☐ KPL 710S
Technology: Flatbed **Input:** Keyboard **Plotting method:** Point **Plot speed:** 12 inches/sec **Resolution:** 0.001 inch **Accuracy:** 0.008 inch **Repeatability:** 0.016 inch **Pens:** 6 Fiber; Oil base; Ceramic **Color:** supported **Capability:** 3D **Software supported:** Operating system **Units sold:** 1,000 since 1985 **Cost:** $995

UNITED INNOVATIONS

☐ Mural "D" Size Plotter
Technology: Flatbed **Input:** Keyboard; Joystick **Includes:** Digitizer **Plot speed:** 5 inches/sec **Resolution:** 0.0035 inch **Repeatability:** 0.001 inch **Pens:** 4 H.P. type **Color:** supported **Support equip:** Software **Software supported:** Business applications; CAD/CAM applications; Architectural and electronic CAD; Civil/structural; Digitizing; Educational; Engineering applications **Units sold:** 200 since 1985 **Cost:** $2,495

WESTERN GRAPHTEC, INC.

☐ FP5201
Technology: Flatbed **Plot speed:** 16 inches/sec **Pens:** 10 Ballpoint; Fibertip; Ceramic **Color:** supported **Introduced:** 1985 **Cost:** $7,790

☐ GP9001
Technology: Curved flatbed **Input:** Keyboard **Includes:** Digitizer **Accuracy:** 0.008 inch **Repeatability:** 0.008 inch **Pens:** 4 Water; Oil base **Firmware avail.:** Character Set; Curve; Scaling **Color:** supported **Software supported:** High-level languages; CAD/CAM applications **Introduced:** 1986 **Cost:** $6,050-$6,275

☐ MP2000
Technology: Flatbed **Input:** Keyboard **Plot speed:** 10 inches/sec **Pens:** 8 Oil base; Water base; Fibertip; Ballpoint **Color:** supported **Units sold:** 1985 **Cost:** $998

☐ WX4731
Technology: Drum **Input:** Keyboard **Plotting method:** Line **Plot speed:** 8 inches/sec **Resolution:** 0.004 inch **Accuracy:** (±) 0.008 inch **Repeatability:** (±) 0.006 inch **Pens:** 4 Water or oil base **Steps/inch:** 250 **Firmware avail.:** Character Set; Curve; Scaling **Color:** supported **Introduced:** 1982 **Cost:** $3,290

XYNETICS PRODUCTS
(unit of General Signal Corp.)

☐ Model 1051
Technology: 33" X 44" Flatbed **Input:** Keyboard **Plotting method:** Line **Plot speed:** 40 inches/sec **Resolution:** 0.001 inch **Accuracy:** (±) 0.005 inch **Repeatability:** (±) 0.001 inch **Pens:** 4 Scribe; Ballpoint; Liquid ink **Firmware avail.:** Character Set; Curve; Scaling; Rotation **Color:** supported **Software supported:** Operating system **Units sold:** 500 since 1970 **Cost:** $60,000

PRINTERS

CHARACTER PRINTERS

ACOM COMPUTER CO.

☐ IJ150
150 cps Type: Inkjet Print positions: 142 Cost: $1,995

☐ MX120
80; 120 cps Type: Dot matrix Cost: $1,695

☐ MX160
33; 160 cps Type: Dot matrix Cost: $1,895

ADDMASTER CORP.
Peripheral Division

☐ Model 172
150 lpm Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 18; 21 Feed: Tractor Carriage width: 2.25 in. Support equip: Cables; Software Units sold: 10 since 1983 Cost: $345

ADDRESSOGRAPH FARRINGTON, INC.

☐ Direct Impression Printer (D.I.P.)
280 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 42 Buffer: 2K bytes Feed: Friction Introduced: 1983 Cost: $9,500

☐ DM 125
150 cps Type: Dot matrix Matrix: 9 X 7 Character set: 96 Print positions: 132 Printing: bidirectional Feed: Pin Carriage width: 10 in. Introduced: 1983 Cost: $1,600

☐ DM 340
340 cps Type: Dot matrix Matrix: 7 X 7 Character set: 128 Print positions: 132 Printing: bidirectional Feed: Pin Carriage width: 16 in. Introduced: 1983 Cost: $3,500

☐ DM 80
100 cps Type: Dot matrix Matrix: 9 X 9 Character set: 298 Print positions: 80 Printing: bidirectional Feed: Tractor Carriage width: 10 in. Introduced: 1983 Cost: $695

☐ DW 40
40 cps Type: Daisy wheel Character set: 96 Print positions: 136 Printing: bidirectional Buffer: 2K bytes Feed: Friction Carriage width: 16 in. Introduced: 1983 Cost: $2,495

☐ DW 47
47 cps Type: Daisy wheel Character set: 96 Print positions: 132; 158 Printing: bidirectional Buffer: 255 bytes Feed: Friction Introduced: 1983 Cost: $4,000

ALPHA MICROSYSTEMS

☐ AM-304
30; 100; 180 cps Type: Dot matrix Matrix: 84 X 84 Character set: 96 Print positions: 80; 132 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 11 in. Introduced: 1984

☐ AM-306
35; 110; 200 cps Type: Dot matrix Matrix: 5 X 4 staggered Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 14 in. Introduced: 1984

ALPHACOM
(division of Brown Kellogg, Inc.)

☐ Alphacom Aero
130 cps Type: Dot matrix Matrix: 6 X 8 Character set: 96 Resolution: 480; 960 dots per inch Printing: bidirectional Buffer: 2K bytes Feed: Friction; Pin-on platen Introduced: 1985 Cost: $250

☐ Alphacom 81
80 cps Type: Dot matrix Matrix: 8 X 9 Character set: 96 Print positions: 80 Buffer: 80 bytes Feed: Friction Carriage width: 8.75 in. Units sold: 10,000 since 1984 Cost: $170

☐ Alphapro
20 cps Type: Daisy wheel Character set: 94 Print positions: 80-132 Printing: bidirectional Buffer: 93; (optional) 4K bytes Feed: Friction Carriage width: 13 in. Introduced: 1984 Cost: $399

☐ Alphapro 101
20 cps Type: Daisy wheel Print positions: 132; 110; 165 Printing: bidirectional Buffer: 93 bytes Feed: Friction Carriage width: 13 in. Introduced: 1985 Cost: $399

ALPS ELECTRIC (USA), INC.
(subsidiary of Alps Electric Co., Ltd.)
SEE AD ON PAGE 169

☐ PTSWA-10
105 cps Type: Dot matrix Character set: 96 Print positions: 80 Printing: bidirectional Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1985

☐ P2000
50; 125; 250 cps Type: Dot matrix Character set: 96; 86; 131; 278 Print positions: 136 Resolution: 240 X 144 dots per inch Printing: bidirectional Buffer: 4K; 6K bytes Feed: Tractor; Friction; Sheet Carriage width: 16 in. Introduced: 1985

☐ P2100
80; 200; 400 cps Type: Dot matrix Resolution: 240 X 216 dots per inch Buffer: 4K-256K bytes Feed: Tractor Introduced: 1986 Cost: $1,595

AMERICAN COMPUTER HARDWARE CORP.

☐ ACB-300
300 lpm Type: Band Character set: 48; 64; 96 Print positions: 132; 136 Buffer: 1K; 2K; 4K; 8K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1981

☐ ACB-600
600 lpm Type: Band Character set: 48; 64; 96 Print positions: 132; 136 Buffer: 1K; 2K; 4K; 8K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1981

☐ ACM-200
200 lpm Type: Band Matrix: 7 X 7 Character set: 128 Print positions: 132; 66; 220 Printing: bidirectional Buffer: 2K; 8K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1981 Cost: $1,800-$2,900

☐ POS-132
82.5-165 cps Type: Dot matrix Matrix: 18 X 9; 9 X 9 Character set: 96 Print positions: 136; 163; 225 Resolution: 72 X 72 dots per inch Printing: bidirectional Buffer: 3.3K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1984

☐ POS-40
200 cps Type: Dot matrix Matrix: 9 X 9 Character set: 128 Print positions: 40 Resolution: 144 X 144 dots per inch Printing: bidirectional Buffer: 1.3K; (optional) 7.3K bytes Feed: Friction Carriage width: 3.2 in. Introduced: 1984 Cost: $995

☐ POS-80
75; 150 cps Type: Dot matrix Matrix: 18 X 9; 9 X 9 Character set: 96 Print positions: 80; 132; 96 Resolution: 72 X 72 dots per inch Printing: bidirectional Buffer: 3.4K bytes Feed: Tractor Carriage width: 10 in. Introduced: 1984

ANADEX, INC.
(subsidiary of Printronix, Inc.)

☐ DP-6500 Series
540 cps Type: Dot matrix Matrix: 17 X 18 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 4.5K bytes; 16K bytes Feed: Tractor; Friction Carriage width: 15 in. Units sold: 2,500 since 1983 Cost: $2,295

☐ DP-9000B Series
240 cps Type: Dot matrix Matrix: 7 X 9 Character set: 96 Print positions: 80 Printing: bidirectional Buffer: 3.5K bytes Feed: Tractor Carriage width: 9.5 in. Units sold: 3,500 since 1983 Cost: $1,200

☐ DP-9001B
250 cps Type: Dot matrix Matrix: 7 X 9; 11 X 9 Character set: 96 Print positions: 80 Printing: bidirectional Buffer: 3.5K; 5.5K bytes Feed: Tractor Carriage width: 9.5 in. Units sold: 1,500 since 1982 Cost: $1,200

☐ DP-9500B Series
240 cps Type: Dot matrix Matrix: 7 X 9; 9 X 9; 11 X 9 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 3.5K bytes Feed: Tractor Carriage width: 15 in. Units sold: 28,000 since 1983 Cost: $1,280

☐ DP-9501B
250 cps Type: Dot matrix Matrix: 7 X 9; 9 X 9; *11 X 9 Character* set: 96 Print positions: 132 Printing: bidirectional Buffer: 3.5K; 5.5K bytes Feed: Tractor Carriage width: 15 in. Units sold: 3,500 since 1983 Cost: $1,280

☐ DP-9620B Series
240 cps Type: Dot matrix Matrix: 7 X 9; 9 X 9; 11 X 9; 13 X 9 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 3.5K; 5.5K bytes Feed: Tractor Carriage width: 15 in. Units sold: 200 since 1983 Cost: $1,380

☐ DP-9625B Series
240 cps Type: Dot matrix Matrix: 17 X 18 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 3.5K; 5.5K bytes Feed: Tractor Carriage width: 15 in. Units sold: 3,000 since 1983 Cost: $1,500

☐ DP-9752B Color/Scribe Printer
240 cps Type: Dot matrix Matrix: 17 X 18 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 3.5K; 5.5K bytes Feed: Tractor Carriage width: 15 in. Units sold: 1,200 since 1984 Cost: $1,625

☐ WP-6000
285 cps Type: Dot matrix Matrix: N X 18; N X 9 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 4.5K; 16K bytes Feed: Tractor; Friction Carriage width: 15 in. Units sold: 400 since 1983 Cost: $2,295

ANDERSON JACOBSON, INC.

☐ AJ 831
30 cps Type: Daisy wheel Introduced: 1984 Cost: $598

ANTEX DATA SYSTEMS (ADS)
(division of International Antex, Inc.)

☐ ADS-2000
40; 165 cps Type: Dot matrix Matrix: 7 X 9 Character set: 256 Print positions: 80 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 2K bytes Feed: Friction; Sprocket Carriage width: 10 in. Units sold: 3,000 since 1984 Cost: $449

APROTEK

☐ Daisy 1120
20 cps Type: Daisy wheel Character set: 96 Printing: bidirectional Buffer: 2K bytes Feed: Friction; Sheet Carriage width: 13.5 in. Support equip: Cables Introduced: 1985 Cost: $300

AT&T INFORMATION SYSTEMS

☐ Model 477
80; 160; 240 cps Type: Dot matrix Matrix: N X 24 Printing: bidirectional Introduced: 1986 Cost: $1,695

☐ Model 478
50; 200 cps Type: Dot matrix Matrix: 7 X 9; 10 X 18 Character set: 96 Resolution: 240 X 144 dots per inch Printing: bidirectional Buffer: 16K bytes Feed: Tractor; Friction; Pin Carriage width: 9.5 in. Cost: $985

☐ Model 479
50; 200 cps Type: Dot matrix Matrix: 7 X 9; 10 X 18 Character set: 96 Resolution: 240 X 144 dots per inch Printing: bidirectional Buffer: 16K bytes Feed: Tractor; Friction; Pin Carriage width: 15 in. Cost: $1,185

AXIOM CORP.

☐ EX-1601
240 cps Type: Dot matrix Matrix: 5 X 8 Character set: 96; 128 Print positions: 40; 80; 27 Buffer: 100 bytes Feed: Tractor Carriage width: 9 in. Introduced: 1983 Cost: $589

☐ **EX-1620**
960 cps **Type:** Dot matrix **Matrix:** 11 X 20 **Character set:** 64; 96 **Print positions:** 40; 80; 160 **Buffer:** 8K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Units sold:** 600 since 1983 **Cost:** $795

☐ **EX-420 Electro-Sensitive**
550 cps **Type:** Dot matrix **Matrix:** 5 X 8; 11 X 20 **Character set:** 96 **Print positions:** 46; 92 **Buffer:** 8K bytes **Feed:** Friction **Carriage width:** 5 in. **Introduced:** 1982 **Cost:** $745

☐ **EX-801 Microprinter**
160 cps **Type:** Dot matrix **Matrix:** 5 X 8 **Character set:** 96; 128 **Print positions:** 40; 80; 20 **Buffer:** 2K bytes **Units sold:** 30,000 since 1977 **Cost:** $599

AXONIX CORP.

☐ *ThinPrint 80* **(Battery Powered)**
40 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 96 **Print positions:** 80; 132 **Resolution:** 960 X 7 dots per line **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction; Roll **Carriage width:** 8.5 in. **Support equip:** Cables **Units sold:** 5,000 since 1983 **Cost:** $299 (includes battery, charger, paper)

☐ **ThinType 80 (Battery Powered)**
15 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 80 bytes **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables **Units sold:** 3,000 since 1983 **Cost:** $429

☐ *ThinWrite 80* **(Battery Powered)**
10; 12; 50 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 23 **Character set:** 48; 96 **Print positions:** 80; 132 **Printing:** bidirectional **Buffer:** 80 bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 10 in. **Support equip:** Cables **Units sold:** 5,000 since 1984 **Cost:** $449

BDS CORP.

☐ **BDS TriPrinter**
87; 350 cps **Type:** Dot matrix **Matrix:** 9 X 8; 17 X 16 **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Units sold:** 10,000 since 1984 **Cost:** $1,995

☐ **B1000**
1,000 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Buffer:** 1K-4K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 700 since 1981 **Cost:** $10,500

☐ **B300**
300 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Buffer:** 1K-4K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 3,000 since 1975 **Cost:** $6,250

☐ **B600**
600 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Buffer:** 1K-4K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 2,500 since 1978 **Cost:** $8,050

☐ **LB300**
300 lpm **Type:** Band **Character set:** 112 **Introduced:** 1986 **Cost:** $4,995

☐ *LB615*
660 lpm **Type:** Band **Character set:** 112 **Introduced:** 1986 **Cost:** $6,795

☐ **LM300+**
85; 300 lpm **Type:** Dot matrix **Matrix:** 9 X 9; 17 X 17 **Character set:** 96 **Print positions:** 220 **Units sold:** 3,000 since 1985 **Cost:** $5,395

☐ **LM600+**
170; 600 lpm **Type:** Dot matrix **Matrix:** 9 X 9; 17 X 17 **Character set:** 96 **Print positions:** 220 **Units sold:** 2,000 since 1985 **Cost:** $7,995

BLUE CHIP ELECTRONICS, INC.

☐ **D40/15**
40 cps **Type:** Daisy wheel **Character set:** 96 **Printing:** bidirectional **Buffer:** 1K; (optional) 16K bytes **Feed:** Tractor; Friction **Carriage width:** 14.5 in. **Units sold:** 50,000 since 1983 **Cost:** $695

☐ **M120/10**
120 cps **Type:** Dot matrix **Matrix:** 9 X 8 **Character set:** 88; 103; 160; 192 **Print positions:** 142 **Printing:** bidirectional **Buffer:** 1K bytes **Feed:** Tractor; Platen **Carriage width:** 10 in. **Units sold:** 40,000 since 1984 **Cost:** $299

BROTHER INTERNATIONAL CORP.
Information Systems & Peripheral Division

☐ **HR-10**
12 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 80; 96; 120 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 11 in. **Units sold:** 9,500 since 1985 **Cost:** $349

☐ **HR-15XL**
17 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 110; 165 **Printing:** bidirectional **Buffer:** 3K; (optional) 5K bytes **Feed:** Friction **Carriage width:** 13.5 in. **Units sold:** 90,500 since 1984 **Cost:** $599

☐ **HR-20**
20 cps **Type:** Daisy wheel **Printing:** bidirectional **Introduced:** 1986 **Cost:** $499

☐ **HR-25**
23 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Friction **Carriage width:** 16.5 in. **Units sold:** 23,000 since 1984 **Cost:** $749

☐ **HR-35**
36 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 7K bytes **Feed:** Friction **Carriage width:** 16.5 in. **Units sold:** 13,200 since 1984 **Cost:** $1,049

☐ **M-1109**
25; 100 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80 **Resolution:** 60-240 dots per inch **Feed:** Tractor; Friction **Carriage width:** 10 in. **Units sold:** 9,000 since 1986 **Cost:** $299

☐ **M-1509**
45; 180 cps **Type:** Dot matrix **Matrix:** 9 X 9; 8 X 6 **Character set:** 96 **Print positions:** 136 **Resolution:** 60; 72; 90; 108; 120; 144; 240 dots per inch **Printing:** bidirectional **Buffer:** 3K; 4K bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 16.5 in. **Units sold:** 39,000 since 1985 **Cost:** $549

☐ **M-1709**
50; 200 cps **Type:** Dot matrix **Matrix:** N X 9 **Character set:** 96 **Print positions:** 80; 96; 136 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $699

☐ **Model 2024L**
80; 160 cps **Type:** Dot matrix **Matrix:** 24 X N **Character set:** 96; 17 **Print positions:** 136; 163; 272 **Resolution:** 60; 90; 120; 180 dots per inch **Printing:** bidirectional **Buffer:** 8K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 15 in. **Units sold:** 5,400 since 1984 **Cost:** $1,295

☐ **Twinriter 5**
36; 140 cps **Type:** Dot matrix; Daisy wheel **Matrix:** 7 X 9; 24 X 24 **Character set:** 96 **Print positions:** 136; 163; 204 **Resolution:** 60; 120; 240 dots per inch **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 16.5 in. **Units sold:** 8,400 since 1985 **Cost:** $1,295

BURROUGHS CORP.

☐ **A 1340**
230 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 192 **Print positions:** 132 **Cost:** $3,590; Lease (mo.) —$180

☐ **AP 1300**
45 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 158 **Introduced:** 1981 **Cost:** $4,350; Lease (mo.) —$180

☐ **AP 1305**
55 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 197 **Printing:** bidirectional **Cost:** $2,095

☐ **B 9251**
230 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 192 **Print positions:** 132 **Cost:** $3,487; Lease (mo.) —$123

C. ITOH DIGITAL PRODUCTS, INC.

☐ **D10-40**
40 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 136; 163 **Printing:** bidirectional **Buffer:** 8K bytes **Feed:** Friction; (optional) Tractor **Carriage width:** 16 in. **Introduced:** 1986 **Cost:** $999

☐ **Prowriter C-315; C315XP**
136; 163 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Introduced:** 1986 **Cost:** $819

☐ **Prowriter 8510 SAR; 1550 SAR**
45; 120; 180 cps **Type:** Dot matrix **Print positions:** 40; 80; 96 **Printing:** bidirectional **Introduced:** 1985 **Cost:** $599; $749

☐ **Starwriter F10-55**
58 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 256; (optional) 2K bytes **Feed:** Friction; (optional) Tractor **Carriage width:** 16 in. **Introduced:** 1982 **Cost:** $1,599

☐ **Starwriter Y10-20**
22 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 256; (optional) 2K; 8K bytes **Feed:** Tractor; Friction **Carriage width:** 13.4 in. **Introduced:** 1984 **Cost:** $549

☐ **1550 SCP; 1550 SCR; 1550 SCAR; 1550 SCEP Color Printer**
22; 120; 180 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 64; 96 **Print positions:** 136 **Resolution:** 144 X 160 **Printing:** bidirectional **Buffer:** 2K; 4K; (optional) 10K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Introduced:** 1983 **Cost:** $899; $949

☐ **1550 SEP**
45; 120; 180 cps **Type:** Dot matrix **Print positions:** 132; 230 **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Cost:** $679

☐ **1550SP; 1550SR**
45; 120; 180 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96; 64 **Print positions:** 136 **Resolution:** 144 X 160 matrix **Printing:** bidirectional **Buffer:** 2K; 4K; (optional) 10K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Introduced:** 1983 **Cost:** $679; $749

☐ **8510 SEP**
45; 120; 180 cps **Type:** Character **Print positions:** 80; 132 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Cost:** $529

☐ **8510SP; 8510SR**
45; 120; 180 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96; 64 **Print positions:** 80 **Resolution:** 144 X 160 matrix **Printing:** bidirectional **Buffer:** 2K; 4K; (optional) 10K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1983 **Cost:** $529

CROSSPOINT SYSTEMS, INC.
1710 Willow Creek Circle
Eugene, OR 97402
(503) 485-4254

Share peripherals among multiple PCs in any combination up to 8, all under automatic software control. See the Crosspoint Systems ad under the heading Local Area Networks for the ultimate solution in data switching.

C. ITOH ELECTRONICS, INC.

☐ Model 1570
66; 130; 200 cps **Type:** Dot matrix **Matrix:** 13 X 18; 18 X 18; 15 X 18 **Character set:** 96 **Print positions:** 136 **Resolution:** 360 X 360 matrix **Printing:** bidirectional **Buffer:** 16K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Introduced:** 1984 **Cost:** $1,300

☐ Model 8510SR
120; 180 cps **Type:** Dot matrix **Matrix:** 7 X 9; N X 8; N X 9 **Resolution:** 80; 96; 136; 160 dots per inch **Printing:** bidirectional **Buffer:** 2K; 4K bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 12 in. **Introduced:** 1986

☐ Model 9500/9515
28; 125; 250 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 27 **Print positions:** 80; 96; 136; 162; 230 **Resolution:** 240 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 10-15.5 in. **Introduced:** 1985 **Cost:** $649; $819

☐ Prowriter 7500 Series
105 cps **Type:** Dot matrix **Matrix:** 9 X 9; 12 X 12 **Character set:** 64; 96 **Print positions:** 80; 96; 136 **Resolution:** 160 X 144 matrix **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1985 **Cost:** $425

☐ Starwriter A10-30 Daisy Wheel Printer
30 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 115; 138 **Printing:** bidirectional **Buffer:** 256; (optional) 2K; 8K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1982 **Cost:** $695

☐ TPX-80
80 cps **Type:** Thermal **Print positions:** 80 **Introduced:** 1985 **Cost:** $350

CAL-ABCO
Legend Peripheral Products Division

☐ LEGEND CPVII
180 cps **Type:** Dot matrix **Character set:** 96; 228 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Units sold:** 1,500 since 1984 **Cost:** $1,195

☐ LEGEND 1080
140 cps **Type:** Dot matrix **Character set:** 192 **Printing:** bidirectional **Buffer:** (optional) 4K bytes **Feed:** Friction; Sprocket **Carriage width:** 10 in. **Units sold:** 55,000 since 1984 **Cost:** $339

☐ LEGEND 1380
160 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 255 **Print positions:** 40; 80; 132 **Printing:** bidirectional **Buffer:** 2K; (optional) 4K bytes **Feed:** Friction; Sprocket **Carriage width:** 10 in. **Units sold:** 20,000 since 1984 **Cost:** $379

CANDELA, INC.

☐ Message Printer
15 cps **Type:** Dot matrix **Cost:** $160

CANON U.S.A., INC.

☐ A-40
140 cps **Type:** Dot matrix **Matrix:** 11 X 9 **Printing:** bidirectional **Buffer:** 1.4K bytes **Introduced:** 1985 **Cost:** $349

☐ A-50; A-55
34; 180 cps **Type:** Dot matrix **Matrix:** 11 X 9; 23 X 18 **Printing:** bidirectional **Introduced:** 1985 **Cost:** $499; $699

☐ BJ-80 Bubble-Jet Printer
110; 220 cps **Matrix:** 18 X 24; 9 X 24 **Character set:** 96 **Printing:** bidirectional **Buffer:** 2K bytes **Carriage width:** 9.5 in. **Introduced:** 1985 **Cost:** $599

☐ F-200S
20; 40; 80 cps **Type:** Dot matrix **Matrix:** 9 X 24; 18 X 24; 36 X 24 **Print positions:** 40; 80; 136; 188 **Resolution:** 360 dots per inch **Carriage width:** 11 in. **Support equip:** Cables **Introduced:** 1984 **Cost:** $549

☐ F-60
20; 40; 80 cps **Type:** Dot matrix **Matrix:** 9 X 24; 28 X 24; 36 X 24; 72 X 24 **Print positions:** 55; 110; 188 **Feed:** Friction **Carriage width:** 12 in. **Introduced:** 1984 **Cost:** $499

☐ PJ-1080A
37 cps **Type:** Ink jet **Matrix:** 5 X 7 **Character set:** 40; 80 **Resolution:** 640 dots per inch **Introduced:** 1984 **Cost:** $699

☐ PJ-200S Color Printer
37 cps **Type:** Ink jet **Matrix:** 5 X 7 **Character set:** 40; 80 **Print positions:** 40; 80 **Resolution:** 640 dots per inch **Support equip:** Cables **Introduced:** 1984 **Cost:** $749

☐ PW-1080A
160 cps **Type:** Dot matrix **Matrix:** N X 15; 11 X 9; 23 X 18 **Print positions:** 80 **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1984 **Cost:** $449

☐ PW-1156A
160 cps **Type:** Dot matrix **Matrix:** N X 16; 23 X 18 **Print positions:** 156 **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 17 in. **Cost:** $699

☐ PW-200S
27; 160 cps **Type:** Dot matrix **Matrix:** 11 X 9; 23 X 18 **Print positions:** 40; 80; 136 **Resolution:** 240 dots per inch **Support equip:** Cables **Introduced:** 1984 **Cost:** $449

☐ PW-250S
27; 160 cps **Type:** Dot matrix **Matrix:** 11 X 9; 23 X 18 **Print positions:** 78; 156; 265 **Resolution:** 240 dots per inch **Support equip:** Cables **Introduced:** 1984 **Cost:** $649

CAPITOL CIRCUITS CORP.
Printer Products Division

☐ S270 Slip/Document Printer
65 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 96 **Print positions:** 27 **Buffer:** 27 bytes **Units sold:** 1,200 since 1980 **Cost:** $835

☐ S400 Slip/Document Printer
150 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 96 **Print positions:** 40 **Printing:** bidirectional **Buffer:** 176; (optional) 2K bytes **Feed:** Friction **Carriage width:** 8 in. **Units sold:** 1,390 since 1982 **Cost:** $945

CECORP

☐ Class 160 MP
80; 160 cps **Type:** Dot matrix **Character set:** 48; 64; 96; 128 **Print positions:** 80; 132 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 8.5 in. **Support equip:** Software; ROM **Units sold:** 1,000 since 1979 **Cost:** $900

☐ MP300
300 lpm **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 48; 64; 96; 128 **Print positions:** 80; 132 **Resolution:** 100 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 14.5 in. **Units sold:** 50 since 1979 **Cost:** $7,875-$11,500

☐ MP600
600 lpm **Character set:** 48; 64; 96; 128 **Print positions:** 80; 132 **Resolution:** 100 dots per inch **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 14.5 in. **Units sold:** 50 since 1979 **Cost:** $10,-775-$14,000

☐ TP30
30 cps **Matrix:** 5 X 7 **Character set:** 48; 64; 96; 128 **Print positions:** 80; 132 **Printing:** bidirectional **Feed:** Friction **Carriage width:** 8.5 in. **Units sold:** 10 since 1979

CENTRONICS DATA COMPUTER CORP.

☐ GLP II
25; 100 cps **Introduced:** 1986 **Cost:** $279

☐ GLP Series
12; 50 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 132 **Printing:** bidirectional **Buffer:** 256 bytes **Feed:** Friction; Pin **Carriage width:** 10 in. **Introduced:** 1984 **Cost:** $299

☐ Linewriter 400
300; 400 lpm **Type:** Band **Character set:** 48; 64; 96; 128 **Print positions:** 132; (optional) 136 **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 18 in. **Units sold:** 8,000 since 1983 **Cost:** $4,885

☐ Linewriter 800
600; 800 lpm **Type:** Band **Character set:** 48; 64; 96; 128 **Print positions:** 132; (optional) 136 **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 18 in. **Units sold:** 5,000 since 1984 **Cost:** $6,595

☐ Model H136
27; 160 cps **Type:** Dot matrix **Matrix:** 11 X 9; 23 X 16 **Character set:** 256 **Print positions:** 156; 187; 265 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction **Carriage width:** 17 in. **Introduced:** 1984 **Cost:** $899

☐ Model H80
27; 160 cps **Type:** Dot matrix **Matrix:** 11 X 9; 23 X 16 **Character set:** 256 **Print positions:** 80; 96 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1984 **Cost:** $699

☐ Model 351
50; 200 cps **Type:** Dot matrix **Matrix:** 7 X 9; 15 X 16; N X 8 **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1982 **Cost:** $1,995

☐ Model 351-PC
50; 200 cps **Type:** Dot matrix **Matrix:** 7 X 9; 11 X 18; 15 X 16 **Character set:** 96 **Print positions:** 132 **Resolution:** 66 X 73; 82.5 X 73; 110 X 73; 165 X 73 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1984 **Cost:** $1,995

☐ Model 352
200 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 132 **Resolution:** 66 X 72 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1982 **Cost:** $2,495

☐ Model 353
50; 200 cps **Type:** Dot matrix **Matrix:** 7 X 9; 15 X 16 **Character set:** 96 **Print positions:** 132 **Resolution:** 66 X 72 dots per inch **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor; Friction; (optional) Sheet **Carriage width:** 15 in. **Introduced:** 1982 **Cost:** $2,495

☐ Model 354
50; 200; 220 cps **Type:** Dot matrix **Matrix:** 7 X 9; 9 X 9; 15 X 16; N X 18 **Character set:** 96 **Print positions:** 132 **Resolution:** 72 X 72; 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K; (optional) 4K bytes **Feed:** Tractor; Friction; Sheet (optional) **Carriage width:** 15 in. **Introduced:** 1984 **Cost:** $2,195 (354-1); $2,395 (354-3)

☐ Model 354-WP
50; 200; 220 cps **Type:** Dot matrix **Matrix:** 7 X 9; 9 X 9; 15 X 16; N X 18 **Character set:** 96 **Print positions:** 132 **Resolution:** 72 X 72; 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K; (optional) 4K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $2,195-$2,695

☐ Model 358
100; 400 cps **Type:** Dot matrix **Matrix:** 7 X 9; 15 X 16 **Character set:** 96 **Print positions:** 132 **Resolution:** 66 X 72 dots per inch **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 15 in. **Introduced:** 1983 **Cost:** $2,895; $3,195

☐ Model 359-IL
55; 95; 400 cps **Type:** Dot matrix **Character set:** 96 **Print positions:** 80; 132 **Resolution:** 72 X 72; 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 15 in. **Units sold:** 1985 **Cost:** $2,895-$3,395

☐ Model 359-ST
75; 155; 310 cps Type: Dot matrix Matrix: 7 X 9; 9 X 9; 15 X 18; 31 X 18; N X 18; N X 9; 2N X 18 Character set: 96 Print positions: 80; 132 Resolution: 72 X 72; 144 X 144 dots per inch Printing: bidirectional Buffer: 4K bytes Feed: Tractor; Friction; Sheet Carriage width: 15 in. Introduced: 1985 Cost: $2,895-$3,195

☐ Printstation 210; 220
45; 180 cps Type: Dot matrix Print positions: 110; 136 Printing: bidirectional Introduced: 1986 Cost: $499; $599

☐ TIP-300
75-300 lpm Type: Dot matrix Matrix: 7 X 9; 16 X 16 Character set: 96 Print positions: 132; 176; 220 Resolution: 100 X 72 dots per inch Printing: bidirectional Buffer: 2K bytes Feed: Tractor Carriage width: 16 in. Units sold: 2,500 since 1982 Cost: $5,400

☐ 240 Series Printstation
80; 160 cps Type: Dot matrix Matrix: 7 X 18; N X 16 Character set: 96 Print positions: 136; 163; 231 Printing: bidirectional Buffer: 256 bytes Feed: Tractor; Friction; (optional) Sheet Carriage width: 14 in. Introduced: 1984 Cost: $1,495

☐ 250 Series Printstation
40; 160; 185; 200 cps Type: Dot matrix Matrix: 9 X 9; 9 X 7 Character set: 96 Resolution: 72 X 72 dots per inch Printing: bidirectional Buffer: 2K; (optional) 8K bytes Feed: Friction; Pin; Sheet Carriage width: 8.5 in. Units sold: 3,000 since 1984 Cost: $1,295

☐ 260 Series Printstation
40; 160; 185; 200 cps Type: Dot matrix Matrix: 9 X 9; 9 X 7 Character set: 96 Resolution: 72 X 72; 144 X 144 dots per inch Printing: bidirectional Buffer: 2K; (optional) 8K bytes Feed: Friction; Pin; Sheet Carriage width: 14 in. Introduced: 1985

CIE SYSTEMS, INC.
(subsidiary of C. Itoh Electronics, Inc.)

☐ CIE 8510R
180 cps Type: Dot matrix Matrix: 7 X 9; 9 X 9; N X 8; N X 9 Printing: bidirectional Buffer: 2K; 4K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1985

CIE TERMINALS

☐ CI-3500/10
87; 350 cps Type: Dot matrix Matrix: 9 X 8; 17 X 16 Character set: 96; 37 Print positions: 217 Resolution: 240 X 144 dots per inch Printing: bidirectional Buffer: 2K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1984 Cost: $1,995

☐ CI-3500/20
87; 350 cps Type: Dot matrix Matrix: 9 X 8; 17 X 16 Character set: 96 Print positions: 233 Resolution: 240 X 144 dots per inch Printing: bidirectional Buffer: 2K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1984 Cost: $1,995

☐ Tri Printer Series
88-350 cps Type: Dot matrix Matrix: 17 X 16; 9 X 8 Character set: 96; 233 Printing: bidirectional Introduced: 1986 Cost: $1,-995

CITIZEN AMERICA CORP.

☐ MSP-10
160 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 80 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 1K; (optional) 8K bytes Feed: Tractor; Friction Carriage width: 10 in. Cost: $399

☐ MSP-15
160 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 136 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 1K; (optional) 8K bytes Feed: Tractor; Friction Carriage width: 16 in. Cost: $549

☐ MSP-20
200 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 80 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 8K bytes Feed: Tractor; Friction Carriage width: 10 in. Cost: $499

☐ MSP-25
200 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 136 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 8K bytes Feed: Tractor; Friction Carriage width: 16 in. Cost: $749

COMPLETE ELECTRONICS

☐ Daisywriter 2000
25 cps Type: Daisy wheel Character set: 96 Print positions: 198 Printing: bidirectional Buffer: 48K bytes Feed: Friction Carriage width: 16.5 in. Introduced: 1982 Cost: $1,195

COMPUTER DESIGNED SYSTEMS, INC.
Commercial Systems Division

☐ PB-600
600 lpm Type: Character Character set: 64; 96 Print positions: 132 Buffer: 132 bytes Feed: Tractor Carriage width: 14 in. Units sold: 2,100 since 1975 Cost: $18,000-$23,500

COMPUTER MEDICA CORP.
Medical Software Division

☐ CM 401
23 cps Type: Daisy wheel Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 5K bytes Feed: Tractor; Friction Carriage width: 14-7/8 in. Support equip: Cables; Software Units sold: 5,000 since 1983 Cost: $800

COMPUTER PRINTERS INTERNATIONAL, INC. (COMPRINT)

☐ Comprint 912-S
225 cps Type: Dot matrix Matrix: 9 X 12 Character set: 96 Print positions: 80 Buffer: 256; (optional) 2K bytes Feed: Friction Carriage width: 8.5 in. Support equip: Cables Units sold: 6,000 since 1978 Cost: $660

COMPUTER TRANSCEIVER SYSTEMS, INC.

☐ EXECUPORT 1230
140; 280 cps Type: Dot matrix Matrix: 5 X 7; 9 X 11; 5 X 11; 18 X 11; 10 X 7 Character set: 128 Print positions: 80; 41; 73; 136 Resolution: 120/240 X 96 dots per inch Printing: bidirectional Buffer: 1K; (optional) 8K; 15K bytes Feed: Friction Carriage width: 8.5 in. Support equip: Cables; Software Introduced: 1984 Cost: $1,330

COMREX INTERNATIONAL, INC.

☐ CR-II
12 cps Type: Daisy wheel Character set: 96 Print positions: 132; 110; 165 Printing: bidirectional Buffer: 5K bytes Feed: Tractor Carriage width: 13.5 in. Units sold: 21,000 since 1983 Cost: $599 (parallel); $649 (serial)

☐ CR-III
23 cps Type: Character; Daisy wheel Character set: 96 Print positions: 132; 158; 198 Printing: bidirectional Buffer: 5K bytes Feed: Friction Carriage width: 14-7/8 in. Units sold: 11,000 since 1984 Cost: $995 (parallel); $1,045 (serial)

☐ CR-420
104; 420 cps Type: Dot matrix Matrix: 8 X N Character set: 96 Print positions: 136; 163; 217 Printing: bidirectional Buffer: 18K bytes Introduced: 1984

COMTERM, INC.

☐ Model 5151-2
160 cps Type: Dot matrix Matrix: 11 X 9 Print positions: 80 Printing: bidirectional Buffer: 3K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1985

☐ Model 5152-2
160 cps Type: Dot matrix Matrix: 11 X 9 Print positions: 132 Printing: bidirectional Buffer: 3K bytes Feed: Tractor; Friction Carriage width: 17 in. Introduced: 1985

CONTITRONIX, INC.

☐ CI Concorde 1100 Printer
45 cps Type: Daisy wheel Character set: 96 Print positions: 132; 158; 198 Printing: bidirectional Buffer: 1K bytes Feed: Tractor; Friction; Cut sheet Units sold: 300 since 1985 Cost: $1,095

CONTROL DATA CORP.

☐ Model 725
150 cps Type: Dot matrix Matrix: 7 X 9 Character set: 96 Print positions: 136 Cost: $2,150; Lease (mo.) —$90

COOSOL, INC.

☐ 101A-48E Mechanism
100 cps Type: Dot matrix Matrix: 5 X 7; 10 X 7; 10 X 14 Character set: 96 Print positions: 48 Printing: bidirectional Buffer: 48K bytes Units sold: 12,500 since 1980 Cost: $350

☐ 101B-80B Mechanism
600 cps Type: Dot matrix Matrix: 5 X 7; 10 X 7; 10 X 14 Character set: 96 Print positions: 80 Printing: bidirectional Buffer: 4K bytes Units sold: 2,600 since 1985 Cost: $1,865

COPAL (U.S.A.), INC.

☐ Write Hand 1200
24; 120 cps Type: Dot matrix Matrix: 9 X 9; 18 X 20 Character set: 96 Print positions: 80; 136 Resolution: 60; 120; 240; dots per inch Printing: bidirectional Buffer: 1K bytes Feed: Tractor; Friction Carriage width: 10 in. Support equip: ROM Introduced: 1984 Cost: $349

☐ Write Hand 1500
36; 180 cps Type: Dot matrix Matrix: 9 X 9; 18 X 20 Character set: 96 Print positions: 80 Resolution: 60; 120; 240 dots per inch Printing: bidirectional Buffer: 3K bytes Feed: Tractor; Friction Carriage width: 10 in. Support equip: ROM Introduced: 1984 Cost: $499

☐ Write Hand 5500
36; 180 cps Type: Dot matrix Matrix: 9 X 9 (standard); 18 X 20 Character set: 96 Print positions: 136 Resolution: 60; 120; 240 dots per inch Printing: bidirectional Buffer: 3K bytes Feed: Tractor; Friction Carriage width: 16 in. Support equip: ROM Introduced: 1985 Cost: $699

TALL TREE SYSTEMS
1120 San Antonio Road
Palo Alto, CA 94303
415-964-1980

JLASER PLUS - 2MB memory board with interfaces to the Canon IX 12 scanner and any Canon-based laser printer engine for 300 dpi resolution. Non-dedicated memory is available for conventional applications. Many software support packages are available. Some allow for 600 x 300 dpi. Stores images in memory buffer for instant printing. Fast, flexible, cost efficient.

COSMO WORLD CORP.

☐ Adeus CP2000
22 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 2K-6K bytes **Feed:** Tractor; Sheet **Carriage width:** 14 in. **Units sold:** 7,000 since 1985 **Cost:** $499

CPT CORP.

☐ CPT Matrix 1
100; 192 cps **Type:** Dot matrix **Matrix:** 16 X 11; 24 X 36 **Character set:** 127 **Print positions:** 136; 162 **Resolution:** 180 X 180; 360 X 180 dots per inch **Printing:** bidirectional **Buffer:** 4K; 256 bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 16 in. **Units sold:** 2,000 since 1983 **Cost:** $1,500-$2,000

CRADEN PERIPHERALS CORP.

☐ DP4 Document Printer
150 cps **Type:** Dot matrix **Matrix:** 9 X 9; 17 X 17 **Character set:** 128 **Print positions:** 80; 96 **Resolution:** 120 X 144 **Printing:** bidirectional **Buffer:** 1.5K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Units sold:** 3,000 since 1983

CROSSTECH, INC.

☐ CTI-7180
90; 108; 154; 180 cps **Type:** Dot matrix **Matrix:** 7 X 9; 13 X 7 **Character set:** 96; 133 **Print positions:** 136; 163; 233 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Friction **Carriage width:** 15.5 in. **Cost:** $1,145-$1,295

☐ DMP-120 EX
120 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 96; 136 **Feed:** Friction; Sprocket **Carriage width:** 10 in. **Cost:** $399

☐ LQ-18
16; 18 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 120; 144; 180 **Printing:** bidirectional **Feed:** Tractor; Friction **Carriage width:** 13 in.

DAISY SYSTEMS HOLLAND B.V.

☐ Daisy M45-Q
35-43 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 512 bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 15 in. **Units sold:** 5,000 since 1984 **Cost:** $1,495

DATA GENERAL CORP.

☐ Model 4320
55 cps **Type:** Character **Character set:** 96 **Print positions:** 136 **Cost:** $5,900

☐ Model 4322
55 cps **Type:** Character **Character set:** 96 **Print positions:** 136 **Cost:** $8,100

☐ Model 4434
40; 80; 160 cps **Type:** Dot matrix **Resolution:** 64 X 67; 120 X 133 dots per inch **Feed:** Tractor **Introduced:** 1985 **Cost:** $895

☐ Model 4518
35 cps **Printing:** bidirectional **Feed:** Tractor; Sheet **Introduced:** 1985 **Cost:** $2,800

☐ Model 4531
40; 80; 160 cps **Type:** Dot matrix **Feed:** Tractor **Introduced:** 1985 **Cost:** $1,595

☐ Model 6042 (KSR)
30 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 128 **Print positions:** 132 **Cost:** $2,400

☐ Model 6043 (RO)
30 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 128 **Print positions:** 132 **Cost:** $2,200

☐ Model 6055 (RO)
60 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 128 **Print positions:** 132 **Cost:** $2,850

☐ Model 6215
400 lpm **Type:** Dot matrix **Print positions:** 80; 136 **Cost:** $2,995

☐ Model 6321
40 cps **Type:** Daisy wheel **Feed:** Tractor; Sheet **Introduced:** 1985 **Cost:** $2,695

DATA PRINTER CORP.
(subsidiary of Printronix, Inc.)

☐ DP1000
1,000 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Feed:** Tractor **Carriage width:** 18 in. **Introduced:** 1980 **Cost:** $10,875

☐ DP600
600 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Feed:** Tractor **Carriage width:** 18 in. **Introduced:** 1980 **Cost:** $7,855

☐ DP750
700 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; 136 **Feed:** Tractor **Carriage width:** 18 in. **Introduced:** 1982 **Cost:** $9,385

☐ Model 1200
600; 900; 1,000; 1,200 lpm **Type:** Chain **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Introduced:** 1978 **Cost:** $19,390

☐ Model 1210
1,000 lpm **Type:** Chain **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Feed:** Tractor **Carriage width:** 20 in. **Introduced:** 1978 **Cost:** $16,673

☐ Model 1260
600 lpm **Type:** Chain **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Feed:** Tractor **Carriage width:** 20 in. **Introduced:** 1978 **Cost:** $11,210

☐ Model 3121
600; 900; 1,000; 1,200 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Feed:** Tractor **Carriage width:** 18 in. **Introduced:** 1980 **Cost:** $13,350

DATA SYSTEMS HARDWARE

☐ VX031
300 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; 136 **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Cables **Units sold:** 1,000 since 1983

☐ VX035
1,000 lpm **Type:** Character **Character set:** 48; 64; 96 **Print positions:** 132; 136 **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Cables **Units sold:** 1,000 since 1983

☐ VX157
600 lpm **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 48; 64; 96 **Print positions:** 132 **Printing:** bidirectional **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Cables **Introduced:** 1984

DATAMAXX USA CORP.

☐ FX-80
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 18; 11 X 9 **Character set:** 48; 64; 96; 128 **Print positions:** 40; 80; 132 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 8.5 in. **Introduced:** 1984 **Cost:** $730

DATAPOINT CORP.

☐ Model 9611
35 cps **Type:** Daisy wheel **Character set:** 72 **Print positions:** 132 **Printing:** bidirectional **Feed:** Tractor; Friction **Carriage width:** 13.3 in. **Introduced:** 1981 **Cost:** $3,295; Lease (mo.) —$160

DATAPRODUCTS CORP.

☐ DP-20
20; 22 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 136; 163; 204 **Buffer:** 2K bytes **Feed:** Friction **Carriage width:** 15 in. **Introduced:** 1984 **Cost:** $799

☐ DP-35
35 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 196 **Printing:** bidirectional **Buffer:** 3K bytes **Units sold:** 1,000 since 1982 **Cost:** $1,795

☐ DP-55Q
50; 55 cps **Type:** Daisy wheel **Character set:** 96; 88; 92 **Print positions:** 132; 158; 196 **Printing:** bidirectional **Buffer:** (Serial) 3K; (Centronics parallel) 1.7K; (Standard) 1K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Units sold:** 25,000 since 1982 **Cost:** $2,195

☐ M-100
140 cps **Type:** Dot matrix **Matrix:** 9 X 14 **Character set:** 128 **Print positions:** 132; 218 **Printing:** bidirectional **Buffer:** 1K-4K bytes **Units sold:** 5,000 since 1982 **Cost:** $3,015

☐ Model 8012
30; 90; 180 cps **Type:** Dot matrix **Matrix:** 9 X 9; 24 X 9; 36 X 18; 24 X 14 **Character set:** 256 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 8 in. **Cost:** $499

☐ Model 8022
30; 90; 180 cps **Type:** Dot matrix **Matrix:** 9 X 9; 24 X 9; 36 X 18; 24 X 24 **Character set:** 256 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 13.2 in. **Cost:** $749

☐ Model 8052
40; 110; 200 cps **Type:** Dot matrix **Matrix:** 18 X 9; 24 X 9; 36 X 18; 24 X 14 **Character set:** 256 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Form **Carriage width:** 13.2 in. **Cost:** $1,499; $1,599 (color)

☐ Model 8072
100; 300; 400 cps **Type:** Dot matrix **Matrix:** 18 X 9; 24 X 9; 36 X 18; 24 X 14 **Character set:** 256 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor; Line; Form **Carriage width:** 13.2 in. **Cost:** $1,999; 2,099 (color)

☐ P-80
200 cps **Type:** Dot matrix **Matrix:** 24 X 9 **Character set:** 96 **Print positions:** 80; 132; 96 **Printing:** bidirectional **Buffer:** 1.5K bytes **Introduced:** 1982 **Cost:** $1,795

DATASOUTH COMPUTER CORP.

☐ CX-3180
180 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 132; 158; 217 **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 383 since 1985 **Cost:** $3,195

☐ CX-3220
220 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 132; 158; 217 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 140 since 1985 **Cost:** $3,695

☐ Daisywheel 36
36 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 7K bytes **Feed:** Friction **Carriage width:** 15 in. **Units sold:** 128 since 1985 **Cost:** $995

☐ DS-180 Plus
180 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 132; 158; 217 **Resolution:** 72 X 75 matrix **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 55,432 since 1980 **Cost:** $1,395

☐ DS-220
220 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 256 **Print positions:** 132 **Resolution:** 72 X 75 matrix; 72 X 60 matrix; 72 X 120 matrix **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Units sold:** 9,278 since 1983 **Cost:** $1,695

☐ TX-5180
180 cps **Type:** Dot matrix **Matrix:** 9 X 7 **Character set:** 96 **Print positions:** 132 **Resolution:** 72 X 75 dots per inch **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 1,573 since 1984 **Cost:** $2,995

☐ **TX-5220**
220 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 132; 217 **Resolution:** 72 X 75 matrix **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 595 since 1985 **Cost:** $3,495

DECISION DATA COMPUTER CORP.
(division of Decision Industries Corp.)

☐ **Model 6355-01**
55 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 256 bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 1,200 since 1984 **Cost:** $1,495-$4,100; Lease (mo.) —$98-$142

DENNISON MANUFACTURING CO.

☐ **Model 5102**
120 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Print positions:** 80 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $9,550

☐ **Model 5105**
350 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Print positions:** 132 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $12,750

DEREX, INC.

☐ **Derex B1000**
1,000 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132 **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Cables **Units sold:** 1,000 since 1980 **Cost:** $13,250; Lease (mo.) —$465 (3 yr.)

☐ **Derex B300**
300 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132 **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Cables **Units sold:** 1,000 since 1978 **Cost:** $6,700; Lease (mo.) —$230 (3 yr.)

☐ **Derex B600**
600 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132 **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Cables **Units sold:** 1000 since 1979 **Cost:** $8,750; Lease (mo.) —$310 (3 yr.)

☐ **Derex LW800**
800 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132 **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 18 in. **Support equip:** Cables **Units sold:** 500 since 1984 **Cost:** $7,795; Lease (mo.) —$275 (3 yr.)

☐ **Derex M200**
340 cps **Type:** Dot matrix **Matrix:** 7 X 7 **Character set:** 128 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 15 in. **Support equip:** Cables **Units sold:** 1,000 since 1979 **Cost:** $2,995; Lease (mo.) —$105 (3 yr.)

☐ **Derex 4410**
300 lpm **Type:** Line matrix **Matrix:** 9 X 18 **Character set:** 112 **Print positions:** 132; 220 **Resolution:** 140 X 144 dots per inch **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 16.5 in. **Support equip:** Cables **Units sold:** 500 since 1985 **Cost:** $5,760

☐ **Derex 4440**
600 lpm **Type:** Line matrix **Matrix:** 9 X 18 **Character set:** 112 **Print positions:** 132; 220 **Resolution:** 140 X 144 dots per inch **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 16.5 in. **Support equip:** Cables **Units sold:** 250 since 1985 **Cost:** $7,695

DI-AN CONTROLS, INC.

☐ **Model 8500**
300 cps **Type:** Drum **Character set:** 64 **Buffer:** 2K bytes **Feed:** Friction **Units sold:** 2,500 since 1973 **Cost:** $4,500

☐ **600 Movie Master**
280 cps **Type:** Drum **Character set:** 64 **Buffer:** 2K bytes **Feed:** Friction **Carriage width:** 4-5/8 in. **Support equip:** Software **Units sold:** 150 since 1983 **Cost:** $12,950

☐ **8510C Continuous Document Printer**
420 cps **Type:** Drum **Character set:** 64 **Buffer:** 2K bytes **Feed:** Friction **Units sold:** 2,000 since 1979 **Cost:** $4,200

☐ **8510H Hand Inserted Printer**
420 cps **Type:** Drum **Character set:** 64 **Buffer:** 2K bytes **Feed:** Hand **Carriage width:** 4-5/8 in. **Units sold:** 850 since 1978 **Cost:** $3,700

☐ **8525 Document Printer**
300 cps **Type:** Drum **Character set:** 64 **Buffer:** 2K bytes **Feed:** Friction **Carriage width:** 4-5/8 in. **Units sold:** 250 since 1981 **Cost:** $8,000

☐ **8526 Document Printer**
300 cps **Type:** Drum **Character set:** 64 **Buffer:** 2K bytes **Feed:** Friction **Carriage width:** 4-5/8 in. **Units sold:** 50 since 1981 **Cost:** $8,000

DIGITAL ASSOCIATES CORP.

☐ **B Series**
300; 600; 1,000 lpm **Type:** Band **Character set:** 48; 64; 96 **Print positions:** 132; (optional) 136 **Feed:** Tractor **Carriage width:** 16 in. **Units sold:** 400 since 1980

☐ **L-800**

☐ **Model 6473**
50 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 21 **Buffer:** 35 bytes **Introduced:** 1983 **Cost:** $525

☐ **Model 6474**
50 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 21 **Buffer:** 35 bytes **Introduced:** 1983 **Cost:** $525

☐ **Model 6510**
64 cps **Type:** Character **Character set:** 64 **Print positions:** 21; (optional) 32 **Buffer:** 35 bytes **Introduced:** 1980 **Cost:** $525

☐ **Model 6520**
64 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 21; (optional) 32 **Buffer:** 35 bytes **Introduced:** 1980 **Cost:** $575

☐ **Model 6550**
42 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 21 **Buffer:** 35 bytes **Introduced:** 1980 **Cost:** $595

☐ **Model 6560**
42 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 21 **Buffer:** 35 bytes **Introduced:** 1980 **Cost:** $595

☐ **Model 6610A**
17 cps **Type:** Dot matrix **Matrix:** 5 X 9 **Character set:** 95 **Print positions:** 24 **Printing:** bidirectional **Buffer:** 50; (optional) 2K bytes **Feed:** Friction **Introduced:** 1983 **Cost:** $448

☐ **Model 6611**
17 cps **Type:** Dot matrix **Matrix:** 5 X 9 **Character set:** 95 **Print positions:** 24 **Printing:** bidirectional **Buffer:** 50; (optional) 2K bytes **Feed:** Friction **Introduced:** 1983 **Cost:** $567

☐ **Model 6620**
17 cps **Type:** Dot matrix **Matrix:** 5 X 9 **Character set:** 95 **Print positions:** 24 **Printing:** bidirectional **Buffer:** 50; (optional) 2K bytes **Feed:** Friction **Introduced:** 1983 **Cost:** $448

☐ **Model 6630A**
17 cps **Type:** Dot matrix **Matrix:** 5 X 9 **Print positions:** 16-22 **Printing:** bidirectional **Buffer:** 50; (optional) 2K bytes **Feed:** Friction **Introduced:** 1983 **Cost:** $510

DYNAX, INC.

☐ DH-45
36; 140 cps **Type:** Dot matrix; Daisy wheel **Matrix:** 8 X 12; 8 X 6; 24 X 24; 24 X 12 **Print positions:** 136 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 16.5 in. **Introduced:** 1985 **Cost:** $1,295

☐ DM-20
30; 80; 160 cps **Type:** Dot matrix **Matrix:** 9 X 8; 17 X 16 **Character set:** 96 **Print positions:** 132; 158; 220 **Resolution:** 240 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1984 **Cost:** $699

☐ DM-40
80; 160 cps **Type:** Dot matrix **Matrix:** 24 X N **Character set:** 96 **Print positions:** 136; 163; 244 **Resolution:** 180 dots per inch **Printing:** bidirectional **Feed:** Tractor; Friction; Sheet **Carriage width:** 15.5 in. **Introduced:** 1985 **Cost:** $1,295

☐ DM-5
50 cps **Type:** Dot matrix **Matrix:** 9 X 9; 8 X 6 **Character set:** 96 **Print positions:** 40; 80; 132 **Resolution:** 240 dots per inch **Printing:** bidirectional **Feed:** Friction; (optional) Tractor **Carriage width:** 8.5 in. **Introduced:** 1985 **Cost:** $235

☐ DX-15XL
20 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 110; 165 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 13.5 in. **Introduced:** 1983 **Cost:** $599

☐ DX-25
23 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 7K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 16.6 in. **Introduced:** 1985 **Cost:** $645

☐ DX-5 (Battery Powered)
30 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80 **Resolution:** 60 dots per inch **Printing:** bidirectional **Feed:** Friction **Carriage width:** 8.5 in. **Introduced:** 1984 **Cost:** $199

EATON CORP.

☐ Model 7000
50 cps **Type:** Dot matrix **Matrix:** 7 X 7 **Character set:** 96 **Print positions:** 40; 64 **Buffer:** 200 bytes **Feed:** Friction **Carriage width:** 3-7/8 in. **Support equip:** Cables **Units sold:** 15,000 since 1980 **Cost:** $425

☐ 4000 Document Printer
120 cps **Type:** Dot matrix **Matrix:** 9 X 7 **Character set:** 96 **Print positions:** 40 **Printing:** bidirectional **Buffer:** 1K bytes **Feed:** Friction **Carriage width:** 3-7/8 in. **Support equip:** Cables **Units sold:** 2,000 since 1984 **Cost:** $985

☐ 4110 Document Printer
120 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 96 **Print positions:** 40 **Printing:** bidirectional **Buffer:** 1K bytes **Feed:** Friction **Carriage width:** 3-7/8 in. **Support equip:** Cables **Units sold:** 2,000 since 1984 **Cost:** $1,085

EF INDUSTRIES

☐ DTC 200 RO
200 cps **Type:** Dot matrix **Matrix:** 5 X 9 **Character set:** 96 **Print positions:** 132 **Units sold:** 286 since 1978

☐ DTC 302 RO
45 cps **Type:** Daisy wheel **Character set:** 96 **Units sold:** 620 since 1977

☐ DTC 380Z
32 cps **Type:** Daisy wheel **Character set:** 96 **Printing:** bidirectional **Cost:** $1,359

☐ DTC 450Z
45 cps **Type:** Daisy wheel **Character set:** 100 **Printing:** bidirectional **Buffer:** 16K; (optional) 64K bytes **Introduced:** 1984

EPSON AMERICA, INC.

☐ ComRiter 420
104; 420 cps **Type:** Dot matrix **Character set:** 96 **Buffer:** 18K bytes **Feed:** Friction; Pin **Carriage width:** 16 in.

☐ CTM Series
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 11 X 18; 18 X 9; 18 X 18 **Character set:** 96; 32 **Print positions:** 80; 136 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 16 in. **Introduced:** 1984

☐ EX-1000
60; 300 cps **Type:** Dot matrix **Matrix:** N X 9 **Character set:** 95 **Print positions:** 136; 272 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $995

☐ EX-800
60; 300 cps **Type:** Dot matrix **Matrix:** N X 9 **Character set:** 95 **Print positions:** 80; 160 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $749

☐ FX-80
Reviewed Sep/Oct 1983 p. 125.
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 11 X 18; 18 X 9; 18 X 18 **Character set:** 256 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Sprocket; (optional) Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1982 **Cost:** $699

☐ FX-85/185
32; 160 cps **Type:** Dot matrix **Character set:** 96 **Printing:** bidirectional **Buffer:** 8K; (optional) 32K bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 16 in.

☐ HomeWriter 10
16; 100 cps **Type:** Dot matrix **Print positions:** 80 **Printing:** bidirectional **Buffer:** 1K bytes **Feed:** Friction; (optional) Tractor; Cut sheet **Introduced:** 1985 **Cost:** $269

☐ HS-80
30; 160; 192 cps **Type:** Ink jet **Character set:** 96 **Print positions:** 80; 136; 160 **Printing:** bidirectional **Buffer:** 1K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Introduced:** 1985

☐ JX-80 Color Printer
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 18 **Character set:** 96; 32 **Print positions:** 40; 80; 137 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction; Pin; (optional) Tractor **Carriage width:** 10 in. **Introduced:** 1984

☐ LQ-1000
60; 180 cps **Type:** Dot matrix **Character set:** 96 **Print positions:** 136 **Printing:** bidirectional **Cost:** $995

☐ LQ-1500
60-200 cps **Type:** Dot matrix **Matrix:** 9 X 17; 37 X 17 **Character set:** 96 **Print positions:** 136 **Printing:** bidirectional **Buffer:** 15K bytes **Feed:** Tractor; Friction **Introduced:** 1983

☐ LQ-2500
135; 405 cps **Type:** Dot matrix **Matrix:** N X 24 **Character set:** 95 **Print positions:** 136; 544 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $1,595

☐ LQ-800
60; 180 cps **Type:** Dot matrix **Character set:** 96 **Print positions:** 80 **Printing:** bidirectional **Cost:** $799

☐ LX-90
16; 100 cps **Type:** Dot matrix **Print positions:** 40; 80; 132 **Feed:** Tractor; Friction; (optional) Sheet **Carriage width:** 11 in. **Introduced:** 1985

☐ P-40
45 cps **Type:** Dot matrix **Character set:** 96 **Print positions:** 40; 80; 72 **Carriage width:** 4.4 in. **Introduced:** 1984

☐ P-80 (Portable)
45 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 95 **Print positions:** 40; 80; 160 **Feed:** Friction **Carriage width:** 8.5 in. **Introduced:** 1985 **Cost:** $249

☐ RX-100 Plus
100 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 18 **Character set:** 96 **Print positions:** 68-233 **Printing:** bidirectional **Buffer:** 2K bytes **Introduced:** 1984

☐ SQ-2000
176 cps **Type:** Inkjet **Character set:** 96; 32 **Print positions:** 136 **Printing:** bidirectional **Buffer:** 15K bytes **Feed:** Tractor; Friction **Introduced:** 1984

FACIT, INC.

☐ C5500
250 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 9 **Character set:** 288 **Print positions:** 136 **Resolution:** 144 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $1,595

☐ C7500
100; 400 cps **Type:** Dot matrix **Matrix:** 9 X 5; 18 X 17 **Character set:** 288 **Print positions:** 136 **Resolution:** 216 X 288 matrix **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $2,495

☐ D2000
24; 30 cps **Type:** Daisy wheel **Print positions:** 116 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $695

☐ Model 4509
120 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 256 **Print positions:** 80 **Resolution:** 240 X 216 matrix **Printing:** bidirectional **Buffer:** 248 bytes **Feed:** Tractor **Carriage width:** 11 in. **Introduced:** 1985 **Cost:** $425

☐ Model 4510
120 cps **Type:** Dot matrix **Matrix:** 9 X 9; 9 X 15 **Character set:** 96 **Print positions:** 80 **Resolution:** 200 X 144 matrix **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction; Tractor **Carriage width:** 11 in. **Units sold:** 30,000 since 1982 **Cost:** $595

☐ Model 4511
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 17 **Character set:** 96 **Print positions:** 80 **Resolution:** 200 X 216 matrix **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction; Roll **Carriage width:** 11 in. **Units sold:** 5,000 since 1984 **Cost:** $595

☐ Model 4512
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 17 **Character set:** 96 **Print positions:** 80; 132 **Resolution:** 200 X 216 matrix **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Units sold:** 5,000 since 1983 **Cost:** $845

☐ Model 4513
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 17 **Character set:** 96 **Print positions:** 80 **Resolution:** 240 X 216 matrix **Printing:** bidirectional **Buffer:** 2K (expandable) bytes **Feed:** Tractor; Friction **Carriage width:** 11 in. **Introduced:** 1985 **Cost:** $695

☐ Model 4514
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 17 **Character set:** 96 **Print positions:** 132 **Resolution:** 240 X 216 matrix **Printing:** bidirectional **Buffer:** 2K (expandable) bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $895

☐ Model 4528D
165; 285 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 136 **Resolution:** 120 dots per inch **Printing:** bidirectional **Buffer:** 6K bytes **Feed:** Tractor **Carriage width:** 15 in. **Introduced:** 1984 **Cost:** $1,695 (80 column); $1,775 (136 column)

☐ Model 4528T
165; 285 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 136 **Resolution:** 120 dots per inch **Printing:** bidirectional **Buffer:** 512; (optional) 2K bytes **Feed:** Tractor **Carriage width:** 15 in. **Introduced:** 1983 **Cost:** $975 (80 column); $1,165 (136 column)

☐ **Model 4528V**
165; 285 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 136 **Resolution:** 120 dots per inch **Printing:** bidirectional **Buffer:** 512; (optional) 6K bytes **Feed:** Tractor **Carriage width:** 15 in. **Introduced:** 1983 **Cost:** $1,545 (80 column); $1,595 (136 column)

☐ **Model 4542**
250 cps **Type:** Dot matrix **Matrix:** 9 X 14 **Character set:** 256; 512 **Print positions:** 150 **Resolution:** 140 dots per inch **Printing:** bidirectional **Buffer:** 766; (optional) 8K bytes **Feed:** Tractor **Carriage width:** 15 in. **Introduced:** 1981 **Cost:** $2,725

☐ **Model 4544 Color Printer**
225 cps **Type:** Dot matrix **Matrix:** 9 X 14 **Character set:** 256; 512 **Print positions:** 150 **Resolution:** 140 dots per inch **Printing:** bidirectional **Buffer:** 4K; (optional) 8K bytes **Feed:** Tractor **Carriage width:** 15 in. **Introduced:** 1982 **Cost:** $3,275

☐ **Model 4565**
40 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 136 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction; (optional) Tractor **Carriage width:** 16 in. **Introduced:** 1983 **Cost:** $1,195

☐ **Model 4565P**
38; 40 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 136 **Introduced:** 1985 **Cost:** $1,195

FLORIDA DATA CORP.

☐ **OSP/130**

☐ **M3043**
880; 1,200; 1,420 lpm **Type:** Band **Character set:** 48; 64; 96; 128; 192 (optional) **Print positions:** 136 **Buffer:** 80; 132; 136; 2K bytes **Feed:** Tractor **Carriage width:** 17 in. **Introduced:** 1984 **Cost:** $15,860

☐ **SP320E**
48 cps **Type:** Daisy wheel **Character set:** 96; 127; 192 **Print positions:** 136; 163 **Printing:** bidirectional **Introduced:** 1984 **Cost:** $1,295

GENERAL BUSINESS TECHNOLOGY, INC.

☐ **GBT 5205WP**
55 cps **Type:** Thimble **Character set:** 128 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 256 bytes **Feed:** Friction **Carriage width:** 16 in. **Support equip:** Cables **Introduced:** 1980 **Cost:** $4,295; Lease (mo.) —$173

☐ **GBT 5227FA**
120 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 132 **Printing:** bidirectional **Buffer:** 256 bytes **Feed:** Pin **Carriage width:** 9 in. **Support equip:** Cables **Introduced:** 1985 **Cost:** $1,995; Lease (mo.) —$74

GENICOM CORP.

☐ **Model 1020; 1025**
100; 200 cps **Type:** Dot matrix **Matrix:** 9 X 9; 35 X 18 **Character set:** 256 **Print positions:** 80; 136 **Resolution:** 240 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K; (optional) 8K; 64K bytes **Feed:** Tractor; Friction **Carriage width:** 10; 16 in. **Introduced:** 1986 **Cost:** $899 (Model 1020); $699 (Model 1025)

☐ **Model 3210**
60; 240 cps **Type:** Dot matrix **Matrix:** 9 X 9; 9 X 18 **Character set:** 228 **Print positions:** 132 **Resolution:** 60 X 144 dots per inch; 204 X 144 matrix **Printing:** bidirectional **Buffer:** 2K; (optional) 8K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Introduced:** 1985 **Cost:** $1,495

☐ **Model 3310; 3310 Color**
90; 300 cps **Type:** Dot matrix **Matrix:** 21 X 18; 9 X 9 **Character set:** 228 **Print positions:** 136 **Resolution:** 144 X 144; (optional) 288 X 144 dots per inch **Printing:** bidirectional **Buffer:** 512; (optional) 6K bytes **Feed:** Dual 6 pin tractor **Carriage width:** 15.5 in. **Introduced:** 1985 **Cost:** $1,995 (Model 3310); $2,295 (Color)

☐ **Model 3320/Quiet**
180; 300 cps **Type:** Dot matrix **Matrix:** 21 X 18; 9 X 9 **Character set:** 228 **Print positions:** 136 **Resolution:** 144 X 144; (optional) 288 X 144 dots per inch **Printing:** bidirectional **Buffer:** 512; (optional) 6K bytes **Feed:** Dual 6 pin push tractor **Carriage width:** 15.5 in. **Introduced:** 1985 **Cost:** $2,395

☐ **Model 3410/Quiet**
120; 400 cps **Type:** Dot matrix **Matrix:** 9 X 18; 9 X 9 **Character set:** 228 **Print positions:** 136 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 512 bytes **Feed:** Tractor **Carriage width:** 15.5 in. **Introduced:** 1985 **Cost:** $2,450 (Model 3410); $2,645 (Quiet)

☐ **Model 4410 Shuttle Matrix Printer**
400 lpm **Type:** Shuttle matrix **Matrix:** 9 X 9; 5 X 9; 9 X 18 **Character set:** 192 **Print positions:** 132 **Resolution:** 210 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K; (optional) 10K bytes **Feed:** 6 pin tractor **Carriage width:** 16.54 in. **Introduced:** 1984 **Cost:** $6,195

☐ **Model 4440 Shuttle Matrix Printer**
800 lpm **Type:** Shuttle matrix **Matrix:** 9 X 9; 5 X 9; 9 X 18 **Character set:** 96 **Print positions:** 132 **Resolution:** 210 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K; (optional) 10K bytes **Feed:** 6 pin tractor **Carriage width:** 16.54 in. **Introduced:** 1984 **Cost:** $7,795

GLOBAL TURNKEY SYSTEMS, INC.

☐ **1000B Band Printer**
1,000 lpm **Type:** Band **Character set:** 64 **Print positions:** 131 **Buffer:** 131 bytes **Units sold:** 5 since 1983

☐ **300B Band Printer**
300 lpm **Type:** Band **Character set:** 64 **Print positions:** 131 **Buffer:** 131 bytes **Units sold:** 100 since 1983

☐ **36S Video Display Printer**
36 lpm **Type:** Dot matrix **Matrix:** 7 X 7 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 1K bytes **Units sold:** 19 since 1983

☐ **600B Band Printer**
600 lpm **Type:** Band **Character set:** 64 **Print positions:** 131 **Buffer:** 131 bytes **Units sold:** 50 since 1983

☐ **64LPM Matrix Printer**
450 lpm **Type:** Dot matrix **Matrix:** 9 X 7 **Print positions:** 131 **Printing:** bidirectional **Buffer:** 256 bytes **Units sold:** 45 since 1983

HARRIS/LANIER
(formerly Lanier Business Products, Inc.)

☐ **1300-L**
27 cps **Type:** Character **Character set:** 124 **Print positions:** 137; 164 **Printing:** bidirectional **Feed:** Tractor; Friction; Sheet; (optional) Envelope **Carriage width:** 15 in. **Introduced:** 1983 **Cost:** $1,170

HERMES PRODUCTS, INC.

☐ **PC-Printer 1-3**
100; 200; 400 cps **Type:** Dot matrix **Matrix:** 9 X 12; 18 X 36 **Print positions:** 132; 158; 198; 237 **Printing:** bidirectional **Feed:** Tractor; Roll; Sheet **Cost:** $2,120; 2,220

☐ **PC-Printer 2-4**
100; 200; 400 cps **Type:** Dot matrix **Print positions:** 132; 158; 198; 237 **Printing:** bidirectional **Feed:** Tractor **Cost:** $2,220; 2,350

☐ **Printer 612/612-T**
100; 200; 240; 400; 480 cps **Type:** Dot matrix **Character set:** 96; 221 **Print positions:** 132; 158; 198; 237 **Resolution:** 72 X 144 dots per inch **Printing:** bidirectional **Feed:** Tractor; Roll; Sheet **Cost:** $2,495

☐ **Printer 616/616-T**
100; 150; 400 cps **Type:** Dot matrix **Matrix:** 9 X 12; 18 X 36 **Character set:** 96 **Print positions:** 132; 158; 198; 237; 264 **Resolution:** 45 X 120; 90 X 240; 72 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K; (optional) 10K; 18K; 26K bytes **Feed:** Tractor; optional) Roll; Sheet **Cost:** $2,810

HETRA COMPUTER AND COMMUNICATIONS INDUSTRIES, INC.

☐ Model 3100-H3
300 lpm **Type:** Band **Character set:** 48; 64; 96; 120 **Print positions:** 132; 136 **Feed:** Pin **Carriage width:** 18 in. **Units sold:** 50 since 1980 **Cost:** $8,000

☐ Model 3100-H6
600 lpm **Type:** Band **Character set:** 48; 64; 96; 120 **Print positions:** 132; 136 **Feed:** Pin **Carriage width:** 18 in. **Units sold:** 100 since 1980 **Cost:** $9,000

☐ Model 3300-H0
1000 lpm **Type:** Band; Chain **Character set:** 48; 64; 96; 128 **Print positions:** 132; 136 **Feed:** Pin **Carriage width:** 19 in. **Units sold:** 400 since 1979 **Cost:** $12,000

☐ Model 3300-H12
1,200 lpm **Type:** Band; Chain **Character set:** 48; 64; 96; 128 **Print positions:** 132; 136 **Feed:** Pin **Carriage width:** 19 in. **Units sold:** 500 since 1979 **Cost:** $13,000

☐ Model 3300-H6
600 lpm **Type:** Band; Chain **Character set:** 48; 64; 96; 128 **Print positions:** 132; 136 **Feed:** Pin **Carriage width:** 19 in. **Units sold:** 500 since 1979 **Cost:** $11,000

100; 400 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Print positions:** 132 **Resolution:** 100 X 72 dots per inch **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Pin **Carriage width:** 15 in. **Units sold:** 300 since 1984 **Cost:** $6,450

☐ ISI 487

50; 200 cps **Type:** Dot matrix **Matrix:** 7 X 9; 8 X 7 **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 3.5K bytes **Feed:** Tractor **Carriage width:** 15 in. **Units sold:** 4,000 since 1983 **Cost:** $3,950

ITT QUME CORP.

☐ LetterPro 20

22 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 110; 165 **Printing:** bidirectional **Buffer:** 256 bytes **Feed:** Tractor; Friction **Carriage width:** 13 in. **Units sold:** 50,000 since 1983 **Cost:** $599

☐ SPRINT 11 Plus Widetrack

50 cps **Type:** Daisy wheel **Character set:** 130 **Print positions:** 196; 235; 293 **Printing:** bidirectional **Buffer:** 14K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 22 in. **Units sold:** 500 since 1984 **Cost:** $2,995

☐ SPRINT 11 Plus 130

50 cps **Type:** Daisy wheel **Character set:** 130 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 14K bytes **Carriage width:** 15 in. **Units sold:** 2,000 since 1984 **Cost:** $1,795

☐ SPRINT 11/40 Plus

40 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 500; (optional) 14K bytes **Feed:** Friction **Carriage width:** 15 in. **Units sold:** 50,000 since 1982 **Cost:** $1,295

☐ SPRINT 11/55 Plus

55 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 500; (optional) 14K bytes **Feed:** Friction **Carriage width:** 15 in. **Units sold:** 200,000 since 1983 **Cost:** $1,595

☐ SPRINT 11/90 Plus

90 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 500; (optional) 14K bytes **Feed:** Tractor; Sheet **Carriage width:** 15 in. **Units sold:** 5,000 since 1984 **Cost:** $1,995

JUKI OFFICE MACHINE CORP.

Printer Division

☐ Model 5510

22; 180 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 18 **Character set:** 96 **Print positions:** 80; 132 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1984 **Cost:** $499

☐ Model 6000

8; 10 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 90; 108; 135 **Printing:** bidirectional **Feed:** Friction **Carriage width:** 12 in. **Introduced:** 1984 **Cost:** $295

☐ Model 6100

18 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 132; 110; 165 **Printing:** bidirectional **Buffer:** 2K; (optional) Up to 8K bytes **Feed:** Friction **Carriage width:** 13 in. **Introduced:** 1983 **Cost:** $599

☐ Model 6200

30 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 197 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor **Carriage width:** 16 in. **Introduced:** 1985 **Cost:** $745

☐ Model 6300

40 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 197 **Printing:** bidirectional **Buffer:** 3K; (optional) 15K bytes **Feed:** Friction **Carriage width:** 19 in. **Introduced:** 1984 **Cost:** $995

☐ Model 6500

60 cps **Type:** Daisy wheel **Character set:** 96 **Printing:** bidirectional **Buffer:** 3K-15K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 14-7/8 in. **Introduced:** 1986 **Cost:** $1,395

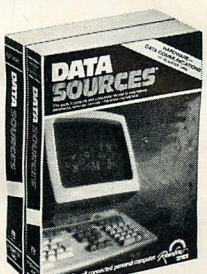
KAYE INSTRUMENTS, INC.

☐ Digistrip LP-1

60 lpm **Type:** Dot matrix **Matrix:** 5 X 8 **Print positions:** 137 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor **Carriage width:** 11 in. **Units sold:** 200 since 1984 **Cost:** $3,000

DATA SOURCES

FOR DP PROFESSIONALS AND COMPUTER SPECIALISTS WHO PLAY IT SMART.



In the complex and ever-changing computer field, smart means knowing how to make the right product choices. Without wasting time and money.

Which means DATA SOURCES...the only comprehensive buyers guide to the computer industry.

With DATA SOURCES you can make better, more intelligent comparisons—from the broadest range of possibilities—in minutes.

DATA SOURCES is published in two volumes, four times a year, so you're always up-to-date. Superbly organized, DATA SOURCES will give you a complete overview of more than 30,000 software packages, 19,000 hardware and data communications products, and profiles of more than 10,000 manufacturing companies.

To subscribe, call toll-free 1-800-443-0100, ext. 251. We'll send your first two-volume edition and enter your one year (four editions) subscription for just $295—over 22% off the regular price.

DATA SOURCES

THE ONLY COMPREHENSIVE GUIDE TO THE COMPUTER INDUSTRY.

P.O. Box 5845, Cherry Hill, N.J. 08034

Product Comparison Charts make it easy to compare an entire group of products.

Hardware including terminals, printers, controllers, and memory devices, plus the full range of data communication products.

Software Package Index to help you access any one of 30,000 packages.

Company Profiles provide quick access to 10,000 vendors.

TPC4

KPG, INC.

☐ PPM 3802
800 lpm Type: Dot matrix Printing: bidirectional Buffer: 2K bytes Feed: Friction Carriage width: 1-7/8 in. Support equip: Cables; Software Units sold: 4,000 since 1984 Cost: $3,155 (Intelligent); $2,290 (Slave)

LEE DATA CORP.

☐ Model 1310 Color Graphics
35; 110; 200 cps Type: Dot matrix Matrix: 18 X 36 Character set: 96 Print positions: 80-225 Printing: bidirectional Buffer: 5K bytes Feed: Tractor; Friction Carriage width: 17 in. Introduced: 1985 Cost: $1,960

☐ Model 1317
80; 160 cps Type: Dot matrix Matrix: 9 X 11 Character set: 96 Print positions: 40; 80; 48; 68; 96; 137 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1984 Cost: $895

LITTON WESTREX PRINTER DIVISION
(division of Litton Industries, Inc.)

☐ Model 820
132 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 46 Printing: bidirectional Buffer: 40 bytes Feed: Friction Units sold: 80,000 since 1978 Cost: $265

☐ Model 840
132 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Printing: bidirectional Buffer: 40 bytes Feed: Friction Units sold: 15,000 since 1979 Cost: $230

☐ Model 841
132 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Printing: bidirectional Buffer: 40 bytes Feed: Friction Units sold: 400 since 1982 Cost: $280

☐ Model 850
132 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 51 Printing: bidirectional Buffer: 51 bytes Feed: Friction Carriage width: 4.75 in. Units sold: 6,000 since 1980 Cost: $260

☐ Westrex 1
140 cps Type: Dot matrix Matrix: 9 X N Character set: 96 Print positions: 80 Printing: bidirectional Buffer: 2K bytes Feed: Pin; Roll Carriage width: 9.5 in. Introduced: 1985 Cost: $499

☐ 800 Series
150 cps Type: Dot matrix Matrix: 5 X 7 Character set: User-defined Print positions: 40; 51 Printing: bidirectional Buffer: 40 bytes Feed: Friction Carriage width: 4.75 in. Units sold: 150,000 since 1978 Cost: $200-$350

☐ 8400 Slip/Document Printer
150 cps Type: Dot matrix Matrix: 5 X 7; 7 X 7; 9 X 7 Character set: 96 Print positions: 40 Printing: bidirectional Buffer: 40 bytes Feed: Friction Carriage width: 3.15 in. Units sold: 200 since 1982 Cost: $795

☐ 8410 Slip/Document Printer
150 cps Type: Dot matrix Matrix: 5 X 7; 7 X 7; 9 X 7 Character set: 96 Print positions: 40 Printing: bidirectional Buffer: 40 bytes Feed: Friction Carriage width: 3.15 in. Units sold: 200 since 1982 Cost: $795

MANNESMANN TALLY

☐ MT 290
50; 200 cps Type: Dot matrix Matrix: 9 X 9; 40 X 18 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 8K bytes Feed: Tractor; Friction Carriage width: 16 in. Support equip: Cables Introduced: 1985 Cost: $999; $1,249 (front feed version)

☐ MT 460; MT 460D; MT 460F
50; 200; 270 cps Type: Dot matrix Matrix: 9 X 9; 18 X 48 Character set: 128; 158; 165; 198; 225 Print positions: 132 Resolution: 240 X 72; 150 X 84 dots per inch Printing: bidirectional Buffer: 2K; (optional) 8K bytes Feed: Tractor; Friction Carriage width: 16 in. Support equip: Cables Introduced: 1985 Cost: $1,949 (MT 460); $2,199 (MT 460D); $2,399 (MT 460F)

☐ MT 490; MT 490F (Multicolor)
150; 400 cps Type: Dot matrix Matrix: 9 X 9; 18 X 48 Character set: 128 Print positions: 132; 158; 198; 225 Resolution: 240 X 144 dots per inch Buffer: 8K bytes Feed: Tractor; Friction Carriage width: 16 in. Support equip: Cables Introduced: 1985 Cost: $2,199 (MT 490); $2,399 (MT 490F)

☐ MT 540
100; 400 lpm Type: Line matrix Character set: 128 Print positions: 219 Resolution: 300 X 144 dots per inch Buffer: 8K bytes Feed: Tractor; Friction Carriage width: 16 in. Support equip: Cables Introduced: 1986 Cost: $3,500

☐ MT 660
600 lpm Type: Dot matrix Matrix: 9 X 7; 9 X 9; 27 X 11; 27 X 13 Character set: 96 Print positions: 132; 198 Resolution: 200 X 200 dots per inch Buffer: 2K; 4K; 8K bytes Feed: Tractor Carriage width: 16 in. Support equip: Cables Units sold: 4,500 since 1983 Cost: $8,490

☐ MT 690
320; 900 lpm Type: Line matrix Matrix: 9 X 7; 9 X 9; 9 X 12; 25 X 12; 27 X 13 Character set: 64; 96 Print positions: 80; 132; 100; 150; 198 Printing: bidirectional Buffer: 2K; (optional) 4K; 8K bytes Feed: Tractor; ; Pin Carriage width: 16 in. Support equip: Cables Introduced: 1985 Cost: $10,500

☐ MT 85; MT 86
45; 180 cps Type: Dot matrix Matrix: 9 X 9; 18 X 24 Character set: 128 Print positions: 80; 136 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 3K bytes Feed: Tractor; Friction Carriage width: 16 in. Support equip: Cables Units sold: 6,000 since 1985 Cost: $499; $599

MATRA COMMUNICATION, INC.

☐ Mini-Printer Plus
120 cps Type: Dot matrix Matrix: 9 X 11 Character set: 96 Print positions: 80; 136 Printing: bidirectional Buffer: 4K; 2K (internal) bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1985 Cost: $445

MITSUBA CORP.

☐ CPA-80
120 cps Type: Dot matrix Matrix: 8 X 9 Character set: 192 Print positions: 40; 80; 142 Printing: bidirectional Buffer: 2K bytes Feed: Friction; Sprocket Carriage width: 10 in. Introduced: 1984 Cost: $299

☐ EN-P1091
22; 120 cps Type: Dot matrix Matrix: 9 X 9; 12 X 12; 12 X 18 Character set: 96 Print positions: 40; 80; 132 Printing: bidirectional Buffer: 1K; (optional) 4K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1984 Cost: $399

☐ EP-150
130 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 40; 80; 132 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 10 in. Units sold: 3,000 since 1984 Cost: $319

☐ EP-1505
140 cps Type: Dot matrix Matrix: 9 X 9 Print positions: 136; 233 Printing: bidirectional Buffer: 2K; (optional) Additional 2K bytes Feed: Friction; Sprocket Carriage width: 10 in. Introduced: 1985 Cost: $449

MITSUBISHI ELECTRONICS AMERICA, INC.

☐ S300 Color Printer
90 cps Type: Dot matrix Matrix: 17 X 12 Character set: 508 Print positions: 96; 136 Resolution: 168 X 168; 168 X 140 dots per inch Buffer: 136 bytes Feed: Tractor; Friction Carriage width: 8.5 in. Introduced: 1986

MOMENTUM SYSTEMS CORP.

☐ Model 3344
300 cps Type: Dot matrix Matrix: 5 X 7; 5 X 9; 13 X 7; 13 X 9 Carriage width: 16.75 in. Introduced: 1984

☐ Model 3346
27; 160 cps Type: Dot matrix Print positions: 80 Resolution: 240 X 216 dots per inch Feed: Tractor Carriage width: 10 in. Introduced: 1984 Cost: $995

☐ Model 3347
27; 160 cps Type: Dot matrix Print positions: 156 Resolution: 240 X 216 dots per inch Feed: Tractor Carriage width: 17 in. Introduced: 1984 Cost: $1,295

MONROE SYSTEMS FOR BUSINESS

☐ MA 2515
160 cps Type: Dot matrix Matrix: 9 X 9; 13 X 17 Character set: 96 Print positions: 136; 233 Printing: bidirectional Feed: Tractor; Friction Carriage width: 16 in. Introduced: 1983 Cost: $1,295; Lease (mo.) —$60

☐ MA 2550
35 cps Type: Thimble Character set: 128 Print positions: 136; 163; 203 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 16 in. Introduced: 1983 Cost: $1,895

☐ MA 2565
350 cps Type: Dot matrix Matrix: 9 X 9; 17 X 9; 17 X 17 Character set: 96 Print positions: 68; 81; 116; 163; 233 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 16 in. Cost: $2,995

MPI (MICRO PERIPHERALS, INC.)

☐ PrintMate 150
150 cps Type: Dot matrix Matrix: 7 X 9; 11 X 9 Character set: 96 Print positions: 136; 163; 204; 231 Printing: bidirectional Buffer: 4K; 20K; 36K; 68K bytes Feed: Tractor Carriage width: 15 in. Units sold: 6,000 since 1983 Cost: $1,045

☐ PrintMate 350
300 cps Type: Dot matrix Matrix: 7 X 9; 23 X 18 Character set: 96 Print positions: 136; 231 Resolution: 144 X 144 Buffer: 16K; (optional) 80K bytes Feed: Tractor; Friction Introduced: 1985 Cost: $1,495

☐ PrintMate 99
100 cps Type: Dot matrix Matrix: 7 X 9; 11 X 9 Character set: 96 Print positions: 80; 96; 136 Printing: bidirectional Buffer: 1K; 2K bytes Feed: Tractor; Friction Carriage width: 9-5/8 in. Units sold: 35,000 since 1981 Cost: $599

☐ Sprinter
160 cps Type: Dot matrix Matrix: 7 X 9; 11 X 9 Character set: 96 Print positions: 80; 96; 115; 120; 136 Printing: bidirectional Buffer: 4K; 20K; 36K; 68K bytes Feed: Tractor; Friction Carriage width: 9-5/8 in. Units sold: 6,000 since 1983 Cost: $595

☐ SXprinter
300 cps Type: Dot matrix Matrix: 7 X 9; X 9; 11 X 18; 18 X 23 Character set: 96 Print positions: 80; 96; 115; 120; 136 Printing: bidirectional Buffer: 4K; 20K; 36K; 68K bytes Feed: Tractor; Friction Carriage width: 9-5/8 in. Units sold: 500 since 1984 Cost: $895

☐ Xprinter
180 cps Type: Dot matrix Matrix: 7 X 9; 11 X 9; 11 X 18 Character set: 96 Print positions: 80; 96; 115; 120; 136 Printing: bidirectional Buffer: 4K; 20K; 36K; 68K bytes Feed: Tractor; Friction Carriage width: 9-5/8 in. Units sold: 2,000 since 1984 Cost: $695

NCR CORP.

☐ Model 2561
80 lpm Type: Dot matrix Matrix: 7 X 7; 9 X 7 Character set: 96; 128 Print positions: 40

☐ Model 6411-1552
120 cps **Type:** Dot matrix **Matrix:** 9 X 7 **Character set:** 256 **Print positions:** 136 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Cost:** $1,185

NEC INFORMATION SYSTEMS, INC.

☐ Pinwriter P2
30; 90; 180 cps **Type:** Dot matrix **Matrix:** 7 X 9; 21 X 18; 13 X 9 **Character set:** 96; 224 **Print positions:** 80; 93; 136 **Resolution:** 240 X 240; 240 X 216 dots per inch **Printing:** bidirectional **Buffer:** (parallel) 3.5K; (serial) 5.5K bytes **Feed:** Friction **Carriage width:** 10 in. **Units sold:** 50,000 since 1984 **Cost:** $699

☐ Pinwriter P3
30; 90; 180 cps **Type:** Dot matrix **Matrix:** 7 X 9; 21 X 18; 13 X 9 **Character set:** 96; 224 **Print positions:** 136; 163; 233 **Resolution:** 240 X 240; 240 X 216 dots per inch **Printing:** bidirectional **Buffer:** (parallel) 3.5K; (serial) 5.5K bytes **Feed:** Tractor; Friction **Carriage width:** 16 in. **Units sold:** 50,000 since 1984 **Cost:** $999

☐ Pinwriter P5
100; 290 cps **Type:** Dot matrix **Matrix:** 24 X 37 **Character set:** 256 **Print positions:** 136 **Resolution:** 360 X 360 dots per inch **Printing:** bidirectional **Buffer:** 8K bytes **Feed:** Tractor; Sheet **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $1,440

☐ Pinwriter P5XL
100; 240; 290 cps **Type:** Dot matrix **Matrix:** N X 24 **Character set:** 128 **Introduced:** 1986 **Cost:** $1,695

☐ Spinwriter elf 350
19 cps **Type:** Thimble **Character set:** 128 **Print positions:** 132; 110; 165 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Sheet; (optional) Tractor **Carriage width:** 13 in. **Units sold:** 1,000 since 1985 **Cost:** $545

☐ Spinwriter elf 360
16; 19 cps **Type:** Thimble **Character set:** 128 **Print positions:** 132; 110; 165 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Friction **Carriage width:** 13 in. **Units sold:** 5,000 since 1985 **Cost:** $545

☐ Spinwriter elf 370
16; 19 cps **Type:** Thimble **Character set:** 128 **Print positions:** 132; 110; 165 **Printing:** bidirectional **Buffer:** 1K bytes **Feed:** Friction; (optional) Tractor; Sheet **Carriage width:** 13 in. **Units sold:** 150 since 1985 **Cost:** $545

☐ Spinwriter 3550
35 cps **Type:** Thimble **Character set:** 128 **Print positions:** 136; 163; 203 **Printing:** bidirectional **Buffer:** 256 bytes **Feed:** Friction **Carriage width:** 16 in. **Units sold:** 96,759 since 1982 **Cost:** $1,440

☐ Spinwriter 8810
55 cps **Type:** Thimble **Character set:** 128 **Print positions:** 136; 163; 203 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction **Carriage width:** 16 in. **Introduced:** 1984 **Cost:** $1,990

☐ Spinwriter 8850
55 cps **Type:** Thimble **Character set:** 128 **Print positions:** 136; 163; 203 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction **Carriage width:** 16 in. **Introduced:** 1984 **Cost:** $1,990

NEWBURY DATA, INC.

☐ Model 8933
120; 240 cps **Type:** Dot matrix **Matrix:** 12 X 24 **Character set:** 96 **Print positions:** 132; 158; 198; 220 **Printing:** bidirectional **Introduced:** 1985

☐ OSP 1
100; 200 cps **Type:** Dot matrix **Print positions:** 80; 132; 113; 136; 169; 192; 226 **Printing:** bidirectional **Introduced:** 1986

☐ OSP 2
100; 200 cps **Type:** Dot matrix **Print positions:** 80; 132; 113; 136; 169; 192; 226 **Printing:** bidirectional **Introduced:** 1985

☐ OSP 3
50; 100; 200 cps **Type:** Dot matrix **Print positions:** 80; 132; 113; 136; 169; 192; 226 **Printing:** bidirectional **Introduced:** 1986

NEWPORT ELECTRONICS, INC.

☐ 821 Alphanumeric Thermal Printer
96 lpm **Type:** Dot matrix **Matrix:** 5 X 9 **Character set:** 96 **Print positions:** 20 **Buffer:** 41 bytes **Feed:** Friction **Carriage width:** 2.25 in. **Units sold:** 900 since 1982 **Cost:** $699

☐ 822 Alphanumeric Thermal Printer
96 lpm **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 102 **Print positions:** 20 **Buffer:** 41 bytes **Feed:** Friction **Carriage width:** 2.25 in. **Units sold:** 1,200 since 1982 **Cost:** $699

NORCOM ELECTRONICS CORP.

☐ DP-80
150 cps **Type:** Character **Matrix:** 9 X 9 **Character set:** 180 **Print positions:** 80 **Resolution:** 60 X 72; 120 X 72 dots per inch **Printing:** bidirectional **Buffer:** 2K; (optional) 4K; 8K bytes **Feed:** Tractor; Sheet; Roll **Support equip:** Cables **Introduced:** 1985 **Cost:** $3,495

NORTH ATLANTIC INDUSTRIES
Peripheral Products Division

☐ Model 7035
180 cps **Type:** Dot matrix **Matrix:** 18 X 24; 12 X 9 **Character set:** 96; 128 **Print positions:** 136-231 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 4.7K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Support equip:** ROM **Units sold:** 2,000 since 1984 **Cost:** $1,795

☐ Model 7065
300 cps **Type:** Dot matrix **Matrix:** 18 X 24 **Character set:** 128 **Print positions:** 136-231 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 4.7K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Support equip:** ROM **Units sold:** 3,000 since 1984 **Cost:** $2,395

☐ Model 7075
215 cps **Type:** Dot matrix **Matrix:** 18 X 24; 12 X 9 **Character set:** 96; 128 **Print positions:** 136-231 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 4.7K bytes **Feed:** Tractor **Carriage width:** 15.5 in. **Support equip:** ROM **Units sold:** 500 since 1985 **Cost:** $1,795

☐ Model 7085
300 cps **Type:** Dot matrix **Matrix:** 18 X 24 **Character set:** 128 **Print positions:** 136-231 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 4.7K bytes **Feed:** Tractor; Friction **Support equip:** ROM **Units sold:** 2,000 since 1985 **Cost:** $2,395

☐ Tempest 220 (Color)
215 cps **Type:** Dot matrix **Matrix:** 18 X 24; 12 X 9 **Character set:** 96; 128 **Print positions:** 136-231 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 4.7K bytes **Feed:** Tractor; Friction; (optional) Automatic sheet **Carriage width:** 15.5 in. **Support equip:** ROM **Units sold:** 500 since 1985 **Cost:** $4,390

☐ Tempest 7020
180 cps **Type:** Dot matrix **Matrix:** 12 X 9 **Character set:** 96; 128 **Print positions:** 136-231 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 4.7K bytes **Feed:** Tractor **Carriage width:** 15.5 in. **Support equip:** ROM **Units sold:** 500 since 1985 **Cost:** $3,590

☐ Tempest 7035
180 cps **Type:** Dot matrix **Matrix:** 18 X 24; 12 X 9 **Character set:** 96; 128 **Print positions:** 136-231 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 4.7K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Support equip:** ROM **Units sold:** 500 since 1985 **Cost:** $3,990

OKIDATA

☐ ML182
60; 120 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 96; 137 **Resolution:** 60 X 72; 72 X 72; 120 X 144; 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 10 in. **Introduced:** 1984 **Cost:** $299

☐ ML192 Plus
40; 80; 160; 200 cps **Type:** Dot matrix **Matrix:** 7 X 9; 9 X 9; 18 X 9; 9 X 18; 17 X 17 **Introduced:** 1986 **Cost:** $499

☐ ML193 Plus
40; 80; 160; 200 cps **Type:** Dot matrix **Matrix:** 7 X 9; 9 X 9; 18 X 9; 9 X 18; 17 X 17 **Introduced:** 1986 **Cost:** $749

☐ ML292
100; 200; 240 cps **Type:** Dot matrix **Feed:** ; Sheet **Introduced:** 1986 **Cost:** $699

☐ ML293
100; 200; 240 cps **Type:** Dot matrix **Feed:** ; Sheet **Introduced:** 1986 **Cost:** $899

☐ ML294
100; 400 cps **Type:** Dot matrix **Matrix:** 17 X 17 **Introduced:** 1986 **Cost:** $1,499

☐ ML84
50; 100; 200 cps **Type:** Dot matrix **Matrix:** 9 X 9; 9 X 17 **Character set:** 48; 64; 96 **Print positions:** 68; 81; 116; 136; 163; 231 **Printing:** bidirectional **Buffer:** 2K (optional) bytes **Feed:** Tractor; Friction **Carriage width:** 16 in. **Introduced:** 1982 **Cost:** $899 (parallel); $1,019 (serial)

☐ ML93
160 cps **Type:** Dot matrix **Matrix:** 9 X 9; 9 X 17 **Character set:** 96 **Print positions:** 68; 81; 116; 136; 163; 233 **Printing:** bidirectional **Buffer:** 256; (optional) 2K; 4K bytes **Feed:** Tractor; Friction **Carriage width:** 16 in. **Introduced:** 1983 **Cost:** $799

☐ Okimate 20 Color Screen Printer
40; 80 cps **Type:** Dot matrix **Matrix:** 7 X 9; 7 X 18; 14 X 18; 18 X 18 **Character set:** 95 **Print positions:** 40; 80; 132; 136 **Resolution:** 144 X 144; 160 X 144 dots per inch **Printing:** bidirectional **Buffer:** 8K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Support equip:** Cables **Introduced:** 1985

☐ Pacemark 2410
85; 175; 350 cps **Type:** Dot matrix **Matrix:** 9 X 9; 17 X 9; 17 X 17 **Character set:** 96 **Print positions:** 68; 81; 116; 136; 163; 233 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K; 4K bytes **Feed:** Tractor; Friction; Sheet **Carriage width:** 16 in. **Introduced:** 1983 **Cost:** $2,395 (parallel); $2,475 (serial)

OLYMPIA USA, INC.

☐ ESW 1000
15; 25; 40 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 118; 141; 176 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $549

☐ ESW 2000; ESW 3000K
15; 25; 40 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 150; 180; 225 **Introduced:** 1986 **Cost:** $799; $1,699

☐ NP 80; NP 136
200 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 136 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $549; $699

OPE PRINTERS, INC.
(subsidiary of Olivetti OPE)

☐ DY250
25 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 132; 158; 197 **Printing:** bidirectional **Buffer:** 1K; 3K bytes **Feed:** Friction **Carriage width:** 16.7 in. **Introduced:** 1983 **Cost:** $995

☐ DY450
45 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 132; 158; 197 **Printing:** bidirectional **Buffer:** 1K; 3K bytes **Feed:** Friction **Carriage width:** 16.7 in. **Introduced:** 1984 **Cost:** $1,495

ORION RESEARCH, INC.

☐ Orion GLP
12; 50 cps Type: Dot matrix Print positions: 80; 132 Printing: bidirectional Introduced: 1986 Cost: $625

OUTPUT TECHNOLOGY CORP.

☐ TriMatrix OT-700e
700 cps Type: Dot matrix Matrix: 7 X 9 Character set: 96 Print positions: 136; 226; 113; 68; 163; 81 Units sold: 6,600 since 1985 Cost: $1,995

☐ TriMatrix OT-700n
700; 37-59 cps Type: Dot matrix Matrix: 7 X 9 Character set: 96 Print positions: 136; 226; 113; 68; 163; 81 Resolution: 50/100 X 69 dots per inch Printing: bidirectional Buffer: 4K bytes Feed: Tractor Carriage width: 16 in. Units sold: 150 since 1986 Cost: $2,095

☐ TriMatrix OT-777
700 cps Type: Dot matrix Matrix: 9 X 7 Character set: 96 Print positions: 136; 226; 113; 68; 163; 81 Resolution: 50/100 X 69 dots per inch Printing: bidirectional Buffer: 8K bytes Feed: Tractor Carriage width: 16 in. Units sold: 247 since 1985 Cost: $3,195

PANASONIC INDUSTRIAL CO.
Computer Products Division

☐ KX-P1080
100 cps Type: Dot matrix Matrix: 9 X 9; 23 X 18 Character set: 96; 32 Print positions: 40; 80; 96; 120; 137; 48; 60; 68 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 1K; (optional) 4K bytes Feed: Tractor; Friction Carriage width: 10 in. Support equip: ROM Introduced: 1985 Cost: $319

☐ KX-P1091
120 cps Type: Dot matrix Matrix: 9 X 9; 23 X 18 Character set: 96; 32 Print positions: 40; 80; 96; 137; 48; 68 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 1K; (optional) 4K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1984 Cost: $399

☐ KX-P1092
180 cps Type: Dot matrix Matrix: 9 X 9; 12 X 18 Character set: 96; 32 Print positions: 40; 80; 137; 96; 48; 68 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 7K; (optional) 11K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1984 Cost: $499

☐ KX-P1592
180 cps Type: Dot matrix Matrix: 9 X 9; 23 X 18 Character set: 96; 32 Print positions: 68; 81; 102; 116; 136; 163; 204; 233 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 7K; (optional) 32K bytes Feed: Tractor; Friction Carriage width: 16.5 in. Introduced: 1985 Cost: $699

☐ KX-P1595
240 cps Type: Dot matrix Matrix: 9 X 9; 23 X 18 Character set: 96; 32 Print positions: 68; 81; 102; 116; 136; 163; 204; 233 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 15K; (optional) 32K bytes Feed: Tractor; Friction Carriage width: 16.5 in. Introduced: 1986 Cost: $949

☐ KX-P3131
17 cps Type: Daisy wheel Character set: 96 Print positions: 132; 110; 165 Printing: bidirectional Buffer: 6K; (optional) 32K bytes Feed: Friction; (optional) Tractor; Cut sheet Carriage width: 13.5 in. Introduced: 1985 Cost: $419

☐ KX-P3151
22 cps Type: Daisy wheel Character set: 96 Print positions: 132; 158; 198 Printing: bidirectional Buffer: 7K; (optional) 48K bytes Feed: Friction; (optional) Tractor; Cut sheet Carriage width: 15.5 in. Introduced: 1984 Cost: $659

PERRY DATA SYSTEMS, INC.

☐ Model 2014/Receipt Printer
120 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Printing: bidirectional Buffer: 1K bytes Feed: Pinch Carriage width: 3.5 in. Support equip: Cables Introduced: 1983 Cost: $995

☐ Model 2042/Document Printer
120 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Printing: bidirectional Buffer: 1K bytes Feed: Pinch Support equip: Cables Introduced: 1983 Cost: $995

PERSONAL MICRO COMPUTERS, INC.
(division of Recortec, Inc.)

☐ DMP-85
120 cps Type: Dot matrix Matrix: 7 X 9 Character set: 96 Print positions: 80; 96; 135 Resolution: 160 X 144 dots per inch Printing: bidirectional Buffer: 1.3K bytes Feed: Tractor; Friction Carriage width: 10 in. Units sold: 3,000 since 1982 Cost: $295

PHILIPS PERIPHERALS, INC.

☐ GP 300 PC Series
60; 80; 150; 300 cps Type: Dot matrix Matrix: 9 X 9 Resolution: 72 X 60; 144 X 144 dots per inch Printing: bidirectional Buffer: 2K; 3K bytes Carriage width: 14.5 in. Introduced: 1986

PINETREE COMPUTER SYSTEMS, INC.

☐ Pinetree Printer
160 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 132 Printing: bidirectional Feed: Friction; Pin Carriage width: 8.5 in. Introduced: 1983 Cost: $400

PLESSEY PERIPHERAL SYSTEMS, INC.
(division of The Plessey Co., Ltd.)

☐ LC-25
500 cps Type: Dot matrix Matrix: 17 X 18 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 4.5K bytes Feed: Tractor; Sheet Carriage width: 16 in. Introduced: 1984 Cost: $2,295

☐ LC-25B
240 cps Type: Dot matrix Matrix: 17 X 18 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 3.5K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1984 Cost: $1,725

☐ LCQ-55
150 cps Type: Dot matrix Matrix: 32 X 18 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 256 bytes Feed: Tractor; Friction Carriage width: 11 in. Introduced: 1984 Cost: $935

☐ PM-LC11-RO
150 cps Type: Dot matrix Matrix: 9 X 9 Character set: 95 Print positions: 132 Printing: bidirectional Buffer: 2.6K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1981 Cost: $1,380

PRIMAGES, INC.

☐ Primage 90
62; 90 cps Type: Daisy wheel Character set: 96 Print positions: 135; 162; 202 Printing: bidirectional Buffer: 1K; 2K bytes Feed: Tractor; Friction Carriage width: 16.5 in. Units sold: 5,000 since 1984 Cost: $1,795-$2,295

PRINTEK, INC.

☐ FormsPro 2000
80; 200 cps Type: Dot matrix Matrix: 9 X 9; 36 X 18 Character set: 256 Print positions: 132; 227 Printing: bidirectional Introduced: 1986 Cost: $2,195

☐ Model 910SPC
45; 200 cps Type: Dot matrix Matrix: 9 X 9; 24 X 18 Character set: 96 Print positions: 136-227 Resolution: 144 X 144 dots per inch Printing: bidirectional Buffer: 1.8K-12K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1982 Cost: $1,595

☐ Model 920SPC
80; 340 cps Type: Dot matrix Matrix: 9 X 9; 24 X 18 Character set: 96 Print positions: 136-227 Resolution: 144 X 144 dots per inch Printing: bidirectional Buffer: 1.8K-12K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1982 Cost: $2,395

☐ Model 930/dlx
80; 200 cps Type: Dot matrix Matrix: 9 X 9; 36 X 18 Character set: 256 Print positions: 132; 227 Resolution: 144 X 144 dots per inch Printing: bidirectional Buffer: 8K bytes Feed: Tractor; Friction Carriage width: 16 in. Introduced: 1986 Cost: $1,995

☐ Model 935
40; 200 cps Type: Dot matrix Matrix: 9 X 9; 36 X 19 Character set: 96 Print positions: 136-227 Resolution: 144 X 144 dots per inch Printing: bidirectional Buffer: 768 bytes Feed: Tractor; Friction Carriage width: 16 in. Introduced: 1985 Cost: $1,695

PRINTER SYSTEMS CORP. (PSC)

☐ PSC LW 400/455
300; 400; 480 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132 Carriage width: 18 in. Units sold: 11,000 since 1983 Cost: $5,818-$6,645

☐ PSC LW 800/855
600; 800; 960 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132 Carriage width: 18 in. Units sold: 6,000 since 1983 Cost: $8,110-$8,937

PRINTRONIX, INC.

☐ B2012
725; 900; 1,200; 1,500 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132; 136 Feed: Tractor Carriage width: 17.5 in. Introduced: 1984 Cost: $13,950

☐ B2015
900; 1,100; 1,500; 1,800 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132; 136 Feed: Tractor Carriage width: 17.5 in. Introduced: 1984 Cost: $17,500

☐ DP1000
800; 1,000; 1,150 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132; 136 Feed: Tractor Carriage width: 17.5 in. Introduced: 1984 Cost: $11,800

☐ DP1200
875; 1,200; 1,400 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132; 136 Feed: Tractor Carriage width: 17.5 in. Introduced: 1984 Cost: $12,800

☐ DP600
430; 600; 700 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132; 136 Feed: Tractor Carriage width: 17.5 in. Introduced: 1984 Cost: $9,400

☐ DP750
540; 750; 870 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132; 136 Feed: Tractor Carriage width: 17.5 in. Introduced: 1984 Cost: $10,400

☐ DP9632B
60-240 cps Type: Dot matrix Matrix: 7 X 9 Character set: 96 Print positions: 132 Resolution: 72 X 72; 144 X 144 dots per inch Buffer: 3.2K bytes Feed: Tractor Carriage width: 13.2 in. Introduced: 1985 Cost: $2,995

☐ MVP 150B
80; 150; 200 lpm Character set: 229 Print positions: 132; 66; 165; 220; 233 Resolution: 200 dots per inch Buffer: 3.9K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1983 Cost: $3,745

☐ P600XQ
600; 800 lpm **Type:** Dot matrix **Matrix:** 5 X 7; 5 X 9; 9 X 5; 9 X 7; 9 X 9 **Character set:** 64; 96 **Print positions:** 132; 198 **Buffer:** 1K bytes **Feed:** Tractor **Carriage width:** 16 in. **Introduced:** 1983 **Cost:** $8,550

☐ 4160 Graphic Printer
130 lpm **Type:** Dot matrix **Matrix:** 11 X 16 **Character set:** 96 **Print positions:** 136 **Resolution:** 160 X 168 dots per inch **Buffer:** 1K bytes **Feed:** Tractor **Carriage width:** 16 in. **Units sold:** 9,000 since 1981 **Cost:** $5,380

QYTEL
(division of Consolidated Data Systems, Ltd.)

☐ Qytext 2750
180 lpm **Type:** Dot matrix **Matrix:** 17 X 11 **Character set:** 128 **Print positions:** 132; 214 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 14-7/8 in. **Units sold:** 4,800 since 1978 **Cost:** $1,595; Lease (mo.) — $70

☐ Qytext 2780
35; 55 cps **Type:** Thimble **Character set:** 128 **Print positions:** 132; 214 **Introduced:** 1978

☐ Qytext 5780
300 lpm **Type:** Dual mode matrix **Matrix:** 17 X 16 **Character set:** 128 **Print positions:** 132; 214 **Printing:** bidirectional **Buffer:** Up to 64K bytes **Units sold:** 2,100 since 1978 **Cost:** $295-$7,295

RCA SERVICE CO.
Business Services and Systems

☐ RCA Workstation Printer
60; 120 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 80; 96; 137 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 10 in. **Support equip:** Cables **Introduced:** 1984

RENAISSANCE MARKETING, INC.

☐ 7000 Standard; Grand Slam
1,500 lpm **Type:** Chain **Character set:** 96 **Print positions:** 132 **Buffer:** 132 bytes **Feed:** Tractor; Pin **Carriage width:** 19 in. **Cost:** $21,000

RICOH CORP.

☐ RP 1500Q
40 cps **Type:** Daisy wheel **Character set:** 128 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 2K bytes **Units sold:** 5,000 since 1984 **Cost:** $1,489

☐ RP 1600Q
50 cps **Type:** Daisy wheel **Character set:** 128 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 2K bytes **Units sold:** 3,000 since 1984 **Cost:** $1,695

☐ RP 2200Q
20 cps **Type:** Daisy wheel **Character set:** 100 **Printing:** bidirectional **Buffer:** 512 bytes **Units sold:** 4,400 since 1983 **Cost:** $750

☐ RP 3400Q
40; 52 cps **Character set:** 96 **Printing:** bidirectional **Introduced:** 1985 **Cost:** $999

RMK SYSTEMS

☐ RM-200
200 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96; 128 **Print positions:** 80; 132 **Printing:** bidirectional **Buffer:** 8K bytes **Feed:** Friction **Carriage width:** 10.5 in. **Support equip:** Cables; Software **Units sold:** 100 since 1984 **Cost:** $400

ROYAL CONSUMER BUSINESS PRODUCTS

☐ LetterMaster
8 cps **Type:** Daisy wheel **Character set:** 94 **Printing:** bidirectional **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables **Introduced:** 1985 **Cost:** $300

☐ OfficeMaster 2000/2000S
20 cps **Type:** Daisy wheel **Character set:** 164 **Print positions:** 120; 180; 144 **Printing:** bidirectional **Buffer:** 1.5K bytes **Feed:** Friction **Carriage width:** 14-1/8 in. **Support equip:** Cables **Introduced:** 1984 **Cost:** $595

SANYO BUSINESS SYSTEMS CORP.
(Computer Division)

☐ PR 3000
12 cps **Type:** Daisy wheel **Character set:** 91 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 128K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables **Units sold:** 4,000 since 1985 **Cost:** $299

☐ PR 5200
20 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 14.5 in. **Support equip:** Cables **Introduced:** 1985 **Cost:** $399

☐ PR 5500
15-16 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 128K bytes **Feed:** Tractor; Friction **Carriage width:** 17 in. **Support equip:** Cables **Units sold:** 10,000 since 1983 **Cost:** $549

SEIKOSHA CO., LTD.

☐ BP-5420AI
104; 420 cps **Type:** Dot matrix **Matrix:** 12 X 8; 24 X 16 **Print positions:** 136; 163 **Printing:** bidirectional **Introduced:** 1985 **Cost:** $2,295

☐ MP-1300AI
50; 300 cps **Type:** Dot matrix **Matrix:** 12 X 9; 24 X 18 **Print positions:** 80; 96 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $799

☐ SP-1000 Series
20; 100 cps **Type:** Dot matrix **Matrix:** 12 X 9; 24 X 18 **Character set:** 96 **Print positions:** 80; 137 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $359

SHARP ELECTRONICS CORP.
Systems Division

☐ JX-220
40; 80 cps **Type:** Dot matrix **Matrix:** 12 X 16 **Character set:** 256 **Print positions:** 80 **Resolution:** 120 dots per inch **Buffer:** 2K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Introduced:** 1985

☐ JX-250
35; 70 cps **Type:** Dot matrix **Matrix:** 24 X 32 **Character set:** 256 **Print positions:** 100; 170 **Resolution:** 240 dots per inch **Buffer:** 8K bytes **Feed:** Friction **Carriage width:** 12 in. **Introduced:** 1985

☐ JX-720
35 cps **Type:** Dot matrix **Character set:** 96; 32 **Print positions:** 85 **Resolution:** 120 dots per inch **Printing:** bidirectional **Buffer:** 16K bytes **Feed:** Friction **Carriage width:** 11 in. **Cost:** $1,495

SHINWA OF AMERICA, INC.

☐ CPA-80
100 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 2K; 4K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1985 **Cost:** $156

☐ CPB-136
130 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 136 **Resolution:** 9 X 9 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 15.5 in. **Introduced:** 1985 **Cost:** $220

☐ CPB-80
130 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 80 **Resolution:** 9 X 9 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1985 **Cost:** $161

☐ TP-40
40 cps **Type:** Dot matrix **Matrix:** 8 x 5 **Character set:** 96 **Print positions:** 40 **Printing:** bidirectional **Feed:** Friction **Carriage width:** 4.25 in. **Introduced:** 1985

☐ TS-80
60 cps **Type:** Dot matrix **Matrix:** 8 x 5 **Character set:** 96 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 1K bytes **Feed:** Tractor; Friction **Carriage width:** 8.5 in. **Introduced:** 1985

SIEMENS INFORMATION SYSTEMS, INC.
Communication Systems & Networks Group

☐ PT-88S
200 cps **Type:** Dot matrix **Matrix:** 9 X 9; 18 X 18 **Character set:** 96 **Print positions:** 80 **Resolution:** 102 X 102 **Printing:** bidirectional **Buffer:** 256; (optional) 4K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Support equip:** ROM **Units sold:** 200,000 since 1983 **Cost:** $699

☐ PT-89S
200 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 132 **Resolution:** 102 X 102 **Printing:** bidirectional **Buffer:** 165; (optional) 4K bytes **Feed:** Tractor; Friction **Carriage width:** 15.75 in. **Support equip:** ROM **Units sold:** 200,000 since 1984 **Cost:** $849

☐ PT-90
200; 400 cps **Type:** Dot matrix **Matrix:** 96 X 32; 48 X 32 **Character set:** 96 **Print positions:** 136 **Resolution:** 240 X 240 **Printing:** bidirectional **Buffer:** 10K bytes **Feed:** Tractor; Friction; Cut sheet **Carriage width:** 15.75 in. **Support equip:** ROM **Introduced:** 1986

SILVER-REED AMERICA, INC.

☐ EXP420
12 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 81; 98; 121 **Printing:** bidirectional **Introduced:** 1986 **Cost:** $299

☐ EXP600
25 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 3K; (optional) 40K bytes **Feed:** Tractor; Sheet **Carriage width:** 17 in. **Introduced:** 1986 **Cost:** $699

SINGER DATA PRODUCTS

☐ Model 400
100; 400 cps **Type:** Dot matrix **Matrix:** 9 X N **Character set:** 221 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 16.85 in. **Introduced:** 1983 **Cost:** $2,550; $5,000

☐ Model 400-C (Eight Color)
100; 400 cps **Type:** Dot matrix **Matrix:** 9 X N **Character set:** 221 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 16.85 in. **Introduced:** 1983 **Cost:** $2,695

☐ Model 5010
42 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 34 **Feed:** Tractor; Friction **Carriage width:** 4 in. **Introduced:** 1976 **Cost:** $1,075

☐ Model 5011
42 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 34 **Feed:** Tractor; Friction **Carriage width:** 4 in. **Introduced:** 1976 **Cost:** $1,075

☐ Model 5012
42 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 34 **Feed:** Tractor; Friction **Carriage width:** 4 in. **Introduced:** 1976 **Cost:** $1,075

☐ Model 5080
100 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 96 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 300 bytes **Feed:** Friction; Pin **Carriage width:** 8.5 in. **Units sold:** 2,000 since 1981 **Cost:** $395

☐ PC-200
100; 200 cps Type: Dot matrix Matrix: 9 X N Character set: 221 Print positions: 132; 158; 198 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 16.85 in. Introduced: 1983 Cost: $2,135

☐ PC-400
100; 400 cps Type: Dot matrix Print positions: 132 Resolution: 72 X 144 dots per inch Printing: bidirectional Feed: Tractor; (optional) Sheet Carriage width: 12 in. Introduced: 1985 Cost: $2,300

SOUTHERN SYSTEMS, INC.

☐ B-1000
1,000 lpm Type: Band Character set: 48; 64; 96 Print positions: 132 Feed: Tractor Carriage width: 16 in. Units sold: 150 since 1981 Cost: $12,345

☐ B-300
300 lpm Type: Band Character set: 48; 64; 96 Print positions: 132 Feed: Tractor Carriage width: 16 in. Units sold: 2,000 since 1979 Cost: $6,300

☐ B-600
600 lpm Type: Band Character set: 48; 64; 96 Print positions: 132 Feed: Tractor Carriage width: 16 in. Units sold: 1,600 since 1979 Cost: $7,990

☐ M-200
340 cps Type: Dot matrix Matrix: 7 X 7 Character set: 128 Print positions: 132 Printing: bidirectional Feed: Tractor Carriage width: 16 in. Units sold: 2,800 since 1978 Cost: $3,095

☐ QT1000
1,000 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132 Feed: Tractor Carriage width: 17 in. Units sold: 150 since 1981 Cost: $14,795

☐ QT1200
1,200 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132 Feed: Tractor Carriage width: 17 in. Units sold: 175 since 1981 Cost: $15,690

☐ ST450
450 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132 Feed: Tractor Carriage width: 17 in. Units sold: 100 since 1985 Cost: $5,600

☐ ST900
900 lpm Type: Band Character set: 48; 64; 96; 128 Print positions: 132 Feed: Tractor Carriage width: 17 in. Units sold: 100 since 1985 Cost: $6,925

SPERRY CORP.
Information Systems Group

☐ Model 0472/00
32; 160 cps Type: Dot matrix Matrix: 9 X 9; 18 X 24 Resolution: 240 X 216 dots per inch Printing: bidirectional Buffer: 8K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1986 Cost: $695

☐ Model 5
60; 100 cps Type: Dot matrix Character set: 96 Print positions: 40; 80; 137 Resolution: 240 X 72 dots per inch Printing: bidirectional Feed: Tractor; Friction; Sprocket Carriage width: 10 in. Introduced: 1986

☐ 431 Correspondence Quality Printer
55 cps Type: Daisy wheel Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 132 bytes Feed: Tractor; Friction; Cut sheet Carriage width: 14 in. Support equip: Cables; ROM Units sold: 11,000 since 1983 Cost: $2,025

STAR MICRONICS AMERICA, INC.

☐ NB-15
100; 300 cps Type: Dot matrix Buffer: 16K bytes Feed: Tractor; Friction Introduced: 1986

☐ NL-10
30; 120 cps Type: Dot matrix Printing: bidirectional Introduced: 1986 Cost: $255

☐ SB-10
60; 144 cps Type: Dot matrix Matrix: 24 X N Character set: 96 Print positions: 80; 132; 96 Printing: bidirectional Buffer: Up to 128K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1985 Cost: $949

☐ SD-10
40; 160 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 40; 80; 96; 136 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1985 Cost: $449

☐ SD-15
40; 160 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 136; 163; 232 Printing: bidirectional Buffer: 16K bytes Feed: Tractor; Friction Carriage width: 15 in. Introduced: 1985 Cost: $599

☐ SG-10
30; 120 cps Type: Dot matrix Matrix: 9 X 9; 18 X 9; 18 X 18 Character set: 64; 96; 32 Print positions: 80; 96; 136 Printing: bidirectional Buffer: 816; (optional) 4K; 8K bytes Feed: Tractor; Friction Carriage width: 10 in. Introduced: 1985 Cost: $299

☐ SG-15
30; 120 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 136; 164; 232 Printing: bidirectional Buffer: 816 bytes Feed: Tractor; Friction Carriage width: 15 in. Introduced: 1985 Cost: $499

☐ SR-10
50; 200 cps Type: Dot matrix Matrix: 9 X 9; 18 X 18 Character set: 96 Print positions: 40; 80; 96; 136 Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Introduced: 1985 Cost: $649

☐ SR-15
50; 200 cps Type: Dot matrix Matrix: 9 X 9; 18 X 18 Character set: 96 Print positions: 136; 164; 233 Printing: bidirectional Buffer: 16K bytes Feed: Tractor; Friction Carriage width: 15 in. Introduced: 1985 Cost: $799

☐ STX-10
60 cps Type: Dot matrix Print positions: 40; 80 Printing: bidirectional Carriage width: 8.5 in. Introduced: 1985 Cost: $199

SUMITRONICS, INC.
(subsidiary of Sumitomo Corp.)

☐ Sumicom 1120
18 cps Type: Daisy wheel Character set: 96 Printing: bidirectional Buffer: 2K bytes Feed: Friction; (optional) Tractor; Pin Carriage width: 13 in. Introduced: 1984 Cost: $495

SWINTEC CORP.

☐ Compumate 2100
20 cps Type: Daisy wheel Character set: 100 Print positions: 172 Printing: bidirectional Buffer: 256 bytes Feed: Tractor; Friction Carriage width: 15 in. Support equip: Cables Units sold: 10,000 since 1984 Cost: $599

SYNTEST CORP.

☐ SP-200G
24 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 20 Buffer: 20 bytes Feed: Friction Carriage width: 2.25 in. Units sold: 150 since 1984 Cost: $365

☐ SP-2010
130 cps Type: Dot matrix Print positions: 80 Buffer: 7K bytes Feed: Roll; Fanfold Carriage width: 19 in. Introduced: 1985 Cost: $985

☐ SP-400G
24 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Buffer: 40 bytes Feed: Friction Carriage width: 3 1/8 in. Units sold: 500 since 1983 Cost: $365

☐ SP-700
108 lpm Type: Dot matrix Matrix: 5 X 7 Character set: 103 Print positions: 40 Printing: bidirectional Buffer: 40 bytes Feed: Friction Carriage width: 2.75 in. Units sold: 250 since 1983 Cost: $385

TAB PRODUCTS CO.
Electronic Office Products

☐ Model 184
200 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 136; 231 Resolution: 72 X 72; 144 X 144 dots per inch Printing: bidirectional Buffer: 2K bytes Feed: Tractor; Friction Carriage width: 15.5 in. Units sold: 2,500 since 1982 Cost: $1,095

☐ M20/M21
120 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 80; 132 Resolution: 64 X 64 dots per inch Printing: bidirectional Buffer: 2K bytes Feed: Friction; Pin Carriage width: 9 in. Support equip: Cables Units sold: 1,000 since 1985 Cost: $299

TANDY/RADIO SHACK

☐ DMP-105
80 cps Type: Dot matrix Matrix: 8 X 9 Character set: 96 Print positions: 80 Resolution: 480-800 dots per inch Printing: bidirectional Buffer: 1K bytes Feed: Tractor; Friction Carriage width: 9.5 in. Support equip: Cables; Software Introduced: 1984 Cost: $200

☐ DMP-130
25; 100 cps Type: Dot matrix Matrix: 8 X 9; 8 X 16 Character set: 128 Print positions: 10 Printing: bidirectional Buffer: 1K bytes Feed: Tractor; Friction Carriage width: 9.5 in. Support equip: Cables Introduced: 1985 Cost: $350

☐ DMP-2110
230 cps Type: Dot matrix Matrix: 24 X 36 Character set: 128 Print positions: 132 Printing: bidirectional Introduced: 1984 Cost: $1,295

☐ DMP-2200
380 cps Type: Dot matrix Matrix: 9 X 9; 15 X 9 Character set: 128 Print positions: 132 Printing: bidirectional Buffer: 1K bytes Feed: Tractor Carriage width: 16 in. Introduced: 1985 Cost: $1,695

☐ DMP-430
180 cps Type: Dot matrix Matrix: 18 X 24 Character set: 128 Print positions: 132 Printing: bidirectional Buffer: 1K bytes Feed: Tractor; Friction Carriage width: 15 in. Support equip: Cables Introduced: 1985 Cost: $899

TELECOM TERMINAL SYSTEMS

☐ Model 10W75
120 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 80 Buffer: 1K bytes Feed: Tractor Carriage width: 9.5 in. Units sold: 100 since 1981

TELEFILE COMPUTER PRODUCTS, INC.
(subsidiary of Telefile Computer Corp.)

☐ T2425
100; 160; 180; 192 cps Type: Dot matrix Matrix: 16 X 11; 24 X N Character set: 96 Print positions: 136; 163; 226 Printing: bidirectional Feed: Friction; Sheet Carriage width: 15 in. Introduced: 1984

TELEVIDEO SYSTEMS, INC.

☐ TP 740
35; 40 cps Type: Daisy wheel Character set: 96 Print positions: 132; 158; 198 Printing: bidirectional Buffer: 1.5K; (optional) 7.5K bytes Feed: Tractor; Friction; Sheet Carriage width: 15 in. Support equip: Cables Introduced: 1985 Cost: $995

☐ TP 760
48; 57 cps **Type:** Character **Character set:** 96 **Print positions:** 132; 158; 197 **Printing:** bidirectional **Buffer:** 1.5K; (optional) 7.5K bytes **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $1,195

☐ TP 780
67; 90 cps **Type:** Character **Character set:** 96 **Print positions:** 132; 158; 197 **Printing:** bidirectional **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $1,495

☐ TP 790
67; 90 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 197 **Resolution:** 120 X 48 dots per inch **Printing:** bidirectional **Buffer:** 1.5K; (optional) 7.5K bytes **Introduced:** 1986 **Cost:** $1,495

TELEX COMPUTER PRODUCTS, INC.
(subsidiary of Telex Corp.)

☐ Model 186
40 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 136; 163 **Printing:** bidirectional **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1983 **Cost:** $2,250

TELEX COMPUTER PRODUCTS, INC.
Word Processing Division

☐ R8188-1
40-55 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 197 **Printing:** bidirectional

☐ R8188-2
40-55 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 197 **Printing:** bidirectional

TEMPEST TECHNOLOGIES, INC.

☐ DWP5155 Tempest
45 cps **Type:** Daisy wheel **Character set:** 96; 88; 92 **Print positions:** 132; 158; 196 **Resolution:** 120 X 48 dots per inch **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction; Sheet **Introduced:** 1983

☐ DWP5155-SQ Tempest Super-Quiet
45 cps **Type:** Daisy wheel **Character set:** 96; 88; 92 **Print positions:** 132; 158; 196 **Resolution:** 120 X 48 dots per inch **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Friction; Sheet **Introduced:** 1985

☐ SLP3184 Tempest
45; 180 cps **Type:** Dot matrix **Matrix:** 9 X 9 **Character set:** 96 **Print positions:** 136 **Resolution:** 72 X 72; 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 6K (option) bytes **Feed:** Tractor; Friction; Pin; (optional) Sheet **Carriage width:** 15.5 in. **Introduced:** 1985

☐ SLP3304 Tempest
100; 200; 300 cps **Type:** Dot matrix **Matrix:** 9 X 18 **Character set:** 96 **Print positions:** 136 **Resolution:** 72 X 72; 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 6K (option) bytes **Feed:** Tractor; Friction; Pin; (optional) Sheet **Carriage width:** 15.5 in. **Introduced:** 1985

☐ SLP3404 Tempest
100; 400 cps **Type:** Dot matrix **Matrix:** 9 X 18 **Character set:** 96 **Print positions:** 136 **Resolution:** 72 X 72; 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 6K (option) bytes **Feed:** Tractor; Friction; Pin; (optional) Sheet **Carriage width:** 15.5 in. **Introduced:** 1985 **Cost:**

☐ SLP5310 Tempest
150 cps **Type:** Dot matrix **Matrix:** 9 X 7 **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Feed:** Tractor **Carriage width:** 15 in. **Introduced:** 1983

TESSERA

☐ CF-18
200 cps **Type:** Dot matrix **Matrix:** 9 X 9; 48 X 18 **Character set:** 255 **Print positions:** 132 **Resolution:** 144 X 480 dots per inch **Printing:** bidirectional **Buffer:** 6K bytes **Feed:** Tractor; Friction **Carriage width:** 14-7/8 in. **Support equip:** Software; ROM **Units sold:** 1,500 since 1985 **Cost:** $1,740

TEXAS INSTRUMENTS

☐ Model 850XL
35, 150 cps **Type:** Dot matrix **Matrix:** 9 X 9; 15 X 9 **Character set:** 64; 96 **Print positions:** 40; 80; 48; 66; 96; 134 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 256; (optional) 4K bytes **Feed:** Tractor; Friction **Carriage width:** 11 in. **Support equip:** Software **Units sold:** 150,000 since 1983 **Cost:** $599

☐ Model 855
35; 150 cps **Type:** Dot matrix **Matrix:** 9 X 9; 32 X 18 **Character set:** 96 **Print positions:** 40; 80; 48; 66; 96; 134 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 256; (optional) 4K bytes **Feed:** Tractor; Friction **Carriage width:** 11 in. **Support equip:** Software **Introduced:** 1983 **Cost:** $739

☐ Model 857
35; 150 cps **Type:** Dot matrix **Matrix:** 9 X 9; 32 X 18 **Character set:** 96 **Print positions:** 40; 80; 48; 66; 96; 134 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 256; 4K bytes **Feed:** Tractor; Friction **Carriage width:** 11 in. **Support equip:** Software **Introduced:** 1986 **Cost:** $899

☐ Model 860XL
35; 150 cps **Type:** Dot matrix **Matrix:** 9 X 9; 15 X 18 **Character set:** 64; 96 **Print positions:** 40; 80; 48; 66; 96; 134 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 256; (optional) 4K bytes **Feed:** Tractor; Friction **Carriage width:** 16 in. **Support equip:** Software **Units sold:** 25,000 since 1985 **Cost:** $899

☐ Model 865
35; 150 cps **Type:** Dot matrix **Matrix:** 9 X 9; 32 X 18 **Character set:** 96 **Print positions:** 40; 80; 48; 66; 96; 134 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 256; (optional) 4K bytes **Feed:** Tractor; Friction **Carriage width:** 16 in. **Support equip:** Software **Units sold:** 50,000 since 1984 **Cost:** $999

☐ Model 880 AT
75; 300 cps **Type:** Dot matrix **Matrix:** 7 X 9; 15 X 18 **Character set:** 64; 96 **Print positions:** 80; 66; 132; 220 **Resolution:** 144 X 144 dots per inch **Printing:** bidirectional **Buffer:** 2K; (optional) 4K; 16K bytes **Feed:** Tractor **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $2,195

3M/TELETERMINALS PROJECT

☐ Model 1902
40 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 95 **Print positions:** 40; 80 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction **Support equip:** Cables **Introduced:** 1983 **Cost:** $299

☐ Model 1904
40 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 95 **Print positions:** 40; 80 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction **Introduced:** 1983 **Cost:** $289

☐ Model 1912
40 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 95 **Print positions:** 80; 136 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Friction **Support equip:** Cables **Introduced:** 1983 **Cost:** $299

TOSHIBA AMERICA, INC.
Information Systems Division

☐ P1340
54-144 cps **Type:** Dot matrix **Matrix:** 24 X 18; 16 X 11 **Character set:** 96; 32; 31 **Print positions:** 80; 132; 96 **Resolution:** 180 X 180 dots per inch **Printing:** bidirectional **Buffer:** 256 bytes **Feed:** Friction; Pin **Carriage width:** 10 in. **Introduced:** 1984 **Cost:** $799

☐ P351
100-288 cps **Type:** Dot matrix **Matrix:** 24 X 24; 16 X 11 **Character set:** 96; 31 **Print positions:** 136; 163; 226 **Resolution:** 180 X 180; 180 X 360 dots per inch **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Friction **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $1,699

☐ P351C
100; 240; 288 cps **Type:** Dot matrix **Character set:** 96 **Introduced:** 1986 **Cost:** $1,749

TROY
(division of Data Card Corp.)

☐ Remote Office Imprinter (ROI)
25; 32; 36 cps **Type:** Daisy wheel **Character set:** 64; 96 **Print positions:** 132; 105; 158 **Printing:** bidirectional **Feed:** Tractor **Carriage width:** 15.25 in. **Support equip:** Cables **Units sold:** 195 since 1983

TTP ENTERFRISES, INC.

☐ P-100 Model 10
100 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 80 **Printing:** bidirectional **Buffer:** 7K bytes **Feed:** Friction **Carriage width:** 16.5 in. **Support equip:** Software **Units sold:** 250 since 1984 **Cost:** $1,495

TTX GROUP, INC.

☐ TTX 1014/TTX 1114
10; 12; 14; 15; 18 cps **Type:** Daisy wheel **Character set:** 100 **Print positions:** 100 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 15 in. **Units sold:** 2,000 since 1986 **Cost:** $369; $395

☐ TTX 165D
165 cps **Type:** Dot matrix **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1986 **Cost:** $395

VERSATILE COMPUTER PRINTING, INC.

☐ Model 820-28
165 cps **Type:** Dot matrix **Matrix:** 9 X 7 **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 6K bytes **Feed:** Tractor **Carriage width:** 15 in. **Support equip:** Cables **Units sold:** 5 since 1985

☐ Model 840-4C
260 cps **Type:** Dot matrix **Matrix:** 9 X 14 **Character set:** 128 **Print positions:** 140 **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor **Carriage width:** 17 in. **Support equip:** Cables **Units sold:** 10 since 1985

☐ Model 844-30
300 lpm **Type:** Dot matrix **Matrix:** 9 X 9; 9 X 7 **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 4K bytes **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Cables; Software **Units sold:** 5 since 1984

WALLACE COMPUTER SERVICES, INC.
Business Data Division

☐ W4150
150 lpm **Type:** Dot matrix **Matrix:** 9 X 7; 9 X 9 **Character set:** 96 **Print positions:** 132 **Buffer:** 1.9K bytes **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Software **Units sold:** 200 since 1983 **Cost:** $11,700

☐ W4300
300 lpm **Type:** Dot matrix **Matrix:** 9 X 7; 9 X 9 **Character set:** 96 **Print positions:** 132; 158; 175; 198; 224 **Buffer:** 1.9K bytes **Feed:** Tractor **Carriage width:** 16 in. **Support equip:** Software **Units sold:** 500 since 1980 **Cost:** $15,200

WANG LABORATORIES, INC.

☐ Colorwriter 19
40; 108; 200 cps **Type:** Dot matrix **Character set:** 96 **Print positions:** 136 **Printing:** bidirectional **Units sold:** 1,500 since 1985 **Cost:** $1,395

☐ PC/WOA-PM015
40 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 3K bytes **Feed:** Tractor; Sheet **Carriage width:** 15 in. **Units sold:** 10,000 since 1985 **Cost:** $895

WICAT SYSTEMS, INC.

☐ Wicat Prism Printer
110-200 cps **Type:** Dot matrix **Matrix:** 36 X 9 **Character set:** 128 **Print positions:** 163 **Printing:** bidirectional **Buffer:** 3.5K bytes **Feed:** Tractor; Friction **Carriage width:** 14 in. **Units sold:** 1,000 since 1982 **Cost:** $1,747

XEROX CORP.
Printing Systems Division

☐ Model 1730-320
40 cps **Type:** Daisy wheel **Character set:** 96; 88; 92 **Print positions:** 132; 158; 192 **Printing:** bidirectional **Buffer:** 1.3K bytes **Introduced:** 1983 **Cost:** $2,395

☐ Model 1730-340
40 cps **Type:** Daisy wheel **Character set:** 96; 88; 92; 192 **Print positions:** 132; 158; 192 **Printing:** bidirectional **Buffer:** 1.3K bytes **Introduced:** 1983 **Cost:** $2,995

XEROX CORP.
Printing Systems Division

☐ Advantage D25
25 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 512 bytes **Feed:** Tractor; Sheet **Carriage width:** 15.2 in. **Introduced:** 1984 **Cost:** $745

☐ Advantage D80
80 cps **Type:** Daisy wheel **Character set:** 128 **Print positions:** 132; 158 **Printing:** bidirectional **Buffer:** 1.5K bytes **Feed:** (optional) Tractor **Carriage width:** 15.25 in. **Support equip:** (optional) Cables **Units sold:** 100 since 1985 **Cost:** $2,195

☐ Advantage D80IF
80 cps **Type:** Daisy wheel **Character set:** 200 **Print positions:** 132; 158; 198; 264 **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 15.25 in. **Introduced:** 1984 **Cost:** $2,995

☐ Companion 34LQ
60; 270 cps **Type:** Dot matrix **Matrix:** 9 X 11 **Character set:** 96 **Print positions:** 132 **Printing:** bidirectional **Buffer:** 256; 4K bytes **Feed:** Tractor; Friction **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $1,599

☐ Model 12CQI
150 cps **Type:** Dot matrix **Matrix:** 9 X 11; 16 X 36 **Character set:** 96 **Print positions:** 80 **Buffer:** 2K bytes **Carriage width:** 15 in. **Introduced:** 1984 **Cost:** $699

☐ Model 32CQI
150 cps **Type:** Dot matrix **Matrix:** 9 X 11; 16 X 36 **Character set:** 96 **Print positions:** 132 **Carriage width:** 15 in. **Introduced:** 1984 **Cost:** $899

☐ Model 635
40; 55 cps **Type:** Daisy wheel **Character set:** 98 **Print positions:** 132; 158; 197 **Buffer:** 1K bytes **Carriage width:** 16.5 in. **Introduced:** 1985 **Cost:** $1,485

☐ P10I
80 cps **Type:** Dot matrix **Matrix:** 11 X 9 **Printing:** bidirectional **Buffer:** 1K bytes **Feed:** Tractor; Friction **Carriage width:** 10 in. **Introduced:** 1984 **Cost:** $499

☐ Series P38
400 cps **Type:** Dot matrix **Matrix:** 7 X 7 **Character set:** 96 **Print positions:** 132 **Buffer:** 256 bytes **Feed:** Tractor **Carriage width:** 15 in. **Introduced:** 1983 **Cost:** $2,195

YOKOGAWA CORP. OF AMERICA

☐ NP300
30; 60 cps **Type:** Dot matrix **Matrix:** 16 X 14 **Print positions:** 80 **Feed:** Friction; Pin **Carriage width:** 10 in. **Introduced:** 1984

ZIYAD, INC.

☐ PaperJet 2000
63; 105 cps **Type:** Daisy wheel **Character set:** 96 **Print positions:** 132; 158; 198 **Printing:** bidirectional **Buffer:** 512 bytes **Feed:** Sheet **Carriage width:** 14.5 in. **Support equip:** Cables **Introduced:** 1985 **Cost:** $4,495

PAGE/LASER PRINTERS

ACOM COMPUTER CO.

☐ LX8219
8 pages/min. **Type:** Laser **Introduced:** 1986 **Cost:** $6,995

AEDEX CORP.

☐ LaserBar 508
6; 8 pages/min. **Type:** Laser **Character set:** 128 **Resolution:** 300 X 300 dots per inch **Feed:** Sheet **Carriage width:** 8.5 in. **Units sold:** 200 since 1986 **Cost:** $3,995

☐ LaserBar 608
8 pages/min. **Type:** Laser **Carriage width:** 8.5 in. **Introduced:** 1986 **Cost:** $4,995-$5,895

AMERICAN COMPUTER HARDWARE CORP.

☐ ACIE-3000
30 pages/min. **Type:** Cold pressure fusing **Character set:** 96 **Print positions:** 80; 132; 198 **Resolution:** 300 X 300 dots per inch **Carriage width:** 8.5 in. **Cost:** $13,990

☐ Model 5100
5,000 lpm; 60 pages/min. **Type:** Cold pressure fusing **Character set:** 252 **Print positions:** 132-225 **Resolution:** 240 X 240 dots per inch **Buffer:** 1M bytes **Feed:** Friction; Elevator delivery **Carriage width:** 8.5 in.

☐ Model 5200
5,000 lpm; 60 pages/min. **Type:** Cold pressure fusing **Character set:** 126 **Print positions:** 132-225 **Resolution:** 240 X 240 dots per inch **Buffer:** 1M bytes **Feed:** Friction **Carriage width:** 8.5 in.

☐ Model 5600
7,500 lpm; 90 pages/min. **Type:** Cold pressure fusing **Character set:** 252 **Print positions:** 132-225 **Resolution:** 240 X 240 dots per inch **Buffer:** 1M bytes **Feed:** Pin **Carriage width:** 9-7/8 in. **Introduced:** 1984

ANSER TECHNOLOGY, INC.

☐ Vision System
125 pages/min. **Type:** Ionography **Character set:** 256 **Print positions:** User-defined **Resolution:** 240 X 240 matrix **Printing:** bidirectional **Buffer:** 2M bytes **Feed:** Tractor; Roll; Cut **Carriage width:** 9.5 in. **Support equip:** Software **Units sold:** 10 since 1985 **Cost:** $166,000

BDS CORP.

☐ L2610
26 pages/min. **Type:** Laser **Units sold:** 1,000 since 1985 **Cost:** $12,900

☐ L2630
26 pages/min. **Type:** Laser **Character set:** 255 **Units sold:** 1,000 since 1985 **Cost:** $14,900

☐ Model 630/8
8.1 pages/min. **Type:** Laser **Print positions:** 80; 132; 96; 140 **Resolution:** 300 X 300 **Feed:** Sheet **Units sold:** 500 since 1985 **Cost:** $3,495

CANON U.S.A., INC.

☐ LBP-200S A1
8 pages/min. **Type:** Laser **Character set:** 10; 12; 13.3; 15 **Buffer:** 128K bytes **Support equip:** Cables **Introduced:** 1985 **Cost:** $3,-050

☐ LBP-8A1
8 pages/min. **Type:** Laser **Character set:** 10; 12; 13.3; 15 **Resolution:** 300 X 300 dots per inch **Carriage width:** 14 in. **Cost:** $3,000

☐ LBP-8A2
8 pages/min. **Type:** Laser **Resolution:** 300 X 300 dots per inch **Carriage width:** 14.2 in.

CENTRONICS DATA COMPUTER CORP.

☐ PagePrinter 8
8 pages/min. **Type:** Laser **Introduced:** 1986 **Cost:** $2,495

CIE TERMINALS

☐ LIPS 10
10 pages/min. **Type:** Laser **Introduced:** 1985 **Cost:** $3,495

COMPOSITION TECHNOLOGY INTERNATIONAL (CTI)

☐ PageComposer C3
8 pages/min. **Type:** Laser **Resolution:** 300 dots per inch **Feed:** Sheet **Carriage width:** 11 in. **Units sold:** 156 since 1985 **Cost:** $4,495

☐ PageComposer R3
8 pages/min. **Type:** Laser **Character set:** 196 **Resolution:** 300 dots per inch **Feed:** Sheet **Carriage width:** 11 in. **Units sold:** 1 since 1986 **Cost:** $6,995

COMPUTER LANGUAGE RESEARCH, INC.
Electronic Form Systems Division

☐ Formwriter 2A Laser Printing System
500 lpm; 6; 8 pages/min. **Type:** Laser **Resolution:** 300 dots per inch **Carriage width:** 11 in. **Support equip:** Cables; Software; PC Adapter Card **Introduced:** 1984 **Cost:** $4,995

CORDATA

☐ Cordata Desktop Printshop
8 pages/min. **Type:** Laser **Resolution:** 300 X 300 dots per inch **Buffer:** 8K; 400K (graphics) bytes **Feed:** Sheet **Carriage width:** 8.5 in. **Support equip:** Cables; Software **Units sold:** 1,000 since 1984 **Cost:** $2,995

☐ LP-300; LP-300X
8 pages/min. **Type:** Laser **Cost:** $2,995; $3,895

CORPORATE DATA SCIENCES, INC.

☐ CDS 2300
8 pages/min. **Type:** Laser **Resolution:** 300 X 300 dots per inch **Buffer:** 1.2K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables **Units sold:** 75 since 1985 **Cost:** $5,995

CPT CORP.

☐ CPT Page Printer II
20 pages/min. **Type:** Drum; Laser **Character set:** 133 **Print positions:** 84; 139 **Resolution:** 240 X 240 dots per inch **Buffer:** 4K bytes **Feed:** Sheet **Carriage width:** 14 in. **Units sold:** 200 since 1984 **Cost:** $19,900

DATA GENERAL CORP.

☐ Model 4557
8 pages/min. **Type:** Laser **Carriage width:** 14 in. **Introduced:** 1985 **Cost:** $3,500

☐ Model 4558
8 pages/min. **Type:** Laser **Resolution:** 300 X 300 dots per inch **Carriage width:** 14 in. **Introduced:** 1985 **Cost:** $5,995

DATA RECORDING SYSTEM, INC.

☐ LaserScribe 1000
9.6 pages/min. **Resolution:** 400 X 400; 500 X 500; 800 X 800; 1,000 X 1,000 dots per inch **Carriage width:** 11.69 in. **Introduced:** 1986

☐ LaserScribe 8415
15 pages/min. **Type:** Drum **Resolution:** 400 X 400; 500 X 500; 800 X 800; 1,000 X 1,000 dots per inch **Feed:** Sheet **Carriage width:** 11.69 in. **Introduced:** 1985

DATA SYSTEMS HARDWARE

☐ VX01X
26 pages/min. **Type:** Laser **Character set:** 96; 128; 256 **Print positions:** 132 **Resolution:** 300 X 300 dots per inch **Feed:** Cassette **Carriage width:** 11 in. **Support equip:** Cables; Software **Units sold:** 100 since 1985

☐ VX01Y
12 pages/min. **Type:** Laser **Character set:** 96; 128; 256 **Print positions:** 132 **Resolution:** 300 X 300 dots per inch **Feed:** Sheet **Carriage width:** 11 in. **Support equip:** Cables **Units sold:** 100 since 1985

DATASOUTH COMPUTER CORP.

☐ Pagewriter 8
8 pages/min. **Type:** Non-impact dot matrix **Character set:** 96 **Resolution:** 300 X 300 dots per inch **Carriage width:** 8.5 in. **Introduced:** 1986 **Cost:** $2,995

DELPHAX SYSTEMS

☐ S6000
60 pages/min. **Type:** Drum **Print positions:** 132 **Resolution:** 240 X 240 dots per inch **Buffer:** 256K bytes **Feed:** Sheet **Carriage width:** 8.5 in. **Introduced:** 1984 **Cost:** $75,000

DEREX, INC.

☐ Derex Elpho 20
20 pages/min. **Character set:** 140 **Print positions:** 150 **Resolution:** 300 X 300 dots per inch **Feed:** Friction **Carriage width:** 14 in. **Support equip:** Cables **Units sold:** 200 since 1984 **Cost:** $16,500

☐ Derex S6000
60; 75 pages/min. **Character set:** 128 **Print positions:** 132; 188 **Resolution:** 240 X 240 dots per inch **Buffer:** 2K bytes **Feed:** Sheet **Carriage width:** 11 in. **Support equip:** Cables **Units sold:** 50 since 1984 **Cost:** $59,950

EF INDUSTRIES

☐ DTC/Kidron OCTAVE
8 pages/min. **Resolution:** 90,000 dots per inch **Buffer:** 128K bytes

FACIT, INC.

☐ Model 4580 (Opus 1)
12 pages/min. **Type:** Laser **Character set:** 480 **Resolution:** 300 dots per inch **Printing:** bidirectional **Buffer:** 128K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Introduced:** 1985 **Cost:** $9,500

☐ Opus 2e
8 pages/min. **Type:** Laser **Introduced:** 1986 **Cost:** $3,495

GENERAL BUSINESS TECHNOLOGY, INC.

☐ GBT 6600XP
12 pages/min. **Type:** Laser **Character set:** 98 **Print positions:** 198 **Resolution:** 300 X 300 dots per inch **Buffer:** 30K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables **Introduced:** 1982 **Cost:** $16,995

☐ GBT 6630DW
8 pages/min. **Type:** Drum **Character set:** 98 **Print positions:** 132; 198 **Resolution:** 300 X 300 dots per inch **Buffer:** 256 bytes **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables **Introduced:** 1985 **Cost:** $4,995; Lease (mo.) —$183

☐ GBT 6630LS
8 pages/min. **Type:** Drum **Character set:** 98 **Print positions:** 40; 80; 132; 198 **Resolution:** 300 X 300 dots per inch **Buffer:** 256 bytes **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables **Introduced:** 1984 **Cost:** $4,495; Lease (mo.) —$165

☐ GBT 6630PC
8 pages/min. **Type:** Laser **Character set:** 98 **Print positions:** 198 **Resolution:** 300 X 300 dots per inch **Buffer:** 30K bytes **Feed:** Friction **Carriage width:** 14 in. **Support equip:** Cables **Introduced:** 1984 **Cost:** $2,995

☐ GBT 6630XP
8 pages/min. **Type:** Laser **Character set:** 96; 98 **Print positions:** 198 **Resolution:** 300 X 300 dots per inch **Buffer:** 30K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables **Introduced:** 1984 **Cost:** $4,995; Lease (mo.) —$183

☐ GBT 6640XT
30 pages/min. **Type:** Ion-deposition **Introduced:** 1986 **Cost:** $14,995

GENERAL OPTRONICS CORP.

☐ Holloscan 28 Electronic Page Printer
2,600 lpm **Type:** Laser xerography; Non-impact **Units sold:** 100 since 1982 **Cost:** $11,995; $6,000

GENICOM CORP.

☐ Model 5010
10 pages/min. **Type:** Laser **Character set:** 256 **Resolution:** 300 X 300 dots per inch **Buffer:** 128K; 512K bytes **Feed:** Sheet **Introduced:** 1986 **Cost:** $2,995; $3,390

GTC TECHNOLOGIES, INC.

☐ The Blaser
8 pages/min. **Type:** Laser **Resolution:** 300 X 300 dots per inch **Buffer:** 64K bytes **Feed:** Sheet **Carriage width:** 8.5 in. **Support equip:** Cables **Units sold:** 400 since 1985 **Cost:** $2,995-$3,745

HANZON DATA, INC.

☐ LP 3000
8 pages/min. **Type:** Laser **Print positions:** 132 **Units sold:** 200 since 1986 **Cost:** $3,995

HETRA COMPUTER AND COMMUNICATIONS INDUSTRIES, INC.

☐ Model 3024 Laser Printer
24 pages/min. **Type:** Laser **Resolution:** 300 X 300 dots per inch **Feed:** Friction **Carriage width:** 17 in. **Units sold:** 10 since 1985 **Cost:** $21,500

HEWLETT-PACKARD CO.

☐ HP 2686A (LaserJet)
8 pages/min. **Type:** Electrophotographic cartridge **Resolution:** 300 X 300 dots per inch **Introduced:** 1984 **Cost:** $3,495

☐ LaserJet PLUS
8 pages/min. **Type:** Laser **Introduced:** 1985 **Cost:** $3,995

☐ LaserJet 500 PLUS
8 pages/min. **Type:** Laser **Printing:** bidirectional **Introduced:** 1986 **Cost:** $4,995

☐ Model 2689A
3,000 lpm **Resolution:** 180 X 180 dots per in. **Carriage width:** 12.7 in. **Cost:** $99,950

HITACHI AMERICA, LTD.

OAS Division

☐ SL-1000
12 pages/min. **Character set:** 192 **Resolution:** 300 dots per inch **Introduced:** 1984

HOWTEK, INC.

☐ Pixelmaster
2 pages/min. **Type:** Inkjet **Printing:** bidirectional **Introduced:** 1986 **Cost:** $2,995

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Model 3812
9.6; 12 pages/min. **Type:** Laser **Resolution:** 240 X 240 dots per inch **Feed:** Sheet **Carriage width:** 14 in. **Introduced:** 1985 **Cost:** $7,490

☐ Pageprinter
12 pages/min. **Resolution:** 240 X 240 dots per inch **Feed:** Sheet **Carriage width:** 11 in. **Introduced:** 1985 **Cost:** $7,490

IMAGEN CORP.

☐ ImageStation
8 pages/min. **Type:** Laser **Character set:** 148 **Print positions:** 65; 536 **Resolution:** 300 X 300 dots per inch **Printing:** bidirectional **Buffer:** 256K; 512K bytes **Feed:** Sheet **Carriage width:** 8.5 in. **Support equip:** Cables **Introduced:** 1985 **Cost:** $5,950-$7,200

ITT QUME CORP.

☐ LaserTen Plus
10 pages/min. **Type:** Drum **Character set:** 96; 256; 96; 188 **Print positions:** 132 **Resolution:** 300 X 300 dots per inch **Carriage width:** 11 in. **Support equip:** Cables **Introduced:** 1986 **Cost:** $3,395

KEL, INC.

☐ M 5311
20 pages/min. **Type:** Laser **Character set:** 96; 128 **Resolution:** 300 dots per inch **Buffer:** 16K; 2M bytes **Feed:** Sheet **Carriage width:** 17 in. **Units sold:** 2 since 1986 **Cost:** $17,800

LASERMASTER, LTD.

☐ LaserMaster XT/P 4080
8 pages/min. **Type:** Belt **Character set:** 128 **Resolution:** 300 X 300 **Buffer:** 1M bytes **Feed:** Friction **Carriage width:** 8.5 in. **Support equip:** Cables; Software **Units sold:** 200 since 1986 **Cost:** $4,495; Lease (mo.) —$250

MANNESMANN TALLY

☐ MT 910sl
10 pages/min. **Type:** Laser **Introduced:** 1986 **Cost:** $3,695

MITEK SYSTEMS, INC.

☐ 200T Tempested Desk Top Laser Printer
8 pages/min. **Type:** Drum **Print positions:** 132 **Resolution:** 300 X 300 **Printing:** bidirectional **Buffer:** 500K bytes **Feed:** Single sheet automatic **Carriage width:** 8.5 in. **Introduced:** 1985 **Cost:** $10,400

OFFICE AUTOMATION SYSTEMS, INC.

☐ LaserPro EXPRESS
8 pages/min. **Introduced:** 1986 **Cost:** $1,995

☐ LaserPro 1510
15 pages/min. **Type:** Laser **Introduced:** 1986 **Cost:** $6,995

☐ LaserPro 8
8 pages/min. **Type:** Laser **Resolution:** 300 dots per inch **Carriage width:** 11 in. **Introduced:** 1986 **Cost:** $3,750-$4,995

PERSONAL COMPUTER PRODUCTS, INC. (PCPI)

☐ Daisylaser 1000
8 pages/min. **Type:** Laser **Character set:** 128 **Print positions:** 132 **Resolution:** 300 X 300 **Printing:** bidirectional **Buffer:** 38K bytes **Feed:** Friction **Carriage width:** 8.5 in. **Introduced:** 1984 **Cost:** $3,495-$3,785

PRINTRONIX, INC.

☐ Laserprint 20
2,400 lpm; 20 pages/min. **Type:** Laser diode **Character set:** 96 **Print positions:** 132 **Resolution:** 240 X 240 dots per inch **Buffer:** 48K bytes **Feed:** Sheet **Carriage width:** 8.5 in. **Introduced:** 1985 **Cost:** $15,900

☐ L1012
12 pages/min. **Type:** Laser **Introduced:** 1986 **Cost:** $2,995

☐ L2120
20 pages/min. **Type:** Laser **Introduced:** 1986 **Cost:** $11,995

QMS, INC.

☐ QMS KISS
6 pages/min. **Type:** Laser **Resolution:** 300 X 300 dots per inch **Feed:** Sheet **Carriage width:** 14 in. **Introduced:** 1985 **Cost:** $1,-995

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ QuadLaser
8 pages/min. **Type:** Laser **Resolution:** 300 dots per inch **Buffer:** 256K bytes **Feed:** Sheet **Carriage width:** 11 in. **Introduced:** 1985 **Cost:** $3,795-$4,495

RCA SERVICE CO.
Business Services and Systems

☐ RCA Laser Printer
8 pages/min. **Type:** Laser **Resolution:** 300 X 300 dots per inch **Introduced:** 1984

RICOH CORP.

☐ LP 4120 Tabletop Laser Printer
12 pages/min. **Character set:** 128 **Resolution:** 300 X 300 **Introduced:** 1983 **Cost:** $10,000; $13,995 (with controller)

☐ LP 4212 Tabletop Laser Printer
12 pages/min. **Type:** Laser transfer **Character set:** 128 **Print positions:** 80; 96; 120 **Units sold:** 1,500 since 1983 **Cost:** $10,-000

SYSCODE, INC.

☐ L300
8 pages/min. **Type:** Laser

TALARIS SYSTEMS, INC.

☐ Talaris 1200
12 pages/min. **Type:** Laser **Character set:** 256 **Print positions:** 255 **Resolution:** 300 dots per inch **Buffer:** 4K bytes **Feed:** Sheet **Carriage width:** 14 in. **Introduced:** 1984 **Cost:** $19,990

☐ Talaris 2400
24 pages/min. **Type:** Laser **Character set:** 256 **Print positions:** 255 **Resolution:** 300 dots per inch **Buffer:** 4K bytes **Feed:** Sheet **Carriage width:** 17 in. **Introduced:** 1984 **Cost:** $29,990

☐ Talaris 800
8 pages/min. **Type:** Laser **Character set:** 256 **Print positions:** 255 **Resolution:** 300 dots per inch **Buffer:** 4K bytes **Feed:** Sheet **Carriage width:** 14 in. **Introduced:** 1984 **Cost:** $7,990

☐ Talaris 810
8 pages/min. **Type:** Laser **Character set:** 256 **Print positions:** 255 **Resolution:** 300 dots per inch **Buffer:** 8K bytes **Feed:** Sheet **Carriage width:** 14 in. **Introduced:** 1985 **Cost:** $3,450

TELEFILE COMPUTER PRODUCTS, INC.
(subsidiary of Telefile Computer Corp.)

☐ T2465
12 pages/min. **Character set:** 98 **Resolution:** 300 X 300 dots per inch **Carriage width:** 14 in. **Introduced:** 1984

TEMPEST TECHNOLOGIES, INC.

☐ LZR5600 Tempest
26 pages/min. **Type:** Laser **Resolution:** 300 dots per inch **Feed:** Sheet **Introduced:** 1985

TEXAS INSTRUMENTS

☐ OmniLaser 2015
15 pages/min. **Introduced:** 1986 **Cost:** $5,995

☐ OmniLaser 2108
8 pages/min. **Introduced:** 1986 **Cost:** $5,995

☐ OmniLaser 2115
15 pages/min. **Introduced:** 1986 **Cost:** $7,995

TYX CORP.

☐ Lasertech 300
8 pages/min. **Type:** Laser **Introduced:** 1986 **Cost:** $9,995

XEROX CORP.
Printing Systems Division

☐ Model 3700
24 pages/min. **Type:** Laser **Character set:** 195 **Resolution:** 300 dots per inch **Carriage width:** 11 in. **Introduced:** 1985 **Cost:** $29,995; Lease (mo.) — $1,050

☐ Model 4045
10 pages/min. **Type:** Drum **Character set:** 195 **Resolution:** 300 dots per inch **Feed:** Friction **Carriage width:** 14 in. **Cost:** $4,995

☐ 2700 Distributed Electronic Printer
600 lpm; 12 pages/min. **Type:** Drum; Photoreceptor **Character set:** 195 **Resolution:** 300 dots per inch **Feed:** Tractor **Carriage width:** 8.5 in. **Introduced:** 1982 **Cost:** $18,995; Lease (mo.) — $570-$630

PRINTERS/PLOTTERS

ADVANCED MATRIX TECHNOLOGY, INC.

☐ AMT Office Printer
45; 100; 250 cps **Type:** Dot matrix **Matrix:** 9 X 7; 16 X 72; 32 X 72 **Character set:** 256 **Print positions:** 136; 232 **Resolution:** 240 X 480 dots per inch **Printing:** bidirectional **Buffer:** 40K bytes **Feed:** Tractor; Friction; Pin **Carriage width:** 15 in. **Introduced:** 1985 **Cost:** $1,845 (Model 200); $1,645 (Model 210)

AXIOM CORP.

☐ EX-820 Microplotter
160 cps **Type:** Dot matrix **Matrix:** 5 X 8 **Character set:** 96; 128 **Print positions:** 40; 80; 20 **Units sold:** 4,000 since 1977 **Cost:** $789

☐ IMP-3
100 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96 **Print positions:** 80; 132; 96 **Feed:** Tractor; Friction **Units sold:** 1,000 **Cost:** $699

☐ IMP-4
100 cps **Type:** Dot matrix **Matrix:** 7 X 9 **Character set:** 96; 128; 256 **Print positions:** 80; 132; 96 **Printing:** bidirectional **Buffer:** (optional) 2K bytes **Feed:** Tractor; Friction **Units sold:** 6,000 since 1980 **Cost:** $749

CENTRONICS DATA COMPUTER CORP.

☐ TIP-301
75-300 lpm **Type:** Dot matrix **Matrix:** 7 X 9; 16 X 16 **Character set:** 96 **Print positions:** 132; 176; 220 **Resolution:** 100 X 100 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 16 in. **Units sold:** 290 since 1984 **Cost:** $5,900

☐ TIP-302 Colorplot II
75-300 lpm **Type:** Dot matrix **Matrix:** 9 X 7; 16 X 16 **Character set:** 96 **Print positions:** 132; 176; 220 **Resolution:** 100 X 100 dots per inch **Printing:** bidirectional **Buffer:** 2K bytes **Feed:** Tractor **Carriage width:** 16 in. **Units sold:** 75 since 1984 **Cost:** $6,900

COMPUTER DESIGNED SYSTEMS, INC.
Commercial Systems Division

☐ PP-350
350 cps **Type:** Stylus **Character set:** User-defined **Print positions:** 132 **Printing:** bidirectional **Buffer:** 132 bytes **Feed:** Tractor; Sheet **Carriage width:** 14 in. **Units sold:** 900 since 1977 **Cost:** $10,000

CONTROL DATA CORP.

☐ 726 Graphics Printer
115 lpm **Type:** Dot matrix **Character set:** 96 **Print positions:** 132 **Cost:** $3,950; Lease (mo.) —$200

DEREX, INC.

☐ Derex 8050/8070
300; 400 cps **Type:** Dot matrix **Matrix:** 36 X 18 **Character set:** 96 **Print positions:** 132 **Resolution:** 84 X 84 dots per inch **Printing:** bidirectional **Buffer:** 5K bytes **Feed:** Tractor; Friction **Carriage width:** 14-7/8 in. **Support equip:** Cables **Units sold:** 1,000 since 1984 **Cost:** $1,695; Lease (mo.) —$60 (3 yr.)

DIGITEC CORP.

☐ Model 6470
42 cps **Type:** Dot matrix **Matrix:** 5 X 7 **Character set:** 64 **Print positions:** 21 **Buffer:** 35 bytes **Feed:** Friction **Introduced:** 1981 **Cost:** $489

HITACHI AMERICA, LTD.
OAS Division

☐ Model 672
5 cps; Plot speed: 200 mm per second **Character set:** 96 **Introduced:** 1983

INTEGREX, INC.

☐ Colorjet 132
40 cps **Type:** Dot matrix **Matrix:** 5 X 8 **Character set:** 231 **Print positions:** 80; 132 **Resolution:** 1,280 dots horizontally; 640 dots/line **Printing:** bidirectional **Buffer:** 4K; 16K (serial) bytes **Feed:** Roll; Sheet **Carriage width:** 8.5 in. **Introduced:** 1984 **Cost:** $795 (parallel); $950 (serial)

JDL, INC.

☐ JDL-750c
100; 180 cps **Type:** Dot matrix **Matrix:** 36 X 24; 18 X 24 **Character set:** 256 **Print positions:** 136; 163; 232 **Resolution:** 360 X 180; 180 X 180 dots per inch **Printing:** bidirectional **Buffer:** 16K; (optional) 48K bytes **Feed:** Friction; (optional) Tractor; Sheet **Carriage width:** 17 in. **Support equip:** ROM **Units sold:** 500 since 1986 **Cost:** $1,695

☐ JDL-750e
100; 180 cps **Type:** Dot matrix **Matrix:** 36 X 24; 18 X 24 **Character set:** 256 **Print positions:** 136; 163; 232 **Resolution:** 360 X 180; 180 X 180 dots per inch **Printing:** bidirectional **Buffer:** 16K; (optional) 48K bytes **Feed:** Friction; (optional) Tractor; Sheet **Carriage width:** 17 in. **Support equip:** ROM **Units sold:** 2,000 since 1986 **Cost:** $1,850

KIPP & ZONEN

☐ BD70
120 cps **Type:** Dot matrix **Matrix:** 5 X 8 **Character set:** 96 **Print positions:** 40; 80; 48; 68; 96; 137 **Buffer:** 1.8K bytes **Feed:** Pin **Carriage width:** 8.5 in. **Support equip:** ROM **Units sold:** 200 since 1985 **Cost:** $888

NEC INFORMATION SYSTEMS, INC.

☐ Color Pinwriter CP2
30; 90; 180 cps Matrix: 13 X 9; 21 X N Character set: 96 Print positions: 80; 96; 136 Resolution: 240 X 240; 240 X 216 Printing: bidirectional Buffer: 3.5K bytes Feed: Friction Carriage width: 10 in. Units sold: 50,000 since 1984 Cost: $999

☐ Color Pinwriter CP3
60; 90; 180 cps Matrix: 13 X 9; 21 X N Character set: 96 Print positions: 136; 163; 233 Resolution: 240 X 240; 240 X 216 Printing: bidirectional Buffer: 3.5K bytes Feed: Friction Carriage width: 16 in. Units sold: 50,000 since 1984 Cost: $1,399

SIGMA SYSTEMS, INC. (FL)

☐ Model 132
300 lpm Type: Band Character set: 48; 64; 96 Print positions: 132 Buffer: Up to 8K bytes Units sold: 200 since 1980 Cost: $5,950

SILVER-REED AMERICA, INC.

☐ EB50 Colour Pengraph
14 cps Type: Ballpoint pen Character set: 96 Print positions: 40; 80; 160 Feed: Friction Carriage width: 8.7 in. Support equip: Software Units sold: 10,000 since 1984 Cost: $299

THE ULTIMATE CORP.

☐ Model 150 Line Printer
80; 100; 150; 200 lpm Type: Dot matrix Matrix: 9 X 7; 9 X 9 Character set: 96 Print positions: 132 Resolution: 60 X 72 dots per inch Introduced: 1984 Cost: $4,000

☐ Model 300 Line Printer
170; 240; 300 lpm Type: Dot matrix Matrix: 9 X 7; 9 X 9 Character set: 96 Print positions: 132 Resolution: 60 X 72 dots per inch Cost: $7,500

☐ Model 600 Line Printer
320; 465; 600 lpm Type: Dot matrix Matrix: 9 X 7; 9 X 9 Character set: 96 Print positions: 132 Resolution: 60 X 72 dots per inch Cost: $10,000

UNIMARK, INC.

☐ IER 310
160 cps Type: Dot matrix Character set: 96 Print positions: 92 Printing: bidirectional Feed: Tractor; Sheet Carriage width: 8.5 in. Introduced: 1985 Cost: $4,995

VERSATEC, INC.
(subsidiary of Xerox Corp.)

☐ V-80-311A
1,000 lpm Type: Dot matrix Matrix: 16 X 16 Character set: 96 Print positions: 132 Feed: Friction Carriage width: 11 in. Units sold: 10,000 since 1980 Cost: $8,950

SPECIAL-PURPOSE PRINTERS

CAPITOL CIRCUITS CORP.
Printer Products Division

☐ S100 Receipt Printer
65 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 27 Buffer: 27 bytes Units sold: 2,200 since 1983 Cost: $545

☐ S100T Receipt/Journal Printer
65 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 27 Buffer: 27 bytes Units sold: 1,500 since 1981 Cost: $745

☐ S200 24 Column Panel Printer
48 lpm Type: Dot matrix Matrix: 5 X 7 Character set: 96 Buffer: 176; (optional) 2K bytes Units sold: 750 since 1983 Cost: $375; (40 column) $395

☐ S400G Slip/Document Printer
150 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Buffer: 2K bytes Units sold: 1,400 since 1983 Cost: $1,045

☐ S400L Label Printer
48 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Buffer: 176; (optional) 2K bytes Units sold: 640 since 1983 Cost: $995

☐ S400T Receipt/Journal Printer
150 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Printing: bidirectional Buffer: 176; (optional) 2K bytes Feed: Friction Carriage width: 3.5 in. Units sold: 2,400 since 1982 Cost: $886

☐ S600; S610 Slip/Document Printer
180 lpm Type: Chain Character set: 96 Print positions: 40 Printing: bidirectional Introduced: 1986 Cost: $760; $795

COMPUTER TERMINAL SYSTEMS, INC.

☐ Entertainment/Bet Ticket Printer
20 columns per second Type: Drum Character set: 48; 64 Feed: Friction Support equip: Cables; Software Units sold: 5,000 since 1976 Cost: $2,500-$4,000

☐ Label Printer
20 columns per second Type: Drum Character set: 48; 64 Print positions: 72 Buffer: 2K bytes Feed: Friction Support equip: Cables; Software Units sold: 650 since 1976 Cost: $2,500

☐ 104001 Boarding Pass Printer
20 columns per second Type: Drum Character set: 64 Print positions: 10 Units sold: 15,000 since 1973 Cost: $2,300-$3,600

☐ 1108-0020 Transportation Printer
20 columns per second Type: Drum Character set: 48; 64 Print positions: 72 Feed: Friction Support equip: Cables; Software Units sold: 1,200 since 1980 Cost: $2,500-$4,000

☐ 118003 Airline Ticket Printer
20 columns per second Type: Drum Character set: 48; 64 Print positions: 72 Feed: Tractor Units sold: 9,500 since 1974 Cost: $3,300-$4,500

☐ 601-0024 Document Printer
20 columns per second Type: Drum Character set: 48; 64 Print positions: 72 Feed: Friction Support equip: Cables; Software Units sold: 1,000 since 1979 Cost: $2,500-$4,000

☐ 708-0013 Form Printer
20 columns per second Type: Drum Character set: 48; 64 Print positions: 72 Feed: Friction Support equip: Cables; Software Units sold: 5,250 since 1970 Cost: $2,500-$4,000

COMPUTER TRANSCEIVER SYSTEMS, INC.

☐ EXECUPORT 2410 Label Printer
30,000 small labels per hour Type: Dot matrix Print positions: 80; 132; 160 Resolution: 200 X 200 dots per inch Buffer: 8K bytes Feed: Friction Carriage width: 8.5 in. Introduced: 1986 Cost: $5,000; (optional keyboard) $5,200

☐ EXECUPORT 2430 Label Printer
30,000 small labels per hour Type: Dot matrix Print positions: 80; 132; 160 Resolution: 200 X 200 dots per inch Buffer: 8K bytes Feed: Friction Carriage width: 8.5 in. Introduced: 1986 Cost: $5,000; (optional keyboard) $5,200

DATA SPECIALTIES, INC.

☐ Zebra Bar Code Label Printer
265 lpm Type: Dot matrix Matrix: 7 X 9 Resolution: 85 dots per inch Printing: bidirectional Buffer: 1.5K bytes Feed: Friction Carriage width: 3.25 in. Units sold: 2,000 since 1982 Cost: $3,650

☐ Zebra 130 Bar Code Label Printer
1.6 inches/sec. Type: Thermal transfer Resolution: 104 dots per inch Printing: bidirectional Feed: Friction Carriage width: 5.12 in. Introduced: 1986 Cost: $5,995

☐ Zebra 60 (Z60) Bar Code Label Printer
1 inches/sec. Type: Thermal Resolution: 104 dots per inch Printing: bidirectional Feed: Friction Carriage width: 2.36 in. Introduced: 1985 Cost: $2,450

DENNISON MANUFACTURING CO.

☐ Model 5107
2 inches/sec. Type: Thermal transfer Introduced: 1986 Cost: $12,900

☐ Model 5107W
2 inches/sec. Type: Thermal transfer Introduced: 1986

DRETEC, INC.

☐ Alphagraph 2600/4200 Bar Code Printer
10 lines/sec. Type: Dot matrix Matrix: 5 X 7 Resolution: 75 dots per inch Feed: Friction Carriage width: 4.5 in. Introduced: 1985 Cost: $200 and under

FARGO ELECTRONIC SERVICES, INC.

☐ MTL-600 Label Printer
2 inches/sec. Type: Thermal Introduced: 1986

☐ MTL-800 Label Printer
2 inches/sec. Type: Thermal Introduced: 1986

HECON CORP.

☐ Hard Copy Screen Printer
5-7 seconds/screen Matrix: 5 X 7 Character set: 96 Print positions: 80; 132 Buffer: 2K bytes Feed: Friction Carriage width: 11 in. Support equip: Cables Cost: $995

HEWLETT-PACKARD CO.

☐ HP 2933A Label Printer
200 cps; 650 labels per hour Matrix: 9 X 12 Character set: 64; 96; 128 Print positions: 68; 136; 223 Printing: bidirectional Buffer: 2K bytes Introduced: 1983

☐ HP 2934A Bar Code Printer
40; 67; 200 cps Type: Dot matrix Matrix: 9 X 12; 36 X 24 Character set: 64; 96; 128 Print positions: 68; 136; 223 Printing: bidirectional Introduced: 1983

IMTEC, INC.

☐ Imtec 3000 Bar Code/Label Printer
120 ft./min. Type: Dot matrix; Drum Printing: bidirectional Buffer: 1.5K bytes Feed: Tractor; Roll; Sheet Carriage width: 5 in. Support equip: Cables

INTERFACE DATA, INC.

☐ ID 460D
400 cps Type: Dot matrix Matrix: 7 X 9; 18 X 40 Character set: 96 Print positions: 132; 220 Printing: bidirectional Buffer: 256 bytes Feed: Tractor; Friction Carriage width: 15 in. Units sold: 100 since 1983 Cost: $2,995

INTERMEC CORP.

☐ S35 Bar Code Printer
40-50 labels per minute Type: Rotating Drum Buffer: 1.5K bytes Feed: Friction Introduced: 1982 Cost: $9,495

☐ 8220 Bar Code Printer
45-65 labels per minute Type: Rotating Drum Buffer: 1.5K bytes Feed: Friction Carriage width: 1 in. Introduced: 1980 Cost: $6,495

☐ 8413 Bar Code Printer
30-60 labels per minute Type: Rotating Drum Buffer: 1.5K bytes Feed: Friction Introduced: 1983 Cost: $8,495

☐ 8425R Pre-Ticketing Printer
50-60 labels per minute Type: Rotating Drum Buffer: 1.5K bytes Introduced: 1985 Cost: $9,995

☐ 8610 Square Matrix Label Printer
0.3 inches/sec. Type: Square Matrix Feed: Friction Carriage width: 6.5 in. Introduced: 1985 Cost: $2,595

☐ 8625 Square Matrix Label Printer
0.3 inches/sec. Type: Square Matrix Printing: bidirectional Buffer: 1K bytes Feed: Friction Carriage width: 6.5 in. Introduced: 1985 Cost: $3,295-$3,695

☐ 8636AT Square Matrix Label Printer
2 inches/sec. Type: Square Matrix Printing: bidirectional Buffer: 1K bytes Feed: Friction Carriage width: 4.5 in. Introduced: 1985 Cost: $5,695

ITHACA PERIPHERALS, INC.

☐ PcOS 100 POS Retail Printer
120 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 40; 132; 32 Resolution: 90 X 66 Printing: bidirectional Buffer: (optional) 2K bytes Feed: Tractor; Friction Carriage width: 16 in. Units sold: 500 since 1984 Cost: $1,995

☐ PcOS 200 POS Retail Printer
120 cps Type: Dot matrix Matrix: 5 X 7; 9 X 9 Character set: 96 Print positions: 40; 80 Resolution: 90 X 66; 70 X 70.5 Printing: bidirectional Buffer: 2K bytes Feed: Friction; Pin Carriage width: 9.5 in. Units sold: 5,000 since 1985 Cost: $995

☐ PcOS 51 POS Retail Printer
170 cps Type: Dot matrix Matrix: 5 X 7; 9 X 9 Character set: 96 Print positions: 40 Resolution: 144 X 144 Printing: bidirectional Buffer: 2K; (optional) 8K bytes Feed: Friction Carriage width: 3.25 in. Introduced: 1986 Cost: $699

☐ PcOS 52 POS Retail Printer
170 cps Type: Dot matrix Matrix: 5 X 7; 9 X 9 Character set: 96 Print positions: 40 Resolution: 144 X 144 Printing: bidirectional Buffer: 2K; (optional) 8K bytes Feed: Friction Carriage width: 3.25 in. Introduced: 1986 Cost: $749

☐ PcOS 53 POS Retail Printer
170 cps Type: Dot matrix Matrix: 5 X 7; 9 X 9 Character set: 96 Print positions: 40 Resolution: 144 X 144 Printing: bidirectional Buffer: 2K; (optional) 8K bytes Feed: Friction Carriage width: 3.25 in. Introduced: 1986 Cost: $799

LORD LABEL SYSTEMS, INC.

☐ EC-1100/EC-1500 Bar Code Printer
120 labels per minute Type: Dot matrix Resolution: 76 dots per inch Buffer: 32K bytes Feed: Friction Carriage width: 7.8 in. Support equip: Cables; Software; ROM Introduced: 1984 Cost: $3,750-$6,000

☐ LPA/80T Bar Code Printer
100 labels per minute Type: Dot matrix Resolution: 76 dots per inch Buffer: 32K bytes Feed: Friction Carriage width: 6-3/8 in. Units sold: 100 since 1985 Cost: $16,000-$19,800

MAGNETEC CORP.

☐ Model 9/60R Printer Mechanism
200 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 50; 60; 83 Resolution: 144 X 144 dots per inch Printing: bidirectional Buffer: 3.4K bytes Feed: Tractor; Friction Carriage width: 6-1/8 in. Units sold: 250 since 1984 Cost: $526

☐ Receipt Printer 9/40R
200 cps Type: Dot matrix Matrix: 9 X 9 Character set: 96 Print positions: 40; 32; 52 Resolution: 72 X 72; 144 X 144 dots per inch Printing: bidirectional Buffer: 3.4K bytes Feed: Friction Carriage width: 3-7/8 in. Support equip: Cables Units sold: 200 since 1985 Cost: $500

MANNESMANN TALLY

☐ MT 145
120 cps Type: Dot matrix Matrix: 9 X 7; 18 X 14 Character set: 96 Print positions: 132 Printing: bidirectional Buffer: 2K bytes Feed: Tractor Carriage width: 14.9 in. Support equip: Cables Introduced: 1985 Cost: $1,599

☐ MT 165
40; 165 cps Type: Dot matrix Matrix: 9 X 7; 18 X 14 Character set: 96 Print positions: 80 Printing: bidirectional Buffer: 2K bytes Feed: Tractor Carriage width: 10 in. Support equip: Cables Introduced: 1985 Cost: $968

MATTHEWS INTERNATIONAL CORP.
Symbol Systems Division

☐ BCP 1500 High Density Bar Code Printer
2 inches/sec. Type: Bar impact with dot matrix Matrix: 7 X 7; 7 X 9 Print positions: 100 Buffer: 125 bytes Feed: Friction Carriage width: 1 in. Cost: $2,400

☐ TMP 1800 Bar Code Printer
3.2 inches/sec. Type: Dot matrix Print positions: 25 Printing: bidirectional Buffer: 2K bytes Feed: Friction Carriage width: 1.5 in. Cost: $2,195

☐ TMP 1900 Bar Code Printer
3.2 inches/sec. Type: Dot matrix Matrix: 5 X 7 Print positions: 40 Printing: bidirectional Buffer: 2K bytes Feed: Friction Carriage width: 3.5 in. Cost: $3,095

MIL-PAC SYSTEMS CO.

☐ BARC Series 1000
150; 300 lpm Type: Dot matrix Introduced: 1984 Cost: $8,965

MONARCH MARKING
Retail Systems Division

☐ Model 2020 Bar Code Printer
2 inches/sec. Type: Thermal Buffer: 4K bytes Feed: Friction Carriage width: 2.4 in. Support equip: ROM Units sold: 200 since 1983 Cost: $5,200

☐ Model 2021 Bar Code Printer
2 inches/sec. Type: Thermal Matrix: 5 X 7; 7 X 12 Print positions: 14 Buffer: 4K bytes Feed: Friction Carriage width: 2.4 in. Support equip: ROM Units sold: 700 since 1984 Cost: $6,000; $3,000 (one time programming)

☐ Model 2030 Controlled Printing Systems
180 cps Type: Dot matrix Matrix: 5 X 7 Character set: 64 Printing: bidirectional Buffer: 4K bytes Feed: Friction Carriage width: 3.6 in. Units sold: 550 since 1985 Cost: $9,500

☐ Model 2040 Controlled Printing Systems
180 cps Type: Dot matrix Matrix: 5 X 7 Character set: 64 Printing: bidirectional Buffer: 3K bytes Feed: Friction Carriage width: 3.6 in. Units sold: 500 since 1981 Cost: $12,200

☐ Model 6041 Pathfinder
2 inches/sec. Type: Thermal Matrix: 5 X 7; 5 X 5 Character set: 48 Print positions: 16 Resolution: 203.2 dots per inch Buffer: 24K bytes Feed: Pin Carriage width: .875 in. Support equip: Cables Units sold: 2,000 since 1985 Cost: $2,000

☐ Model 6042 Pathfinder
2 inches/sec. Type: Thermal Matrix: 5 X 7; 5 X 5 Character set: 48 Print positions: 16; 14 Resolution: 203.2 dots per inch Buffer: 24K bytes Feed: Pin Carriage width: 1.2 in. Support equip: Cables Units sold: 8,000 since 1984 Cost: $2,000

☐ Model 6053 Pathfinder
2 inches/sec. Type: Thermal Matrix: 5 X 7 Character set: 48 Print positions: 16 Resolution: 152.4 dots per inch Feed: Pin Carriage width: 1.5 in. Support equip: Cables Units sold: 200 since 1985 Cost: $2,000

MPI (MICRO PERIPHERALS, INC.)

☐ BarMate 39/15
300 cps Type: Dot matrix Feed: Tractor; Friction Carriage width: 15 in. Introduced: 1985 Cost: $1,995

☐ BarMate 39/9
300 cps Type: Dot matrix Feed: Tractor; Friction Carriage width: 9.5 in. Introduced: 1985 Cost: $1,395

PRINTRONIX, INC.

☐ L600 Bar Code Label Printer
600; 800 lpm Type: Matrix line printer Character set: 96 Print positions: 132 Resolution: 120 X 72 matrix Feed: Tractor Carriage width: 16 in. Units sold: 200 since 1985 Cost: $7,500

SATO CORP.

☐ M-4500 Bar Code Printer
2 inches/sec. Printing: bidirectional Buffer: 2K bytes Feed: Friction Carriage width: 3.3 in. Introduced: 1984

SCANMARK DIVISION, ELECTROPRINT, INC.
(a Markem Co.)

☐ SK3000 Series
100 cps Type: Impact Feed: Friction capstan Carriage width: 2 in. Units sold: 1,500 since 1974 Cost: $8,450-$17,380

SCI SYSTEMS, INC.

☐ 1080/1180 Ticket Printer
1,100 cps Type: Dot matrix; Rotary Matrix: 5 X 7 Character set: 96 Print positions: 256 Resolution: 70 dots per inch Buffer: 1.5K bytes Feed: Friction Carriage width: 2 in. Units sold: 2,200 since 1980 Cost: $260-$1,160

☐ 1110/1100 Rotary Printer
2,200 cps Type: Dot matrix; Rotary Matrix: 5 X 7 Character set: 96 Print positions: 256 Resolution: 70 dots per inch Buffer: 3K bytes Feed: Friction Carriage width: 4 in. Units sold: 26,000 since 1977 Cost: $260-$1,160

SHOSHIN U.S.A., INC.

☐ CP-804GV Color Printer
2 inches per minute; 2 minutes per screen image Type: Dot matrix Resolution: 101 dots per inch Buffer: 1K bytes Feed: Friction; Roll Support equip: Cables Cost: $3,500

SYNTEST CORP.

☐ SP-309 Ticket Printer
120 cps Type: Dot matrix Matrix: 5 X 7 Character set: 64 Print positions: 40 Printing: bidirectional Buffer: 1K bytes Feed: Friction Carriage width: 5.91 in. Units sold: 300 since 1983 Cost: $790

☐ SP-314 Mobile Printer
160 cps Type: Dot matrix Matrix: 5 X 7 Character set: 96 Print positions: 40 Printing: bidirectional Buffer: 40 bytes Feed: Friction Carriage width: 4.25 in. Introduced: 1981 Cost: $605

UNIMARK, INC.

☐ IER 320 Bar Code Label/Ticket Printer
72 cps Type: Dot matrix Character set: 64 Printing: bidirectional Feed: Roll Carriage width: 3 in. Cost: $5,095

WALLACE COMPUTER SERVICES, INC.
Business Data Division

☐ W4600 Label Printer
600 lpm Type: Dot matrix Matrix: 9 X 7; 9 X 9 Character set: 96 Print positions: 132; 158; 175; 198; 224 Buffer: 1.9K bytes Feed: Tractor Carriage width: 50 in. Support equip: Software Units sold: 200 since 1981 Cost: $16,900

Focus on the technical issues that concern *you* in PC TECH JOURNAL

Let's face it, every day brings new technical challenges with the IBM PC. And just when you think you've met them all, you'll find out that IBM has just introduced DOS 3.1—or the new networking standard is likely to be the IBM token ring.

Where can you turn for accurate and in-depth answers to the technical questions that confront you daily? PC TECH JOURNAL.

PC TECH JOURNAL focuses on the technical what-if's and how-to's that are crucial to the growth of PC systems.

PC TECH JOURNAL will give you a clear picture of products and technical developments with detailed, objective articles on data management, applications development, communications, and programming. PLUS, you'll receive hard-nosed product evaluations of both hardware and software.

Your subscription to PC TECH JOURNAL includes the special PC TECH JOURNAL Directory issue, a comprehensive guide to IBM/MS DOS products and index to PC TECH JOURNAL articles!

Subscribe now and save 50% on the magazine that puts technical issues into focus. PC TECH JOURNAL. One year (13 issues) only $26.70. To subscribe, please use the attached Order Card, or call 1-800-852-5200 for fast service.

Savings based on annual single-copy price of $53.35.

Consult with the Experts. PC TECH JOURNAL

WEBER MARKING SYSTEMS

☐ 50 Series
150 lpm Type: Dot matrix Matrix: 7 X 9 Character set: 128 Print positions: 132 Resolution: 72 X 60 dots per inch Printing: bidirectional Buffer: 4K bytes Feed: Tractor Carriage width: 15 in. Support equip: Cables; Software Units sold: 255 since 1982 Cost: $13,000-$15,000

☐ 60 Series
300 lpm Type: Dot matrix Matrix: 7 X 9 Character set: 128 Print positions: 132 Resolution: 72 X 60 dots per inch Printing: bidirectional Buffer: 4K bytes Feed: Tractor Carriage width: 15 in. Support equip: Cables; Software Units sold: 106 since 1982 Cost: $19,000-$21,000

DISK DRIVES

DISKETTE

AMERICAN MICRO RESEARCH

☐ Model I.5i
5-1/4 inch PCDOS 3.0 compatible Capacity: 1 MB Transfer rate: 250 KB/sec Access time: 6 msec Introduced: 1984 Cost: $375

ANALOG AND DIGITAL PERIPHERALS, INC. (ADPI)

☐ Easi-Disk
5-1/4 inch Capacity: 0.5 MB; 1 MB; 2 MB Transfer rate: 25 KB/sec Introduced: 1983 Cost: $887-$1,095

☐ Easi-Disk IBM PC
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.3 MB Transfer rate: 25 KB/sec Support equip: ROM Introduced: 1984 Cost: $935-$1,095

☐ Easi-Disk Microfloppy
3-1/2 inch Capacity: 1 MB Transfer rate: 25 KB/sec Introduced: 1984 Cost: $935-$1,095

CHINON AMERICA, INC.
Information Equipment Division

☐ F-353BII
3-1/2 inch Capacity: 0.32 MB Introduced: 1986

☐ F-353CAE; F-353C
3-1/2 inch Capacity: 0.32 MB Introduced: 1986

☐ F-354C; F-354CAE
3-1/2 inch Capacity: 0.64 MB Introduced: 1986

☐ *F-354E; F-353E*
3-1/2 inch Capacity: 0.32 MB-0.64 MB Introduced: 1986

☐ F-354L
3-1/2 inch Capacity: 0.64 MB Introduced: 1986

☐ F-502LII; F-502II
5-1/4 inch Capacity: 0.32 MB Introduced: 1986

☐ F-506
5-1/4 inch Capacity: 0.32 MB-1.15 MB Introduced: 1986

CONTROL DATA CORP.

☐ Model 9428
5-1/4 inch Capacity: (unformatted) 0.25 MB-0.5 MB Spindle(s): 1 Transfer rate: 125 to 250 KB/sec Access time: 80 msec Units sold: 50,000 since 1983 Cost: $95 (qty. 5,000)

☐ Model 9429
5-1/4 inch Capacity: (unformatted) 0.5 MB-1 MB Spindle(s): 1 Transfer rate: 125 to 250 KB/sec Access time: 95 msec Units sold: 100,000 since 1983 Cost: $115 (qty. 5,000)

DATA TECHNOLOGY CORP.

☐ TeamMate 1103
5-1/4 inch PCDOS 3.0 compatible Capacity: 2.8 MB Spindle(s): 1 Transfer rate: 62.5 KB/sec Access time: 160 msec Support equip: Cables; ROM Units sold: 1,000 since 1984 Cost: $595

☐ TeamMate 1203
5-1/4 inch PCDOS 3.0 compatible Capacity: 2.78 MB Spindle(s): 1 Transfer rate: 62.5 KB/sec Access time: 160 msec Support equip: Cables; Software; ROM Units sold: 1,000 since 1984 Cost: $895

☐ TeamMate 1206
5-1/4 inch PCDOS 3.0 compatible Capacity: 5.56 MB Spindle(s): 2 Transfer rate: 62.5 KB/sec Access time: 160 msec Support equip: Cables; Software; ROM Units sold: 1,000 since 1984 Cost: $995

EASTMAN KODAK CO.
Spin Physics Division

☐ Kodak 3.3 Drive
5-1/4 inch PCDOS 3.0 compatible Capacity: 2.78 MB Spindle(s): 1 Transfer rate: 62.5 KB/sec Access time: 160 msec Introduced: 1986 Cost: $285

EPSON AMERICA, INC.

☐ SD-300 Series
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.25 MB-0.5 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 220 msec Introduced: 1983 Cost: $125

☐ SD-500 Series
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.25 MB-1.6 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 96 msec Introduced: 1983 Cost: $125

☐ SD-580 Series
5-1/4 inch PCDOS 3.0 compatible Capacity: 1 MB; 1.6 MB Spindle(s): 1 Transfer rate: 31.25; 62.5 KB/sec Access time: 93 msec Introduced: 1985 Cost: $150

☐ SMD-100 Series
3-1/2 inch PCDOS 3.0 compatible Capacity: 0.5 MB-1 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 96 msec Introduced: 1983 Cost: $125

☐ SMD-200 Series
3-1/2 inch PCDOS 3.0 compatible Capacity: 1 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 96 msec Introduced: 1985 Cost: $150

FALCON TECHNOLOGY

☐ jr extender
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.35 MB Transfer rate: 625 KB/sec Access time: 45 msec Support equip: Cables; Software Introduced: 1984 Cost: $595

FUJITSU AMERICA, INC.
Storage & Peripheral Products Division

☐ M2531A
3-1/2 inch PCDOS 3.0 compatible Capacity: 0.36 MB Spindle(s): 1 Transfer rate: 250 KB/sec Access time: 93 msec Introduced: 1986 Cost: $96 (qty. 100)

☐ M2532A
3-1/2 inch PCDOS 3.0 compatible Capacity: 0.655 MB Spindle(s): 1 Transfer rate: 250 KB/sec Access time: 94 msec Introduced: 1986 Cost: $112

☐ M2551A
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.36 MB Spindle(s): 1 Transfer rate: 250 KB/sec Access time: 93 msec Introduced: 1986 Cost: $83

☐ M2552A
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.655 MB Spindle(s): 1 Transfer rate: 250 KB/sec Access time: 94 msec Introduced: 1986 Cost: $121

☐ M2553A
5-1/4 inch PCDOS 3.0 compatible Capacity: 1.2 MB Spindle(s): 1 Transfer rate: 500 KB/sec Access time: 91 msec Introduced: 1986 Cost: $125

☐ M2554A
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.65 MB; 1.2 MB Spindle(s): 1 Transfer rate: 250/500 KB/sec Access time: 94 msec Introduced: 1986 Cost: $132

GREATWEST TECHNOLOGY, LTD.
SYSDYNE Products Division

☐ FD 320AT
5-1/4 inch Capacity: 0.31 MB Transfer rate: 250 KB/sec

GRECO SYSTEMS, INC.

☐ CNC Minifile
5-1/4 inch Capacity: 2.7 MB Units sold: 4,200 since 1977 Cost: $1,990

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ IBM PC jr Diskette
5-1/4 inch Capacity: 0.36 MB Cost: $480

☐ Model 1503810
5-1/4 inch Capacity: 0.32 MB Transfer rate: 20.5 KB/sec Introduced: 1982 Cost: $650

☐ Model 4865
3-1/2 inch Capacity: 0.70 MB Transfer rate: 31.25 KB/sec Support equip: Cables Introduced: 1986 Cost: $395

INSTOR CORP.

☐ I-50
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.35 MB-1.2 MB Spindle(s): 1 Access time: 20 msec Support equip: Cables Introduced: 1984 Cost: $1,995

☐ I-85
8 inch PCDOS 3.0 compatible Capacity: 0.6 MB-2.5 MB Spindle(s): 2 Access time: 91 msec Support equip: Software; Cables Introduced: 1983 Cost: $2,995-$3,995

☐ Instor-SMDR
8 inch PCDOS 3.0 compatible Capacity: 0.6 MB-2.5 MB Spindle(s): 2 Access time: 91 msec Support equip: Cables Introduced: 1983 Cost: $2,995-$3,995

I2 INTERFACE, INC.

☐ DSA445
5-1/4 inch Capacity: 0.35 MB Spindle(s): 1 Units sold: 1,500 since 1983 Cost: $545

☐ Internal Double-Sided
5-1/4 inch Capacity: 0.36 MB Spindle(s): 1 Access time: 6 msec Introduced: 1979 Cost: $295

☐ Internal Single-Sided
5-1/4 inch Capacity: 0.16 MB Spindle(s): 1 Access time: 6 msec Units sold: 100,000 since 1979 Cost: $195

☐ ThinLine Double-Sided
5-1/4 inch Capacity: 0.32 MB Introduced: 1980 Cost: $350

☐ TM-101-4
5-1/4 inch Capacity: 0.72 MB Spindle(s): 1 Access time: 90 msec Units sold: 300,000 since 1979 Cost: $375

JVC INFORMATION PRODUCTS CO. OF AMERICA
(division of U.S. JVC Corp.)

☐ MDP-100
5-1/4 inch Capacity: 1 MB Transfer rate: 31.25 KB/sec

☐ MDP-200
5-1/4 inch Capacity: 0.5 MB Transfer rate: 31.25 KB/sec

☐ MDP-200M
5-1/4 inch Capacity: 0.25 MB Transfer rate: 31.25 KB/sec

☐ MDP-200MDW
5-1/4 inch Capacity: 0.5 MB Transfer rate: 31.25 KB/sec

☐ MDP-200MW
5-1/4 inch Capacity: 0.5 MB Transfer rate: 31.25 KB/sec

☐ MDP-30
3-1/2 inch Capacity: 0.5 MB Transfer rate: 31.25 KB/sec

☐ MDP-40
3-1/2 inch Capacity: 1 MB Transfer rate: 31.25 KB/sec

☐ MFD-3103Z
3-1/2 inch Capacity: 1 MB Transfer rate: 31.25 KB/sec

☐ MFD-3503Z
3-1/2 inch Capacity: 0.5 MB Transfer rate: 31.25 KB/sec

☐ MFD-5162Z
5-1/4 inch Capacity: 1 MB-1.6 MB Transfer rate: 31.25 - 62.5 KB/sec

LEGACY TECHNOLOGIES, LTD.

☐ *Legacy II*
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.35 MB Spindle(s): 1 Transfer rate: 250 KB/sec Support equip: Cables; Software Introduced: 1984 Cost: $495

MECA

☐ Omni-Disk (5-1/4 inch)
5-1/4 inch Capacity: 0.78 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Units sold: 200 since 1984 Cost: $849

MITSUBA CORP.

☐ IT80
5-1/4 inch Capacity: 0.5 MB Introduced: 1983 Cost: $159

MITSUBISHI ELECTRONICS AMERICA, INC.

☐ MF501A
5-1/4 inch PCDOS 3.0 compatible Capacity: (unformatted) 0.5 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 103 msec Introduced: 1985 Cost: $90

☐ MF504A
5-1/4 inch PCDOS 3.0 compatible Capacity: (unformatted) 1.6 MB Spindle(s): 1 Transfer rate: 62.5 KB/sec Access time: 94 msec Introduced: 1985 Cost: $140

NEC INFORMATION SYSTEMS, INC.

☐ FD1053
5-1/4 inch Capacity: 1 MB Spindle(s): 1 Transfer rate: 250 KB/sec Access time: 6 msec Introduced: 1984

☐ FD1155C
5-1/4 inch PCDOS 3.0 compatible Capacity: 1.6 MB Spindle(s): 1 Transfer rate: 62.5 to 250 KB/sec Access time: 3 msec Introduced: 1984

NISSEI SANGYO AMERICA, LTD. (NSA)

☐ FB-350 Series
3-1/2 inch Capacity: 0.25 MB-1 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 94 msec Introduced: 1985 Cost: $105-$165 (qty. 100)

☐ FB-500 Series
5-1/4 inch Capacity: 0.25 MB; 0.5 MB; 1 MB; 1.6 MB Spindle(s): 1 Transfer rate: 31.25-62.50 KB/sec Access time: 93 msec Introduced: 1983 Cost: $115-$180 (qty. 100)

PACIFIC MICRO SYSTEMS

☐ Pelican 3.3
5-1/4 inch PCDOS 3.0 compatible Capacity: 2.78 MB Spindle(s): 1 Transfer rate: 500 KB/sec Access time: 160 msec Support equip: Cables Introduced: 1985 Cost: $795

PERSONAL MICRO COMPUTERS, INC.
(division of Recortec, Inc.)

☐ FDD-421
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.5 MB Spindle(s): 1 Transfer rate: 31.2 KB/sec Access time: 90 msec Introduced: 1983 Cost: $295

☐ FDD-422
5-1/4 inch PCDOS 3.0 compatible Capacity: 1 MB Spindle(s): 2 Transfer rate: 31.2 KB/sec Access time: 90 msec Introduced: 1983 Cost: $395

RICOH SYSTEMS, INC.

☐ RF5050
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.36 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 95 msec Units sold: 2,000 since 1984

SUMITRONICS, INC.
(subsidiary of Sumitomo Corp.)

☐ DF-0500
5-1/4 inch Capacity: 4.8 MB Transfer rate: 375 KB/sec Access time: 110 msec

TEAC CORP. OF AMERICA (TCA)

☐ FD-55A
5-1/4 inch Capacity: 0.25 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 93 msec Units sold: 700,000 since 1982 Cost: $89

TECO AMERICAN, INC.
(subsidiary of Teco Electric & Machinery Co., Ltd.)

☐ VF5220
5-1/4 inch Capacity: 0.5 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 122 msec

TOSHIBA AMERICA, INC.
Information Systems Division

☐ ND04D
5-1/4 inch Capacity: 0.5 MB Spindle(s): 1 Transfer rate: 250 KB/sec Access time: 80 msec Introduced: 1984 Cost: $385

TTP ENTERPRISES, INC.

☐ FD-512
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.5 MB Spindle(s): 2 Transfer rate: 72 KB/sec Access time: 10 msec Support equip: Cables Introduced: 1984 Cost: $825

UNICORN TECHNOLOGIES

☐ UT 100 XFS002
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.36 MB Spindle(s): 2 Transfer rate: 500 KB/sec Access time: 6 msec Support equip: Cables Units sold: 200 since 1984 Cost: $212

☐ UT 100 XFS003
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.72 MB Spindle(s): 2 Transfer rate: 500 KB/sec Access time: 6 msec Support equip: Cables Units sold: 200 since 1984 Cost: $345

WELTEC DIGITAL, INC.

☐ M16A
5-1/4 inch PCDOS 3.0 compatible Capacity: 1.2 MB Spindle(s): 1 Transfer rate: 31.35-62.5 KB/sec Access time: 80 msec Units sold: 10,000 since 1985 Cost: $105

☐ M48D
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.5 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 80 msec Units sold: 15,000 since 1984 Cost: $80

WORLD DISK DRIVES

☐ FDD 100-5
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.25 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 275 msec Units sold: 600,000 since 1976 Cost: $135

☐ FDD 111-5
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.25 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 80 msec Units sold: 25,000 since 1982 Cost: $95

☐ FDD 112-5
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.25 MB Spindle(s): 1 Transfer rate: 250 KB/sec Access time: 95 msec Units sold: 18,000 since 1983 Cost: $90

☐ FDD 121-5
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.5 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 94 msec Units sold: 10,000 since 1982 Cost: $140

☐ FDD 211-5
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.5 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 80 msec Units sold: 90,000 since 1982 Cost: $95

☐ FDD 212-5
5-1/4 inch PCDOS 3.0 compatible Capacity: 0.5 MB Spindle(s): 1 Transfer rate: 250 KB/sec Access time: 95 msec Units sold: 2,000 since 1983 Cost: $120

☐ FDD 221-5
5-1/4 inch PCDOS 3.0 compatible Capacity: 1 MB Spindle(s): 1 Transfer rate: 31.25 KB/sec Access time: 94 msec Units sold: 50,000 since 1982 Cost: $180

HERE'S HOW YOU CAN BENEFIT:
Save up to 50% on each megabyte of storage you buy. *NMS makes the 12 hour work day obsolete* because our products provide the performance pipeline your system needs . . . not the bottlenecks that slow your system down. NMS makes it possible for you to *pay less* the larger the storage system you select. In fact, the larger the disk capacity . . . the less you pay!

HERE'S WHY:
NMS controllers and complete memory systems provide performance that is *faster than conventional disk systems* while you *save up to ½* the cost per megabyte.

Take advantage of *16 millisecond access times* and 2.4 megabyte/second data rates! If you do, you may be able to transfer 5 megabyte files in as little as 26 seconds! NMS memory systems and multifunction controllers give the greatest flexability in disk system configuration, capacity range, cpu, network and operating system compatability.

ook ahead for 1987 . . .
ook to National Memory Systems for your
sk, tape, and laser optical storage needs.

5-1/4 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Cables; Software; ROM **Units sold:** 5,000 since 1984 **Cost:** $995

☐ TeamMate 1132/H
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 32 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Cables; Software; ROM **Units sold:** 1,000 since 1984 **Cost:** $1,295

☐ TeamMate 1213
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Spindle(s):** 2 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Backup:** Diskette 3.3 MB **Support equip:** Cables; ROM **Units sold:** 1,000 since 1984 **Cost:** $1,595

☐ TeamMate 1220
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Cables; Software; ROM **Units sold:** 1,000 since 1984 **Cost:** $1,095

☐ TeamMate 1223
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 17 MB **Spindle(s):** 2 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Backup:** Diskette, 3.3 MB **Support equip:** Cables; ROM **Units sold:** 1,000 since 1985 **Cost:** $1,795

☐ 1160AT
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 60 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Software **Units sold:** 250 since 1985 **Cost:** $1,995

☐ 1400/RIO
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 135 msec **Backup:** Cartridge, 10 MB **Support equip:** Cables **Units sold:** 500 since 1985 **Cost:** $1,995

☐ 1400/T60
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 60 MB **Spindle(s):** 1 **Transfer rate:** 90 KB/sec **Access time:** 33 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Software **Introduced:** 1986 **Cost:** $1,595

☐ 1420/T20
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Backup:** Cassette tape, 25 MB **Support equip:** Software **Introduced:** 1986 **Cost:** $2,395

DATA ZONE, INC.

☐ HANG 10/20/30
3-1/2 inch PCDOS 3.0 compatible **Capacity:** 10 MB-30 MB **Transfer rate:** 625 KB/sec **Access time:** 40-65 msec **Support equip:** Cables; Software **Units sold:** 2,000 since 1985 **Cost:** $699-$1,399

☐ SLOT DRIVE 10/20/30
3-1/2 inch PCDOS 3.0 compatible **Capacity:** 10 MB-30 MB **Transfer rate:** 625 KB/sec **Access time:** 40-65 msec **Support equip:** Cables; Software **Units sold:** 300 since 1985 **Cost:** $899-$1,499

DATREX, INC.

☐ Super XT
5-1/4 inch PCDOS 3.0 compatible **Capacity:** (removable) 10 MB-25 MB **Spindle(s):** 2 **Transfer rate:** 625 KB/sec **Access time:** 55 msec **Backup:** Disk cartridge, 5 MB **Support equip:** Cables; Software; Adapter card **Units sold:** 1,200 since 1984 **Cost:** $1,995-$2,495

DIGITAL ELECTRONIC SYSTEMS

☐ IPC10-C1
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Software **Units sold:** 100 since 1984 **Cost:** $1,195

☐ IPC31-C1
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 31 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Software **Units sold:** 50 since 1984 **Cost:** $2,195

☐ IRPC10-C1
5-1/4 inch PCDOS 3.0 compatible **Capacity:** (removable) 10 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 90 msec **Support equip:** Software **Units sold:** 100 since 1984 **Cost:** $2,295

☐ RPC10-C1
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 90 msec **Support equip:** Software **Units sold:** 100 since 1984 **Cost:** $2,495

☐ RPC5-C1
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 5 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 90 msec **Support equip:** Software **Units sold:** 100 since 1984 **Cost:** $2,010

☐ SD-10
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Software **Units sold:** 10 since 1984 **Cost:** $940

☐ SD-30
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 30 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Software **Units sold:** 10 since 1984 **Cost:** $1,650

☐ SDR-10
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 90 msec **Support equip:** Software **Units sold:** 50 since 1984 **Cost:** $2,070

☐ SDR-5
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 5 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 90 msec **Support equip:** Software **Units sold:** 50 since 1984 **Cost:** $1,410

☐ WPC10-C1
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Software **Units sold:** 500 since 1984 **Cost:** $2,295

☐ WPC119-C8
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 119 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Software **Units sold:** 50 since 1984 **Cost:** $8,310

☐ WPC31-C1
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 31 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Software **Introduced:** 1984 **Cost:** $1,195

☐ WPC55-C8
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 55 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Software **Introduced:** 1984 **Cost:** $1,395

☐ **WPC87-C8**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 87 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Software **Units sold:** 50 since 1984 **Cost:** $5,820

☐ **W119**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 119 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Software **Introduced:** 1984 **Cost:** $7,650

☐ **W55**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 55 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Software **Introduced:** 1984 **Cost:** $4,490

☐ **W87**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 87 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Software **Introduced:** 1984 **Cost:** $5,160

DISC TECH ONE, INC.

☐ **Model 3306**
14 inch PCDOS 3.0 compatible **Capacity:** (unformatted) 83.95 MB **Spindle(s):** 1 **Transfer rate:** 996 KB/sec **Access time:** 38 msec **Units sold:** 8,000 since 1977 **Cost:** $3,000

☐ **Model 4160**
14 inch PCDOS 3.0 compatible **Capacity:** (unformatted) 165.9 MB **Spindle(s):** 1 **Transfer rate:** 1,209 KB/sec **Access time:** 38 msec **Units sold:** 200 since 1983 **Cost:** $4,000

☐ **Model 512**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 13.33 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Units sold:** 10,000 since 1983 **Cost:** $260 (qty. 1,000)

☐ **Model 525**
5-1/4 inch **Capacity:** 25.52 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 65 msec **Units sold:** 10,000 since 1983 **Cost:** $595 (qty. 1,000)

☐ **Plato 5000 Series**
5-1/4 inch **Capacity:** 20 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 38 msec **Introduced:** 1985 **Cost:** $825-$3,000

☐ **Winchester 5000 Series**
5-1/4 inch **Capacity:** 20 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 38 msec **Units sold:** 5,000 since 1982 **Cost:** $260-$450

EMERALD SYSTEMS CORP.

☐ **DOS 118-3002**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 118 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Units sold:** 1,000 since 1984 **Cost:** $8,270

☐ **DOS 118-4000**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 118 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 25 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Units sold:** 3,000 since 1984 **Cost:** $12,070

☐ **DOS 144-3002**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 144 MB **Spindle(s):** 2 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Units sold:** 600 since 1984 **Cost:** $7,190

☐ **DOS 144-5000**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 144 MB **Spindle(s):** 2 **Transfer rate:** 625 KB/sec **Access time:** 28 msec **Support equip:** Cables; Software **Units sold:** 300 since 1984 **Cost:** $9,060

☐ **DOS 236-3002**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 236 MB **Spindle(s):** 2 **Transfer rate:** 625 KB/sec **Access time:** 25 msec **Support equip:** Cables; Software **Units sold:** 300 since 1984 **Cost:** $16,310

☐ **DOS 236-5000**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 236 MB **Spindle(s):** 2 **Transfer rate:** 625 KB/sec **Access time:** 25 msec **Support equip:** Cables; Software **Units sold:** 200 since 1984 **Cost:** $18,180

☐ **DOS 30-3002**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 30 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 35 msec **Support equip:** Cables; Software **Units sold:** 2,000 since 1984 **Cost:** $2,350

☐ **DOS 30-4000**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 30 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 35 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Units sold:** 2,000 since 1984 **Cost:** $6,540

☐ **DOS 40-3002**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 40 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 28 msec **Support equip:** Cables; Software **Units sold:** 500 since 1984 **Cost:** $2,900

☐ **DOS 40-4000**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 40 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 28 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Units sold:** 2,000 since 1984 **Cost:** $6,700

☐ **DOS 72-3002**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 72 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 28 msec **Support equip:** Cables; Software **Units sold:** 2,000 since 1984 **Cost:** $3,710

☐ **DOS 72-4000**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 72 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 28 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Units sold:** 4,000 since 1984 **Cost:** $7,510

EMULEX CORP.

☐ **ATS Kit**
5-1/4 inch **Capacity:** 112 MB; 146 MB; 319 MB **Backup:** Cartridge streaming tape **Introduced:** 1986 **Cost:** $6,175-$11,100

☐ **Decathlon-ER3/110**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 112 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $8,480

☐ **Decathlon-ER3/110-T**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 112 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $9,580

☐ **Decathlon-ER3/110-110**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 224 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $14,325

☐ **Decathlon-ER3/110-110-T**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 224 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $15,425

☐ **Decathlon-ER3/110-110-110**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 336 MB **Spindle(s):** 3 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $20,675

☐ **Decathlon-ER3/40**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 43 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 50 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $4,795

☐ **Decathlon-ER3/40-T**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 43 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 50 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $5,895

☐ **Decathlon-ER3/40-40**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 86 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 50 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $6,950

☐ **Decathlon-ER3/40-40-T**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 86 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 50 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $8,050

☐ **Decathlon-ER3/40-40-40**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 129 MB **Spindle(s):** 3 **Transfer rate:** 675 KB/sec **Access time:** 50 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $9,600

☐ **Decathlon-ER3/70**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 67 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $6,450

☐ **Decathlon-ER3/70-T**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 67 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $7,550

☐ **Decathlon-ER3/70-70**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 134 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $10,250

☐ **Decathlon-ER3/70-70-T**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 134 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $11,350

☐ **Decathlon-ER3/70-70-70**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 201 MB **Spindle(s):** 3 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $14,575

☐ **Javelin-ED2/110**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 112 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $8,075

☐ **Javelin-ED2/110-T**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 112 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $9,435

☐ **Javelin-ED2/110-110**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 224 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $13,950

☐ **Javelin-ED2/40**
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 43 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 65 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $4,395

NATIONAL MEMORY SYSTEMS CORP.
355 Earhart Way
Livermore, CA 94550
(415) 443-1669
TWX: 910386606

National Memory Systems Corp. is a manufacturer of hard disk subsystems with data storage capacities from 84mb to 1600mb. NMSC's PC8000 series has average access times as low as 15ms; data transfer rates up to 2.4mb/sec. and is used with the IBM RT, AT and compatibles. Also available are the PC007 series of WORM optical disk systems and tape backup devices.

☐ Javelin-ED2/40-T
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 43 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 50 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $5,495

☐ Javelin-ED2/40-40
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 86 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 50 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $6,575

☐ Javelin-ED2/70
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 67 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $6,050

☐ Javelin-ED2/70-T
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 67 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Cartridge tape, 60 MB **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $7,530

☐ Javelin-ED2/70-70
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 134 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $9,875

☐ SABRE-ER2/110
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 112 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1983 **Cost:** $7,925

☐ SABRE-ER2/110-I
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 122.5 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Cartridge, 10.4 MB **Support equip:** Cables; Software **Introduced:** 1983 **Cost:** $10,495

☐ SABRE-ER2/30
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 36 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1983 **Cost:** $5,200

☐ SABRE-ER2/30-I
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 46.4 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Removable 8" cartridge, 10.4 MB **Support equip:** Cables; Software **Introduced:** 1983 **Cost:** $7,775

☐ SABRE-ER2/70
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 67 MB **Spindle(s):** 1 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Support equip:** Cables; Software **Introduced:** 1983 **Cost:** $5,885

☐ SABRE-ER2/70-I
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 77.5 MB **Spindle(s):** 2 **Transfer rate:** 675 KB/sec **Access time:** 30 msec **Backup:** Cartridge tape, 10.4 MB **Support equip:** Cables; Software **Introduced:** 1983 **Cost:** $8,460

EVEREX SYSTEMS, INC.

☐ Everdisk 10
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Spindle(s):** 1 **Transfer rate:** 150 KB/sec **Access time:** 70 msec **Backup:** Tape cartridge, 60 MB; Cassette, 20 MB **Support equip:** Cables; Software **Units sold:** 20,000 since 1984 **Cost:** $1,135

☐ Everdisk 20
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Spindle(s):** 1 **Transfer rate:** 150 KB/sec **Access time:** 80 msec **Backup:** Cassette, 20 MB **Support equip:** Cables; Software **Units sold:** 20,000 since 1984 **Cost:** $1,395

EXPRESS SYSTEMS, INC.

☐ Express Hard Disk Card
Reviewed May 1986 p. 94.
3-1/2 inch **Capacity:** 20 MB **Introduced:** 1985 **Cost:** $595

FIRST CAPITOL COMPUTER

☐ Winchester Upgrades
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 12 MB-170 MB **Transfer rate:** 625 KB/sec **Access time:** 28 to 65 msec **Units sold:** 300 since 1985 **Cost:** $500-$3,000

FIRST CLASS PERIPHERALS

☐ The Sider
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB-20 MB **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Backup:** Reel to reel tape, 20 MB **Support equip:** Cables **Units sold:** 18,001 since 1984 **Cost:** $695-$995

FRANKLIN TELECOM

5-1/4 inch **Capacity:** 20 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 90 msec **Backup:** Removable cartridge, 10 MB **Introduced:** 1985 **Cost:** $2,345

LA PINE TECHNOLOGY

☐ TITAN 20
3-1/2 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Spindle(s):** 2 **Transfer rate:** 625 KB/sec **Access time:** 66 msec **Units sold:** 35,000 since 1984 **Cost:** $300-$400

LANCORE TECHNOLOGIES, INC.

☐ Core 45
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 43.35 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Backup:** Magnetic tape, 60 MB **Support equip:** Software; ROM **Introduced:** 1984 **Cost:** $5,995

☐ Core 75
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 71.30 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Backup:** Magnetic tape, 60 MB **Support equip:** Software; ROM **Introduced:** 1984 **Cost:** $6,995

LINDE TECHNOLOGY, INC.

☐ Winchester Drive
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB; 20 MB **Access time:** 45 to 85 msec **Units sold:** 8,500 since 1984 **Cost:** $945-$1,495

MAGNA COMPUTER CORP.

☐ PC Freedom
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB-67 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 95 to 135 msec **Backup:** Removable cartridge, 10 MB **Introduced:** 1984 **Cost:** $1,195-$4,745

MAYNARD ELECTRONICS

☐ ATi 20
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Transfer rate:** 625 KB/sec **Access time:** 55 msec **Support equip:** Cables; Software; ROM **Introduced:** 1984 **Cost:** $895

☐ ATi 30
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 30 MB **Transfer rate:** 625 KB/sec **Access time:** 55 msec **Support equip:** Cables; Software; ROM **Introduced:** 1984 **Cost:** $1,395

☐ DX-30
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 30 MB **Transfer rate:** 625 KB/sec **Access time:** 35 msec **Support equip:** Cables; Software; ROM **Introduced:** 1986 **Cost:** $2,490

☐ GEMINI
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Transfer rate:** 625 KB/sec **Access time:** 70 msec **Backup:** Diskette, 0.35 MB **Support equip:** Cables; Software; ROM **Introduced:** 1984 **Cost:** $1,175

☐ OnBoard 10
3-1/2 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Transfer rate:** 625 KB/sec **Access time:** 85 msec **Support equip:** Cables; Software; ROM **Introduced:** 1986 **Cost:** $975

☐ OnBoard 20
3-1/2 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Transfer rate:** 625 KB/sec **Access time:** 60 msec **Support equip:** Cables; Software; ROM **Introduced:** 1986 **Cost:** $1,195

☐ PCi 10
3-1/2 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Transfer rate:** 625 KB/sec **Access time:** 70 msec **Support equip:** Cables; Software; ROM **Introduced:** 1984 **Cost:** $950

☐ PCi 20
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Transfer rate:** 625 KB/sec **Access time:** 70 msec **Support equip:** Cables; Software **Introduced:** 1984 **Cost:** $1,095

☐ PCi 30
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 30 MB **Transfer rate:** 625 KB/sec **Access time:** 55 msec **Support equip:** Cables; Software; ROM **Introduced:** 1984 **Cost:** $1,900

☐ Transport 10
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 10 MB **Transfer rate:** 625 KB/sec **Access time:** 55 msec **Support equip:** Cables; Software; ROM **Introduced:** 1985 **Cost:** $1,295

☐ Transport 20
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Transfer rate:** 625 KB/sec **Access time:** 55 msec **Support equip:** Cables; Software; ROM **Introduced:** 1985 **Cost:** $1,495

☐ XTi 20
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 20 MB **Transfer rate:** 625 KB/sec **Access time:** 55 msec **Support equip:** Cables; Software; ROM **Introduced:** 1985 **Cost:** $1,290

☐ XTi 30
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 30 MB **Transfer rate:** 625 KB/sec **Access time:** 55 msec **Support equip:** Cables; Software; ROM **Introduced:** 1985 **Cost:** $1,790

MEDIA TECHNOLOGY INTERNATIONAL

☐ HC2045
3-1/2 inch **Capacity:** 20 MB **Access time:** 45 msec **Introduced:** 1985

MEGAVAULT MEMORIES

☐ MV-166
8 inch PCDOS 3.0 compatible **Capacity:** (unformatted) 186 MB **Spindle(s):** 1 **Transfer rate:** 1,209 KB/sec **Access time:** 38 msec **Support equip:** Cables; Software **Units sold:** 110 since 1983 **Cost:** $2,120

☐ MV-212
8 inch PCDOS 3.0 compatible **Capacity:** (unformatted) 212 MB **Spindle(s):** 1 **Transfer rate:** 1,209 KB/sec **Access time:** 38 msec **Support equip:** Cables; Software **Units sold:** 800 since 1983 **Cost:** $2,650

☐ MV-83S
8 inch PCDOS 3.0 compatible **Capacity:** (unformatted) 83 MB **Spindle(s):** 1 **Transfer rate:** 1,209 KB/sec **Access time:** 38 msec **Support equip:** Cables; Software **Units sold:** 500 since 1982 **Cost:** $2,000

☐ Vault 10
8 inch PCDOS 3.0 compatible **Capacity:** (unformatted) 212 MB **Spindle(s):** 1 **Transfer rate:** 1,209 KB/sec **Access time:** 38 msec **Support equip:** Cables; Software **Units sold:** 220 since 1983 **Cost:** $3,580

MICRO CONNECTIONS, INC.

☐ MC-80
5-1/4 inch PCDOS 3.0 compatible **Capacity:** 80 MB **Spindle(s):** 1 **Transfer rate:** 625 KB/sec **Access time:** 30 msec **Backup:** Cartridge tape **Support equip:** Cables **Units sold:** 1,000 since 1984 **Cost:** $3,595

MICRO-DESIGN

☐ DATA Series
5-1/4 inch **Capacity:** 10 MB-40 MB **Transfer rate:** 625 KB/sec **Access time:** 40 msec **Introduced:** 1984 **Cost:** $2,495-$4,395

REMEMBER WHO DID IT FIRST
PERSTOR Double Capacity Controllers

The PERSTOR 200 Series controllers double or triple the factory rated storage capacity of any attached Winchester hard disk drive — fixed or removable!*

Replace the hard disk controller in your IBM PC or XT with the PERSTOR 200 Series controller, or add the PERSTOR 200 Series controller to an AT. Reformat the drive, and you'll double the factory rated storage capacity. Utilize our DOS compaction software that comes standard, and the capacity can be even greater. In addition, the cache access method incorporated in our software allows you to reduce average access time by 50% or more. Just think of the increased productivity you'll get!

Systems and Software, Inc. also offers a full line of PERSTOR 200 Series hard disk systems. A PERSTOR system incorporates standard fixed and/or removable ST506/412 Winchester drives and our one of a kind controller to offer you the highest quality internal or external subsystems. The PERSTOR line also offers Xenix and Unix compatibility, and direct attachment of the PERSTOR drives to the AT controller.

*PERSTOR Approved Drives
Note: PC and AT refer to IBM models and compatibles. All capacities mentioned are data dependent. IBM PC, XT, and AT are registered trademarks of IBM Corp.

Telex: 754923 OVERLAND

Tape Linx 9 Track Tape Subsystem for the IBM PC/XT/AT & compatibles. The Micro to Mainframe Connection includes:

Tape Drive, Tape Coupler Card, MS-DOS Support, XENIX Support, User Manual, Cables & Power Cord. Software includes: FLASHBAX (high-speed backup), DEPOT 3 (data interchange), BTEST, FDUMP.

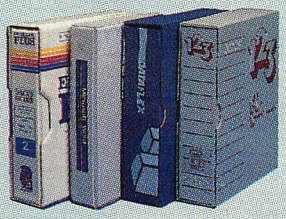
Alloy... We're Writing the Future of Multi-User PCs

PC-PLUS — The Fastest Growing Multi-user PC Solution

1984

Alloy introduces PC-PLUS — a revolutionary multiuser, multiprocessor architecture for PCs. Amidst the confusion of LANs and time-sharing approaches, RTNX and PC-SLAVE/16 provides a unique, high-performance solution. What LANs promised, PC-PLUS delivered. Faster. Easier to install and use. Less Expensive.

1985



ATNX with its lightning-fast disk caching supports AT-class machines. File and record locking — plus controls to manage file access. Disk volumes greater than 32 Mb. DOS 3.X machines can reach the peak of multiuser performance.

1986

NTNX and PCST/G graphics terminal continue the tradition. NTNX lets PC-PLUS run multiuser applications written for Novell NetWare and MS-NET. PCST/G brings high-resolution, Hercules-compatible graphics to PC-PLUS workstations.

AND BEYOND

We've written the history of multiuser PCs, and we're writing the future . . . with PC-compatible multiuser systems.

The LAN Alternative

PC-PLUS . . . the perfect solution for sharing data among users. The 8MHz SLAVE/16 card operates at over twice the speed of typical PCs. Advanced bank-switched memory delivers data at bus speed. Many times faster than LANs. Engineering ingenuity makes PC-PLUS simpler and much easier to install than LANs or UNIX multiuser systems. While sharing disks, printers and other peripherals with single-user ease of operation.

The Optimum IBM Multi-user Solution . . . Made Possible by Alloy

The PC-PLUS family turns your single IBM personal computer or compatible into a fully integrated office solution. Up to 31 users can be added to the host — while maintaining full functionality of the PC. As needs grow, add more PC-SLAVE/16 cards and low-cost terminals.

The Choice of Vertical Market Resellers

PC-PLUS expands as business grows. In any vertical market. Law. Finance. Medicine. POS. Real Estate. And more. That's why PC-PLUS is the fastest-growing multiuser solution among vertical market resellers. Today with a strong commitment to tomorrow.

PC ⇔ MAINFRAME
VIA 9-TRACK TAPE

For Information Interchange – Backup – Archival Storage

IBM format compatible 9-track, ½ inch magnetic tape is the universally accepted media for mainframes and minicomputers. Catamount offers *Low Cost, Lightweight* 9-track Tape Subsystems for the IBM-PC/XT/AT computers which allow:

- Reading tapes generated on mainframes and minicomputers.
- Writing tapes to be read on mainframes and minis.
- ASCII, EBCDIC and Binary tapes accommodated.
- 800 bpi NRZI, 1600/3200 bpi PE, and 6250 bpi GCR format systems available.
- Storage capacities up to 270 MB on a single reel.

Systems come complete with comprehensive DOS command syntax oriented software and an Installable Device Driver. For OEM applications, the tape controller is available separately.

CIRCLE NO. 111 ON READERS SERVICE CARD

The ultimate solution for information interchange . . .

The ultimate 9-Track magnetic tape subsystem for the IBM-PC/XT/AT and compatibles!

With IDT's 9-track tape drive and a "LEO" tape controller, you'll be able to share your mainframe data with your PC.

Designed with data interchange in mind, "LEO" comes with two device drivers, diagnostics, and a variety of software utilities, including:

- **ANSI**, a file transfer utility for IBM/ANSI labeled tapes—
- **TAP**, a fast back-up and restore utility—
- **TCMD**, for inspecting unknown tape data and formats.

"LEO" is a second generation state-of-the-art PC tape controller that comes with an impressive list of features:

- Dedicated microprocessor to manage the tape drive.
- On-board rams offering dual 8K buffers (opt. 32K).
- Memory mapping I/O, with no DMA channel required.
- ASCII to EBCDIC code converter prom standard.
- External cable connectors for easy cabling.

Tracks: 9 Density: 1,600 bpi; 3,200 bpi Read speed: 12.5 ips Rewind speed: 100 ips Tape width: ½ in. Support equip: ROM Units sold: 50 since 1984 Cost: $4,255 (PC); $8,995

☐ Series 5-99
Tracks: 9 Density: 1,600 bpi; 3,200 bpi Read speed: 12.5 ips Rewind speed: 100 ips Tape width: ½ in. Support equip: ROM Units sold: 100 since 1982 Cost: $5,325 (PC); $10,795 (S/34, S/36)

KENNEDY CO.
(an Allegheny International Co.)

☐ Model 9000
Tracks: 7/9 Density: 200 bpi; 556 bpi; 800 bpi; 1,600 bpi Read speed: 45 ips Rewind speed: 150 ips Units sold: 30,000 since 1972 Cost: $5,100-$7,200

☐ Model 9100
Tracks: 9; 7 (NRZI only) Density: 800 bpi; 1,600 bpi Read speed: 75 ips Rewind speed: 300 ips Tape width: ½ in. Units sold: 25,000 since 1974 Cost: $6,500-$8,600

☐ Model 9300
Tracks: 9; 7 (NRZI only) Density: 800 bpi; 1,600 bpi Read speed: 125 ips Rewind speed: 300 ips Tape width: ½ in. Units sold: 15,000 since 1976 Cost: $7,550-$9,650

INNOVATIVE DATA TECHNOLOGY
5340 Eastgate Mall
San Diego, CA 92121
(619) 587-0555
TWX: (910) 335-1610

Manufacturer of 9-track tape drives and subsystems including the IDT LEO PC/XT/AT second generation tape controller. LEO is the result of IDT's experience as the first to offer 9-track magnetic tape for the PC. LEO offers easy installation and system generation complete with technical documentation and software utilities and IDT provides you total hardware and software support from one manufacturer.

☐ Model 9400
Tracks: 9 Density: 800 bpi; 1,600 bpi; 6,250 bpi Read speed: 75 ips (NRZI, PE); 45 ips (GCR) Rewind speed: 500 ips Tape width: ½ in. Units sold: 1,200 since 1983 Cost: $12,000

☐ Model 9600
Streamer Tracks: 9 Density: 800 bpi; 1,600 bpi; 3,200 bpi Read speed: 100 ips; 45 ips Rewind speed: 200 ips Tape width: ½ in. Units sold: 600 since 1985 Cost: $5,300

☐ Model 9700
Tracks: 9; 7 (NRZI only) Density: 800 bpi; 1,600 bpi Read speed: 25 ips; 12.5 ips Rewind speed: 150 ips Tape width: ½ in. Units sold: 28,000 since 1972 Cost: $4,050-$6,150

☐ Model 9800
Tracks: 9; 7 (NRZI only) Density: 800 bpi; 1,600 bpi Read speed: 25 ips; 12.5 ips Rewind speed: 150 ips Tape width: ½ in. Units sold: 20,000 since 1974 Cost: $4,500-$6,275

LANCORE TECHNOLOGIES, INC.

☐ Reel-Core 10
Streamer Tracks: 9 Density: 1,600 bpi; 3,200 bpi Read speed: 25 ips; 50 ips Rewind speed: 60 ips Tape width: ½ in. Support equip: Cables; Software Cost: $4,995

☐ Reel-Core 7
Streamer Tracks: 9 Density: 1,600 bpi; 3,200 bpi Read speed: 25 ips; 50 ips Rewind speed: 60 ips Tape width: ½ in. Support equip: Cables; Software Cost: $4,495

MITRON SYSTEMS CORP.

☐ STD-1600
Tracks: 9 Density: 800 bpi; 1,600 bpi Read speed: 25 ips Rewind speed: 75 ips Tape width: ½ in. Support equip: Cables Introduced: 1980 Cost: $11,750-$13,250; Lease (mo.) —$334-$476

QUALSTAR CORP.

☐ MINISTREAMER Model 1054
Streamer Tracks: 9 Density: 1,600 bpi; 3,200 bpi Read speed: 25 ips; 50 ips Tape width: ½ in. Units sold: 600 since 1985 Cost: $3,755

☐ Model 1052
Streamer Tracks: 9 Density: 1,600 bpi; 3,200 bpi Read speed: 50 ips Rewind speed: 100 ips Tape width: ½ in. Support equip: Cables; Software; Interface board Units sold: 500 since 1985 Cost: $2,875

☐ Model 701
Streamer Tracks: 9 Density: 1,600 bpi; 3,200 bpi Read speed: 50 ips Rewind speed: 100 ips Tape width: ½ in. Support equip: Cables; Software; Interface board Units sold: 100 since 1985 Cost: $2,675

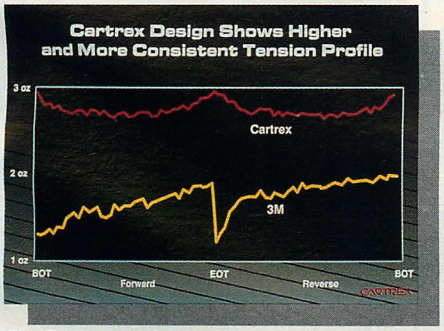
First new ¼ inch cartridge since 1971

Cartrex introduces the first, brand-new, ¼-inch tape cartridge technology in over 15 years for some fundamental technical reasons. . .

. . .and today's tape drive need for 400% increase in tape speed, 500% increase in track density, 1000% increase in bit densities, and 3000% increase in bits/second, are just a few. Read on to get the complete story.

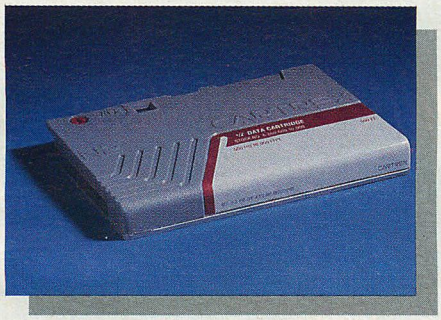
Why a new cartridge

With the significant increases in tape drive capacity, system reliability demands a tighter tolerance cartridge. Most tape drive users aren't aware that all of the tensioning, tolerance, and data reliability issues are virtually all a function of the tape cartridge.



When 3M announced its cartridge in 1971, it was designed for a low capacity tape drive with less than 3 megabytes—2.88 to be exact. The tape was low in density—1600 bits per inch with only 4 tracks and 300 feet of tape.

The tolerances required for the tape drives of the early 1970's were fine for then, but today's tape drives require much tighter tolerance. Today's tape cartridges must work with drives that have 9 or more tracks and bit densities as high as 12,000 bits per inch on 600 feet of tape. That means capacity increases of 2,000 percent packed into the same cartridge.



The reasons that yesterday's cartridge technology simply won't work properly in today's high capacity drives is inherent in the cartridge design. The three culprits that make cartridge tolerances so important are fluctuating tape tension, redeposit nodules, and instantaneous speed variations (or ISV).

Tape Tension

Tape tension at the read-write head is important because the tape drive's electronics expect data to arrive at a constant rate. Consistent tape tension is a function of the cartridge tensioning mechanism. The new Cartrex cartridge tensioning design, based on a mechanical differential between two stiff belts, provides very predictable results. The historic 3M design—used by 3M and DEI—uses an elastic belt coupled with drag friction at the rear pulley to create tension. The accompanying graph shows the significant improvement the Cartrex cartridge design offers over the conventional design.

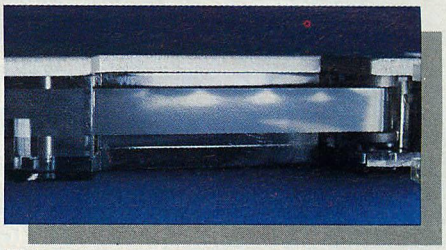
The Cartrex cartridge provides predictable and stable tension. Compare it to the tension variation of the conventional cartridge design. The consistent Cartrex tension virtually eliminates data errors and data loss from head-to-tape separation and redeposit nodules that can occur with fluctuating, low-to-high tension performance.

The new Cartrex ¼-inch tape cartridge is the first new tape cartridge design in almost a decade and a half. Tape drive manufacturers now have a new cartridge technology which allows them to advance today's and tomorrow's drive performance.

Redeposit Nodules

Redeposit nodules are the insidious flakes of tape media that break off from the edges of the tape and get dragged to the edge of the read-write head. If the tension is low, or becomes low when the tape starts or reverses, the flakes slide past the edge, get smeared across the head, and reduce its ability to read data.

The free play in the two tape reels combined with the tape guides are the primary culprits in creating these redeposit nodules. As the tape enters the guide from the tape pack, the tape guide aligns the tape by balancing the tension at the edges of the tape. Uneven edge tension not only causes media to flake off causing redeposit nodules, but data is lost due to the "coining" or "scalloping" effect.



Cartrex eliminated the cause of the tape coining or scalloping with a barrel-shaped roller placed in front of the tape guide. The roller positions the tape and drops the edge tension to zero. By using this roller, the possibility of media flaking off and creating redeposit nodules is virtually eliminated.

Instantaneous Speed Variation (ISV)

Instantaneous speed variation is exactly what it sounds like—small, instantaneous changes in tape speed as it crosses the tape head. At slow tape speeds and low bit densities—like the 1971 standard of 30 inches per second and 1,600 bits per inch—ISV wasn't as big a problem. At that time, the bits were crossing the head at 48,000 bits per second.

Today, however, the story has changed. Ninety inches per second and 8,000 bits per inch mean that 720,000 bits cross the head every second. A 1,500% increase. As you may have guessed, 1971 speed fluctuations in the 48,000 bits per second range made reading data difficult for tape drive electronics. But today, when the electronics have to guess whether or not the bit rate of 720,000 bits per second is accurate, the electronics can become overwhelmed.

The Cartrex tensioning mechanism relieves the overload placed on the electronics with respect to ISV. The longitudinally stiff belts ensure tension at all times. The stiff belt overpowers variations that exist with the 3M elastic belt cartridges. The barrel roller guides, in addition to reducing the edge pressure to zero, tend to dampen out any residual ISV effects.

High speed tape seldom enters tape guides parallel to the top and bottom, even with improvements to the tape reel hub designs. The edge pressures which result create "scalloping" or "coining" on the tape. The effect is data loss due to head-to-tape separation, flaking media that smears across the head, and "redeposit nodules" that create hard errors.

Never a Single Issue

Your tape drive seldom has the luxury of dealing with an isolated problem. It's usually a combination of ISV, redeposit nodules, and tension problems all together. Now you understand why Cartrex developed a modern cartridge alternative.

Where to get it

Not only has Cartrex improved on the industry's 15 year old technology, they have done it for a competitive price.

Now you can have peace of mind when you back up your hard disk on today's sophisticated tape drives.

And you can have it fast. Simply phone and give Cartrex your purchase order number or your credit card number and they will send your cartridges by return mail.

The first real alternative in ¼-inch tape cartridges™

CIRCLE NO. 271 ON READERS SERVICE CARD

A New Micro Sub

The Smallest Tape Subsystem Available Today.

The new IRWIN 400 Series micro subsystem is so small you probably won't even notice it sitting next to your computer. IRWIN's *little* (3″ by 5″ by 8″) technological breakthrough, stores up to 40 Mb of data on a shirt pocket-sized cartridge. That's *BIG* protection for your IBM PC/XT, PC/AT or compatibles.

The new 400 Series provides backup capacities of 10 Mb, 20 Mb or 40 Mb. So you only pay for exactly what you need. And with IRWIN, compatibility is assured when your backup requirements grow. Our larger capacity tape drives can read your important files written on any other IRWIN drive.

You'll find that the cost of an IRWIN 400 is small too. The first time you need to restore data with any of the 400 Series, it will more than pay for itself.

One function, even easier than installing an IRWIN 400, is operating the menu-driven software. The IRWIN software permits unattended backup of your entire disk or only those files you choose. And it's fast. You can backup 40 Mb in the time it takes to say ABRA-CA-DABRA. Well-l-l . . . Maybe several ABRA-CA-DABRA's.

The only way to take up less space than with an IRWIN 400 is to install an Irwin BACKUP™ right inside your PC . . . we do that too! IRWIN has 10 Mb, 20 Mb and 40 Mb internal systems that slide right into a PC's floppy disk slot, providing you with a "zero" footprint for your backup needs.

The new 400 Series, extremely small in size yet large in capacity . . . a little more magic from Irwin.

Unlike magicians, Irwin wants you to know how it's done. To find out, call 1-800-BACKUP 1 or visit a leading computer store for a "hands on" demonstration.

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ QuadTape 60 MB
Streamer Density: 8,000 bpi Read speed: 90 ips Support equip: Cables; Software Introduced: 1985 Cost: $1,795

SDM CONTROL CORP.

☐ SDM-100
Streamer Tracks: 9 Density: 1,600 bpi; 6,250 bpi Read speed: 100 ips Rewind speed: 100 ips Tape width: ¼ in. Support equip: Cables; Software Units sold: 100 since 1984 Cost: $1,995

SIGMA DESIGNS, INC.
SEE AD ON COVER 4

☐ FasTrack
Tracks: 9; 4 Read speed: 90 ips Tape width: ¼ in.; 1/8 in. Cost: $999-$1,399

SYSGEN, INC. (CA)

☐ Sysgen Smart QIC-FILE
Reviewed Nov 1985 p. 62.
Streamer Tracks: 9 Density: 8,000 bpi Read speed: 90 ips Rewind speed: 90 ips Tape width: ¼ in. Support equip: Cables; Software; Interface card Units sold: 23,000 since 1984 Cost: $1,395-$1,495

TALLGRASS TECHNOLOGIES CORP.
SEE AD ON PAGE 137

☐ TG-1020e
Streamer Tracks: 12 Density: 10,000 bpi Read speed: 75 ips Tape width: ¼ in. Units sold: 1,000 since 1986 Cost: $1,295

☐ TG-1020i
Streamer Tracks: 12 Density: 10,000 bpi Read speed: 75 ips Tape width: ¼ in. Units sold: 15,000 since 1986 Cost: $995

☐ TG-4060
Reviewed Nov 1985 p. 62.
Streamer Tracks: 11 Density: 12,000 bpi Read speed: 75 ips Rewind speed: 75 ips Tape width: ¼ in. Support equip: Cables; Software; ROM Units sold: 20,000 since 1984 Cost: $1,995

TECMAR, INC.

☐ Q60AT
Streamer Tracks: 9 (serpentine) Density: 8,192 Read speed: 90 ips Tape width: ¼ in. Cost: $1,695

☐ Q60H
Reviewed Nov 1985 p. 62.
Streamer Tracks: 4 Density: 10,000 bpi Read speed: 90 ips Rewind speed: 90 ips Tape width: ¼ in. Introduced: 1985 Cost: $2,144

TELEBYTE TECHNOLOGY, INC.
Remark Datacom Division

☐ Packetape
Tracks: 16 Read speed: 60 ips Rewind speed: 90 ips Tape width: ¼ in. Support equip: Software Introduced: 1985 Cost: $3,000

TW TECHNOLOGIES, INC.

☐ HTTape-IRW 110
Streamer Tracks: 8 Density: 6,400 bpi Read speed: 39 ips Rewind speed: 70 ips Tape width: ¼ in. Support equip: Cables; Software Units sold: 3,000 since 1984 Cost: $425

☐ HTTape-SIG60
Streamer Tracks: 9 Density: 6,400 bpi Read speed: 90 ips Rewind speed: 90 ips Tape width: ¼ in. Support equip: Cables; Software Units sold: 1,000 since 1985 Cost: $1,125

WANGTEK, INC.

☐ Model 5000E
Streamer Tracks: 9; 4 Density: 8,000 bpi Read speed: 90 ips Rewind speed: 90 ips Tape width: ¼ in. Support equip: Cables; Software Units sold: 65,000 since 1983 Cost: $878 (qty. 500)

ZETRATEC CORP.

☐ ZEKE-XT
Tracks: 6 Density: 6,400 bpi Read speed: 78 ips Rewind speed: 78 ips Tape width: ¼ in. Support equip: Software Units sold: 200 since 1984 Cost: $1,295

CASSETTE

ANALOG AND DIGITAL PERIPHERALS, INC. (ADPI)

☐ LG-1/2
Tracks: 2 Density: 800 bpi Read speed: 18 ips Rewind speed: 18 ips Tape width: ¼ in. Introduced: 1981 Cost: $399-$539

☐ Mega Byte Bucket
Tracks: 2 Density: 800 bpi; 1,600 bpi Read speed: 25 ips Rewind speed: 45 ips Tape width: ¼ in. Introduced: 1980 Cost: $795-$1,150

BRAEMAR CORP.

☐ CS400 Series
Tracks: 2 Density: 800 bpi Read speed: 10 ips; 15 ips; 20 ips Rewind speed: 75 ips Tape width: 0.15 in. Units sold: 22,000 since 1975 Cost: $405

☐ Pro-Loader II
Tracks: 2 Density: 800 bpi Read speed: 3 ips; 6 ips Rewind speed: 15 ips Tape width: 0.15 in. Units sold: 6,000 since 1982 Cost: $425

DATA TECHNOLOGY CORP.

☐ BackStop 1
Tracks: 4 (serpentine) Read speed: 90 ips Support equip: Cables; Software Introduced: 1985 Cost: $895-$1,095

☐ BackStop 2
Tracks: 4 (serpentine) Read speed: 90 ips Support equip: Cables; Software Introduced: 1985 Cost: $895-$1,095

☐ BackStop 3
Tracks: 4 (serpentine) Read speed: 90 ips Support equip: Cables; Software Introduced: 1985 Cost: $895-$1,095

DIGITAL STORAGE SYSTEMS, INC.

☐ ARC 8020 Continuous Backup
Streamer Tracks: 9 (serpentine) Density: 8,000 bpi Read speed: 90 ips Rewind speed: 90 ips Support equip: Cables; Software; Host Adapter; Real-time backup Introduced: 1986 Cost: $1,695

EVEREX SYSTEMS, INC.

☐ Excel Stream-20
Streamer Tracks: 4 Density: 8,000 bpi Read speed: 90 ips Rewind speed: 90 ips Tape width: 0.15 in. Support equip: Cables; Software Introduced: 1985 Cost: $895

GENOA SYSTEMS CORP.
SEE AD ON PAGE 189

☐ Model 3120/3220
Streamer Tracks: 4 Read speed: 90 ips Introduced: 1985 Cost: $1,095

MAGNETIC MEMORY CORP.

☐ ST/20
Streamer Tracks: 4 Read speed: 90 ips Rewind speed: 90 ips Support equip: Cables; Software Units sold: 2,200 since 1985 Cost: $795

MEMODYNE CORP.

☐ M-80
Tracks: 2 Density: 800 bpi; 615 bpi Read speed: 20 ips Rewind speed: 100 ips Tape width: 0.15 in. Introduced: 1979 Cost: $1,845-$2,650

PORTABLE SOLUTIONS, INC.

☐ BP-25+ Cassette Tape
Streamer Tracks: 4 Read speed: 90 ips Rewind speed: 90 ips Tape width: ¼ in. Support equip: Software Units sold: 1,000 since 1985 Cost: $1,395

☐ BP-45 Cassette Tape
Streamer Tracks: 9 Read speed: 90 ips Tape width: ¼ in. Introduced: 1986 Cost: $1,695

☐ BP-45+ Cassette Tape
Streamer Tracks: 9 (serpentine) Read speed: 90 ips Rewind speed: 90 ips Tape width: ¼ in. Support equip: Software Introduced: 1985

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ QuadTape 20 MB
Streamer Density: 8,000 bpi Read speed: 90 ips Support equip: Cables; Software Introduced: 1985 Cost: $1,095

SAYLOR ELECTRONICS INTERNATIONAL, INC.

☐ Model 4000-500
Tracks: 2 Density: 1,600 bpi Read speed: 30 ips Rewind speed: 120 ips Tape width: 0.15 in. Support equip: Software Units sold: 150 since 1978 Cost: $3,985

☐ Model 4000-500-4
Tracks: 4 (serpentine) Density: 3,200 bpi Read speed: 30 ips Rewind speed: 120 ips Tape width: 0.15 in. Support equip: Cables Units sold: 250 since 1981 Cost: $6,450

SYSGEN, INC. (CA)

☐ Sysgen Smart Image
Streamer Tracks: 4 Density: 8,000 bpi Read speed: 90 ips Rewind speed: 90 ips Tape width: 1/8 in. Support equip: Cables; Software; Interface card Units sold: 34,000 since 1983 Cost: $795-$895

MONITORS

AMDEK CORP.
(subsidiary of Wyse Technology Corp.)

☐ Color 600
RGB monitor Screen size: 13 inch Phosphor: P22 Horizontal resolution: 640 dots Vertical resolution: 240 lines Packaging: Cabinet enclosure Support equip: Cables Units sold: 50,000 since 1984 Cost: $599

☐ Color 722
RGB; Dual-mode monitor Screen size: 13 inch Phosphor: P22 Horizontal resolution: 720 dots Vertical resolution: 240 or 350 lines Character matrix: 8 X 14; 8 X 8 Packaging: Cabinet enclosure Support equip: Cables Units sold: 7,000 since 1985 Cost: $799

☐ Color 730
RGB monitor Screen size: 13 inch Phosphor: P22 Horizontal resolution: 720 dots Vertical resolution: 480 lines (non-interlaced) Character matrix: 8 X 14 Packaging: Cabinet enclosure Support equip: Cables Introduced: 1986 Cost: $1,099

☐ Video 300A
Monochrome monitor Screen size: 12 inch Phosphor: Amber Horizontal resolution: 800 lines (corner) Vertical resolution: 960 lines (center) Packaging: Cabinet enclosure Support equip: Cables Units sold: 230,000 since 1982 Cost: $199

☐ Video 300G
Monochrome monitor Screen size: 12 inch Phosphor: Green (P31) Horizontal resolution: 800 lines (corner) Vertical resolution: 960 lines (center) Packaging: Cabinet enclosure Support equip: Cables Units sold: 230,000 since 1981 Cost: $179

Grasshopper.®

Fast, Automatic Tape Backup for $895.

20 or 40 Megabyte. Nowadays, tape backup comes in a lot of packages with a lot of promises. But many manufacturers have compromised for the sake of economy, in ways that are revealed only when the backup system fails to do its job. Those are the kind of bugs you don't want.

The Grasshopper is the one bug you need. Not a compromise. Simply superior technology. And this superiority translates to more convenience, more capability, more absolute dependability than you will find anywhere, at any price.

Automatic. The Grasshopper alone offers genuinely automatic, unattended backup. Every few minutes, when the operator is away from the keyboard, Tallgrass BackTrack® software checks your disk files for changes and automatically updates your backup tape.

BackTrack automatic backup is only one of the half-dozen backup options included in Grasshopper's menu. And with its 750 Kb/s data transfer rate, 50% faster than other budget alternatives, the Grasshopper gets its job done without interrupting workflow.

All this capability fits in a half-height floppy bay, or a zero-footprint external unit that fits neatly beside your monitor. A companion hard disk is available for both the internal and external models.

Totally reliable. Inside this trim package are all the error-detecting and correcting capabilities that made Tallgrass the industry leader. Our unique Data Reconstruction Code™ means your backup will be there to back you up. Every bit.

You get this technology in Tallgrass' dedicated tape controller card that maximizes the capability and reliability of cartridge tape. Others omit this tape controller card and treat tape like a floppy disk. That's a dangerous shortcut.

The first time you call on tape backup to restore data, you'll know how important absolute dependability is. We just want you to know how convenient and affordable the Grasshopper has made it. Call (800) 228-DISK for complete information, and the name of the Tallgrass dealer nearest you.

MITSUBA CORP.

☐ Model 160A
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Chocolate; Green **Horizontal resolution:** 1,000 lines (center) **Vertical resolution:** 800 lines (corner) **Packaging:** Cabinet enclosure **Introduced:** 1985

☐ Model 300C
Color monitor **Screen size:** 14 inch **Horizontal resolution:** 380 dots **Vertical resolution:** 262 lines **Packaging:** Cabinet enclosure

☐ Model 500 A/G
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Green

☐ Model 510A
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Green **Horizontal resolution:** 1,000 lines (center) **Vertical resolution:** 800 lines (corner) **Packaging:** Cabinet enclosure **Introduced:** 1985 **Cost:** $169

☐ Model 700C
Color monitor **Screen size:** 12 inch **Horizontal resolution:** 510 dots **Vertical resolution:** 262 lines **Character block:** 8 x 8 dots **Packaging:** Cabinet enclosure

☐ Model 800H
RGB; Color monitor **Screen size:** 14 inch **Horizontal resolution:** 720 dots **Vertical resolution:** 240 lines (non-interlaced); 480 lines (interlaced) **Character block:** 8 x 8 dots **Packaging:** Cabinet enclosure

☐ Model 800M
Monochrome; Color monitor **Screen size:** 14 inch **Horizontal resolution:** 380 dots **Vertical resolution:** 262 lines **Packaging:** Cabinet enclosure

MITSUBISHI ELECTRONICS AMERICA, INC.

☐ XC-1409C
Color monitor **Screen size:** 13 inch **Phosphor:** P22 **Horizontal resolution:** 640 dots **Vertical resolution:** 200 lines **Packaging:** Cabinet enclosure **Introduced:** 1985

☐ XC-1412C
Color monitor **Screen size:** 13 inch **Horizontal resolution:** 640 dots **Vertical resolution:** 400 or 480 lines **Packaging:** Chassis **Introduced:** 1985

MONITERM CORP.

☐ VY-20 Series
Monochrome monitor **Screen size:** 19 inch **Horizontal resolution:** 1,100 pixels **Vertical resolution:** 1,300 pixels **Packaging:** Cabinet enclosure **Introduced:** 1985 **Cost:** $1,500

NANAO USA CORP.

☐ 3030 Series
Monochrome monitor **Screen size:** 12 inch **Horizontal resolution:** 800 dots **Vertical resolution:** 350 lines **Introduced:** 1986 **Cost:** $230-$243

☐ 8030 Series
Color monitor **Screen size:** 14 inch **Horizontal resolution:** 640 dots **Vertical resolution:** 262 lines **Introduced:** 1986 **Cost:** $548-$781

☐ 8040 Series
Color monitor **Screen size:** 14 inch **Horizontal resolution:** 800 dots **Vertical resolution:** 410 lines **Introduced:** 1986 **Cost:** $795-$815

NEC HOME ELECTRONICS (U.S.A.), INC.
Personal Computer Products Division

☐ JB1270MA
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Green (P31) **Horizontal resolution:** 800 dots **Vertical resolution:** 200 lines **Packaging:** Cabinet enclosure **Support equip:** (optional) cable **Introduced:** 1985 **Cost:** $179

☐ JB1275MA
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber **Horizontal resolution:** 800 dots **Vertical resolution:** 200 lines **Character block:** 8 x 8 dots **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Support equip:** (optional) cable **Introduced:** 1985 **Cost:** $179

☐ JB1280DA; JB1285DA
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Green (P39) **Horizontal resolution:** 720 dots **Vertical resolution:** 350 lines **Packaging:** Cabinet enclosure **Support equip:** Cables **Introduced:** 1985 **Cost:** $219

☐ JC1216DFA
RGB monitor **Screen size:** 12 inch **Horizontal resolution:** 640 dots **Vertical resolution:** 240 or 280 lines **Character block:** 8 x 8 dots **Packaging:** Cabinet enclosure **Support equip:** (optional) cables **Introduced:** 1983 **Cost:** $549

☐ JC1401P3A MultiSync
Color monitor **Screen size:** 13 inch; 14 inch **Phosphor:** B22 **Horizontal resolution:** 800 dots **Vertical resolution:** 560 lines **Packaging:** Cabinet enclosure **Support equip:** Cables **Introduced:** 1986 **Cost:** $799

PANASONIC INDUSTRIAL CO.
Computer Products Division

☐ BT-P4500D
RGB monitor **Screen size:** 45 inch **Phosphor:** Green **Horizontal resolution:** 640 pixels **Vertical resolution:** 240 pixels **Packaging:** Cabinet enclosure **Introduced:** 1984 **Cost:** $4,995

☐ DT-H103
RGB monitor **Screen size:** 10 inch **Phosphor:** P22 **Horizontal resolution:** 640 pixels **Vertical resolution:** 480 pixels **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Introduced:** 1984 **Cost:** $579

☐ TX-12H3P
RGB monitor **Screen size:** 12 inch **Horizontal resolution:** 640 pixels **Vertical resolution:** 200 pixels **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Introduced:** 1985 **Cost:** $619

PERSONAL TOUCH CORP.

☐ TouchMonitor 14
Monochrome monitor **Screen size:** 14 inch **Phosphor:** Amber; Green (P39) **Packaging:** Cabinet enclosure **Units sold:** 2,000 since 1985 **Cost:** $498

PORTABLE TECHNOLOGY CORP.

☐ Model 6420-A
Monochrome monitor **Screen size:** 7 inch **Horizontal resolution:** 640 pixels **Vertical resolution:** 200 pixels **Character matrix:** 5 x 7 dots **Support equip:** Cables **Introduced:** 1985 **Cost:** $595

☐ Model 6420-B
Monochrome monitor **Screen size:** 10 inch **Horizontal resolution:** 640 pixels **Vertical resolution:** 200 pixels **Character matrix:** 5 x 7 dots **Support equip:** Cables **Introduced:** 1985 **Cost:** $675

PRINCETON GRAPHIC SYSTEMS
(division of Intelligent Systems Co.)

☐ HX-12
Color monitor **Screen size:** 12 inch **Phosphor:** P22 **Horizontal resolution:** 640 or 690 pixels **Vertical resolution:** 200 or 240 lines (non-interlaced) **Character block:** 8 x 8 dots **Character matrix:** 5 x 7 dots **Packaging:** Rack-mounted; Cabinet enclosure **Support equip:** Cables **Introduced:** 1982 **Cost:** $695

☐ HX-12E
Color monitor **Screen size:** 12 inch **Phosphor:** P22 **Horizontal resolution:** 640 or 770 pixels **Vertical resolution:** 200 or 350 lines (non-interlaced) **Character block:** 8 x 8 dots; 8 X 16 **Character matrix:** 5 x 7 dots; 5 X 14 **Packaging:** Rack-mounted; Cabinet enclosure **Support equip:** Cables **Introduced:** 1985 **Cost:** $785

☐ HX-9E
Color monitor **Screen size:** 9 inch **Phosphor:** P22 **Horizontal resolution:** 640 or 770 pixels **Vertical resolution:** 200 or 350 lines (non-interlaced) **Character block:** 8 x 8 dots; 8 X 16 **Character matrix:** 5 x 7 dots; 5 X 14 **Packaging:** Rack-mounted; Cabinet enclosure **Support equip:** Cables **Introduced:** 1986 **Cost:** $750

☐ MAX-12
Amber (P134) monitor **Screen size:** 12 inch **Phosphor:** Amber **Horizontal resolution:** 720 or 640 pixels **Vertical resolution:** 350 or 200 lines (non-interlaced) **Character block:** 7 x 9 **Character matrix:** 9 x 14 dots **Packaging:** Rack-mounted; Cabinet enclosure **Support equip:** Cables **Introduced:** 1984 **Cost:** $249

☐ SR-12
Color monitor **Screen size:** 12 inch **Phosphor:** P22 **Horizontal resolution:** 640 or 690 pixels **Vertical resolution:** 400 or 480 lines (non-interlaced) **Character block:** 8 x 16 **Character matrix:** 7 x 14 dots **Packaging:** Rack-mounted; Cabinet enclosure **Support equip:** Cables **Introduced:** 1984 **Cost:** $799

☐ SR-12P
Color monitor **Screen size:** 12 inch **Phosphor:** P22 **Horizontal resolution:** 640 or 830 pixels **Vertical resolution:** 480 lines (non-interlaced) **Character block:** 8 X 16 **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Support equip:** Cables **Introduced:** 1985 **Cost:** $999

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ Quadchrome Enhanced Display
Monochrome monitor **Screen size:** 13 inch **Horizontal resolution:** 640 pixels **Vertical resolution:** 350 pixels **Packaging:** Cabinet enclosure **Cost:** $795

☐ Quadchrome II
RGB monitor **Screen size:** 12 inch **Horizontal resolution:** 690 dots **Vertical resolution:** 480 dots

☐ Quadchrome II CH8410
RGB monitor **Screen size:** 14 inch **Horizontal resolution:** 640 dots **Vertical resolution:** 240 dots **Character block:** 8 x 8 dots **Character matrix:** 8 x 8 **Packaging:** Cabinet enclosure **Introduced:** 1984 **Cost:** $595

☐ Quadscreen QS 8500
Monochrome monitor **Screen size:** 17 inch **Phosphor:** Green (P4); Green (P39); White **Horizontal resolution:** 968 dots **Vertical resolution:** 512 lines **Character block:** 8 x 8 dots **Character matrix:** 5 x 7 dots; 11 X 9 **Packaging:** Cabinet enclosure **Support equip:** Cables; Software **Introduced:** 1983 **Cost:** $1,995

QUIMAX SYSTEMS, INC.

☐ DM 14A
Monochrome monitor **Screen size:** 13 inch **Phosphor:** Amber **Horizontal resolution:** 750 dots **Vertical resolution:** 350 lines **Character block:** 7 X 9 **Character matrix:** 7 x 9 dots **Packaging:** Cabinet enclosure **Introduced:** 1984 **Cost:** $219

☐ DM 14G
Monochrome monitor **Screen size:** 13 inch **Phosphor:** Green (P39) **Horizontal resolution:** 750 dots **Vertical resolution:** 350 lines **Character block:** 8 X 8 **Character matrix:** 7 x 9 dots **Packaging:** Cabinet enclosure **Introduced:** 1984 **Cost:** $219

☐ PX-II
Color monitor **Screen size:** 13 inch **Phosphor:** P22 **Horizontal resolution:** 560 dots **Vertical resolution:** 240 TV lines **Character block:** 8 x 8 dots **Character matrix:** 8 X 8 **Packaging:** Cabinet enclosure **Introduced:** 1984 **Cost:** $579

☐ PX-IV
Color monitor **Screen size:** 13 inch **Phosphor:** P22 **Horizontal resolution:** 720 dots **Vertical resolution:** 240 TV lines **Character block:** 8 x 8 dots **Character matrix:** 7 x 9 dots **Packaging:** Cabinet enclosure **Introduced:** 1985 **Cost:** $649

☐ PX-22
RGB monitor **Screen size:** 13 inch **Phosphor:** P22 **Horizontal resolution:** 720 dots **Vertical resolution:** 350 lines **Character block:** 8 x 8 dots **Character matrix:** 8 X 14 **Packaging:** Cabinet enclosure **Introduced:** 1986 **Cost:** $729

☐ PX-32
Color monitor **Screen size:** 13 inch **Phosphor:** P22 **Horizontal resolution:** 720 dots **Vertical resolution:** 480 lines **Character matrix:** 7 x 9 dots **Packaging:** Cabinet enclosure **Introduced:** 1986 **Cost:** $899

ROLAND DG
(division of Roland Corp. US)

☐ CC-121
Color monitor **Screen size:** 12 inch **Horizontal resolution:** 640 dots **Vertical resolution:** 200 lines **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Cost:** $599

☐ CD-240
Color monitor **Screen size:** 12 inch **Horizontal resolution:** 720 dots **Vertical resolution:** 400 lines (non-interlaced) **Cost:** $795

☐ MB-142
Black/white monitor **Screen size:** 14 inch **Horizontal resolution:** 720 **Vertical resolution:** 350 **Introduced:** 1985 **Cost:** $375

SAKATA USA CORP.

☐ SA1000
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber **Horizontal resolution:** 900 dots (center) **Vertical resolution:** 800 dots (corner) **Character block:** 9 X 10 dots **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Introduced:** 1984 **Cost:** $159

☐ SC100
Color monitor **Screen size:** 13 inch **Horizontal resolution:** 280 lines **Vertical resolution:** 300 lines **Character block:** 7 x 12 dots **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Introduced:** 1983 **Cost:** $299

☐ SC200
RGB monitor **Screen size:** 13 inch **Horizontal resolution:** 640 dots **Vertical resolution:** 240 lines **Character block:** 7 x 9 dots **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Introduced:** 1983 **Cost:** $599

☐ SG1000
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Green (P31) **Horizontal resolution:** 900 dots (center) **Vertical resolution:** 800 dots (corner) **Character block:** 9 x 10 dots **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Introduced:** 1983 **Cost:** $149

SAMPO CORP. OF AMERICA
Industrial Products Division

☐ KDS-1322; KDS-1332; KDS-1342
Color monitor **Screen size:** 13 inch **Introduced:** 1985

SAMSUNG ELECTRONICS AMERICA, INC.

☐ CD-1452F
Color monitor **Screen size:** 14 inch **Horizontal resolution:** 700 dots **Vertical resolution:** 225 lines **Character block:** 17 X 10 **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure

☐ CP-1251F
RGB monitor **Screen size:** 12 inch **Horizontal resolution:** 615 dots **Vertical resolution:** 225 lines **Character block:** 7 X 10 **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure

☐ MD-1254G
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Green (P39) **Horizontal resolution:** 80 **Packaging:** Cabinet enclosure

☐ MD-1277D
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Green (P31); Green (P39); P4 **Character block:** 7 X 10 **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure

SANYO BUSINESS SYSTEMS CORP.
(Computer Division)

☐ CRT-40
Monochrome monitor Screen size: 12 inch Phosphor: Green (P39) Horizontal resolution: 720 dots Vertical resolution: 350 dots Character matrix: 9 x 14 dots Packaging: Cabinet enclosure Support equip: Cables Units sold: 2,000 since 1985 Cost: $209

☐ CRT-41
Monochrome monitor Screen size: 12 inch Phosphor: Amber Horizontal resolution: 720 dots Vertical resolution: 350 dots Character matrix: 9 x 14 dots Packaging: Cabinet enclosure Support equip: Cables Introduced: 1985 Cost: $209

☐ CRT-80
Color monitor Screen size: 12 inch Phosphor: P22 Horizontal resolution: 540 dots Vertical resolution: 200 dots Character matrix: 8 x 8 Packaging: Cabinet enclosure Support equip: Cables Units sold: 2,000 since 1985 Cost: $599

☐ CRT-88
Color monitor Screen size: 12 inch Phosphor: P22 Horizontal resolution: 640 dots Vertical resolution: 200 dots Character matrix: 8 x 8 Packaging: Cabinet enclosure Support equip: Cables Introduced: 1985 Cost: $699

SDM CONTROL CORP.

☐ SDM XL-100
Color monitor Screen size: 13 inch Phosphor: Amber; Blue; Green (P4) Horizontal resolution: 640 dots Vertical resolution: 200 dots Character block: 9 x 12 dots Character matrix: 7 x 9 dots Packaging: Rack-mounted Units sold: 200 since 1984 Cost: $1,395

SHARP ELECTRONICS CORP.
Systems Division

☐ 12M-15BU; 12M-15BUA
Monochrome monitor Screen size: 12 inch Phosphor: Amber; Green Horizontal resolution: 640 dots Vertical resolution: 200 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Introduced: 1984 Cost: $155 (12M-15BU); $165 (12M-15BUA)

☐ 12M-22U
RGB monitor Screen size: 12 inch Phosphor: P22 Horizontal resolution: 640 dots Vertical resolution: 200 dots Character block: 9 X 14 Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Introduced: 1984 Cost: $549

☐ 13M-31U
Color monitor Screen size: 13 inch Phosphor: P22 Horizontal resolution: 280 dots Vertical resolution: 350 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Introduced: 1984 Cost: $339

SONY CORPORATION OF AMERICA
Microcomputer Products Division

☐ CPD-1201
Color monitor Screen size: 12 inch Horizontal resolution: 800 dots Vertical resolution: 240 dots Introduced: 1985

☐ CPD-9000
Color monitor Screen size: 9 inch Horizontal resolution: 640 dots Vertical resolution: 240 dots Introduced: 1985

☐ KV-1311CR
Color monitor Screen size: 13 inch Horizontal resolution: 640 dots Vertical resolution: 200 dots Introduced: 1985

TATUNG CO. OF AMERICA

☐ CM-1360
Color monitor Screen size: 13 inch Phosphor: B22 Horizontal resolution: 640 lines Vertical resolution: 200 lines (non-interlaced) Character block: 8 x 8 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Units sold: 30,000 since 1985 Cost: $595

☐ CM-1365
Color monitor Screen size: 13 inch Horizontal resolution: 640 lines Vertical resolution: 200 lines Packaging: Cabinet enclosure Introduced: 1986 Cost: $625

☐ CM-1370
Color monitor Screen size: 13 inch Phosphor: B22 Horizontal resolution: 720 dots Vertical resolution: 400 lines Character block: 8 x 8 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Units sold: 15,000 since 1985 Cost: $799

☐ CM-1376
Color monitor Screen size: 13 inch Phosphor: B22 Horizontal resolution: 640 (non-interlaced) Vertical resolution: 480 (non-interlaced) Character matrix: 8 X 8 Packaging: Cabinet enclosure Units sold: 1,000 since 1986 Cost: $850

☐ CM-1380
Color monitor Screen size: 13 inch Phosphor: P22 Horizontal resolution: 640 dots Vertical resolution: 200 or 350 lines Character matrix: 5 x 7 dots; 5 X 10 Packaging: Cabinet enclosure Units sold: 5,000 since 1986 Cost: $785

☐ MM-1222A; 1222G
Monochrome monitor Screen size: 12 inch Phosphor: Amber; Green (P39) Horizontal resolution: 800 dots Vertical resolution: 350 dots Character matrix: 10 X 14 dot Packaging: Cabinet enclosure Support equip: Cables Units sold: 25,000 since 1985 Cost: $215 (MM-1222A); $205 (MM-1222G)

☐ MM-1422A; MM-1422G
Monochrome monitor Screen size: 14 inch Horizontal resolution: 800 dots Vertical resolution: 250 lines Packaging: Cabinet enclosure Introduced: 1986 Cost: $269; $249

TAXAN CORP.

☐ Model 115
Monochrome monitor Screen size: 12 inch Phosphor: Green (P31) Horizontal resolution: 1,000 lines (center) Vertical resolution: 262 lines Character block: 6 x 12 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Units sold: 12,000 since 1984 Cost: $180

☐ Model 116
Monochrome monitor Screen size: 12 inch Phosphor: Amber Horizontal resolution: 1,000 lines (center) Vertical resolution: 262 lines Character block: 6 x 12 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Units sold: 14,000 since 1984 Cost: $190

☐ Model 620
RGB monitor Screen size: 12 inch Phosphor: Amber; Green (P31); White Horizontal resolution: 640 lines Vertical resolution: 262 lines Packaging: Cabinet enclosure Support equip: Cables Units sold: 10,000 since 1985 Cost: $595

☐ Model 650
RGB monitor Screen size: 12 inch Horizontal resolution: 800 lines (non-interlaced) Vertical resolution: 400 lines (non-interlaced) Packaging: Cabinet enclosure Introduced: 1986 Cost: $850

☐ Model 740M
RGB monitor Screen size: 16 inch Horizontal resolution: 960 Vertical resolution: 560 Packaging: Cabinet enclosure Introduced: 1986 Cost: $1,300

☐ Models 121; 122
Monochrome monitor Screen size: 12 inch Phosphor: Green (P39); PUL Amber Horizontal resolution: 1,000 lines (center) Vertical resolution: 360 Character block: 7 X 9 Character matrix: 7 x 9 dots Packaging: Cabinet enclosure Support equip: Cables Units sold: 42,000 since 1984 Cost: $205 (Model 121); $215 (Model 122)

☐ Models 630; 635
RGB monitor Screen size: 12 inch Phosphor: Green Horizontal resolution: 640 lines non-interlaced Vertical resolution: 400 lines non-interlaced Character block: 7 X 9 Packaging: Cabinet enclosure Support equip: Cables Units sold: 8,000 since 1985 Cost: $675

TECMAR, INC.

☐ Tecmar Color Monitor
Color monitor Screen size: 13 inch Phosphor: Blue; Green (P39); Red; White Horizontal resolution: 720 Vertical resolution: 480 Character block: 8 x 8 dots Character matrix: 7 x 9 dots Packaging: Cabinet enclosure Introduced: 1985 Cost: $795

TECO AMERICAN, INC.
(subsidiary of Teco Electric & Machinery Co., Ltd.)

☐ TE-5153; TE-5154
Color monitor Screen size: 14 inch Horizontal resolution: 640 Vertical resolution: 200 or 350 Packaging: Cabinet enclosure

☐ TM-1236
Monochrome monitor Screen size: 12 inch Packaging: Cabinet enclosure

TEKNIKA ELECTRONICS CORP.

☐ MJ-10
Color monitor Screen size: 13 inch Horizontal resolution: 300 lines

☐ MJ-22
Color monitor Screen size: 13 inch Horizontal resolution: 506 pixels Vertical resolution: 240 pixels Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Cost: $440

THOMSON CONSUMER PRODUCTS CORP.

☐ CM 31311 SI
RGB monitor Screen size: 12 inch Phosphor: P22 Horizontal resolution: 690 pixels Vertical resolution: 240 dots Character block: 8 x 8 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Introduced: 1985 Cost: $629

☐ CM 31481 VI
Color monitor Screen size: 12 inch Phosphor: P22 Horizontal resolution: 560 pixels Vertical resolution: 240 lines Character block: 8 x 8 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Introduced: 1986 Cost: $449

☐ CM 36311 ID
Color monitor Screen size: 14 inch Phosphor: P22 Horizontal resolution: 720 Vertical resolution: 200 or 350 Character block: 8 x 8 dots; 8 X 14 Character matrix: 5 x 7 dots; 9 x 14 dots; 5 X 10 Packaging: Cabinet enclosure Support equip: Cables Introduced: 1986 Cost: $750

☐ CM 36382 SI
RGB monitor Screen size: 13 inch Phosphor: P22 Horizontal resolution: 640 pixels Vertical resolution: 240 dots Character block: 8 x 8 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: Cables Introduced: 1985 Cost: $549

☐ CM 36512 VI
Color monitor Screen size: 13 inch Phosphor: P22 Horizontal resolution: 560 pixels Vertical resolution: 246 dots Character block: 8 x 8 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Support equip: (optional) Cables Introduced: 1985 Cost: $429

☐ CM 36632 V
Color monitor Screen size: 13 inch Phosphor: P22 Horizontal resolution: 260 pixels Vertical resolution: 300 dots Character block: 8 x 8 dots Character matrix: 5 x 7 dots Packaging: Cabinet enclosure Introduced: 1985 Cost: $249

☐ VM 3101 VG/VA
Monochrome monitor Screen size: 12 inch Phosphor: Amber; Green (P31) Horizontal resolution: 1,000 dots Character block: 12 x 16 dots Character matrix: 9 x 14 dots Packaging: Cabinet enclosure Introduced: 1984 Cost: $139 (green); $149 (amber)

☐ VM 3102 IG/IA
Monochrome monitor Screen size: 12 inch Phosphor: Amber; Green (P31) Horizontal resolution: 1,000 or 1,200 dots Character block: 12 x 16 dots Character matrix: 9 x 14 dots Packaging: Cabinet enclosure Support equip: Cables Introduced: 1985 Cost: $169 (green); $179 (amber)

☐ VM 3102 VG/VA
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Green (P31) **Horizontal resolution:** 1,000 dots **Character block:** 12 x 16 dots **Character matrix:** 9 x 14 dots **Packaging:** Cabinet enclosure **Introduced:** 1985

☐ VM 3107 IA/G
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Green (P39) **Horizontal resolution:** 1,000 dots **Vertical resolution:** 1,200 dots **Character block:** 12 x 16 dots **Character matrix:** 9 x 14 dots **Packaging:** Cabinet enclosure **Support equip:** Cables **Introduced:** 1986 **Cost:** $199 (green); $209 (amber)

☐ VM 3801 DA/DG
Monochrome monitor **Screen size:** 15 inch **Phosphor:** Amber; Green (P4) **Introduced:** 1986 **Cost:** $249 (DA); $239 (DG)

TORCH GRAPHIC TECHNOLOGY
(subsidiary of Korean Data Systems)

☐ Torch I
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber; Green **Horizontal resolution:** 850 lines **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure

☐ Torch II
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber **Horizontal resolution:** 1,000 lines (center) **Packaging:** Cabinet enclosure

☐ Torch TX-12E
Color monitor **Screen size:** 12 inch **Phosphor:** B22 (RGB) **Horizontal resolution:** 640 lines **Vertical resolution:** 350 lines **Character block:** 8 x 8 dots **Character matrix:** 8 X 8 **Packaging:** Cabinet enclosure

TOSHIBA AMERICA, INC.
Information Systems Division

☐ P12MX 00

Monochrome monitor **Screen size:** 14 inch **Horizontal resolution:** 720 dots **Vertical resolution:** 350 lines **Packaging:** Cabinet enclosure **Introduced:** 1985 **Cost:** $235

☐ WY-630
Color monitor **Screen size:** 14 inch **Horizontal resolution:** 640 dots **Vertical resolution:** 200 lines **Packaging:** Cabinet enclosure **Introduced:** 1985 **Cost:** $595

XTRON COMPUTER EQUIPMENT CORP.

☐ IA12X/IG12X
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Green (P39); Amber (H8) **Horizontal resolution:** 1,000 lines (center) **Vertical resolution:** 350 lines **Character block:** 9 x 14 **Character matrix:** 7 x 9 dots **Support equip:** Cables **Units sold:** 15,000 since 1984 **Cost:** $169

ZENITH DATA SYSTEMS
(subsidiary of Zenith Electronics Corp.)

☐ CV2562
Color monitor **Screen size:** 25 inch **Phosphor:** P22 **Horizontal resolution:** 450 or 640 lines **Vertical resolution:** 250 or 460 (non-interlaced) **Packaging:** Cabinet enclosure **Support equip:** (optional) cables **Introduced:** 1983 **Cost:** $729

☐ ZVM-1220
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber **Horizontal resolution:** 800 lines (center) **Character block:** 8 X 8 **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Introduced:** 1985 **Cost:** $199

☐ ZVM-1230
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Green (P31) **Horizontal resolution:** 800 lines (center) **Character block:** 8 x 8 dots **Character matrix:** 5 x 7 dots **Packaging:** Cabinet enclosure **Introduced:** 1985 **Cost:** $199

☐ ZVM-1240
Monochrome monitor **Screen size:** 12 inch **Phosphor:** Amber **Horizontal resolution:** 720 pixels **Vertical resolution:** 350 pixels **Character block:** 9 X 14 **Character matrix:** 7 x 9 dots **Packaging:** Cabinet enclosure **Support equip:** Cables **Introduced:** 1985 **Cost:** $229

☐ ZVM-1330
RGB monitor **Screen size:** 13 inch **Phosphor:** P22 **Horizontal resolution:** 640 pixels **Vertical resolution:** 240 pixels **Character block:** 9 X 10 **Character matrix:** 8 X 9 **Packaging:** Cabinet enclosure **Support equip:** Cables **Introduced:** 1985 **Cost:** $649

☐ ZVM-135
RGB monitor **Screen size:** 13 inch **Phosphor:** P22 **Horizontal resolution:** 640 pixels **Vertical resolution:** 240 lines **Packaging:** Cabinet enclosure **Introduced:** 1983 **Cost:** $599

☐ ZVM-1360
RGB monitor **Screen size:** 13 inch **Horizontal resolution:** 640 pixels **Vertical resolution:** 240 pixels (non-interlaced); 480 pixels (interlaced) **Character block:** 9 X 10 **Character matrix:** 8 X 9 **Packaging:** Cabinet enclosure **Support equip:** Cables **Introduced:** 1986 **Cost:** $799

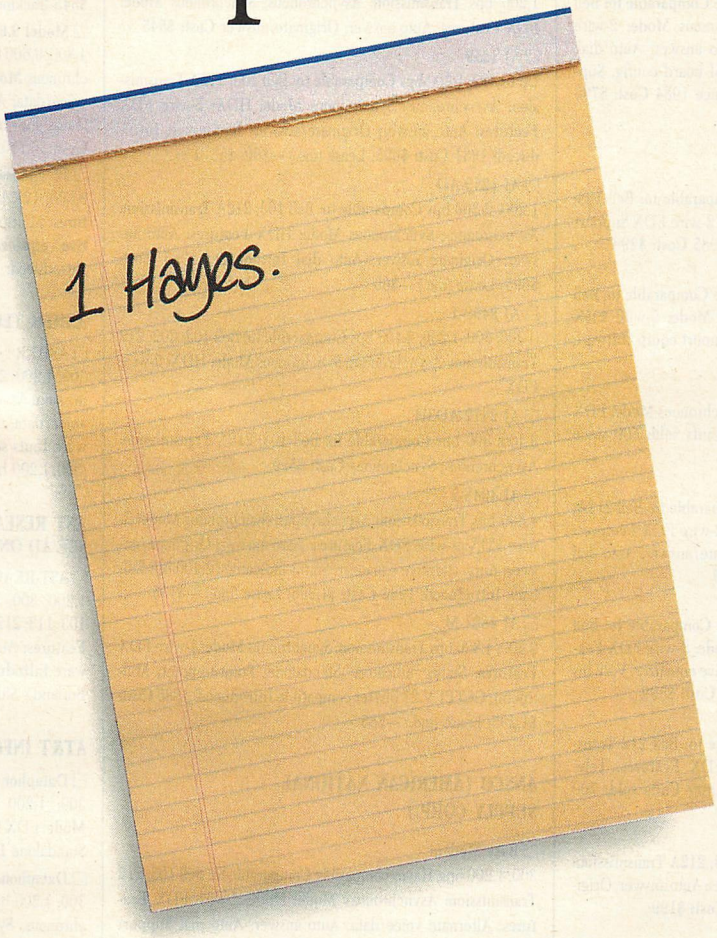
MODEMS

VOICEBAND MODEMS (DDD NETWORK)

ABM COMPUTER SYSTEMS

☐ Bright Modem
300; 1,200 bps; Hayes compatible **Transmission:** Asynchronous **Features:** Auto answer; Auto dial; OEM board config.; Tone and pulse dialing **Introduced:** 1985 **Cost:** $199

ADC
(division of DBX)



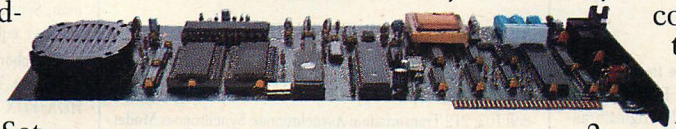
☐ Smart Duck Modem
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Standalone; Tone and pulse dialing **Cost:** $169

AMDAHL COMMUNICATIONS SYSTEMS DIVISION

☐ 1000 Series
1,200; 2,400; 4,800; 7,200; 9,600; 14.4K bps **Features:** Auto. adaptive equalizer; Status indicators; Liquid crystal display; Multipoint; Integral mux **Introduced:** 1985

©1986 Hayes Microcomputer Products, Inc.

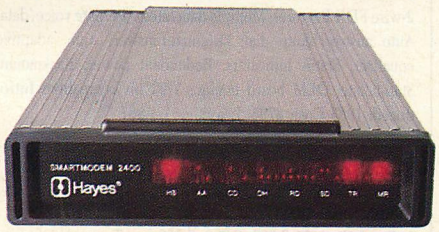
A complete list of things to know about 2400 bps modems.



Now that you've memorized that, here's a partial list of why a Hayes® Smartmodem 2400™ is best for you.

1. The Hayes Smartmodem 2400 allows you to communicate with the vast installed-base of 300, 1200 and 2400 bps "Hayes-compatible" modems. The Hayes Standard "AT" Command Set allows you to use Smartcom II® and other software that communicates.

2. Through synchronous/asynchronous technologies, the Smartmodem 2400 permits your PC to access mainframes, minis, and on-line services previously inaccessible through asynchronous-only modems.



3. The Hayes Smartmodem 2400 is efficient...it pays for itself in just 4 hours of annual use over long distance.

4. The technology of the Smartmodem 2400 allows you to transfer volumes of files with confidence across the city or across the ocean using Bell and CCITT standards.

5. The new Smartmodem 2400B™—a plug-in board for the IBM PC and compatibles—allows synchronous and asynchronous communication through the same Com port.

6. You will also get the Hayes standard 2-year limited warranty and the opportunity to extend the warranty to 4 years.

Best of all...you get Hayes. And that's all you ever really have to know!

For more information or technical specs, contact your authorized Hayes dealer. Or Hayes directly at (404) 441-1617.

Hayes Microcomputer Products, Inc., P.O. Box 105203, Atlanta, Georgia 30348.

Hayes®

Say yes to the future with Hayes.

AMERICAN COMPUTER AND PERIPHERAL, INC.

☐ AM1200B
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 4-wire FDX; 2-wire FDX **Features:** Auto dial

AMERICAN TELEPROCESSING CORP.

☐ Proto.Call
50; 110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 108; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Status indicators; OEM board config. **Support equip** Software **Units sold:** 1,100 since 1984 **Cost:** $795

ANCHOR AUTOMATION, INC.

☐ Express i
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Support equip** Software **Units sold:** 1,500 since 1985 **Cost:** $299

☐ Lightning i
0-300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** CCITT V.22 bis compatible **Support equip** Software **Units sold:** 500 since 1985 **Cost:** $499

☐ Signalman Error-Free
300; 1,200; 2,400 bps **Transmission:** Asynchronous **Mode:** FDX **Features:** Standalone; Error correction **Units sold:** 500 since 1985 **Cost:** $199

☐ Signalman Express
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Auto dial **Units sold:** 35,000 since 1985 **Cost:** $399

☐ Signalman Lightning 24
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; V.22 bis compatible **Units sold:** 1,400 since 1985 **Cost:** $599

☐ Signalman Secure 12
1,200 bps; Hayes compatible **Comparable to:** Bell 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Telephone number directory; Dial-back security **Units sold:** 700 since 1985 **Cost:** $499

☐ Volks Mini
0-300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate only **Units sold:** 1,000 since 1986 **Cost:** $199

☐ Volks Omega 80
300; 1,200 bps **Cost:** $199

☐ Volksmodem 12
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Auto dial **Units sold:** 80,000 since 1984 **Cost:** $299

ANDERSON JACOBSON, INC.

☐ AJ Connection (AJ 1212-2B01/2H01)
Reviewed Sep 1985 p. 60.
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Originate/answer; Status indicators; Tone and pulse dialing; Telephone number storage **Support equip** Software **Introduced:** 1984 **Cost:** $545

☐ AJ Connection II
0-300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212; 202S **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Tone and pulse dialing; CCITT V.22 bis compatible **Support equip** Software **Introduced:** 1986 **Cost:** $650

☐ AJ 1212-AD2
0-300; 1,200 bps **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; 16 telephone number storage; Auto log-on **Introduced:** 1984 **Cost:** $695

☐ AJ 1212-AD3H
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Introduced:** 1986 **Cost:** $499

☐ AJ 1212-ST
300; 1,200 bps **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators **Introduced:** 1984 **Cost:** $495

☐ AJ 1256
1,200 bps **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Originate/answer **Cost:** $545

☐ AJ 1259
Up to 300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Originate/answer; Rackmount **Introduced:** 1981 **Cost:** $695; Lease (mo.) —$60; $55 (1 yr.)

☐ AJ 1259-AD
1,200; 0-300 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX **Features:** Auto answer; Originate/answer; Auto dial **Introduced:** 1983 **Cost:** $695; Lease (mo.) —$60

☐ AJ 2400-T
0-300; 600; 1,200; 2,400 bps **Comparable to:** Bell 103; 202; 212 **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX

☐ AJ 2412-AD3H
2,400; 300 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Cost:** $599

☐ AJ 4048-2
4,800 bps **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX; 4-wire FDX **Features:** Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; 2,400 bps fallback **Introduced:** 1982 **Cost:** $1,995; Lease (mo.) —$135

☐ AJ 4801-M
2,400; 4,800 bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Status indicators; Standalone; Point-to-point; Multipoint; CCITT V.27 bis/ter compatible **Introduced:** 1985 **Cost:** $1,295; Lease (mo.) —$85

ANSCO (AMERICAN NATIONAL SUPPLY CORP.)

☐ Easy Modem
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Alternate voice/data; Auto answer; Auto dial **Support equip** Cables **Introduced:** 1985 **Cost:** $299

☐ Lightning
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 224; 212; 103 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Standalone **Introduced:** 1985 **Cost:** $599

AREA NETWORK PRODUCTS, INC.

☐ 2400 DSM
300; 1,200; 2,400; 4,800 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; Redundant power; Rackmount; Standalone; OEM board config.; V.22 bis compatible **Introduced:** 1985 **Cost:** $795; Lease (mo.) —$87

ARK ELECTRONIC PRODUCTS, INC.

☐ ARK Series 16.0
16K; 14.4K; 12K; 9,600; 8,000; 7,200 bps **Transmission:** Synchronous **Mode:** FDX **Features:** Auto. adaptive equalizer; Status indicators; Rackmount; Standalone **Cost:** $3,750

☐ ARK 24K (for the IBM PC)
300; 600; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103J; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; ARQ error-free data **Introduced:** 1985 **Cost:** $545

☐ ARK 24K Plus
300; 600; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103J; 113 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Standalone; ARQ error-free data; CCITT V.22 bis compatible **Units sold:** 7,500 since 1985 **Cost:** $595 (standalone); $545 (rackmount)

☐ Model 9.6/208B
4,800; 9,600 bps **Comparable to:** Bell 208B **Transmission:** Asynchronous **Mode:** HDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone **Introduced:** 1986 **Cost:** $2,160

☐ 12 Thousand Dial
9,600; 12K bps **Transmission:** Synchronous **Mode:** HDX **Features:** Multiple data rates; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone **Introduced:** 1986 **Cost:** $2,900

ASHER TECHNOLOGIES, INC.

☐ ASHER
300; 1,200; 2,400 bps **Comparable to:** Bell 103A; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto dial; Originate/answer **Support equip** Software **Units sold:** 4,000 since 1984 **Cost:** $495 (300 bps); $595 (300/1,200 bps); $795 (300/1,200/2,400 bps)

AST RESEARCH, INC.

SEE AD ON PAGES 161/172/173/174/175

☐ AST-REACH
1,200; 300; 110 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto dial; Auto answer **Support equip** Cables; Software **Introduced:** 1984 **Cost:** $549 (includes Crosstalk XVI and Borland's Sidekick desktop management software)

AT&T INFORMATION SYSTEMS

☐ Dataphone II Set 2212C
300; 1,200 bps **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Status indicators; Standalone **Introduced:** 1985 **Cost:** $549

☐ Dataphone II Set 2212D
300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Rackmount **Introduced:** 1985 **Cost:** $449

☐ Dataphone II Set 2224
0-300; 1,200; 2,400 bps **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Auto. adaptive equalizer; Auto dial; Rackmount; Standalone; CCITT V.22 bis compatible **Introduced:** 1984 **Cost:** $1,325

☐ Dataphone II Set 2224B
2,400 bps **Comparable to:** Bell 212AR **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto. adaptive equalizer; Standalone **Introduced:** 1984 **Cost:** $999

☐ Dataphone II Set 2248A
4,800 bps **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators; Rackmount; Standalone; Auto. adaptive equalizer; CCITT V.32 compatible **Introduced:** 1985 **Cost:** $2,995

☐ Model 103JR
300 bps **Comparable to:** Bell 103JR **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Standalone; Auto-call interface for Bell System 801-type ACU **Introduced:** 1980

☐ Model 4000
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto dial; Standalone; Tone and pulse dialing **Introduced:** 1985 **Cost:** $500

☐ **Model 4024**
300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Standalone; Auto. adaptive equalizer; Tone and pulse dialing; CCITT V.22 bis compatible **Introduced:** 1986 **Cost:** $750

☐ **Model 4112**
75-300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; OEM board config.; Tone and pulse dialing **Introduced:** 1986 **Cost:** $489

☐ **201C-L1D-Dataphone 2400**
2,400 bps **Comparable to:** Bell 201C **Transmission:** Synchronous **Mode:** HDX **Features:** Auto answer **Introduced:** 1978

☐ **201CR-Dataphone 2400**
2,400 bps **Comparable to:** Bell 201CR **Transmission:** Synchronous **Mode:** HDX **Features:** Auto answer; Standalone; Auto-call interface for Bell System 801-type ACU **Introduced:** 1979

☐ **202SR-Dataphone 1200**
Up to 1,200 bps **Comparable to:** Bell 202SR **Transmission:** Asynchronous **Mode:** HDX **Features:** Reverse channel; Auto answer; Auto-call interface for Bell System 801-type ACU **Introduced:** 1979

☐ **208BR-Dataphone 4800**
4,800 bps **Comparable to:** Bell 208BR **Transmission:** Synchronous **Mode:** HDX **Features:** Auto answer; Auto. adaptive equalizer; Rackmount; Auto-call interface for Bell System 801-type ACU **Introduced:** 1979

☐ **212AR-Dataphone 300/1200**
Up to 300; 1,200 bps **Comparable to:** Bell 212AR **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto-call interface for Bell System 801-type ACU; Auto baud sensing **Introduced:** 1979

AUTOMATED TECHNOLOGY, INC.

☐ **Model 695**
300; 600; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103J; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Rackmount; Standalone **Support equip** Cables **Units sold:** 2,750 since 1984 **Cost:** $895

AVANT INDUSTRIES, INC.

☐ **I-18**
300; 1,200 bps **Mode:** FDX **Cost:** $170

BCH EQUIPMENT CORP.

☐ **Model 48/208AB**
4,800; 2,400 bps **Comparable to:** Bell 208A/B; 201C **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Auto answer; Auto. adaptive equalizer; Rackmount; DDD capability; Auto disconnect; Point-to-point; Multipoint; Auto speed detect **Units sold:** 1,400 since 1980 **Cost:** $1,295-$1,495

☐ **Model 48/27**
4,800; 2,400 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Auto. adaptive equalizer; Rackmount; Private line capability; Point-to-point; Multipoint; V.27 bis/ter compatible; Auto answer/disconnect **Units sold:** 1,000 since 1977 **Cost:** $1,395

BIZCOMP CORP.

☐ **IntelliModem EXT**
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Status indicators; Standalone; Auto redial **Introduced:** 1985 **Cost:** $499

☐ **IntelliModem PC**
110; 300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto dial; Alternate voice/data; Auto answer; IBM PC, XT compatible; Includes communications software; Audio monitor; On-line telephone directory; Telephone line status detection and reporting **Support equip** Software **Introduced:** 1983 **Cost:** $499

☐ **IntelliModem ST**
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial **Support equip** Software **Introduced:** 1984 **Cost:** $499

☐ **IntelliModem XL**
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial **Support equip** Software **Introduced:** 1984 **Cost:** $549

☐ **IntelliModem XT**
Reviewed Sep 1985 p. 60.
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial **Support equip** Software **Introduced:** 1984 **Cost:** $549

☐ **IntelliModem 1012**
110; 300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Originate/answer; Auto answer; Auto dial; Standalone; Program-selectable data rates; Auto repeat dial; Automatic log-on message **Introduced:** 1982 **Cost:** $549

BLACK BOX CORP.

☐ **Modem 1200H**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Features:** Auto answer; Auto dial; Originate/answer; Status indicators; Standalone; Auto disconnect **Cost:** $299

☐ **Modem 201B/C**
2,400 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Cost:** $685

☐ **Modem 208A/B**
4,800 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Cost:** $1,450

☐ **Modem 2400**
2,400; 1,200 bps **Comparable to:** Bell 212A; 201 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Multiple data rates; Originate only; Rackmount; Standalone; CCITT V.26 compatible **Introduced:** 1984 **Cost:** $795 (standalone); $745 (PC card); $825 (sync)

☐ **Modem 2400+**
1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Status indicators; Rackmount; Standalone; Auto log-on; V.22 bis compatible **Cost:** $895

☐ **Modem 2400/1200**
2,400; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Cost:** $660-$785

☐ **Modem 300**
300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Features:** Originate/answer **Cost:** $70

☐ **Modem 300 Auto Answer**
300; Up to 600 bps **Comparable to:** Bell 113; 103 **Transmission:** Asynchronous **Features:** Auto answer; Auto disconnect **Cost:** $100

☐ **Modem 9600**
9,600; 7,200; 4,800 bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Multiple data rates; Status indicators; Point-to-point **Introduced:** 1984 **Cost:** $1,995

☐ **Modem 9600 A/B**
4,800; 7,200; 9,600 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Cost:** $1,995

☐ **Modem 9600 V.29+**
4,800; 7,200; 9,600 bps **Transmission:** Synchronous **Mode:** 2-wire FDX; 4-wire FDX **Features:** Multiple data rates; Status indicators; Standalone; Point-to-point; Multipoint **Cost:** $2,295

BRITRONICS, INC.

☐ **JC-1200A**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators; Standalone; Tone and pulse dialing

☐ **JC-1201A**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; OEM board config.; Tone and pulse dialing

BURROUGHS CORP.

☐ **CP 1004**
4,800 bps **Transmission:** Synchronous **Mode:** HDX; 2-wire FDX; 4-wire FDX **Features:** Status indicators; Fallback to 2,400 bps; Point-to-point; Multipoint; Optional 2-port mux **Cost:** $3,-000; Lease (mo.) — $172

☐ **TA 1203**
1,200 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX **Features:** Auto answer; Originate/answer **Cost:** $1,012; Lease (mo.) —$32

☐ **TA 1801**
600; 1,200; 1,800 bps **Transmission:** Asynchronous **Mode:** HDX; 4-wire FDX **Features:** Originate/answer **Cost:** $1,063; Lease (mo.) —$33

☐ **TA 1802**
1,200; 1,800 bps **Transmission:** Asynchronous **Mode:** HDX; 4-wire FDX **Features:** Multiport capability **Cost:** $1,179; Lease (mo.) —$44

☐ **TA 2401**
1,200; 2,400 bps **Comparable to:** Bell 201B/C **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Cost:** $1,444; Lease (mo.) —$68

☐ **TA 2403**
1,200; 2,400 bps **Comparable to:** Bell 201B/C **Transmission:** Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer **Cost:** $1,675; Lease (mo.) — $86

BYTCOM, INC.

☐ **Model 212AD**
0-300; 1,200 bps **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Reverse channel; Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Rackmount; Standalone; OEM board config.; Name and telephone number storage **Units sold:** 10,000 since 1983 **Cost:** $275

☐ **212 Contac**
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Rackmount; Standalone; OEM board config.; Name and telephone number storage; CCITT V.21, V.23 compatible **Units sold:** 1,200 since 1985 **Cost:** $300

CROSSPOINT SYSTEMS, INC.
1710 Willow Creek Circle
Eugene, OR 97402
(503) 485-4254

Share peripherals among multiple PCs in any combination up to 8, all under automatic software control. See the Crosspoint Systems ad under the heading Local Area Networks for the ultimate solution in data switching.

☐ **24/12 Contac Plus**
0-300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Rackmount; Standalone; OEM board config.; CCITT V.22 compatible; 10 telephone number storage **Units sold:** 1,000 since 1985 **Cost:** $389

CARTERFONE COMMUNICATIONS CORP.
(subsidiary of Cable & Wireless)

☐ **Adcomm 96/48-H**
Up to 19.2K bps **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Reverse channel; Secondary channel; Alternate voice/data; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; Standalone; Data compaction; Character compression; Built-in auto call; Line quality monitoring **Units sold:** 500 since 1985 **Cost:** $1,695; Lease (mo.) —$99

☐ **Personal Communications Controller**
0-1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Status indicators; Auto dial; Standalone; Tone and pulse dialing; 9 telephone number storage; Clock/calendar **Units sold:** 50 since 1985 **Cost:** $995; Lease (mo.) —$40

CASE COMMUNICATIONS, INC.

☐ **PC212A**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto dial; Auto answer **Support equip** Software **Introduced:** 1983 **Cost:** $499-$539

☐ **R103J**
Up to 300 bps **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Rackmount; Standalone; Alternate voice/data; Auto answer; Originate/answer; Primarily designed for small business and personal computers **Support equip** Software **Introduced:** 1982 **Cost:** $249

☐ **R1224**
Up to 300 Async; Sync 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Alternate voice/data; Auto dial; Rackmount; Standalone; Tone and pulse dialing **Support equip** Software **Introduced:** 1984 **Cost:** $649

☐ **R201C**
2,400 bps **Comparable to:** Bell 201C **Transmission:** Synchronous **Mode:** HDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Auto dial **Support equip** Software **Introduced:** 1983 **Cost:** $699

☐ **R212A**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Originate/answer; Auto answer **Support equip** Software **Introduced:** 1982 **Cost:** $699

☐ **R212A Executive**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Originate/answer; Status indicators; Auto dial; Log-on; Speaker monitor; Manual controls **Support equip** Software **Introduced:** 1984 **Cost:** $499

☐ **R212A Intelligent**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto dial; Auto answer; Originate/answer; Controlled from terminal; Log-on **Support equip** Software **Introduced:** 1983 **Cost:** $425

☐ **TA201C**
2,400 bps **Comparable to:** Bell 201C **Transmission:** Synchronous **Mode:** 4-wire FDX; HDX **Features:** Alternate voice/data; Auto answer; Originate/answer; 801 ACU compatible **Support equip** Software **Introduced:** 1980 **Cost:** $999

☐ **TA208A/B**
4,800 bps **Comparable to:** Bell 208A/B **Transmission:** Synchronous **Mode:** 4-wire FDX; HDX **Features:** Auto answer; Alternate voice/data; Originate/answer; 801 ACU compatible **Support equip** Software **Introduced:** 1982 **Cost:** $1,895

☐ **T103J**
Up to 300 bps **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; 801 ACU compatible **Support equip** Software **Introduced:** 1978 **Cost:** $599

☐ **T202S**
Up to 1,200 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX **Features:** Reverse channel; Originate/answer; Alternate voice/data; Auto answer; 801 ACU compatible **Support equip** Software **Introduced:** 1975 **Cost:** $699-$849

☐ **T212A**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; 801 ACU compatible **Support equip** Software **Introduced:** 1977 **Cost:** $1,049

☐ **6021 Grapevine**
0-19.2K Async; Sync 2,400; 4,800; 9,600; 19.2K bps **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Status indicators; Rackmount; Standalone; Simultaneous data and voice

CERMETEK MICROELECTRONICS, INC.

☐ **Cermetek Security Modem**
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Password and call-back access security **Support equip** Cables **Introduced:** 1984 **Cost:** $495

☐ **Cermetek 1200**
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Tone dialing **Support equip** Cables **Introduced:** 1984 **Cost:** $395

☐ **Cermetek 1200SPC**
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial **Support equip** Software **Introduced:** 1984 **Cost:** $495 (includes software)

☐ **Cermetek 2400**
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Standalone **Support equip** Cables **Introduced:** 1985 **Cost:** $645

☐ **Cermetek 2400 Security Modem**
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Status indicators; Standalone; Tone dialing; CCITT V.22, V.22 bis compatible **Introduced:** 1986 **Cost:** $745

☐ **Cermetek 2400EP**
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Originate/answer; Status indicators; Standalone; Tone dialing; CCITT V.22, V.22 bis compatible **Introduced:** 1985 **Cost:** $795

☐ **Cermetek 2400SPC**
2,400; 1,200; 300 bps **Comparable to:** Bell 103; 212A **Introduced:** 1986

☐ **CH1765**
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial **Introduced:** 1984 **Cost:** $520

☐ **CH1770**
110; 300; 1,200 bps **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; Auto speed and parity selection; Tone and pulse dialing **Introduced:** 1984 **Cost:** $399

☐ **INFO-MATE 212A**
110; 300; 1,200 bps **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; 52-number/Log-on message storage; DTMF or pulse dialing; Auto speed and parity select; Electronic call progress tone detection **Introduced:** 1983 **Cost:** $595

☐ **Model 1200V**
110; 300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; **Introduced:** 1986 **Cost:** $595

CLEO SOFTWARE
(a division of Phone 1, Inc.)

☐ **SYNCmodem**
2,400 bps **Comparable to:** Bell 201 **Transmission:** Synchronous **Mode:** HDX **Features:** Auto answer; Auto dial; Tone and pulse dialing **Support equip** Software **Units sold:** 1,100 since 1985 **Cost:** $1,595 (includes software)

CODE-A-PHONE CORP.

☐ **Tel-A-Modem**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Status indicators; Standalone; Simultaneous voice/data **Units sold:** 2,000 since 1984 **Cost:** $595

CODEX CORP.
(subsidiary of Motorola, Inc.)

☐ **Model 2231**
1,200; 2,400 bps **Comparable to:** Bell 212 (fallback) **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** V.22 bis compatible **Introduced:** 1983

☐ **Model 2233**
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Integral ACU (auto-call unit); Telephone number storage; Auto redial **Introduced:** 1986 **Cost:** $445

☐ **Model 2250**
4,800 bps **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Introduced:** 1986 **Cost:** $2,995

☐ **Model 2260**
4,800; 9,600 bps **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Introduced:** 1986 **Cost:** $3,495

☐ **Model 2270**
0-300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Status indicators; Rackmount; Standalone; 9 telephone number storage

☐ **Model 2280**
0-300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; CCITT V.22, V.22 bis compatible

☐ Model 5208R
4,800 bps **Comparable to:** Bell 208A/B **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Cost:** $1,495

☐ MX-2400
1,200; 2,400 bps **Comparable to:** Bell 201B/C **Transmission:** Synchronous **Mode:** 4-wire FDX; HDX **Features:** Multiple data rates; Secondary channel; Alternate voice/data; Adaptive and statistical equalizer; 2-ch. mux; Auto-call unit; Optional async; V.26 bis compatible **Units sold:** 35,000 since 1979 **Cost:** $1,275; Lease (mo.) —$50 (2 yr.)

COHERENT COMMUNICATIONS SYSTEMS CORP.

☐ DAM-5D
DDD up to 1,200; C2 3002 1,800 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX; 4-wire FDX **Features:** Auto answer; Status indicators **Introduced:** 1972 **Cost:** $500

☐ FSM-73B
Up to 300 bps **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Status indicators; Rackmount **Introduced:** 1984 **Cost:** $395

☐ FSM-83 DDD/Telex
Up to 300 bps **Comparable to:** Bell 103J **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto answer; Status indicators; ASCII to Baudot speed/code conversion **Introduced:** 1983 **Cost:** $498

☐ SPM-94A
Up to 300 bps **Transmission:** Asynchronous **Mode:** HDX **Features:** Originate/answer; Status indicators; Simultaneous data/voice **Units sold:** 200 since 1983 **Cost:** $525

☐ SPM-94B
Up to 300 bps **Transmission:** Asynchronous **Mode:** FDX **Features:** Originate/answer; Status indicators; Simultaneous data/voice **Introduced:** 1984 **Cost:** $575

☐ SPM-94C
1,200 bps **Transmission:** Asynchronous; Synchronous **Mode:** HDX **Features:** Alternate voice/data; Status indicators; Point-to-point; Multipoint **Introduced:** 1986

COMDATA CORP.

☐ Model C200
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial **Introduced:** 1986 **Cost:** $577

☐ Model 1200
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; Status indicators; Integral voice/data switch **Introduced:** 1985 **Cost:** $197

☐ Model 332E2-12L
1,200 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX; 4-wire FDX **Features:** Reverse channel; Status indicators; Rackmount **Introduced:** 1974 **Cost:** $187

COMPUTER COMMUNICATIONS SPECIALISTS, INC.

☐ CCS Audio Response Modem
1,200 bps **Comparable to:** Bell 202S **Transmission:** Asynchronous **Mode:** HDX **Features:** 400-word vocabulary voice synthesis **Support equip** Software **Units sold:** 200 since 1982 **Cost:** $4,895 (first line); $2,895 (subsequent lines)

COMPUTER FRIENDS

☐ Mercury 103/212A
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators; Standalone; Tone and pulse dialing **Cost:** $205

COMPUTER LOGICS LTD., INC.

☐ SYNCSMART
2,400 bps **Comparable to:** Bell 201C **Transmission:** Synchronous **Mode:** HDX **Features:** Auto answer; Auto dial; OEM board config.; Tone and pulse dialing

COMSPEC, INC.

☐ Model 9600C
9,600; 7,200; 4,800; 2,400 bps **Transmission:** Synchronous **Mode:** 4-wire FDX; HDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Auto dial backup; Auto fallback; Auto fall forward **Units sold:** 600 since 1983 **Cost:** $3,495

CONCORD DATA SYSTEMS, INC.

☐ CDS V.32 Trellis
4,800; 9,600 bps **Mode:** 2-wire FDX **Features:** Standalone **Introduced:** 1986

☐ CDS 224
2,400 bps **Comparable to:** Bell 2224 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; 1,200 bps fallback; Front panel sync/async switch **Units sold:** 20,000 since 1982 **Cost:** $450

☐ CDS 224 AD
2,400 bps **Comparable to:** Bell 2224 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; Auto dial; 1,200 bps fallback; Front panel sync/async switch **Units sold:** 10,000 since 1983 **Cost:** $495

☐ CDS 224 ARQ
2,400 bps **Comparable to:** Bell 2224 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; 1,200 bps fallback; Error correction **Units sold:** 500 since 1984 **Cost:** $935

☐ CDS 224 ARQ/AD
2,400 bps **Comparable to:** Bell 2224 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; Auto dial; 1,200 bps fallback; Error correction **Units sold:** 500 since 1984 **Cost:** $975

☐ CDS 224 PC
300; 1,200; 2,400 bps; Hayes compatible **Features:** OEM board config. **Introduced:** 1985 **Cost:** $695

☐ CDS 224 Super Duplex
2,400 bps **Comparable to:** Bell 2224 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; 1,200 bps fallback; Front panel sync/async switch; Built-in 3-port statistical multiplexor with error correction **Introduced:** 1983 **Cost:** $1,695

☐ CDS 224 Trispeed
300; 1,200; 2,400 bps **Transmission:** Asynchronous; Synchronous **Features:** Auto dial; Auto. adaptive equalizer; Rackmount; OEM board config.; Speed sense; Tone and pulse dialing; Auto redial **Introduced:** 1985 **Cost:** $775-$795

☐ Series II
300; 1,200; 2,400 bps; Hayes compatible **Features:** Standalone **Introduced:** 1985 **Cost:** $595

☐ V.22
1,200 bps **Comparable to:** Bell 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Auto. adaptive equalizer; 600 bps fallback **Units sold:** 10,000 since 1981 **Cost:** $695

☐ V.22 bis
2,400 bps **Comparable to:** Bell 2224 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators **Units sold:** 10,000 since 1982 **Cost:** $695

CONTRIVER ENTERPRISE CO., LTD.

☐ MF-MOD
300; 1,200 bps **Introduced:** 1986 **Cost:** $499

☐ SM1200I
110; 300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Introduced:** 1986 **Cost:** $429

☐ 1200HCI
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Introduced:** 1986 **Cost:** $189

CREATIVE DIGITAL, INC.

☐ Mercury Fastmodem
0-300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103A; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer **Support equip** Cables; Software; manuals **Introduced:** 1986 **Cost:** $499

☐ Mercury Fastmodem 1200B
1,200; 300 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Introduced:** 1986 **Cost:** $299

☐ Mercury Fastmodem 2400B
2,400; 1,200; 300 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Introduced:** 1985 **Cost:** $495

☐ Mercury 12006
0-300; 1,200 bps **Comparable to:** Bell 103A; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Introduced:** 1986 **Cost:** $349

CTS FABRI-TEK, INC.
DATACOMM Products Division

☐ Half-Pak 12
1,200; 600; 300; 150; 110 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Originate/answer; Status indicators; OEM board config.; Auto baud rate and parity detector **Support equip** Software **Introduced:** 1985 **Cost:** $295

☐ Half-Pak 24
2,400; 1,200; 600; 300; 110 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto answer; Auto dial; OEM board config.; CCITT V.22 bis compatible **Support equip** Software **Introduced:** 1985 **Cost:** $395

☐ Model 2424AD
2,400; 1,200; 600; 300; 110 bps **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; Auto dial; CCITT V.22 bis compatible; 10 telephone number storage **Introduced:** 1985 **Cost:** $395

☐ Series 828-Custom OEM
300; 1,200 bps **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; OEM board config.; Auto speed detection; Tone and pulse dialing

☐ 212AHC
1,200; 600; 300; 150; 110 Async; Sync 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Originate/answer; Status indicators; Rackmount; Standalone; OEM board config.; Auto baud rate and parity detector **Introduced:** 1984 **Cost:** $295

☐ 212AT
110; 150; 300; 600; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Originate/answer; Auto speed detection; Tone and pulse dialing

☐ 212RM
110; 300; 600; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX; 4-wire FDX **Features:** Auto answer; Auto dial; Rackmount **Introduced:** 1986 **Cost:** $295

☐ 2424ADH
2,400; 1,200; 600; 300; 110 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; CCITT V.22 bis compatible; 10 telephone number storage **Introduced:** 1985 **Cost:** $395

☐ 2424RM
110; 300; 600; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX; 4-wire FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; Rackmount; CCITT V.22 bis compatible **Introduced:** 1986 **Cost:** $395

DATA RACE, INC.

☐ RACE AF I
1,200; 2,400; 4,800; 9,600; 19.2K bps **Transmission:** Asynchronous **Mode:** 2-wire FDX **Introduced:** 1986 **Cost:** $1,645

☐ RACE AF II
1,200; 2,400; 4,800; 9,600; 19.2K bps **Transmission:** Asynchronous **Mode:** 2-wire FDX **Introduced:** 1986 **Cost:** $1,845

☐ RACE I
1,200; 2,400; 4,800; 9,600; 19.2K bps; Hayes compatible **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto dial; Auto. adaptive equalizer; Standalone; Error correction; Tone and pulse dialing **Support equip** Cables **Units sold:** 1,000 since 1985 **Cost:** $1,495

☐ RACE II
1,200; 2,400; 4,800; 9,600; 19.2K bps; Hayes compatible **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto dial; Standalone; Auto. adaptive equalizer; Error correction; Tone and pulse dialing **Support equip** Cables **Units sold:** 500 since 1985 **Cost:** $1,695

DATAGRAM

☐ DCE224
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 224 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX; HDX **Features:** Multiple data rates; Auto answer; Originate/answer; Error correction **Units sold:** 500 since 1984 **Cost:** $795

DATALINK READY, INC.

☐ Model 24K Plus
2,400; 1,200; 600 Sync; Async 0-300; 600; 1,200; 2,400 bps **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Features:** Auto answer; Originate/answer; Auto. adaptive equalizer; Tone and pulse dialing **Cost:** $595 (standalone); $525 (rackmount)

☐ VM-24
2,400; 1,200 bps **Transmission:** Asynchronous; Synchronous **Features:** Auto. adaptive equalizer; Standalone; Point-to-point; Multipoint **Cost:** $700

☐ VM-48
4,800; 2,400 bps **Transmission:** Asynchronous; Synchronous **Features:** Auto. adaptive equalizer; Standalone; Point-to-point; Multipoint; 4-ch. mux **Cost:** $1,400

☐ VM-96
9,600; 7,200; 4,800 bps **Transmission:** Asynchronous; Synchronous **Features:** Auto. adaptive equalizer; Standalone; Point-to-point; Multipoint; 4-ch. mux **Cost:** $1,900

☐ 12 Thousand Dial
12K; 9,600 bps **Comparable to:** Bell 208 **Transmission:** Synchronous **Mode:** HDX **Introduced:** 1986

DATAPORT/CS

☐ Internal Modem
300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Cost:** $275

DATEC, INC. (NC)

☐ Datec PAL Plus
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto dial; Originate/answer; Auto speed and parity detection **Support equip** Software **Introduced:** 1983 **Cost:** $499 (includes software)

☐ Datec PAL 212
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Alternate voice/data; Originate/answer; Status indicators; Auto dial; Standalone **Introduced:** 1983 **Cost:** $399

☐ Model 212SA
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators; Standalone; 10 telephone number storage; Tone and pulse dialing; Auto log-on; Auto redial **Cost:** $499

☐ Model 212SB
0-300; 1,200 bps **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators; Rackmount; Standalone; Tone and pulse dialing; 3 telephone number storage **Cost:** $599

☐ Model 212SC
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators; Rackmount; Standalone; 20 telephone number storage; Tone and pulse dialing; Auto log-on; Auto redial **Cost:** $579

☐ Model 212SD
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators; Rackmount; Standalone; 27 telephone number storage; Tone and pulse dialing; Auto log-on; Auto redial **Cost:** $599

☐ Model 224KR
Up to 300; 1,200; 2,400 bps **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators; Rackmount; Standalone; Tone and pulse dialing; CCITT V.22, V.22 bis compatible **Introduced:** 1985 **Cost:** $699

☐ Model 224KS
Up to 300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Standalone; CCITT V.22, V.22 bis compatible; 3 telephone number storage **Introduced:** 1985 **Cost:** $799

☐ Model 224KT
Up to 300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Auto dial; CCITT V.22, V.22 bis compatible; 3 telephone number storage **Introduced:** 1985 **Cost:** $899

DECATEK, INC.

☐ ZIPmodem
9,600; 7,200; 4,800; 2,400 bps **Transmission:** Synchronous **Mode:** HDX **Features:** Standalone; OEM board config.; Integral SNA/SDLC protocol converter; On-board processor **Support equip** Cables; Software **Introduced:** 1985 **Cost:** $2,995; $1,995 (mainframe version)

DEVELCON ELECTRONICS

☐ Model 201B
2,400 bps **Comparable to:** Bell 201B **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Status indicators **Units sold:** 3,000 since 1983 **Cost:** $650

☐ Model 201C
2,400 bps **Comparable to:** Bell 201C **Transmission:** Synchronous **Mode:** *HDX*; 4-wire FDX

☐ Model 208A/B
4,800 bps **Comparable to:** Bell 208A/B **Transmission:** Synchronous **Mode:** HDX; 2-wire FDX; 4-wire FDX **Features:** Auto answer; Auto. adaptive equalizer **Units sold:** 800 since 1983 **Cost:** $1,650

☐ Model 8212A
300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators; Auto dial **Units sold:** 1,000 since 1984 **Cost:** $445

DIGITAL COMMUNICATIONS ASSOCIATES, INC. (DCA)

☐ FASTLINK
300; 1,200; 2,400; 8K bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; Standalone; Automatic error detection and correction **Introduced:** 1985 **Cost:** $2,395 (standalone); $1,995 (modem card)

DIGITAL EQUIPMENT CORP.

☐ DF104
Split speed 150/2,400 bps **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Status indicators; Redundant power; Auto dial; Rackmount; Standalone; Multiple data rates; Secondary channel; Alternate voice/data; Auto answer; Originate/answer; 75-1,200 bps fallback **Introduced:** 1984 **Cost:** $545-$745

☐ DF112
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto dial; Rackmount; Standalone; Multiple data rates; Alternate voice/data; Auto answer; Originate/answer; Status indicators; Redundant power; Tone and pulse dialing **Introduced:** 1984 **Cost:** $745

☐ DF124
1,200; 2,400 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Originate/answer; Rackmount; Standalone; CCITT V.22 bis compatible; 5 telephone number storage; Tone and pulse dialing **Introduced:** 1985 **Cost:** $1,045

☐ DF126
2,400 bps **Comparable to:** Bell 201B/C **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 4-wire FDX **Features:** Auto dial; Rackmount; Standalone; Multiple data rates; Alternate voice/data; Auto answer; Originate/answer; Status indicators; Redundant power; 1,200 bps fallback **Introduced:** 1984 **Cost:** $895

☐ Scholar
2,400; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; CCITT V.22 bis compatible; 15 telephone number storage; Tone and pulse dialing **Introduced:** 1985 **Cost:** $895

☐ VT220 Internal Modem
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Cost:** $395

DIGITAL PATHWAYS, INC.

☐ Model 250
300; 1,200; 2,400 bps; Hayes compatible **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Auto dial; Tone and pulse dialing; 10 telephone number storage; V.22 bis compatible **Units sold:** 100 since 1985 **Cost:** $345 (includes MITE software)

☐ Model 300
110; 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto dial; Originate/answer **Units sold:** 250 since 1984 **Cost:** $295

DOWTY INFORMATION SYSTEMS
(division of Dowty RFL Industries, Inc.)

☐ QUATTRO
75-2,400 bps; Hayes compatible **Comparable to:** Bell 2224; 212A; 103; 202 **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Standalone; CCITT V.22 bis compatible; 8 telephone number storage; Tone and pulse dialing **Units sold:** 4,000 since 1986 **Cost:** $695

E + E DATACOMM

☐ Avatex 1200
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Originate/answer; Standalone; Auto answer; Tone and pulse dialing **Units sold:** 35,000 since 1985 **Cost:** $200

☐ Model 1200HC
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Standalone; Tone and pulse dialing **Introduced:** 1986 **Cost:** $259

EF INDUSTRIES

☐ DTC Tel-Com
Up to 300; 1,200 bps **Comparable to:** Bell 100 Series; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX; HDX **Features:** Originate/answer **Units sold:** 200 since 1981 **Cost:** $995

ELECTRONIC VAULTS, INC. (EVI)

☐ FASTCOMM 2400/I
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; OEM board config.; CCITT V.22 bis compatible **Introduced:** 1986 **Cost:** $599

☐ FASTCOMM 2400/S
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; OEM board config.; CCITT V.22 bis compatible **Introduced:** 1986 **Cost:** $619

☐ FASTCOMM 2496/I
9,600; 7,200; 4,800; 2,400, 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; OEM board config.; Automatic error detection/correction; CCITT V.29, V.22 bis compatible **Introduced:** 1986 **Cost:** $979

☐ FASTCOMM 2496/S
9,600; 7,200; 4,800; 2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Automatic error detection/correction; CCITT V.22 bis compatible **Introduced:** 1986 **Cost:** $999; $979 (rackmount card)

☐ FASTCOMM 96/I
9,600; 7,200; 4,800 bps **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; OEM board config.; Automatic error detection/correction; CCITT V.29 compatible **Introduced:** 1986 **Cost:** $899

☐ FASTCOMM 96/S
9,600; 7,200; 4,800 bps **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Automatic error detection/correction **Introduced:** 1986 **Cost:** $919; $899 (rackmount card)

☐ UPTA 96/I
9,600; 7,200; 4,800 bps **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; Auto dial; Automatic error detection/correction; CCITT V.29 compatible **Units sold:** 2,000 since 1985 **Cost:** $895

☐ UPTA 96/S
9,600; 7,200; 4,800 bps **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; Auto dial; Standalone; Automatic error detection/correction **Units sold:** 2,000 since 1985 **Cost:** $995

EMERALD TECHNOLOGY GROUP, INC.
SEE AD ON PAGE 187

☐ Model 201C
2,400 bps **Comparable to:** Bell 201C **Transmission:** Synchronous **Features:** Auto answer; Status indicators; Standalone **Introduced:** 1985 **Cost:** $685

ERICSSON PROGRAMATIC, INC.

☐ EPI 103J
0-300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer; Status indicators; Standalone **Units sold:** 100 since 1983 **Cost:** $442

☐ EPI 103J/LP
0-300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer; Status indicators; Standalone **Units sold:** 100 since 1983 **Cost:** $202

☐ EPI 201C
2,400 bps **Comparable to:** Bell 201C **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Status indicators; Standalone **Units sold:** 150 since 1983 **Cost:** $806

☐ EPI 208A/B
4,800 bps **Comparable to:** Bell 208A **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Auto. adaptive equalizer; Status indicators; Standalone **Units sold:** 100 since 1983 **Cost:** $1,820

☐ EPI 212A
0-300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Status indicators; Standalone **Units sold:** 200 since 1983 **Cost:** $618

☐ EPI 212A/D
0-300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Originate/answer; Status indicators; Standalone **Units sold:** 250 since 1983 **Cost:** $670

☐ EPI 212LP
0-300; 1,200 bps **Comparable to:** Bell 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Status indicators; Standalone **Units sold:** 100 since 1983 **Cost:** $462

☐ ZAT 2400
2,400; 1,200 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Auto answer; Status indicators; Rackmount; Standalone **Units sold:** 10,000 since 1980 **Cost:** $1,195

☐ ZAT 4800
4,800; 2,400 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Auto answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Optional 2-ch. mux **Units sold:** 20,000 since 1980 **Cost:** $1,995

☐ ZAT 600/1200
1,200; 600 bps **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Units sold:** 4,000 since 1981 **Cost:** $826

EVEREX SYSTEMS, INC.

☐ Evercom
300; 1,200 bps; Hayes compatible **Mode:** HDX; FDX **Features:** OEM board config. **Support equip** Software **Cost:** $249

FOUNTAIN TECHNOLOGIES, INC.

☐ Internal Modem 1200
300; 1,200 bps **Comparable to:** Bell 103; 212A **Mode:** HDX; FDX **Cost:** $165

☐ Super-EX Modem 1200
0-300; 1,200 bps **Comparable to:** Bell 103; 212A **Mode:** HDX; FDX **Cost:** $170

F-TEC (FEDERATED TECHNOLOGY AND ELECTRONICS CORP.)

☐ Model 4848
4,800; 2,400; 1,200 bps **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX; 4-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Status indicators; Auto dial; Originate/answer; Rackmount; Standalone; Auto. adaptive equalizer; Auto disconnect; Point-to-point; V.26 ter, V.32 compatible **Units sold:** 4,000 since 1985 **Cost:** $2,695

FUJITSU AMERICA, INC.
Storage & Peripheral Products Division

☐ Model 1935D
1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Multiple data rates; Auto. adaptive equalizer; CCITT V.22, V.22 bis compatible **Introduced:** 1984 **Cost:** $595-$695

☐ M1915 CM15
4,800; 2,400 bps **Transmission:** Synchronous **Mode:** 4-wire FDX; HDX **Features:** Multiple data rates; Auto. adaptive equalizer; OEM board config. **Introduced:** 1984 **Cost:** $395

☐ M1925 CM02
14.4K; 9,600; 7,200; 4,800; 2,400 bps **Transmission:** Synchronous **Mode:** HDX **Introduced:** 1983 **Cost:** $750

☐ M1935 CM01
2,400; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Auto. adaptive equalizer; OEM board config.; CCITT V.22, V.22 bis compatible **Introduced:** 1984 **Cost:** $500

GALACTICOMM, INC.

☐ BREAKTHROUGH
300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Cost:** $7,450

GAMMALINK

☐ GammaComm
4,800; 7,200; 9,600 bps **Transmission:** Synchronous **Mode:** HDX **Features:** Multiple data rates; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Standalone **Units sold:** 500 since 1984 **Cost:** $1,995

☐ GammaModem
9,600; 7,200; 4,800 bps **Transmission:** Synchronous **Mode:** HDX **Features:** Multiple data rates; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Standalone **Units sold:** 500 since 1985 **Cost:** $1,995

GANDALF DATA, INC.
(subsidiary of Gandalf Technologies, Inc.)

☐ **ACCESS Series 12S**
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Status indicators; Standalone; Auto log-on; 10 telephone number storage; Tone and pulse dialing **Support equip** Cables **Introduced:** 1985 **Cost:** $495

☐ **ACCESS Series 208**
4,800 bps **Comparable to:** Bell 208A/B **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Auto answer; Auto. adaptive equalizer; Status indicators; Standalone; Point-to-point; Multipoint **Introduced:** 1985 **Cost:** $1,295 (standalone); $1,150 (rackmount)

☐ **ACCESS Series 24S**
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; V.22 bis compatible; Auto log-on **Support equip** Cables **Introduced:** 1985 **Cost:** $595

☐ **FasTrak 14.4**
14.4K; 12K; 9,600 bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Auto. adaptive equalizer; Status indicators; Standalone; Point-to-point; CCITT V.29 compatible **Introduced:** 1985 **Cost:** $3,950

☐ **FasTrak 96**
9,600; 7,200; 4,800 bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Auto. adaptive equalizer; Status indicators; Standalone; Point-to-point; CCITT V.29 compatible **Introduced:** 1985 **Cost:** $1,650

☐ **FasTrak 96FP**
9,600; 4,800; 7,200 bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Auto. adaptive equalizer; Standalone; Point-to-point; Multipoint; CCITT V.29 compatible **Introduced:** 1985 **Cost:** $1,995

☐ **LDM 419**
9,600 bps **Transmission:** Asynchronous **Mode:** 4-wire FDX **Features:** Auto. adaptive equalizer; Status indicators **Introduced:** 1984 **Cost:** $1,095

☐ **SAM 201**
2,400 bps **Comparable to:** Bell 201C **Transmission:** Asynchronous; Synchronous **Mode:** HDX **Features:** Auto answer; Alternate voice/data; Auto dial; Rackmount; Standalone; 1,200 bps fallback **Introduced:** 1983 **Cost:** $725

GATEWAY MICROSYSTEMS, INC.

☐ **SyncLink 201C**
2,400 bps **Comparable to:** Bell 201C **Transmission:** Synchronous **Features:** Auto answer; Auto dial; OEM board config. **Support equip** Software **Introduced:** 1985 **Cost:** $995

GCH SYSTEMS, INC.

☐ **Desk Talk 1200D**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators; Standalone; Tone and pulse dialing **Support equip** Software

☐ **Easy Modem 12B**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; OEM board config.; Tone and pulse dialing **Support equip** Software

☐ **Long Talk 1200L**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; OEM board config.; Tone and pulse dialing **Support equip** Software

☐ **Short Talk 1200H**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; OEM board config.; Tone and pulse dialing **Support equip** Software

GENERAL DATACOMM, INC.

☐ **Acculine 1200 PC Modem**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Standalone **Units sold:** 25,000 since 1985 **Cost:** $395

☐ **Acculine 2400 PC Modem**
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Standalone; CCITT V.22 compatible; Tone and pulse dialing **Introduced:** 1986 **Cost:** $595

☐ **Acculine 300 PC Modem**
Up to 300 bps; Hayes compatible **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Standalone **Units sold:** 5,000 since 1985 **Cost:** $289

☐ **DataComm 103J**
Up to 300 bps **Comparable to:** Bell 103J **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Originate/answer; Rackmount; Standalone; 801 ACU compatible **Units sold:** 15,000 since 1981 **Cost:** $545 (standalone); $455 (rackmount)

☐ **DataComm 113D**
Up to 300 bps **Comparable to:** Bell 113D **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Answer only; Rackmount; Standalone **Units sold:** 8,000 since 1981 **Cost:** $520 (standalone); $430 (rackmount)

☐ **DataComm 208B+**
4,800; 2,400 bps **Comparable to:** Bell 208B **Transmission:** Asynchronous; Synchronous **Mode:** HDX **Features:** Originate/answer; Auto dial; Async converter **Units sold:** 6,000 since 1983 **Cost:** $1,295

☐ **DataComm 208B+/SD**
4,800 bps **Comparable to:** Bell 208B **Transmission:** Synchronous **Mode:** HDX **Features:** Auto dial; Auto. adaptive equalizer; Rackmount; Standalone; Point-to-point; Tone and pulse dialing **Cost:** $1,695

☐ **DataComm 208B/A**
4,800 bps **Comparable to:** Bell 208A/B **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; 25 msec turnaround **Units sold:** 22,000 since 1981 **Cost:** $1,495

☐ **Model 103J-M**
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer **Units sold:** 10,000 since 1981 **Cost:** $250

☐ **Model 212A/ED+**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer; Auto dial; Auto. adaptive equalizer; Auto log-on **Units sold:** 20,000 since 1983 **Cost:** $499

☐ **Model 212A/SL**
Up to 300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer; Auto. adaptive equalizer **Units sold:** 12,000 since 1983 **Cost:** $395

☐ ERCORECT PC
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Auto dial **Support equip** Software **Units sold:** 1,200 since 1984 **Cost:** $599

☐ ERCORECT 1200
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate only **Units sold:** 6,700 since 1984 **Cost:** $599

☐ OEM Board Modem
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Originate/answer; Auto dial; Standalone; OEM board config. **Units sold:** 44,000 since 1983

☐ PC 1200
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate only **Support equip** Software **Units sold:** 2,300 since 1984 **Cost:** $399

☐ PL 4800 MD
2,400; 4,800 bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Auto answer; Originate/answer; Standalone **Units sold:** 2,200 since 1984 **Cost:** $1,299

☐ PL 9600 MD
4,800; 7,200; 9,600 bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Auto answer; Originate/answer; Standalone **Units sold:** 1,800 since 1984 **Cost:** $1,599

☐ Rainbow
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Standalone **Cost:** $249

☐ STARCOM 300
300 bps; Hayes compatible **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Auto dial **Units sold:** 1,200 since 1984 **Cost:** $239

☐ Turbo 2400 Series
2,400; 1,200; 600; 300 bps; Hayes compatible **Comparable to:** Bell 212; 103 **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Auto. adaptive equalizer; Status indicators; Auto dial; Standalone; OEM board config.; ARQ error correction; CCITT V.22 bis compatible **Units sold:** 56 since 1985 **Cost:** $599

☐ 212X.25
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Status indicators; Standalone; OEM board config.; Integral PAD; Tone and pulse dialing **Cost:** $599

☐ 2400 FDX Auto Dial
1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto dial; Auto answer; Standalone **Units sold:** 16,000 since 1984 **Cost:** $599

INFINET, INC.

☐ Model 224
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; CCITT V.22, V.22 bis compatible; 10 telephone number storage; Tone and pulse dialing **Introduced:** 1986 **Cost:** $795 (standalone); $745 (rackmount)

☐ V.32 Trellis
9,600; 4,800 bps **Transmission:** Synchronous **Mode:** 2-wire FDX; 4-wire FDX **Features:** Auto answer; Auto. adaptive equalizer; Status indicators; Standalone **Introduced:** 1986 **Cost:** $3,495

INFOTRON SYSTEMS CORP.

☐ DSM 201C
2,400 bps **Comparable to:** Bell 201C **Mode:** HDX; 4-wire FDX **Features:** Rackmount

INMAC

☐ Model 1970
4,800 bps **Comparable to:** Bell 208A/B **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Cost:** $1,295

☐ Model 1971
9,600; 7,200; 4,800 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Cost:** $1,995

☐ Model 8127
0-300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** 4-wire FDX **Features:** Alternate voice/data; Originate/answer **Support equip** Cables **Units sold:** 1,200 since 1984 **Cost:** $99

☐ 1972 Fast Talk
2,400; 1,200 bps **Comparable to:** Bell 212; 224 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; Status indicators **Support equip** Cables **Introduced:** 1985 **Cost:** $495

☐ 8006-A Clear Signal MNP
2,400 bps **Transmission:** Asynchronous; Synchronous **Cost:** $795

☐ 8062 Clear Signal
0-300 bps; Hayes compatible **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators **Support equip** Cables **Introduced:** 1985 **Cost:** $229

☐ 8062R3 Clear Signal
0-300 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Status indicators; Standalone **Cost:** $229

☐ 8071 212 Auto Dial
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A; 113 **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators **Support equip** Cables **Units sold:** 3,000 since 1982 **Cost:** $349

☐ 8077 Password
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A; 113 **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial **Support equip** Cables **Units sold:** 7,000 since 1983 **Cost:** $229

INTEGRATED DESIGN ENGINEERING, INC.

☐ Modem-Plus
Up to 300; 1,200 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX **Units sold:** 10 since 1982 **Cost:** $595

INTERFACE TECHNOLOGIES, INC.

☐ Datagraph
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; OEM board config.; Tone and pulse dialing **Support equip** Software

INTERNATIONAL DATA SCIENCES, INC. (IDS)

☐ Model 224
2,400; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Auto. adaptive equalizer **Units sold:** 245 since 1984 **Cost:** $675

☐ 533 OZ Guardian
110; 300; 1,200; 4,800; 9,600 bps **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; Auto log-on **Units sold:** 388 since 1984 **Cost:** $750

300-1,200 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Originate only

☐ Model 1259
1,200 bps **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous **Mode:** FDX **Features:** Originate/answer

☐ Model 208B/A
4,800 bps **Comparable to:** Bell 208 **Transmission:** Synchronous **Mode:** HDX; FDX

☐ Model 2127
4,800 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Dial backup

☐ Model 2129
9,600 bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Auto. adaptive equalizer

☐ Model 300/1200
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Originate/answer; Racal-Vadic compatible **Introduced:** 1978

☐ 300/1200 Auto Dial
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 4-wire FDX **Features:** Multiple data rates; Auto answer; Originate only; Originate/answer; Auto dial; Telephone number storage

MCDONNELL DOUGLAS INFORMATION SYSTEMS GROUP
(component of McDonnell Douglas Corp.)

☐ Model 912
Up to 300; 1,200 bps **Comparable to:** Bell 100 Series; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer **Introduced:** 1980 **Cost:** $695; Lease (mo.) —$40

MICOM SYSTEMS, INC.

☐ Micro4000 Model 40168
4,800; 9,600; 12K; 14.4K; 16.8K bps **Transmission:** Synchronous **Mode:** 4-wire FDX **Features:** Auto. adaptive equalizer; Status indicators; Standalone; Point-to-point **Units sold:** 100 since 1984 **Cost:** $5,495

MICROCOM, INC.

☐ AX/1200
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Error correction; CCITT V.22 bis compatible; Tone and pulse dialing **Introduced:** 1986 **Cost:** $499 (standalone); $479 (rackmount)

☐ AX/2400
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Error correction; CCITT V.22 bis compatible; Tone and pulse dialing **Introduced:** 1985 **Cost:** $749 (standalone); $729 (rackmount)

☐ AX/2400c
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Error correction; Data compression; CCITT V.22 bis compatible; Tone and pulse dialing **Introduced:** 1986 **Cost:** $899 (standalone); $879 (rackmount)

☐ AX/9612c
300; 1,200; 9,600 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Error correction; Tone and pulse dialing; CCITT V.22 compatible **Introduced:** 1986 **Cost:** $1,599 (standalone); $1,579 (rackmount)

☐ AX/9624c
300; 1,200; 2,400; 9,600 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; Error correction; Tone and pulse dialing; CCITT V.22 bis compatible **Cost:** $1,799 (standalone); $1,779 (rackmount)

☐ HD/2400 Dual Modem Card
2,900 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** OEM board config.; CCITT V.22 bis compatible **Introduced:** 1986 **Cost:** $1,349

☐ HD/2400c Dual Modem Card
4,800 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** OEM board config.; CCITT V.22 bis compatible **Introduced:** 1986 **Cost:** $1,599

☐ SX/1200; SX/2400
300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Standalone; 9 telephone number storage; Error detection/correction; V.22 bis compatible **Introduced:** 1984 **Cost:** $699 (standalone); $679 (rackmount); $999 (standalone-2,400 bps); $979 (rackmount-2,400 bps)

☐ ZX/1200; ZX/2400
2,400; 1,200; 300; 110 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Standalone; Auto redial **Introduced:** 1984 **Cost:** $979-$999 (ZX/2400); $679-$699 (ZX/1200)

MICROPLEX, INC.

☐ SL 103
Up to 300 bps; Hayes compatible **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer **Units sold:** 500 since 1982 **Cost:** $90

☐ SL 212A
Up to 300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial **Units sold:** 200 since 1983 **Cost:** $210

MISCO, INC., COMPUTER SUPPLIES

☐ Model 1006
300; 1,200 bps **Comparable to:** Bell 103; 212A **Cost:** $449

MORRISON & DEMPSEY COMMUNICATIONS

☐ SmarTEAM 103/212A
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators; Tone and pulse dialing **Support equip** Software **Units sold:** 30,000 since 1984 **Cost:** $299

☐ SmarTEAM 1200AT
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators; Standalone; Tone and pulse dialing; Call progress detection **Introduced:** 1985 **Cost:** $299

☐ SmarTEAM 1200B
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Tone and pulse dialing **Support equip** Software **Units sold:** 5,000 since 1985 **Cost:** $299 (includes software)

☐ SmarTEAM 2400
0-300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A; 224 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Status indicators; Standalone; Tone and pulse dialing; CCITT V.22, V.22 bis compatible; Call progress detection **Support equip** Software **Units sold:** 5,000 since 1985 **Cost:** $599

☐ SmarTEAM 2400B
0-300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A; 224 **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto. adaptive equalizer; Status indicators; CCITT V.22, V.22 bis compatible; Tone and pulse dialing; Call progress detection **Support equip** Software **Units sold:** 5,000 since 1986 **Cost:** $599

MULTI-TECH SYSTEMS, INC.

☐ MT113D-R
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Answer only; Rackmount **Introduced:** 1976 **Cost:** $225 (rackmount)

☐ MT212AD
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Originate/answer; Status indicators; Rackmount; Auto dial with memory **Introduced:** 1983 **Cost:** $595

☐ MT224AR
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103J; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial **Introduced:** 1985 **Cost:** $625 (rackmount)

☐ MT224ER
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103J; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial **Introduced:** 1985 **Cost:** $675 (rackmount)

☐ MultiModem
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX; HDX **Features:** Auto answer; Auto dial; Battery-backed telephone number memory; Dial tone/Busy signal detect **Introduced:** 1983 **Cost:** $399

☐ MultiModemPC3
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial **Support equip** Cables; Software **Introduced:** 1986 **Cost:** $299

☐ MultiModem224
Up to 300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Battery-backed telephone number memory; Dial tone/Busy signal detect; CCITT V.22 bis compatible **Introduced:** 1985 **Cost:** $699

☐ MultiModem224E
Up to 300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Battery-backed telephone number memory; Dial tone/Busy signal detect; CCITT V.22 bis compatible **Introduced:** 1985 **Cost:** $749

☐ MultiModem224EC
Up to 300; 1,200; 2,400 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Introduced:** 1985 **Cost:** $699

☐ MultiModem224PC
Up to 300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Auto dial; Card-only modem for IBM PC; Includes full communications software **Introduced:** 1985 **Cost:** $649

NATURAL MICROSYSTEMS CORP.

☐ Watson
Reviewed Aug 1985 p. 29.
300; 1,200 bps; Hayes compatible **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto dial; Auto. adaptive equalizer; Alternate voice/data; Voice messaging **Support equip** Software **Units sold:** 6,000 since 1984 **Cost:** $498

NEC AMERICA, INC.
(subsidiary of NEC Corp.)

☐ Model N212BR
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto dial; 12-number, 64-char. memory per number; Auto log-on **Support equip** Cables **Introduced:** 1982 **Cost:** $595 (standalone); $545 (card only)

☐ N1220/30
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto. adaptive equalizer; Auto dial; Auto answer; Originate/answer; Status indicators; Rackmount; Standalone **Support equip** Cables **Introduced:** 1986 **Cost:** $395 (standlone); $375 (card only)

☐ N1220/30HN
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212; 103 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Auto dial; Rackmount; Standalone; Auto. adaptive equalizer; Auto log-on **Introduced:** 1986 **Cost:** $445 (standalone); $425 (card only)

☐ N1230
1,200 bps; Hayes compatible **Comparable to:** Bell 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Standalone; Auto dial; Originate/answer; Status indicators **Introduced:** 1985 **Cost:** $345

☐ N2420/30
300; 1,200; 2,400 bps **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone **Introduced:** 1985 **Cost:** $695 (standalone); $575 (card only)

☐ N2420/30HN
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Standalone; Auto. adaptive equalizer; Status indicators; CCITT V.22 bis compatible; Auto log-on **Introduced:** 1985 **Cost:** $795 (standalone); $675 (card only)

☐ N2420/30HNE
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Standalone; Auto. adaptive equalizer; Status indicators; CCITT V.22 bis compatible; MNP error control **Introduced:** 1986

☐ N2420/30Y
300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Rackmount; Standalone; Auto. adaptive equalizer; Status indicators; CCITT V.22 bis compatible; Sync auto dial; CCITT V.25 bis compatible **Introduced:** 1985 **Cost:** $895 (standalone); $775 (card only)

NETWORK SOFTWARE ASSOCIATES, INC.

☐ AdaptModem ACC
2,400 bps **Comparable to:** Bell 201 **Transmission:** Synchronous **Features:** Auto answer; Auto dial; OEM board config.; Auto re-dial; Speed dial; Includes SDLC interface adapter **Support equip** Software **Introduced:** 1986 **Cost:** $795

☐ AdaptModem 4800
4,800 bps **Comparable to:** Bell 208 **Transmission:** Synchronous **Introduced:** 1986 **Cost:** $1,195 (includes software)

NICHIMEN AMERICA, INC.

☐ FDM-1200
1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX

NOVATION, INC.

☐ CAT Communication System
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Auto log-on; Standalone or internal smart modem **Support equip** Software **Introduced:** 1984 **Cost:** $499 (standalone with software); $449 (modem card with software)

☐ J-CAT
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators **Support equip** Cables **Introduced:** 1982 **Cost:** $149

☐ Professional 2400 Communication System
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Keypad control; Liquid crystal display; CCITT V.22 bis compatible **Support equip** Software **Introduced:** 1985 **Cost:** $795; $895 (includes MITE software)

☐ 103 Smart-CAT
110; 300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Auto dial; Software command set **Support equip** Cables; Software **Introduced:** 1982 **Cost:** $249

☐ 103/212 Smart-CAT
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Auto dial; Software command set **Support equip** Cables; Software **Introduced:** 1982 **Cost:** $495

☐ 212 Auto-CAT
Up to 300; 1,200 bps **Comparable to:** Bell 100 Series; 212A Series **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Status indicators; Auto disconnect **Support equip** Cables; Software **Introduced:** 1982 **Cost:** $695

☐ 2400 Half Card
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103A; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto dial; Auto. adaptive equalizer; OEM board config.; Tone and pulse dialing; CCITT V.22 bis compatible **Support equip** Software **Introduced:** 1985 **Cost:** $595; $695 (includes software)

OMNITEL, INC.

☐ Encore 1200B
Reviewed Sep 1985 p. 60.
Up to 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Tone and pulse dialing **Support equip** Software **Units sold:** 14,000 since 1984 **Cost:** $299

☐ Model 1200
Up to 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Status indicators; Standalone; Tone and pulse dialing **Units sold:** 10,000 since 1984 **Cost:** $349

1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto dial; Alternate voice/data **Introduced:** 1984 **Cost:** $475 (X100); $499 (X150); $495 (M125)

☐ TriModem
Up to 300; 1,200 bps **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Answer only; Status indicators; Rackmount; Standalone; Racal-Vadic 3400 compatible **Introduced:** 1982 **Cost:** $950 (standalone); $850 (rackmount)

☐ 212 Terminal-Controlled Modem
Up to 300; 1,200 bps **Comparable to:** Bell 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Auto dial; Modem pooling; Non-volatile memory **Introduced:** 1983 **Cost:** $795 (standalone); $850 (rackmount)

☐ 9600A/B Data Modem
9,600 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Auto. adaptive equalizer; Status indicators; V.29 compatible; 7,200 or 4,800 bps fallback **Introduced:** 1984 **Cost:** $2,150 (standalone); $2,050 (rackmount)

PROCESSING INNOVATIONS, INC.

☐ Speech-Aided Modem
1,200 bps **Comparable to:** Bell 202C **Transmission:** Asynchronous **Mode:** Simplex **Features:** Auto answer; Status indicators; Digital speech synthesis; Voice output interface (hand-held terminal to host); RJ-11C input **Units sold:** 600 since 1978 **Cost:** $995-$6,995

PROMETHEUS PRODUCTS, INC.

☐ ProModem 1200
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Auto dial; Standalone; Tone and pulse dialing; Alphanumeric display; Optional transmit/receive buffer **Units sold:** 40,000 since 1983 **Cost:** $495

☐ ProModem 1200B; 1200B/2
Reviewed Sep 1985 p. 60.
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Tone and pulse dialing **Support equip** Software **Units sold:** 12,500 since 1984 **Cost:** $299 (includes software)

☐ ProModem 1200M
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; Standalone; Optional buffer memory; Tone and pulse dialing; Alphanumeric display **Support equip** Cables; Software **Units sold:** 10,000 since 1985 **Cost:** $549 (includes software)

☐ ProModem 2400
0-300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Units sold:** 1,500 since 1986 **Cost:** $595

☐ ProModem 2400M
0-300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Units sold:** 1,500 since 1986 **Cost:** $595

QIC RESEARCH, INC.

☐ QIC-03
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous **Mode:** HDX; 4-wire FDX; 2-wire FDX **Features:** Auto answer; Auto dial; OEM board config.; Auto speed detection **Support equip** Cables; Software **Units sold:** 5,000 since 1984 **Cost:** $199

☐ QIC-1200X
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Originate/answer; Status indicators; Standalone; Tone and pulse dialing **Support equip** Cables; Software **Units sold:** 3,000 since 1984 **Cost:** $299

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ Quadmodem II
110; 300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX; 4-wire FDX **Features:** Auto answer; Auto dial; Call progress monitoring **Support equip** Software **Introduced:** 1985 **Cost:** $495 (300/1,200 bps); $795 (300/1,200/2,400 bps)

QUBIE

☐ Model 212A/1200E
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Features:** Auto answer; Auto dial; Status indicators; Standalone; Tone and pulse dialing **Support equip** Cables; Software; manuals **Units sold:** 25,000 since 1983 **Cost:** $199

☐ PC 212A/1200
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Features:** Auto answer; Auto dial; Originate/answer; Tone and pulse dialing **Support equip** Cables; Software; manuals **Units sold:** 25,000 since 1983 **Cost:** $179 (includes PC-Talk III software)

QYTEL
(division of Consolidated Data Systems, Ltd.)

☐ DCX201
2,400 bps **Comparable to:** Bell 201CR **Transmission:** Synchronous **Mode:** HDX **Features:** Auto answer; Answer only; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators; Satellite capabilities **Units sold:** 3,400 since 1980 **Cost:** $695; Lease (mo.) —$50

☐ DCX208A
4,800 bps **Comparable to:** Bell 208AR **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Multiple data rates; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators **Units sold:** 2,600 since 1980 **Cost:** $1,395; Lease (mo.) —$60

☐ DCX208B
2,400; 4,800 bps **Comparable to:** Bell 208BR **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Multiple data rates; Auto answer; Answer only; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators **Units sold:** 2,200 since 1980 **Cost:** $1,495; Lease (mo.) —$65

☐ DCX212
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX; 4-wire FDX **Features:** Multiple data rates; Auto answer; Answer only; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators; Auto dial; Error correction **Units sold:** 7,750 since 1980 **Cost:** $395-$695; Lease (mo.) —$15-$35

RACAL-VADIC
(subsidiary of Racal Electronics, Ltd.)

☐ Model 2400V
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212; 103 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Alternate voice/data; Auto dial; Status indicators; Standalone; Auto tone and pulse selection; V.22 bis compatible **Units sold:** 8,000 since 1985 **Cost:** $595 (George software-$79)

☐ VA4492E
2,400; 1,200; 300 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Cost:** $1,-595

☐ 1200PA
1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; 15 telephone number storage **Introduced:** 1985 **Cost:** $495

☐ 1200PC
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto answer; Auto dial **Support equip** Software **Introduced:** 1984 **Cost:** $295 (includes software)

☐ 1200VP
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Introduced:** 1986 **Cost:** $350

☐ 2400PA
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212; 103 **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Auto log-on; 15 telephone number storage; V.22 bis compatible; Modem management; Speed conversion; MNP error control **Units sold:** 13,000 since 1985 **Cost:** $795

☐ 2400PA-S
1,200; 2,400 bps **Comparable to:** Bell 212 **Transmission:** Synchronous **Mode:** FDX **Features:** Auto dial; V.22 bis compatible **Units sold:** 2,000 since 1985 **Cost:** $795

☐ 2400PC
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous **Mode:** FDX **Features:** Alternate voice/data; Auto dial; Auto tone and pulse selection **Support equip** Software **Units sold:** 1,000 since 1985 **Cost:** $595 (George software-$79)

☐ 4850PA
4,800; 2,400 bps **Comparable to:** Bell 208B **Transmission:** Synchronous **Mode:** **Introduced:** 1986 **Cost:** $1,295

☐ 9600VP
9,600; 1,200; 300 Async; Sync 9,600; 7,200; 4,800; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** HDX; FDX **Features:** Auto speed detection; Speed conversion; MNP error control **Introduced:** 1986 **Cost:** $1,495

☐ 9650 FT/PA
9,600; 7,200; 4,800 bps **Transmission:** Synchronous **Introduced:** 1986 **Cost:** $1,695

ROCKWELL INTERNATIONAL CORP.
Semiconductor Products Division

☐ R48DP/208
4,800 bps **Comparable to:** Bell 208 **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Auto. adaptive equalizer; CCITT V.27 bis/ter compatible **Introduced:** 1986 **Cost:** $290

SIERRA/MISCO, INC.

☐ Model 5071TM-A
300 bps; Hayes compatible **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** 4-wire FDX **Features:** Auto answer; Standalone **Support equip** Cables **Units sold:** 25 since 1983 **Cost:** $350 (includes cable)

☐ Model 5071TM-AAAD
1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Standalone **Support equip** Cables **Units sold:** 9 since 1984 **Cost:** $675

SPECTRUM CELLULAR CORP.

☐ The Bridge
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Error correction **Introduced:** 1985 **Cost:** $695

SUNNYVALE COMMUNICATIONS CO.

☐ 1200LC
300; 1,200 bps; Hayes compatible **Features:** Auto answer; Auto dial; Standalone; Tone and pulse dialing **Support equip** Cables **Cost:** $199

SUPRA CORP.

☐ Supra 1200 AT
300; 1,200 bps **Cost:** $200

TANDY/RADIO SHACK

☐ DCM 3 (26-1178)
300 bps **Comparable to:** Bell 103 **Mode:** FDX **Introduced:** 1986 **Cost:** $60

☐ DCM 5 (26-1177)
300 bps **Comparable to:** Bell 103 **Mode:** HDX; FDX **Introduced:** 1986 **Cost:** $130

☐ DC2212 Modem (26-1176)
300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Features:** Auto answer; Auto dial **Cost:** $400

☐ 1200 Baud PC Modem Board (25-1013)
1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Features:** Multiple data rates; Originate/answer **Introduced:** 1985 **Cost:** $300

☐ 300 Baud Modem Board (25-1003)
300 bps **Transmission:** Asynchronous **Features:** Auto answer; Auto dial; Originate/answer **Cost:** $150

TECMAR, INC.

☐ Phonegate 2400
300-2,400 bps; Hayes compatible **Features:** Alternate voice/data; Auto answer; Auto dial **Support equip** Software **Introduced:** 1985 **Cost:** $789

☐ T-Modem
2,400; 1,200; 600; 300; 110 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Cost:** $695

TEK-COM CORP.

☐ TC 1200PC
Up to 1,200 bps **Comparable to:** Bell 103A; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Introduced:** 1986 **Cost:** $299; $349 (includes software)

☐ TC 1212
Up to 4,800 bps **Comparable to:** Bell 103A; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Introduced:** 1986 **Cost:** $595

☐ TC 1911EM
Up to 2,400 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Introduced:** 1986 **Cost:** $695 (standalone); $675 (rackmount)

☐ TC 1915EM
Up to 4,800 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Introduced:** 1986 **Cost:** $995 (standalone); $975 (rackmount)

☐ TC 1921EM
Up to 9,600 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Introduced:** 1986 **Cost:** $1,495 (standalone); $1,475 (rackmount)

☐ TC 1924EM
Up to 9,600 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Introduced:** 1986 **Cost:** $1,995 (standalone); $1,975 (rackmount)

☐ TC 1926EM
Up to 14.4K bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Introduced:** 1986 **Cost:** $3,995 (standalone); $3,975 (rackmount)

☐ TC 212AD
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Standalone; Tone and pulse dialing **Units sold:** 12,000 since 1985 **Cost:** $359

☐ TC 2400PC
Up to 2,400 bps **Comparable to:** Bell 212A; 103A **Transmission:** Asynchronous **Mode:** HDX; FDX **Introduced:** 1986 **Cost:** $499; $549 (includes software)

☐ TC 2400SA
Up to 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Introduced:** 1986 **Cost:** $549; $599 (includes software)

☐ TC 2424
Up to 9,600 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Introduced:** 1986 **Cost:** $795

☐ TC 4700
Up to 300 bps **Comparable to:** Bell 103J **Transmission:** Asynchronous **Mode:** 2-wire FDX; HDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Auto dial and redial **Units sold:** 10,000 since 1978 **Cost:** $325

TELE-SIGNAL CORP.

☐ Model 883P
2,400 bps **Comparable to:** Bell 201A/B **Transmission:** Synchronous **Mode:** HDX **Features:** Multiple data rates **Units sold:** 890 since 1973 **Cost:** $500

TELEBIT CORP.

☐ TrailBlazer
Up to 10K bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Cost:** $2,395

TELENETICS CORP.

☐ ExpressData 12i
300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Answer only; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; OEM board config.; Tone and pulse dialing **Units sold:** 2,600 since 1985 **Cost:** $395

☐ ExpressData 24i
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Answer only; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; OEM board config.; Tone and pulse dialing **Support equip** Cables; Software **Units sold:** 2,800 since 1985 **Cost:** $595

☐ Model 12A
1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Standalone; CCITT V.22 compatible **Units sold:** 200 since 1986 **Cost:** $345

☐ Model 12i/2
1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; OEM board config.; CCITT V.22, V.22 bis compatible **Units sold:** 300 since 1986 **Cost:** $445

☐ Model 12S
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Answer only; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; OEM board config.; Tone and pulse dialing; Optional error control **Support equip** ROM **Units sold:** 1,200 since 1985 **Cost:** $495

☐ Model 12S/R
1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Rackmount; CCITT V.22, V.22 bis compatible **Units sold:** 100 since 1985 **Cost:** $445

☐ Model 24A
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Standalone; CCITT V.22, V.22 bis compatible **Units sold:** 200 since 1986 **Cost:** $495

☐ Model 24i/2
2,400; 1,200; 300 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; OEM board config.; CCITT V.22, V.22 bis compatible **Units sold:** 1,500 since 1986 **Cost:** $545

☐ Model 24S
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Answer only; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Standalone; OEM board config.; Tone and pulse dialing; Optional error control; V.22 bis compatible **Support equip** ROM **Units sold:** 1,400 since 1985 **Cost:** $695

☐ Model 24S/R
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Answer only; Originate only; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; Tone and pulse dialing; V.22 bis compatible **Units sold:** 500 since 1985 **Cost:** $645

☐ Model 9600
9,600; 7,200; 4,800; 2,400 bps; Hayes compatible **Transmission:** Asynchronous; Synchronous **Mode:** HDX **Features:** Alternate voice/data; Auto answer; Auto dial; Auto. adaptive equalizer; Standalone; OEM board config. **Introduced:** 1986 **Cost:** $1,595

TELTONE CORP.

☐ T-300
300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Password security system; DTMF to ASCII conversion **Units sold:** 1,000 since 1984 **Cost:** $400

TELXON CORP.

☐ DCM1-202
1,200 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX **Features:** Multiple data rates; Originate/answer **Cost:** $300-$600

☐ DCM2-202
1,200 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX **Features:** Multiple data rates; Originate/answer **Cost:** $300-$600

TEO SYSTEMS, INC.

☐ SmartPro
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Status indicators; Tone and pulse dialing **Support equip** Cables; Software **Units sold:** 500 since 1985 **Cost:** $499

THEALL ENGINEERING CO.

☐ JC-1200A Super Modemphone
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Originate/answer; Status indicators; Standalone; Tone and pulse dialing **Cost:** $290

TNW CORP.

☐ Operator-103
Up to 300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Auto answer; Originate/answer; Auto dial **Units sold:** 500 since 1983 **Cost:** $99

TOUCHBASE DESIGN

☐ TravelComm 1200 Micro
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Tone dialing; Battery operated **Units sold:** 5,000 since 1985 **Cost:** $249

TRANSCOM, INC.
(subsidiary of Digital Matrix Corp.)

☐ Model 400-1
80 bps **Comparable to:** Bell 401J; 407 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Answer only **Units sold:** 1,200 since 1976 **Cost:** $685

☐ Model 400-3
80 bps **Comparable to:** Bell 403D **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Answer only **Units sold:** 550 since 1977 **Cost:** $660

☐ Model 400-3AN
80 bps **Comparable to:** Bell 403D **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Answer only **Units sold:** 300 since 1978 **Cost:** $780

☐ Model 400-7A/B
80 bps **Comparable to:** Bell 403D **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Answer only **Units sold:** 800 since 1979 **Cost:** $670

☐ Model 400-7C
80 bps **Comparable to:** Bell 403D; 407C **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Answer only **Units sold:** 250 since 1981 **Cost:** $670

TRANSEND CORP.

☐ InfoPHONE IPI-1200
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Automatic voice/data switching **Support equip** Software **Introduced:** 1984 **Cost:** $359; $499 (includes software)

☐ InfoPHONE IPX-1200
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** FDX **Features:** Auto answer; Auto dial; Standalone; Automatic voice/data switching **Support equip** Software **Introduced:** 1984 **Cost:** $399; $549 (includes software)

TRI-DATA

☐ OZ Guardian Model 533
1,200; 300; 110 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Status indicators; Password and call back; Log-on sequencing **Support equip** Cables **Units sold:** 6,500 since 1983 **Cost:** $750

TUCK ELECTRONICS, INC.

☐ Model 1653
1,200 bps **Comparable to:** Bell 202C/D **Transmission:** Asynchronous **Mode:** HDX; 4-wire FDX; 2-wire FDX **Features:** Can be used on 2-, 4-wire private line **Support equip** Cables **Introduced:** 1976 **Cost:** $275

☐ Model 1840
Up to 300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Standalone; Computer voice-response path; Touch-tone decoding **Introduced:** 1982 **Cost:** $600

☐ Model 1841
Up to 300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Rackmount; Computer voice-response path; Touch-tone decoding **Introduced:** 1982 **Cost:** $580

☐ Model 1842
Up to 300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Standalone; Computer voice-response path; Touch-tone decoding **Introduced:** 1982 **Cost:** $730

☐ Model 1843
Up to 300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Rackmount; Computer voice-response path; Touch-tone decoding **Introduced:** 1982 **Cost:** $710

☐ Model 1844
Up to 300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Standalone; Computer voice-response path; Touch-tone decoding **Introduced:** 1982 **Cost:** $790

☐ Model 1845
Up to 300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Rackmount; Computer voice-response path; Touch-tone decoding **Introduced:** 1982 **Cost:** $770

☐ Model 1850
300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Standalone; Over 200-word vocabulary in on-board voice synthesizer; Touch-tone decoding **Introduced:** 1983 **Cost:** $895

☐ Model 1851
300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Rackmount; Over 200-word vocabulary in on-board voice synthesizer; Touch-tone decoding **Introduced:** 1983 **Cost:** $995

☐ Model 1852
300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Standalone; Over 200-word vocabulary in on-board voice synthesizer; Touch-tone decoding **Introduced:** 1984 **Cost:** $995

☐ Model 1853
300 bps **Comparable to:** Bell 407C replacement; 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Status indicators; Rackmount; Over 200-word vocabulary in on-board voice synthesizer; Touch-tone decoding **Introduced:** 1984 **Cost:** $995

UNIQ FOUR, INC.

☐ UFI Internal Security Modem
300; 1,200 bps **Transmission:** Asynchronous **Mode:** HDX; FDX **Cost:** $449

☐ UFI Security Modem
300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Cost:** $499

☐ UNIQMODEM 1200 HC
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Alternate voice/data; Auto answer; Auto dial; Status indicators; Standalone; Auto-speed **Units sold:** 14,000 since 1985 **Cost:** $389

☐ UNIQMODEM 1200 HCI
300; 1,200 bps **Transmission:** Asynchronous **Mode:** HDX; FDX **Cost:** $289

UNIVERSAL DATA SYSTEMS, INC.
(subsidiary of Motorola, Inc.)

☐ EC224A/D
2,400; 1,200; 300 bps **Comparable to:** Bell 212; 103 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Introduced:** 1986 **Cost:** $695

☐ FasTalk 1200
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial **Support equip** Software **Introduced:** 1985 **Cost:** $450

☐ FasTalk 1200 PC
0-300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial **Support equip** Software **Introduced:** 1985 **Cost:** $450

☐ FasTalk 2400
0-300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 103; 212 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Auto baud detection **Support equip** Software **Introduced:** 1985 **Cost:** $595 (includes software)

☐ Model 103J
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer **Introduced:** 1979 **Cost:** $425

☐ Model 103J LP
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Telco line powered **Introduced:** 1980 **Cost:** $165

☐ Model 202S/D
0-1,200 bps **Comparable to:** Bell 202 Series **Transmission:** Asynchronous; Synchronous **Mode:** HDX **Features:** Auto answer; Auto dial **Introduced:** 1985 **Cost:** $495

☐ Model 208A/B
4,800 bps **Comparable to:** Bell 208 **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Auto answer; Auto. adaptive equalizer; Anti-streaming **Introduced:** 1978 **Cost:** $1,295

☐ Model 208AB/AS
4,800 bps **Comparable to:** Bell 208 **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 4-wire FDX **Introduced:** 1986 **Cost:** $1,350

☐ Model 208B/D
4,800 bps **Comparable to:** Bell 208 **Transmission:** Synchronous **Mode:** HDX **Introduced:** 1986 **Cost:** $1,495

☐ Model 208B/LS
4,800 bps **Comparable to:** Bell 208 **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Introduced:** 1986 **Cost:** $1,595

☐ Model 212A
Up to 300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer **Introduced:** 1982 **Cost:** $495

☐ Model 212A LP
0-300; 1,200 bps **Comparable to:** Bell 212A (high-speed ch.) **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Telco line powered **Introduced:** 1984 **Cost:** $195

☐ Model 212A/D
Up to 300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto answer; Originate/answer; Status indicators; Auto dial; Battery-backed telephone number memory; Command menu **Introduced:** 1982 **Cost:** $545

☐ Model 9600A/B
7,200; 9,600; 4,800 bps **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Alternate voice/data; Auto answer; Auto. adaptive equalizer; Status indicators; 30 msec RTS/CTS delay; V.29 compatible in 4-wire **Introduced:** 1983 **Cost:** $1,995

☐ Sync-Up 201C
2,400 bps **Comparable to:** Bell 201 **Transmission:** Synchronous **Mode:** HDX **Features:** Auto answer; Auto dial; Tone and pulse dialing **Support equip** Software **Introduced:** 1985 **Cost:** $685 (includes software)

☐ Sync-Up 208A/B
4,800 bps **Comparable to:** Bell 208 **Transmission:** Synchronous **Mode:** HDX; 4-wire FDX **Features:** Auto answer; Auto dial; Tone and pulse dialing **Support equip** Software **Introduced:** 1985 **Cost:** $1,200 (includes software)

US ROBOTICS, INC.

☐ Autodial 212A
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Auto dial; Status indicators **Introduced:** 1982 **Cost:** $599

☐ CORE OEM
300; 1,200 bps **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer; Auto answer; Auto dial; RJ-11C connection **Introduced:** 1983

☐ Courier 2400; 2400e
Reviewed May 1985 p. 25.
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer; Auto. adaptive equalizer; Status indicators; Standalone; Auto dial; Auto answer; Pulse dialing; V.22 bis compatible **Introduced:** 1985 **Cost:** $699

☐ Courier 9600
9,600; 2,400; 1,200 bps **Transmission:** Asynchronous **Mode:** FDX **Introduced:** 1986

☐ Microlink 1200
Reviewed Sep 1985 p. 60.
0-300; 1,200 bps **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Auto dial; Originate/answer; Battery backup; Audio line monitor; 64-256K RAM **Units sold:** 3,000 since 1984 **Cost:** $499; $619 (64K); $839 (256K)

☐ **Microlink 2400**
300; 1,200; 2,400 bps **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer; Auto. adaptive equalizer; Auto dial; Auto answer; Pulse dialing; V.22 bis compatible **Introduced:** 1985 **Cost:** $699

☐ **Password**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Auto dial; RJ-11C connection **Introduced:** 1983 **Cost:** $449

☐ **Password 300**
300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; RJ-11C connection **Introduced:** 1984 **Cost:** $199

☐ **Rackmount 30 Modem System**
2,400; 1,200; 300 bps **Transmission:** Asynchronous **Introduced:** 1986

☐ **USR S100**
300; 1,200 bps **Comparable to:** Bell 103; 113; 212 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Auto dial; RJ-11C connection **Introduced:** 1983 **Cost:** $499

VEN-TEL, INC.

☐ **EC1200-1**
Up to 300; 1,200 bps **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Status indicators; Rackmount; Standalone **Support equip** Cables **Units sold:** 50,000 since 1979 **Cost:** $425-$445

☐ **Half Card 24**
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; V.22, V.22 bis compatible **Support equip** Cables **Units sold:** 5,000 since 1983 **Cost:** $695

☐ **MD202-1, 2E**
Up to 1,200 bps **Comparable to:** Bell 202S **Transmission:** Asynchronous **Mode:** HDX **Features:** Auto answer; Originate/answer; Rackmount; Standalone **Support equip** Cables **Units sold:** 10,000 since 1978 **Cost:** $310-$380

☐ **MD212 Security Plus (MD212-7E, 8)**
Up to 300; 1,200 bps **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; Status indicators; Rackmount; Standalone; Password security; Auto log-on **Support equip** Cables **Units sold:** 6,000 since 1982 **Cost:** $675

☐ **OEM-2121**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; OEM board config. **Units sold:** 50,000 since 1984

☐ **PCM-XT**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial **Support equip** Cables **Units sold:** 5,000 since 1983 **Cost:** $549

☐ **1200 Plus (EC1200-32)**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Status indicators **Support equip** Cables **Units sold:** 20,000 since 1983 **Cost:** $499

☐ **212 Plus (EC1200-31, 41)**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Auto answer; Originate/answer; Auto dial; Rackmount; Standalone **Support equip** Cables **Units sold:** 100,000 since 1979 **Cost:** $445-$495

☐ **212 Plus II (MD212-5E, 6)**
Up to 300; 1,200 bps **Comparable to:** Bell 103; 113; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Auto answer; Originate/answer; Auto dial; Rackmount; Standalone; Memory dial; Number/protocol/destination memory storage; Software disconnect; Auto log-on **Support equip** Cables **Units sold:** 5,000 since 1982 **Cost:** $585-$625

☐ **2400 Plus (EC2400-32, 42)**
Up to 300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Auto answer; Auto dial; Originate/answer; Rackmount; Standalone; V.22, V.22 bis compatible **Support equip** Cables **Units sold:** 10,000 since 1984 **Cost:** $645-$695

VICTOR TECHNOLOGIES, INC.

☐ **Model 6260**
Up to 300 bps **Cost:** $245

☐ **Model 6261**
1,200 bps **Cost:** $495

☐ **Model 6262**
Up to 300; 1,200 bps **Cost:** $695

VISIONARY ELECTRONICS, INC.

☐ **Visionary 1200XT**
300; 1,200 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Multiple data rates; Reverse channel; Multiport capability; Auto answer; Auto dial; Answer only; Originate/answer; Status indicators; Standalone; Sends and receives independently of host computer; On-board RAM; Clock/calendar; Error correction **Support equip** Cables; Software **Introduced:** 1985 **Cost:** $495 (8K)

VOTRAX, INC.

☐ **DTMF Modem**
Up to 300 bps **Comparable to:** Bell 407 **Transmission:** Asynchronous **Mode:** FDX **Features:** Status indicators; Rackmount; Interfaces Votrax LVM Business Communicator and incoming phone lines **Introduced:** 1980 **Cost:** $700

WESTERN DATACOM

☐ **Datacom 407 Tone Modem**
Comparable to: Bell 407 **Mode:** 2-wire FDX **Features:** Auto dial; Status indicators; Rackmount; Tone and pulse dialing; Automatic speed and parity detection; Last number redial **Units sold:** 221 since 1984 **Cost:** $595

☐ **MESA424**
300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Cost:** $995

☐ **WorldCom 200 Auto Dial**
Up to 300; 1,200 bps; Hayes compatible **Comparable to:** Bell 103; 113; 202 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Originate/answer; Status indicators; Auto dial; V.21, V.23, Videotex compatible **Units sold:** 929 since 1983 **Cost:** $495

☐ **424 Error Free**
300; 1,200; 2,400 bps; Hayes compatible **Comparable to:** Bell 212A; 103 **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Alternate voice/data; Auto dial; Originate/answer; Auto. adaptive equalizer; Status indicators; Rackmount; V.22 bis compatible **Units sold:** 1,107 since 1984 **Cost:** $695

WGE INTERNATIONAL, LTD.

☐ **Pico Power Modem I**
300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** 2-wire FDX **Cost:** $230

WOLFDATA, INC.

☐ **X.25 LAPB Modem/PAD**
110; 300; 1,200 bps **Comparable to:** Bell 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Multiple data rates; Alternate voice/data; Auto answer; Auto dial; Originate/answer; Status indicators; Standalone; OEM board config.; Compatible with GTE Telenet and Tymnet packet-switching networks **Units sold:** 2,000 since 1984 **Cost:** $595

WORTHINGTON-BABCOCK, INC.

☐ **TURBOLINK 1200**
300; 1,200 bps; Hayes compatible **Features:** Auto answer; Auto dial; Status indicators; Standalone **Support equip** Cables; Software **Cost:** $280

ZOOM TELEPHONICS, INC.

☐ **Networker**
300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Originate/answer **Units sold:** 20,000 since 1982 **Cost:** $99; $119 (includes Netmaster software)

☐ **ZOOM/MODEM PC 1200**
1,200; 300 bps; Hayes compatible **Comparable to:** Bell 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Auto answer; Auto dial; Auto redial **Units sold:** 5,000 since 1985 **Cost:** $299-$349

☐ **ZOOM/MODEM PC 2400**
300; 1,200; 2,400 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous **Mode:** HDX; FDX **Introduced:** 1986 **Cost:** $499-$549

ACOUSTIC COUPLERS

ANDERSON JACOBSON, INC.

☐ **AJ 1232**
0-300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** 2-wire FDX **Features:** Originate only **Introduced:** 1983 **Cost:** $635

☐ **AJ 1233**
Up to 300; 1,200 bps **Comparable to:** Bell 103; 212A **Transmission:** Asynchronous; Synchronous **Mode:** FDX **Features:** Originate only; Can be used with direct connection **Introduced:** 1982 **Cost:** $635

☐ **AJ 1235**
150; 300; 450; 600 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous; Synchronous **Mode:** HDX; 4-wire FDX **Features:** DDD and private line capabilities **Introduced:** 1981 **Cost:** $595; Lease (mo.) —$52

☐ **AJ 1245**
0-450; 1,200 bps **Comparable to:** Bell 103; 202 **Transmission:** Asynchronous **Mode:** 2-wire FDX; HDX **Features:** Originate/answer; DDD capabilities using DAA **Introduced:** 1978 **Cost:** $545; Lease (mo.) — $47; $42 (1 yr.)

☐ **AJ 242A**
300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** HDX; 4-wire FDX **Features:** Originate only **Introduced:** 1977 **Cost:** $195

BACKUS DATA SYSTEMS, INC.
(subsidiary of Astronautics Corp. of America)

☐ **AC312**
Up to 300 bps **Comparable to:** Bell 100 Series **Transmission:** Asynchronous **Mode:** 2-wire FDX; HDX **Features:** Originate/answer; Status indicators **Units sold:** 20,000 since 1975 **Cost:** $199

COMDATA CORP.

☐ **Model 302C2-13**
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Status indicators; Records and stores data on audio cassette recorder; Data on/off switch; Recorder/block switch **Introduced:** 1974 **Cost:** $177

CTS FABRI-TEK, INC.
DATACOMM Products Division

☐ **CTS companionPAC**
0-300 bps **Comparable to:** Bell 103 **Mode:** 2-wire FDX **Features:** Originate/answer; Battery operated **Introduced:** 1984 **Cost:** $79

DATEC, INC. (NC)

☐ Model 30
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Originate only; Crystal controlled **Units sold:** 9,213 since 1976 **Cost:** $235

DIGITAL EQUIPMENT CORP.

☐ DF01
Up to 300 bps **Mode:** HDX; 2-wire FDX; 4-wire FDX

☐ DF01-A/JB
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Units sold:** 950 since 1978 **Cost:** $345

HEWLETT-PACKARD CO.

☐ HP 82168A
300 bps **Comparable to:** Bell 113 **Cost:** $495

INCOMM DATA SYSTEMS, INC.

☐ AC Acoustic Coupler
300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Originate/answer **Units sold:** 6,900 since 1982 **Cost:** $159

INMAC

☐ Model 8045
Up to 300 bps **Comparable to:** Bell 103A **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Originate/answer; Direct connection **Support equip** Cables **Units sold:** 9,000 since 1980 **Cost:** $179

M/A-COM INFORMATION SYSTEMS, INC.

(division of M/A-COM, Inc.)

☐ Model 242A
110-300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** HDX; FDX **Features:** Originate only

MCDONNELL DOUGLAS INFORMATION SYSTEMS GROUP

(component of McDonnell Douglas Corp.)

☐ Model 900
Comparable to: Bell 103-II **Transmission:** Asynchronous **Mode:** FDX **Features:** Originate only; Status indicators; Operates at 30 cps **Introduced:** 1974 **Cost:** $325; Lease (mo.) —$20

MFJ ENTERPRISES, INC.

☐ MFJ-1233
Up to 300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** 2-wire FDX **Features:** Originate/answer; AC or battery operation **Introduced:** 1981 **Cost:** $130

MISCO, INC., COMPUTER SUPPLIES

☐ Model 1001
300 bps **Comparable to:** Bell 103 **Mode:** FDX **Cost:** $179

MULTI-TECH SYSTEMS, INC.

☐ FM30
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX; HDX **Features:** Originate only; Status indicators **Introduced:** 1976 **Cost:** $225

☐ FM31
Up to 300 bps **Comparable to:** Bell 103; 113 **Transmission:** Asynchronous **Mode:** 2-wire FDX; HDX **Features:** Originate/answer; Status indicators **Introduced:** 1979 **Cost:** $265

NOVATION, INC.

☐ CAT Acoustic
Up to 300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Originate/answer; Status indicators **Support equip** Cables; Software **Introduced:** 1978 **Cost:** $169

☐ CCITT CAT
Up to 300 bps **Transmission:** Asynchronous **Mode:** HDX; 2-wire FDX **Features:** Originate/answer; Status indicators **Support equip** Cables; Software **Introduced:** 1980 **Cost:** $299

TANDY/RADIO SHACK

☐ AC-4 (26-1179)
300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** HDX **Features:** Originate/answer **Cost:** $120

TEK-COM CORP.

☐ TC 3001
Up to 300 bps **Comparable to:** Bell 103F; 113A **Transmission:** Asynchronous **Mode:** 2-wire FDX; HDX **Features:** Originate only; DDD via DAA **Units sold:** 3,000 since 1977 **Cost:** $199

☐ TC 3002
Up to 300 bps **Comparable to:** Bell 103F; 113A **Transmission:** Asynchronous **Mode:** 2-wire FDX; HDX **Features:** Originate/answer; DDD via DAA **Units sold:** 4,000 since 1977 **Cost:** $199

TELXON CORP.

☐ AC1-1200
1,200 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX **Features:** Multiple data rates; Originate/answer **Cost:** $100

☐ AC2-1200
600; 1,200 bps **Comparable to:** Bell 202 **Transmission:** Asynchronous **Mode:** HDX **Features:** Multiple data rates; Originate/answer **Cost:** $200-$500

☐ AC2-300
300 bps **Comparable to:** Bell 103 **Transmission:** Asynchronous **Mode:** Simplex **Cost:** $200-$500

TRANSCOM, INC.

(subsidiary of Digital Matrix Corp.)

☐ Model 116 TT
80 bps **Transmission:** Asynchronous **Features:** Originate only **Units sold:** 800 since 1975 **Cost:** $160

☐ Model 160 1T
80 bps **Transmission:** Asynchronous **Features:** Originate only **Units sold:** 15,000 since 1973 **Cost:** $550

LOCAL AREA NETWORKS

ADVANCED TRANSDUCER DEVICES, INC.

☐ Zuckerboard LAN
Topology: Bus **Cabling:** Twisted pair cable **Maximum connections:** 64 **Transmission speed:** 1.2M bps

ALLEN-BRADLEY

Communications Division

☐ LAN/I
Topology: Bus **Discipline:** Broadband **Technique:** Token passing (statistical polling) **Maximum distance:** 14 miles without bridges or repeaters

☐ LAN/II
Topology: Bus **Discipline:** Broadband; Baseband **Maximum distance:** 40 miles without bridges or repeaters **Gateway:** X.25; Ethernet

☐ LAN/PC
Topology: Bus **Discipline:** Broadband **Maximum distance:** 14 miles without bridges or repeaters **Gateway:** BSC; SNA; X.25

APPLITEK CORP.

☐ UniLAN
Topology: Bus; Tree **Discipline:** Broadband; Baseband; Fiberoptic **Technique:** Token passing; Contention; Unilink **Cabling:** Coaxial cable; Optical fiber **Maximum connections:** Baseband-1,000; Broadband-40,000; Optical Fiber-1,000 **Transmission speed:** 10M bps **Maximum distance:** Broadband-30 kilometers; Baseband-2.5 kilometers; Optical Fiber-30 kilometers without bridges or repeaters **Interfaces used:** IEEE-488; RS-232; RS-449; V.35; V.24; Mil. Std. 188 **Gateway:** BSC; SDLC; HDLC; X.25; SNA; Ethernet; T1 **Units sold:** 500 since 1984 **Cost:** $460 (broadband); $420 (baseband); $443 (fiberoptic)

ARTEL COMMUNICATIONS CORP.

☐ FiberWay
Topology: Physical ring (series) **Discipline:** Broadband **Gateway:** Ethernet **Introduced:** 1986

AST RESEARCH, INC.

SEE AD ON PAGES 161/172/173/174/175

☐ AST-PCnet II
Topology: Bus **Discipline:** Baseband **Technique:** Contention (CSMA/CA) **Cabling:** Twisted pair cable **Maximum connections:** 160 **Transmission speed:** 800K bps **Maximum distance:** 2,500 ft. with bridges or repeaters **Interfaces used:** Gateway: SNA; HDLC **Introduced:** 1984 **Cost:** $495

☐ AST-Resource Sharing Network
Topology: Bus **Discipline:** Baseband **Technique:** Contention (CSMA/CD) **Cabling:** Coaxial cable **Maximum connections:** 64 **Transmission speed:** 5M bps **Maximum distance:** 1,500 ft. without bridges or repeaters **Gateway:** BSC; SNA **Introduced:** 1985 **Cost:** $495/node; $1,295 (starter kit)

AT&T INFORMATION SYSTEMS

☐ STARLAN
Topology: Star **Discipline:** Baseband **Technique:** Contention (CSMA/CD) **Cabling:** Twisted pair cable **Maximum connections:** 1,200 **Transmission speed:** 1M bps **Interfaces used:** RS-232 **Gateway:** SNA; X.25; Ethernet **Introduced:** 1985 **Cost:** $720-$790

AUTOCONTROL, INC.

☐ ACSOFT/NET
Topology: Bus **Discipline:** Baseband **Technique:** Contention (CSMA/CD) **Cabling:** Coaxial cable **Maximum connections:** 255 **Transmission speed:** 848K bps **Maximum distance:** 7,000 ft. without bridges or repeaters **Gateway:** SDLC **Units sold:** 4,000 since 1983 **Cost:** $250

AVATAR TECHNOLOGIES, INC.

☐ Alliance
Topology: Physical ring (addressing) **Discipline:** Baseband **Maximum distance:** 1,000 ft. between stations

B-KOMP, INC.

☐ Net-Worker
Topology: Bus; Tree **Discipline:** Baseband **Technique:** Token passing (statistical polling) **Cabling:** Twisted pair cable; Coaxial cable; Optical fiber **Maximum connections:** 4,080 **Transmission speed:** 2.5M bps **Maximum distance:** 22,000 ft. without bridges or repeaters **Gateway:** SDLC; SNA; X.25; Ethernet **Units sold:** 75 since 1984 **Cost:** $750

BANYAN SYSTEMS, INC.

☐ Network Server
Topology: Physical ring (series); Bus **Interfaces used:** RS-232 **Gateway:** BSC; SDLC; SNA; X.25; Ethernet **Introduced:** 1985

BI-TECH ENTERPRISES, INC.

☐ Star Network
Topology: Star **Technique:** High-speed polling **Maximum connections:** 8 **Transmission speed:** 4M bps **Maximum distance:** 1,000 ft. without bridges or repeaters **Interfaces used:** Parallel **Units sold:** 1,600 since 1983 **Cost:** $325

BRAEGEN CORP.

☐ ELAN 8600
Topology: Bus Introduced: 1986 Cost: $17,995

BRIDGE COMMUNICATIONS, INC.

☐ CS/1-TR
Topology: Physical ring (series) Technique: Token passing (statistical polling) Introduced: 1986 Cost: $16,000; $250/port

BROAD COM, INC.

☐ Synapsistem
Topology: Star Discipline: Broadband Maximum connections: Unlimited Transmission speed: 5M bps Introduced: 1985 Cost: $500

CAD DESIGN SYSTEMS, INC.

☐ CadNET
Topology: Bus Maximum connections: 16 Transmission speed: 800K-1M bps Maximum distance: 3,500 ft. without bridges or repeaters Cost: $595/workstation

CALIFORNIA NETWORK SYSTEMS

☐ NetServer
Introduced: 1985 Cost: $6,225

CENTRAM SYSTEMS WEST, INC.

☐ TOPS
Topology: Bus Discipline: Baseband Technique: Contention (CSMA/CD) Cabling: Twisted pair cable Maximum connections: 32 Transmission speed: 800K bps Maximum distance: 2,000 ft. without bridges or repeaters Interfaces used: RS-232 Gateway: AppleTalk Units sold: 250 since 1984 Cost: $149/Macintosh; $389/PC

CLASSIC TECHNOLOGY, INC.

☐ ClassicNet
Topology: Physical ring (addressing); Star Discipline: Broadband Maximum connections: 16 Transmission speed: 16M bps Maximum distance: 500 ft. without bridges or repeaters Interfaces used: RS-232; RS-422; TTL Units sold: 500 since 1985 Cost: $495

CODENOLL TECHNOLOGY CORP.

☐ Codenet
Topology: Passive star Discipline: Baseband Technique: Contention (CSMA/CD) Cabling: Optical fiber Maximum connections: 1,024 Transmission speed: 10M bps Maximum distance: 2.5 kilometers without bridges or repeaters Interfaces used: RS-232 Gateway: Ethernet Units sold: 1,000 since 1983 Cost: $595

CODEX CORP.
(subsidiary of Motorola, Inc.)

☐ 4000 Series LAN
Topology: Bus Discipline: Broadband; Baseband Technique: Contention (CSMA/CD) Cabling: Coaxial cable Maximum connections: 1,024 Transmission speed: 10M bps Maximum distance: (baseband) 500 meters; (broadband) 9 miles without bridges or repeaters Interfaces used: IEEE-488; RS-232; RS-422; CCITT V.35 Gateway: SNA; Ethernet Introduced: 1984 Cost: $200-$600/port

COMPLEXX SYSTEMS, INC.

☐ XLAN
Topology: Bus Discipline: Baseband Technique: CSMA Cabling: Twisted pair cable; Coaxial cable Maximum connections: 192 Transmission speed: 1M bps Maximum distance: 16,000 ft. without bridges or repeaters Interfaces used: RS-232 Units sold: 1,400 since 1983 Cost: $194/port

CONTEL INFORMATION SYSTEMS, INC.
(subsidiary of Continental Telecom, Inc.)

☐ ContelNet
Topology: Bus; Tree Discipline: Broadband; Baseband Technique: Contention (CSMA/CD) Cabling: Coaxial cable Maximum connections: Unlimited Transmission speed: 2M bps; 10M bps Maximum distance: 5 mile radius without bridges or repeaters Interfaces used: RS-232; BSC; HDLC; TTY Gateway: X.25 Units sold: 50 since 1980 Cost: $850/connection

CORE INTERNATIONAL

☐ COREnet
Topology: Bus Technique: Contention (CSMA/CD) Cabling: Twisted pair cable Maximum connections: 10 Transmission speed: 625K bps Maximum distance: 300 ft. without bridges or repeaters Units sold: 75 since 1981 Cost: $1,300-$2,000

CORVUS SYSTEMS, INC.

☐ Corvus Omninet
Reviewed Sep 1984 p. 56.
Topology: Bus; Bus with branching Discipline: Baseband Technique: Contention (CSMA/CA); Positive Acknowledgement Cabling: Twisted pair cable Maximum connections: 64 Transmission speed: 1M bps Maximum distance: 4,000 ft. without bridges or repeaters Interfaces used: Corvus Transporter (RS-422 on network side) Gateway: SNA Units sold: 25,000 since 1981 Cost: $199/connection

CREATIVE LOGIC

☐ WorkMate
Topology: Bus Discipline: Baseband Technique: Contention (CSMA/CA) Cabling: Twisted pair cable Maximum connections: 8 Transmission speed: 250K bps Maximum distance: 5,280 ft. without bridges or repeaters Interfaces used: RS-422 Units sold: 250 since 1983 Cost: $200

DATAPOINT CORP.

☐ ARCnet
Topology: Bus; Tree Discipline: Baseband Technique: Token passing (statistical polling) Cabling: Coaxial cable Maximum connections: 255 Transmission speed: 2.5M bps Maximum distance: 4 miles with bridges or repeaters; 2,000 ft. without bridges or repeaters Interfaces used: RS-232; Datapoint RIM (Resource Interface Module) Gateway: SNA; HDLC; X.25; TLX; TWX Units sold: 6,000 since 1977 Cost: $600

DELTA DATA SYSTEMS CORP.
Service Division

☐ TEMPEST
Topology: Bus Discipline: Baseband Technique: Contention (CSMA/CD) Cabling: Coaxial cable Maximum connections: 100 Transmission speed: 10M bps Maximum distance: 1,500 ft. without bridges or repeaters Gateway: Ethernet Introduced: 1985

THE DESTEK GROUP

☐ DESNET
Topology: Bus; Logical ring (for fiberoptics only) Discipline: Baseband; Broadband Technique: Contention (CSMA/CA) Cabling: Coaxial cable; Optical fiber Maximum connections: Over 350 Transmission speed: 2M bps Maximum distance: 2 kilometers without bridges or repeaters Interfaces used: IEEE-488; RS-232; 8 or 16-bit parallel; S-100 Bus; Multibus; IBM PC; Q-Bus Gateway: Ethernet Units sold: 500 since 1982 Cost: $400-$600/connection

☐ NIB100/08
Topology: Bus Discipline: Broadband; Baseband Technique: Contention (CSMA/CD) Maximum distance: 3,000 ft. without bridges or repeaters Introduced: 1986 Cost: $650

DEVELCON ELECTRONICS

☐ Develnet
Topology: Cluster Discipline: Broadband Cabling: Twisted pair cable Maximum connections: 8,000 (lines per node) Transmission speed: 24M bps Interfaces used: RS-232; RS-449 serial internode Gateway: X.25; Ethernet Units sold: 100 since 1983 Cost: $250

DIGITAL PRODUCTS, INC.

☐ NetCommander
Topology: Bus; Star Technique: Contention (CSMA/CD) Maximum connections: 48 Transmission speed: 19.2K bps Maximum distance: 1,000 ft. without bridges or repeaters Interfaces used: RS-232 Units sold: 500 since 1984 Cost: $200

EASYNET SYSTEMS, INC.

☐ EasyNet
Topology: Bus Technique: Contention (CSMA/CD) Cabling: Twisted pair cable Transmission speed: 1.5M bps Maximum distance: 1,500 ft. without bridges or repeaters Introduced: 1986 Cost: $495

EXCELAN, INC.

☐ EXOS205
Topology: Bus Discipline: Baseband Technique: Contention (CSMA/CD) Cabling: Coaxial cable Maximum connections: 1,024 Transmission speed: 10M bps Maximum distance: 500 meters without bridges or repeaters Interfaces used: PC Bus Gateway: Ethernet Units sold: 2,000 since 1985 Cost: $995

FIBERCOM, INC.

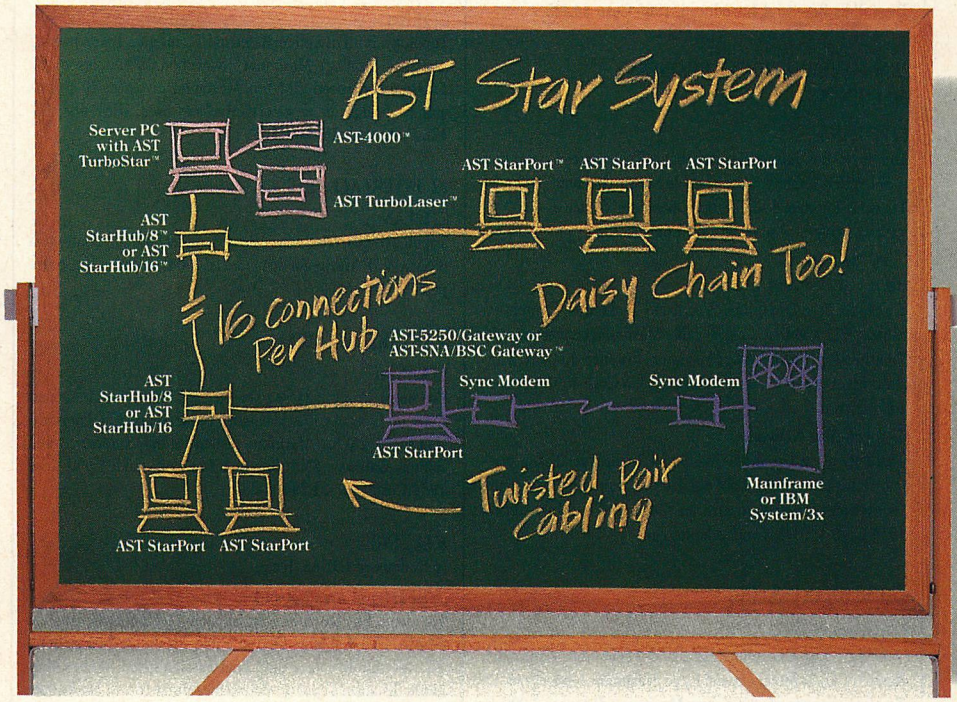
☐ Whisper Net
Topology: Physical ring (series) Discipline: Baseband Technique: Contention (CSMA/CD) Cabling: Optical fiber Maximum connections: 1,024 Transmission speed: 10M bps Maximum distance: 8 kilometers without bridges or repeaters Interfaces used: RS-232; RS-422 Gateway: Ethernet Introduced: 1985 Cost: $1,000

FOX RESEARCH, INC.
(subsidiary of ComGen Technology)

☐ 10-NET
Topology: Bus Discipline: Baseband Technique: Contention (CSMA/CA) Cabling: Twisted pair cable Maximum connections: 32 Transmission speed: 1M bps Maximum distance: 10,000 ft. with bridges or repeaters Gateway: SNA Introduced: 1984 Cost: $695/node

GAMMA PRODUCTIONS, INC.

☐ Gamma-Net
Topology: Bus Discipline: Baseband Technique: Contention (CSMA/CD) Cabling: Twisted pair cable; Coaxial cable Maximum connections: 256 Transmission speed: 3M bps Maximum distance: 4,000 ft. without bridges or repeaters Units sold: 2,350 since 1983 Cost: $350



GATEWAY COMMUNICATIONS, INC.

☐ G/NET
Topology: Bus Discipline: Baseband Technique: Contention (CSMA/CD/CA) Cabling: Coaxial cable Maximum connections: 255 Transmission speed: 1.43M bps Maximum distance: 7,000 ft. without bridges or repeaters Gateway: SDLC; HDLC; SNA; X.25 Units sold: 25,000 since 1983 Cost: $525

GRIDCOMM, INC.

☐ GridNet
Topology: Bus Technique: Contention (CSMA/CD) Maximum connections: 32 Transmission speed: 23K bps Interfaces used: RS-232; RS-422; Centronics parallel Introduced: 1986

Introducing AST's All-Star LAN Lineup.

Kick off a winning season with AST's all-star solution for networking your IBM® PC/XT/AT and compatibles. The AST Star System™ gives first-time LAN buyers, as well as seasoned players, a reliable, industry-standard (IEEE 802.3) network solution for a minimal cost. Whether you need to link just a few PCs to share resources and information, or want to open the lines of communication among all the PC users in your department, you can find everything you need from the pros at AST.

Designed to Last. With so many LANs on the sidelines today, it's important to buy a network that you can continue to use and expand tomorrow. AST provides a complete LAN solution, one that provides room for growth to support your changing business. And AST offers other resources you'll share in your local area network—such as our laser printer, storage subsystem and gateways—to ensure total system compatibility.

Industry-Standard Protection. Designed to meet the IEEE 802.3 StarLAN specification, AST Star System

protects your investment by ensuring continued compatibility with future LAN products. And complete NETBIOS emulation allows you to take full advantage of the growing league of application software packages designed for the IBM-NETBIOS interface.

Versatile Starting Formations. The AST Star System utilizes both bus (daisy chain) and star topologies to give you greater flexibility in designing your network gameplan. For the most efficient, yet economical way to link small groups of up to 10 users, we recommend our Work Group Configuration. This daisy chain layout enables users located within a 400-foot distance to share high-speed laser printers, hard disk subsystems and multiuser applications, such as the AST-5250/ Gateways™. Our Departmental Configuration connects up to 64 users spread across one or more departments, up to 8000 feet end-to-end. Daisy chains may also be connected to network expansion units (hubs) within the configuration; thereby, allowing you to maintain previously configured work groups.

AST Network Program™'s Easy-to-Use Menu Interface.

Simple Start-Up. You don't have to fumble with a tangled jumble of hardware to get your network up and running. The AST Star System consists of easy-to-install adapter cards and hubs, and uses telephone-type twisted pair cabling for simple installation. To start off, purchase the AST Star System Starter Kit. Even a rookie can quickly connect two PCs using this complete hardware/software solution.

For more information on how you can quarterback your own all-star LAN, call our Product Information Center at **(714) 863-1480.** Or send the coupon below to AST Research, Inc., 2121 Alton Avenue, Irvine, California 92714-4992.

HANCOCK ELECTRONICS CORP.

☐ CINCHNET
Topology: Bus **Technique:** Contention (CSMA/CD) **Cabling:** Twisted pair cable **Maximum connections:** 124 **Transmission speed:** 28.8K bps **Maximum distance:** 4,000 ft. without bridges or repeaters **Interfaces used:** RS-232; RS-485; RS-422 **Units sold:** 100 since 1982

HARRIS/LANIER
(formerly Lanier Business Products, Inc.)

☐ Harris 9300
Discipline: Baseband **Technique:** Token passing (statistical polling) **Cabling:** Coaxial cable **Gateway:** BSC; SNA

HONEYWELL INFORMATION SYSTEMS, INC.

☐ Honeywell Server
Discipline: Baseband **Introduced:** 1986 **Cost:** $9,445

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ PC LAN
Topology: Bus **Discipline:** Baseband **Technique:** Contention (CSMA/CD) **Cabling:** Coaxial cable **Maximum connections:** 64 **Transmission speed:** 375K bps **Maximum distance:** 3,230 ft. without bridges or repeaters **Introduced:** 1984

☐ PC Network
Reviewed Dec 1984 p. 90.
Topology: Tree **Discipline:** Broadband **Technique:** Contention (CSMA/CD) **Cabling:** Coaxial cable **Maximum connections:** 72 **Transmission speed:** 2M bps **Maximum distance:** 1,000 ft. without bridges or repeaters **Introduced:** 1985 **Cost:** $595/network adapter card

☐ Token-Ring Network
Topology: Ring **Discipline:** Baseband **Technique:** Token passing (statistical polling) **Cabling:** Twisted pair cable **Maximum connections:** 2-260 **Transmission speed:** 4M bps **Introduced:** 1986 **Cost:** $895/network adapter card

IDEASSOCIATES, INC.

☐ IDEAnet
Topology: Bus **Discipline:** Baseband **Technique:** Contention (CSMA/CD) **Cabling:** Coaxial cable **Maximum connections:** 20 **Transmission speed:** 800K bps **Maximum distance:** 2,000 ft. without bridges or repeaters **Cost:** $475

☐ IDEAshare
Topology: Star **Discipline:** Baseband **Technique:** Token passing (statistical polling) **Maximum connections:** 4 **Transmission speed:** 115K bps **Maximum distance:** 100 ft. without bridges or repeaters **Interfaces used:** RS-232 **Introduced:** 1983 **Cost:** $595

INDTECH, INC.

☐ GEnet
Topology: Bus **Discipline:** Broadband **Technique:** Contention (CSMA/CD) **Cabling:** Coaxial cable **Maximum connections:** 4 RS-232C devices per I/O card; 64,000 (per ch.) **Transmission speed:** 1M-3M bps **Maximum distance:** 3 miles without bridges or repeaters **Interfaces used:** RS-232; DR11W **Gateway:** SNA; DECNET **Units sold:** 470 since 1983 **Cost:** $1,000-$1,200 (minimum system 4 ports)

INTELLIGENT COMMUNICATIONS NETWORKS, INC. (INCOMNET)

☐ INCOMNET 3000
Topology: Dual ring **Discipline:** Baseband **Technique:** Token passing (statistical polling) **Cabling:** Twisted pair cable **Maximum connections:** 126 **Transmission speed:** 3.5M bps **Interfaces used:** RS-232; RS-422 **Gateway:** SDLC; HDLC

INTELLIGENT DATA SYSTEMS, INC.

☐ B-650 (I-NET)
Topology: Bus **Discipline:** Baseband **Technique:** Contention (CSMA/CD) **Cabling:** Twisted pair cable **Maximum connections:** 127 **Transmission speed:** 1.2M bps **Maximum distance:** 4,000 ft. without bridges or repeaters **Interfaces used:** RS-422 **Units sold:** 2,000 since 1985 **Cost:** $395

INTERCONTINENTAL MICRO SYSTEMS CORP.

☐ TurboLAN
Topology: Bus; Star **Discipline:** Baseband **Technique:** Token passing (statistical polling) **Cabling:** Twisted pair cable; Coaxial cable **Maximum connections:** 4,000 **Transmission speed:** 2.5M bps **Maximum distance:** 40 miles without bridges or repeaters **Gateway:** ARCnet **Units sold:** 550 since 1984 **Cost:** $250

INTERNATIONAL ELECTRONICS CORP. (IEC)

☐ M-Net
Topology: Bus **Discipline:** Baseband **Technique:** Token passing (statistical polling) **Maximum connections:** Multiples of 30 **Transmission speed:** 2M bps **Maximum distance:** 40 meters without bridges or repeaters **Interfaces used:** IEEE-488; RS-422 **Units sold:** 16 since 1982

I2 INTERFACE, INC.

☐ I2LAN
Topology: Bus **Discipline:** Baseband **Technique:** Contention (CSMA/CD) **Maximum distance:** 10,000 ft. with bridges or repeaters **Cost:** $495

KANTEK, INC. (WA)

☐ KANnet
Topology: Proprietary segmented ring **Discipline:** Baseband **Cabling:** Coaxial cable **Maximum connections:** 254 **Transmission speed:** 2M bps **Maximum distance:** 1,000 meters between stations **Gateway:** SNA; Sperry UT40 **Units sold:** 1,000 since 1984 **Cost:** $995-$1,295/node

KEE, INC.
(subsidiary of IDEAS, Inc.)

☐ KEE Local Area Network
Topology: Bus **Discipline:** Broadband **Technique:** Contention (CSMA/CD) **Cabling:** Coaxial cable **Maximum connections:** 2-32 (per Bus Interface Unit) **Transmission speed:** 2M bps **Maximum distance:** Topology determines distance without bridges or repeaters **Interfaces used:** RS-232; RS-422; Mil Std. 188C; Centronics parallel **Gateway:** BSC; SDLC; HDLC; X.25 **Units sold:** 8,000 since 1981 **Cost:** $200-$400/port

LEE DATA CORP.

☐ LANMASTER
Topology: Bus **Discipline:** Broadband **Technique:** Contention (CSMA/CD) **Gateway:** Ethernet; ARCNet; PC Network; OminiNet; ProNET

M/A-COM TELECOMMUNICATIONS DIVISION

☐ IDX3000
Topology: Star **Discipline:** Baseband; Bell T1, DS1 **Cabling:** Twisted pair cable; Microwave **Maximum connections:** 3,072 line **Transmission speed:** 19.2K bps (per ch.) **Maximum distance:** 3 miles (36 sq. miles) without bridges or repeaters **Interfaces used:** RS-232; T1 **Gateway:** T1 **Units sold:** 65 since 1982 **Cost:** $110-$150/line

☐ IDX750
Topology: Star **Discipline:** Bell T1, DS1 **Cabling:** Twisted pair cable; Microwave **Maximum connections:** 768 line **Transmission speed:** 19.2K bps (per ch.) **Maximum distance:** 1 mile without bridges or repeaters **Interfaces used:** RS-232; T1 **Units sold:** 2 since 1985 **Cost:** $98/line

MAGNOLIA MICROSYSTEMS, INC.

☐ MAGNet
Topology: Bus; Logical ring; Star **Discipline:** Baseband **Technique:** Token passing **Cabling:** Twisted pair cable **Maximum connections:** 64 **Transmission speed:** 500K bps **Maximum distance:** 2,000 ft. without bridges or repeaters **Interfaces used:** RS-232; S-100 Bus; IBM PC **Units sold:** 100 since 1983 **Cost:** $695

MICOM/INTERLAN, INC.
(subsidiary of MICOM Systems, Inc.)

☐ NET/PLUS
Topology: Bus; Physical ring (addressing) **Discipline:** Baseband **Technique:** Contention (CSMA/CD) **Maximum connections:** 1,-024 **Transmission speed:** 10M **Maximum distance:** 500 meters without bridges or repeaters

MICOM SYSTEMS, INC.

☐ INSTANET
Topology: Unconstrained **Discipline:** Baseband **Technique:** Dedicated paths/Circuit switch **Cabling:** Twisted pair cable **Maximum connections:** 1,504 **Transmission speed:** 1.544M bps **Maximum distance:** 1 mile with bridges or repeaters **Interfaces used:** RS-232 **Gateway:** X.25; SNA **Units sold:** 2,000 since 1983 **Cost:** $100-$575

MODCOMP

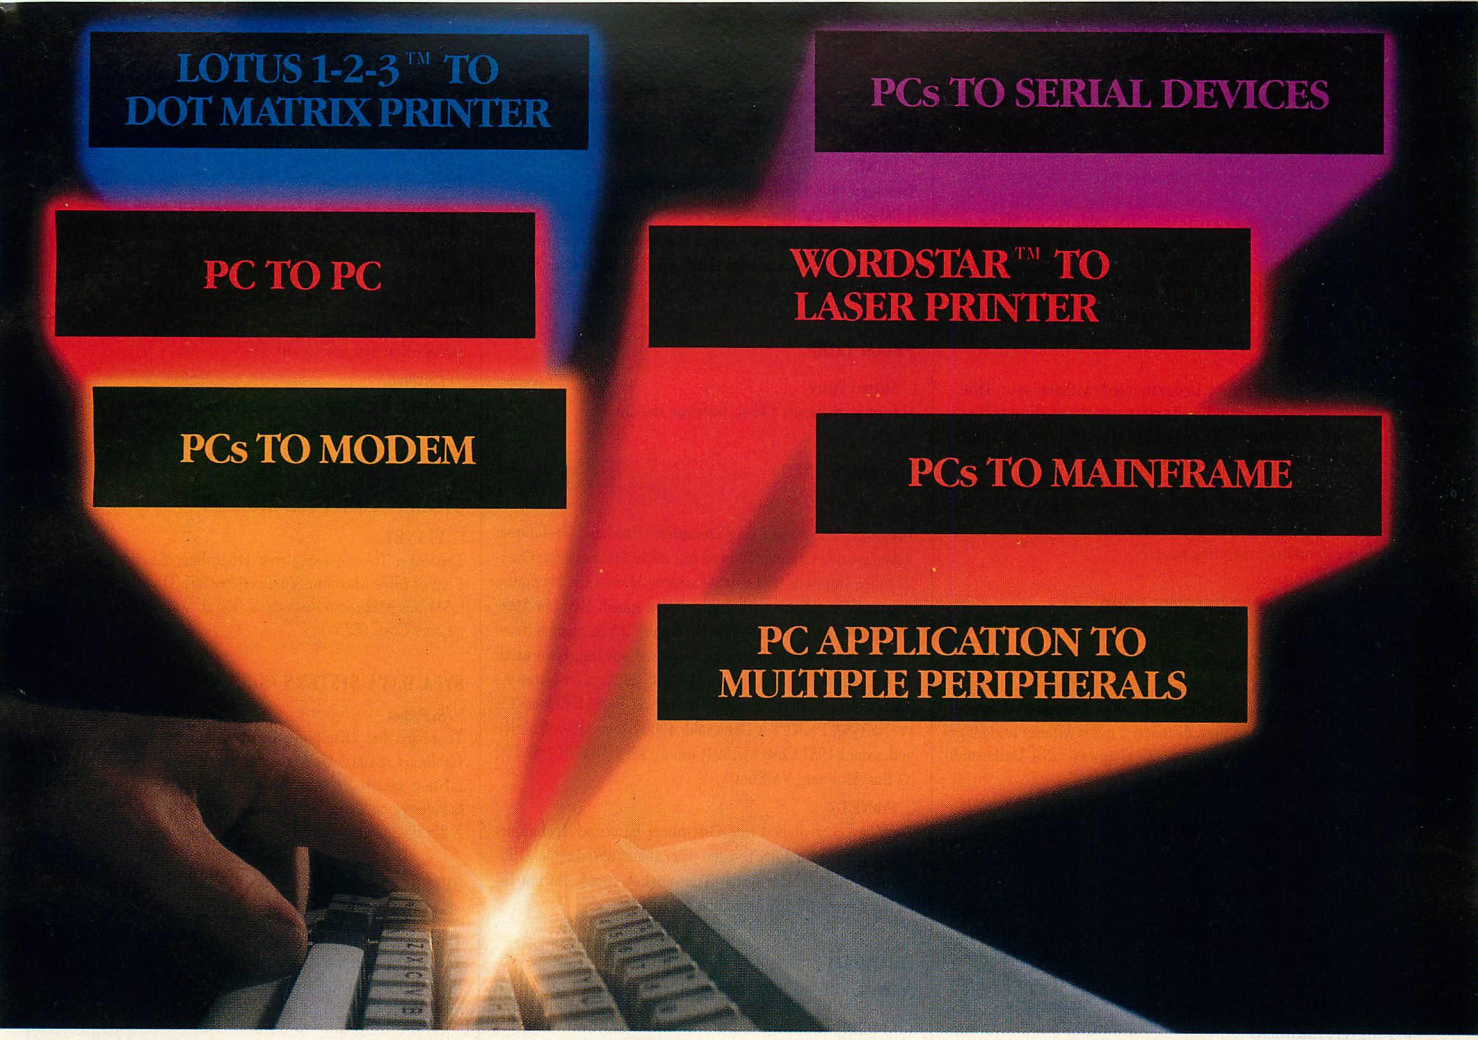
☐ MAXNET IV
Topology: Star **Discipline:** Baseband **Cabling:** Coaxial cable; Twisted pair cable **Maximum connections:** Up to 100 node **Transmission speed:** (parallel) 800K bps; (serial) 1.5M bps **Maximum distance:** 3 kilometers without bridges or repeaters **Interfaces used:** IEEE-488; RS-232; WE 301/303; CCITT V.35, V.23; Current loop; RS-422; RS-423 **Units sold:** 200 since 1974 **Cost:** $300-$3,000

MOLECULAR COMPUTER

☐ System 16/300
Topology: Physical ring (addressing); Linear

MONROE SYSTEMS FOR BUSINESS

☐ Monroe-Net
Topology: Bus **Technique:** Contention (CSMA/CD) **Maximum distance:** 3,500 ft. without bridges or repeaters **Cost:** $595/PC node



NCR CORP.

☐ PC2PC
Topology: Bus **Discipline:** Baseband **Technique:** Contention (CSMA/CA) **Cabling:** Twisted pair cable **Maximum connections:** 64 **Transmission speed:** 1M bps **Maximum distance:** 2,400 ft. with bridges or repeaters **Interfaces used:** RS-232 **Introduced:** 1985 **Cost:** $495

NESTAR SYSTEMS, INC.

☐ PLAN 3000
Topology: Bus **Discipline:** Baseband **Technique:** Token passing (statistical polling) **Cabling:** Coaxial cable; IBM cable system **Maximum connections:** 255-260 **Transmission speed:** 4M bps **Maximum distance:** 4 miles, 2,000 ft. between stations **Interfaces used:** RS-232 **Gateway:** SNA; File transfer server; Telex server **Units sold:** 3,000 since 1982 **Cost:** $595/network interface card; $695/token ring adapter

☐ PLAN 3000B
Topology: Bus **Discipline:** Baseband **Technique:** Token passing (statistical polling) **Cabling:** Coaxial cable **Maximum connections:** 10 **Transmission speed:** 4M bps **Maximum distance:** 4 miles, 2,000 ft. between stations **Interfaces used:** RS-232 **Gateway:** SNA; File transfer server; Telex server **Introduced:** 1985 **Cost:** $16,995

NOW—SOFTWARE AUTOMATED PERIPHERAL SHARING.

Introducing Crosspoint 8—the first data switch that links any combination of peripherals and PCs up to 8 by software control. PC offices can access RS232c serial devices for about $100 per port—a lot less than duplicating peripherals for each PC.

Crosspoint 8 means greater productivity with fewer peripherals, and more output from each. Set programs to run automatically on your choice of peripheral: Assign Lotus 1-2-3 to a dot matrix printer; Auto CAD™ to a plotter; WordStar to a laser printer; communications to a modem. Use Crosspoint 8 for multitasking programs like Microsoft Windows.™ Each user can store up to 16 application configurations.

The Crosspoint 8 package includes all necessary hardware to interface PCs and peripherals—like easy-to-connect data phone jacks and cable. Compatible with IBM and other PCs, it allows file transfer, LAN, and simultaneous user access. Add peripherals or change output in a flash with pop-up menus, or automate your applications with batch file execution.

Link to a leader for support you can count on. We're committed to reliability with a 100% 1-year parts-labor warranty. A step-by-step manual starts you off—fast.

A SOLUTION IN A BOX:
HARDWARE AND SOFTWARE TO LINK PCS AND PERIPHERALS BY SIMPLE MENU COMMANDS.

Solo PC power users: Get 7-peripheral software control with Crosspoint AB+—for under $500.

TO FIND YOUR NEAREST CROSSPOINT DEALER, CALL 1-800-232-7729 OR 503-485-4254.

Some people need low price AND high performance in their LAN...

People like Resellers, Distributors, OEMs, VARs, End Users.

People who sell LANs and people who use LANs will tell you: TiaraLink is *the* Price/Performance leader in local area networks.

Their reasons are sound. TiaraLink supports DOS 2.0 through 3.2 and a complete NetBIOS. So network applications written to these standards run on TiaraLink. Thousands of TiaraLink networks are installed worldwide on IBM* PC, XT, AT and compatible computers. LanWare™, our powerful, full-featured network operating system, is a one-time purchase regardless of the number of stations on the network. So your cost-per-station *decreases* as the network grows!

And, using gateways, you can get additional performance from your network PCs because they can operate a single system as both a terminal to a remote mainframe, and as a network PC.

Distributors. OEMs. Dealers. VARs. End users. All are convinced TiaraLink is unrivaled — in performance *and* price. Here's what they say about TiaraLink:

Ask them about TiaraLink.™

"TiaraLink is an excellent product for us to carry. ARCnet is a proven technology, around since 1978. Although ARCnet can be utilized with other companies' software, we still recommend TiaraLink. Tiara, the company, is great in terms of support, product availability, and margins. Customer reaction is super."*

— Bob Putignano, President
Access Data Products, Inc.
Mt. Vernon, NY

"TiaraLink is the only high-performance LAN on the market with reasonable software pricing. That fact, combined with its ease of installation and operation, total reliability, fault recovery, and multiple server capability is why we chose TiaraLink to distribute with our computers."

— Alan D. Dale, President
OnSite Business Systems, Inc.
a division of Dale Computer Corporation
Okemos, MI

"Dependability and flexibility of TiaraLink has been a major asset to us...During the last 18 months, we have undergone extensive remodeling and expansion. Network PCs are moved and configurations changed every day. With TiaraLink we have been able to stay ahead of the game! The ability to support multiple operating systems and peer-level network resources has enabled us to incrementally add new capabilities without changing existing networks. I strongly recommend TiaraLink to every serious LAN user."

— Donald Dornbush, Director — Data Processing
Michigan Education Data Network Assn.
E. Lansing, MI

"The TiaraLink network has allowed (us) to grow from 5 nodes to over 100 nodes with no problems. We continue to add disks, printers, and plotters easily . . . Even with over 400 megabytes of storage in 17 hard disks, user response time is great!"

— Gerd Hoeren, Sr. Software Engineer
Integrated Measurement Systems, Inc.
Beaverton, OR

"Canadian Pacific Air Lines has adopted TiaraLink for installing local area networks in Canadian travel agencies . . . Each agency shares printers; a real-time, interactive accounting system running on a hard disk; and a communications gateway to Canadian-Pacific's reservation system in order that all PCs can act as on-line reservation terminals. TiaraLink, with its high performance token-passing architecture, was the only network that could adequately handle these demanding performance requirements."

— Peter Munro, Research & Development Coordinator
CP Air, Vancouver, British Columbia

☐ AI04
Functions: A/D and/or D/A conversion; Process control ☐ IBM PC, XT, 5531 and compatibles ☐ Cost: $850

☐ AI08
Functions: A/D and/or D/A conversion; Process control ☐ IBM PC, XT, 5531 and compatibles ☐ Cost: $695

☐ A06
Functions: A/D and/or D/A conversion; Process control ☐ IBM PC, XT, 5531 and compatibles ☐ Cost: $895

☐ DIM32/DOM32
Functions: A/D and/or D/A conversion ☐ IBM PC, XT, 5531 and compatibles ☐ Cost: $250

☐ RTD15
Functions: Process control ☐ RTD Input Card ☐ IBM PC, XT, 5531 ☐ Cost: $1,150

☐ SG04
Functions: Process control ☐ Strain-gauge input card ☐ IBM PC, XT, 5531 and compatibles ☐ Cost: $1,225

☐ TC15
Functions: Process control ☐ Thermocouple Input Card ☐ IBM PC, XT, 5531 and compatibles ☐ Cost: $1,150

ADAPTEC, INC.

☐ ACB-2070A
Functions: Controller for Hard disk ☐ IBM PC, XT

ADAPTIVE DATA SYSTEMS, INC. (ADSI)

☐ MASTER LINK
Functions: SASI/SCSI ☐ IBM PC ☐ Full length ☐ Units sold: 7,000 since 1983 ☐ Cost: $150 (qty. 1,000)

ADD-MEM

☐ PCM-KPC
Functions: 64-256 kbytes RAM memory ☐ IBM PC ☐ Units sold: 2,000 since 1983 ☐ Cost: $100-$335

☐ 768K-PC-1,2
Functions: 768 kbytes RAM memory ☐ IBM PC ☐ Units sold: 500 since 1985 ☐ Cost: $250-$350

ADVANCED COMPUTER TECHNOLOGY

☐ ACT 2000
Functions: Telex board ☐ IBM PC, XT, AT and compatibles ☐ Introduced: 1986 ☐ Cost: $495

ADVANCED DATA PROCESSING SYSTEMS

☐ BCRI
Functions: 1 serial port(s) ☐ Bar code reader ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1985 ☐ Cost: $595

ADVANCED PERIPHERALS, INC.

☐ MIDAS
Functions: A/D and/or D/A conversion; Process control ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 25 since 1985 ☐ Cost: $2,000

ADVANCED STORAGE CONCEPTS, INC.

☐ ASC-88
Functions: SASI/SCSI ☐ Controller for Hard disk; Mag tape; Cartridge tape; Optical disk ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Units sold: 500 since 1985 ☐ Cost: $249

ADVANCED TRANSDUCER DEVICES, INC.

☐ Color Graphics
Functions: Resolution: 320/640x200/400; 4 color graphics ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC, XT, AT, Portable and compatibles ☐ Half length ☐ Units sold: 30,000 since 1985 ☐ Cost: $199

☐ Expansion Memory
Functions: 576 kbytes RAM memory ☐ IBM PC, XT, Portable and compatibles ☐ Half length ☐ Units sold: 10,000 since 1985 ☐ Cost: $119

☐ Expansion Memory Plus
Functions: 576 kbytes RAM memory ☐ RAM disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, Portable and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Units sold: 500 since 1986 ☐ Cost: $229

☐ Platinum Color Graphics Plus
Functions: Resolution: 640/320x400/200; 16 color graphics ☐ 1 parallel port(s) ☐ IBM PC, XT, AT, Portable and compatibles ☐ Software supplied ☐ Half length ☐ Units sold: 500 since 1986 ☐ Cost: $229

☐ Platinum EGA Plus
Functions: Resolution: 720x348; color graphics ☐ IBM PC ☐ Half length ☐ Cost: $499

☐ Platinum Monochrome Text & Graphics
Functions: Resolution: 720x348 monochrome graphics ☐ 1 parallel port(s) ☐ IBM PC, XT, AT, Portable and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Units sold: 1,500 since 1985 ☐ Cost: $249-$679

☐ Platinum Zuckerboard LAN
Functions: LAN connection ☐ IBM PC, XT, AT, Portable and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Units sold: 5,000 since 1985 ☐ Cost: $445-$795

AJIDA TECHNOLOGIES, INC.

☐ PC/VME Master
Functions: IBM PC/VMEbus interface ☐ IBM PC, XT, AT ☐ Half length ☐ Units sold: 100 since 1985 ☐ Cost: $835

ALDIA SYSTEMS, INC.

☐ PC-PROMPAK
Functions: 8-64 kbytes RAM memory ☐ IBM PC and compatibles ☐ Half length ☐ Cost: $125

Push Back The Envelope:

10/6 & 12.5 MHz

AT Compatibility

IBM obviously positioned the AT as the hub of the microcomputer network. ACS has included what IBM left out.

SPEED The ET-286 nearly doubles the clock speed of the AT at 10 MHz and we are already 12.5 MHz capable. With access to 4 Megabytes of on-board memory via a 5MHz DMA bus, the ET-286 bypasses additional wait states required to maintain compatibility with expansion bus memory. With memory intensive network software like Unix and Xenix, this becomes critical. Naturally, the ET-286 toggles from HyperSpeed at 10MHz to 100% 6MHz compatibility for those applications that demand it.

COMMUNICATIONS The ET-286 plus is designed with communications in mind. There are three on-board serial ports that are configurable as either RS-422 or RS-232 depending on your application. 2 parallel ports further extend your communications ability. And there are still 8 expansion slots for additional I/O.

AN ACCESSIBLE SOURCE Part of the success of the ACS-1000 and our other products is the availability of our people. We provide the support that OEM's need in order to win major contracts — engineering support, competitive pricing, even specialized packaging. Service is the key issue in the information marketplace and we provide the kind of service and reliability that you can only find in an American made product.

ACS MS-DOS 3.2 We want to help you compete. That's why we have licensed MS-DOS 3.2 and GW Basic 3.2 and made them available in OEM packages at OEM prices.

Even with all these features, the ET-286 plus is available in OEM quantities for under $1,000. For more information, call or write:

ACS International, Inc.

ACS-1000
- 8 Or 4.77 MHz
- Up to 1 Meg Memory
- 2 Serial Ports
- 1 Parallel Port
- On Board Disk Controller
- On-Board Clock/ Calendar

ET-286 *plus*
- 10/6 & 12.5MHz
- Up to 4 Meg Memory
- 3 Serial Ports
- 2 Parallel Ports
- 8 Expansion Slots
- 5 MHz DMA
- On-Board Clock/ Calendar

NOW AVAILABLE:
- Optional 10 MHz Co-processor
- ACS MS-DOS 3.2
- GW Basic 3.2

A HERITAGE OF EXCELLENCE In any marketplace one product stands out as the pinnacle of performance and value. In the PC/XT marketplace, that product is the ACS-1000: 4.77 or 8 MHz operation, 1 Megabyte memory, built in communications, built in floppy disk controllers, even a SASI interface—all packaged on a single board and priced competitively with the merely compatible.

Building on the heritage of the ACS-1000, the ET-286 plus brings the same standards of excellence to the AT marketplace.

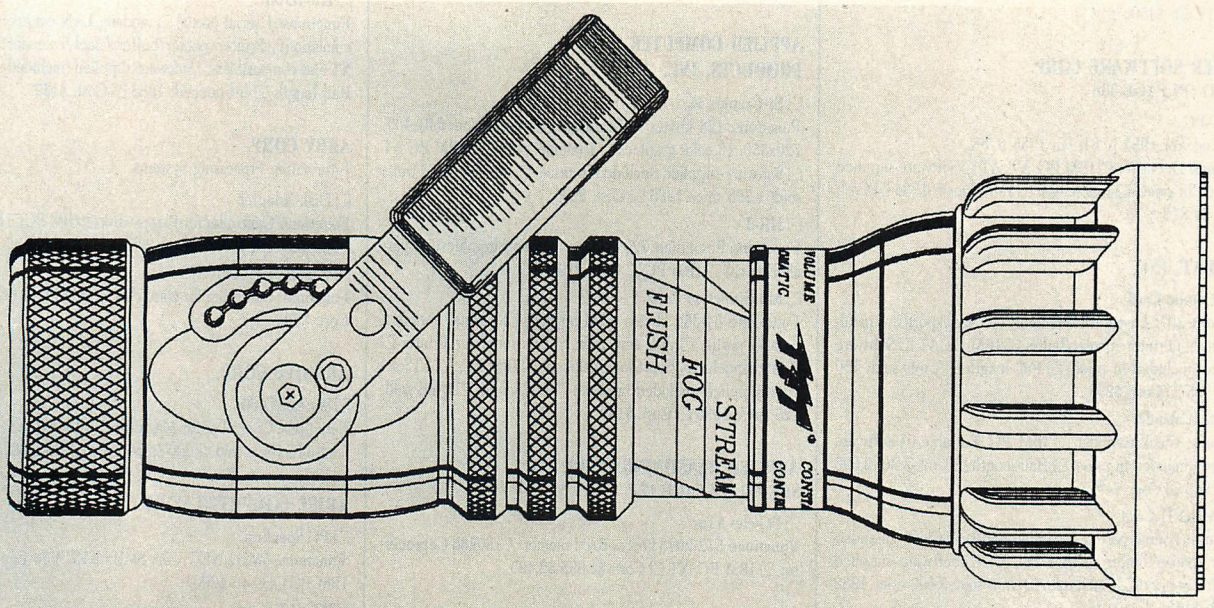
Functions: 128-3500 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC AT ☐ Cost: $455-$495

AMPAK BUSINESS SYSTEMS, INC.

☐ PC-Mini Adapter Card
Functions: IBM 5251 Model II terminal/protocol emulation ☐ IBM PC, XT, AT ☐ Software supplied

ANALOG DEVICES, INC.

☐ MAC-4000
Functions: 1 serial port(s); A/D and/or D/A conversion ☐ IBM PC ☐ Software supplied (included in price) ☐ Units sold: 5,000 since 1981 ☐ Cost: $1,350



☐ RTI-800
Functions: A/D and/or D/A conversion ☐ Clock/calendar ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $850

☐ RTI-802
Functions: A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $695

☐ RTI-815
Functions: A/D and/or D/A conversion ☐ Clock/calendar ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $1,095

☐ RTI-817
Functions: 3 parallel port(s); A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Half length ☐ Introduced: 1986 ☐ Cost: $295

INTRODUCING PLOT MATRIX PRINTING.

This high-resolution design was produced with the ImagEnhancer PC add-on board and an ordinary dot matrix printer. And so was the text you're reading.

Image drawn with AutoCAD by Autodesk, Inc.

Now you don't need a slow, expensive plotter to get output this good.

You need the new ImagEnhancer™ PC add-on board. It enables ordinary monochrome or color dot matrix printers to produce high-resolution plotter-like graphics.

THE OUTPUT IS OUTSTANDING.

The ImagEnhancer is the easiest way to plot drafts, presentation-quality designs, flow charts and report graphics.

What's more, the ImagEnhancer is a vector to raster converter with 512K RAM on board. So while your printer is printing one job, you can use your PC for another.

And of course, the ImagEnhancer works with the same computer products most everyone works with. IBM® PCs, XTs, ATs or 100% compatibles with graphics capability. And Houston Instrument (DM/PL) plotter-compatible software, including AutoCAD™ and VersaCAD,™ among others.

AND THE PRICE IS RIGHT.

At $595, the ImagEnhancer costs a fraction of what you'd pay for a new plotter. And it's backed by a one-year warranty.

For more information, print samples or the name of the dealer/distributor nearest you, write to Alps America, 3553 North First Street, San Jose, CA 95134. Or call **(800)828-ALPS.** In California, (800) 257-7872.

And turn your dot matrix printer into a plot matrix printer.

THE SPEED. THE POWER. THE PERFORMANCE.

Introducing PC-ELEVATOR 386

The only 386 accelerator board that works in a PC, XT and AT.

Now from Applied Reasoning Corporation, the acknowledged leader in accelerator board technology. PC-ELEVATOR 386. The most advanced accelerator board in the world. At a price you can afford. $1995 with 1 megabyte of fast RAM on board.

TECHNICAL SPECIFICATIONS

- **Intel 80386 32-bit processor**
- **16 MHz clockspeed**
- **Full 32-bit memory bus**
- **1 megabyte of RAM**
- **RAM expandable to 16 megabytes**
- **Optional 80287/80387 coprocessor**

Upgrade your AT or compatible to a 32-bit 80386 powerhouse. PC-ELEVATOR 386 is easy to install. You don't pull the 80286 processor or insert a cable. Simply drop the board in a slot. And move up to a new level of performance. Up to 4 times faster than your AT.

No other board can convert 8086 and 8088 computers to 386 machines. Turn your tired old PC, XT, Compaq or clone into a ball of fire. Running up to 20 times faster. Just plug in PC-ELEVATOR 386. And run for cover.

PC-ELEVATOR 386 is fully compatible with EGA and other graphics cards, and with applications written for EMS and EEMS boards. It comes with 1 megabyte of interleaved memory on board. Expandable with daughtercards to 16 megabytes. Supports an 80287 or 80387 coprocessor.

Our new 386 product is a worthy addition to the PC-ELEVATOR family. With 8, 10 and 12.5 MHz 80286 accelerator boards. And now the 16 MHz PC-ELEVATOR 386. The most complete upgrade path in the business.

You've got the box. We've got the boards. Together we can reach new heights.

CIRCLE NO. 346 ON READERS SERVICE CARD

AST Is The Right Connection For Data Communications.

Now AST offers a complete family of data communications solutions. From PC-to-minicomputer and PC-to-mainframe connections to modems and local area networks, AST is the single source connection.

The AST 5250 Product Family

AST-5251/11. Direct Twinax connection of an IBM® PC or compatible to an IBM System 34/36/38.

AST-5251/11/Plus. Direct Twinax connection of a PC to an IBM System 34/36/38. Offers multiple host sessions—up to seven combinations of displays and printers, currently.

AST-5251/12. Total solution for remote PC communications with an IBM System 34/36/38 computer.

AST-5250/Cluster (Local and Remote). Complete communication solutions allowing up to five IBM PC/XT/ATs or compatibles in Local or Remote environments to communicate via a single Twinax cable (Local) or SNA/SDLC (Remote) link with an IBM System 34/36/38.

AST-5250/Display. Display Adapter Card offering IBM compatible 5251 Model II character and field display attributes, bit-mapped graphics and high-quality text on an IBM PC/XT/AT Monochrome Display.

AST-5250/Async Dialup. Software providing asynchronous dialup communications with 5251/11 emulation to an IBM System 34/36/38 using the AST-5251/11 or AST-5251/11 Plus.

AST-5250/Gateway (Local and Remote). Direct Twinax or SNA/SDLC link to an IBM System 34/36/38 that connects to a LAN to distribute 5250 Terminal/Printer emulation to LAN nodes.

Micro-to-Mainframe Data Communications Products

AST-3770. Hardware/software solution allowing a PC to communicate as a 3770 RJE workstation in SNA/SDLC environment.

AST-3780. Hardware/software solution for PC emulation of a Bisync RJE workstation.

AST-3270/COAX. Hardware/software package allowing a PC to emulate a 3278/3279 terminal and concurrently display PC DOS and user notepads with coaxial cable to a 3274/76 controller.

AST-PCOX. Hardware/software package for PC emulation of an IBM 3278/3279 terminal with coaxial cable to a 3274/76 controller.

AST-SNA. Hardware/software package allowing a PC to emulate a 3274/76 controller, 3278/79 display and 3287 printer in SNA/SDLC protocol environments with remote attachment.

AST-BSC. Hardware/software package allowing a PC to emulate a 3274/3276 controller, 3278/79 display and 3287 printer in Bisync protocol environments with remote attachment.

AST-SNA/BSC Cluster. Allows a master PC and up to 4 attached PCs or asynchronous terminals to share a single SNA/SDLC communications line.

AST-SNA/BSC Gateway. PC-to-Mainframe 3270 communications for up to 16 PCs on an AST local area network or IBM PC Network with Netbios interface.

The AST Family of Modems

AST-1200. Standalone, Hayes™-compatible 1200/300 bps modem.

AST-1200B. Internal, Hayes-compatible 1200/300 bps half-card modem.

AST-2400. Standalone, Hayes-compatible 2400/1200/300 bps modem with 2400/1200 bps synchronous operation.

AST-2400B. Internal, Hayes-compatible 2400/1200/300 bps half-card modem.

AST-2X2400. Standalone, Hayes-compatible, MNP compression and error correction, 2400-4800 bps modem.

AST-2X2400B. Internal, Hayes-compatible, MNP compression, error correction, 2400-4800 bps modem.

AST-2X9600. Standalone, Hayes-compatible, MNP compression and error correction, 9600-19.2 kbps modem.

AST-2X9600B. Internal, Hayes-compatible, MNP compression and error correction, 9600-19.2 kbps modem.

XENIX® Support

AST-FourPort/XN. Adds up to 4 XENIX user ports per board, up to 8 ports per system. Supports both the Xenix System III and System V.

AST-EightPort/XN. High-performance hardware/software solution which adds up to 8 XENIX user ports per board to the IBM AT using the AST ICC-186 Intelligent Communications Controller.

DOS Support

AST-FourPort/DOS. Adds up to 4 DOS user ports per board, up to 8 ports per system.

Systems Products

AST-5250 Premium/286—local and remote. Complete 5250 workstation combined with a powerful 80286-based PC. Displays all 32 5250 attributes, and all features of the AST-5251/11 Plus (local) or AST-5251/12 (remote). Multiple session support. Includes file transfer package and IBM API for PC Support/3x.

AST-5242 TurboLaser Printer. Complete printing solution for System/3x and PC users. Package includes AST TurboLaser 8-original-pages-per-minute printer, printer adapter and emulation adapter hardware (PC required) and software allowing printer to emulate 5224 in landscape mode or 5219 in portrait mode. Under DOS, printer emulates Epson®, Diablo® or HP™ 7475A plotter.

For more information on AST's Data Communications solutions call (714) 863-1480. Or send the attached coupon to AST Research, Inc., 2121 Alton Avenue, Irvine, CA 92714-4992, Attn. M.C.

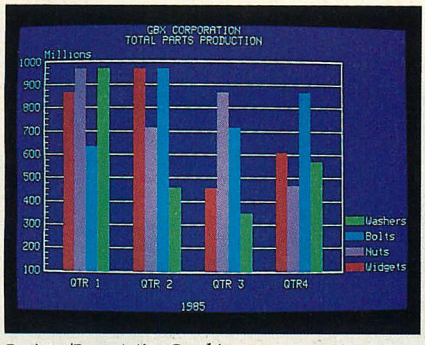
EGA Goes On A Rampage!®



AST Introduces Rampage/EGA For The AT.®

Now AST offers single-slot expanded memory and EGA graphics for the IBM® PC AT and compatibles.

Rampage/EGA for the AT combines 2.0 Megabytes of expanded memory together with compatibility for every major PC graphics standard—IBM EGA (Enhanced Graphics Adapter), IBM CGA (Color Graphics Adapter), IBM MDA (Monochrome Display and Printer Adapter) and HGC (Hercules™ Graphics Card).

Graphics For Today And Tomorrow. Rampage/EGA's graphics flexibility lets you use a monochrome, color or enhanced color graphics display. So, it's easy to upgrade to the EGA standard at anytime. And with an EGA monitor you're assured of downward compatibility with all popular applications.

Expanded Memory For AT Power. With AST's Enhanced Expanded Memory Specification (EEMS), Rampage/EGA gives your AT the power to run new, Expanded Memory Specification (EMS) applications like Lotus® 1-2-3® Releases 2.0 and 2.1, Symphony® 1.1 and Framework® II.

Business/Presentation Graphics

And together with Rampage/EGA's EEMS operating environment software, you can maintain applications in memory throughout the day. This allows you to move instantly between applications, as well as execute multiple tasks simultaneously.

Rampage/EGA's memory can also be used as extended memory with protected mode operating systems like XENIX®.

And included is AST's SuperPak™ utility software that utilizes conventional, expanded or extended memory for RAM disk emulation and print spooling.

Follow The Rainbow To Rampage/EGA For The AT. For more information on AST's single-slot memory and graphics solution call (714) 863-1480. Or send the coupon to AST Research, Inc., 2121 Alton Avenue, Irvine, CA 92714-4992, Attn. M.C.

YES, send me information on the single-slot Rampage/EGA for AT today!

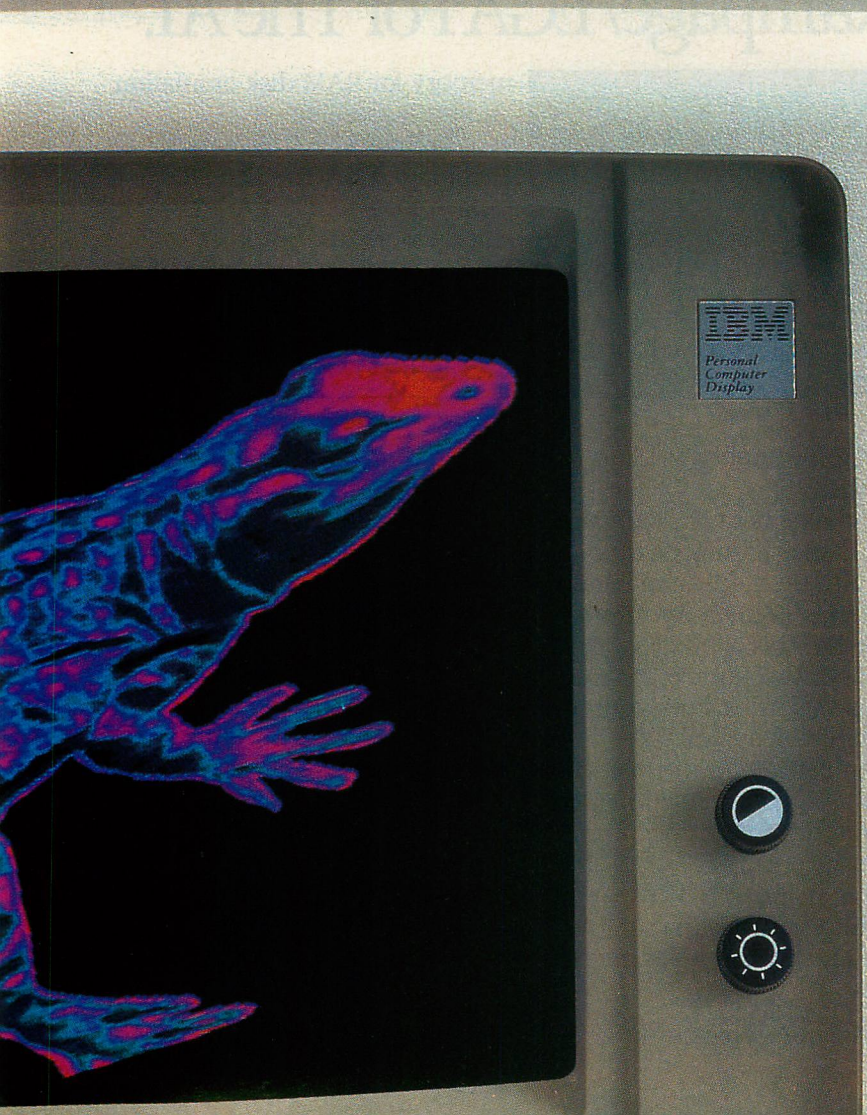
If You Just Look At The Screen, You're Missing The Picture.

AST-3G Plus™ and AST-3G I/O.™

Lots of companies bundle EGA, CGA, MDA, and Hercules™ graphics card capabilities on one board.
AST gives you this and a lot more Starting with a choice.

AST-3G Plus or AST-3G I/O. Choose the AST-3G Plus and get high-resolution 640 x 350 graphics, brilliant 16 color displays created from a full-spectrum palette of 64 colors and high-quality text. Giving you across-the-board IBM® PC/XT/AT® applications software compatibility.
So, you'll have all the power you need for business and presentation graphics, CAD/CAM, graphic arts and desktop publishing.
You can even expand the AST-3G Plus with an optional parallel port.
Or, pick the AST-3G I/O (formerly known as AST-3G Pak) and get the parallel port and all the graphics capability of the AST-3G Plus, as well as a serial port and clock/calendar with battery back-up.
You can also order an optional game port. Both the AST-3G Plus and AST-3G I/O give you 256Kb of on-board video memory.
So whether you need more powerful graphics, or powerful graphics and more, AST has an EGA solution.



AST-3G I/O
All the graphics and memory of the AST-3G Plus, combined with a Serial Port, Parallel Port, Clock Calendar, and available Game Port.

AST-3G Plus
EGA, CGA, Hercules graphics and MDA with 256Kb on-board video memory and available Parallel Port.

More, An AST Tradition. AST pioneered compatible multifunction expansion boards. For more power. Now we're doing the same with graphic display adapters.
And all AST products are built with front-line components, then burned-in and tested. Again and again. For more reliability.

Get The Whole Picture. Find out more about unleashing the graphics power of your PC, XT, or AT by visiting your local dealer, calling our Product Information Center at 714/863-1480, or mailing the coupon below to AST Research, 2121 Alton Avenue, Irvine, California 92714-4992.

Introducing Advantage Premium.™ AST Delivers On The AT Promise.

Now AST translates the power and speed of AT-class computers into increased productivity...delivering expanded memory and multifunction features.

THE AST PREMIUM SERIES™

More Features. Advantage Premium offers up to 2 MB of expanded memory, two serial ports, a parallel port, a game port, AST's SuperPak™ utilities, and DESQview™ windowing/multitasking software.

Expanded Memory. With our enhanced Lotus®/Intel®/Microsoft® compatible expanded memory, you'll be able to run larger, expanded memory spreadsheet, database and integrated applications.

Extended Memory. Advantage Premium's memory can also be used as extended memory to create huge RAM disks and print buffers, and run protected mode operating systems like XENIX®

You'll Work Faster. Advantage Premium's flexible DESQview operating environment lets you organize up to nine of your current and new expanded applications in memory for faster, easier access.

With your applications in Advantage Premium's memory, you'll toggle from application to application, transfer data between programs, and execute multiple tasks at the same time. And you'll avoid time-consuming workflow interruptions like diskette changes and closing down one application to open another.

AST Is The Standard. Buying from AST, the largest producer of PC enhancements, you're assured compatibility. Whether you have an IBM,® Compaq® or other compatible system, you'll find AST provides the same high-quality service and support that have made us number one.

Take Delivery On The Promise. Visit an AST Authorized Dealer today and ask for Advantage Premium. For more information call our Product Information Center **(714) 863-1480.** Or send the coupon to AST Research, Inc., 2121 Alton Avenue, Irvine, California 92714-4992.

ASHER TECHNOLOGIES, INC.

☐ **ASHER**
Functions: 128 kbytes EPROM memory ☐ 16 color graphics ☐ 300-2,400 bps modem ☐ Voice I/O or synthesis ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 4,000 since 1984 ☐ Cost: $695

AST RESEARCH, INC.
SEE AD ON PAGES 161/172/173/174/175

☐ **Advantage**
Reviewed Jun 1985 p. 23.
Functions: 128-3072 kbytes RAM memory ☐ 2 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $595-$1,945

☐ **AST Resource Sharing Network**
Functions: AST Resource Sharing Network LAN connection ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1985 ☐ Cost: $495

☐ **AST-BSC**
Functions: 1 serial port(s) ☐ Synchronous mainframe link ☐ 3274/76, 3278, 3279, 3287 terminal/protocol emulation ☐ Controller for Printer ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $695

☐ **AST-BSC/Cluster**
Functions: 5 serial port(s) ☐ Synchronous mainframe link ☐ 3274, 3276, 3278-2, 3279, 3287 terminal/protocol emulation ☐ IBM PC, XT, AT, Portable and compatibles ☐ Full length ☐ Introduced: 1985 ☐ Cost: $1,095

☐ **AST-FourPort/XN**
Functions: 4 serial port(s) ☐ IBM PC AT ☐ Software supplied (included in price) ☐ Introduced: 1985 ☐ Cost: $495

☐ **AST-PCnet II**
Functions: AST-PCnet II LAN connection ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $1,090 (includes 2 board starter kit)

☐ **AST-PCOX**
Functions: IBM 3278/3279 terminal/protocol emulation ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1983 ☐ Cost: $995

☐ **AST-SNA**
Functions: 1 serial port(s) ☐ Synchronous mainframe link ☐ 3274/3276, 3278/2, 3279/2A, 3287 terminal/protocol emulation ☐ Controller for Printer ☐ IBM PC, XT, AT, Portable and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $895

☐ **AST-SNA/BSC Gateway**
Functions: 1 serial port(s) ☐ Synchronous mainframe link ☐ 3274, 3276, 3278, 3279 terminal/protocol emulation ☐ IBM PC, XT, AT, Portable and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $895-$1,295

☐ **AST-SNA/Cluster**
Functions: 5 serial port(s) ☐ 3274, 3276, 3278-2, 3279-2A, 3287 terminal/protocol emulation ☐ IBM PC, XT, AT, Portable and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $1,295

☐ **AST-3G**
Functions: Resolution: 640x350; 720x348; 16 color graphics ☐ 1 parallel port(s) ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1986 ☐ Cost: $425-$600

☐ **AST-3G Models 1**
Functions: 64-256 kbytes RAM memory ☐ Resolution: 640x350; 16 color graphics ☐ 1 parallel port(s) ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $450-$575

☐ **AST-3G Pak**
Functions: Resolution: 640x350/200; 720x348; 16 color graphics ☐ 1 serial port(s); 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1986 ☐ Cost: $575-$700

☐ **AST-3780**
Functions: 1 serial port(s) ☐ Synchronous mainframe link ☐ 2770, 2780, 3780, 3741, 3780 terminal/protocol emulation ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $895

☐ **AST-5250/Display**
Functions: Resolution: 720x348 monochrome graphics ☐ 1 parallel port(s) ☐ 5251 terminal/protocol emulation ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $495

☐ **AST-5250/Display-C**
Functions: Resolution: 640/320x200; 4; 8; 16 color graphics ☐ 1 parallel port(s) ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $395

☐ **AST-5251/11**
Reviewed Jul 1986 p. 76.
Functions: Synchronous mainframe link ☐ 5251, 5291, 5292/1, 5256, 5224, 5225 terminal/protocol emulation ☐ Controller for Printer ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $895

☐ **AST-5251/12**
Functions: Synchronous mainframe link ☐ IBM 5251-12, 5256, 5224, 5225 terminal/protocol emulation ☐ Controller for Printer ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $790

☐ **ColorGraphPlus**
Functions: Resolution: 320/640x200; 16 color graphics ☐ 1 parallel port(s) ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1985 ☐ Cost: $295-$370

☐ **FlashPak**
Functions: 8086; V30 Coprocessor ☐ IBM PC, XT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $495

☐ **I/O Mini**
Functions: 2 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, Portable and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1984 ☐ Cost: $185-$285

☐ **I/O Plus II**
Functions: 2 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Clock/calendar; Printer spooler/buffer ☐ IBM PC, XT, Portable, 3270 PC and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $185-$285

☐ **MegaPlus II**
Functions: 256-512 kbytes RAM memory ☐ 2 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, Portable, 3270 PC and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1982 ☐ Cost: $395-$990

☐ **PREVIEW**
Functions: Resolution: 720x348 monochrome graphics ☐ 1 parallel port(s) ☐ RAM disk emulation ☐ Printer spooler/buffer ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $299

☐ **RAMpage AT**
Reviewed Feb 1986 p. 66.

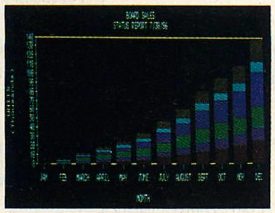
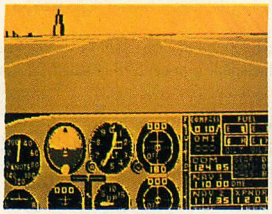
EGA WONDER
Video board that runs EGA, CGA, MDA, Hercules, and 132-column software on an EGA monitor, RGB monitor, TTL monochrome monitor, composite monitor, or the internal monitor of the IBM PC Portable. Automatically switches between EGA and CGA color modes or among MDA, Hercules, and EGA monochrome modes. IBM PC/XT/AT, PC Portable or compatible. Cost: $399.

Seal of Approval



Lotus certifies ATI's Graphics Solution

ATI's **"Small Wonder" Graphics Solution** has never been slow to pick up compliments, particularly in the area of multi-mode flexibility. Much of the credit for this is due to ATI's use of advanced technology. Therefore it's not very surprising that Lotus – the world's leader in software – has certified the "Graphics Solution" for 132 x 44 monochrome spreadsheets and 640 x 200 7 color graphics so you can see more spreadsheet and sharper, more colorful graphs on 1-2-3 (2.0) and Symphony (1.1).



At ATI, we think we've developed a better graphics card. It just might surprise you how much better. Call us at **(416) 477-8804** for more information.

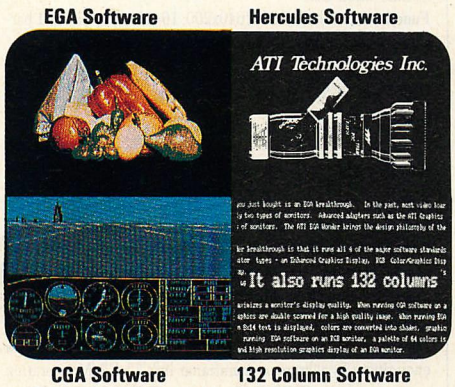
EGAWONDER™

Any Software. Any Monitor. Any Time.



EGA Monitor

EGA Wonder runs EGA, CGA, MDA, Hercules and 132 Columns on an Enhanced Graphics Display. CGA text is improved to 8 ×14 and graphics are double scanned for a high quality display.

TTL Monochrome Monitor

EGA Wonder runs EGA, CGA, MDA, Hercules and 132 Columns on a TTL Monochrome Monitor. Colors of EGA and CGA are converted into shades, graphics are full screen and no pre-boot drivers are required.

RGB, *Composite Monitors, and the IBM Portable P.C.

EGA Wonder also runs EGA, CGA, MDA, Hercules and 132 Columns on an RGB Monitor, *Composite Monitor, and the IBM Portable P.C. in 64 colors (shades). EGA and Hercules software are interlaced for high resolution text and graphics.

*Composite Monitor and PC Portable display not shown

Upgrade to EGA Without An EGA Monitor

The **ATI EGA Wonder** goes far beyond software compatibility. It is the result of intensive development by one of the most revolutionary technology companies today — **ATI Technologies Inc.**

The **ATI EGA Wonder** is not just better technology. It is the solution for upgrading to EGA without an EGA monitor.

Only the **ATI EGA Wonder** displays EGA, CGA, MDA, Hercules and 132 column software on an Enhanced Graphics Monitor, an RGB Color/Graphics Monitor, a TTL Monochrome Monitor, a Composite Monitor, or the internal monitor of the PC Portable.

Only the **ATI EGA Wonder** provides upward compatibility to EGA and downward compatibility to CGA, MDA, and Hercules on your present monitor — EGA, RGB, TTL, Composite or PC Portable.

At **ATI** we have developed a better graphics card for you. Call us today at **(416) 477-8804** for more information.

ATI® TECHNOLOGIES INC.

Technology you can Trust.

BOCA RESEARCH, INC.

☐ BocaRAM
Functions: 0-2048 kbytes RAM memory ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ 3/4 length ☐ Introduced: 1986 ☐ Cost: $195-$740

☐ Memek
Functions: 256-2048 kbytes RAM; EEPROM memory ☐ Resolution: 640x200/400 monochrome graphics ☐ 1 serial port(s); 1 parallel port(s); A/D and/or D/A conversion ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1986 ☐ Cost: $645-$1,140

☐ TophAT
Functions: 128-384 kbytes RAM memory ☐ IBM PC AT ☐ Half length ☐ Introduced: 1986 ☐ Cost: $145-$195

☐ TophAT/12
Functions: 128-384 kbytes RAM memory ☐ IBM PC AT and compatibles ☐ Half length ☐ Introduced: 1986 ☐ Cost: $175-$235

BRAEGEN CORP.

☐ ELAN/PC
Functions: 7 color graphics ☐ Braegen LAN connection ☐ IBM 3270, 3278, 3279 terminal/protocol emulation ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $995

BRONSON ELECTRONICS CORP.
(division of Kurz & Root Corp.)

☐ Innovation CGP
Functions: Resolution: 320/640x200; 16 color graphics ☐ 1 parallel port(s) ☐ IBM PC, XT, Portable and compatibles

☐ Model 1008
Functions: 64-512 kbytes RAM memory ☐ IBM PC XT and compatibles

BYAD, INC.

☐ Byway 100
Functions: 64 kbytes RAM memory ☐ 1 serial port(s) ☐ Asynchronous protocol supported ☐ Z80 Coprocessor; Data Exchange Software ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $850

☐ Byway 200
Functions: 64 kbytes RAM memory ☐ 2 serial port(s) ☐ Data encryption; Synchronous mainframe link ☐ CP/M operating system emulation ☐ Z80B Coprocessor ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 100 since 1984 ☐ Cost: $1,100

☐ DS2
Functions: 64 kbytes RAM memory ☐ 1 serial port(s) ☐ CP/M operating system emulation ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 250 since 1983 ☐ Cost: $575

HAUPPAUGE COMPUTER WORKS, INC.
358 Veterans Memorial Highway,
Suite MSI
Commack, NY 11725
516-360-3827

87 Chip, 87-2 Chip are math coprocessors for the IBM PC, PC/XT and 8MHz XT compatibles. These chips come carrier mounted for easy installation, and include a diagnostic diskette to verify proper installation. Also included is a demo diskette with several math coprocessor programs.

CACHE SYSTEMS, INC.

☐ Tapemaker PC/Q36
Functions: Controller for Mag tape ☐ IBM PC

CAERE CORP.

☐ PCSCAN-NET 941
Functions: 1 serial port(s) ☐ PCSCAN-NET LAN connection ☐ Printer spooler/buffer ☐ IBM PC and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 20 since 1985 ☐ Cost: $1,789

CALIDAD ELECTRONICS, INC.

☐ AGI
Functions: Resolution: 640/320x200; 16 color graphics ☐ 1 serial port(s); 3 parallel port(s) ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 125 since 1985 ☐ Cost: $449

CALIFORNIA COMPUTER SYSTEMS

☐ Model 8210
Functions: 2 serial port(s) ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $169

☐ Model 8227-05
Functions: Resolution: 720x348 monochrome graphics ☐ 1 parallel port(s) ☐ DEC VT; 3270 terminal/protocol emulation ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 3,000 since 1984 ☐ Cost: $599

☐ Model 8229-01
Functions: Resolution: 640x200; 4 color graphics ☐ IBM PC XT, AT ☐ Full length ☐ Units sold: 6,000 since 1984 ☐ Cost: $199

☐ Model 8229-02
Functions: Resolution: 640x200; 4 color graphics ☐ IBM PC XT ☐ Full length ☐ Units sold: 12,000 since 1984 ☐ Cost: $245

☐ Z/Plus 8220
Functions: 64-192 kbytes RAM memory ☐ 1 serial port(s) ☐ CP/M operating system emulation ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 470 since 1983 ☐ Cost: $645-$825

CALIFORNIA NETWORK SYSTEMS

☐ ComCard
Functions: 64-256 kbytes RAM memory ☐ 1 serial port(s) ☐ OEM/SNA Gateway; NetServer LAN connection ☐ Clock/calendar ☐ IBM PC, XT, AT and compatibles

CALMEX, INC.

☐ Floppy Controller
Functions: Controller for Floppy disk ☐ IBM PC

☐ Hard Disk Card
Functions: Controller for Hard disk ☐ IBM PC

☐ KF-MD300
Functions: 300 bps modem ☐ IBM PC

☐ Monochrome Monitor
Functions: Controller for Monitor ☐ IBM PC

☐ Multifunction Card
Functions: 64-256 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC

☐ RS-232C/Clock/Calendar
Functions: 1 serial port(s) ☐ IBM PC

☐ RS-232C/Parallel Card
Functions: 1 serial port(s); 1 parallel port(s) ☐ IBM PC

☐ 512K RAM Card
Functions: 64-512 kbytes RAM memory ☐ IBM PC

CAMBRIAN CONSULTANTS, INC.

☐ DriveIn
Functions: 3-1/2", 20 MB Disk drive ☐ IBM PC ☐ Introduced: 1986

CAMBRIDGE COMPUTER GRAPHICS

☐ Color Graphics Board
Functions: 16 color graphics ☐ IBM PC, XT, AT and compatibles

CAPITAL EQUIPMENT CORP.

☐ IEEE 488
Functions: IEEE-488 ☐ Controller for Printer ☐ Printer spooler/buffer ☐ IBM PC, AT, XT and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Units sold: 15,000 since 1983 ☐ Cost: $395

CAPITOL COMPUTER CENTER

☐ X-COM
Functions: 300-1,200 bps modem ☐ IBM PC, XT ☐ Software supplied (included in price) ☐ Introduced: 1984 ☐ Cost: $399

CASE COMMUNICATIONS, INC.

☐ PC212A
Functions: 1 serial port(s) ☐ 300; 1,200 bps modem ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $499-$539

CERMETEK MICROELECTRONICS, INC.

☐ Cermetek 2400SPC
Functions: 300; 1,200; 2,400 bps modem ☐ IBM PC, XT, AT and compatibles ☐ Half length ☐ Introduced: 1986

☐ Info-Mate 212 PC
Functions: 1 serial port(s) ☐ 110; 300; 1,200 bps modem ☐ IBM PC ☐ Software supplied (included in price) ☐ Introduced: 1983 ☐ Cost: $149

☐ 1200SPC Modem
Functions: 1 serial port(s) ☐ 110; 300; 1,200 bps modem ☐ IBM PC ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1984 ☐ Cost: $495

CGRS MICROTECH, INC.

☐ PC DIADAC 1
Functions: A/D and/or D/A conversion ☐ IBM PC ☐ Full length ☐ Introduced: 1986 ☐ Cost: $350

CHANNEL SYSTEMS INTERNATIONAL, INC.

☐ PC/CNA
Functions: 64 kbytes RAM memory ☐ 1 serial port(s) ☐ Synchronous mainframe link ☐ 3270/3770 SNA terminal/protocol emulation ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 1,500 since 1984 ☐ Cost: $1,195

CHATTERBOX VOICE LEARNING SYSTEMS

☐ IntroVoice V
Functions: Voice I/O or synthesis ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1986 ☐ Cost: $395

CHEETAH INTERNATIONAL, INC.

☐ Cheetah Card; Cheetah Card/70
Functions: 2560 kbytes RAM memory ☐ IBM PC AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $1,495; $2,295 (Card/70)

☐ Cheetah Combo; Cheetah Combo/70
Functions: 512-1536 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $1,275 (1.5 MB)

☐ TriComPlus
Functions: 3 serial port(s); 1 parallel port(s) ☐ IBM PC AT and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1985 ☐ Cost: $495

HAUPPAUGE

Is Getting A Fast Reputation.

HAUPPAUGE started earning a fast reputation with their 87 Math Pak, the combination of an 87 chip and 87 Software Pak that's been accelerating PC math since 1982.

Next came their racy 287 FAST/5, a math coprocessor module with its own 5MHz clock, speeding up PC/AT math by 25%. (Pictured above.)

Now, Hauppauge Unveils the 287 FAST10...
Our newest math coprocessor for the PC/AT, the 287 FAST10 moves out at 10MHz—more than doubling the speed of each floating point math operation. The FAST10 accelerates AutoCad, 1-2-3, Symphony, Turbo Pascal, Framework and more. The FAST10 also runs in PC/AT compatibles including the Compaq Deskpro 286, Sperry PC/IT and most 286 accelerator boards.

...And the 87 Software Pak Version 6.2
Designed to steal the heart of programmers, the 87 Soft-Ware Pak supports IBM's BASIC Compiler 1.0 and 2.0, and Microsoft's QuickBASIC, executing math-intensive programs up to 20 times faster! The 87 Software Pak also performs FFT's and Matrix operations. For example, a PC (or PC/XT) with an 87 Chip and 87 Software Pak can perform a 512-point complex FFT in just 1.1 seconds. What's more, a PC/AT with a FAST10 inverts a 25 by 25 element matrix in under 1 second.

HAUPPAUGE Math Coprocessors

287 FAST10, 10MHz math coprocessor for PC/AT and compatibles .... **$469**.
287 FAST8 8MHz math coprocessor for PC/AT and compatibles ... **$379**
287 Chip PC/AT math coprocessor —runs at 4MHz in the old model IBM PC/AT and 5.33 MHz in the new model PC/AT **$219**
87 Chip Math coprocessor for IBM PC, PC/XT and compatibles **$129**
87-2 Chip Math coprocessor for 8MHz PC compatibles **$195**

HAUPPAUGE Math Coprocessor Paks

87 Software Pak V.6.2 Math coprocessor software support for IBM BASIC Complier 1.0, 2.0 and Microsoft's QuickBASIC. Plus, Matrix and FFT support, one year of free updates, complete source code and "8087 Applications and Programming" **$180**
87 QB PAK Math coprocessor support for Microsoft QuickBASIC and IBM BASIC Compiler ..... **$ 69**
Recalc+ Math coprocessor support for 1-2-3 version 1A ..... **$ 95**
HFT+ Complete Hayes Fourier Transform Package **$125**

The 287 FAST10 Doubles Your PC/AT's Math Speed!
Help your PC/AT get a fast reputation with Hauppauge's new 287 FAST10. Call today, or contact your local computer dealer to learn more about Hauppauge's racy product line. And ask for "87 Q & A," our free booklet on math coprocessors.

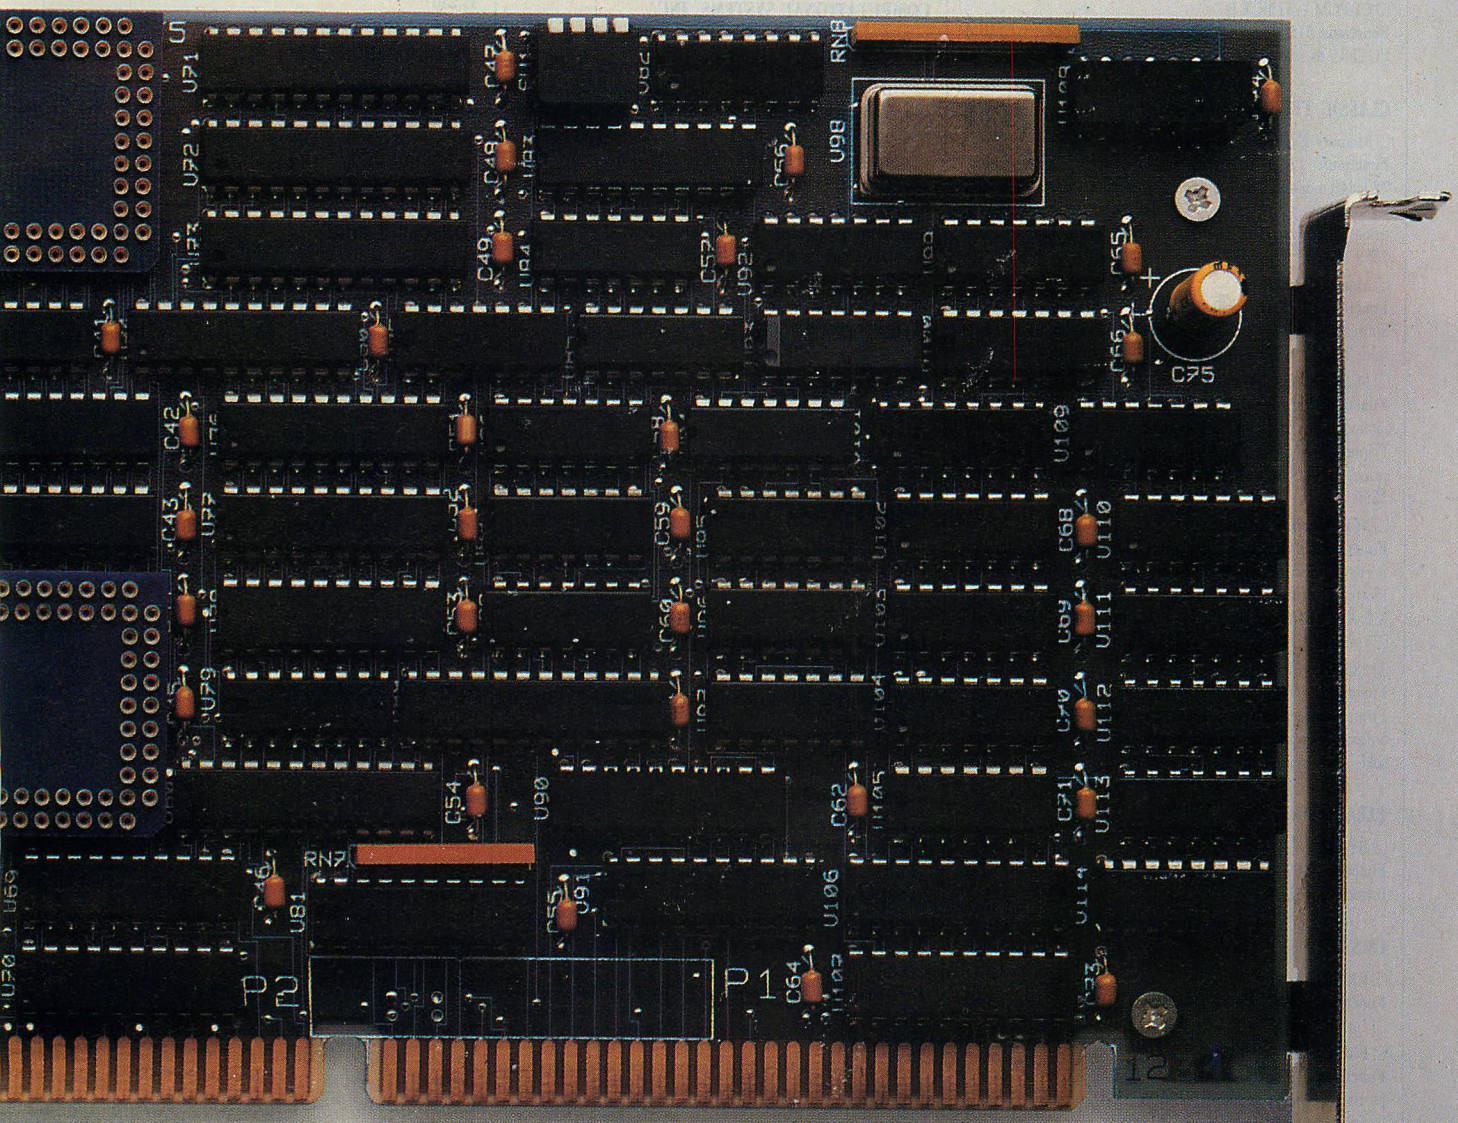
How to 386

It's simple.

With Intel's Inboard™ 386/AT.

It fits right into your IBM® AT or compatible, and gives you all the performance of a 386 system.

Without having to buy a 386 system. (Which, if you've priced one lately, is about three times as expensive.)



Inboard 386 is based on the revolutionary 32-bit, 16 MHz 80386 chip *we* invented. So it'll work with all the software you've got sitting on your desk. As well as any add-in boards you may have hiding in your computer—like, just for instance, the Above™ Board. Which we also invented.

Inboard 386 lets you whiz through recalcs with Lotus® 1-2-3.® And it makes your network server serve you even faster. In fact, it'll make any program serve you faster.

And with 386 control software,

Inboard and Above are trademarks and Intel a registered trademark of Intel Corporation. IBM is a registered trademark of International Business Machines Corp. Lotus and

your AT.

you can take advantage of exceptional multitasking capabilities. Like putting together a presentation while your computer is downloading data. (A slightly more efficient way of doing business.)

Don't forget our five-year warranty. Or toll-free technical support line.

To find out more, check with your favorite computer dealer or call us at (800) 538-3373.

And see why Inboard 386 beats the system.

C. S. D., INC.

☐ 4-111 Ultra Res
Functions: Resolution: 1024x1024 monochrome graphics ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $2,000

☐ 4-79 Ultra Res
Functions: Resolution: 1024x1024 monochrome graphics ☐ IBM PC AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $995

CSS LABORATORIES, INC.

☐ AT512/AT1024
Functions: 512-4096 kbytes RAM memory ☐ Clock/calendar; 80286 motherboard ☐ IBM PC AT

☐ Mother Superior
Functions: 8 MHz 80286 motherboard ☐ IBM PC XT ☐ Full length ☐ Cost: $645

☐ Rainbow Graphics Adapter
Functions: Resolution: 320/640x200; 4 color graphics ☐ 1 parallel port(s) ☐ IBM PC

☐ TurboRAM
Functions: 2048 kbytes RAM memory ☐ IBM PC XT ☐ Full length ☐ Cost: $119

☐ XT286/PC286
Functions: 512-4096 kbytes RAM memory ☐ Clock/calendar; 80286 motherboard ☐ IBM PC, XT

☐ 286 Performer
Functions: 4096 kbytes RAM memory ☐ 6 MHz 80286 motherboard ☐ IBM PC AT ☐ Full length ☐ Cost: $645

CTC SYSTEMS, INC.

☐ VERSANET-4 AT; 8 AT
Functions: LAN connection ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Cost: $395-$495

☐ VERSANET-40; 80
Functions: LAN connection ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Cost: $595-$795

CXI, INC.
SEE AD ON PAGES 266/267

☐ PCOX/Graphics
Functions: Resolution: 720x396; 7 color graphics ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $1,995

☐ PCOX/PLUS
Functions: modem ☐ IBM 3278/79 terminal/protocol emulation ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1984 ☐ Cost: $1,145

☐ PCOX/STANDARD
Functions: IBM 3278/79 terminal/protocol emulation ☐ IBM PC and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1983 ☐ Cost: $895

☐ PCOX/3270 PC
Functions: Synchronous mainframe link ☐ IBM 3270, 3287 terminal/protocol emulation ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $1,595

DATA ELEKTRONIK

☐ TC 1500
Functions: 64 kbytes RAM memory ☐ Controller for Mag tape ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 800 since 1985 ☐ Cost: $1,100

DATA MANAGEMENT SYSTEMS, INC.

☐ OVERTHRUSTER
Functions: 8088-2 Coprocessor ☐ IBM PC, XT ☐ Cost: $295

DATA TECHNOLOGY CORP.

☐ DTC 51 Host Adapter
Functions: Controller for Hard disk ☐ IBM PC, XT, AT ☐ Units sold: 15,000 since 1982 ☐ Cost: $155

☐ Model 3251
Functions: Controller for Floppy disk ☐ IBM PC, XT, AT ☐ Software supplied ☐ Half length ☐ Units sold: 1,500 since 1984 ☐ Cost: $195

☐ Model 5150CX
Functions: Controller for Hard disk; Cartridge tape ☐ IBM PC, XT, AT ☐ Software supplied ☐ Units sold: 1,000 since 1985 ☐ Cost: $150

☐ Model 5180C
Functions: Controller for Hard disk; Cartridge tape ☐ IBM PC AT ☐ Software supplied ☐ Half length ☐ Units sold: 5,000 since 1985 ☐ Cost: $205

☐ Model 5250CX
Functions: Controller for Floppy disk; Hard disk; Cartridge tape ☐ IBM PC, XT, AT ☐ Software supplied ☐ Half length ☐ Units sold: 5,000 since 1984 ☐ Cost: $326

☐ Model 5280C
Functions: Controller for Hard disk; Floppy disk; Cartridge tape ☐ IBM PC AT ☐ Software supplied ☐ Full length ☐ Units sold: 5,000 since 1985 ☐ Cost: $230

☐ Model 5350D
Functions: Controller for Hard disk; Mag tape; Cartridge tape ☐ IBM PC, XT, AT ☐ Software supplied ☐ Half length ☐ Introduced: 1985 ☐ Cost: $315

DATA TRANSLATION, INC.

☐ DT2801 Series
Reviewed May 1986 p. 52.
Functions: A/D and/or D/A conversion; Process control ☐ Clock/calendar ☐ IBM PC ☐ Software supplied ☐ Full length ☐ Introduced: 1982 ☐ Cost: $995-$1,970

☐ DT2803
Functions: Resolution: 256x256; color graphics ☐ A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1984 ☐ Cost: $1,495

DATAPOINT CORP.

☐ INX-PC
Functions: ARCnet LAN connection ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Introduced: 1984 ☐ Cost: $795

DATAPORT/CS

☐ Wireless Modem
Functions: 2 serial port(s); 1 parallel port(s) ☐ 300; 1,200; 2,400; 4,800; 9,600 bps modem ☐ Controller for Printer ☐ IBM PC ☐ Units sold: 2,500 since 1985 ☐ Cost: $675

HAUPPAUGE COMPUTER WORKS, INC.
358 Veterans Memorial Highway,
Suite MSI
Commack, NY 11725
516-360-3827

287 FaST10 is a high speed 10MHz math coprocessor for the IBM PC/AT and compatibles including the Compaq 386. It contains its own clock to run at a full 10MHz speed, and works with any speed 286 CPU including 6 and 8MHz PC/ATs and 10/12 MHz compatibles.

DATEC, INC. (NC)

☐ PAL Plus
Functions: 1 serial port(s) ☐ 300; 1,200 bps modem ☐ IBM PC, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $499

DATEM, LTD.

☐ dDCM 800
Functions: 2 kbytes RAM memory ☐ 2 parallel port(s); Process control; BITBUS interface ☐ IBM PC, Portable ☐ Software supplied ☐ Half length ☐ Introduced: 1984 ☐ Cost: $499

DATRAN CORP.

☐ Modem Accelerator
Functions: 75-19.2K bps modem; Data encryption ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $495

DBM, INC.

☐ Magna-3/McGraphicsPlus
Functions: 256-1024 kbytes RAM memory ☐ Resolution: 720/640x400; 640x350; 640/320x200; 720x348; 640x350; 16 color graphics ☐ 2 serial port(s); 1 parallel port(s) ☐ Asynchronous protocol supported ☐ Clock/calendar ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $895-$1,195

DEFINICON SYSTEMS, INC.

☐ DSI-020; DSI-780
Functions: 16384 kbytes RAM memory ☐ 16.7 MHz MC68020 Coprocessor ☐ IBM PC XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $995-$3,295

☐ DSI-32E
Functions: 2048-12288 kbytes RAM memory ☐ 10 MHz NS32032 Coprocessor ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1986 ☐ Cost: $2,295-$2,895

THE DESTEK GROUP

☐ Network Interface
Functions: 2 serial port(s) ☐ DesNet LAN connection ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 1,000 since 1982 ☐ Cost: $500-$750

☐ NIB 100/07
Functions: DesNet LAN connection ☐ Controller for Printer; Floppy disk; Hard disk ☐ IBM PC ☐ Full length ☐ Units sold: 500 since 1982 ☐ Cost: $697

☐ NIS 200
Functions: 1 serial port(s); 1 parallel port(s); IEEE-488 ☐ DesNet LAN connection ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Introduced: 1983 ☐ Cost: $800

DFE ELECTRONIC DATA SYSTEMS

☐ Tiger-32
Functions: 1024-2048 kbytes RAM memory ☐ disk; UNIX System V, XENIX 3.0 operating system emulation ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $2,400

DIAMOND COMPUTER SYSTEMS, INC.

☐ Trackstar
Functions: 64 kbytes RAM memory ☐ 16 color graphics ☐ CP/M; Apple ProDOS, DOS, Pascal operating system emulation ☐ Z80A; 6502 Coprocessor; 80-col. card ☐ IBM PC ☐ Full length ☐ Introduced: 1986 ☐ Cost: $375

DIGIBOARD, INC.

☐ DIGICOM/PLUS
Functions: 1 serial port(s); 1 parallel port(s) ☐ IBM PC, XT, AT ☐ Half length ☐ Units sold: 2,400 since 1984 ☐ Cost: $89

☐ DIGICOM/4
Functions: 4 serial port(s) ☐ IBM PC, XT, AT ☐ Half length ☐ Units sold: 1,420 since 1983 ☐ Cost: $429

☐ DIGICOM/8
Functions: 8 serial port(s) ☐ IBM PC, XT, AT ☐ Full length ☐ Units sold: 850 since 1984 ☐ Cost: $649

☐ DIGIRAM/3MB
Functions: 512-3072 kbytes RAM memory ☐ IBM PC AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1986 ☐ Cost: $295

☐ DIGIRAM/384
Functions: 384 kbytes RAM memory ☐ Clock/calendar; Printer spooler/buffer ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 8,400 since 1983 ☐ Cost: $129

DIGITAL COMMUNICATIONS ASSOCIATES, INC. (DCA)

☐ DCA/Forte PJ
Functions: Novell LAN connection ☐ 3278, 3279 terminal/protocol emulation ☐ IBM PC AT, XT ☐ Full length ☐ Introduced: 1983 ☐ Cost: $1,195

☐ IRMA
Functions: Synchronous mainframe link ☐ IBM 3278/79 (coax) terminal/protocol emulation ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 250,000 since 1982 ☐ Cost: $1,195

☐ IRMAcom/RJE
Functions: 1 serial port(s) ☐ Synchronous mainframe link ☐ IBM 2780/3780 RJE terminal/protocol emulation ☐ Controller for Printer ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $895

☐ IRMAcom/3270
Functions: 1 serial port(s) ☐ Synchronous mainframe link ☐ IBM 3270 controller terminal/protocol emulation ☐ Controller for Printer; Terminal ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $895

☐ IRMAcom/3770
Functions: 1 serial port(s) ☐ Synchronous mainframe link ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $895

☐ IRMAlette
Functions: 1 serial port(s) ☐ Asynchronous mainframe link ☐ IBM 3278 terminal/protocol emulation ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $395

☐ IRMAvision
Functions: IBM 3278 terminal/protocol emulation ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1985 ☐ Cost: $695

☐ IRMAX
Functions: Resolution: 640x420; 16 color graphics ☐ Synchronous mainframe link ☐ IBM 3278/79, S2G, S3G terminal/protocol emulation ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $1,595

☐ PC Modem Card FastLink
Functions: ☐ 300-2,400 bps modem ☐ IBM PC and compatibles ☐ Full length ☐ Introduced: 1985 ☐ Cost: $1,995

☐ Smart Alec
Functions: 5251 Model 11, 5291/92 terminal/protocol emulation ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $895-$1,295

DIGITAL SOLUTIONS, INC. (PA)

☐ DSI-COLOR+
Functions: Resolution: 640x200; 16 color graphics ☐ IBM PC, XT, AT ☐ Full length ☐ Units sold: 300 since 1985 ☐ Cost: $115

☐ DSI-HERC+
Functions: Resolution: 720x348 monochrome graphics ☐ IBM PC, XT, AT ☐ Full length ☐ Units sold: 200 since 1985 ☐ Cost: $170

☐ DSI-Multi/IO
Functions: 2 serial port(s); 1 parallel port(s) ☐ Controller for Floppy disk ☐ Clock/calendar ☐ IBM PC, XT, AT ☐ Full length ☐ Units sold: 150 since 1985 ☐ Cost: $125

☐ DSI-512
Functions: 64-512 kbytes RAM memory ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, AT ☐ Full length ☐ Units sold: 250 since 1985 ☐ Cost: $110

☐ DSI-6Pak+
Functions: 64-384 kbytes RAM memory ☐ 2 serial port(s); 1 parallel port(s) ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, AT ☐ Full length ☐ Units sold: 350 since 1985 ☐ Cost: $150

DIGITAL TECH

☐ Multifunction Board
Functions: 64 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM 3278/79 terminal/protocol emulation ☐ Printer spooler/buffer ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 500 since 1984 ☐ Cost: $1,295

DIGITRONICS

☐ 6-IBM/IO
Functions: 1 serial port(s); Process control ☐ IBM PC, XT, AT ☐ Software supplied ☐ Half length ☐ Units sold: 100 since 1985 ☐ Cost: $250

DISCORTEX CORP.

☐ RGB+ Coloring System CX-1
Functions: 16 color graphics ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1984 ☐ Cost: $395

DOLEN COMPUTER CORP.

☐ DC-1
Functions: monochrome graphics ☐ IBM PC and compatibles

DYAD TECHNOLOGY CORP.

☐ PC/VRTX
Functions: 64 kbytes RAM memory ☐ VRTX operating system emulation ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 40 since 1984 ☐ Cost: $1,695

DYNATEC SYSTEMS, INC.

☐ SuperCharger
Functions: 8088 Coprocessor ☐ IBM PC ☐ Software supplied ☐ Cost: $280

☐ Supercharger II
Functions: 9.54 MHz 8088, V20 accelerator ☐ IBM PC, XT ☐ Introduced: 1986 ☐ Cost: $199

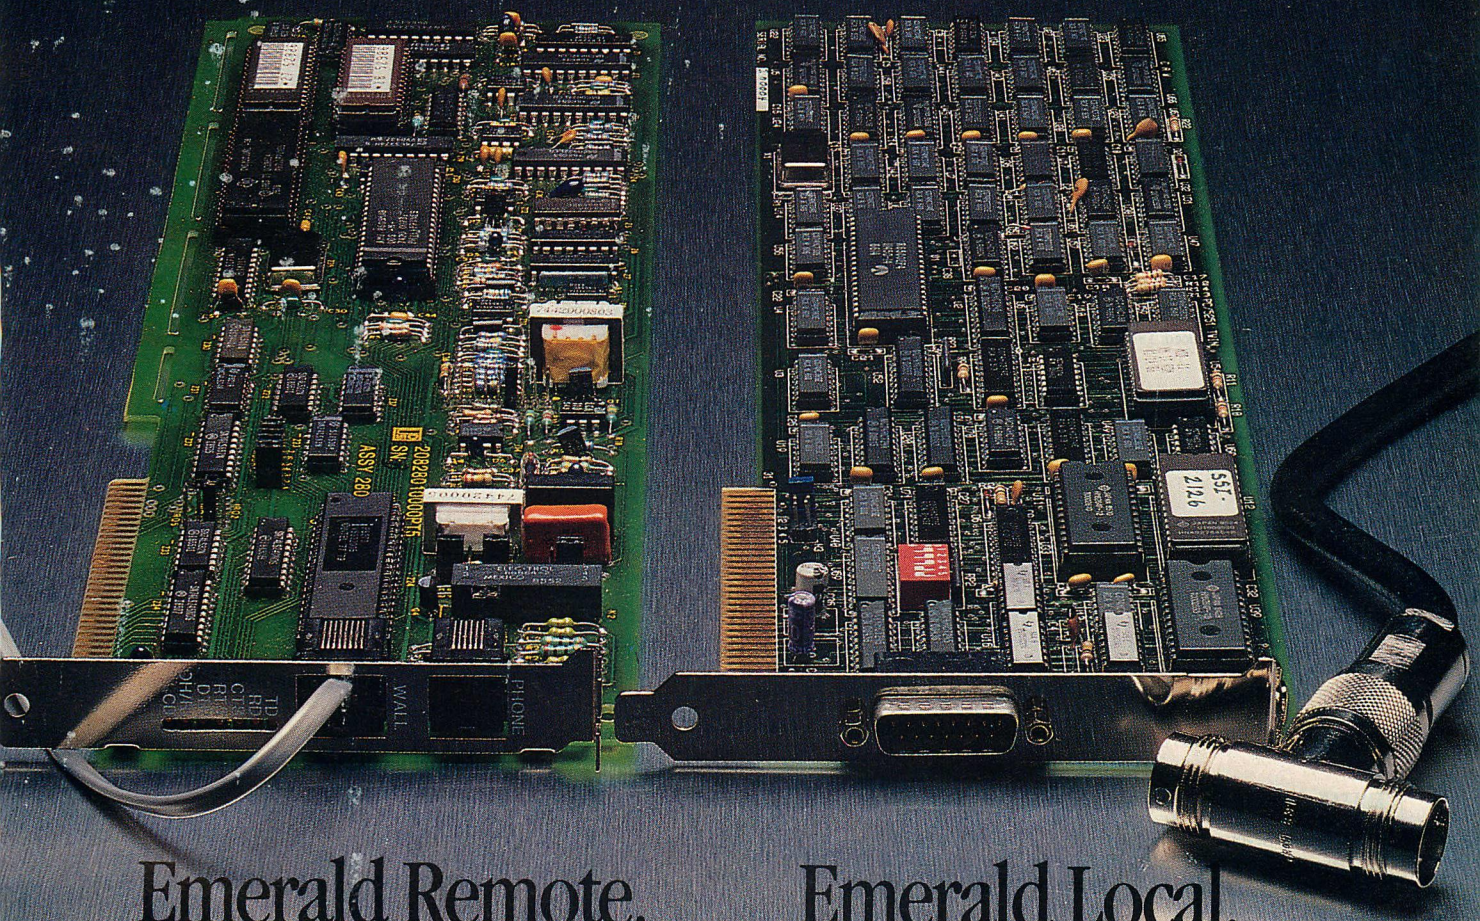
EARTH COMPUTERS

☐ Turbo Accel-286
Functions: 512 kbytes RAM memory ☐ 80286 Coprocessor ☐ IBM PC ☐ Cost: $995

☐ TURBOSLAVE I
Functions: Clock/calendar; 8 MHz Z80H Coprocessor ☐ IBM PC ☐ Full length ☐ Introduced: 1984 ☐ Cost: $1,200

☐ TURBOSLAVE PC
Functions: 128 kbytes RAM memory ☐ 2 serial port(s) ☐ CP/M disk emulation ☐ IBM PC and compatibles ☐ Software supplied (included in price) ☐ Cost: $395

EASTMAN KODAK CO.



Business Systems Markets Division

☐ Floppy Disk Controller
Functions: Controller for Floppy disk ☐ IBM PC and compatibles ☐ Half length ☐ Introduced: 1986

EICON TECHNOLOGY CORP.

☐ Network Adapter
Functions: 128 kbytes RAM memory ☐ 2 serial port(s) ☐ AppleTalk; IBM PC Network, Token Ring Network LAN connection; Synchronous mainframe link; X.25 network connection ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 75 since 1985 ☐ Cost: $995-$1,395

Now you have two choices in 5251 emulation.

Emerald Remote. Emerald Local.

Introducing the new PC/5251 TWIN™ from Emerald Technology.

Good news! Your local options are finally as good as your remote. Emerald Technology, the leader in 5251 remote emulation is now shipping a local board with the features that users like you have been waiting for. And the dependability and performance our remote customers have enjoyed all along.

Choose seven logical sessions, printer support, and fast file transfer.

Emerald taps into the full power of your network. Run seven sessions concurrently on your System 34/36/38 including a printer. You can also choose your favorite file transfer utility whether it's PC/Support 36, PC/Support 38, or our own proven and popular ETU, the industry standard for high performance file transfer. And, because Emerald supports the IBM applications programming interface, you can be confident of compatibility with future IBM Products.

Call Emerald for a full range of choices in System 3X communications.

Unlike other firms, which dabble in System 34/36/38 communications, Emerald Technology is committed to providing you with a complete range of choices. Both remote and local. Boards, software, port expanders, modems and even cables. And the expertise to help you link them into a smoothly functioning network.

Call or write today for detailed technical information about our new PC/5251 TWIN emulator and our complete line of System 3X communications choices.
(206) 462-8200

The best solutions. The best support.

Remember the first time you upgraded your color graphics hardware?

The thrill is still the same.

The discovery of color graphics. As a child, it was a significant event. As a business person, it will change the way you use your personal computer.

Genoa Systems proudly introduces a new and colorful technology for the PC called Spectra EGA. The Enhanced Graphics Adapter that lets you rediscover the benefits, and the thrill, of color graphics on your PC.

An EGA with a better vision.

EGA compatibility is an art that only Spectra has mastered. And, while other EGA hardware is incompatible with current industry standards, Spectra EGA fully supports hardware and software designed for the IBM Enhanced Graphics Adapter, Color Graphics Adapter and Monochrome Graphics Adapter.

This means that you don't have to wait around for new software updates in order to begin enjoying your EGA today.

A lot more than just pretty pictures.

The first thing you'll rediscover with your Spectra EGA is color. There is a whole lot more than ever before. Sixty-four separate colors, in fact, from which any sixteen can be displayed at once.

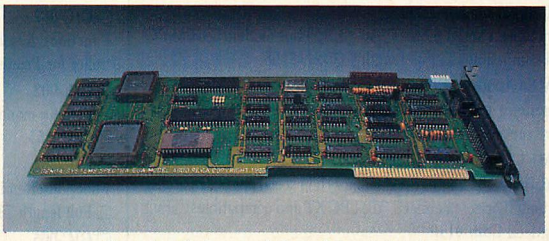
Next, you'll notice a higher resolution in both text and graphics modes.

The real fun comes in putting the board to work. You'll see soft scrolling, panning and windowing that was never before possible on a PC. And the flicker-free display will allow you to regulate these movements at any speed, or in any direction.

There are 512 characters carried in Spectra's memory that can all be displayed at once. Which is twice as many as previously possible on a PC.

And if you wish to use other characters, or even create your own alternate character set, Spectra will support those, too.

More colorful features.



Each Spectra EGA comes fully equipped with a parallel printer port, light pen interface and 256K RAM on the single board. This is especially good news because a full 256K RAM is needed to run most popular graphics software effectively.

One thrilling price.

Perhaps the best news is Spectra's price.

Upon first glance you may find that the Spectra EGA and the IBM EGA seem to be very closely priced. But look again. Because the standard IBM EGA only comes with 64K RAM, whereas Spectra EGA comes with a full 256K.

Now, you may purchase the extra memory board you'll need from IBM at an additional cost of about 70–80 percent. Or you can buy Spectra EGA from Genoa...and rediscover the thrill of a bargain.

Spectra Enhanced Graphics Adapter

To find out more about Spectra, or a qualified Genoa distributor near you, call 408-945-9720. Or write to Genoa Systems Corporation, 73 E. Trimble Road, San Jose, CA 95131.

Spectra EGA from Genoa. Evolution in color graphics.

MS-DOS 3.1 ON THE STD BUS: INDUSTRIAL QUALITY AND COMMERCIAL CONVENIENCE FROM PRO-LOG.

Your control system has a lot riding on it. A million-dollar production facility. Life-giving medical equipment. Tomorrow's daily newspaper. It needs to work. . . and keep on working.

Whatever your application, you can benefit from Pro-Log's STD-DOS: The convenience and familiarity of IBM PC/AT® software and operating standards, but in rugged, industrial-quality hardware. It works . . . and keeps on working.

INDUSTRIAL QUALITY:

Operates 0° to 65°C for more than 10 years with an average MTBF of more than 20 years per card. Backed by Pro-Log's 5-year parts and labor warranty.

COMMERCIAL CONVENIENCE:

Microsoft's® MS-DOS 3.1 is a software bus for connecting libraries, languages, editors, and application programs.

The STD BUS is an industry standard hardware bus for connecting memory, I/O, and peripheral functions.

The IBM PC/AT or clone is your development tool.

STD-DOS FEATURES: WITH 2 CARDS

- 8088 CPU, 5 MHz
- Time-of-day clock
- MS-DOS 3.1 in ROM disk
- 128K-byte user ROM disk
- 16K-byte user RAM disk
- 112K bytes system RAM
- RS-232-C, RS-422/485 ports
- I/O expandable to 24 STD BUS card slots
- Memory expandable to 640K bytes
- Under $1200

NOW WITH 20 MBYTE HARD DISK!

NEW SOFTWARE! . . . STD-LIB 1.1: a fully documented disc-resident library of driver software that supports Analog and Digital STD BUS cards for "C", BASIC, and Assembly language programs.

For information on STD-DOS products, local seminars, or a personal demonstration, CALL or WRITE TODAY.

DOES YOUR PC HAVE A FUTURE?

OUR HARDWARE ANSWERS YOUR IMMEDIATE NEEDS.

THE PC-286 16MHz THE FASTEST ACCELERATOR BOARD IN THE WORLD.

FAST IS BEST

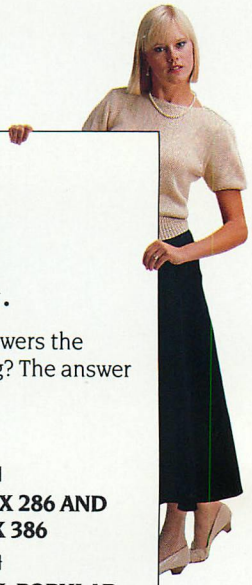
Independent tests of major computers proved that the new **STD 16-MHz** accelerator board's Dhrystone benchmark numbers were astonishing!

YOU CAN ALWAYS JUDGE A PRODUCT BY THE COMPANY IT KEEPS

HARDWARE	DHRYSTONE	ESTIMATED PRICE
PC-286 16-MHz MSDOS 3.0	**3,571**	**$2,995**
IBM 4341-II VM/SP3 WATERLOO C1.2	3,333	$200,000+
VAX 11/785 UNIX 4.3 bsd	2,135	$200,000+
APOLLO DN 660 AEGIS SR9/IX 3.12	1,666	$52,000+
IBM PC/AT 80286 6-MHz MSDOS 3.0	1,250	$5,295

Dhrystone: *A set of benchmark tests used to compare the speed of different computers. The Dhrystone Benchmark program is available on disk in ADA, PASCAL and C. The IBM PC/XT which uses the 8088 processor, running at 4.77-MHz, achieves a Dhrystone score of 271.*

TOP BOARD THE FASTEST EMS MEMORY BOARD IN THE WORLD.



WIN THE SPEED & SPACE RACE

All other EMS Boards have something in common. What they don't have is speed & space. At Seattle Telecom & Data, our EMS boards transfer information quickly across our UNIQUE 16 bit Top Bus. Teamed up with the PC-286 Accelerator Board, we have the fastest memory solution in the world, and we are the only ones who offer 8 megabytes of memory in just two slots.

THIS COMPARISON PROVES THE POINT

EMS BOARDS	DATA PATH	TIME (SPEED)	NUMBER OF SLOTS NEEDED FOR 8 MEGABYTES
TOP BOARD	**16 BIT TOP BUS SOLUTION**	**37 SECONDS**	**2**
INTEL Above Board	8 BIT PC BUS	89 SECONDS	4

- *These numbers are based on Sieve of Eratosthenes benchmark procedure – Byte Magazine, January, 1983.*
- EMS – *Expanded Memory Specification*

STD-386 16 MHz THE BOARD THAT RUNS EVERYTHING.

The new STD-386 16MHz accelerator board answers the biggest question of all. Will it run on everything? The answer is

YES!

- **A FULL HARDWARE SOLUTION**
- **RUNS PC DOS 8086, 286,386 SOFTWARE**
- **RUNS 3 TIMES FASTER THAN A PC-AT**
- **RUNS XENIX 286 AND XENIX 386**
- **RUNS ON ALL POPULAR PC-AT CLONES**
- **RUNS MORE THAN ONE OPERATING SYSTEM SIMULTANEOUSLY**

"The companies named in this brochure are trademarks of their manufacturers."

RELIABILITY MEANS QUALITY. WE GUARANTEE IT.

EACH BOARD IS RIGOROUSLY TESTED.

At STD, reliability starts with professionals who understand the meaning of quality control.

Because we utilize the latest CAE/CAD design techniques, we control all phases of the engineering process. We design quality into the product. We guarantee this quality through a 96 - hour burn-in, in-circuit testing, and complete functional testing.

NO ONE SPENDS MORE TIME ON DETAILS.

During the design and execution of STD boards, each design element undergoes months of planning, analysis, and testing. Superior products are not created by accident.

We aggressively select the components we use to take advantage of every available technological innovation. This adds significant value to our products.

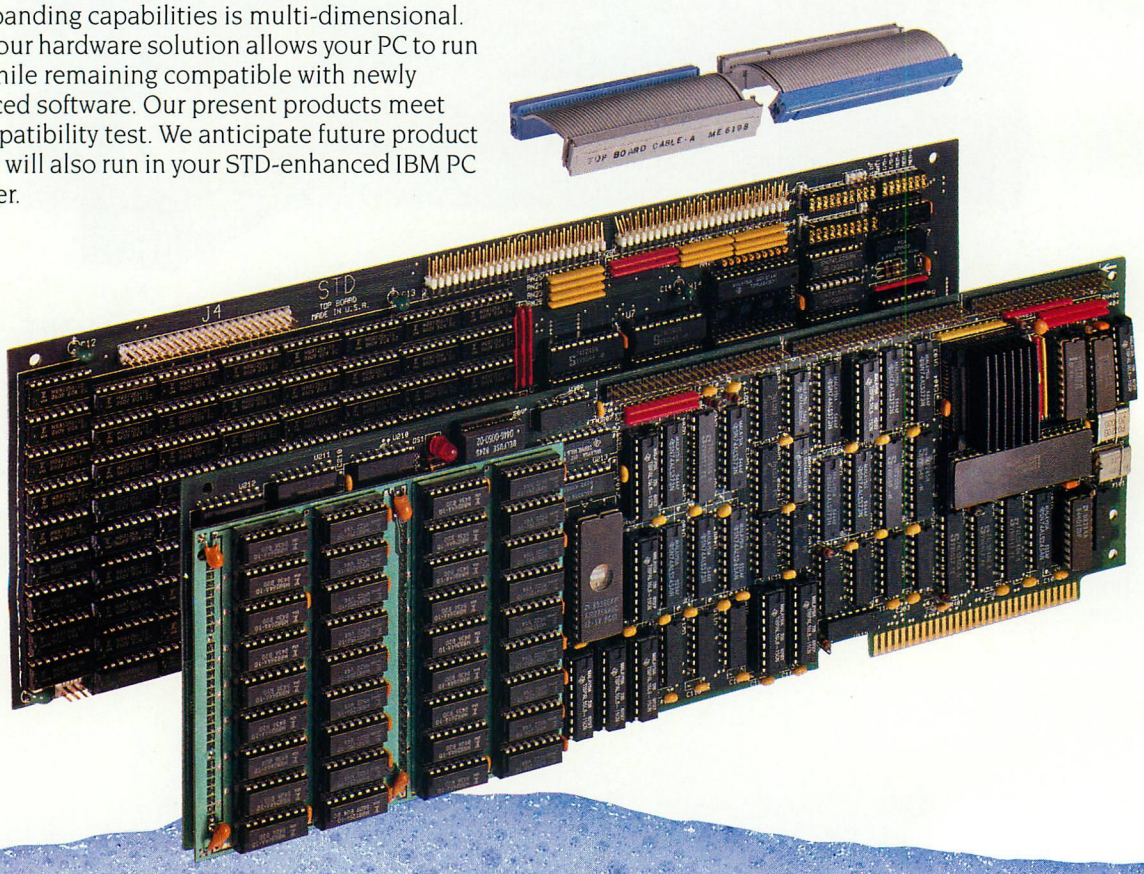
YOUR PC'S FUTURE IS WITHIN YOUR GRASP.

Your PC's future doesn't have to be all washed-up. We think the future for millions of personal computers is excellent. Because of the present investment you have in personal computers, abandoning your existing hardware is not in your best interest. Our mission in designing superior enhancement hardware for your PC is to give you practical alternatives.

Technology continues to improve with time. The issue for all of us is not trying to stop time, but to prepare for the future. The planning for the prolonged useful lifespan of your PC is the mission of Seattle Telecom & Data.

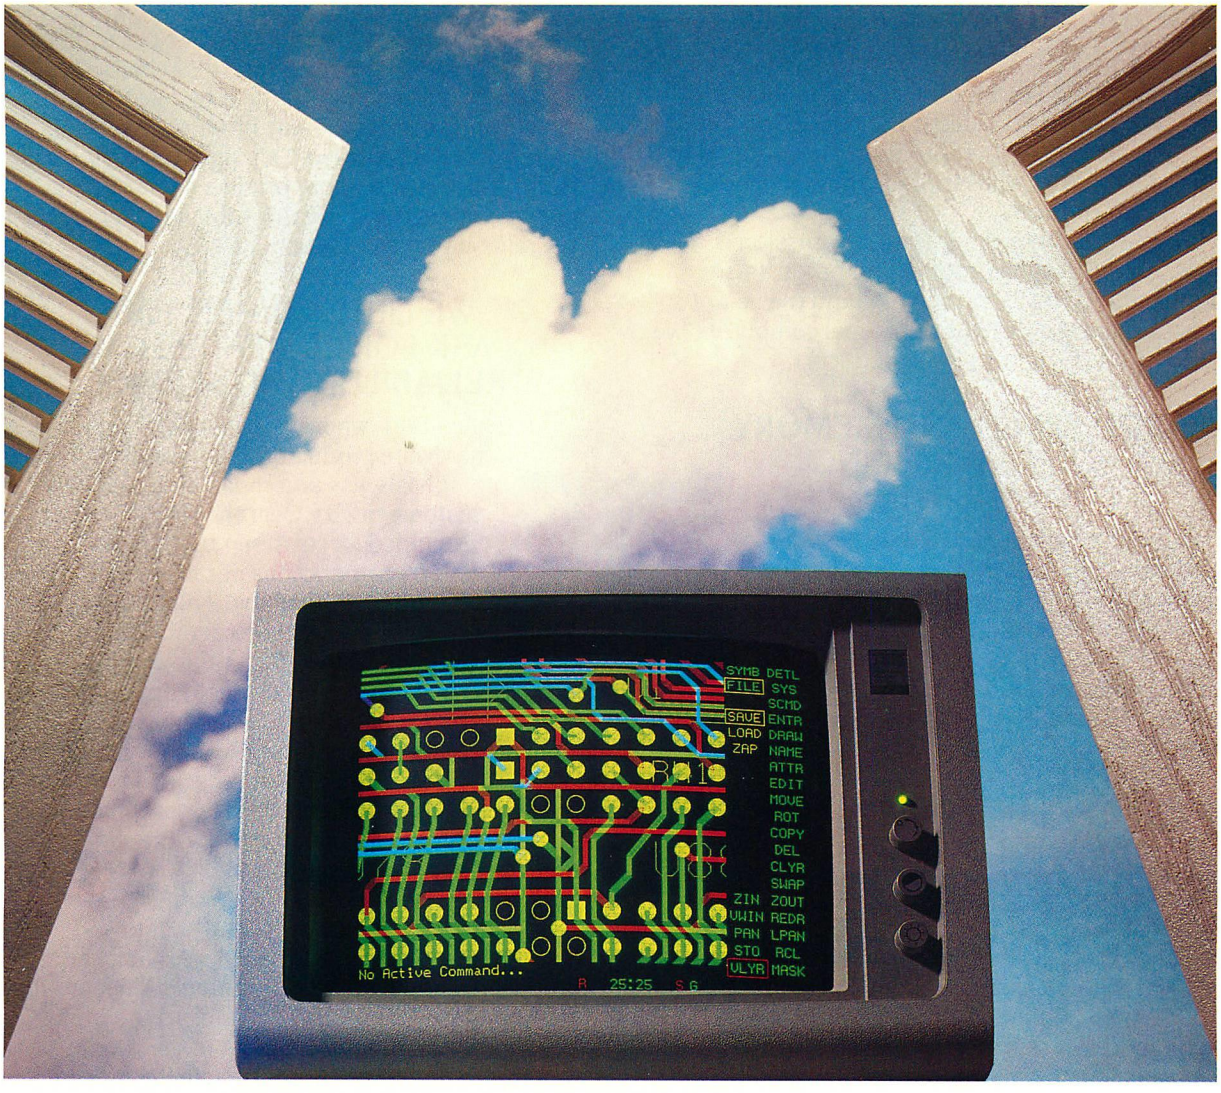
BUYING THE BEST IS A SMART INVESTMENT.

STD products offer state-of-the-art compatibility and reliability. Along with this is our fully engineered hardware solution. We think that the partnership between our products and the host IBM PC or clone should be transparent to you once the cover is closed. We don't use software strategies because we are convinced that full software and hardware compatibility can not be reached by this means.



Expanding capabilities is multi-dimensional. At STD, our hardware solution allows your PC to run faster while remaining compatible with newly introduced software. Our present products meet the compatibility test. We anticipate future product releases will also run in your STD-enhanced IBM PC computer.

Our present products fit comfortably into either the DOS or XENIX world. This did not happen by accident. The demands for more speed, greater memory and upward compatibility will continue to be addressed at STD.



IT'S YOUR CHOICE.

In the end, it will be your choice. The lifespan of most present day hardware and software products is about twelve to eighteen months. But changing products is expensive and time consuming. For some this is a solution. For others a different approach is the right one. A significant number of present PC owners should enhance their existing hardware with products that meet the three key criteria; (1) Compatibility of both hardware and software, (2) Quality and, (3) Service.

The STD accelerator and EMS memory boards meet all three criteria. Please contact us for more information on how our products can meet your needs and significantly prolong your PC's useful life. After careful review, you will appreciate the choices you have.

YOUR BEST INVESTMENT STRATEGY IS TO UPGRADE WITH STD.

BY CONTINUING TO CREATE NEW PRODUCTS, YOUR PC'S FUTURE IS PROTECTED.

Since the founding of Seattle Telecom & Data in 1981, we have welcomed the future as a partner. We think that the need for enhanced capabilities of personal computers is where we can make a major contribution. Companies throughout the world have made a significant financial commitment to personal computers. The most cost-effective investment for meeting tomorrow's processing needs is to upgrade. This incremental investment is today's most cost-justified strategy.

Today's software is increasing the compatibility requirements of hardware manufacturers. Connectivity of PC to mainframe, network to network, and an improved type of workstation are STD's projects for the future.

Anticipating change is normal at STD and we continue to grow to meet the increased demand for our products. With this success has come a renewed sense of commitment to the future. At STD the future is bright.

PC ENHANCEMENT IS OUR BUSINESS.

UPGRADING YOUR PC IS THE RIGHT ANSWER.

The child's world is full of wonderful fantasies. In contrast, system manufacturers and the people who purchase computer products are not blind to the reality that purchases made today will be obsolete tomorrow.

At Seattle Telecom & Data our mission is to stop your PC's aging process. Our products are designed and manufactured to stand the test of time by enhancing existing personal computers. We build the future into today's products.

WE ADD SPEED AND MEMORY WITHOUT SACRIFICING COMPATIBILITY.

Our design philosophy is to build innovative products that improve the speed and memory capability of your PC. Seattle Telecom & Data offers the fastest PC accelerator and companion memory board in today's market. Compatibility protects your investment.

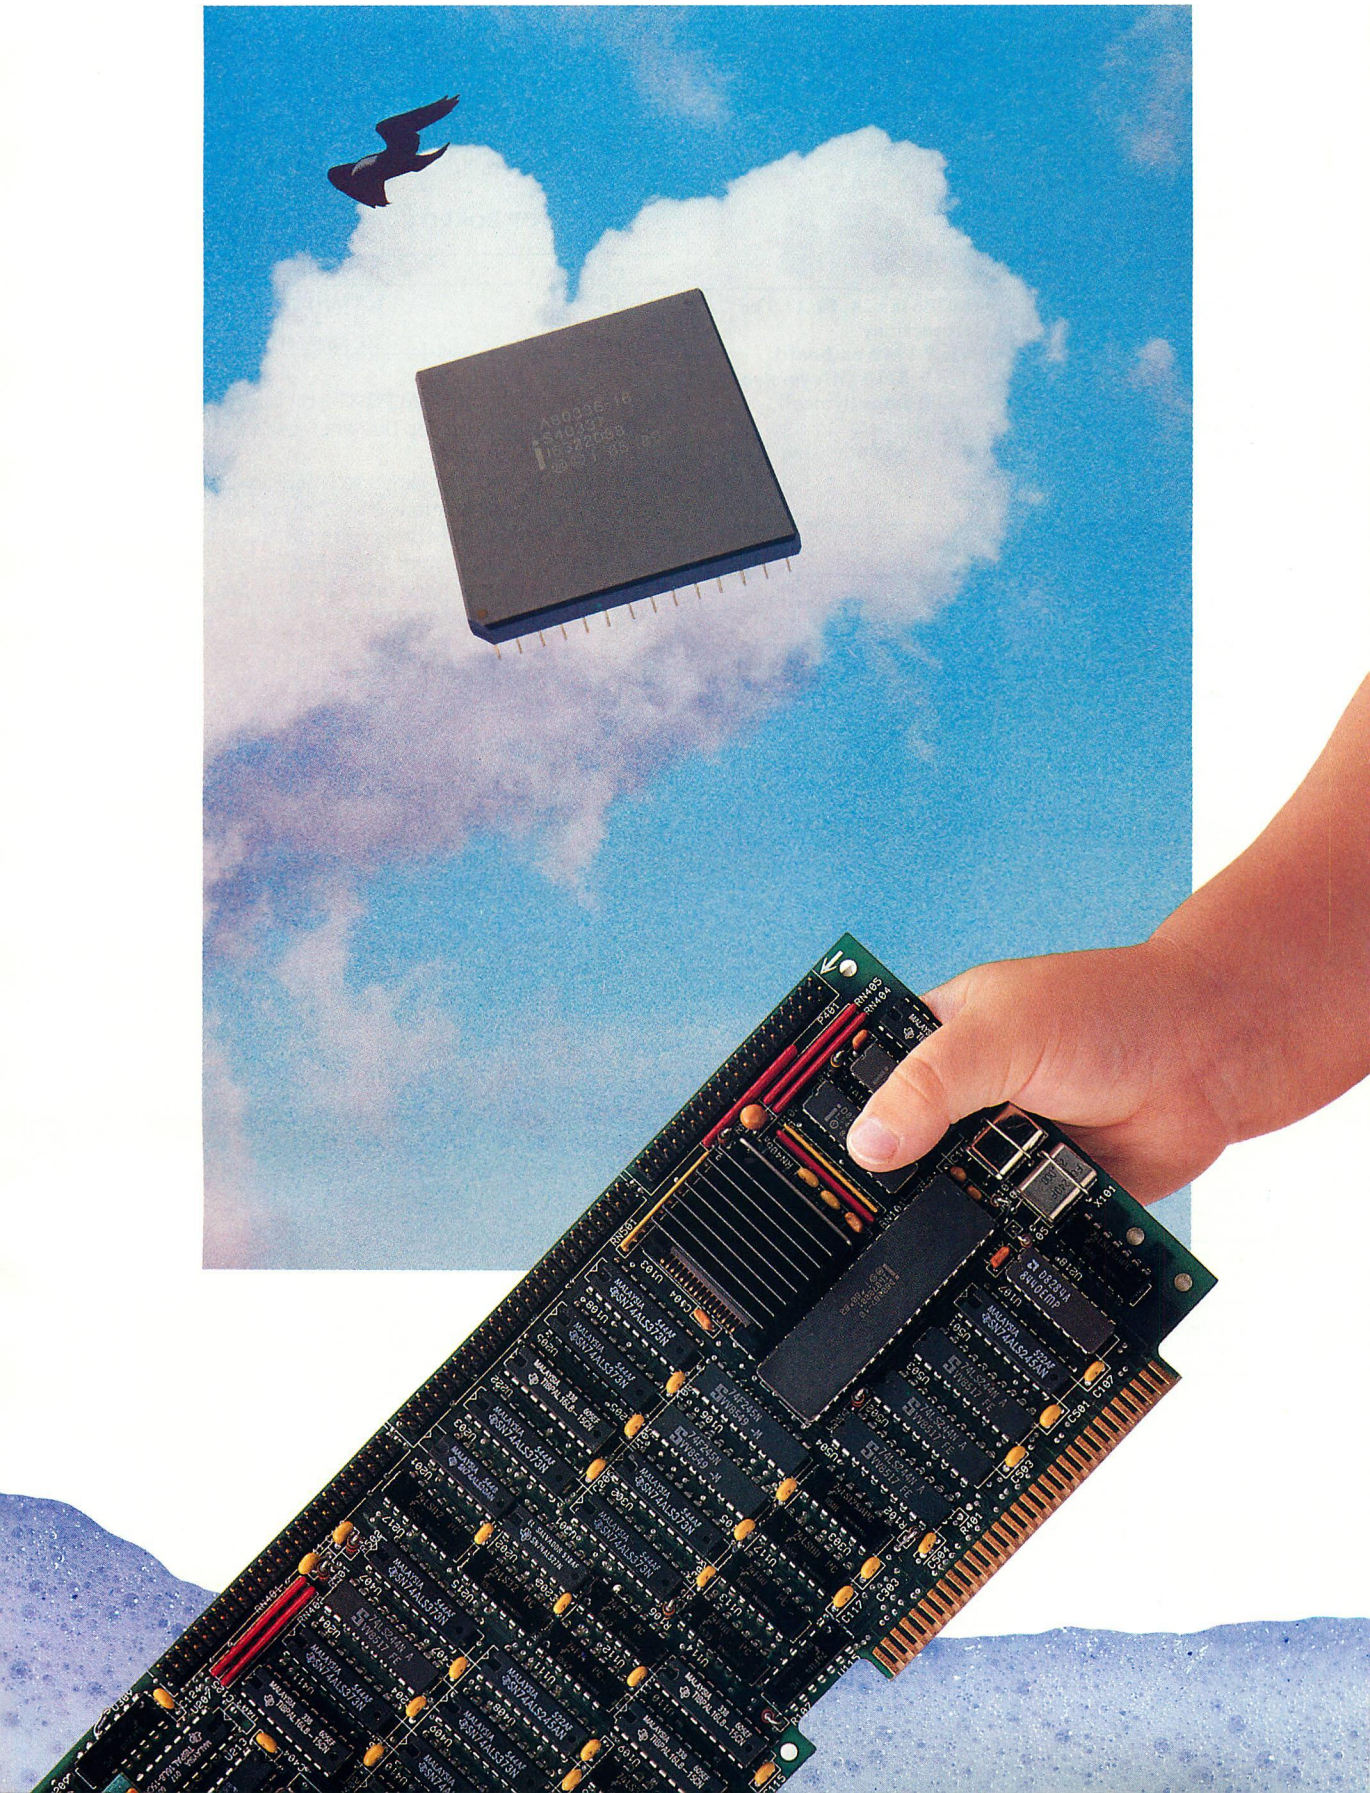
STD'S HARDWARE SOLUTION IS THE BEST BUY.

STD's hardware approach maintains 100% IBM compatibility. This means that when IBM changes PC-DOS, your hardware will remain compatible.

Some other manufacturers use a software approach because it is less expensive. It also means that extensive software is required. When PC-DOS changes, software incompatibilities and the necessity for you to reinstall or "patch" your software will inevitably appear.

When you install a PC-286 or STD-386 accelerator board, you remove the old 8088 or 80286 CPU chip from the IBM motherboard. This is how we maintain IBM hardware compatibility. When you install STD's EMS memory board the TOP BOARD, the unique Top Bus (a 16 bit data path) can be used to further enhance performance.

STD products change none of the important compatibility standards of the IBM design but significantly control the way in which improved performance is achieved. This superior engineering is the value we add to our products. Over the years, our customers recognize this value and appreciate the reliability and compatibility.



WE LISTEN WHEN YOU ASK FOR COMPATIBILITY, RELIABILITY AND SERVICE.

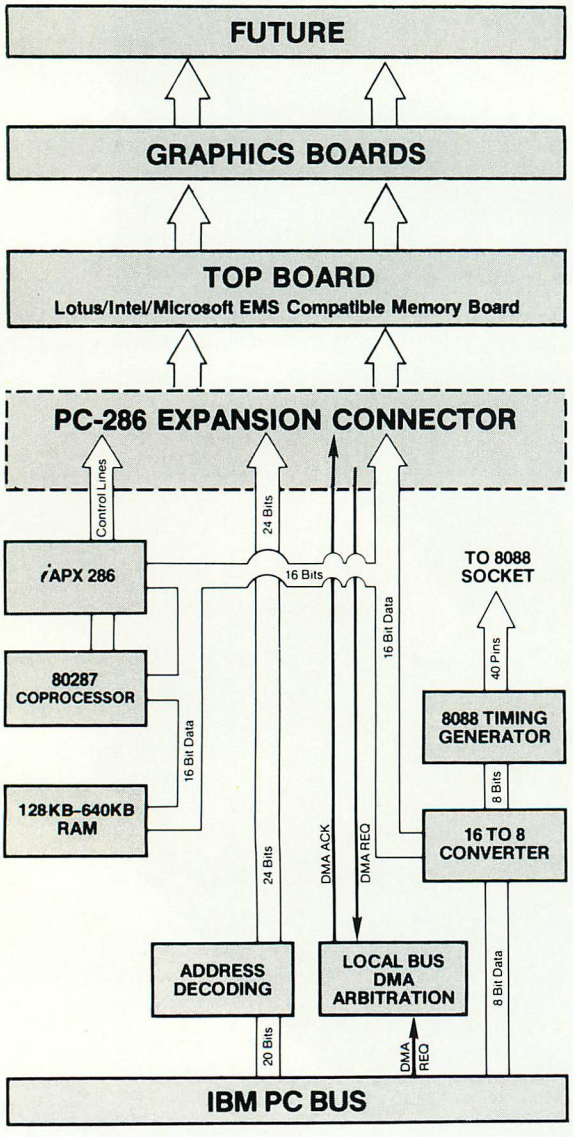
Since 1981, when we developed our first hardware products, our engineering emphasis was accompanied by a strong customer focus. Over the years STD has expanded its customer base of Fortune 1500 corporations because of our strong philosophy of offering the highest value in each product we manufacture. This value is reflected in our three point philosophy; Compatibility, Reliability and Service for all products we build.

This added value is our full solution approach to continued growth of our product line. Our thinking has always been that eventually IBM PC DOS and XENIX operating systems must run on the same underlying hardware. Because of this conviction; starting in early 1984 we planned our products to run in both environments. Clients who have bought STD products can feel secure in the knowledge that their investment in our products won't wash up on the shores of time because of short sightedness or quick fix approaches. Today, as in the past, our products are just as much at home in the XENIX environment as they are in the DOS environment.

The design versatility built into every STD board allows you to run your software either under DOS with EMS compatibility or in the XENIX environment.

YOUR PC HAS A FUTURE.
SEATTLE TELECOM & DATA HAS YOUR ANSWER.

STD HAS YOUR ANSWER



PC-286

The PC-286 is unique. It provides the only 16 bit expansion bus for high performance peripherals such as STD's Top Board that takes advantage of 80286 processing power in the XT.

The Seattle Telecom and Data PC-286 is a plug and play productivity tool. All the necessary firmware is provided on the board so that the PC-286 has the fastest possible processing speed with no user intervention. No special disks are required to move software or BASIC into the fast 16 bit memory. The PC-286's operation is transparent to the user.

SPECIFICATIONS

Central Processing Unit:	**iAPX80286 in 6, 8, 10, 12.5 or 16 MHz versions**
RAM:	**640 K to 2.1 MB on-board**
Math Co-processor:	**80287 in 5, 8, 10 MHz versions**
Power Requirements:	**5 volts, 3.0 amps (typical)**
Temperature:	**0 to 40 degrees C**
Humidity:	**0 to 90% non-condensing**

TOP BOARD
LIM/EMS COMPATIBILITY

Top Board frees your IBM PC XT from the 640K memory limit of DOS. Increase your productivity with up to 8 MB of expandability and full compatibility with the Lotus/Intel/Microsoft (LIM) Expanded Memory Specification (EMS).

Top Board meets or exceeds industry design standards and provides exceptional performance. The 16 bit Top bus and a flexible paging scheme make your EMS-compatible applications and multi-tasking software run faster.

TOP BOARD CONFIGURATIONS

PRODUCT	DESCRIPTION
TB-A	**6,8 MHz 512K or 2 MB**
TB-B	**10, 12.5 MHz 512K or 2 MB**

- Runs on the standard IBM PC/XT 8 bit bus in stand-alone or on the faster 16 bit Top bus when used with STD's PC-286 accelerator board.
- Includes Windows, the expanded memory-compatible operating and applications environment from Microsoft.
- Supports expanded memory software applications such as Lotus 1-2-3, Framework II, and Ready!.
- Memory can be expanded up to 2 MB on one board and to 8 MB for the entire system.

THE STD-386

The STD-386 16 MHz accelerator board is compatible with 6 and 8 MHz IBM PC/ATs. An optional 80387 co-processor can be installed on the board. The STD-386 is compatible with AT clones at speeds up to 16 MHz and will support both DOS and XENIX in the protected and unprotected modes. 8086 and 80286 compatibility have been designed into the STD-386. The upgrading of your AT will be user-transparent and requires no software.

DESCRIPTION

- **80386-16 MHz and optional 80387 co-processor**
- **2 MB to 16 MB memory on-board**
- **Full 32 bit memory bus**
- **Fits in a standard IBM/AT slot**

Listening to Customers is Our Future.

Seattle Telecom & Data, Inc., 12277 - 134th Court N.E., Suite 205, Redmond, WA 98052-2429 (206) 820-1873

IDEASSOCIATES, INC.

☐ All-Board
Functions: Resolution: 640x350; 16 color graphics ☐ 1 serial port(s); 1 parallel port(s) ☐ Controller for Hard disk ☐ Clock/calendar ☐ IBM PC ☐ Introduced: 1986 ☐ Cost: $545

☐ IDEA Minicomm
Functions: Synchronous mainframe link ☐ 3270/BSC, 3780, 3770, SNA terminal/protocol emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, AT, Portable ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1984 ☐ Cost: $295

☐ IDEA Minimax
Functions: 128-384 kbytes RAM memory ☐ Printer spooler/buffer ☐ IBM PC, XT, AT, Portable ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1984 ☐ Cost: $295

☐ IDEAcomm 1200
Functions: 300; 1,200 bps modem ☐ IBM PC, AT, Portable ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $495

☐ IDEAcomm 2400
Functions: 300; 1,200; 2,400 bps modem ☐ IBM PC, AT, Portable ☐ Software supplied (included in price) ☐ Full length ☐ Cost: $795

☐ IDEAcomm 3278
Reviewed Feb 1986 p. 48.
Functions: Synchronous mainframe link ☐ IBM 3278/79 2A, 2B terminal/protocol emulation ☐ IBM PC, XT, AT, Portable ☐ Software supplied (included in price) ☐ Full length ☐ Cost: $995

☐ IDEAcomm 5250/Remote
Functions: IBM 5251-11, 5291, 5292-2 terminal/protocol emulation ☐ IBM PC, XT, AT ☐ Half length ☐ Cost: $795

☐ IDEAcomm 5251
Functions: IBM 5251-11, 5291, 5292-1 terminal/protocol emulation ☐ IBM PC, XT, AT, Portable ☐ Full length ☐ Cost: $895

☐ IDEAdisk Plus
Functions: 64-256 kbytes RAM memory ☐ 1 serial port(s) ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, Portable, AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $1,995

☐ IDEAgraph
Functions: 128-256 kbytes RAM memory ☐ Resolution: 1024x1024; 256 color graphics ☐ IBM PC, XT, AT, Portable ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $995-$1,895

☐ IDEAmax 384
Functions: 64-384 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, AT, Portable ☐ Software supplied (included in price) ☐ Full length ☐ Cost: $275

☐ IDEAmini I/O
Functions: 2 serial port(s); 1 parallel port(s) ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT, Portable, AT ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1984 ☐ Cost: $175

☐ IDEASupermax
Functions: 0-4096 kbytes RAM memory ☐ 2 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $495-$2,595

☐ IDEASupermax/EMS
Functions: 0-4096 kbytes RAM memory ☐ 2 serial port(s); 1 parallel port(s) ☐ IBM PC AT ☐ Full length ☐ Cost: $595-$2,395

IEV CORP.

☐ VIP 1200/VIP 2000

The me always the

–192K. For all its pluses,
networking has a minus.

–66K, –128K, –128K.
A word of warning: Too many
pop-ups can have a negative
effect on your memory.

–320K. Windowing can give you a whole new outlook.
It can also gobble up a whole lot of memory.

Lotus is a registered trademark of Lotus Development Corporation. Microsoft is a registered trademark of Microsoft Corporation. IBM is a registered trademark of International Business Machines Corporation. Sidekick and Turbo Lightning are trademarks of Borland Int., Inc. ProKey is a trademark of RoseSoft, Inc. Memory requirements are manufacturers' minimum system requirements. © 1986 Intel Corporation. Above is a trademark and Intel a registered trademark of Intel Corporation.

mory is first to go.

It can happen just like that.

One minute you've got a walloping 640K, the next minute, you've got zip.

That's because each new application you add devours precious RAM.

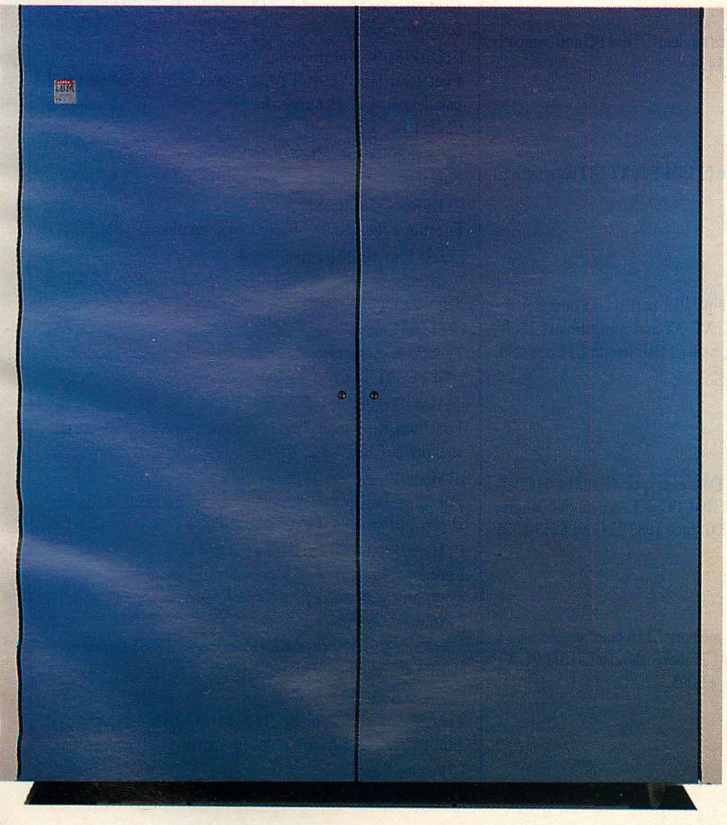
Fortunately, you can avoid playing memory roulette. With an Above™ Board from Intel.

Above Board is more than just another slam bam memory board. It's a long-term memory solution.

It not only takes you up to 640K of conventional memory, it gives you up to 4 megabytes of expanded memory. Based on the EMS standard developed by Lotus,® Microsoft® and the folks paying for this ad.

So now you can take advantage of applications like the ones over there on the left, knowing you've got memory to spare.

Plus (and it's going to be a big plus in the future), Above Board provides extended memory, which will support protected mode DOS. So you won't have to eighty-six your Above Board, no matter what happens in '87. And beyond.



What's more, every board comes with a five-year warranty, toll-free hotline support and a free copy of Microsoft Windows. (–320K. But then, with Above Board, that's no big loss.)

For details, see your favorite computer dealer. Or call us at (800) 538-3373.

And find out why the first thing to go is the last thing to worry about.

intel®

–128K. Everyone will tell you downloading is where it's at. Which is why expanded memory is where you should be.

☐ **Color/Printer Adapter**
Functions: Resolution: 320/640x200; color graphics ☐ 1 parallel port(s) ☐ IBM PC, XT

☐ **Disk I/O Board**
Functions: 1 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Controller for Floppy disk ☐ Clock/calendar ☐ IBM PC, XT ☐ Software supplied

☐ **Disk/640K Multifunction Board**
Functions: 0-640 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ Controller for Floppy disk ☐ Clock/calendar ☐ IBM PC, XT

☐ **Dual Floppy Board**
Functions: Controller for Floppy disk ☐ IBM PC, XT

☐ **Hi-Res Color Board**
Functions: Resolution: 640x200; color graphics ☐ IBM PC, XT

☐ **I/O Plus Multifunction Board**
Functions: 1 serial port(s) ☐ Clock/calendar ☐ IBM PC, XT ☐ Software supplied

☐ **Mono/Color Board**
Functions: Resolution: 640x200; 640x352; color graphics ☐ IBM PC, XT

☐ **Mono/Printer Board**
Functions: Resolution: 720x348 monochrome graphics ☐ 1 parallel port(s) ☐ IBM PC, XT

☐ **Mono/Printer/Serial Board**
Functions: Resolution: 720x348 monochrome graphics ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC, XT

☐ **Mono/Printer/512K Memory Board**
Functions: 512 kbytes RAM memory ☐ Resolution: 720x348 monochrome graphics ☐ 1 parallel port(s) ☐ IBM PC, XT

☐ **Motherboard**
Functions: 256-640 kbytes RAM memory ☐ 8088 Coprocessor ☐ IBM PC, XT

☐ **Network Board**
Functions: 2 serial port(s) ☐ CSMA/CD LAN connection ☐ IBM PC, XT ☐ Software supplied

☐ **Printer Board**
Functions: 1 parallel port(s) ☐ IBM PC, XT

☐ Quad Floppy Board
Functions: Controller for Floppy disk ☐ IBM PC, XT

☐ Serial Board
Functions: 1 serial port(s) ☐ IBM PC, XT

☐ Turbo Motherboard
Functions: 256-640 kbytes RAM memory ☐ 8088 Coprocessor ☐ IBM PC, XT

☐ Turbo-286 Board
Functions: 1024-3072 kbytes RAM memory ☐ 80286 Co-processor ☐ IBM PC ☐ Software supplied

☐ 1.5M Multifunction Board
Functions: 0-1512 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC, AT

☐ 1M Memory Board
Functions: 0-1024 kbytes RAM memory ☐ IBM PC, AT

☐ 1200 Baud Modem Board
Functions: 1,200 bps modem ☐ IBM PC, XT, AT ☐ Software supplied

☐ 2M Multifunction Board
Functions: 0-2048 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC, AT

☐ 256K Multifunction Board
Functions: 64-256 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Clock/calendar ☐ IBM PC, XT ☐ Software supplied

☐ 3M Multifunction Board
Functions: 0-3072 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC, AT

☐ 384K Multifunction Board
Functions: 64-384 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ IBM PC, XT ☐ Software supplied

☐ 512K Memory Board
Functions: 512 kbytes RAM memory ☐ IBM PC, XT

☐ 512K Multifunction Board
Functions: 64-512 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Clock/calendar ☐ IBM PC, XT ☐ Software supplied

☐ 576K Memory Board
Functions: 576 kbytes RAM memory ☐ IBM PC, XT

LASERMASTER, LTD.

☐ Model 286/M
Functions: 512 kbytes RAM memory ☐ Resolution: 1280x1024 monochrome graphics ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 140 since 1986 ☐ Cost: $3,295

☐ XT/P
Functions: 1500 kbytes RAM memory ☐ Resolution: 300x300 monochrome graphics ☐ Controller for Printer ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 500 since 1985 ☐ Cost: $1,395

LAWSON LABS, INC.

☐ Model 134
Functions: A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $475

☐ Model 140
Functions: A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1984 ☐ Cost: $265

LEADING EDGE HARDWARE PRODUCTS, INC.

☐ L Series 1200B
Functions: 300; 1,200 bps modem ☐ IBM PC and compatibles ☐ Half length

☐ L Series 2400
Functions: 2,400 bps modem ☐ IBM PC, XT, AT ☐ Half length ☐ Cost: $289

LEGACY TECHNOLOGIES, LTD.

☐ CPS
Functions: 1 parallel port(s) ☐ Controller for Printer ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC jr ☐ Software supplied (included in price) ☐ Introduced: 1984 ☐ Cost: $99

☐ Fixed Disk Controller
Functions: Controller for Hard disk ☐ IBM PC jr ☐ Software supplied (included in price) ☐ Introduced: 1984 ☐ Cost: $595

☐ Floppy Disk Controller
Functions: Controller for Floppy disk ☐ IBM PC jr ☐ Software supplied (included in price) ☐ Introduced: 1984 ☐ Cost: $99

L/F TECHNOLOGIES, INC.

☐ Kaleido Card
Functions: Resolution: 640x400; 16 color graphics ☐ IBM PC, AT, XT ☐ Software supplied ☐ Full length ☐ Units sold: 300 since 1985 ☐ Cost: $545

LINEAR SYSTEMS, LTD.

☐ Data Cage
Functions: Data encryption; File security ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Half length ☐ Units sold: 20 since 1985 ☐ Cost: $400

☐ LSBX Mother
Functions: iSBX ☐ IBM PC, XT, AT ☐ Full length ☐ Units sold: 75 since 1984 ☐ Cost: $255

LOGICOM TECHNOLOGY, INC.

☐ WFC-5150
Functions: Controller for Floppy disk; Hard disk; Mag tape ☐ IBM PC ☐ Software supplied ☐ Full length ☐ Introduced: 1983 ☐ Cost: $200

M. A. SYSTEMS, INC.

☐ AT Optimizer
Functions: 128-5120 kbytes RAM memory ☐ 2 serial port(s); 1 parallel port(s) ☐ Printer spooler/buffer ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 200 since 1985 ☐ Cost: $2,495

☐ Genie Multifunction
Functions: 384 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ Controller for Printer ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 12,000 since 1983 ☐ Cost: $289

☐ Mono Magic Card
Functions: Resolution: 720x348 monochrome graphics ☐ 1 parallel port(s) ☐ 64K Printer spooler/buffer ☐ IBM PC ☐ Full length ☐ Units sold: 10,000 since 1983 ☐ Cost: $389

☐ PC Peacock
Functions: Resolution: 640/320x200; 16 color graphics ☐ serial port(s) ☐ IBM PC, XT, AT ☐ Full length ☐ Units sold: 10,000 since 1984 ☐ Cost: $249

☐ Performer-286
Functions: 512-640 kbytes RAM memory ☐ IBM PC, XT ☐ Full length ☐ Units sold: 125 since 1985 ☐ Cost: $1,149

☐ Pro Kit
Functions: 512 kbytes RAM memory ☐ 1 parallel port(s) ☐ IBM PC jr ☐ Full length ☐ Units sold: 1,000 since 1985 ☐ Cost: $350

MACRO SYSTEK, INC.

☐ CL-4
Functions: 640 kbytes RAM memory ☐ 4 serial port(s) ☐ MACRONET LAN connection ☐ Controller for Printer; Floppy disk ☐ Printer spooler/buffer ☐ IBM PC ☐ Software supplied (included in price) ☐ Units sold: 180 since 1985 ☐ Cost: $1,995

MACROTECH INTERNATIONAL CORP.

☐ MSR
Functions: 256-3072 kbytes RAM memory ☐ IBM PC AT ☐ Units sold: 1,000 since 1984 ☐ Cost: $695-$2,095

MAGNUM COMPUTER, INC.
ComX Division

☐ EconoRAM
Functions: 384 kbytes RAM memory ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC, XT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Cost: $99

☐ EconoRAM Plus
Functions: 384 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Cost: $199

MATROX ELECTRONIC SYSTEMS, LTD.

☐ COM-1
Functions: 4 serial port(s); 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC ☐ Cost: $2,195

☐ CP-2000
Functions: 512 kbytes RAM memory ☐ 8 serial port(s) ☐ Ethernet LAN connection ☐ IBM PC ☐ Cost: $2,495

☐ FP-2000
Functions: 512 kbytes RAM memory ☐ 4 serial port(s) ☐ Controller for Floppy disk; Hard disk; Mag tape ☐ IBM PC ☐ Introduced: 1985 ☐ Cost: $2,495

☐ PG-1280
Functions: Resolution: 1280x1024; 256 color graphics ☐ IBM PC XT, AT ☐ Software supplied ☐ Full length ☐ Cost: $4,995

☐ PG-640
Functions: Resolution: 640x480; 256 color graphics ☐ IBM PC, XT, AT ☐ Software supplied ☐ Full length ☐ Cost: $2,495

MAXTRON

☐ AT-01
Functions: 640-1024 kbytes RAM memory ☐ Clock/calendar; 80286 motherboard ☐ IBM PC AT, XT ☐ Full length ☐ Cost: $619

☐ AT-05
Functions: Controller for Floppy disk ☐ IBM PC AT ☐ Half length ☐ Cost: $95

☐ AT-06
Functions: 1 serial port(s); 1 parallel port(s) ☐ IBM PC AT ☐ Half length ☐ Cost: $68

☐ AT-10
Functions: 640-2048 kbytes RAM memory ☐ 2 serial port(s); 1 parallel port(s) ☐ IBM PC AT ☐ Full length ☐ Cost: $233

☐ HD-05
Functions: Controller for Hard disk ☐ IBM PC ☐ Full length ☐ Cost: $99

☐ XT-07
Functions: monochrome graphics ☐ IBM PC XT ☐ Cost: $55

☐ XT-08
Functions: Resolution: 640/320x200; 4 color graphics ☐ IBM PC XT ☐ Full length ☐ Cost: $59

☐ XT-09
Functions: Resolution: 720x384 monochrome graphics ☐ 1 parallel port(s) ☐ IBM PC ☐ Full length ☐ Cost: $75

☐ XT-11
Functions: Controller for Floppy disk ☐ IBM PC XT ☐ Half length ☐ Cost: $36

Advanced Communication Link™ Lets Your PC Use All The Brains It's Got

New "smart" 8-channel serial card unloads your IBM PC — or compatible — to give you more computing performance.

Using its own on-board CPU and an array of supporting components, the new ACL card relieves PCs of communication chores with mainframes, printers, modems, plotters, and remote terminals. The PC is thus free to do the "thinking" you demand of it.

In addition, the ACL Card expands your capabilities, too, with:

- Full modem "handshake" control on all 8 channels
- Flexible address decoding
- Programmable interrupts
- Expandable memory via software
- Supplied device driver
- Ability to download custom programs
- Optional data security module

All this takes up only *one* I/O space on your PC — and costs about the same as a "dumb" serial card.

Call for free literature that explains what your PC has been too busy to tell you.

Functions: Novell; Etherlink; Omninet; PCnet; proNET; LAN/PC; ARC LAN connection; Data encryption; Synchronous mainframe link ☐ 3270 SNA/SDLC terminal/protocol emulation ☐ Printer spooler/buffer ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1985 ☐ Cost: $2,595-$4,595

☐ **Pathway Design Encryption**
Functions: Data encryption ☐ IBM PC, XT, AT and compatibles ☐ Introduced: 1985

☐ **pcPATH 5250**
Functions: Data encryption; Synchronous mainframe link ☐ 3270 SNA, BSC; 3770 SNA; 2780/3780 BSC; 5250 terminal/protocol emulation ☐ IBM PC, XT, AT and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Units sold: 20,000 *since 1984* ☐ Cost: $890

nine track tape users
Micro to Mainframe Connection

The Model TC-50 ½-inch tape subsystem provides a standard medium for transmission of mainframe data base information to PC users, while maintaining mainframe isolation and data integrity. Use ODI subsystems to import data to data base programs like dBase III.

The TC-50 subsystem also provides fast back-up capability as well as a device driver and interface software for popular compilers.

The TC-50 subsystem includes tape drive controller, cables and documentation. All ODI products carry a 30 day unconditional money-back guarantee, and are warranted for one year, parts and labor.

Put Overland Data's experienced, professional staff to work on your company's data availability problems. Call today!

Overland Data has manufactured high-capacity storage and data interchange products since 1980. All ODI equipment is designed and engineered for long-term reliability. Satisfied customers include Fortune 500 companies, major hospitals and universities, laboratories and research organizations.

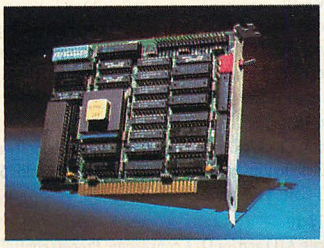
Enhanced!

- Operator selectable 80286/8088 processor modes
- Keyboard selectable cache memory
- Extended cable for Compaq® users
- EEMS and EMS compatible



No Risk Evaluation — CALL NOW!

The industry's toughest critics confirm what over 20,000 users already know.

Over 20,000 PC users have increased their productivity with PC Technologies' 286 Express accelerator card. They are getting up to 600% more processing power from their PC/XT or compatible. Read the critics. Then call PCT to set up a **risk-free evaluation** or for the dealer nearest you.

"Thanks to brilliant design (and, particularly, good use of cache memory) the 286 Express Card delivers at least threefold speed increases."
Jim Seymour, *PC Magazine*

"Probably the most useful speed-up-board we've seen to date.
Garry Ray, *PC Week*

286 EXPRESS™
MERIT AWARD WINNER
Fortune Magazine's
AFIPS 1986 Hardware
Product of the Year Awards

"Easy to install and invisible to users, the 286 Express Card is an excellent value . . . I found nothing to criticize."
Dr. Michael Ecker, *Government Computer News*

"The IBM PC with the 286 Express Card consistently outperforms a comparably equipped IBM PC/AT. The speed increases over the basic IBM PC were dramatic . . ."
Jerry Schneider, *Capital PC Monitor*

Call today to accelerate your PC with the card everyone's talking about — 286 Express — the acceleration standard. Outside Michigan, call toll-free **1-800-821-3086.** In Michigan, **313-996-9690.**

Functions: 256 kbytes RAM memory ☐ 2 serial port(s) ☐ disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 5,000 since 1983 ☐ Cost: $429 (64 KB)

☐ PDI508
Functions: ARCnet LAN connection ☐ 2K Printer spooler/buffer ☐ IBM PC, XT, AT and compatibles ☐ Software supplied ☐ 3/4 length ☐ Units sold: 12,000 since 1985 ☐ Cost: $649

☐ PDI508/F1
Functions: ARCnet LAN connection ☐ Printer spooler/buffer ☐ IBM PC, XT, AT and compatibles ☐ 3/4 length ☐ Introduced: 1986 ☐ Cost: $895

☐ PDI508/F2
Functions: ARCnet LAN connection ☐ Printer spooler/buffer ☐ IBM PC, XT, AT and compatibles ☐ 3/4 length ☐ Introduced: 1986 ☐ Cost: $995

☐ PDI508EGA
Functions: color graphics ☐ ARCnet LAN connection ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1986

☐ PDI508M
Functions: 512 kbytes RAM memory ☐ ARCnet LAN connection ☐ IBM PC, XT, AT and compatibles ☐ Software supplied ☐ Full length ☐ Units sold: 2,000 since 1985 ☐ Cost: $995

☐ PDI508M/F1
Functions: 128-512 kbytes RAM memory ☐ ARCnet LAN connection ☐ Printer spooler/buffer ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1986 ☐ Cost: $1,395

☐ PDI508M/F2
Functions: 128-512 kbytes RAM memory ☐ ARCnet LAN connection ☐ Printer spooler/buffer ☐ IBM PC, XT, AT and compatibles ☐ Full length ☐ Introduced: 1986 ☐ Cost: $1,495

☐ PDI512
Functions: 128-512 kbytes RAM memory ☐ IBM PC, XT and compatibles ☐ Software supplied ☐ Full length ☐ Units sold: 1,000 since 1984 ☐ Cost: $325 (128 KB)

☐ PDS512
Functions: 512 kbytes RAM memory ☐ IBM PC, XT, AT and compatibles ☐ Half length ☐ Units sold: 1,000 since 1985 ☐ Cost: $325

QDP COMPUTER SYSTEMS, INC.

☐ VIVA Gold Card
Functions: Resolution: 1024x1024; 16 color graphics ☐ IBM PC XT, AT and compatibles ☐ Full length ☐ Cost: $2,295

☐ VIVA Silver Card
Functions: Resolution: 640x400; 16 color graphics ☐ IBM PC XT, AT and compatibles ☐ Full length ☐ Cost: $1,295

QIC RESEARCH, INC.

☐ QIC-03
Functions: 1 serial port(s) ☐ 300, 1,200 bps modem ☐ terminal/protocol emulation ☐ Voice I/O or synthesis ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 5,000 since 1984 ☐ Cost: $199

☐ QIC-05
Functions: 0-384 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 5,000 since 1984 ☐ Cost: $139

☐ QIC-06
Functions: Resolution: 640/320x200; 16 color graphics ☐ 1 parallel port(s) ☐ IBM PC ☐ Software supplied (included in price) ☐ Units sold: 5,000 since 1984

QUA TECH, INC.

☐ ADM12-10
Functions: A/D and/or D/A conversion; Process control ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 400 since 1984 ☐ Cost: $395

☐ ADM12-11
Functions: A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 100 since 1985 ☐ Cost: $495

☐ ADM8-10
Functions: A/D and/or D/A conversion; Process control ☐ Prototype board ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 500 since 1984 ☐ Cost: $295

☐ CTM-10
Functions: Clock/calendar ☐ IBM PC, AT, XT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 50 since 1985 ☐ Cost: $195-$250

☐ DM12-10
Functions: A/D and/or D/A conversion; Process control ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 150 since 1984 ☐ Cost: $250

☐ DM8-10
Functions: A/D and/or D/A conversion; Process control ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 100 since 1984 ☐ Cost: $250

☐ DS-101; DS-102
Functions: 2 serial port(s) ☐ IBM PC, XT, AT ☐ Half length ☐ Units sold: 50 since 1986 ☐ Cost: $295

☐ DS-201
Functions: 2 serial port(s) ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Half length ☐ Units sold: 350 since 1985 ☐ Cost: $345

☐ DSDP-401
Functions: 2 serial port(s); 2 parallel port(s); Process control ☐ Clock/calendar ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 100 since 1984 ☐ Cost: $245

☐ MXI-241
Functions: IEEE-488; Process control ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 150 since 1984 ☐ Cost: $495

☐ PMD-10
Functions: Prototype board ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 300 since 1984 ☐ Cost: $30

☐ PXB-721
Functions: 1 parallel port(s); Process control ☐ IBM PC, AT ☐ Software supplied ☐ Full length ☐ Units sold: 700 since 1984 ☐ Cost: $195

☐ SIM2-10
Functions: A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $1,295

☐ SIM3-10
Functions: A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $1,895

☐ SIM4-10
Functions: A/D and/or D/A conversion ☐ IBM PC, XT, AT ☐ Full length ☐ Introduced: 1986 ☐ Cost: $2,495

☐ WSB-10
Functions: Waveform synthesizer ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 300 since 1984 ☐ Cost: $795

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ Clock/Calendar
Functions: Clock/calendar ☐ IBM PC, XT and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1982 ☐ Cost: $110

☐ Dual/Single Port Adaptor
Functions: 2 serial port(s) ☐ IBM PC ☐ Introduced: 1981 ☐ Cost: $110-$145

☐ Expanded Quadboard
Functions: 0-384 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC, XT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Cost: $595 (384 KB)

☐ Gold Quadboard
Functions: 0-640 kbytes RAM memory ☐ Resolution: 320x200; 16 color graphics ☐ 1 serial port(s); 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC, XT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $595-$795

☐ IPIC
Functions: 1 parallel port(s) ☐ Controller for Printer ☐ IBM PC, XT and compatibles ☐ Half length ☐ Introduced: 1982 ☐ Cost: $85

☐ Liberty
Functions: 0-2048 kbytes RAM memory ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC, XT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $395-$1,295

☐ Palette Master
Functions: 64 kbytes RAM memory ☐ Resolution: 640/320x200; 256 color graphics ☐ IBM PC and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $895

☐ Quad 512+
Functions: 64-512 kbytes RAM memory ☐ 1 serial port(s) ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $295-$595

☐ Quadboard II
Reviewed Jan 1984 p. 66.
Functions: 0-256 kbytes RAM memory ☐ 2 serial port(s) ☐ disk emulation ☐ Printer spooler/buffer; Clock/calendar ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $595

☐ Quadcolor
Functions: 32-96 kbytes RAM memory ☐ Resolution: 640/320x200; 16 or 136 color graphics ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $275-$569

☐ QuadEGA+
Functions: Resolution: 720x348; 640x350; 320x200; 16 color graphics ☐ includes Microsoft Windows ☐ IBM PC

☐ QuadEMS+
Functions: 256-2048 kbytes RAM memory ☐ IBM PC XT and compatibles ☐ Introduced: 1986 ☐ Cost: $495

☐ QuadEMS+ I/O
Functions: 256-2048 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC XT and compatibles ☐ Cost: $545

☐ Quadgraph
Functions: Resolution: 720x348 monochrome graphics ☐ 1 parallel port(s) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $395

☐ Quadlink
Functions: 64 kbytes RAM memory ☐ Resolution: 280x192; 16 color graphics ☐ 300 bps modem ☐ Apple II, II+ terminal/protocol emulation ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $495-$510

☐ QuadMeg-AT
Functions: 128-2048 kbytes RAM memory ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC AT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $445-$2,875

☐ Quadmodem II
Functions: 110; 300; 1,200; 2,400 bps modem ☐ IBM PC ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1985 ☐ Cost: $495-$795

☐ Quadnet VI, IX
Functions: LAN connection ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $995-$2,295

☐ QuadPort-AT
Functions: 4 serial port(s); 1 parallel port(s) ☐ IBM PC, AT ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1985 ☐ Cost: $195

☐ Quadport-XT
Functions: 1 serial port(s); 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC XT ☐ Half length ☐ Introduced: 1986 ☐ Cost: $235

☐ Quadsprint
Functions: 8086, 8088 Coprocessor ☐ IBM PC, XT, Portable and compatibles ☐ Full length ☐ Introduced: 1985 ☐ Cost: $645

☐ Quadvue
Functions: monochrome graphics ☐ 2 serial port(s); 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC, XT ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1983 ☐ Cost: $345

☐ Quad3278
Functions: IBM 3278 terminal/protocol emulation ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $1,195

☐ RS-232C Card
Functions: 1-2 serial port(s) ☐ IBM PC, XT and compatibles ☐ Half length ☐ Introduced: 1982 ☐ Cost: $110

☐ Silver Quadboard
Functions: 0-640 kbytes RAM memory ☐ 2 serial port(s); 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC, XT and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $355-$695

☐ SuperSprint
Functions: 8086 Coprocessor ☐ IBM PC, XT ☐ Introduced: 1986 ☐ Cost: $695

☐ 192 KB RAM Expansion Board
Functions: 192 kbytes RAM memory ☐ IBM PC, XT ☐ Introduced: 1981 ☐ Cost: $275-$425

QUAM CORP.

☐ Qc 1001
Functions: 384 kbytes RAM memory ☐ IBM PC ☐ Full length ☐ Cost: $185

☐ Qc 1009
Functions: 1 serial port(s) ☐ Controller for Floppy disk; Hard disk ☐ IBM PC ☐ Full length ☐ Cost: $239

☐ Qc 1014
Functions: 64-384 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ 300-1200 bps modem ☐ Clock/calendar ☐ IBM PC, XT ☐ Full length ☐ Units sold: 100 since 1984 ☐ Cost: $544

☐ Qc 1016
Functions: 1 serial port(s) ☐ Controller for Floppy disk ☐ 8088 Coprocessor ☐ IBM PC, XT ☐ Software supplied ☐ Full length ☐ Units sold: 1,000 since 1984 ☐ Cost: $396

☐ Qc 1017
Functions: 128-256 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC, XT ☐ Full length ☐ Units sold: 1,000 since 1984 ☐ Cost: $542

☐ Qc 1018
Functions: LAN connection ☐ IBM PC, XT, AT ☐ Half length ☐ Introduced: 1985 ☐ Cost: $449-$499

☐ Qc 1029
Functions: 256-512 kbytes RAM memory ☐ Resolution: 720x348 monochrome graphics ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC, XT ☐ Full length ☐ Units sold: 100 since 1985 ☐ Cost: $549

☐ Qc 1031
Functions: 1024 kbytes RAM memory ☐ Resolution: 640x350; 16 color graphics ☐ 1 serial port(s); 1 parallel port(s) ☐ IBM PC AT ☐ Full length ☐ Cost: $895

☐ Qc 1032
Functions: Clock/calendar; 6 MHz 80286 Coprocessor ☐ IBM PC AT ☐ Full length ☐ Cost: $995-$1,095

☐ Qc 1034
Functions: 512-2560 kbytes RAM memory ☐ IBM PC AT ☐ Full length ☐ Cost: $350-$680

☐ Qc 1035

Functions: Prototype board ☐ IBM PC, XT, AT ☐ Half length ☐ Units sold: 1,500 since 1983 ☐ Cost: $99

RED RIVER TECHNOLOGY, INC.
☐ ATLas
Functions: 512-1536 kbytes RAM memory ☐ 1 serial port(s); 1 parallel port(s) ☐ StarLAN LAN connection ☐ 80286 AT upgrade board ☐ IBM PC, XT, AT ☐ Introduced: 1985 ☐ Cost: $1,295

TIRED OF WAITING FOR YOUR PC?

WITH **X3** YOUR PC MAY HAVE TO WAIT FOR YOU!

THE SLOTLESS ACCELERATOR
FOR PC, PC/XT, AND COMPATIBLES

WITHOUT USING AN EXPANSION SLOT X3 GIVES:

$449 PRICE INCLUDES 128 KB OF RAM. ADDITIONAL RAM IS AVAILABLE IN 256 KB BANKS

PC/AT PROCESSING POWER
X3 HAS UP TO 8 TIMES THE POWER OF A PC, WITH **DUAL PROCESSORS** THAT OUTRUN 80286 MACHINES.

TWICE THE RAM
X3 ALLOWS USE OF UP TO 1.28 MB OF RAM.

HIGH PERFORMANCE I/O
CONTINUE PROCESSING WHILE PRINTING AND ACCESSING DISKS. THIS GIVES FROM 10 TO 150 TIMES IMPROVEMENT IN I/O RESPONSIVENESS.

100% COMPATIBILITY
X3 PROTECTS YOUR SOFTWARE INVESTMENT. IT IS TOTALLY COMPATIBLE EVEN WITH COPY PROTECTED SOFTWARE.

1 YEAR WARRANTY
100% USA SUPPORT
X3 IS MANUFACTURED AND SUPPORTED FROM OUR FACILITIES IN COLORADO.

SIMPLICITY!
JUST PLUG X3 IN AND TURN IT ON. DOCUMENTATION IS CLEAR TO THE NOVICE AND COMPLETE FOR THE TECHNICAL EXPERT. X3 PLUGS DIRECTLY INTO THE 8087 SOCKET. THE 8087 PLUGS INTO A SOCKET ON THE X3.

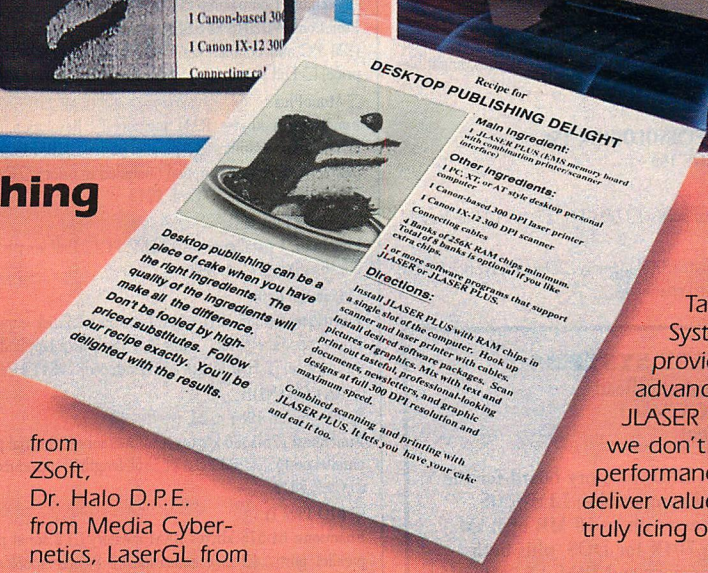
JLASER PLUS



COMBINES SCANNING AND PRINTING IN A SINGLE BOARD!

It makes desktop publishing a piece of cake!

Tall Tree Systems introduces another breakthrough in desktop publishing with JLASER PLUS. We've combined a 2 MB EMS memory board and an interface to both a Canon®-based laser printer and scanner. JLASER PLUS increases the performance of both devices and gives you a low-cost solution to the limitations you've been experiencing with them.

Furthermore, the same memory that is made available to your printer and scanner is also available for all your other conventional applications. You get system memory, expanded LIM memory, extended memory in an AT-type machine, RAM Disk and print spooler — all in a single slot!

Supporting JLASER PLUS is a host of software packages, such as PC Paintbrush + from ZSoft, Dr. Halo D.P.E. from Media Cybernetics, LaserGL from Software Express, Ventura Publisher from Xerox, Page Builder from White Sciences, Le Print from Le Baugh Software, Fancy Font and Fancy Word from SoftCraft, Inc., and many more to be announced.

It takes a technological innovator like Tall Tree Systems to provide a major advancement like JLASER PLUS. And we don't stop at performance. We also deliver value, which is truly icing on the cake.

JRAM-AT3 - 2MB memory board for the IBM AT and compatibles. LIM EMS memory accesses up to 16 MB of RAM. Gives up to 704K for DOS, plus both expanded memory and IBM AT "extended memory". Accepts I/O modules and/or the JLASER interface module for Canon-based laser printers. Downward compatibility with other JRAM memory boards. Runs 20% faster than other EMS boards.

☐ MRB-2000
Functions: 512-2048 kbytes RAM memory ☐ IBM PC AT ☐ Full length

☐ OCTACOM
Functions: 4-8 serial port(s) ☐ Controller for Printer; Terminal ☐ IBM PC, XT, AT and compatibles ☐ Software supplied ☐ Full length ☐ Introduced: 1984 ☐ Cost: $420-$520

☐ OC4400
Functions: 4 serial port(s) ☐ IBM PC, XT, AT and compatibles ☐ Full length

☐ OC8000
Functions: 8 serial port(s) ☐ IBM PC, XT, AT and compatibles

STB SYSTEMS, INC.

☐ Big Byte
Functions: 64-384 kbytes RAM memory ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1981 ☐ Cost: $249

☐ Chauffeur
Reviewed Jan 1986 p. 70.
Functions: 32 kbytes RAM memory ☐ Resolution: 640x352; 640/320x200 monochrome graphics ☐ 1 parallel port(s) ☐ IBM PC and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $395

☐ Chauffeur HT
Functions: Resolution: 720x348; 1024x348; 16 color graphics ☐ 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC, XT, AT ☐ Half length ☐ Cost: $349

☐ Color XVI
Functions: 32 kbytes RAM memory ☐ Resolution: 640/320x200; 16 color graphics ☐ 1 parallel port(s) ☐ IBM PC and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $275

☐ EGAplus
Functions: Resolution: 320/640x350; 16 color graphics ☐ 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC, XT, AT and compatibles ☐ Introduced: 1985

☐ Grande Byte
Functions: 128-2560 kbytes RAM memory ☐ IBM PC AT ☐ Full length ☐ Introduced: 1984 ☐ Cost: $395

☐ Graphix Plus II
Functions: 32 kbytes RAM memory ☐ Resolution: 320/640x200/352; 16 color graphics ☐ 1 parallel port(s) ☐ Clock/calendar ☐ IBM PC ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $395

☐ Memory Companion/PC
Functions: 64-2048 kbytes RAM memory ☐ disk emulation ☐ IBM PC and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1985 ☐ Cost: $349-$395

☐ MonoPlus
Functions: 4 kbytes RAM memory ☐ Resolution: 640x352 monochrome graphics ☐ 1 parallel port(s) ☐ IBM PC and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Introduced: 1984 ☐ Cost: $249

☐ Printer Plus II
Functions: 1 parallel port(s) ☐ IBM PC ☐ Half length ☐ Introduced: 1982 ☐ Cost: $95

☐ Quarter Byte
Functions: 64-256 kbytes RAM memory ☐ disk emulation ☐ Printer spooler/buffer ☐ IBM PC ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1984 ☐ Cost: $179

☐ RIO GRANDE
Reviewed Jun 1985 p. 23.

Functions: AppleTalk LAN connection ☐ IBM PC and compatibles ☐ Introduced: 1985 ☐ Cost: $495

TALL TREE SYSTEMS.
A Technological Innovator.
Always a Step Ahead!

For true industry leadership, look no further than Tall Tree Systems.

We have a history of being first.

We were the first to introduce bankswitching. The first with two megabyte memory boards. The first with I/O modularity in a single slot. The first with 8 MHz speed capabilities. The only maker of single command EMS boards. The first with a laser printer solution — JLASER — that allows you to do full-page graphics and multiple type fonts on any Canon® or Ricoh® laser engine.

Now, we're first again with memory expansion for the IBM®RT.

Innovation is our tradition.

Our trademark is superior technology at the lowest possible price.

VEGA Deluxe supports current standards - MGA, CGA, HGC and EGA PLUS offers 752 x 410 and 640 x 480 resolutions with a NEC MultiSync or compatible monitor. Includes high resolution drivers for Microsoft Windows, and AutoSelect which automatically selects the right mode for emulation so you don't have change once your program is running.

VECTRIX CORP.

☐ Pepe
Functions: 512-1512 kbytes RAM memory ☐ Resolution: 1024x1024; 16; 256; 4096 color graphics ☐ IBM PC XT, AT and compatibles ☐ Software supplied ☐ Full length ☐ Units sold: 400 since 1985 ☐ Cost: $2,495-$4,495

☐ VX/PC Board Set
Reviewed Jul 1985 p. 56.
Functions: 384 kbytes RAM memory ☐ Resolution: 672x480; 512 color graphics ☐ Controller for Printer ☐ IBM PC, XT, AT ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 200 since 1984 ☐ Cost: $2,495-$2,995

VEN-TEL, INC.

☐ Half Card 24
Reviewed Sep 1985 p. 60.
Functions: 300-2,400 bps modem ☐ IBM PC, XT, AT, 3270, Portable and compatibles ☐ Software supplied (included in price) ☐ Half length ☐ Introduced: 1983 ☐ Cost: $695

☐ PC Modem 1200
Functions: 300; 1,200 bps modem ☐ IBM PC, XT, AT, 3270 and compatibles ☐ Software supplied (included in price) ☐ Full length ☐ Units sold: 10,000 since 1983 ☐ Cost: $499

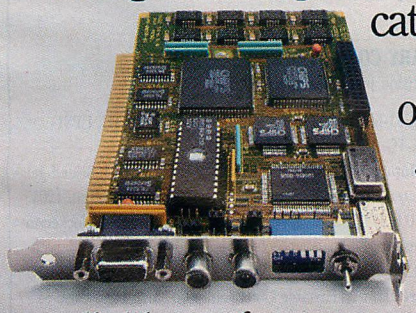
Functions: 1 serial port(s) ☐ 300; 1,200 bps modem ☐ IBM PC, AT and compatibles ☐ Full length ☐ Introduced: 1983 ☐ Cost: $550



You can eat 37% more carrots.
Or you can get our new
VEGA Deluxe™ EGA card.

Despite its improvements over CGA, today's garden-variety Enhanced Graphics Adapter can still be a strain on the eyeballs.

May we introduce you to a sight for sore eyes: the new VEGA Deluxe EGA card. A short-card video adapter that goes beyond standard EGA to bring you as much as 37% higher screen resolution. That's 640 x 480. *And* 752 x 410.

Which in turn means sharper lines. More brilliant colors. And less strain on your eyes. (Of course, you can't see more than your monitor will display. So for more than 640 x 350, the VEGA Deluxe requires a Multisync® or equivalent.)

Not only that, the board's performance won't decrease one iota. And you can change the height and width parameters and put in new code for your applications in just a couple of hours.

The VEGA Deluxe is even 100% compatible with every other video mode: EGA, CGA, Hercules and MDA. (We guarantee it, or your money back.) It even *automatically selects* which mode is right for your software's needs.

How can we offer so much for only $599? A unique, CMOS EGA Integrator™ Chip, for one thing. Highly reliable surface-mount technology. And 28% fewer chips on the board.

Want to find out more? Just call 1-800-238-0101 for the name of the Video-7 dealer nearest you. (In California, call 1-800-962-5700.) And get ready for a real eye-opening experience.

Video-7 Inc., 550 Sycamore Drive, Milpitas, CA 95035.

video7®

High resolution modes require TTL color monitors capable of 25 KHZ and 29.4 KHZ. ☐ Micro-Ferrups 250VA, 500VA
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 50 min.; 20 min. **AC Output:** 120V; 0.25, 0.5 kva; 1ph; 60Hz (±)1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Audible alarm; LED ☐ UPS failure alarm ☐ Portable **Units sold:** 1,000 since 1985 **Cost:** $1,095

CLARY CORP.
Precision Instruments Division

☐ UPS1-60VA-1G; UPS1-800VA-1G; UPS1-1K-1G; UPS1-1.2K-1G; UPS1-1.5K-1G
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 96V; Sealed-gel; Maintenance-free **Backup time:** 10-20 min. **AC Output:** 120V; 0.6, 0.8, 1, 1.2, 1.5 kva; 1ph; 60Hz (±)0.25% ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Units sold:** 500 since 1985 **Cost:** $2,-195-$4,500 **Battery:** $495

☐ UPS1-750VA-1A; UPS1-1.25k-1A; UPS1-750VA-1M; UPS1-1.25k-1M
AC Input: 115V; 1ph; 60Hz **Backup Battery:** 84V; Sealed-gel; Lead-calcium; Maintenance-free **Backup time:** User-specified **AC Output:** 115V; 0.75, 1.25 kva; 1ph; 60Hz (±)0.25%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Lamp; Audible alarm ☐ UPS failure alarm **Units sold:** 500 since 1976 **Cost:** $2,985-$4,500 **Battery:** $850

COMPUTER POWER, INC.

☐ Computersave Mark II
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 12-15 min. **AC Output:** 120V; 0.75, 1, 1.5 kva; 1ph; 50Hz (±)0.05%; 60Hz (±)0.05%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Units sold:** 2,768 since 1983 **Cost:** $1,892 (0.75 Kva); $2,062 (1 Kva); $2,410 (1.5 Kva) (includes battery)

☐ Defender UPS (0.2-0.4 Kva)
AC Input: 120V, 220V, 230V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V, 36V; Sealed-gel; Maintenance-free **Backup time:** 10-30 min. **AC Output:** 120V; 0.2, 0.4 kva; 1ph; 50Hz (±)0.05%; 60Hz (±)0.05% **Introduced:** 1984

☐ Hi-Rel UPS (0.5 Kva)
AC Input: 120V, 208V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Lead-acid; Nickel-cadmium; Sealed-gel; Maintenance-free **Backup time:** 1.5 hrs. **AC Output:** 120V, 208V, 240V; 0.5 kva; 1ph; 50Hz (±)0.05%; 60Hz (±)0.05%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm **Units sold:** 152 since 1975 **Cost:** $3,685

☐ Hi-Rel UPS (1-1.5 Kva)
AC Input: 120V, 208V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24-48V; Lead-acid; Nickel-cadmium; Sealed-gel **Backup time:** 1.5 hrs. **AC Output:** 120V, 208V, 240V; 1, 1.5 kva; 1ph; 50Hz (±)0.05%; 60Hz (±)0.05% ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm **Units sold:** 319 since 1975 **Cost:** $3,905 (1 Kva); $4,400 (1.5 Kva)

☐ Series 36 (0.75-1.5 Kva)
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 36V, 48V; Sealed-gel; Maintenance-free **Backup time:** 40-70 min. **AC Output:** 120V; 0.75, 1, 1.5 kva; 1ph; 50Hz (±)0.05%; 60Hz (±)0.05%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm **Units sold:** 1,796 since 1982 **Cost:** $2,400 (0.75 Kva); $2,600 (1 Kva); $3,895 (1.5 Kva)

DELTRON, INC.
Central Division

☐ PU1000N; PU1500N
AC Input: 120V, 220V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V, 48V; Sealed lead-calcium; Maintenance-free **Backup time:** 10-35 min. **AC Output:** 120V, 220V; 1, 1.5 kva; 1ph; 50Hz; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm **Introduced:** 1986 **Cost:** $2,650; $4,200

☐ PU500N
AC Input: 120V, 220V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V, 48V; Sealed lead-calcium; Maintenance-free **Backup time:** 10-35 min. **AC Output:** 120V, 220V; 0.5 kva; 1ph; 50Hz; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm **Introduced:** 1986 **Cost:** $2,100

DISPLEX, INC.
(subsidiary of North Hills Electronics, Inc.)

☐ PSU-7401
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 96V; Sealed-gel; Maintenance-free **Backup time:** 8 min. **AC Output:** 120V; 1 kva; 1ph; 60Hz (±)0.05%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Introduced:** 1983 **Cost:** $3,140 (includes battery)

☐ PSU-7502
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V; 0.5 kva; 1ph; 60Hz (±)0.05% **Introduced:** 1982 **Cost:** $2,100 (includes battery)

☐ PSU-7511
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V; Sealed lead-acid; Maintenance-free **Backup time:** 20 min. **AC Output:** 120V; 1.25 kva; 1ph; 60Hz (±)0.05% **Cost:** $3,380 (includes battery)

ELECTROGUARD
(division of Acme Electric Corp.)

☐ Power Ready II
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed lead-calcium; Maintenance-free **Backup time:** 15-30 min. **AC Output:** 120V; 0.8, 1.2 kva; 1ph; 60Hz (±)1% **Cost:** $995-$1,455

☐ Power-Ready/250; Power-Ready/500
AC Input: 120V; 1ph; 57-63Hz **Backup Battery:** 12V, 24V; Sealed lead-calcium; Maintenance-free **Backup time:** 5-10 min. **AC Output:** 120V; 0.25, 0.5 kva; 1ph; 60Hz (±)0.5% **Cost:** $495; $700

ELECTRONIC SPECIALISTS, INC.

☐ SU-250; SU-500
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V, 24V; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V; 0.25, 0.5 kva; 1ph; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage ☐ Status indicators: LED ☐ UPS failure alarm ☐ Portable **Units sold:** 100 since 1986 **Cost:** $1,095 (250 watt); $1,495 (500 watt)

ELGAR CORP.

☐ Model 102-1B
AC Input: 120V, 220V, 230V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 72V; User-determined; Maintenance-free **Backup time:** 1 min. and up **AC Output:** 120V, 220V, 230V, 240V; 1 kva; 1ph; 50Hz (±)0.5%; 60Hz (±)0.5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; LED indicator ☐ UPS failure alarm ☐ Portable **Units sold:** 10,000 since 1980 **Cost:** $4,250 **Battery:** $500

ENERGY ELECTRONIC SYSTEMS, INC.

☐ True on-line UPS
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 18V-24V; Lead-acid; Maintenance-free **Backup time:** 5 min. **AC Output:** 120V; 0.4-0.8 kva; 1ph; 60Hz; Square wave ☐ Phase locked to bypass line ☐ Load protected against: Undervoltage ☐ Status indicators: Audible alarm ☐ Portable **Introduced:** 1986 **Cost:** $795-$1,199

EXIDE ELECTRONICS CORP.

☐ Model 1101 (UL listed)
AC Input: 120/208/240V, 220/230/240V; 1ph; 60Hz; 50Hz **Backup Battery:** 120V; Sealed lead-acid; Maintenance-free **Backup time:** 0.25-11 hrs. **AC Output:** 120/208/240V, 220/230/240V; 1.5 kva; 1ph; 60Hz; 50Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm; Summary alarm contact ☐ UPS failure alarm ☐ Portable **Introduced:** 1984

GENERAL INTERFACE SYSTEMS, INC.

☐ PC-400
AC Input: 117V; 1ph; 60Hz **Backup Battery:** 52V; Sealed-gel; Maintenance-free **Backup time:** 15 min. **AC Output:** 120V; 0.4 kva; 1ph; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm **Units sold:** 2,100 since 1983 **Cost:** $1,095 **Battery:** $150

☐ 650 Power Source
AC Input: 117V; 1ph; 60Hz **Backup Battery:** 52V; Sealed-gel; Maintenance-free **Backup time:** 15 min. **AC Output:** 120V; 0.65 kva; 1ph; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm **Introduced:** 1982 **Cost:** $1,595 **Battery:** $175

GENERAL POWER SYSTEMS
(division of ALS Corp.)

☐ GPS-1K120-61 thru GPS-1K230-51
AC Input: 120V, 220V, 208V, 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 60V; Lead-calcium; Maintenance-free **Backup time:** 18 min. **AC Output:** 120V, 208V, 220V, 230V; 1 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm **Introduced:** 1982

☐ GPS-2K120-61 thru GPS-2K230-51
AC Input: 120V, 208V, 220V, 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 60V; Lead-calcium; Maintenance-free **Backup time:** 18 min. **AC Output:** 120V, 208V, 220V, 230V; 2 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm **Introduced:** 1982

☐ GPS-5005; GPS-5006
AC Input: 115V; 1ph; 50Hz; 60Hz **Backup Batterv:** 60V; Lead-calcium; Maintenance-free **Backup time:** 10-15 min. **AC Output:** 115V; 0.5 kva; 1ph; 50Hz; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Introduced:** 1982

☐ GPS-5025; GPS-5026
AC Input: 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 60V; Sealed-gel; Lead-calcium; Maintenance-free **Backup time:** 15 min. **AC Output:** 230V; 0.5 kva; 1ph; 50Hz (±)2%; 60Hz (±)2%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Introduced:** 1982

HITRAN CORP.
Power Systems Division

☐ Model BA0206
AC Input: 120V, 208V, 120/240V; 1ph; 60Hz **Backup Battery:** 48V; Sealed lead-calcium; Maintenance-free **Backup time:** User-specified **AC Output:** 120V, 208V, 120/240V; 1 kva; 1ph; 60Hz (±)0.5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm; Remote alarm contacts ☐ UPS failure alarm **Units sold:** 20 since 1981 **Cost:** $4,681 **Battery:** $416

ICS, INC.
ELECTRO-PAC Division

☐ M95-200; M95-600; M95-1000
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V, 48V; Sealed lead-acid; Maintenance-free **Backup time:** 7-25 min. **AC Output:** 120V; 0.2, 0.6, 1 kva; 1ph; 60Hz (±)5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; LED ☐ UPS failure alarm ☐ Portable **Units sold:** 600 since 1980 **Cost:** $836-$2,780 **Battery:** $75

☐ UP2.OE120
AC Input: 120V, 208V, 240V, 480V; 1ph; 3ph wye; 3ph delta; 50Hz; 60Hz **Backup Battery:** 48V, 120V; Nickel-cadmium; Sealed-gel; Lead-calcium; Maintenance-free **Backup time:** User-specified **AC Output:** 120V, 240V, 120/240V; 2 kva; 1ph; 50Hz (±)0.5%; 60Hz (±)0.5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Meters ☐ UPS failure alarm **Units sold:** 420 since 1979 **Cost:** $7,500 **Battery:** $486-$1,090

IMUNELEC, INC.

☐ Micro MS300
AC Input: 120V, (optional) 220V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed lead-acid; Maintenance-free **Backup time:** 15 min. **AC Output:** 120V, (optional) 220V, 240V; 0.4 kva; 50Hz (±)1%; 60Hz (±)1%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Portable **Units sold:** 5,000 since 1984

☐ Micro MS600
AC Input: 120V, (optional) 220V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed lead-acid; Maintenance-free **Backup time:** 15 min. **AC Output:** 120V, (optional) 220V, 240V; 0.6 kva; 1ph; 50Hz; 60Hz (±)0.1%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Portable **Introduced:** 1986

☐ Series 01 (0.5 Kva)
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V, 48V; Sealed lead-acid; Maintenance-free **Backup time:** 15 min. **AC Output:** 120V; 0.5 kva; 1ph; 60Hz (±)0.1%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Ammeter; Lamp; Audible alarm ☐ Portable **Units sold:** 2,500 since 1982

☐ Series 01 (1 Kva)
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V; Sealed lead-acid; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V; 1 kva; 1ph; 60Hz (±)0.1%; Sine wave ☐ Load protected against: Overvoltage ☐ Status indicators: Ammeter; Lamp; Audible alarm ☐ Portable **Units sold:** 3,000 since 1982

☐ Series 11 (1-2 Kva)
AC Input: 120V; 1ph; 60Hz; (optional) 50Hz **Backup Battery:** 48V; Sealed lead-acid; Maintenance-free **Backup time:** 15 min.-8 hrs. **AC Output:** 120V; 1, 1.5, 2 kva; 1ph; 60Hz (±)0.1%; (optional) 50Hz (±)0.1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Ammeter; Lamp; Audible alarm ☐ UPS failure alarm **Units sold:** 3,000 since 1980

ISOREG CORP.

☐ Isoguard On-line UPS (0.5 Kva)
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 60V; Sealed lead-calcium **Backup time:** 20 min. **AC Output:** 120V; 0.5 kva; 1ph; 60Hz (±)1% **Introduced:** 1986 **Cost:** $1,495

☐ Isoguard On-line UPS (1 Kva)
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 60V; Sealed lead-calcium **Backup time:** 20 min. **AC Output:** 120V; 1 kva; 1ph; 60Hz (±)1% **Introduced:** 1986 **Cost:** $1,995

JEFFERSON ELECTRIC
(division of Magnetek, Inc.)

☐ Energygard
AC Input: 95-130V; 1ph; 60Hz; Lead-acid; Maintenance-free **Backup time:** 7-45 min. **AC Output:** 120V; 0.25-1 kva; 1ph; 60Hz (±)0.5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Introduced:** 1982 **Cost:** $2,200 (1Kva)

LAMARCHE MANUFACTURING CO.

☐ A52C Continuous System (1-2 Kva)
AC Input: 120V, 208/240V; 1ph; 3ph wye; 3ph delta; 50Hz; 60Hz **Backup Battery:** 24V, 48V, 130V; Lead-acid; Nickel-cadmium; Sealed-gel; Maintenance-free **Backup time:** User-specified **AC Output:** 120V, 240V; 1, 1.5, 2 kva; 1ph; 50Hz; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm **Introduced:** 1964

☐ A58C Continuous System (0.5 Kva)
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Lead-acid; Nickel-cadmium; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V; 0.5 kva; 1ph; 50Hz; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Introduced:** 1985

L.E.A. DYNATECH, INC.
(division of Dynatech Corp.)

☐ Models CPS-500 thru CPS-5K
AC Input: 120V, 220V; 1ph; 50Hz; 60Hz **Backup Battery:** 12-48V; Lead-acid; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V, 120/240V, 220-240V; 0.5-5 kva; 1ph; 60Hz (±)0.1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Introduced:** 1984 **Cost:** $995-$21,510

LORAIN PRODUCTS
Reliance Comm/Tec Division

☐ ConstAC WDA102B
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V **Backup time:** User-specified **AC Output:** 120V; 1 kva; 1ph; 60Hz (±)1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp ☐ UPS failure alarm **Introduced:** 1979 **Cost:** $3,576

LUMITROL

☐ SIW200; SIW400; SIW700
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V, 24V; Lead-acid; Maintenance-free **Backup time:** 20 min. **AC Output:** 115-120V; 0.2, 0.4, 0.7 kva; 1ph; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Audible alarm ☐ UPS failure alarm **Cost:** $1,200

☐ SQW200; SQW400
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V, 36V; Sealed lead-acid; Maintenance-free **Backup time:** 20 min. **AC Output:** 115-120V; 0.2, 0.4 kva; 1ph; 60Hz (±)0.1%; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm **Cost:** $500

MODERN POWER TECHNOLOGY, INC.

☐ MUPS Series (0.75 Kva)
AC Input: 95-132V; 1ph; 50Hz; 60Hz **Backup Battery:** 72V; Sealed-gel; Maintenance-free **Backup time:** 20 min. **AC Output:** 117V; 0.75 kva; 1ph; 60Hz (±)0.03 Hz **Cost:** $1,650

☐ MUPS Series (1.2-2 Kva)
AC Input: 95-132V; 1ph; 60Hz **Backup Battery:** 72V; Sealed-gel; Maintenance-free **Backup time:** 10-180 min. **AC Output:** 117V; 1.2, 2 kva; 1ph; 60Hz (±)0.3% **Cost:** $2,245-$3,934

MPL POWER SYSTEMS (NORTH AMERICA), INC.

☐ Processgard (0.1-0.5 Kva)
AC Input: 480V, 208V; 1ph; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 0.25-4 hrs. **AC Output:** 480V, 208V; 0.1-0.5 kva; 1ph; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm; Lighted indicators ☐ UPS failure alarm ☐ Portable **Units sold:** 55 since 1977 **Cost:** $700-$1,500

☐ Processgard (1-2 Kva)
AC Input: 480V, 208V; 1ph; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 0.25-4 hrs. **AC Output:** 480V, 208V; 1, 2 kva; 1ph; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm; Lighted indicators ☐ UPS failure alarm **Units sold:** 100 since 1977 **Cost:** $4,000-$8,000

NIPPON ELECTRIC INDUSTRY CO., LTD.

☐ CM10501; CM10701; CM11001
AC Input: 200V, 210V, 380V, 415V, 440V; 3ph delta; 50Hz; 60Hz **Backup Battery:** 112V; Lead-acid; Nickel-cadmium **AC Output:** 115/120/200/220V; 5, 7.5, 10 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ UPS failure alarm

☐ Mini-UPS 0500
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 96V; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V; 0.5 kva; 1ph; 50Hz (±)0.5Hz; 60Hz (±)0.5Hz; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp ☐ Portable **Units sold:** 3,000 since 1985 **Cost:** $1,700 **Battery:** $150

☐ Mini-UPS 1000
AC Input: 102-138V; 1ph; 50Hz; 60Hz **Backup Battery:** 96V; Lead-acid; Sealed-gel; Maintenance-free **Backup time:** 20 min. **AC Output:** 120/220V; 1 kva; 1ph; 50Hz (±)5Hz; 60Hz (±)5Hz; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp ☐ Portable **Units sold:** 14,000 since 1984 **Cost:** $2,600 **Battery:** $300

☐ Mini-UPS 3000
AC Input: 120/220V; 1ph; 50Hz; 60Hz **Backup Battery:** 96V; Sealed-gel; Maintenance-free **Backup time:** 15 min. **AC Output:** 120/220V; 3 kva; 1ph; 50Hz (±)0.5Hz; 60Hz (±)0.5Hz; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp ☐ Portable **Units sold:** 2,000 since 1985 **Cost:** $6,400 **Battery:** $800

NOVA ELECTRIC, INC.
(subsidiary of Hobart Brothers Co. Power Systems Group)

☐ Model 11-3K60-Y11
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 84V; Sealed lead-acid; Maintenance-free **Backup time:** 8 min. **AC Output:** 120V; 3 kva; 1ph; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp ☐ UPS failure alarm **Units sold:** 425 since 1980 **Cost:** $5,335 **Battery:** $925

PARA SYSTEMS, INC.

☐ Minuteman 1000V; MM1000SS
AC Input: 110V; 1ph; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 10-30 min. **AC Output:** 115V; 1.2 kva; 1ph; 60Hz (±)1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Audible alarm; LED ☐ UPS failure alarm **Units sold:** 400 since 1986 **Cost:** $1,399 (includes battery) **Battery:** $399

☐ Minuteman 300V; MM300SS
AC Input: 110V; 1ph; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 8-20 min. **AC Output:** 115V; 0.36 kva; 1ph; 60Hz (±)1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Audible alarm; LED ☐ UPS failure alarm ☐ Portable **Units sold:** 1,000 since 1986 **Cost:** $549 **Battery:** $60

POWER GENERAL CORP.

☐ UPS-210
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 12V **AC Output:** 115V, 230V; 0.2 kva; 1ph; 50Hz (±)0.01%; 60Hz (±)0.1%; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Portable **Introduced:** 1985 **Cost:** $249

RATELCO, INC.
Power Systems Division

☐ Type FIU (0.5 Kva)
AC Input: 120V, 208V, 240V, 480V; 1ph; 3ph wye; 3ph delta; 50Hz; 60Hz **Backup Battery:** 48V; Lead-acid; Sealed-gel; Maintenance-free **Backup time:** 0.25-8 hrs. **AC Output:** 120V; 0.5 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp ☐ UPS failure alarm **Units sold:** 30 since 1970 **Cost:** $3,890

☐ Type FIU (1-2 Kva)
AC Input: 120V, 208V, 240V, 480V; 1ph; 3ph wye; 3ph delta; 50Hz; 60Hz **Backup Battery:** 48V; Lead-acid; Sealed-gel; Maintenance-free **Backup time:** 0.25-8 hrs. **AC Output:** 120V; 1, 1.5, 2 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp ☐ UPS failure alarm **Units sold:** 30 since 1970 **Cost:** $7,795

RTE DELTEC CORP.

☐ Model 7026C
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 72V; Sealed-gel; Maintenance-free **Backup time:** User-specified **AC Output:** 120V; 2.5 kva; 1ph; 60Hz; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Remote contact closures; RS-232C diagnostics; LED; Analog metering ☐ UPS failure alarm **Units sold:** 75 since 1983 **Cost:** $5,995

SAB NIFE, INC.
(division of Sonesson Group)

☐ NIFEPOWER-DP 1000
AC Input: 117V; 1ph; 60Hz **Backup Battery:** 48V; Sealed lead-acid; Maintenance-free **Backup time:** 7 min. **AC Output:** 117V; 1 kva; 1ph; 60Hz (±)2% ☐ Load protected against: Overvoltage; Undervoltage **Cost:** $3,100

SHAPE MAGNETRONICS, INC.

☐ Line Tamer UPS
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 35 min. **AC Output:** 120V; 0.25, 0.5 kva; 1ph; 60Hz (±)0.8%; Sine wave ☐ Status indicators: Audible alarm; LEDs ☐ Portable

SL WABER, INC.
(subsidiary of SL Industries, Inc.)

☐ LG-300
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 36V; Lead-acid; Maintenance-free **Backup time:** 0.5 hr. **AC Output:** 120V; 0.3 kva; 1ph; 60Hz (±)2%; Synthesized sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Audible alarm; LED ☐ UPS failure alarm ☐ Portable **Introduced:** 1985 **Cost:** $995

☐ LG-600
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 120V; Lead-acid; Maintenance-free **Backup time:** 20 min. **AC Output:** 120V; 0.6 kva; 1ph; 60Hz; Sine wave ☐ Load protected against: Overvoltage ☐ Status indicators: Audible alarm; LED ☐ UPS failure alarm ☐ Portable **Introduced:** 1985 **Cost:** $1,495

SOLA ELECTRIC
(unit of General Signal)

☐ Mini UPS (0.4 Kva)
AC Input: 120V, 220/240V; 1ph; 50Hz; 60Hz **Backup Battery:** 72V; Starved electrolyte lead-acid; Maintenance-free **Backup time:** 10, 20 min. **AC Output:** 120V, 220/240V; 0.4 kva; 1ph; 50Hz (±)0.01%; 60Hz (±)0.01%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp ☐ Portable **Introduced:** 1980 **Cost:** $1,448 (includes battery)

☐ Mini UPS (0.6-0.75 Kva)
AC Input: 120V, 220/240V; 1ph; 50Hz; 60Hz **Backup Battery:** 72V; Starved electrolyte lead-acid; Maintenance-free **Backup time:** 10, 20 min. **AC Output:** 120V, 220/240V; 0.6, 0.75 kva; 1ph; 50Hz (±)0.01%; 60Hz (±)0.01%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp ☐ Portable **Introduced:** 1980 **Cost:** $2,100 (0.75 Kva) (includes battery)

SOLIDSTATE CONTROLS, INC.

☐ Powerbase 1000-PB1075
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 123V; Lead-acid; Maintenance-free **Backup time:** 30 min. **AC Output:** 120V; 0.75 kva; 1ph; 60Hz (±)3%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Introduced:** 1985 **Cost:** $2,000-$3,000

☐ Powerbase 1000-PB1150
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 123V; Lead-acid; Maintenance-free **Backup time:** 30 min. **AC Output:** 120V; 1.5 kva; 1ph; 60Hz (±)3%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Introduced:** 1985 **Cost:** $4,500-$6,500

SUN RESEARCH, INC.

☐ C Series (0.3-2 Kva)
AC Input: 95-130V, 220V; 1ph; 60Hz **Backup Battery:** 12V, 24V, 48V, 72V; Sealed-gel; Maintenance-free **Backup time:** 20-30 min. **AC Output:** 118V, 220V; 0.3, 0.6, 1, 1.5, 2 kva; 1ph; 60Hz (±)0.1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm **Units sold:** 6,000 since 1979 **Cost:** $850-$12,400 (includes battery)

☐ C Series (3-5 Kva)
AC Input: 95-130V, 220V; 1ph; 60Hz **Backup Battery:** 12V, 24V, 48V, 72V; Sealed-gel; Maintenance-free **Backup time:** 20-30 min. **AC Output:** 118V, 220V; 3, 5 kva; 1ph; 60Hz (±)0.1%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm **Units sold:** 1,000 since 1979 **Cost:** $8,680-$13,340 (includes battery)

SUNDANZ WORLD TRADE, LTD.

☐ Automatic Power System (0.5-1.5 Kva)
AC Input: 115V, 220V; 1ph; 60Hz **Backup Battery:** 24V, 48V; Lead-acid; Sealed-gel; Maintenance-free **Backup time:** 1-4 hrs. **AC Output:** 115V, 220V; 0.5, 0.75, 1, 1.5 kva; 1ph; 60Hz (±)0.5% **Cost:** $1,098-$4,695 (batteries included)

☐ Automatic Power System (2-2.5 Kva)
AC Input: 115V, 220V; 1ph; 60Hz **Backup Battery:** 48V; Lead-acid; Sealed-gel; Maintenance-free **Backup time:** 1-4 hrs. **AC Output:** 115V, 220V; 2, 2.5 kva; 1ph; 60Hz (±)0.5% **Cost:** $3,-298-$6,350 (batteries included)

☐ Matic Power System (0.5-1.5 Kva)
AC Input: 115V, 220V; 1ph; 60Hz **Backup Battery:** 24V, 48V; Lead-acid; Sealed-gel; Maintenance-free **Backup time:** 15 min. **AC Output:** 115V, 220V; 0.5, 0.75, 1, 1.5 kva; 1ph; 60Hz (±)0.5% **Cost:** $467-$1,695 (batteries included)

SUPERIOR ELECTRIC CO.

☐ UPS61002
AC Input: 95-135V; 1ph; 60Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 10 min. **AC Output:** 115V; 0.2 kva; 1ph; 60Hz (+)0%, (-)0.8%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Portable **Introduced:** 1984 **Cost:** $800 (includes battery)

☐ UPS61005
AC Input: 95-135V; 1ph; 60Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 10 min. **AC Output:** 115V; 0.5 kva; 1ph; 60Hz (+)0%, (-)0.8%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Portable **Introduced:** 1984 **Cost:** $1,000 (includes battery)

TECHNOLINKS INTERNATIONAL, INC.

☐ Micro-UPS Series (0.2-1 Kva)
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V, 24V; Sealed-gel; Maintenance-free **Backup time:** 20-60 min. **AC Output:** 120V; 0.2, 0.5, 0.75, 1 kva; 1ph; 60Hz (±)2%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp ☐ UPS failure alarm **Introduced:** 1983 **Cost:** $2,550 (1 Kva) (includes battery)

☐ UPS Series 350
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** User-specified **AC Output:** 120V; 3.5 kva; 1ph; 60Hz (±)1%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Alarm contacts ☐ UPS failure alarm **Introduced:** 1982 **Cost:** $10,500-$11,300

TERADO CORP.

☐ Model 660-114
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V **AC Output:** 117V; 0.4 kva; 1ph; 60Hz (±)0.1% **Units sold:** 310 since 1984 **Cost:** $335

TOPAZ, INC.

☐ Series 82000
AC Input: 115V, 220V, 230V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 72V; Sealed-gel; Maintenance-free **Backup time:** 19-24 min. **AC Output:** 115V, 220V, 230V, 240V; 0.5, 1, 1.2, 1.5 kva; 1ph; 50Hz (±)0.5%; 60Hz (±)0.5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Undervoltage ☐ Status indicators: Voltmeter; Lamp ☐ UPS failure alarm **Cost:** $5,825-$10,425 (includes battery)

☐ UPS (0.5 Kva)
AC Input: 115V; 1ph; 60Hz **Backup Battery:** 72V; Lead-acid; Maintenance-free **Backup time:** 35 min. **AC Output:** 115V; 0.5 kva; 1ph; 50Hz (±)0.25%; 60Hz (±)0.25%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Lamp ☐ Portable **Cost:** $5,825 (includes battery)

☐ UPS (1-1.5 Kva)
AC Input: 115V; 1ph; 60Hz **Backup Battery:** 72V; Lead-acid **AC Output:** 115V; 1, 1.5 kva; 1ph; 50Hz (±)0.25%; 60Hz (±)0.25%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Lamp ☐ UPS failure alarm ☐ Portable **Cost:** $6,290-$10,425 (includes battery)

TRIAD POWER SYSTEMS

☐ TRI-UPS
AC Input: 120V; 1ph; 60Hz; Sealed lead-acid; Maintenance-free **Backup time:** 10-15 min. **AC Output:** 120V; 0.3, 0.6 kva; 1ph; 60Hz (±)0.1%; Quasi-sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ UPS failure alarm ☐ Portable **Units sold:** 2,400 since 1984 **Cost:** $1,095-$1,495

TRIAD-UTRAD

☐ KU-411; KU-611; KU-811; KU-1011
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 72V; Sealed lead-acid; Maintenance-free **Backup time:** 7-45 min. **AC Output:** 120V; 0.25, 0.5, 0.75, 1 kva; 1ph; 60Hz (±)0.5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Portable **Units sold:** 1000 since 1982 **Cost:** $2,000 **Battery:** $540

UPSYSTEMS

☐ Micro UPS (0.5 Kva)
AC Input: 104-126V; 1ph; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 20 min. **AC Output:** 115V; 0.5 kva; 1ph; 60Hz (±)0.5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Ammeter; Lamp ☐ UPS failure alarm ☐ Portable **Units sold:** 15 since 1984

WARREN COMMUNICATIONS
(a unit of General Signal)

☐ 0.5 Kva UPS
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V; Lead-acid; Sealed-gel; Maintenance-free **Backup time:** 0.25-8 hrs. **AC Output:** 115V; 0.5 kva; 1ph; 60Hz (±)5%; Sine wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp **Introduced:** 1980 **Cost:** $2,620 **Battery:** $240-$580

☐ 1.5 Kva UPS
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V; Lead-acid; Sealed-gel **Backup time:** 0.25-8 hrs. **AC Output:** 120V; 1.5 kva; 1ph; 60Hz (±)5%; Sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp ☐ UPS failure alarm **Introduced:** 1970 **Cost:** $4,017-$4,666 **Battery:** $240-$1,165

STANDBY POWER SUPPLIES

AMERICAN POWER CONVERSION CORP.

☐ Model 450AT+
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 0.1 hr. **AC Output:** 117V; 0.45 kva; 1ph; 60Hz; Modified sine wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 103V in 4 ms; Standby to line at 105V in 4 ms ☐ Portable **Units sold:** 200 since 1985 **Cost:** $799 (includes battery)

CONTROL TECHNOLOGY, INC. (OK)

☐ RBS-AC 300 VA Reserve Power System
AC Input: 102-132V, 187-265V; 1ph; 50Hz; 60Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V, 220V, 230V, 240V; 0.3 kva; 1ph; 50Hz (±)0.75%; 60Hz (±)0.5%; Sine; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm; Signal outputs ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V, 204V in 3 ms; Standby to line at 109V, 219V in 2 ms ☐ Portable **Units sold:** 1,000 since 1983 **Cost:** $549 (includes battery)

☐ RBS-AC 500 VA Reserve Power System
AC Input: 102-132V, 187-265V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V, 220-240V; 0.5 kva; 1ph; 50Hz (±)0.75%; 60Hz (±)0.5%; Sine; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm; Signal outputs ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V, 204V in 3 ms; Standby to line at 109V, 219V in 2 ms ☐ Portable **Units sold:** 2,000 since 1983 **Cost:** $699

☐ RBS-AC 600 VA Reserve Power System
AC Input: 102-132V, 187-265V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V, 220-240V; 0.6 kva; 1ph; 50Hz (±)0.75%; 60Hz (±)0.5%; Sine; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm; Signal outputs ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 204V, 102V in 3 ms; Standby to line at 109V, 219V in 2 ms ☐ Portable **Units sold:** 1,000 since 1983 **Cost:** $799

CUESTA SYSTEMS CORP.

☐ DataSaver 200, Model 12060
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 10 min. typical **AC Output:** 120V; 0.2 kva; 1ph; 60Hz (±)0.01%; Stepped sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 4 ms; Standby to line at 106V in 2 ms ☐ Portable **Units sold:** 11,000 since 1981 **Cost:** $495

☐ DataSaver 400, Model 12060
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 5 min. typical **AC Output:** 120V; 0.4 kva; 1ph; 60Hz (±)0.1%; Stepped sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 4 ms; Standby to line at 106V in 4 ms ☐ Portable **Units sold:** 1,600 since 1985 **Cost:** $695

☐ DataSaver 400, Model 23050
AC Input: 220-240V; 1ph; 50Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 10 min. typical **AC Output:** 230V; 0.4 kva; 1ph; 50Hz (±) 0.1%; Stepped sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 196V in 5 ms; Standby to line at 204V in 5 ms ☐ Portable **Introduced:** 1985 **Cost:** $795

☐ DataSaver 90, Model 12060
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 10 min. typical **AC Output:** 120V; 0.09 kva; 1ph; 60Hz (±)0.01%; Stepped sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 4 ms; Standby to line at 106V in 2 ms ☐ Portable **Units sold:** 3,000 since 1980 **Cost:** $350

DELTRON, INC.
Central Division

☐ PU1000F
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V, 48V; Sealed lead-calcium; Maintenance-free **Backup time:** 35 min. **AC Output:** 120V, 220V; 1 kva; 1ph; 50Hz (±)0.001%; 60Hz (±)0.001%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 103.5V in 0.4 ms; Standby to line at 109V in 0.4 ms ☐ Portable **Introduced:** 1986 **Cost:** $1,240

☐ PU300Q; PU500Q
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed lead-calcium; Maintenance-free **Backup time:** 5-10 min. **AC Output:** 120V, 220V; 0.3, 0.5 kva; 1ph; 50Hz (±)1%; 60Hz (±)1% ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 103.5V in 10 ms; Standby to line at 109V in 13 ms ☐ Portable **Introduced:** 1985 **Cost:** $450; $545

☐ PU500F
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V, 48V; Sealed lead-calcium; Maintenance-free **Backup time:** 9 min. **AC Output:** 120V, 220V; 0.5 kva; 1ph; 50Hz (±)0.001%; 60Hz (±)0.001%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 103.5V in 0.4 ms; Standby to line at 109V in 0.4 ms ☐ Portable **Introduced:** 1986 **Cost:** $960

DISPLEX, INC.
(subsidiary of North Hills Electronics, Inc.)

☐ PSS-7711; PSS-7725
AC Input: 115V, 230V; 1ph; 48-63Hz **Backup Battery:** 12V, 24V; Lead-acid; Maintenance-free **Backup time:** 15-18 min. **AC Output:** 115V, 230V; 0.2, 0.4 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1% **Introduced:** 1981 **Cost:** $375-$520 (includes battery)

ELECTRO VECTOR, INC.

☐ SRP-1000
AC Input: 115V; 1ph; 50Hz; 60Hz **Backup Battery:** 96V; Sealed-gel; Maintenance-free **Backup time:** 0.5 hrs. **AC Output:** 115V; 1.44 kva; 1ph; 60Hz (±)3%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm ***Load transfer*** **points:** Line to standby at 100V in 1 ms; Standby to line at 105V in 1 ms **Introduced:** 1984 **Cost:** $1,700 **Battery:** $220

☐ SRP-250
AC Input: 115V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 0.17 hrs. **AC Output:** 115V; 0.36 kva; 1ph; 60Hz (±)3%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 100V in 1 ms; Standby to line at 105V in 1 ms **Introduced:** 1982 **Cost:** $903 **Battery:** $55

☐ SRP-500
AC Input: 115V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 0.5 hrs. **AC Output:** 115V; 0.72 kva; 1ph; 60Hz (±)3%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 100V in 1 ms; Standby to line at 105V in 1 ms **Introduced:** 1981 **Cost:** $1,290 **Battery:** $110

ELECTRONIC PROTECTION DEVICES, INC. (EPD)
(subsidiary of ALS Corp.)

☐ GRIZZLY 1000VRS; 2000VRS
AC Input: 104-126V; 1ph; 60Hz **Backup Battery:** 48V, 60V; Lead-acid; Maintenance-free **Backup time:** 8-15 min. **AC Output:** 115V; 1, 2 kva; 1ph; 60Hz (±)0.1% ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 2 or 4 ms; Standby to line at 102V in 2 or 4 ms ☐ Portable **Introduced:** 1984 **Cost:** $1,300; $2,000

☐ GRIZZLY 300VRS; 500VRS
AC Input: 104-126V; 1ph; 60Hz **Backup Battery:** 36V, 48V; Lead-acid; Maintenance-free **Backup time:** 10-18 min. **AC Output:** 115V; 0.3, 0.5 kva; 1ph; 60Hz (±)0.1% ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 2 ms; Standby to line at 102V in 2 ms ☐ Portable **Introduced:** 1983 **Cost:** $600-$800

ELGAR CORP.

☐ Standby Battery Power Station
AC Input: 102-132V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V; 0.35 kva; 1ph; 50Hz (±)0.5%; 60Hz (±)0.5%; Rectangular wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 8-12 ms; Standby to line at 108V in 8-12 ms ☐ Portable **Units sold:** 10,000 since 1983 **Cost:** $765

GENERAL POWER SYSTEMS
(division of ALS Corp.)

☐ GPS-0.1K125R thru GPS-0.5K236R Memorygard II
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 12V, 24V, 36V; Sealed-gel; Lead-calcium; Maintenance-free **Backup time:** 9-18 min. **AC Output:** 115V; 0.1-0.5 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Square wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 2 ms; Standby to line at 105V in 2 ms ☐ Portable **Introduced:** 1984

☐ **GPS-1K125R thru GPS-1K236R Memorygard II**
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Sealed-gel; Lead-calcium; Maintenance-free **Backup time:** 15 min. **AC Output:** 115V, 230V; 1 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 2 ms; Standby to line at 104V in 2 ms ☐ Portable **Introduced:** 1984

☐ **GPS-2K125R thru GPS-2K236R Memorygard II**
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 60V; Sealed-gel; Lead-calcium; Maintenance-free **Backup time:** 8 min. **AC Output:** 115V, 230V; 2 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Square wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 2 ms; Standby to line at 104V in 2 ms ☐ Portable **Introduced:** 1984

INTERNATIONAL MANUFACTURING & MARKETING, INC. (IM&M)

☐ **Fennex FX1006**
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V; Sealed lead-acid; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V; 1 kva; 1ph; 60Hz (±)1%; Modified rectangular wave ☐ Status indicators: Lamp; Audible alarm ☐ Portable **Units sold:** 600 since 1984 **Cost:** $859

☐ **Fennex FX2002; FX5004**
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed lead-acid; Maintenance-free **Backup time:** 15-20 min. **AC Output:** 120V; 0.33, 0.5 kva; 1ph; 60Hz (±)1%; Modified rectangular wave ☐ Status indicators: Lamp; Audible alarm ☐ Portable **Units sold:** 2,000 since 1985 **Cost:** $349-$620

KALGLO ELECTRONICS CO., INC.

☐ **LS-250 Line-Saver**
AC Input: 120/240V; 1ph; 60Hz; 50Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 11 min. **AC Output:** 102-120V, 204-240V; 0.24 kva; 1ph; 60Hz; 50Hz; Rectangular stepped wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 106V, 212V in 2-4 ms; Standby to line at 108V, 216V in 2-4 ms ☐ Portable **Units sold:** 1,000 since 1983 **Cost:** $549

☐ **LS-500 Line-Saver**
AC Input: 110-125V; 1ph; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 11 min. **AC Output:** 120V; 0.5 kva; 1ph; 60Hz (±)0.5% **Introduced:** 1986 **Cost:** $795

LAMARCHE MANUFACTURING CO.

☐ **A52S Standby System (0.1-0.5 Kva)**
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V, 48V, 130V; Lead-acid; Nickel-cadmium; Sealed-gel; Maintenance-free **Backup time:** User-specified **AC Output:** 120V; 0.1, 0.3, 0.5 kva; 1ph; 50Hz; 60Hz; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Voltmeter; Ammeter; Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at User-specifiedV in 4 ms; Standby to line at User-specifiedV in 4 ms **Units sold:** 1,000 since 1964

LORTEC POWER SYSTEMS, INC.

☐ **Standby Power System (0.2, 0.4 Kva)**
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 10-20 min. **AC Output:** 120V; 0.2, 0.4 kva; 1ph; 60Hz (±)1%; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 4-6 ms; Standby to line at 108V in 4-6 ms ☐ Portable **Units sold:** 100 since 1984 **Cost:** $495 (0.2 kva); $695 (0.4 kva) (includes battery)

☐ **Standby Power System (1 Kva)**
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 10-20 min. **AC Output:** 120V; 1 kva; 1ph; 60Hz (±)1%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 1 ms; Standby to line at 108V in 1 ms ☐ Portable **Units sold:** 100 since 1984 **Cost:** $1,395 (includes battery)

MEIRICK, INC.

Power Systems Division

☐ **The Meirick MI400**
AC Input: 115V; 1ph; 60Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 8-16 min. **AC Output:** 115V; 0.4 kva; 1ph; 60Hz (±)5%; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 3 ms; Standby to line at 107V in 1 ms ☐ Portable **Introduced:** 1983 **Cost:** $449; $495 (includes battery)

☐ **The Meirick MI800**
AC Input: 115V; 1ph; 60Hz **Backup Battery:** 24V; Sealed lead-acid; Maintenance-free **Backup time:** 8-10 min. **AC Output:** 115V; 0.8 kva; 1ph; 60Hz (±)5%; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 3 ms; Standby to line at 107V in 1 ms ☐ Portable **Introduced:** 1984 **Cost:** $795 (includes battery)

OHM ELECTRONICS

☐ **SPS 250XT**
AC Input: 110V-120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 10-15 min. **AC Output:** 110V-120V; 0.25 kva; Square wave ☐ Line to standby transfer alarm **Introduced:** 1986 **Cost:** $390

☐ **SPS 500AT**
AC Input: 110V-120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 10-15 min. **AC Output:** 110V-120V; 0.5 kva; Square wave **Introduced:** 1986 **Cost:** $730

☐ **SPS 500XT**
AC Input: 110V-120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 10-15 min. **AC Output:** 110V-120V; 0.5 kva; Square wave **Introduced:** 1986 **Cost:** $690

PANAMAX

☐ **PowerMAX 250 Watt**
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Lead-acid; Maintenance-free **Backup time:** 15 min. **AC Output:** 102-132V; 0.25 kva; 1ph; 60Hz; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 96V in 2 ms; Standby to line at 97V in 2 ms ☐ Portable **Units sold:** 4,500 since 1983 **Cost:** $559 (includes battery)

☐ **PowerMAX 400 Watt**
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Lead-acid; Maintenance-free **Backup time:** 20 min. **AC Output:** 102-132V; 0.5 kva; 1ph; 60Hz; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 96V in 3 ms; Standby to line at 97V in 5 ms ☐ Portable **Units sold:** 1,500 since 1983 **Cost:** $695 (includes battery)

☐ **PowerMAX 800 Watt**
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Lead-acid; Maintenance-free **Backup time:** 20 min. **AC Output:** 102-132V; 0.8 kva; 1ph; 60Hz; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 97V in 2 ms; Standby to line at 97V in 5 ms ☐ Portable **Units sold:** 500 since 1983 **Cost:** $995 (includes battery)

PARA SYSTEMS, INC.

☐ **Minuteman 250 Watt 120V MM250/1**
AC Input: 102-132V; 1ph; 60Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 8 min. **AC Output:** 102-132V; 0.25 kva; 1ph; 60Hz (±)3%; Rectangular stepped wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 100V in 2 ms; Standby to line at 105V in 2 ms ☐ Portable **Units sold:** 8,000 since 1983 **Cost:** $359 (includes battery) **Battery:** $30

☐ **Minuteman 250 Watt 220V MM250/2**
AC Input: 190-250V; 1ph; 50Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 8 min. **AC Output:** 190-250V; 0.25 kva; 1ph; 50Hz (±)3%; Rectangular stepped wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ UPS failure alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 185V in 2-4 ms; Standby to line at 200V in 2-4 ms ☐ Portable **Units sold:** 750 since 1983 **Cost:** $499 (includes battery) **Battery:** $30

☐ **Minuteman 500 Watt 120V MM500/1**
AC Input: 102-132V; 1ph; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 10 min. **AC Output:** 120V; 0.5 kva; 1ph; 60Hz (±)3%; Rectangular stepped wave ☐ Phase locked to bypass line ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V in 2 ms; Standby to line at 105V in 2 ms ☐ Portable **Units sold:** 4,000 since 1984 **Cost:** $699 (includes battery) **Battery:** $80

POWER GENERAL CORP.

☐ **UPS-200**
AC Input: 115V; 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 12V; Lead-acid; Maintenance-free **Backup time:** 0.25 hrs. **AC Output:** 115V; 230V; 0.2 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 103V in 1.5 ms; Standby to line at 110V in 5.9 ms ☐ Portable **Introduced:** 1984 **Cost:** $395 **Battery:** $50

☐ **UPS-420**
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Lead-acid; Maintenance-free **Backup time:** 0.25 hrs. **AC Output:** 115V, 230V; 0.42 kva; 1ph; 50Hz (±)0.1%; 60Hz (±)0.1%; Square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 103V in 1.5 ms; Standby to line at 110V in 5.9 ms ☐ Portable **Introduced:** 1984 **Cost:** $595

PTI INDUSTRIES

☐ **AT1200**
AC Input: 120V, 220/240V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Sealed lead-acid; Maintenance-free **Backup time:** 15-25 min. **AC Output:** 120V, 220/240V; 1.2 kva; 1ph; 50Hz; 60Hz; Sine wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 104V, 187V, 204V in 4-10 ms; Standby to line at 104V, 187V, 204V in 4-10 ms ☐ Portable **Units sold:** 170 since 1985 **Cost:** $1,475

☐ AT1500
AC Input: 120V, 220V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed lead-acid; Maintenance-free **Backup time:** 6 min. **AC Output:** 120V, 220V, 240V; 1.5 kva; 1ph; 50Hz (±)5%; 60Hz (±)5%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 108V, 187V, 204V in 4-10 ms; Standby to line at 110V, 205V, 224V in 4-10 ms ☐ Portable **Introduced:** 1985 **Cost:** $1,959

☐ AT500
AC Input: 120V, 220V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Sealed lead-acid; Maintenance-free **Backup time:** 6 min. **AC Output:** 120V, 220V, 240V; 0.5 kva; 1ph; 50Hz (±)5%; 60Hz (±)5%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 108V, 187V, 204V in 4-10 ms; Standby to line at 110V, 205V, 224V in 4-10 ms ☐ Portable **Units sold:** 200 since 1985 **Cost:** $823

☐ AT800
AC Input: 120V, 220V, 240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed lead-acid; Maintenance-free **Backup time:** 6 min. **AC Output:** 120V, 220V, 240V; 0.8 kva; 1ph; 50Hz (±)5%; 60Hz (±)5%; Sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 108V, 187V, 204V in 4-10 ms; Standby to line at 110V, 205V, 224V in 4-10 ms ☐ Portable **Units sold:** 7,200 since 1985 **Cost:** $929

☐ PC200 (200 Watt)
AC Input: 120V, 220/240V; 1ph; 60Hz; 50Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 6 min. **AC Output:** 120V, 220V, 240V; 0.2 kva; 1ph; 60Hz (±)0.5%; 50Hz (±)0.5%; Pseudo sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 104V, 187V, 204V in 10 ms; Standby to line at 111V, 197V, 214V in 10 ms ☐ Portable **Units sold:** 14,000 since 1983 **Cost:** $400

☐ Turbo 350
AC Input: 120V, 220/240V; 1ph; 50Hz; 60Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 15-25 min. **AC Output:** 120V, 220/240V; 0.35 kva; 1ph; 50Hz; 60Hz; Pseudo sine wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 104V, 187V, 204V in 1 ms; Standby to line at 104V, 187V in 1 ms ☐ Portable **Units sold:** 4,200 since 1985 **Cost:** $695

☐ XT300 (300 Watt)
AC Input: 120V, 220V, 240V; 1ph; 60Hz; 50Hz **Backup Battery:** 12V; Sealed lead-acid; Maintenance-free **Backup time:** 6 min. **AC Output:** 120V, 220V, 240V; 0.3 kva; 1ph; 60Hz (±)0.5%; 50Hz (±)0.5%; Pseudo sine wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 104V, 187V, 204V in 4 ms; Standby to line at 111V, 197V, 214V in 4 ms ☐ Portable **Units sold:** 15,500 since 1984 **Cost:** $579

RELAX TECHNOLOGY

☐ Backup Power Source 1
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed lead-acid; Maintenance-free **Backup time:** 20 min. **AC Output:** 120V; 0.3 kva; 1ph; Modified square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Audible alarm; LED indicators ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 100V in 2-6 ms; Standby to line at 101V in 2-6 ms ☐ Portable **Introduced:** 1984 **Cost:** $400

☐ Backup Power Source 2
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed lead-acid; Maintenance-free **Backup time:** 20 min. **AC Output:** 120V; 0.3 kva; 1ph; Modified square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Audible alarm; LED indicators ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 100V in 2-6 ms; Standby to line at 101V in 2-6 ms ☐ Portable **Introduced:** 1984 **Cost:** $600

☐ Backup Power Source 3
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 20 min. **AC Output:** 120V; 0.3 kva; 1ph; 60Hz; Modified square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Audible alarm; LED indicators ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 100V in 2-6 ms; Standby to line at 101V in 2-6 ms ☐ Portable **Introduced:** 1985 **Cost:** $800

RTE DELTEC CORP.

☐ Watchman I
AC Input: 102V-127V; 60Hz **Backup Battery:** 24V; Sealed lead-acid **Backup time:** 20 min. **AC Output:** 115V; 0.25 kva; 60Hz (±)1% **Introduced:** 1986 **Cost:** $299

☐ Watchman II
AC Input: 102-127V; 1ph; 60Hz **Backup Battery:** 24V; Sealed lead-acid **Backup time:** 20 min. **AC Output:** 115V; 0.4 kva; 1ph; 60Hz (±)1% **Introduced:** 1986

SAFE POWER SYSTEMS, INC.

☐ ESP-1000
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 30 min. **AC Output:** 120V; 0.8 kva; 1ph; 50Hz (±)1%; 60Hz (±)1% **Introduced:** 1986 **Cost:** $1,995

☐ Model 1200; 1200A
AC Input: 120V; 1ph; 50Hz; 60Hz **Backup Battery:** 48V; Sealed-gel; Maintenance-free **Backup time:** 6 min. **AC Output:** 120V; 1.2 kva; 1ph; 50Hz (±)1%; 60Hz (±)1%; Sine wave **Introduced:** 1986 **Cost:** $1,395; $1,595

☐ SPS-1000
AC Input: 117V, 220V, 240V; 50Hz; 60Hz **AC Output:** 120V; 1 kva; 50Hz; 60Hz; Sine wave **Load transfer points:** Line to standby at 108V in 1 ms; Standby to line at 112V in 1 ms **Cost:** $1,495

☐ SPS-200; SPS-400 Standby Power Systems
AC Input: 117V, 220V, 240V; 50Hz; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 10-20 min. **AC Output:** 120V; 0.2, 0.4 kva; Rectangular wave **Load transfer points:** Line to standby at 102V in 3-6 ms; Standby to line at 108V in 4-6 ms **Cost:** $399; $795

SMINDUSTRIES, INC.

☐ Elektro-Safe 7001, 7002, 7003 (0.225-0.5 Kva)
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 20 min. **AC Output:** 120V; 0.225, 0.270, 0.325, 0.5 kva; 1ph; 60Hz (±)0.5%; Modified square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 110V in 4-6 ms; Standby to line at 110V in 4-6 ms ☐ Portable **Units sold:** 1,800 since 1984 **Cost:** $449; $599

☐ Elektro-Safe 7001, 7002, 7003 (1 Kva)
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 20 min. **AC Output:** 120V; 1 kva; 1ph; 60Hz (±)0.5%; Modified square wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 110V in 4-6 ms; Standby to line at 110V in 4-6 ms ☐ Portable **Units sold:** 1,800 since 1984 **Cost:** $449-$599

SOLA ELECTRIC
(unit of General Signal)

☐ Model SPS 400; SPS 800
AC Input: 120V, 220/240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Sealed-gel; Maintenance-free **Backup time:** 12 min. **AC Output:** 120V, 220/240V; 0.4, 0.8 kva; 1ph; 50Hz (±)1%; 60Hz (±)1%; Sine wave ☐ Load protected against: Undervoltage ☐ Status indicators: Audible alarm ☐ UPS failure alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 102V, 187/204V in 4-10 ms; Standby to line at 108V, 198/216V in 2-4 ms ☐ Portable **Units sold:** 50 since 1984 **Cost:** $720 (0.4 Kva); $855 (0.8 Kva) (includes battery)

SUMITRONICS, INC.
(subsidiary of Sumitomo Corp.)

☐ SPK-300S
AC Input: 102-132V; 1ph; 54-66Hz **AC Output:** 120V; 0.3, 0.45 kva; 60Hz (±)2% **Introduced:** 1985 **Cost:** $549; $749

☐ SPK-800A
AC Input: 102-132V; 1ph; 54-66Hz **Backup time:** 15 min. **AC Output:** 120V; 0.8 kva; 60Hz (±)2% **Cost:** $1,199

TERADO CORP.

☐ Model 50-168 Interceptor II
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V; Sealed-gel; Maintenance-free **Backup time:** 35-45 min. with 175 watt load **AC Output:** 117V; 0.18-0.20 kva; 1ph; 60Hz (±)0.1%; Square wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp **Load transfer points:** Line to standby at 95-100V in 8 ms; Standby to line at 95-100V in 8 ms ☐ Portable **Units sold:** 14,300 since 1970 **Cost:** $262 **Battery:** $70

☐ Model 660-103
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V **AC Output:** 117V; 1 kva; 1ph; 60Hz (±)0.1%; Square wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp **Load transfer points:** Line to standby at 95-100V in 25 ms; Standby to line at 95-100V in 25 ms **Units sold:** 395 since 1972 **Cost:** $1,511

☐ Model 660-108; 660-109
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V **AC Output:** 117V; 0.25-0.5 kva; 1ph; 60Hz (±)10%; Square wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp **Load transfer points:** Line to standby at 95-100V in 25 ms; Standby to line at 95-100V in 25 ms **Units sold:** 575 since 1972 **Cost:** $930 (660-108); $1,042 (660-109)

☐ Model 660-110; 660-111; 660-113
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V **AC Output:** 117V; 1-2 kva; 1ph; 60Hz (±)10%; Square wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp **Load transfer points:** Line to standby at 95-100V in 25 ms; Standby to line at 95-100V in 25 ms **Units sold:** 480 since 1972 **Cost:** $1,163 (660-110); $1,439 (660-113)

☐ Model 660-112
AC Input: 120V; 1ph; 60Hz **Backup Battery:** 12V **AC Output:** 117V; 0.5 kva; 1ph; 60Hz (±)5%; Square wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp **Load transfer points:** Line to standby at 95-100V in 25 ms; Standby to line at 95-100V in 25 ms ☐ Portable **Units sold:** 2,690 since 1972 **Cost:** $535

TOPAZ, INC.

☐ Powermaker
AC Input: 120V, 220/240V; 1ph; 50Hz; 60Hz **Backup Battery:** 24V; Lead-acid; Maintenance-free **Backup time:** 9-35 min. **AC Output:** 120V, 220/240V; 0.4, 0.8, 1 kva; 1ph; 50Hz (±)1%; 60Hz (±)1%; Sine wave ☐ Load protected against: Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm **Load transfer points:** Line to standby at 103V in 4 ms; Standby to line at 110V in 2 ms ☐ Portable **Introduced:** 1983 **Cost:** $795-$1,140 (includes battery)

TRIPP LITE
(division of Trippe Manufacturing Co., Inc.)

☐ BC-1000FC; BC675FC
AC Input: 117V; 1ph; 60Hz Backup Battery: 12V; Sealed-gel; Maintenance-free Backup time: 16 min. AC Output: 117V; 1 kva; 1ph; 60Hz (±)0.5Hz; Rectangular wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp ☐ Line to standby transfer alarm Load transfer points: Line to standby at 103V in 5-8 ms; Standby to line at 108V in 5-8 ms ☐ Portable Introduced: 1982 Cost: $1,179; $829

☐ BC-200; BC-425FC
AC Input: 120V; 1ph; 60Hz Backup Battery: 12V; Sealed-gel; Maintenance-free Backup time: 15 min. AC Output: 117V; 0.2, 0.4 kva; 1ph; 60Hz; Rectangular wave ☐ Load protected against: Overvoltage; Undervoltage ☐ Status indicators: Lamp; Audible alarm ☐ Line to standby transfer alarm Load transfer points: Line to standby at 103V in 8 ms; Standby to line at 108V in 8 ms ☐ Portable Introduced: 1981 Cost: $359; $599

☐ SB-1000; SB-2000
AC Input: 120V; 1ph; 60Hz Backup Battery: 12V, 24V AC Output: 117V; 1, 2 kva; 1ph; 60Hz (±)0.5Hz; Rectangular wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp Load transfer points: Line to standby at 95V in 12 ms; Standby to line at 110V in 12 ms Introduced: 1979 Cost: $699; $999

☐ SB-200; SB-400
AC Input: 120V; 1ph; 60Hz Backup Battery: 12V AC Output: 117V; 0.2, 0.4 kva; 1ph; 60Hz; Rectangular wave ☐ Load protected against: Overvoltage ☐ Status indicators: Lamp Load transfer points: Line to standby at 95V in 12 ms; Standby to line at 110V in 12 ms Introduced: 1979 Cost: $263; $359

WILMORE ELECTRONICS CO., INC.

☐ Model 1406
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz Backup Battery: 12V, 24V, 36V, 48V AC Output: 115V, 230V; 0.05 kva; 1ph; 50Hz; 60Hz (±)0.25%; Stepped wave ☐ Load protected against: Undervoltage ☐ Status indicators: Lamp Load transfer points: Line to standby at 90V in 16 ms; Standby to line at 95V in 10 ms ☐ Portable Introduced: 1981 Cost: $375

☐ Model 1407
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz Backup Battery: 12V, 24V, 36V, 48V AC Output: 115V, 230V; 0.25 kva; 1ph; 50Hz; 60Hz (±)0.25%; Stepped wave ☐ Load protected against: Undervoltage ☐ Status indicators: Lamp Load transfer points: Line to standby at 90V in 16 ms; Standby to line at 95V in 10 ms ☐ Portable Introduced: 1981 Cost: $630

☐ Model 1408
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz Backup Battery: 12V, 24V, 36V, 48V AC Output: 115V, 230V; 0.5 kva; 1ph; 50Hz; 60Hz (±)0.25%; Stepped wave ☐ Load protected against: Undervoltage ☐ Status indicators: Lamp Load transfer points: Line to standby at 90V in 16 ms; Standby to line at 95V in 10 ms ☐ Portable Introduced: 1980 Cost: $875

☐ Model 1409
AC Input: 115V, 230V; 1ph; 50Hz; 60Hz Backup Battery: 24V, 36V, 48V AC Output: 115V, 230V; 1 kva; 1ph; 50Hz; 60Hz (±)0.25%; Stepped wave ☐ Load protected against: Undervoltage ☐ Status indicators: Lamp Load transfer points: Line to standby at 90V in 16 ms; Standby to line at 95V in 10 ms ☐ Portable Introduced: 1981 Cost: $1,250

POWER LINE ISOLATORS

CONTROLLED POWER CO.

☐ Series 600 (0.125-50 Kva)
AC Input: 120V, 208/240V; 1 ph; 3ph wye; 60Hz AC Output: 120V, 240V; 0.125-50 kva; 1ph; 3ph wye; Sine wave Efficiency: 95% Method of regulation: Electronic isolation transformer Suppression: Common mode: 140 db; Transverse mode 3 db at 600 Hz Harmonics 99.9% Response time: 16.6 ms Isolation transformer: 0.001 pf interwinding capacitance Load regulation: 98% Protected against: Overload; Short circuit

ELECTRONIC SPECIALISTS, INC.

☐ AC-SFK-33M Quad Filter/Suppressor
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 1 kva; 1ph; Sine wave Efficiency: 99% Suppression: Common mode: 30 db; Transverse mode 55 db Response time: 1 ns Protected against: Overvoltage Status indicators: Lamp ☐ Portable Units sold: 10,000 since 1981 Cost: $102

☐ II-SRV-15 Isolator/Interrupter
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 1.8 kva; 1ph; Sine wave Efficiency: 99% Suppression: Common mode: 30 db; Transverse mode 40 db Response time: 1 ns Protected against: Overvoltage; Overload Status indicators: Lamp ☐ Portable Units sold: 2,500 since 1981 Cost: $340

☐ ISO-3 Isolator
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 1.8 kva; 1ph; Sine wave Efficiency: 99.5% Suppression: Common mode: 30 db; Transverse mode 50 db Response time: 1 ns Protected against: Overvoltage Status indicators: Lamp ☐ Portable Units sold: 27,000 since 1980 Cost: $130

HITRAN CORP.
Power Systems Division

☐ UIS Series AA0686
AC Input: 120V; 1 ph; 50Hz; 60Hz AC Output: 120V; 0.5 kva; 1ph; Sine wave Efficiency: 97% Suppression: Common mode: 140 db; Transverse mode 60 db Response time: 50 ms Isolation transformer: 0.001 pf interwinding capacitance; 4,000 VAC dielectric strength Load regulation: 96% Protected against: Overvoltage; Overload; Short circuit Units sold: 50 since 1982 Cost: $320

☐ UIS Series AB1392
AC Input: 120V; 1 ph; 50Hz; 60Hz AC Output: 120V; 1 kva; 1ph; Sine wave Efficiency: 97% Suppression: Common mode: 140 db; Transverse mode 60 db Response time: 50 ms Isolation transformer: 0.001 pf interwinding capacitance; 4,000 VAC dielectric strength Load regulation: 96% Protected against: Overvoltage; Overload; Short circuit Status indicators: Voltmeter; Ammeter; Lamp Units sold: 100 since 1982 Cost: $500

RTE DELTEC CORP.

☐ SIT Series (0.25-0.5 Kva)
AC Input: 100V, 120V, 200V, 220V, 240V; 1 ph; 50Hz; 60Hz AC Output: 120V, 120/240V; 0.25-0.5 kva; 1ph Efficiency: 98% Suppression: Common mode: 140 db at 10 Hz-1 MHz Isolation transformer: 0.001 pf interwinding capacitance

☐ SIT Series (1-1.8 Kva)
AC Input: 100V, 120V, 200V, 220V, 240V; 1 ph; 50Hz; 60Hz AC Output: 120V, 120/240V; 1-1.8 kva; 1ph Efficiency: 98% Suppression: Common mode: 140 db at 10 Hz-1 MHz Isolation transformer: 0.001 pf interwinding capacitance

TOPAZ, INC.

☐ Series 10 Ultra-Isolator (0.12-0.5 Kva)
AC Input: 120V, 120/240V; 1 ph; 50Hz; 60Hz AC Output: 120V, 120/240V; 0.12, 0.25, 0.5 kva; 1ph; Sine wave Efficiency: 95%; Transverse mode 3 db at 600 Hz Harmonics 98% Isolation transformer: 0.0005 pf interwinding capacitance; 2,500 VAC dielectric strength ☐ Portable Cost: $255-$350

☐ Series 10 Ultra-Isolator (0.75-1.8 Kva)
AC Input: 120V, 120/240V; 1 ph; 50Hz; 60Hz AC Output: 120V, 120/240V; 0.75, 1, 1.8 kva; 1ph; 3ph wye; Sine wave Efficiency: 95% Suppression: Common mode: 126 db; Transverse mode 3 db at 600 Hz Harmonics 98%; 2,500 VAC dielectric strength ☐ Portable Cost: $350-$570

☐ Series 20 Ultra-Isolator (0.12-0.5 Kva)
AC Input: 120V, 120/240V; 1 ph; 50Hz; 60Hz AC Output: 120V, 120/240V; 0.12, 0.25, 0.5 kva; 1ph; Sine wave Efficiency: 96% Suppression: Common mode: 140 db; Transverse mode 3 db at 600 Hz Harmonics 98% Isolation transformer: 0.001 pf interwinding capacitance; 2,500 VAC dielectric strength ☐ Portable Cost: $290-$410

☐ Series 20 Ultra-Isolator (0.75-1.8 Kva)
AC Input: 120V, 120/240V; 1 ph; 50Hz; 60Hz AC Output: 120V, 120/240V; 0.75, 1, 1.8 kva; 1ph; Sine wave Efficiency: 95% Suppression: Common mode: 140 db; Transverse mode 3 db at 600 Hz Harmonics 98%; 2,500 VAC dielectric strength ☐ Portable Cost: $405-$600

☐ Series 30 Ultra-Isolator (0.125-0.5 Kva)
AC Input: 120V, 120/240V; 1 ph; 50Hz; 60Hz AC Output: 120V, 120/240V; 0.12, 0.25, 0.5 kva; 1ph; Sine wave Efficiency: 96% Suppression: Common mode: 146 db; Transverse mode 3 db at 600 Hz Harmonics 98% Isolation transformer: 0.0005 pf interwinding capacitance; 2,500 VAC dielectric strength Load regulation: 97% ☐ Portable Cost: $290-$455

☐ Series 30 Ultra-Isolator (0.75-1.8 Kva)
AC Input: 120V, 120/240V; 1 ph; 50Hz; 60Hz AC Output: 120V, 120/240V; 0.75, 1, 1.8 kva; 1ph; Sine wave Efficiency: 96% Suppression: Common mode: 146 db; Transverse mode 3 db at 600 Hz Harmonics 98% Isolation transformer: 0.0005 pf interwinding capacitance; 2,500 VAC dielectric strength ☐ Portable Cost: $540-$815

POWER LINE REGULATORS

CONTROLLED POWER CO.

☐ Series 500 (1-50 Kva)
AC Input: 120V, 208V, 240V; 1 ph; 3ph wye; 3ph delta; 50Hz; 60Hz AC Output: 120V, 240V, 208V; 1-50 kva; 1ph; 3ph wye; 3ph delta; Sine wave Efficiency: 98% Regulation: (±)5% Method of regulation: Autotransformer; Electrical

☐ Series 900
AC Input: 120V, 208V, 240V, 600V; 1 ph; 3ph wye; 60Hz AC Output: 120V, 208V, 240V, 600V; 25-150K, 1.5-75 kva; 1ph; 3ph wye; Sine wave Efficiency: 95% Regulation: (±)1% Method of regulation: Electronic Harmonics 95% Response time: 5 cycles

DISPLEX, INC.
(subsidiary of North Hills Electronics, Inc.)

☐ PLR-5108; PLR-5116
AC Input: 88-130V; 1 ph; 60Hz AC Output: 115V; 1, 2 kva; 1ph; Sine wave Efficiency: 93% Regulation: 10% Method of regulation: Electronic Suppression: Common mode: 40 db; Transverse mode 30 db Protected against: Overvoltage; Overload; Short circuit Status indicators: Voltmeter; Ammeter; Lamp ☐ Portable Introduced: 1982 Cost: $775; $875

☐ PLR-5204; PLR-5208
AC Input: 170-250V; 1 ph; 50Hz AC Output: 230V; 1, 2 kva; 1ph; Sine wave Efficiency: 93% Regulation: 10% Method of regulation: Electronic Suppression: Common mode: 40 db; Transverse mode 30 db Protected against: Overvoltage; Overload; Short circuit Status indicators: Voltmeter; Ammeter; Lamp ☐ Portable Introduced: 1982 Cost: $852; $962

GENERAL INTERFACE SYSTEMS, INC.

☐ VR-175; VR-325
AC Input: 100-130V; 60Hz AC Output: 120V; 0.175-0.325 kva; Sine wave Regulation: (±)3% Method of regulation: Ferroresonant Suppression: Common mode: 120 db; Transverse mode 60 db Harmonics 97% Response time: Instantaneous Protected against: Overvoltage; Short circuit Introduced: 1986 Cost: $139; $189

JEFFERSON ELECTRIC
(division of Magnetek, Inc.)

☐ Minigard
AC Input: 95-130V; 1 ph; 60Hz AC Output: 120V; 0.7-2 kva; 1ph; Sine wave Efficiency: 90% Regulation: (±)3% Suppression: Common mode: 120 db; Transverse mode 60 db Harmonics 97% Response time: 25 ms Protected against: Overload; Short circuit ☐ Portable Introduced: 1979 Cost: $150-$900

LORTEC POWER SYSTEMS, INC.

☐ CPU-300
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.3 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)5% **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** less than 25 ms **Protected against:** Overload

☐ CPU-750; CPU-1000; CPU-2000
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.75, 1, 2 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** less than 25 ms **Protected against:** Overload; Short circuit

TELEDYNE BIG BEAM

☐ Power Dyne II (0.5 Kva)
AC Input: 120V, 208V, 240V; 1 ph; 60Hz **AC Output:** 120V, 240V; 0.5 kva; 1ph **Regulation:** (±)1% **Suppression:** Common mode: 60 db; Transverse mode 30 db **Harmonics** 97% **Response time:** 25 **Protected against:** Overvoltage

☐ Power Dyne II (0.75-2 Kva)
AC Input: 120V, 208V, 240V; 1 ph; 60Hz **AC Output:** 120V, 208V, 240V; 0.75, 2 kva; 1ph **Regulation:** (±)1% **Suppression:** Common mode: 60 db; Transverse mode 30 db **Harmonics** 97% **Response time:** 25 **Protected against:** Overvoltage

TOPAZ, INC.

☐ Series 75000 (1-1.5 Kva)
AC Input: 96-126V, 176-231V; 1 ph; 47-63Hz **AC Output:** 120V, 220V; 1, 1.5 kva; 1ph; Sine wave **Efficiency:** 98% **Regulation:** (±)5% **Harmonics** 99.9% **Response time:** 1 cycle ☐ Portable **Cost:** $980

☐ Series 75000 (2.5-10 Kva)
AC Input: 96-126V, 176-231V, 184-242V, 192-252V; 1 ph; 47-63Hz **AC Output:** 120V, 220V, 230V, 240V; 2.5, 5, 10 kva; 1ph; Sine wave **Efficiency:** 98% **Regulation:** (±)5% **Harmonics** 99.9% **Response time:** 1 cycle ☐ Portable **Cost:** $1,130-$3,315

☐ Series 77000 (1-2 Kva)
AC Input: 85-125V, 160-235V, 167-246V, 175-255V; 1 ph; 47-63Hz **AC Output:** 117V, 220V, 230V, 240V; 1, 2 kva; 1ph; Sine wave **Efficiency:** 98% **Regulation:** (±)7% **Harmonics** 99.9% **Response time:** 1 cycle ☐ Portable **Cost:** $940-$1,055

POWER LINE CONDITIONERS/ SUPPRESSORS

ACCO INTERNATIONAL, INC.

☐ Model 50676
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 1.2 kva; 1ph; Sine wave **Efficiency:** 100% **Regulation:** (+)10% **Method of regulation:** Electronic **Suppression:** Common mode: 55 db **Response time:** 75 ps ☐ Input circuit breaker ☐ Remote emergency shut-off **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp; Audible alarm ☐ Portable **Units sold:** 8,000 since 1984 **Cost:** $100

BROOKS MARKETING CORP.

☐ BN4-6
AC Input: 125V; 1 ph; 60Hz **AC Output:** 125V; 1.88 kva; 1ph; Sine wave **Suppression:** Common mode: 10-40 db; Transverse mode 10-40 db **Response time:** 5 ps ☐ Individual circuit breakers on output lines ☐ Remote emergency shut-off **Protected against:** Overvoltage; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 50,000 since 1983 **Cost:** $80

☐ BN6-6
AC Input: 125V; 1 ph; 60Hz **AC Output:** 125V; 1.88 kva; 1ph; Sine wave **Suppression:** Common mode: 10-40 db; Transverse mode 10-40 db **Response time:** 5 ps ☐ Individual circuit breakers on output lines ☐ Remote emergency shut-off **Protected against:** Overvoltage; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 50,000 since 1983 **Cost:** $85

CALIFORNIA INSTRUMENTS
(division of Amstar Technical Products Co., Inc.)

☐ Model LC1252B
AC Input: 180-264V; 1 ph; 50Hz; 60Hz **AC Output:** 220/230/240V; 1.2 kva; 1ph; Sine wave **Efficiency:** 80% **Regulation:** 0.025% **Method of regulation:** Electronic **Suppression:** Common mode: 100 db; Transverse mode 100 db **Harmonics** 98.8% **Response time:** 8 ms **Isolation transformer:** 1 pf interwinding capacitance; 500 VAC dielectric strength **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Voltmeter; Ammeter; Lamp ☐ Portable **Units sold:** 950 since 1973 **Cost:** $2,975

COMPUTER ACCESSORIES CORP. (CA)

☐ Power Director
AC Input: 115V; 1 ph; 50Hz **AC Output:** 115V; 9 kva; 1ph; Sine wave **Method of regulation:** Electronic **Suppression:** Common mode: 30 db at 5 MHz; Transverse mode 30 db at 5 MHz **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 200,000 since 1983 **Cost:** $99-$169

☐ PowerLine
AC Input: 115V; 1 ph; 50Hz **AC Output:** 115V; 9 kva; 1ph; Sine wave **Method of regulation:** Electronic **Response time:** 1 ns **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 30,000 since 1985 **Cost:** $50-$80

COMPUTER POWER, INC.

☐ OLCR (0.25-0.5 Kva)
AC Input: 120V, 240V; 1 ph; 50Hz; 60Hz **AC Output:** 120V, 240V; 0.5 kva; 1ph; Sine wave **Efficiency:** 86% **Regulation:** 2% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 80 db **Harmonics** 95% **Response time:** 8 ms **Isolation transformer:** 0.005 pf interwinding capacitance; 5,000 VAC dielectric strength **Load regulation:** 97-98% **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 1,941 since 1977 **Cost:** $440 (0.25 Kva); $550 (0.5 Kva)

☐ OLCR (1-1.5 Kva)
AC Input: 120V, 240V; 1 ph; 50Hz; 60Hz **AC Output:** 120V, 240V; 1, 1.5 kva; 1ph; Sine wave **Efficiency:** 88% **Regulation:** 2% **Suppression:** Common mode: 120 db; Transverse mode 80 db **Harmonics** 95% **Response time:** 8 ms **Isolation transformer:** 0.005 pf interwinding capacitance; 5,000 VAC dielectric strength **Load regulation:** 97-98% **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 2,106 since 1977 **Cost:** $830-$1,030

CONTROL CONCEPTS CORP.

☐ BDU-205 thru BDU-2100 ISLATROL
AC Input: 240V; 1 ph; 50-60Hz **AC Output:** 240V; 1.2-24 kva; 1ph; Sine wave **Efficiency:** 99% **Method of regulation:** Electronic; Solid state active tracking spike-transient suppressor **Suppression:** Common mode: 40 db; Transverse mode 40 db **Response time:** less than 5 ns; 5,000 VAC dielectric strength **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Units sold:** 1,000 since 1980 **Cost:** $245-$1,909

☐ Models BDU-102 thru BDU-1100 ISLATROL
AC Input: 90-135V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120V; 0.3-12 kva; 1ph; Sine wave **Efficiency:** 99% **Method of regulation:** Electronic; Solid state active tracking spike-transient suppressor **Suppression:** Common mode: 40 db; Transverse mode 40 db **Response time:** less than 5 ns; 5,000 VAC dielectric strength **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Units sold:** 1,500 since 1980 **Cost:** $105-$1,405

☐ Models CP-2; CP-7; CP-15
AC Input: 120V; 1 ph; 50Hz; 60Hz **AC Output:** 120V; 0.3, 0.9, 1.8 kva; 1ph; Sine wave **Efficiency:** 99% **Method of regulation:** Electronic **Suppression:** Common mode: 40 db; Transverse mode 40 db **Response time:** less than 5 ns; 5,000 VAC dielectric strength ☐ Individual circuit breakers on output lines **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 1,000 since 1981 **Cost:** $69; $129; $199

CONTROLLED POWER CO.

☐ Series 700 (1-45 Kva)
AC Input: 120V, 208V; 1 ph; 50Hz; 60Hz **AC Output:** 120V, 208V, 240/120V; 1-45 kva; 1ph; Sine wave **Efficiency:** 95% **Regulation:** (±)5%; (±)3% **Method of regulation:** Electronic **Suppression:** Common mode: 140 db; Transverse mode 3 db at 600 Hz **Harmonics** 99% **Response time:** ¼ cycle **Load regulation:** 98% **Protected against:** Overvoltage

☐ Series 800 Power Purification System
AC Input: 120V, 208/240V; 1 ph; 3ph wye; 60Hz **AC Output:** 120V, 208/120V; 0.060-30 kva; 1ph; 3ph wye; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Electronic; Ferroresonant **Harmonics** 97% **Protected against:** Short circuit

CURRENT TECHNOLOGY, INC.

☐ PS Series
AC Input: 120/208/240V; 1 ph; 3ph wye; 3ph delta; 60Hz **AC Output:** 120/208/240V; 0.84-12 kva; 1ph; 3ph wye; 3ph delta; Sine wave **Efficiency:** 99.9% **Method of regulation:** Electronic **Suppression:** Common mode: 70-90 db; Transverse mode 70-90 db **Response time:** 1 ns **Load regulation:** 99% **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Voltmeter ☐ Portable **Introduced:** 1980 **Cost:** $850-$3,900

CURTIS MANUFACTURING CO., INC.

☐ Crystal LC-1, LC-3
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 1.5, 3 kva; 1ph **Efficiency:** 92% **Regulation:** (±)3% **Suppression:** Common mode: 120 db; Transverse mode 60 db **Protected against:** Short circuit **Cost:** $180; $240

DELTRON, INC.
Central Division

☐ Model C1PX
AC Input: 101/119V, 105-125V, 110-130V, 202-239V, 211-250V, 220-260V; 1 ph; 47-63Hz **AC Output:** 110V, 115V, 120V, 220V, 230V, 240V; 1 kva; 1ph; Sine wave **Efficiency:** 97% **Regulation:** (±)3.3% **Method of regulation:** Synchronous solid state switching **Suppression:** Common mode: 25 db at 100 kHz; Transverse mode 60 db at 100 kHz **Response time:** 8.3 ms **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1985 **Cost:** $440-$540

☐ Model C3PX
AC Input: 80-117V, 83-123V, 87-127V, 160-235V, 167-246V, 175-255V; 1 ph; 47-63Hz **AC Output:** 110V, 115V, 120V, 220V, 230V, 240V; 1 kva; 1ph; Sine wave **Efficiency:** 97% **Regulation:** (±)7% **Method of regulation:** Synchronous solid state switching **Suppression:** Common mode: 25 db at 100 kHz; Transverse mode 60 db at 100 kHz **Response time:** 8.3 ms **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1985 **Cost:** $495-$595

☐ Models C1AX; C1BX (1-2 Kva)
AC Input: 101-119V, 105-125V, 110-130V, 202-239V, 211-250V, 220-260V; 1 ph; 47-63Hz **AC Output:** 110V, 115V, 120V, 220V, 230V, 240V; 1, 2 kva; 1ph; Sine wave **Efficiency:** 97% **Regulation:** (±)3.3% **Method of regulation:** Synchronous solid state switching **Suppression:** Common mode: 25 db at 100 kHz; Transverse mode 60 db at 100 kHz **Response time:** 8.3 ms **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1984 **Cost:** $378-$802

☐ Models C2AX; C2BX (1-2 Kva)
AC Input: 88-115V, 92-121V, 96-126V, 176-231V, 184-242V, 192-252V; 1 ph; 47-63Hz AC Output: 110V, 115V, 120V, 220V, 230V, 240V; 1, 2 kva; 1ph; Sine wave Efficiency: 97% Regulation: (±)5% Method of regulation: Synchronous solid state switching Suppression: Common mode: 25 db at 100 kHz; Transverse mode 60 db at 100 kHz Response time: 8.3 ms Protected against: Overvoltage; Overload; Short circuit ☐ Portable Introduced: 1984 Cost: $398-$844

☐ Models C3AX; C3BX (1-2 Kva)
AC Input: 80-117V, 83-123V, 87-127V, 160-235V, 167-246V, 175-255V; 1 ph; 47-63Hz AC Output: 110V, 115V, 120V, 220V, 230V, 240V; 1, 2 kva; 1ph; Sine wave Efficiency: 97% Regulation: (±)7% Method of regulation: Synchronous solid state switching Suppression: Common mode: 25 db at 100 kHz; Transverse mode 60 db at 100 kHz Response time: 8.3 ms Protected against: Overvoltage; Overload; Short circuit ☐ Portable Introduced: 1984 Cost: $420-$890

DISPLEX, INC.
(subsidiary of North Hills Electronics, Inc.)

☐ PLC-3104
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 0.5 kva; 1ph; Sine wave Efficiency: 95% Regulation: 3% Suppression: Common mode: 130 db; Transverse mode 80 db Isolation transformer: 0.005 pf interwinding capacitance; 2,500 VAC dielectric strength Load regulation: 95% ☐ Remote emergency shut-off Protected against: Overload; Short circuit Status indicators: Lamp ☐ Portable Introduced: 1985 Cost: $345

☐ PLC-3108; PLC-3116
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 1, 2 kva; 1ph; Sine wave Efficiency: 95% Regulation: 3% Suppression: Common mode: 130 db; Transverse mode 80 db Isolation transformer: 0.005 pf interwinding capacitance; 2,500 VAC dielectric strength Load regulation: 95% Protected against: Overload; Short circuit Status indicators: Lamp ☐ Portable Introduced: 1985 Cost: $515; $660

☐ PLC-3202
AC Input: 230V; 1 ph; 50Hz; 60Hz AC Output: 230V; 0.5 kva; 1ph; Sine wave Efficiency: 95% Regulation: 3% Suppression: Common mode: 130 db; Transverse mode 80 db Isolation transformer: 0.005 pf interwinding capacitance; 2,500 VAC dielectric strength Load regulation: 95% Protected against: Overload; Short circuit Status indicators: Lamp ☐ Portable Introduced: 1985 Cost: $405

☐ PLC-3204; PLC-3208
AC Input: 230V; 1 ph; 50Hz; 60Hz AC Output: 230V; 1, 2 kva; 1ph; Sine wave Efficiency: 95% Regulation: 3% Suppression: Common mode: 130 db; Transverse mode 80 db Isolation transformer: 0.005 pf interwinding capacitance; 2,500 VAC dielectric strength Load regulation: 95% Protected against: Overload; Short circuit Status indicators: Lamp ☐ Portable Introduced: 1985 Cost: $595; $760

ECOS ELECTRONICS CORP.

☐ SENTRE NC Series
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 0.25-1.8 kva; 1ph Efficiency: 95% Regulation: (±)3% Suppression: Common mode: 50 db; Transverse mode 50 db Harmonics 99% Response time: 5 ns Protected against: Overload

ELECTROGUARD
(division of Acme Electric Corp.)

☐ True Power (0.25-0.5 Kva)
AC Input: 95-130V; 1 ph; 60Hz AC Output: 120V; 0.25, 0.5 kva; 1ph Efficiency: 90% Regulation: (±)3% Cost: $285; $397

☐ True Power (0.75-2 Kva)
AC Input: 95-130V; 1 ph; 400Hz AC Output: 120V; 0.75, 1, 2 kva; 1ph Efficiency: 90% Regulation: (±)3% Cost: $501-$976

ELECTRONIC PROTECTION DEVICES, INC. (EPD)
(subsidiary of ALS Corp.)

☐ LEMON/ECI
AC Input: 125V; 1 ph; 60Hz AC Output: 125V; 1.875 kva; 1ph; Sine wave Method of regulation: Electronic Response time: 5 ns Protected against: Overvoltage Status indicators: LED ☐ Portable Introduced: 1981 Cost: $40

☐ LIME/ECII
AC Input: 125V; 1 ph; 60Hz AC Output: 125V; 1.875 kva; 1ph; Sine wave Method of regulation: Electronic Response time: 5 ns Protected against: Overvoltage; Short circuit Status indicators: LED ☐ Portable Introduced: 1981 Cost: $60

☐ ORANGE/ECV
AC Input: 125V; 1 ph; 60Hz AC Output: 125V; 1.875 kva; 1ph; Sine wave Method of regulation: Electronic Suppression: Common mode: 5-37 db; Transverse mode 5-37 db Response time: 5 ns Protected against: Overvoltage Status indicators: LED ☐ Portable Introduced: 1981 Cost: $80

☐ PEACH/ECIV
AC Input: 125V; 1 ph; 60Hz AC Output: 125V; 1.875 kva; 1ph; Sine wave Method of regulation: Electronic Suppression: Common mode: 5-37 db; Transverse mode 5-37 db Response time: 5 ns Protected against: Overvoltage Status indicators: LED ☐ Portable Introduced: 1981 Cost: $50

ELECTRONIC SPECIALISTS, INC.

☐ KLR-250A; KLR-500A
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 0.25; 0.5 kva; 1ph; Sine wave Efficiency: 85% Regulation: 4% Method of regulation: Ferroresonant Suppression: Common mode: 50 db; Transverse mode 50 db Harmonics 97% Response time: 8 ms Isolation transformer: 5 pf interwinding capacitance; 2,500 VAC dielectric strength Load regulation: 98% ☐ Isolation transformer Protected against: Overvoltage; Overload; Short circuit Status indicators: Lamp ☐ Portable Units sold: 2,500 since 1983 Cost: $430

ELGAR CORP.

☐ PLC 1000; PLC 1500; PLC 1501
AC Input: 90-135V; 1 ph; 60Hz AC Output: 117V; 1, 1.5, 1.8 kva; 1ph; Sine wave Efficiency: 80% Regulation: (±)2.5% Method of regulation: Ferroresonant Suppression: Common mode: 60 db; Transverse mode 60 db Harmonics 95% Isolation transformer: 3 pf interwinding capacitance ☐ Isolation transformer Protected against: Overvoltage; Overload; Short circuit ☐ Portable Units sold: 5,000 since 1982 Cost: $680; $890

☐ PLC 125; PLC 250; PLC 500
AC Input: 90-135V; 1 ph; 60Hz AC Output: 117V; 0.125, 0.25, 0.5 kva; 1ph; Sine wave Efficiency: 80% Regulation: (±)2.5% Method of regulation: Ferroresonant Suppression: Common mode: 60 db; Transverse mode 60 db Harmonics 95% Isolation transformer: 3 pf interwinding capacitance ☐ Isolation transformer Protected against: Overvoltage; Overload; Short circuit ☐ Portable Units sold: 5,000 since 1982 Cost: $300 (PLC 125); $350 (PLC 250); $425 (PLC 500)

HITRAN CORP.
Power Systems Division

☐ SFR Series AA0644
AC Input: 120V, 208V, 240V, 480V; 1 ph; 60Hz AC Output: 120/240V; 0.5 kva; 1ph; Sine wave Efficiency: 90% Regulation: (±)1% Method of regulation: Ferroresonant Suppression: Common mode: 120 db; Transverse mode 60 db Harmonics 95% Response time: 50 ms Isolation transformer: 0.005 pf interwinding capacitance; 4,000 VAC dielectric strength Load regulation: 96% Protected against: Overvoltage; Overload; Short circuit Status indicators: Voltmeter; Ammeter; Lamp Units sold: 20 since 1981 Cost: $404

☐ SFR Series AB1191
AC Input: 120V, 208V, 240V, 480V; 1 ph; 60Hz AC Output: 120/240V; 1 kva; 1ph; Sine wave Efficiency: 90% Regulation: (±)1% Method of regulation: Ferroresonant Suppression: Common mode: 120 db; Transverse mode 60 db Harmonics 95% Response time: 50 ms Isolation transformer: 0.005 pf interwinding capacitance; 4,000 VAC dielectric strength Load regulation: 96% Protected against: Overvoltage; Overload; Short circuit Status indicators: Voltmeter; Ammeter; Lamp Units sold: 20 since 1981 Cost: $502

☐ SFR Series AB1192
AC Input: 120V, 208V, 240V, 480V; 1 ph; 60Hz AC Output: 120/240V; 2 kva; 1ph; Sine wave Efficiency: 90% Regulation: (±)1% Method of regulation: Ferroresonant Suppression: Common mode: 120 db; Transverse mode 60 db Harmonics 95% Response time: 50 ms Isolation transformer: 0.005 pf interwinding capacitance; 4,000 VAC dielectric strength Load regulation: 96% Protected against: Overvoltage; Overload; Short circuit Status indicators: Voltmeter; Ammeter; Lamp Units sold: 200 since 1981 Cost: $685

INTERNATIONAL POWER MACHINES CORP.

☐ Power Screen P10/112
AC Input: 120V; 1 ph; 50Hz; 60Hz AC Output: 120V; 1.2 kva; 1ph; Sine wave Efficiency: 99% Regulation: 10% Method of regulation: Electronic Suppression: Common mode: 60-90 db from 2 kHz-100 MHz; Transverse mode 60-90 db from 2 kHz-100 MHz Response time: 5 ns Protected against: Overvoltage; Overload; Short circuit ☐ Portable Introduced: 1984 Cost: $363

ISOREG CORP.

☐ Single-phase Conditioner (0.12-0.37 Kva)
AC Input: 120V, 208V, 220V; 1 ph; 60Hz AC Output: 120V, 220V; 0.12, 0.25, 0.37 kva; 1ph Efficiency: 80-85%

☐ Single-phase Conditioner (0.75-1.2 Kva)
AC Input: 120V, 208V, 220V, 240V; 1 ph; 60Hz AC Output: 120V, 220V, 240V; 0.75, 1.2 kva; 1ph Efficiency: 80-85%

KALGLO ELECTRONICS CO., INC.

☐ Spike-Spiker Series
AC Input: 120V; 1 ph; 3ph wye; 3ph delta; 60Hz; 50Hz AC Output: 120V; 1.8, 3.6 kva; 1ph; 3ph wye; 3ph delta; Sine wave Efficiency: 99.9% Method of regulation: Electronic Suppression: Common mode: 46 db at 10 MHz; Transverse mode 60 db at 10 MHz Response time: 1 ps; 5 ns Protected against: Overvoltage; Overload Status indicators: Lamp ☐ Portable Units sold: 25,000 since 1979 Cost: $30-$117

KENSINGTON MICROWARE, LTD.

☐ Masterpiece
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 1.5 kva; 1ph Status indicators: LED ☐ Portable Cost: $150

☐ Masterpiece Plus
AC Input: 120V; 1 ph; 60Hz AC Output: 120V; 1.5 kva; 1ph Status indicators: LED ☐ Portable Cost: $180

LAKONTEK, INC.

☐ Model 9001
AC Input: 115V; 1 ph; 60Hz AC Output: 115V; 0.5 kva; 1ph; Sine wave Suppression: Common mode: 50 db; Transverse mode 50 db Response time: 50 ns Protected against: Overvoltage; Overload; Short circuit ☐ Portable Introduced: 1983 Cost: $200

☐ Model 9002
AC Input: 115V; 1 ph; 60Hz AC Output: 115V; 1.5 kva; 1ph; Sine wave Suppression: Common mode: 50 db; Transverse mode 50 db Response time: 50 ns Protected against: Overvoltage; Overload; Short circuit ☐ Portable Introduced: 1983 Cost: $270

☐ Model 9021
AC Input: 95-135V; 1 ph; 60Hz **AC Output:** 112-119V; 0.5 kva; 1ph; Sine wave **Efficiency:** 95% **Regulation:** (±)3% **Method of regulation:** Electronic **Suppression:** Common mode: 50 db; Transverse mode 50 db **Response time:** 50 ns **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1983 **Cost:** $450

☐ Model 9022
AC Input: 95-135V; 1 ph; 60Hz **AC Output:** 112-119V; 1.5 kva; 1ph; Sine wave **Efficiency:** 95% **Regulation:** (±)3% **Method of regulation:** Electronic **Suppression:** Common mode: 50 db; Transverse mode 50 db **Response time:** 50 ns **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1983 **Cost:** $700

MCG ELECTRONICS, INC.

☐ P210/300
AC Input: 120V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120V; 1.2 kva; 1ph; Sine wave **Efficiency:** 99% **Response time:** 1 ns **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Cost:** $137

MERRIMACK MAGNETICS CORP.
(subsidiary of HCC Industries)

☐ PG-151MJ-0092
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 0.15 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)5% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** 3 pf interwinding capacitance; 1,500 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1985 **Cost:** $145

☐ PG-301MJ-0082
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 0.3 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** 3 pf interwinding capacitance; 1,500 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1985 **Cost:** $195

☐ P6-251MG-0040; P6-501MG-0041
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 0.25, 0.5 kva; 1ph; Sine wave **Efficiency:** 92% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** 3 pf interwinding capacitance; 1,500 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Introduced:** 1983 **Cost:** $310-$544

☐ P6-751MG-0042; P6-102MG-0043; P6-152MG-0044; P6-202MG-0045
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 0.75, 1, 1.5, 2 kva; 1ph; Sine wave **Efficiency:** 92% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** 3 pf interwinding capacitance; 1,500 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Introduced:** 1983 **Cost:** $544-$1,061

MICRON INDUSTRIES CORP.

☐ CVCN075K15P-CVCN500K15P
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.075, 0.15, 0.25, 0.5 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** 3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 25 ms **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1970 **Cost:** $176-$360

☐ CVCN120KB15W-CVCN500KB1519W
AC Input: 95-130V/190-260V; 1 ph; 60Hz **AC Output:** 120V, 120/240V; 0.12, 0.15, 0.25, 0.5 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** 3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 25 ms **Protected against:** Overvoltage; Overload; Short circuit **Introduced:** 1970 **Cost:** $179-$341

☐ CVCN500BU1519W
AC Input: 190-260V/380-520V; 1 ph; 60Hz **AC Output:** 120/240V; 0.5 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** 3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 25 ms **Protected against:** Overvoltage; Overload; Short circuit **Introduced:** 1970 **Cost:** $341

☐ CVCN750BU1519W-CVCN2K0BU1519W
AC Input: 190-260V/380-520V; 1 ph; 60Hz **AC Output:** 120/240V; 0.75, 1, 1.5, 2 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** 3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 25 ms **Protected against:** Overvoltage; Overload; Short circuit **Introduced:** 1970 **Cost:** $434-$891

☐ CVCN750KB1519W-CVCN2K0KB1519W
AC Input: 95-130V/190-260V; 1 ph; 60Hz **AC Output:** 120/240V; 0.75, 1, 1.5, 2 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** 3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 25 ms **Protected against:** Overvoltage; Overload; Short circuit **Introduced:** 1970 **Cost:** $434-$891

☐ CVCN750K15P-CVCN2K015P
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.75, 1, 1.5, 2 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** 3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 25 ms **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1970 **Cost:** $459-$907

MODERN POWER TECHNOLOGY, INC.

☐ MPR Series-Tap Switching (1-2 Kva)
AC Input: 120V, 208V, 220V, 240V, 380V, 415V, 480V, 600V; 1 ph; 50Hz; 60Hz **AC Output:** 120V, 120/240V, 220V, 240V; 1, 1.5, 2 kva; 1ph; Sine wave **Cost:** $822-$1,050

ONEAC CORP.

☐ CM1102; CM1103; CM1105; CM1107 (Micromate)
AC Input: 120V; 1 ph; 50Hz; 60Hz **AC Output:** 120V; 0.2, 0.4, 0.5, 0.75 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** 50% **Response time:** 5 ns; 1,240 VAC dielectric strength **Load regulation:** 97% ☐ Remote emergency shut-off **Protected against:** Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 27,000 since 1984 **Cost:** $254-$509

☐ CS1110 thru CS1120
AC Input: 120V; 1 ph; 50Hz; 60Hz **AC Output:** 120V; 1-1.9 kva; 1ph; Sine wave **Efficiency:** 95% **Response time:** 5 ns; 1,240 VAC dielectric strength **Load regulation:** 98% ☐ Individual circuit breakers on output lines **Protected against:** Short circuit ☐ Portable **Units sold:** 40,000 since 1981 **Cost:** $935 (CS1110); $1,663 (CS1120)

PARA SYSTEMS, INC.

☐ CP 1200
AC Input: 115-120V; 1 ph; 60Hz **AC Output:** 120V; 1.2 kva; 1ph; Sine wave **Efficiency:** 99%; Transverse mode 20-138 db **Response time:** 5 ps; 1,000 VAC dielectric strength ☐ Input circuit breaker **Protected against:** Overvoltage; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 10,000 since 1984 **Cost:** $50

PERMA POWER ELECTRONICS, INC.

☐ Extended Life Surge Suppressor
AC Input: 117V; 1 ph; 50Hz; 60Hz **AC Output:** 117V; 1.85 kva; 1ph; Sine wave **Suppression:** Common mode: 20 db at 2-100 MHz; Transverse mode 20 db at 2-100 MHz **Response time:** 5 ps **Protected against:** Overload; Short circuit **Introduced:** 1982 **Cost:** $49-$80

☐ Perma Power Surge Suppressors
AC Input: 117V; 1 ph; 50Hz; 60Hz **AC Output:** 117V; 1.85 kva; 1ph; Sine wave **Response time:** 5 ns **Protected against:** Overload; Short circuit ☐ Portable **Introduced:** 1982 **Cost:** $35-$80

POWER CONTROL, INC.

☐ IL-120-201; IL-120-301
AC Input: 120V; 1 ph; 50Hz; 60Hz **AC Output:** 120V; 2.4, 3.6 kva; 1ph **Cost:** $965; $1,165

☐ uPC-600
AC Input: 120V; 1 ph; 50Hz; 60Hz **AC Output:** 120V; 0.6 kva; 1ph; Sine wave **Efficiency:** 99% **Cost:** $265

POWER DISTRIBUTION, INC.

☐ Micro XP (250-500 VA)
AC Input: 120V, 90-138V; 1 ph; 57-63Hz **AC Output:** 120V, 120/240V; 0.25-0.5 kva; 1ph **Efficiency:** 95% **Regulation:** (±)6% **Suppression:** Common mode: 140 db; Transverse mode 60 db **Harmonics** 99% **Isolation transformer:** 0.001 pf interwinding capacitance **Protected against:** Overvoltage; Overload **Status indicators:** Lamp

☐ Micro XP (600-1,000 VA)
AC Input: 120V, 90-138V; 1 ph; 57-63Hz **AC Output:** 120V, 120/240V; 0.6, 1 kva; 1ph **Efficiency:** 95% **Regulation:** (±)6% **Suppression:** Common mode: 140 db; Transverse mode 60 db **Harmonics** 99% **Isolation transformer:** 0.001 pf interwinding capacitance **Protected against:** Overvoltage; Overload **Status indicators:** Lamp

☐ Mini XP (2 Kva)
AC Input: 240V, 180-276V, 165-249V; 1 ph; 57-63Hz **AC Output:** 120/240V, 208V; 2 kva; 1ph **Efficiency:** 95% **Regulation:** (±)6% **Suppression:** Common mode: 140 db; Transverse mode 60 db **Harmonics** 99% **Isolation transformer:** 0.001 pf interwinding capacitance **Protected against:** Overvoltage; Overload **Status indicators:** Lamp

POWER INTEGRITY CORP.

☐ ZTA-120; ZTA-120F; ZTAR
AC Input: 120V; 1 ph; 50Hz; 60Hz **AC Output:** 120V; 1.44 kva; 1ph; Sine wave **Suppression:** Common mode: 20 db at 15 MHz to 60 db at 10 MHz; Transverse mode 30 db at 15 MHz to 60 db at 10 MHz **Response time:** 1 ps **Protected against:** Overvoltage; Overload; Short circuit **Introduced:** 1981 **Cost:** $32 (ZTA-120); $33 (ZTA-120F); $60 (ZTAR)

☐ ZTAH; ZTAP; ZTAS
AC Input: 120V; 1 ph; 50Hz; 60Hz **AC Output:** 120V; 1.8 kva; 1ph; Sine wave **Suppression:** Common mode: 20 db at 15 MHz to 60 db at 10 MHz; Transverse mode 30 db at 15 MHz to 60 db at 10 MHz **Response time:** 1 ps **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Introduced:** 1981 **Cost:** $145 (ZTAP, ZTAS); $83 (ZTAH)

POWER-MATIC, INC.

☐ Model LC-3150
AC Input: 110V, 220V; 1 ph; 45-70Hz **AC Output:** 100-120V, 200-240V; 1 kva; 1ph; Sine wave **Efficiency:** 99% **Regulation:** 3.3%, 6% **Method of regulation:** Electronic **Suppression:** Common mode: 40 db; Transverse mode 140 db **Harmonics** 99% **Response time:** ½ cycle **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Units sold:** 3,250 since 1974 **Cost:** $620-$680

☐ Model LC-503
AC Input: 110V, 220V; 1 ph; 45-70Hz **AC Output:** 110-120V, 200-240V; 0.5 kva; 1ph; Sine wave **Efficiency:** 99% **Regulation:** 3.3%, 6% **Method of regulation:** Electronic **Suppression:** Common mode: 40 db; Transverse mode 140 db **Harmonics** 99% **Response time:** ½ cycle **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Units sold:** 4,000 since 1974 **Cost:** $510

☐ Varitron
AC Input: 90-140V; 1 ph; 50Hz; 60Hz **AC Output:** 110V, 220V; 4.5 kva; 1ph; Sine wave **Efficiency:** 97% **Regulation:** 1%, 0.1% **Method of regulation:** Electronic; Energy dispenser **Suppression:** Common mode: 60 db; Transverse mode 140 db **Harmonics** 99% **Response time:** instantaneous **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Voltmeter; Ammeter ☐ Portable **Units sold:** 230 since 1984 **Cost:** $690

PULIZZI ENGINEERING, INC.

☐ LPC115-4
AC Input: 125V, 240V; 1 ph; 60Hz; 50Hz **AC Output:** 125V, 240V; 1.5, 2.8 kva; 1ph; Sine wave **Efficiency:** 100% **Suppression:** Common mode: 55 db at 20 MHz; Transverse mode 55 db at 20 MHz **Response time:** 50 ns **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Introduced:** 1983 **Cost:** $150

☐ PC115
AC Input: 125V, 240V; 1 ph; 50Hz; 60Hz **AC Output:** 125V, 240V; 1.5, 2.8 kva; 1ph; Sine wave **Efficiency:** 100% **Suppression:** Common mode: 55 db at 20 MHz; Transverse mode 55 db at 20 MHz **Response time:** 50 ns **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp; Local/ remote switch **Introduced:** 1982 **Cost:** $292-$372

☐ TPC115-8
AC Input: 125V, 240V; 1 ph; 50Hz; 60Hz **AC Output:** 125V, 240V; 1.5, 2.8 kva; 1ph; Sine wave **Efficiency:** 100% **Suppression:** Common mode: 55 db at 20 MHz; Transverse mode 55 db at 20 MHz **Response time:** 50 ns **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp **Introduced:** 1983 **Cost:** $148-$249

RTE DELTEC CORP.

☐ MPC1260
AC Input: 86-135V; 1 ph; 60Hz; 50Hz **AC Output:** 120V; 1 kva; 1ph; Sine wave **Efficiency:** 94% **Regulation:** (-)9 to (+)5% **Method of regulation:** Electronic **Suppression:** Common mode: 140 db; Transverse mode 60 db **Harmonics** 1% **Response time:** 1 cycle **Isolation transformer:** 0.001 pf interwinding capacitance; 4,000 VAC dielectric strength ☐ Input circuit breaker **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 460 since 1982 **Cost:** $625

☐ MPC2060
AC Input: 86-135V; 1 ph; 60Hz; 50Hz **AC Output:** 120V, 220V, 240V; 2 kva; 1ph; Sine wave **Efficiency:** 94% **Regulation:** (-)9 to (+)5% **Method of regulation:** Electronic **Suppression:** Common mode: 140 db; Transverse mode 55 db **Response time:** 1 cycle **Isolation transformer:** 0.001 pf interwinding capacitance; 4,000 VAC dielectric strength **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 375 since 1982 **Cost:** $1,060

☐ MPC560
AC Input: 86-135V; 1 ph; 60Hz **AC Output:** 120V; 0.5 kva; 1ph; Sine wave **Efficiency:** 94% **Regulation:** (-)9 to (+)5% **Method of regulation:** Electronic **Suppression:** Common mode: 140 db; Transverse mode 60 db **Harmonics** 1% **Response time:** 1 cycle **Isolation transformer:** 0.001 pf interwinding capacitance; 4,000 VAC dielectric strength ☐ Input circuit breaker **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 675 since 1982 **Cost:** $495

☐ OPC Series
AC Input: 90-135V; 1 ph; 60Hz **AC Output:** 120V; 0.5-2 kva; 1ph; Sine wave **Efficiency:** 94% **Regulation:** (-)9 to (+)5% **Harmonics** 1% **Response time:** 1 cycle **Protected against:** Overvoltage; Overload **Introduced:** 1985 **Cost:** $445

SHAPE MAGNETRONICS, INC.

☐ Line Tamer Ferroresonant Transformer (0.03-0.5 Kva)
AC Input: 120V, 120/240V, 120/208/240V, 240/280V, 110V, 110/220V; 1 ph; 50Hz; 60Hz **AC Output:** 120V, 120/240V, 480V, 208/120V, 110/220V, 120/208/240V; 0.03-0.5 kva; 1ph; Sine wave **Efficiency:** 92% **Regulation:** (±)3% **Method of regulation:** Ferroresonant constant voltage transformer **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 95-97% **Response time:** instantaneous **Isolation transformer:** 2 pf interwinding capacitance **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1979 **Cost:** $118 (0.03 Kva); $1,120 (2 Kva)

☐ Line Tamer Ferroresonant Transformer (0.75-2 Kva)
AC Input: 120V, 120/240V, 120/208/240V, 240/280V, 110V, 110/220V; 1 ph; 50Hz; 60Hz **AC Output:** 120V, 120/240V, 480V, 208/120V, 110/220V, 120/208/240V; 0.75-2 kva; 1ph; Sine wave **Efficiency:** 92% **Regulation:** (±)3% **Method of regulation:** Ferroresonant constant voltage transformer **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 95-97% **Response time:** instantaneous **Isolation transformer:** 2 pf interwinding capacitance **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Introduced:** 1979

☐ Line Tamer Ferroresonant Transformer (2.5-10 Kva)
AC Input: 120V, 120/240V, 120/208/240V, 240/280V, 110V, 110/220V; 1 ph; 50Hz; 60Hz **AC Output:** 120V, 120/240V, 480V, 208/120V, 110/220V, 120/208/240V; 2.5-10 kva; 1ph; Sine wave **Efficiency:** 92% **Regulation:** (±)3% **Method of regulation:** Ferroresonant constant voltage transformer **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 95-97% **Response time:** instantaneous **Isolation transformer:** 2 pf interwinding capacitance **Protected against:** Overvoltage; Overload; Short circuit **Introduced:** 1972

☐ PC Line Tamer
AC Input: 100-130V; 1 ph; 60Hz **AC Output:** 120V; 0.15, 0.3, 0.45, 0.6 kva **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Protected against:** Short circuit ☐ Portable

SOLA ELECTRIC
(unit of General Signal)

☐ Model 63-13-070 thru 63-13-150
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.07-0.5 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** less than 3 pf interwinding capacitance **Load regulation:** 95% **Protected against:** Overload; Short circuit ☐ Portable **Introduced:** 1974 **Cost:** $150-$370

☐ Model 63-13-175; 63-13-210; 63-13-220
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.75-2.0 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** less than 3 pf interwinding capacitance **Load regulation:** 95% **Protected against:** Overload; Short circuit ☐ Portable **Introduced:** 1974 **Cost:** $500-$1,000

☐ Model 63-23-112-4 thru 63-23-150-8
AC Input: 95-130/175-235/190-260/380-520V; 1 ph; 60Hz **AC Output:** 120/208/240V; 0.12, 0.25, 0.5 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** less than 3 pf interwinding capacitance; 1,-500 VAC dielectric strength **Load regulation:** 95% **Protected against:** Overload; Short circuit **Introduced:** 1978 **Cost:** $175-$350

☐ Model 63-23-175-8 thru 63-23-220-8
AC Input: 95-130/175-235/190-260/380-520V; 1 ph; 60Hz **AC Output:** 120/208/240V; 0.75, 1, 1.5, 2 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** less than 3 pf interwinding capacitance; 1,-500 VAC dielectric strength **Load regulation:** 95% **Protected against:** Overload; Short circuit **Introduced:** 1978 **Cost:** $450-$900

☐ Model 93-13-150
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.5 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** less than 3 pf interwinding capacitance; 1,500 VAC dielectric strength **Load regulation:** 95% **Protected against:** Overload; Short circuit **Status indicators:** Voltmeter; Ammeter ☐ Portable **Introduced:** 1984 **Cost:** $719; $880; $1,406

☐ Model 93-13-210; 93-13-220
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 1, 2 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** instantaneous **Isolation transformer:** less than 3 pf interwinding capacitance; 1,500 VAC dielectric strength **Load regulation:** 95% **Protected against:** Overload; Short circuit **Status indicators:** Voltmeter; Ammeter ☐ Portable **Introduced:** 1984 **Cost:** $900-$1,400

SOLIDSTATE CONTROLS, INC.

☐ Power Line Conditioner (1 Kva)
AC Input: 96-132V; 1 ph; 60Hz **AC Output:** 120V; 1 kva; 1ph; Sine wave **Efficiency:** 95% **Regulation:** (+)4%; (-)6% **Method of regulation:** Electronic **Suppression:** Common mode: 80 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 8 ms **Isolation transformer:** 0.1-0.01 pf interwinding capacitance; 2,-000 VAC dielectric strength **Load regulation:** 97% ☐ Individual circuit breakers on output lines **Protected against:** Overload; Short circuit **Status indicators:** Lamp **Introduced:** 1984 **Cost:** $580-$600

SUPERIOR ELECTRIC CO.

☐ CR7101PCU
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.14 kva; 1ph; Sine wave **Efficiency:** 75% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 40 db **Harmonics** 97% **Response time:** 25 ms **Isolation transformer:** 3 pf interwinding capacitance; 2,000 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overload; Short circuit ☐ Portable **Introduced:** 1979 **Cost:** $210

☐ CR7102PCU
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.25 kva; 1ph; Sine wave **Efficiency:** 85% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 40 db **Harmonics** 97% **Response time:** 25 ms **Isolation transformer:** 3 pf interwinding capacitance; 2,000 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overload; Short circuit ☐ Portable **Introduced:** 1979 **Cost:** $250

☐ CR7105PCU
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.5 kva; 1ph; Sine wave **Efficiency:** 85% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 40 db **Harmonics** 97% **Response time:** 25 ms **Isolation transformer:** 3 pf interwinding capacitance; 2,000 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overload; Short circuit ☐ Portable **Introduced:** 1979 **Cost:** $369

☐ CR7110PCU
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 1 kva; 1ph; Sine wave **Efficiency:** 85% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 40 db **Harmonics** 97% **Response time:** 25 ms **Isolation transformer:** 3 pf interwinding capacitance; 2,000 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overload; Short circuit ☐ Portable **Introduced:** 1979 **Cost:** $548

☐ CR7120PCU
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 2 kva; 1ph; Sine wave **Efficiency:** 85% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 40 db **Harmonics** 97% **Response time:** 25 ms **Isolation transformer:** 3 pf interwinding capacitance; 2,000 VAC dielectric strength **Load regulation:** 97% **Protected against:** Overload; Short circuit ☐ Portable **Introduced:** 1979 **Cost:** $934

SURGEONICS, LTD.

☐ Power Sentry 2
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 1.8 kva; 1ph; Sine wave **Method of regulation:** Electronic **Suppression:** Common mode: 14 db at 150 kHz-30 MHz; Transverse mode 10 db at 50 kHz to 50 db at 50 MHz **Response time:** 50 ps **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 10,000 since 1980 **Cost:** $50

☐ Power Sentry 4
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 1.8 kva; 1ph; Sine wave **Suppression:** Common mode: 14 db at 150 kHz-30 MHz **Response time:** 60 ps **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Units sold:** 3,000 since 1982 **Cost:** $70

☐ TL 700
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 1.8 kva; 1ph; Sine wave **Response time:** 60 ps **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp **Units sold:** 500 since 1975 **Cost:** $220

TELEDYNE BIG BEAM

☐ Power Dyne I (0.5 Kva)
AC Input: 120V, 208V, 240V, 480V; 1 ph; 60Hz **AC Output:** 120V, 208V, 240V; 0.5 kva; 1ph **Efficiency:** 90% **Regulation:** (±)3% **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 25 ms **Isolation transformer:** 0.002 pf interwinding capacitance **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Audible alarm

☐ Power Dyne I (0.75-2 Kva)
AC Input: 120V, 208V, 240V, 480V; 1 ph; 60Hz **AC Output:** 120V, 208V, 240V; 0.75, 2 kva; 1ph **Efficiency:** 90% **Regulation:** (±)3% **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 25 ms **Isolation transformer:** 0.002 pf interwinding capacitance **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Audible alarm

TOPAZ, INC.

☐ Line 2 Power Conditioner (0.4-2 Kva)
AC Input: 170-250V, 87-135V; 1 ph; 50Hz; 60Hz **AC Output:** 220V, 117V; 0.4, 0.5, 1, 1.6, 2 kva; 1ph; Sine wave **Efficiency:** 94% **Regulation:** (±)7% **Suppression:** Common mode: 140 db from 10 Hz to 1 MHz; Transverse mode 55 db at 100 kHz **Harmonics** 98% **Response time:** 1 cycle **Isolation transformer:** 0.001 pf interwinding capacitance; 2,500 VAC dielectric strength **Protected against:** Overload ☐ Portable **Cost:** $495-$1,060

TRIAD-UTRAD

☐ KO-0200 thru K6-1332
AC Input: 120V; 1 ph; 60Hz **AC Output:** 120V; 0.03-2 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)1% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** ½ cycle **Isolation transformer:** 2.5 pf interwinding capacitance; 1,500 VAC dielectric strength **Load regulation:** 96% **Protected against:** Overvoltage; Overload; Short circuit **Introduced:** 1984 **Cost:** $104-$913

☐ K6-0400 thru K6-1300
AC Input: 95-130V; 1 ph; 60Hz **AC Output:** 120V; 0.07-2 kva; 1ph; Sine wave **Efficiency:** 90% **Regulation:** (±)3% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 120 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 3 ms **Isolation transformer:** 2.5 pf interwinding capacitance; 1,500 VAC dielectric strength **Load regulation:** 96% **Protected against:** Overvoltage; Overload; Short circuit ☐ Portable **Units sold:** 1,000 since 1982 **Cost:** $169-$1,075

TRIPP LITE
(division of Trippe Manufacturing Co., Inc.)

☐ IBAR 2-6; IBAR 4-6; IBAR 8-15
AC Input: 117V; 1 ph; 60Hz **AC Output:** 117V; 1.825 kva; 1ph; Sine wave **Efficiency:** 98% **Method of regulation:** Electronic **Suppression:** Common mode: 6 db at 500 kHz; Transverse mode 12 db at 1 MHz **Response time:** 5 ns **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Introduced:** 1980 **Cost:** $60-$110

☐ LS-600; LC-1200; LC-1800
AC Input: 87-127V; 96-126V; 1 ph; 60Hz **AC Output:** 120V; 0.6, 1.2, 1.8 kva; 1ph; Sine wave **Efficiency:** 98% **Method of regulation:** Electromechanical **Suppression:** Common mode: 6 db at 500 kHz; Transverse mode 12 db at 1 MHz **Response time:** ½ cycle **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Lamp ☐ Portable **Introduced:** 1979 **Cost:** $119; $219; $299

DISTRIBUTED POWER SUPPLIES

BEHLMAN ENGINEERING

☐ Model KBT-10 thru KBT-50
AC Input: 115/230V; 1 ph; 48-72Hz **AC Output:** 115/230V; 0.1-0.5 kva; 1ph; Sine wave **Efficiency:** 50-65% **Regulation:** (±)0.2% **Harmonics** 1% **Response time:** 100 ms ☐ Isolation transformer ☐ Input circuit breaker ☐ Individual circuit breakers on output lines ☐ Remote emergency shut-off **Protected against:** Overvoltage; Overload **Status indicators:** Lamp **Introduced:** 1983

☐ Model KBT-75 thru KBT-200
AC Input: 115/230V, 120/208V; 1 ph; 400Hz; 48-72Hz **AC Output:** 115/230V, 120/208V; 0.75-2 kva; 1ph; Sine wave **Efficiency:** 50-65% **Regulation:** (±)0.2% **Harmonics** 1% **Response time:** 100 ms ☐ Isolation transformer ☐ Input circuit breaker ☐ Individual circuit breakers on output lines ☐ Remote emergency shut-off **Protected against:** Overvoltage; Overload **Status indicators:** Lamp **Introduced:** 1983

☐ Model KBT2-10; KBT2-25
AC Input: 115/230V; 1 ph; 400Hz; 48-72Hz **AC Output:** 115/230V; 0.2, 0.5 kva; Sine wave **Efficiency:** 50-65% **Regulation:** (±)0.2% **Harmonics** 1% **Response time:** 100 ms ☐ Isolation transformer ☐ Input circuit breaker ☐ Individual circuit breakers on output lines ☐ Remote emergency shut-off **Protected against:** Overvoltage; Overload **Status indicators:** Lamp **Introduced:** 1983

☐ Model KBT2-35 thru KBT2-100
AC Input: 115/230V, 120/208V; 1 ph; 400Hz; 48-72Hz **AC Output:** 115/230V, 120/208V; 0.7-2 kva; Sine wave **Efficiency:** 50-65% **Regulation:** (±)0.2% **Harmonics** 1% **Response time:** 100 ms ☐ Isolation transformer ☐ Input circuit breaker ☐ Individual circuit breakers on output lines ☐ Remote emergency shut-off **Protected against:** Overvoltage; Overload **Status indicators:** Lamp

☐ STD Series (0.15-0.5 Kva)
AC Input: 115V, 230V, 120/208V, 220/380V, 460V; 1 ph; 3ph wye; 3ph delta; 50Hz; 60Hz; 400Hz **AC Output:** 115V, 230V, 120/208V, 220/380V, 460V; 0.15-0.5 kva; 1ph; 3ph wye; 3ph delta; Sine wave **Efficiency:** 50-65% **Regulation:** (±)0.5% **Harmonics** 0.5% ☐ Isolation transformer ☐ Input circuit breaker ☐ Individual circuit breakers on output lines **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Voltmeter; Lamp **Introduced:** 1968

☐ STD Series (0.75-1.5 Kva)
AC Input: 115V, 230V, 120/208V, 220/380V, 460V; 1 ph; 3ph wye; 3ph delta; 50Hz; 60Hz; 400Hz **AC Output:** 115V, 230V, 120/208V, 220/380V, 460V; 0.75-1.5 kva; 1ph; 3ph wye; 3ph delta; Sine wave **Efficiency:** 50-65% **Regulation:** (±)0.5% **Harmonics** 0.5% ☐ Isolation transformer ☐ Input circuit breaker ☐ Individual circuit breakers on output lines **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Voltmeter; Lamp **Introduced:** 1968

☐ STD Series (2-9 Kva)
AC Input: 115V, 230V, 120/208V, 220/380V, 460V; 1 ph; 3ph wye; 3ph delta; 50Hz; 60Hz; 400Hz **AC Output:** 115V, 230V, 120/208V, 220/380V, 460V; 2-9 kva; 1ph; 3ph wye; 3ph delta; Sine wave **Efficiency:** 50-65% **Regulation:** (±)0.5% **Harmonics** 0.5% ☐ Isolation transformer ☐ Input circuit breaker ☐ Individual circuit breakers on output lines **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Voltmeter; Lamp **Introduced:** 1968

POWER DISTRIBUTION, INC.

☐ Computer Shield Series III (0.25-0.5 Kva)
AC Input: 120V, 208V, 240V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120/240V; 0.25, 0.5 kva; 1ph; Sine wave **Efficiency:** 95% **Regulation:** (±)2% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 140 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 32 ms **Isolation transformer:** 7 pf interwinding capacitance; 1,000 VAC dielectric strength ☐ Input circuit breaker ☐ Individual circuit breakers on output lines **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Voltmeter; Ammeter; Lamp ☐ Portable

☐ Computer Shield Series III (0.75-2 Kva)
AC Input: 120V, 208V, 240V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120V, 240V; 0.75, 1, 2 kva; 1ph; Sine wave **Efficiency:** 95% **Regulation:** (±)2% **Method of regulation:** Ferroresonant **Suppression:** Common mode: 140 db; Transverse mode 60 db **Harmonics** 97% **Response time:** 32 ms **Isolation transformer:** 7 pf interwinding capacitance; 1,000 VAC dielectric strength ☐ Input circuit breaker ☐ Individual circuit breakers on output lines **Protected against:** Overvoltage; Overload; Short circuit **Status indicators:** Voltmeter; Ammeter; Lamp

SL WABER, INC.
(subsidiary of SL Industries, Inc.)

☐ DG-SST
AC Input: 120V; 1 ph; 50Hz; 60Hz **AC Output:** 120V; 1.875 kva; 1ph **Suppression:** Common mode: 10-30 db; Transverse mode 20-40 db; 3,000 VAC dielectric strength ☐ Input circuit breaker **Protected against:** Short circuit **Status indicators:** Lamp ☐ Portable **Introduced:** 1984 **Cost:** $159

☐ DG-10/LG-10; DG-10/LG-20
AC Input: 120V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120V; 1.875 kva; 1ph; Sine wave; 3,000 VAC dielectric strength **Status indicators:** Lamp ☐ Portable **Cost:** $20-$55

☐ DG-115P; DG-115S
AC Input: 120V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120V; 1.875 kva; 1ph; Sine wave; Transverse mode 15-30 db; 3,000 VAC dielectric strength ☐ Input circuit breaker **Protected against:** Short circuit **Status indicators:** Lamp ☐ Portable

☐ DG-315S; DG-315P; DG-315R

AC Input: 120V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120V; 1.875 kva; 1ph; Sine wave **Suppression:** Common mode: 10-30 db; Transverse mode 20-40 db; 3,000 VAC dielectric strength ☐ Input circuit breaker **Protected against:** Short circuit **Status indicators:** Lamp ☐ Portable

☐ LM-1100; LM-1200; LM-2100; LM-2200
AC Input: 120V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120V; 1.875 kva; 1ph; Sine wave; 3,000 VAC dielectric strength ☐ Input circuit breaker **Protected against:** Short circuit **Status indicators:** Lamp ☐ Portable

☐ LM-3100; LM-3200; LM3300
AC Input: 120V; 1 ph; 50Hz; 60Hz; 400Hz **AC Output:** 120V; 1.875 kva; 1ph; Sine wave **Suppression:** Common mode: 10-30 db; Transverse mode 20-40 db; 3,000 VAC dielectric strength ☐ Input circuit breaker **Protected against:** Short circuit **Status indicators:** Lamp ☐ Portable

ACCESSORIES

BAR CODE/MAGNETIC STRIPE READERS

AEDEX CORP.

☐ BCS-150
Hardware required: IBM PC, XT, AT and compatibles **Description:** Expansion board and digital wand reads all five major bar code symbologies; generates codes on graphics printers **Units sold:** 4,000 since 1984 **Cost:** $495-$995

ALLOY COMPUTER PRODUCTS, INC.
SEE AD ON PAGE 129

☐ PC-Card
Hardware required: IBM PC, XT, AT and compatibles **Description:** Standalone or keyboard configuration **Units sold:** 800 since 1984 **Cost:** $395

ATLANTIC COMPUTER PRODUCTS, INC.

☐ Bar Code Reader
Hardware required: IBM PC, XT, AT and compatibles **Description:** Recognizes UPC, EAN, 2 of 5, 3 of 9 and CODABAR; bi-directional scanning; portable

BAR/CODE, INC.

☐ BC Fox/PC
Hardware required: IBM PC, XT, AT **Description:** Recognizes 17 bar codes including Code 3 of 9, Interleaved 2 of 5, Code bar, UPC-A and UPC-E; 3-30 inches per second read speed; bar code wand input **Units sold:** 100 since 1984 **Cost:** $595-$895

☐ BC101
Hardware required: IBM PC; TI; RS-232C **Description:** Code 3 of 9; Interleaved 2 of 5; Codabar; UPC-A; UPC-E **Introduced:** 1983 **Cost:** $795 (includes wand)

☐ BC102
Hardware required: IBM PC; TI; RS-232C **Description:** Code 3 of 9; Interleaved 2 of 5; Codabar; UPC-A; UPC-E **Units sold:** 200 since 1983 **Cost:** $595 (includes wand)

☐ BC103
Hardware required: IBM PC; TI; RS-232C **Description:** Code 3 of 9; Interleaved 2 of 5; Codabar; UPC-A; UPC-E **Units sold:** 150 since 1984 **Cost:** $1,195-$1,395

CAERE CORP.

☐ PCSCANNER II, 245-295
Hardware required: IBM PC and compatibles **Description:** Reads Code 3 of 9, UPC, EAN and Interleaved 2 of 5; requires full expansion slot; program transparency; accepts input from a bar-code pen or hand held laser; optional bar code printing available **Units sold:** 230 since 1985 **Cost:** $506-$556

COMPUTER IDENTICS

☐ Scanstar-PC
Hardware required: IBM PC **Introduced:** 1985 **Cost:** $695 (incl. pen)

DATAFLOW TECHNOLOGIES, INC.

☐ Bar Code Spooler/Converter
Hardware required: IBM PC, XT, AT, jr; Apple **Description:** Prints Code 39 and UPC-A bar code symbologies; functions as conventional spooler; parallel I/O ports, 64K of memory, cable and documentation; optional RS-232C card **Cost:** $750

DEST CORP.

☐ PC Scan
Hardware required: IBM PC **Description:** Character recognition processor and image capturing, scanning 300 dots per inch **Introduced:** 1986

ELECTRONIC INFORMATION TECHNOLOGY, INC.

☐ EIT-PS
Hardware required: IBM PC and compatibles **Description:** Converts typewritten documents, printed matter, pictures, technical drawings and other visual information into electrical files **Units sold:** 5,000 since 1985 **Cost:** $2,495

HAND HELD PRODUCTS, INC.

☐ Micro-Wand II
Hardware required: IBM PC, XT, AT **Description:** 8-bit microprocessor; 32K RAM, 32K ROM; date/time clock; alphanumeric keyboard; reads Code 3 of 9, Codabar and EAN/UPC; battery operated

ICS
(division of Action Instruments)

☐ BCS100/150
Hardware required: IBM PC, XT, AT and compatibles **Description:** Generates bar code graphics on printers; reads five major bar code symbols; connects to PC bus **Introduced:** 1984 **Cost:** $1,125

MAXTRON

☐ XT-15A
Hardware required: IBM PC **Description:** Reads bar density up to 0.19mm; bi-directional scanning **Cost:** $298

NEW WAVE SYSTEMS

☐ CYC-PT; CYC-48; CYC-IB
Hardware required: IBM PC, XT, AT, Portable and compatibles **Description:** Power derived from host computer; operates in-line with keyboard; results from barcode read appear as keystrokes to application program **Units sold:** 700 since 1982 **Cost:** $595

NEWER TECHNOLOGY

☐ Sceptre
Hardware required: IBM PC, XT, AT and compatibles **Description:** Custom programming interface, bar-code wand and cable **Units sold:** 100 **Cost:** $495

PERCON (PERIPHERAL CONNECTIONS, INC.)

☐ Model 303C
Hardware required: RS-232C **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1983 **Cost:** $635

☐ Model 305C
Hardware required: RS-232C **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1983 **Cost:** $744

☐ Model 307C
Hardware required: RS-232C **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1983 **Cost:** $744

☐ Model 309C
Hardware required: RS-232C **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1983 **Cost:** $744

☐ Model 313C
Hardware required: IBM PC, XT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1983 **Cost:** $635

☐ Model 315C
Hardware required: IBM PC, XT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1983 **Cost:** $744

☐ Model 317C
Hardware required: IBM PC, XT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1983 **Cost:** $744

☐ Model 319C
Hardware required: IBM PC, XT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto recognition **Introduced:** 1983 **Cost:** $744

☐ Model 323C
Hardware required: IBM PC AT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1983 **Cost:** $635

☐ Model 325C
Hardware required: IBM PC AT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1984 **Cost:** $744

☐ Model 327C
Hardware required: IBM PC AT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1984 **Cost:** $744

☐ Model 329C
Hardware required: IBM PC AT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1984 **Cost:** $744

☐ Model 343C
Hardware required: AT&T 6300, 6300 Plus; Olivetti; Xerox **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC EAN, UPC E, UPC A, Codabar and Codabar ABC; auto-recognition **Introduced:** 1986 **Cost:** $635

☐ Model 347C
Hardware required: AT&T 6300, 6300 Plus; Olivetti; Xerox 6064, 6065 **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC EAN, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1986 **Cost:** $744

CROSSPOINT SYSTEMS, INC.
1710 Willow Creek Circle
Eugene, OR 97402
(503) 485-4254

Share peripherals among multiple PCs in any combination up to 8, all under automatic software control. See the Crosspoint Systems ad under the heading Local Area Networks for the ultimate solution in data switching.

☐ Model 402A
Hardware required: RS-232C **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC EAN, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1986

☐ Model 412A
Hardware required: IBM PC, XT and compatibles **Description:** Single code decoding of Code 39, Interleaved 2 of 5, UPC/EAN, UPC A, UPC E, Codabar and Codabar ABC; auto-recognition **Introduced:** 1986

SYSCODE, INC.

☐ BarBoard
Hardware required: IBM PC, XT, AT and compatibles **Description:** Uses short slot and communicates directly with PC Bus; generates bar codes on graphics printers; includes software **Cost:** $595

TPS ELECTRONICS

☐ PC-300
Hardware required: IBM PC, AT, jr **Description:** Bar code reader; transparent operation without requiring additional software, port or card slots; connects between keyboard and terminal; emulates keyboard input **Introduced:** 1983 **Cost:** $795

☐ PC-3000
Hardware required: IBM PC, AT, jr **Description:** Magnetic stripe/bar code reader; transparent operation without requiring additional software, port or card slots; connects between keyboard and terminal; emulates keyboard input **Introduced:** 1983 **Cost:** $995

☐ PC-500
Hardware required: IBM PC, AT, jr **Description:** Magnetic stripe reader; transparent operation without requiring additional software, port or card slots; connects between keyboard and terminal; emulates keyboard input **Introduced:** 1983 **Cost:** $695

☐ PC-5000
Hardware required: IBM PC, AT **Description:** Encodes track 1 (alpha-numeric) or track 2 (numeric) of standard magnetic card through RS-232C port; reads magnetic cards using keyboard cable **Introduced:** 1986 **Cost:** $1,295

VIDEX, INC.

☐ Bar Code Reader
Hardware required: Apple II, Macintosh; IBM PC and compatibles **Description:** Portable; built-in clock, 16K RAM and rechargeable battery **Introduced:** 1985 **Cost:** $248

WELCH ALLYN
Industrial Products Division

☐ HBD-100
Hardware required: IBM PC, XT, AT **Description:** Interface boards and industrial grade low resolution visible red scanner; reads Code 3 of 9, CODABAR, Interleaved 2 of 5, UPC and EAN **Cost:** $695

CAMERAS

DIGITAL VISION, INC.

☐ Computereyes
Hardware required: Apple II; IBM PC and compatibles **Description:** Slow-scan device connects between standard video source and user I/O port **Units sold:** 5,000 since 1984 **Cost:** $130-$250

FOCUS GRAPHICS, INC.

☐ VideoSlide 35
Hardware required: IBM PC; Apple **Description:** Connects directly to 9-pin plug on PC Color/Graphics Adaptor; compatible with RS-170 monitors **Units sold:** 1,500 since 1982 **Cost:** $3,-299-$3,899

GENIGRAPHICS CORP.

☐ PS-4000
Hardware required: IBM PC **Description:** Records 35mm slides and 7" X 9" transparencies; 2,048/4,096 line X 4,096 element display resolution

MICRON TECHNOLOGY, INC.
Systems Group

☐ Idetix Digital Imaging System
Hardware required: IBM PC, XT, AT **Description:** MOS sensor-based camera with C Mount lens; 1,024 X 512 resolution **Units sold:** 100 since 1986 **Cost:** $695

☐ MicronEye Bullet
Hardware required: Apple; TRS-80; IBM PC, XT, AT; Commodore 64 **Description:** Applications include: character recognition; signature verification; fingerprint classification; automated visual inspection; surveillance and motion detection; time-lapse motion studies; measuration; telescope tracking system; robot vision; 128 X 256 resolution **Units sold:** 4,500 since 1982 **Cost:** $295

CASH REGISTERS

D.G.M. CORP.

☐ R650 Interface
Hardware required: IBM PC **Software required:** DGM **Description:** Establishes data communications link between Sweda L-45 or L-50 Cash Register System (up to 31 registers) and computer; computer connection via RS-232C plug connector or 103-compatible telephone modem for communication to remote site **Units sold:** 450 since 1983 **Cost:** $1,495

INDIANA CASH DRAWER CO.

☐ EL4/EL5
Hardware required: IBM PC; Apple **Description:** Hardwood cash drawer; lock-on cover **Cost:** $210-$470

☐ SL Series
Hardware required: IBM PC; Apple **Description:** Steel cash drawer; money tray with lock-on cover; mechanical gong **Cost:** $210-$450

RETAIL SOLUTIONS, INC.

☐ The Retailer
Hardware required: IBM PC XT, AT **Description:** Integrated system consists of cash register and application software for inventory control, purchasing and receiving, point-of-sale and mail list with optional AR, AP, GL **Units sold:** 5,000 since 1983 **Cost:** $2,500-$3,250

STANDARD SOFTWARE SYSTEMS, INC.

☐ S-10
Hardware required: IBM PC and compatibles **Software required:** Level A: POS + Inventory; Level B: Retail + POS; Level C: Rental + POS **Description:** Metal cash drawer with RS-232C port; locks, coin trays and adjustable bill compartments **Cost:** $395

DATA ACQUISITION

ACTION INSTRUMENTS

☐ Octapak
Hardware required: IBM PC; Apple II **Description:** Eight-channel data acquisition module; interfaces industrial or lab sensors up to 4,000 feet away; supports combination of voltage, current, thermocouple, RTD and frequency inputs; up to 128 channels on single RS-232C or RS-422 communication line and 500V isolation **Cost:** $495

ANAFAZE, INC.

☐ 8 MCS
Hardware required: IBM PC and compatibles **Software required:** Anasoft **Description:** Combines measurement, calibration, signal conditioning, control, and communications; 28 analog inputs and eight control outputs **Units sold:** 100 since 1983 **Cost:** $995

DATA WORLD PRODUCTS

☐ Sensatrol
Hardware required: RS-232C **Description:** Measurement and control interface for microcomputers **Introduced:** 1985 **Cost:** $425

DIANACHART, INC.

☐ Acquisitor
Hardware required: IBM PC; Apple **Description:** Handles 14-48 input channels ranging from 0.3 microVolts to 10 Volts; auto-ranging **Cost:** $1,995-$2,690

KEITHLEY DAS

☐ Series 500
Hardware required: IBM PC, XT, Portable; Apple II+, IIe; Compaq Portable **Software required:** Soft500 **Description:** Data acquisition in background and simultaneous real-time analysis, control and display in foreground

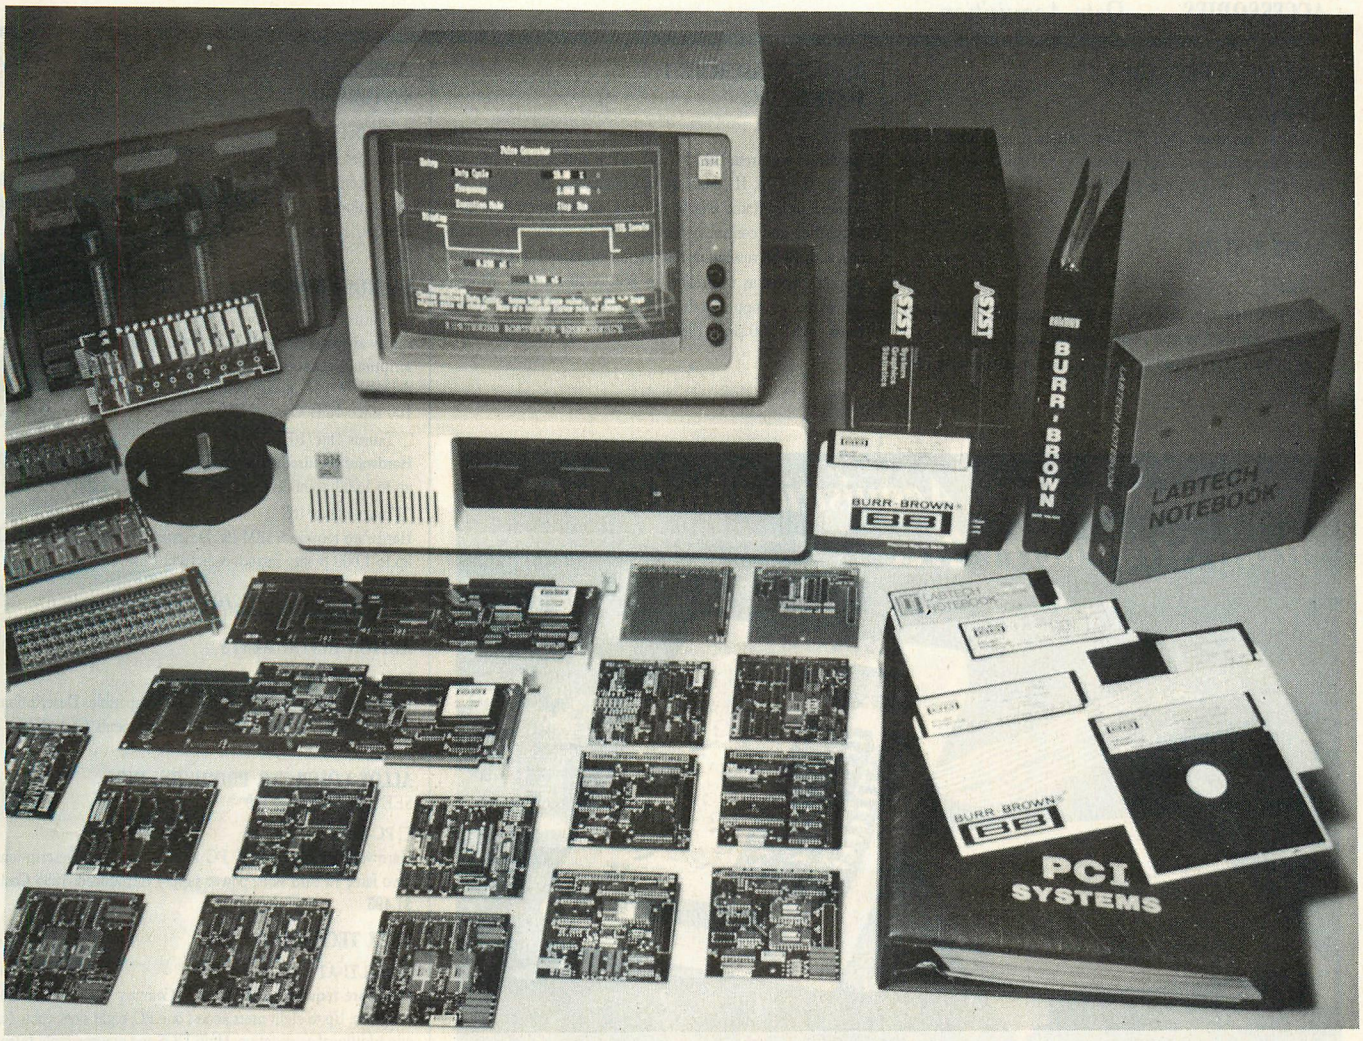
KIRBY LESTER, INC.

☐ Microlink
Hardware required: IBM PC and compatibles **Description:** 40 modules including timers, counters, temperature and RS-232C inputs; analog and digital I/Os **Units sold:** 500 since 1982 **Cost:** $3,500

MICRO R & D, INC.

☐ MW-201
Hardware required: IBM PC; Apple Macintosh **Description:** 16 analog inputs, 14 high current outputs, one analog output; connects to DB25S RS-232C port **Units sold:** 200 since 1985 **Cost:** $365

MODULAR INSTRUMENTS, INC.



☐ Modular Interface
Hardware required: IBM PC, XT, AT **Software required:** BASICA **Description:** Slots accept different I/O modules; connections to modules are made with standard laboratory hardware **Introduced:** 1984 **Cost:** $2,300

MOORE PRODUCTS CO.

☐ MYCRO MIS System
Hardware required: IBM PC XT **Software required:** LOTUS 1-2-3; MYCRO Data Retrieval **Description:** Provides evaluation of plant performance; analyzes current plant operating conditions, e.g., energy information management for boilers, turbines and compressors; analysis of heat exchangers, condensors and other process equipment; chemical stream composition; plant cost summaries of overall production against operating costs

BURR BROWN

Tucson, AZ 85734
(602) 746-7251

PCI-20000 Modular I/O. - Instrumentation for IBM and bus-compatible PC's. Carrier cards plug directly into the PC expansion slots and provide power, communications, mounting mechanisms and optional digital I/O capability. Instrument modules plug into the carrier and perform data acquisition, test measurement and control functions.

MODULAR I/O YOU CAN NEVER OUTGROW.

PCI-20000 GIVES YOU THE MOST COST-EFFECTIVE, EXPANDABLE PC INSTRUMENTATION SYSTEM AVAILABLE TODAY... AND TOMORROW!

The PCI-20000 is an exciting new generation of instrumentation for IBM and bus-compatible Personal Computers. It lets you start small. Add plug-in channels and functions only as requirements grow. Never pay for more I/O than you need.

The key is modularity: Carrier cards plug directly into the PC expansion slots and provide power, communications, mounting mechanisms and optional digital I/O capability. Versatile instrument modules plug into the carrier and perform the data acquisition, test, measurement, and control functions your system requires.

You can choose from fifteen different modules now, with many more planned for the future. Each carrier accepts up to three modules. Several termination panels simplify wiring and bring signals to and from the system.

Extensive software support available, including BASIC, C, Pascal, ASYST, and LabTech Notebook.

We invite you to find out more about this new generation of instrumentation. Call or write today for a descriptive brochure and system specifications.

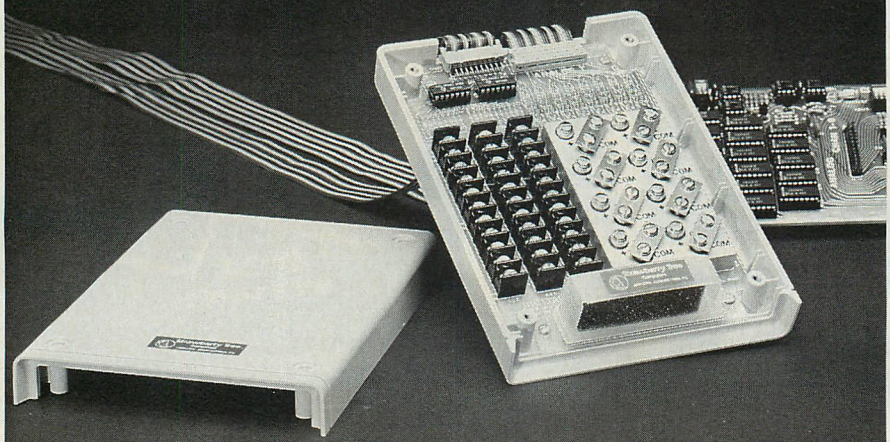
BURR-BROWN®

High Performance PC Data Acquisition Systems

CIRCLE NO. 295 ON READERS SERVICE CARD

NEFF INSTRUMENT CORP.

☐ System 470
Hardware required: IBM PC **Description:** Analog input channels are acquired and digitized at rates to 10,000/second with resolution of 16 bits **Cost:** $5,380



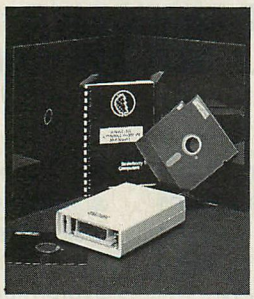
RAPID SYSTEMS

☐ 4X4
Hardware required: IBM PC, XT, AT and compatibles **Description:** Digital oscilloscope peripheral with four channels, each with its own A/D converter; 128K data buffer **Introduced:** 1986 **Cost:** $1,995

REMOTE MEASUREMENT SYSTEMS, INC.

☐ ADC-1
Hardware required: IBM PC, XT, AT, jr and compatibles; Apple II, II+, IIe, III, Macintosh; Commodore 64, Amiga; Osborne; Epson; Radio Shack; RS-232C **Description:** A/D data acquisition and control system offering 16 analog input channels with 13-bit resolution; four digital inputs and six controlled outputs; serves as controller for BSR X-10 series of AC-line carrier remote control modules; A/D sampling at rate of 100/sec **Units sold:** 1,200 since 1983 **Cost:** $449

Solutions in Data Acquisition and Control from Strawberry Tree



FREE HARDWARE?

THAT'S HOW MUCH YOU CAN SAVE WITH OUR *SOFTWARE!* ... The Analog Connection is available in 12- to 16-bit models. These precision Data Acquisition cards (with speeds up to 10KHz) include our *easy to use* software for data logging, real time graphing, control, alarms, average readings and much more.

THE ANALOG CONNECTION FEATURES:

- Easy to set up and use – saves time and money!
- Software that is *designed* for the hardware – gets you going the day you receive it!
- Well written manual for computer novices.
- Supports ASYST without having to buy the ASYST data acquisition module – save $300.
- Menu driven software does data acquisition, real time graphing, control, and much more.
- Sophisticated driver with advanced commands for programmers.
- Example programs in BASIC, Pascal, C, assembly, and ASYST languages.
- Mixed input types on one board.
- Software range selection down to 1 microvolt resolution.
- High accuracy, guaranteed two years.
- Highest thermocouple accuracy.

For more information and a complete product line brochure, call today – and ask about our free trial offer and a demonstration diskette.

Strawberry Tree Computers

1010 West Fremont Avenue
Sunnyvale, California 94087
(408) 736-3083

CIRCLE NO. 280 ON READERS SERVICE CARD

SOPHOS INTEGRATED SYSTEMS, INC.

☐ Sisi-Box
Hardware required: IBM PC, XT, AT **Software required:** MS-DOS; Xenix **Description:** Interfaces via RS-232C or RS-422; applications include household automation/surveillance and industrial/laboratory process control **Introduced:** 1985 **Cost:** $1,250

TAURUS COMPUTER PRODUCTS, INC.

☐ Taurus
Hardware required: IBM PC **Software required:** T-Soft101 **Description:** Data acquisition board providing 16 analog inputs, 16 digital I/O, two analog outputs and four counters **Units sold:** 100 since 1984 **Cost:** $1,200

☐ Taurus One/10
Hardware required: IBM PC **Description:** Digital, analog I/O up to 1,000 points **Introduced:** 1982 **Cost:** $3,200

☐ Taurus One/10S
Hardware required: IBM PC **Description:** Digital, analog I/O up to 1,000 points **Introduced:** 1982 **Cost:** $3,200

EXPANSION CHASSIS

ACTION INSTRUMENTS

☐ Model XCH6
Hardware required: IBM PC, XT and compatibles **Description:** Six card slots; designed for harsh environments **Cost:** $795

ALLOY COMPUTER PRODUCTS, INC.
SEE AD ON PAGE 129

☐ PC-XBUS
Hardware required: IBM PC and compatibles **Description:** Two fans; 12 card slots; power supply **Introduced:** 1986 **Cost:** $1,495

ANEX TECHNOLOGY, INC.

☐ MULTI-AT
Hardware required: IBM PC AT; Compaq Deskpro 286 **Description:** Up to eight users access one PC; eight slots, cable for one additional workstation; Multi-DOS and power supply **Introduced:** 1985 **Cost:** $1,995-$3,765

☐ MULTI-PC
Hardware required: IBM PC, XT, Compaq Deskpro; Zenith PC150 or 160 **Description:** Expands single PC to four-user, multi-tasking system **Introduced:** 1984 **Cost:** $1,695-$2,285

ATLANTIC COMPUTER PRODUCTS, INC.

☐ Flip-top Case
Hardware required: IBM PC **Description:** Heavy gauge steel construction; anti-scratch powdered paint; flip-top access

☐ Slide-in Case
Hardware required: IBM PC **Description:** Heavy gauge steel construction; anti-scratch powdered paint; slide power switch

AVANT INDUSTRIES, INC.

☐ PC/XT/AT Case
Hardware required: IBM PC, XT, AT and compatibles **Description:** Flip-top type with anti-scratch paint **Cost:** $33-$90

DAYNA COMMUNICATIONS

☐ Expansion Chassis
Hardware required: IBM PC and compatibles; Apple Macintosh with MacCharlie **Description:** Six full length slots; power supply **Introduced:** 1986 **Cost:** $1,295

DESERT TECHNOLOGIES
(division of Desert Teksystems Corp.)

☐ EM103
Hardware required: IBM PC and compatibles **Description:** Bus expansion module that includes six full length card slots **Introduced:** 1986 **Cost:** $595

ENGEBRETSEN ENGINEERING

☐ PC-1
Hardware required: IBM PC **Description:** Includes 9" high resolution CRT, power supply, case and interface boards **Cost:** $899

FARADAY ELECTRONICS

☐ Card Cage
Hardware required: IBM PC, AT **Description:** Eight-slot backplane, power supply connector and stand-up card guides **Introduced:** 1986 **Cost:** $445

FORTRON CORP.

☐ FC-630 AT
Hardware required: IBM PC AT and compatibles **Description:** Keylock, key and full set of hardware accessories **Units sold:** 1,500 since 1985 **Cost:** $139

☐ FC-630A-2
Hardware required: IBM PC, XT **Description:** Eight and seven slots; requires additional power supply **Units sold:** 4,000 since 1984 **Cost:** $99

GALLANT INTERNATIONAL CORP.

☐ GIC-CS
Hardware required: IBM PC XT **Description:** Flip-top case with speaker **Cost:** $37

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Expansion Unit for PC
Reviewed Feb 1984 p. 75.
Hardware required: IBM PC; XT **Description:** 10 MB fixed disk drive and eight expansion slots. **Cost:** $3,395 (PC); $2,695 (XT)

ICS
(division of Action Instruments)

☐ XCH6/6531-XC
Hardware required: IBM PC **Description:** Six or ten slots in industrialized housing with integral, fan-cooled power supply **Units sold:** 100 since 1984 **Cost:** $995-$1,399

PRECISION INTERNATIONAL, INC.

☐ CAB-3068
Hardware required: IBM PC XT **Description:** 2 floppy drives; 1 hard disk and back-up tape drive

RACORE COMPUTER PRODUCTS, INC.

☐ Companions
Hardware required: IBM PC jr **Description:** Upgrades PC jr to XT; 10 MB fixed disk, clock/calendar with battery back-up, parallel printer port, memory expansion slot, power booster and graphics mode switch **Introduced:** 1985 **Cost:** $1,295

RELAX TECHNOLOGY

☐ Power Expansion 1
Hardware required: IBM PC, XT and compatibles **Description:** Internal power supply **Units sold:** 2,000 since 1984 **Cost:** $219

☐ Power Expansion 2
Hardware required: IBM PC XT **Description:** Internal power supply **Units sold:** 6,000 since 1984 **Cost:** $269

SIGMA DESIGNS, INC.
SEE AD ON COVER 4

☐ Expansion Chassis
Hardware required: IBM PC, XT, Portable and compatibles **Description:** Eight slots **Units sold:** 15,000 since 1982 **Cost:** $895

SYSGEN, INC. (CA)

☐ Sysgen Disk I/O
Hardware required: IBM PC and compatibles **Description:** Six slot expansion box; 21M disk drive and 85 watt power supply; accommodates second drive **Introduced:** 1985 **Cost:** $1,995

TECMAR, INC.

☐ Expansion Chassis
Reviewed Feb 1984 p. 75.
Hardware required: IBM PC **Description:** Seven usable expansion slots with power supply **Introduced:** 1981 **Cost:** $945

FANS/COOLING DEVICES

AIP

☐ PCool
Hardware required: IBM PC, XT **Description:** Clipmounts on front of XT; controlled by PC's power switch **Units sold:** 1,000 since 1983 **Cost:** $100

PC COOLING SYSTEMS

☐ Silencer
Hardware required: IBM PC, XT **Description:** Replaces IBM's fan and operates with less noise; mounts on rear chassis using existing screw holes **Units sold:** 1,000 since 1985 **Cost:** $80

☐ Turbo-Cool
Hardware required: IBM PC, XT, AT **Description:** Increases cooling capacity for operating temperature reductions of up to 26 degrees; installs, without entering the computer, using existing screw holes on rear chassis **Units sold:** 5,000 since 1985 **Cost:** $60-$80

GRAPHIC TABLETS

ALPS ELECTRIC (USA), INC.
(subsidiary of Alps Electric Co., Ltd.)
SEE AD ON PAGE 169

☐ UDC01
Hardware required: IBM PC and compatibles **Description:** Finger touch or stylus input; menu sheet function selection

PROTECT YOUR COPIES OF PC TECH JOURNAL

Make your collection of PC TECH JOURNAL a handsome addition to your office or home—and protect and organize your copies for easy reference!

PC TECH JOURNAL Magazine Binders and cases are made of durable luxury-look leatherette over quality binder board. Custom designed for TECH JOURNAL every order receives FREE transfer foil to mark dates and volume numbers.

FOR FAST SERVICE CALL TOLL-FREE 1-800-972-5858

MAGAZINE BINDERS

Hold your issues on individual snap-on rods. $8.95 each; 3 for $25.75; 6 for $48.75.

OPEN BACK CASES

Store your copies for individual reference. $7.95 each; 3 for $22.95; 6 for $43.95.

REAL-TIME CLOCK-CALENDAR

dClock™

FOR IBM® PCs AND COMPATIBLES

$59.95

Now there's a simple and inexpensive way to get time and date functions automatically on your computer. **dClock**, from Microsync is a real-time clock-calendar which enters the date and time into your computer system each time the computer is turned on. An internal battery maintains precise time and date functions when the system is shut down.

dClock fits directly onto your system motherboard and does not occupy an expansion slot.

dClock comes with installation software instructions, complete documentation, a 30 day free trial period and a 1 year limited warranty.

To order **dClock** call: **(214) 788-5198**
$59.95 (Please add $2 for shipping and handling.)

MICROSYNC™

P.O. BOX 116302 • Carrollton, Texas 75011

dClock and *MICROSYNC* are Trademarks of MICROSYNC Inc.
IBM is a Registered Trademark of International Business Machines Corp.

CIRCLE NO. 303 ON READERS SERVICE CARD

GENIGRAPHICS CORP.

☐ Digitizer Tablet
Hardware required: IBM PC, XT **Description:** Creates charts, graphs and other visuals for use in business communications

GTCO CORP.

☐ Graphics Analysis Package 1
Hardware required: IBM PC, XT, AT and compatibles **Description:** Used as digitizer planimeter **Introduced:** 1982 **Cost:** $450

PENCEPT, INC.

☐ PENPAD 320
Hardware required: IBM PC; Compaq **Description:** Information, including numeric and special characters, is printed on digitizing tablet and accepted; allows data entry without keyboard **Cost:** $1,495

POLYTEL COMPUTER PRODUCTS CORP.

☐ Keyport 300
Hardware required: IBM PC, XT, AT, jr, PC 3270 and compatibles **Software required:** PC DOS 2.0, 2.1, 3.0, 3.1 **Description:** Touch input pad with 300 programmable keys on an 8.5" X 11" surface; labeled or graphically illustrated overlays allow user to access software functions without knowledge of commands **Units sold:** 3,000 since 1984 **Cost:** $195

PREH ELECTRONICS INDUSTRIES, INC.

☐ Bitmap S12CD Series
Hardware required: RS-232C **Description:** Serial and parallel outputs; supports resolution of up to 4,096 X 4,096 (12 bits) and active area of 125 X 95mm **Cost:** $500

SCIENCE ACCESSORIES CORP.

☐ GP-7
Hardware required: IBM PC **Description:** Two-D digitizer; 5-function menu and 18" X 24" active area **Units sold:** 3,500 since 1981 **Cost:** $995

☐ GP-7 II
Hardware required: IBM PC **Description:** Two-D digitizer; 5-function menu and 20" X 26" active area **Units sold:** 200 since 1985 **Cost:** $1,315

☐ GP-8
Hardware required: IBM PC **Description:** Two-D digitizer; 5' X 6' active area, RS-232C interface, stylus and 5-function menu **Units sold:** 2,500 since 1983 **Cost:** $2,300-$3,175

SONITURE, INC.

☐ Space Pen
Hardware required: Apple II, II+, IIe, IIc; IBM PC, XT, AT, jr; Atari; Commodore; MSX **Description:** Sonic pointer transmits X, Y and Z information to receiver frame attached to monitor and connects to joystick port; monitor frame measures 12" X 2" X 1" with a 48" connecting cord; pointer is 5" in length, 1" diameter with 72" connecting cord **Units sold:** 1,100 since 1985 **Cost:** $150

TECMAR, INC.

☐ Video Van Gogh
Hardware required: IBM PC, AT and compatibles; TI Professional; AT&T 6300 and compatibles **Description:** Digitizes black and white picture in six seconds. Software available to digitize video pictures and display picture to/from disk; 255 X 255 resolution with 256 grey levels **Introduced:** 1982 **Cost:** $345

T.G. PRODUCTS, INC.

☐ Super Sketch II
Hardware required: IBM PC, jr; Apple II **Description:** Stylus control arm and four control buttons to reproduce diagrams, charts and drawings on video screen or printer **Units sold:** 30,000 since 1984 **Cost:** $50

VERSA COMPUTING, INC.

☐ VERSAWRITER
Hardware required: IBM PC, XT; Apple II, IIe, IIc **Description:** Digitizer drawing board/software system for entry of high resolution graphics; accepts 8.5" X 12" original drawings; additional expansion slot not required **Units sold:** 9,000 since 1979 **Cost:** $149-$299

JOYSTICKS

ATLAZ INTERNATIONAL, LTD.

☐ Model 107JS
Hardware required: IBM PC **Description:** All metal, enclosed, commercial/industrial type; ultra linear potentiometers, dual X-Y fine adjustments, two postive feel push buttons; self-centering **Cost:** $26

AVANT INDUSTRIES, INC.

☐ J90; J100
Hardware required: IBM PC, XT, AT and compatibles; Apple **Description:** Spring-centering or free-floating; 360-degree cursor control **Cost:** $14-$16

CH PRODUCTS

☐ MACH II
Hardware required: Apple II, II+, IIe, IIc; IBM PC, jr **Description:** Self-centering feature can be externally disengaged **Cost:** $45

☐ MACH III
Hardware required: Apple II, II+, IIe, IIc; IBM PC, jr and compatibles **Description:** Push-button switch in stick handle; stainless steel ball as main pivot **Cost:** $55

☐ Microstick
Hardware required: IBM PC and compatibles; Apple; RS-232C **Description:** Eight modes of movement; PC mouse emulation; Summagraphics Bit Pad One mode; three types of output; hi-res up to 1 in 4,096; communicates from 300 to 19.2K baud **Introduced:** 1985 **Cost:** $280

CONTRIVER ENTERPRISE CO., LTD.

☐ Winner 909
Hardware required: IBM PC, jr and compatibles; Apple II, IIe, IIc, II+ **Description:** Selective spring centering or free floating; 360-degree cursor movement **Cost:** $30

GRAVIS COMPUTER PERIPHERALS, INC.

☐ MKVI
Hardware required: IBM PC and compatibles; Apple II and compatibles **Description:** Analog joystick controller with eight-position variable spring tension centering, three microswitch push-buttons and switch selector system **Units sold:** 10,000 since 1985 **Cost:** $50

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Attachable Joystick
Hardware required: IBM PC jr **Cost:** $40

KRAFT SYSTEMS CO.

☐ Premium Joystick
Hardware required: IBM PC, XT, AT and compatibles; Apple II, IIe, IIc, Macintosh **Description:** Spring centering and free-floating stick modes selectable by switching external toggle switches on bottom of case **Introduced:** 1981 **Cost:** $10-$80

LASER DIGITAL, INC.

☐ Joystick
Hardware required: IBM PC, XT **Description:** 15-pin "D" connector connects to game adapter

TECH DESIGNS, INC.

☐ Magstik
Hardware required: Apple IIc, II+, IIe and compatibles; IBM PC, XT, AT and compatibles **Description:** Self-centering without springs; left- or right-handed use **Introduced:** 1983 **Cost:** $50

T.G. PRODUCTS, INC.

☐ TG Joysticks
Hardware required: Apple II, IIe, IIc; IBM PC **Description:** Linear action with trim adjustments for each axis; self-centering feature may be disengaged when desired **Units sold:** 60,000 since 1982

WGE INTERNATIONAL, LTD.

☐ Universal Joystick
Hardware required: IBM PC; Apple II, II+, IIe, IIc **Description:** Includes auto-centering and free-floating; two pairs of fire buttons, one quick fire button **Cost:** $40

WICO CORP.

☐ Command Joystick
Hardware required: Apple II, II+, IIe, IIc; IBM PC **Description:** 360 degree movement; free-floating or re-centering capability **Cost:** $45

KEYBOARD ACCESSORIES

BROWN & CO., INC.

☐ PC-Pedal
Hardware required: IBM PC **Description:** Duplicates Shift, Control, Alternate, or Backspace/Delete keys (or any key with enhanced version) with foot pedal **Cost:** $60-$80

CREATIVE COMPUTER PRODUCTS, INC.

☐ Kleerkey Templates
Hardware required: IBM PC, XT, AT and compatibles; HP 150; KeyTronics 5151 **Description:** Blank reversible function key templates **Introduced:** 1984 **Cost:** $5 (pkg. of 3)

☐ Kleertex Templates (IBM)
Hardware required: IBM PC, XT and compatibles **Description:** Key-by-key commands and examples printed on plastic templates; for Lotus 1-2-3, MultiMate, WordStar, dBase II and III, Multiplan, WordPerfect 4.1, DOS 2.10, Symphony, PFS:Series, Microsoft Word, and Framework; do-it-yourself blanks **Units sold:** 300,000 since 1982 **Cost:** $13-$33

GENEST TECHNOLOGIES, INC.

☐ Keypatch-10
Hardware required: IBM PC, XT, AT and compatibles **Description:** Places IBM keyboard into NUM-LOCK; provides 10-key resident numeric pad and separate 10-key cursor control and screen function pad **Units sold:** 1,000,000 since 1985 **Cost:** $85-$93

HARDCOVER

☐ Keyboard Cover
Hardware required: IBM PC, XT and compatibles; Apple II, II+, IIe, IIc, Macintosh **Description:** Locking and non-locking models available **Cost:** $10-$20 (per 12 unit case)

HOOLEON CORP.

☐ Keytops
Hardware required: IBM PC and compatibles **Description:** Set of 12 enlarged labeled keys fit over Return, Tab, Backspace, 0, Shift and Control keys; identify and increase key size **Introduced:** 1983 **Cost:** $22

INMAC

☐ PC Templates
Hardware required: IBM PC **Description:** Frequently used commands, prompts, symbols, formats and functions for Lotus 1-2-3, VisiCalc; WordStar; BASIC 1.1, BASIC 2.0, MultiPlan, MultiMate, Symphony, dBASE III, Framework and Easywriter **Cost:** $15

KEY-TECH

☐ Templates
Hardware required: IBM PC, AT, XT **Introduced:** 1984 **Cost:** $6

LAMBERT LOGICAL DESIGN

☐ Lock-Lite
Hardware required: IBM PC, XT **Description:** Red and green lights show state of CAPS LOCK and NUM LOCK; audible alarm when LOCK key is hit **Introduced:** 1985 **Cost:** $40

MICROCOMPUTER ACCESSORIES, INC.

☐ Storage Drawers
Hardware required: IBM PC and compatibles **Description:** Keyboard storage drawers; table-top, mount-under and locking models **Introduced:** 1983 **Cost:** $89-$129

SYSTEMS MANAGEMENT ASSOCIATES, INC.

☐ PC-DocuMates
Hardware required: IBM PC, XT, AT and compatibles; Apple **Description:** Keyboard templates for popular programs; do-it-yourself templates **Units sold:** 325,000 since 1982 **Cost:** $13-$15

TDA, INC.

☐ Templates
Hardware required: IBM PC, AT **Description:** Access to commands, key assignments and menu-structures **Introduced:** 1983 **Cost:** $20

D. M. TUCKER, INC.

☐ Key Kue
Hardware required: IBM PC, XT **Description:** Cue card fits around function keys; notes function of each key **Cost:** $25 (5 pkgs. of 5 ea.)

KEYBOARDS

ALPS ELECTRIC (USA), INC.

(subsidiary of Alps Electric Co., Ltd.)
SEE AD ON PAGE 169

☐ KFCME
Hardware required: IBM PC AT **Description:** 84 Keys: 18 numeric, 56 main pad, 10 function

ALYWA COMPUTER CORP.

☐ YBK-370
Hardware required: IBM PC **Description:** Serial or parallel data interface; lit CAP Lock key; body tilt adjustment

AMKEY, INC.

☐ DIN 106
Hardware required: IBM PC and compatibles **Description:** Capacitance keyboard features 21 additional function keys; LEDs on NUM lock, CAP lock and Return key **Cost:** $160-$165

☐ DIN 124
Hardware required: IBM PC and compatibles **Description:** 122-key DEC look-a-like capacitance keyboard; numeric keypad and cursor pad separated from alpha keys **Cost:** $198

☐ MPFK
Hardware required: IBM PC and compatibles **Description:** Flat capacitance keyboard for POS and industrial applications **Cost:** $135

ATLANTIC COMPUTER PRODUCTS, INC.

☐ Staff-K9
Hardware required: IBM PC XT, AT **Description:** Silent tactile feedback keyswitch; oversized Return and Shift keys; 28mm high; function display overlay; separate numeric keypad and cursor control keypad

☐ 150M; 151 Keyboard
Hardware required: IBM PC, XT, AT and compatibles **Description:** 84-key; oversized Return, Shift and Control keys, CAPS lock and NUM lock, 10-key pad area

☐ 84 Keys Keyboard
Hardware required: IBM PC XT **Description:** Enter key in 10-key pad area

ATLAZ INTERNATIONAL, LTD.

☐ Model 2501KB
Hardware required: IBM PC **Description:** 83 keys. **Cost:** $99

☐ Model 2501KBD
Hardware required: IBM PC **Description:** 94 keys. **Cost:** $120

AVANT INDUSTRIES, INC.

☐ PC/XT/AT Keyboard
Hardware required: IBM PC, XT, AT and compatibles **Description:** LED indicator **Cost:** $52-$80

CALMEX, INC.

☐ KF-2000
Hardware required: Apple II; IBM PC

DIGITAL COMMUNICATIONS ASSOCIATES, INC. (DCA)

☐ IRMAkey/3270
Hardware required: IBM PC, XT, AT **Description:** Standard 3270 keyboard with IBM PC keys and four additional keys perform IRMA functions (3270 emulation) and DCA utilities (file transfer) with two keystrokes; user redefines keys; all keys are typematic; cable provided **Introduced:** 1984 **Cost:** $329

THE DIGITRAN CO.

☐ KD167
Hardware required: IBM PC, XT, AT **Description:** 84-key; LEDs in enclosure; up/down codes; N-key rollover; dual board design

ENGEBRETSEN ENGINEERING

☐ Key-2
Hardware required: IBM PC XT **Cost:** $289

ENIGMA RESEARCH

☐ Model 9000
Hardware required: PC, XT, AT, jr and compatibles **Description:** 133 keys: 40 function keys; dedicated cursor numeric keypads; positive tactile feedback **Units sold:** 1,000 since 1985 **Cost:** $350

FORTRON CORP.

☐ FC-427
Hardware required: IBM PC, XT and compatibles **Description:** 83 keys, light indicator on numeric and lock keys **Units sold:** 4,000 since 1984 **Cost:** $99

☐ FC-527
Hardware required: IBM PC AT **Description:** Auto repeat, electronic shiftlock with LED indicator, N-Key rollover, integration encoding, low-profile key switches and positive tactile feedback; protocol is serial format TTL **Units sold:** 1,500 since 1985 **Cost:** $129

GALLANT INTERNATIONAL CORP.

☐ GIC-KB
Hardware required: IBM PC XT **Description:** Status LEDs; function keys **Cost:** $73

HI-TEK CORP.

☐ PC-83/84
Hardware required: IBM PC

☐ Series 725
Hardware required: IBM PC **Description:** Features passive keyswitch design

HIGHWIN INTERNATIONAL, INC.

☐ KB-5060AT
Hardware required: IBM PC, AT and compatibles **Description:** Auto repeat and N-Key rollover

☐ KB-5150
Hardware required: IBM PC, XT and compatibles **Description:** Auto repeat and N-Key rollover

☐ KB-5151
Hardware required: IBM PC, XT and compatibles **Description:** Auto repeat and N-Key rollover

☐ XT-1
Hardware required: Apple II, IIe; IBM PC, XT and compatibles **Description:** Infrared remote control; auto repeat and N-Key rollover; auto power shut-off

ICS

(division of Action Instruments)

☐ 6531-KB
Hardware required: IBM PC, XT **Description:** 20-key operator keypad, allows limited access via keypad; 6-foot coiled cord **Cost:** $795

INMAC

☐ Bar-Code-Scanning Keyboard
Hardware required: IBM PC, XT **Description:** Bidirectional scanning of Code 3 of 9 and Industrial 2 of 5; separate numeric and function keys **Cost:** $795

☐ Speech Recognition Keyboard
Hardware required: IBM PC, XT **Description:** Recognizes up to 160 words or sounds; footswitch for keyboard or verbal entry **Cost:** $995

KEY SOLUTIONS

☐ Keyboard
Hardware required: IBM PC **Description:** Conductive elastomer and mechanical switch styles; optional output for standard ASCII; position encoding and optional baud rates up to 9,600 **Cost:** $125

KEY TRONIC CORP.

☐ KB3270/PC
Hardware required: IBM PC, XT, AT **Description:** 122-key professional layout, micro to mainframe network capability with appropriate software **Introduced:** 1985 **Cost:** $326

☐ KB5149/jr
Hardware required: IBM PC jr **Description:** Numeric keypad features cursor control, math functions, tab and backspace **Introduced:** 1985 **Cost:** $70

☐ KB5150
Hardware required: IBM PC, XT **Description:** LED indicators; available in Dvorak and foreign layouts **Introduced:** 1983 **Cost:** $159

☐ KB5150/jr
Hardware required: IBM PC jr **Description:** Typewriter style keys, LED indicators and solid state capacitive switches; available in Dvorak layout **Introduced:** 1984 **Cost:** $219

☐ KB5151
Hardware required: IBM PC, XT, AT, jr; AT&T 6300 **Description:** Top row function keys, separate cursor pad and LED indicators; available in Dvorak layout **Introduced:** 1983 **Cost:** $255

☐ KB5151/jr
Hardware required: IBM PC jr **Description:** Typewriter style keys, separate cursor pad, LED indicators and solid state capacitive switches; available in Dvorak layout **Introduced:** 1984 **Cost:** $255

☐ KB5152/B
Hardware required: IBM PC, XT **Description:** Bar code input; professional series keyboard; autodiscriminates and reads standard bar codes; scans forward or reverse; industrial grade scanning wand designed for rugged commercial use **Introduced:** 1985 **Cost:** $795

☐ KB5152/V
Hardware required: IBM PC, XT **Description:** Speech recognition keyboard; 100-160 words/phrases per vocabulary, nine vocabulary subdivisions, and discrete words/phrases up to 1.25 sec. duration; recognition algorithm uses spectral power encoding **Introduced:** 1985 **Cost:** $995

☐ KB5153
Hardware required: IBM PC, XT, AT **Description:** AT-style keyboard with directly-mounted touch pad; operates as cursor, mouse, graphic and function keys **Introduced:** 1985 **Cost:** $400

LASER DIGITAL, INC.

☐ Keyboard Series
Hardware required: IBM PC, XT **Description:** Keyboards include 83 to 98 keys.

MAXI-SWITCH CO.
(subsidiary of Eeco, Inc.)

☐ Replacement Keyboard
Hardware required: IBM PC, XT, AT **Description:** Switch selectable; operates with either AT or XT; Conductive elastomer technology **Introduced:** 1985 **Cost:** $125

MAXTRON

☐ AT-19
Hardware required: IBM PC AT **Description:** 84-key, switchable AT/XT; oversize Return, Shift and Control keys; indicator light on Cap Lock, Num Lock and Power keys **Cost:** $69

☐ AT-19A
Hardware required: IBM PC AT **Description:** 100-key; oversized Return and Shift keys; separate numeric and cursor pad; top row function keys **Cost:** $89

☐ XT-19
Hardware required: IBM PC XT **Description:** 84 key; over-size Return, Shift and Control keys; indicator light on Cap Lock, Num Lock and Power keys **Cost:** $57

MICRO SWITCH
(division of Honeywell, Inc.)

☐ Silent-Tactile Keyboard
Hardware required: IBM PC AT **Description:** 6-foot coiled cord **Introduced:** 1985 **Cost:** $168

☐ TCE434
Hardware required: IBM PC, AT **Description:** Sealed, flat-panel, 84-key touch panel keyboard **Introduced:** 1986

OAK SWITCH SYSTEMS, INC.
Keyboard Products Division

☐ Keyboard
Hardware required: IBM PC, AT and compatibles **Description:** 84-key; accelerated auto repeat; front sealed; enclosure and cable included **Cost:** $150

PKI, INC.
(division of Pfenyan Kappa International, Inc.)

☐ NKB-108AT
Hardware required: IBM PC XT, AT and compatibles **Description:** CMOS custom design, auto-switching, three status LEDs (Caps Lock, Scroll Lock, Num Lock) and oversized return and key **Units sold:** 200 since 1986 **Cost:** $99

POLYTEL COMPUTER PRODUCTS CORP.

☐ Keyport 60
Hardware required: IBM PC, XT, AT and compatibles **Description:** 60 programmable keys **Units sold:** 500 since 1985 **Cost:** $119

PRECISION INTERNATIONAL, INC.

☐ Key-1050
Hardware required: IBM PC

☐ Key-1051
Hardware required: IBM PC **Description:** Cursor control keypad

PROENT CO.

☐ ProENT Keyboard
Hardware required: IBM PC, XT **Description:** For spreadsheets and one-hand touch typing; separate cursor keys; sculptured key tops and light indicators on CAP LOCK and NUM LOCK keys **Units sold:** 125 since 1984 **Cost:** $198

QUBIE

☐ FF5161
Hardware required: IBM PC, AT, XT **Description:** Relocates keys to customary typewriter position; light indicators for shift-lock and num-lock keys **Units sold:** 10,000 since 1984 **Cost:** $159

REACTIVE SYSTEMS, INC.

☐ Q System
Hardware required: IBM PC, XT and compatibles **Description:** Computer-based group response system; up to 128 participants respond to questions via keypad **Introduced:** 1986 **Cost:** $1,200-$1,550

SEASONED SYSTEMS, INC.

☐ SureStroke
Hardware required: IBM PC, XT; Compaq **Description:** DVORAK keyboard; software translates keystrokes to DVORAK and teaches DVORAK keyboard by touch **Units sold:** 1,500 since 1984 **Cost:** $99

TOUCHSTONE TECHNOLOGY, INC.

☐ Touchstone 1
Hardware required: IBM PC, XT **Description:** 29-key; dedicated cursor, space, backspace, home and enter control keys; math keys include percent and bracket keys for compound math formulas **Introduced:** 1984 **Cost:** $170

☐ Touchstone 2
Hardware required: IBM PC, XT, AT; Compaq DeskPro **Description:** 35-key keypad; dedicated cursor and page controls; ten function keys, full set of math keys and traditional adding machine layout **Introduced:** 1984 **Cost:** $200

T. S. MICROTECH, INC.

☐ Dreamer
Hardware required: IBM PC, XT, AT **Description:** 20-key numeric keypad; 30 function keys; separate cursor control **Cost:** $259

WICO CORP.

☐ Smart Board
Hardware required: IBM PC, XT; Apple II, II+, IIc **Description:** MouseTrac Combo (trackball and mouse) with BASIC key, 2K RAM, 128-character type ahead buffer, key swap; expansion port daisy-chains second keyboard or connects other peripherals **Cost:** $400

LIGHT PENS

DESIGN TECHNOLOGY

☐ DT 170
Hardware required: IBM PC and compatibles **Description:** Software available **Units sold:** 50,000 since 1981 **Cost:** $135

DUNCAN-ATWELL COMPUTERIZED TECHNOLOGIES, INC.

☐ LENIPEN
Hardware required: IBM PC, XT, AT, 3270 **Software required:** LENIPEN System Software Series **Description:** Reads light beams from CRT and reports pixel locations back to PC color graphics card **Introduced:** 1982 **Cost:** $220

☐ LENIPEN: Push-Tip
Hardware required: IBM PC, XT, AT, 3270 **Software required:** LENIPEN System Software Series **Description:** Activated by depressing retractable tip of light pen against CRT **Introduced:** 1982 **Cost:** $220

FTG DATA SYSTEMS

☐ FT-156
Hardware required: IBM PC, XT, AT and compatibles **Description:** Includes cable; optional software available **Units sold:** 11,300 since 1982 **Cost:** $195

HEI, INC.

☐ Fast-Point
Hardware required: IBM PC and compatibles **Description:** 10-foot coiled cable, software documentation and demonstration diskette **Introduced:** 1985 **Cost:** $145

☐ Feather
Hardware required: IBM PC and compatibles **Description:** Cordless light pen **Introduced:** 1986 **Cost:** $195

THE LITE-PEN CO.

☐ CPT
Hardware required: IBM PC and compatibles **Description:** Color operation; pushtip activated; sidebutton option

☐ Lite-Pen
Hardware required: IBM PC, XT, jr, AT, 3270 and compatibles **Description:** Automatic sensitivity adjustment compensates for varying light conditions in room or on screen **Units sold:** 10,000 since 1984 **Cost:** $200

☐ MPT
Hardware required: IBM PC and compatibles **Description:** P-134 and P-39 IBM monochrome operation; pushtip activated; sidebutton option

☐ VPT
Hardware required: IBM PC and compatibles **Description:** Mono/color operation; pushtip activated; sidebutton option

TECH SKETCH, INC.

☐ Tech Sketch
Hardware required: IBM PC **Description:** Coil-free cord; software included **Cost:** $70

WARP SPEED COMPUTER PRODUCTS, INC.

☐ WS250
Hardware required: IBM PC, XT, AT and compatibles **Description:** Push-tip switch **Units sold:** 6,000 since 1985 **Cost:** $200

MOUSE DEVICES

ALPS ELECTRIC (USA), INC.
(subsidiary of Alps Electric Co., Ltd.)
SEE AD ON PAGE 169

☐ UDA Series
Hardware required: IBM PC and compatibles **Description:** Optical and mechanical encoders; pointing device for CAD/CAM and PC systems

COMPUTER DEVICES INTERNATIONAL

☐ OptoMouse
Hardware required: RS-232C **Description:** Microprocessor controlled optical imaging system replaces traditional mechanical components; emulates Tektronix Plot 10 and Summagraphics Bit Pad protocols **Units sold:** 300 since 1982 **Cost:** $300

CONTRIVER ENTERPRISE CO., LTD.

☐ M-II Mouse
Hardware required: IBM PC and compatibles **Description:** 3-button mouse **Cost:** $79

☐ Mousebox
Hardware required: IBM PC and compatibles **Description:** Used with joystick to emulate mouse functions **Introduced:** 1986 **Cost:** $45

☐ Mousestick
Hardware required: IBM PC and compatibles **Description:** 3-button mouse with switch-selectable joystick **Introduced:** 1986 **Cost:** $79

HIGHWIN INTERNATIONAL, INC.

☐ Mouse-50
Hardware required: IBM PC, XT and compatible; Apple II, IIe, Macintosh

IMSI

☐ IMSI Mouse
Hardware required: IBM PC and compatibles **Description:** 3-button opto-mechanical mouse; 200 dot-per-inch resolution **Cost:** $99

☐ IMSI Optimouse
Hardware required: IBM PC, XT, AT and compatibles **Description:** 3-button mouse; includes Pop-Up software and mouse driver **Cost:** $175

INMAC

☐ Super Mouse
Hardware required: IBM PC, XT, AT and compatibles **Description:** Programmable baud rate up to 9,600 bps **Cost:** $99

KOALA TECHNOLOGIES CORP.
(division of PTI Industries)

☐ KAT
Hardware required: IBM PC, XT, AT and compatibles; Apple Macintosh **Description:** 1000 X 1000 resolution; optional use as soft-key function pad; hand-held or lap-top operation **Introduced:** 1985 **Cost:** $236

LOGITECH, INC.
SEE AD ON PAGE 281

☐ LogiMouse C7
Hardware required: IBM PC, XT, AT and compatibles **Description:** High resolution, opto-mechanical mouse; requires no pad or external power supply; bundled with Universal Mouse Driver, TAG, and Text-and-Graphics Editor **Introduced:** 1985 **Cost:** $99

☐ Mouse 6300
Hardware required: AT&T 6300 **Description:** Keyboard interface mouse with software; Microsoft compatible drive; mouse menu program; Draw/Writer and Text-and-Graphics Editor **Introduced:** 1984 **Cost:** $150

MANDAT-INFO TECH

☐ MICRO-MEASURE
Hardware required: IBM PC XT and compatibles **Software required:** BID-RITE **Description:** Detects movements of 0.02" in X or Y **Cost:** $2,749

MAYNARD ELECTRONICS

☐ The Mouse
Hardware required: IBM PC, XT, AT and compatibles **Description:** Three buttons for custom commands; CustomKey software; Microsoft compatible **Introduced:** 1985 **Cost:** $185

MICROSOFT CORP.
SEE AD ON PAGES 284/285/286/287/288

☐ Microsoft Mouse
Reviewed Apr 1984 p. 150.
Hardware required: IBM PC, XT, jr **Units sold:** 50,000 since 1983 **Cost:** $195

MOUSE SYSTEMS CORP.

☐ Field Mouse
Hardware required: RS-232C **Description:** Three-button optical mouse with power supply **Introduced:** 1983 **Cost:** $175

☐ PC Mouse
Reviewed Apr 1984 p. 150.
Hardware required: IBM PC and compatibles **Description:** Three-button optical mouse with Designer Pop-up and PC Paint Plus software **Introduced:** 1982 **Cost:** $199

PRACTICAL PERIPHERALS, INC.

☐ Practical Mouse
Hardware required: IBM PC, XT, AT and compatibles **Description:** Optical two-button mouse with TTL and RS-232C output; includes software **Introduced:** 1985 **Cost:** $179

SUMMAGRAPHICS CORP.

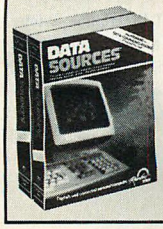
☐ SummaMouse
Hardware required: IBM PC, jr and compatibles **Description:** Optical, microprocessor control technology; supports transmission rates of 300-9,600 bps **Introduced:** 1983 **Cost:** $119

THE TORRINGTON CO.
(division of Ingersoll-Rand Co.)

☐ Manager Mouse 1001C; 1001C-MC25
Hardware required: IBM PC, XT and compatibles **Description:** Requires no disassembly for maintenance, special tablet for operation or separate power supply **Introduced:** 1985 **Cost:** $198 (includes software)

☐ Manager Mouse 1001C-AT
Hardware required: IBM PC, AT; Compaq 286; KayPro 286 **Description:** 8-foot cable for side mounted or floor mounted models **Introduced:** 1985 **Cost:** $228

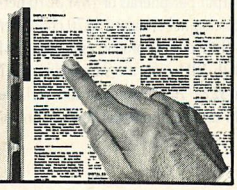
WE DESCRIBE OVER *50,000* COMPUTER PRODUCTS SO YOU CAN FIND THE ONE THAT'S RIGHT FOR YOU



In the complex, ever-changing computer market you've got to play it smart. Which means making the right product choices *without* wasting time and money.

Which means **DATA SOURCES**...the one truly comprehensive reference to computer hardware and software.

DATA SOURCES puts information about 30,000 software packages, 19,000 hardware and data communications products and detailed profiles of 10,000 manufacturers right at your fingertips.



With a **DATA SOURCES** subscription you'll never have to worry about information being out of date.

Every three months you'll get a new two-volume edition—A *Hardware Volume* with descriptions of Computer Systems, Graphic Systems, Digitizers, Plotters, Printers, Disk and Tape Memory Equipment, CRTs, Expansion Boards and Data Communications Equipment PLUS a *Software Volume* with the most complete listings to be found anywhere on applications and systems software including database managers, utilities, and communications packages. A separate section includes company profiles for quick evaluation of vendors.

To subscribe, call toll-free 1-800-443-0100, ext. 251. We'll send your first two-volume edition and enter your one year (four editions) subscription for just $295—over 22% off the regular price.

DATA SOURCES
THE ONLY COMPREHENSIVE BUYERS GUIDE TO THE COMPUTER INDUSTRY.
P.O. Box 5845, Cherry Hill, N.J. 08034

If you're using AutoCad™ It's time to get on The Ball.

If you have been using a mouse with AutoCAD™ then it's time you looked at a better way to work. The Fulcrum Trackball Plus™ is easier to use, more reliable and takes up only one quarter the space of a mouse. Our trackball also has an alternate cursor, downloadable auto-scaling and five general-purpose switches (instead of two). But in case you still need to be convinced check out these specs:

Downloadable Parameters, Hi-Resolution (200bpi).
Emmulates: Summagraphics Bit Pad One™, RetroGraphics RG-512™,Houston Instruments Hipad™, Tektronix Plot-10 format™, Mouse Systems Mouse™, Microsoft Mouse™.

$95.00

CIRCLE NO. 323 ON READERS SERVICE CARD

TOUCH TECHNOLOGY, INC.

☐ Touch Mouse
Hardware required: IBM PC **Description:** Fingertip movement provides screen control; four modes of cursor control; graphics program, telephone Rolodex, and drivers for Lotus 1-2-3, WordStar and VisiCalc **Units sold:** 100 since 1985 **Cost:** $349

VERSATRON CORP.

☐ Footmouse
Hardware required: IBM PC, XT, Portable; Ivy; ITT XTRA; Compaq DeskPro **Description:** Foot-controlled cursor **Units sold:** 5,000 since 1985 **Cost:** $50

PADDLES

TECH DESIGNS, INC.

☐ Adam & Eve Paddles
Hardware required: Apple II, II+, IIe and compatibles; IBM PC, XT, AT and compatibles **Description:** Long-life switches, potentiometers and trimming circuit soldered to miniature PCB **Units sold:** 25,000 since 1981 **Cost:** $35

PRINTER ACCESSORIES

ANEX TECHNOLOGY, INC.

☐ Multi-Spool
Hardware required: IBM PC, XT, AT **Description:** Up to eight users share one parallel printer **Introduced:** 1984 **Cost:** $450

APPARAT, INC.

☐ Spool/64
Hardware required: IBM PC **Description:** 64K parallel print buffer **Units sold:** 900 since 1982 **Cost:** $249

APPLIED CREATIVE TECHNOLOGY, INC.

☐ BufferBox
Hardware required: RS-232C; Centronics parallel **Description:** 64K buffer; built-in copy and pause features; serial/parallel adapter **Units sold:** 400 since 1985 **Cost:** $199-$269

☐ BufferPlus
Hardware required: RS-232C; Centronics Parallel **Description:** 64K buffer; built-in copy and pause features; serial/parallel adapter; character conversion and printer font remote control **Units sold:** 250 since 1985 **Cost:** $299-$369

☐ ETI2
Hardware required: RS-232C; Centronics parallel **Description:** Models 50, 60, 65, 75, 85 and 175 IBM Electronic Typewriters function as letter-quality printers **Units sold:** 5,000 since 1980 **Cost:** $299-$379

☐ Optimizer
Hardware required: RS-232C; Centronics parallel **Description:** 64K-1M data buffer with character conversion, space compression, multiple-copy, manual or automatic pauses, stored character strings, protocol conversion and up to 3 outputs; data transmission speeds up to 19.2K baud **Units sold:** 8,000 since 1982 **Cost:** $369

☐ Systemizer
Hardware required: RS-232C; Centronics parallel **Description:** Printer sharing system; when daisychained with other Systemizers, connects up to 15 computers to 15 printers **Units sold:** 6,000 since 1985 **Cost:** $439

CALIFORNIA MICRO COMPUTER

☐ Typewriter Interface
Hardware required: IBM PC **Description:** Interface module; IBM electronic typewriter functions as printer, typewriter or input device; attaches to async connector; cable, 2K buffer, electronic disconnect, code key mode, line fee inhibit and online indicator **Cost:** $249

CAROLINA ENGINEERING LABORATORIES

☐ StyleWriter
Hardware required: RS-232C **Description:** 8K buffer expandable to 64K or 128K; upgrades dot-matrix to letter-quality printer **Cost:** $169 (8K)

COMPUTER FRIENDS

☐ Proteus
Hardware required: Microcomputers with Centronics parallel interface **Description:** Two-port data switch with 64K or 256K buffer **Introduced:** 1986 **Cost:** $199-$299

COMSPEC COMMUNICATIONS, INC.

☐ MCS 8000 Series
Hardware required: IBM PC and compatibles; Apple **Description:** Eight users share one printer; 64K or 256K print buffer **Cost:** $742-$866

CONSOLINK CORP.

☐ MicroSpooler
Hardware required: IBM PC; Apple II, II+, IIe, III, Lisa, Macintosh and compatibles **Description:** Standalone 64K print buffer with power supply; compatible with RS-232C or Centronics parallel interfaces; digital memory status; pause on formfeed function and multiple-copy capabilities **Introduced:** 1983 **Cost:** $324

☐ MicroSpooler Advanced Business System
Hardware required: IBM PC **Description:** Standalone 128K-256K print buffer; compatible with Centronics parallel or RS-232C interfaces; interface conversion capabilities; user-programmable **Introduced:** 1984 **Cost:** $489-$595

☐ MicroSpooler 16
Hardware required: IBM PC; Apple II, II+, IIe, III, Lisa, Macintosh and compatibles **Description:** Standalone 16K print buffer with power supply; compatible with RS-232C or Centronics parallel interfaces; digital memory status; pause on formfeed function and multiple-copy capabilities **Introduced:** 1983 **Cost:** $150

☐ SooperSpooler
Hardware required: IBM PC **Description:** Standalone print buffer internal power supply; compatible with Centronics parallel or RS-232C interfaces; interface conversion capabilities; pagination; page numbering; header insertion; space compression; single sheet mode; self-test function **Introduced:** 1982 **Cost:** $318-$486

CREATIVE COMPUTER PRODUCTS, INC.

☐ Print-A-Form Guides
Hardware required: IBM; Apple **Description:** Grids of column/row numbers, on 11" X 15" sheets of clear acetate, corresponding to column/row numbers on computer screen; three separate grids for documents of 10, 12, and 16 characters per inch **Introduced:** 1981 **Cost:** $20 (pkg. of 3)

DATA-DOC ELECTRONICS, INC.

☐ DDE Data Buffer
Hardware required: IBM PC; Apple **Description:** Standalone printer buffer connects between computer and printer utilizing standard Centronics parallel interface; normal print mode, stop print mode, pause on formfeed mode and self-test mode

DIGITAL COMMUNICATIONS ASSOCIATES, INC. (DCA)

☐ IRMAprint
Hardware required: IBM PC **Description:** Asynchronous ASCII output devices operate as output peripherals or IBM 3270 networks; connects to remote or channel-attached 3270 controller via coaxial cable; supports IBM coax protocol; emulates IBM 3287 printer; compatible with IBM software supporting 3287 printer models 1 or 2 with 3274/76 attachment and variable character buffer; available in serial and parallel versions **Introduced:** 1984 **Cost:** $1,295

DIGITAL DEVICES CORP.

☐ U-Buff
Hardware required: IBM PC and compatibles **Description:** 16K buffer expandable to 64K; parallel-to-parallel and serial-to-parallel interface **Introduced:** 1984 **Cost:** $120-$150

DIGITAL PRODUCTS, INC.

☐ MultiSpool
Hardware required: IBM PC **Description:** Routing and 250KB buffering; serial and parallel ports; mixed concurrent baud rates **Units sold:** 1,000 since 1982 **Cost:** $1,395

INNOVATIVE PLASTIC DESIGNS

☐ STAX 80
Hardware required: IBM; Apple; Epson; Okidata **Description:** Desktop printer stand for rear and middle feed 80 column printers

INTEGRATED MARKETING CO. (IMC)

☐ Data Manager II
Hardware required: Microcomputers with RS-232C **Description:** Multiple device spooler connects four microcomputers to two printers; 64K buffer, upgradable to 1M **Introduced:** 1986 **Cost:** $795

INTERACTIVE STRUCTURES, INC.

☐ ShuffleBuffer
Hardware required: IBM PC; Apple II, II+, IIe, III, Lisa, Macintosh and compatibles **Description:** Intelligent printer buffer compatible with serial or parallel equipment; up to 128K non-volatile buffer memory with extra data compression; prints multiple copies, incorporates word processor, spreadsheet and graphics printing **Units sold:** 50,000 since 1984 **Cost:** $349-$499

JOHNATHON FREEMAN DESIGNS, INC.

☐ 1064 Universal Printer Buffer
Hardware required: Microcomputer Multibus **Description:** Includes 64K-256K RAM; 2 serial ports, 2 parallel ports **Units sold:** 300 since 1985 **Cost:** $269

OMNITRONIX, INC.

☐ RAMJET
Hardware required: RS-232C; Parallel **Description:** 256K printer buffer **Introduced:** 1986 **Cost:** $269

PRINTEK, INC.

☐ ASF-1/ASF-2
Hardware required: IBM PC **Description:** Automatic sheet feeders (single and dual bin) for use with Printek 930/935; driven by command from host; paper-out detection via printer; handles forms and cut sheets from 8"-14" long, 4"-11" wide **Introduced:** 1984 **Cost:** $699; $995 (dual bin)

THE PRINTER WORKS

☐ PS3625
Hardware required: IBM PC and compatibles **Description:** Switching device allows computer to transmit data to two printers simultaneously **Cost:** $120

QUADRAM
(subsidiary of Intelligent Systems Corp.)

☐ Interfazer
Hardware required: IBM PC; Apple II **Description:** Printer controller/buffer receives data from up to eight computers via serial or parallel cards; Operates on priority port system and functions as incompatible device interface, computer I/O expander and data transfer rate converter **Cost:** $295

RAINBOW TECHNOLOGIES, INC.
SEE AD ON PAGE 237

☐ PC-Writer
Hardware required: Okidata; IBM PC **Description:** Full emulation of IBM Graphics printer and FX Series on Okidata ML-82A, ML-83A **Units sold:** 5,000 since 1984 **Cost:** $99

SPIES LABORATORIES

☐ IBM NicePrint
Hardware required: IBM PC **Description:** Upgrades print quality of IBM, Epson, Okidata, Panasonic and Gemini dot matrix printers; 13 fonts and side-kick pop-up window **Units sold:** 5,000 *since 1984* **Cost:** $95

SUNCOAST/EASYCOM

☐ BF64D
Hardware required: Most microcomputers **Description:** One computer shares 2 Centronics parallel printers; 0K, 64K or 256K buffer. **Cost:** $232-$297

☐ BF64M
Hardware required: Most microcomputers **Description:** Four computers share one parallel printer; 64K or 256K buffer. **Cost:** $338-$403

☐ BF64MD
Hardware required: Most microcomputers **Description:** Four computers share two printers; Serial, parallel avail.; 64K or 256K buffer. **Cost:** $366-$431

☐ BF64U
Hardware required: Most microcomputers **Description:** Serial/parallel in or serial/parallel out switch with 64K or 256K buffer **Cost:** $253-$329

TACTICAL ELECTRONICS CORP.

☐ Automatic Printer Switch
Hardware required: IBM PC and compatibles **Description:** Allows six PCs to share one printer; parallel interface **Cost:** $400

TALL TREE SYSTEMS
SEE AD ON PAGES 207/209

☐ JLASER
Hardware required: IBM PC **Software required:** FONTRIX; PRINTRIX **Description:** Piggybacks onto JRAM-3 or AT-3 and connects to a Canon-based laser printer engine; transfers bit-mapped images from RAM, bypassing on-board print buffer; multiple type font combinations

VON LEIVENDYKE ENTERPRISES

☐ ConvertaBuffer CBP-64
Hardware required: IBM PC, XT, AT, jr, Portable **Description:** External box attaches to outside of PC system unit; parallel-to-parallel interface and 64K buffer **Introduced:** 1983 **Cost:** $249

☐ Graphics ConvertaBuffer
Hardware required: IBM PC, XT, AT, jr, Portable **Description:** External box attaches to outside of PC system unit; parallel-to-parallel interface and 64K buffer; translates dot matrix graphics into daisy wheel graphics **Introduced:** 1983 **Cost:** $349

☐ Original ConvertaBuffer
Hardware required: IBM PC, XT, AT, jr, Portable **Description:** External box attaches to outside of PC system unit; parallel-to-serial interface and 32K buffer **Introduced:** 1982 **Cost:** $239

SECURITY DEVICES

ANCHOR PAD INTERNATIONAL, INC.

☐ Anchor Pads
Hardware required: IBM PC **Description:** Locking devices anchor equipment to surfaces without drilled holes or marred furniture **Units sold:** 200,000 since 1972 **Cost:** $30-$300

ARNET CORP.

☐ PC-GARD
Hardware required: IBM PC, XT, AT and compatibles **Description:** Operates in transparent mode to allow normal keyboard operation; includes software for IBM PC for custom programming of each module **Introduced:** 1985 **Cost:** $99

BIRCHEM COMPUTER PRODUCTS

☐ The Greeting Card II
Hardware required: Apple II, II+, IIe **Description:** Provides password security; leaves short messages for other computer operators; stores up to eight programs **Introduced:** 1985 **Cost:** $90

BRADY OFFICE MACHINE SECURITY, INC.

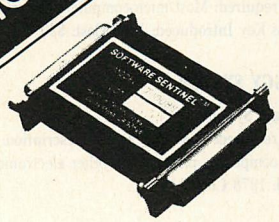
☐ Lucasey Security
Hardware required: IBM PC; Apple and compatibles **Description:** Protects computer hardware or office related machines through bolt-down or glue-down mounting methods **Units sold:** 30,000 since 1983 **Cost:** $50-$137

COMPUTER SECURITY CORP.

☐ Sentinel
Hardware required: IBM PC, XT, AT and compatibles **Description:** Limits access to PC through specified password; logging, clock, memory, and default encryption protection **Introduced:** 1984 **Cost:** $445-$595

CVI LASER CORP.

☐ KBD-LOCK
Hardware required: IBM PC, XT; Compaq Deskpro; AT&T PC; DG D410/460 **Description:** System active keyboard lockout uses keyed locking device **Units sold:** 250 since 1985 **Cost:** $50-$70



MOVING?

SOFTWARE SENTINEL™

MUCH MORE THAN JUST PROTECTION

Because its original objective was to protect software from unauthorized use, it's called the SOFTWARE SENTINEL. But maybe we'll change the name to *REVENUE GENERATOR*, since we've discovered its true value to our customers. But whatever we call it, everyone ends up with numerous benefits from this hardware key with unlimited "locks":

SOFTWARE DEVELOPER BENEFITS
- Prohibits unauthorized use of software
- No need for copy protection
- Algorithm technique (never a fixed response)
- Virtually unbreakable
- Higher level language interfaces included
- 100 times faster (1ms) than fixed response devices
- Minimal implementation effort
- Runs under DOS and Xenix, on IBM PC, AT, XT & compatibles

SOFTWARE USER BENEFITS
- Unlimited backup copies
- No floppy required with hard disk
- Pocketsize
- Transparent
- Transportable

RAINBOW TECHNOLOGIES, INC

EVALUATION KIT AVAILABLE

Telex 386078

17971 SKYPARK CIRCLE SUITE E, IRVINE, CA 92714 (714)261-0228

CIRCLE NO. 318 ON READERS SERVICE CARD

CYTROL, INC.

☐ CyLock
Hardware required: IBM PC, XT, AT **Software required:** PC DOS **Description:** Provides PC access protection; encrypts and controls files for private or shared use; records and reviews security and accounting audit trail **Introduced:** 1984 **Cost:** $549

DATAKEY, INC.

☐ DK1401 DataKey
Hardware required: RS-232C **Description:** 1,400 bit semiconductor memory designed in the shape of a key **Units sold:** 150,000 since 1981 **Cost:** $9

☐ NL1400
Hardware required: RS-232C **Description:** Host and data access control module; standalone or host-controlled operation; authenticates passwords and identification data stored in DataKeys **Units sold:** 54 since 1985 **Cost:** $600

☐ NL1400M
Hardware required: Most microcomputers **Description:** Host and data access control module with integral modem; standalone or host-controlled operation; authenticates passwords and identification data stored in DataKeys **Units sold:** 350 since 1985 **Cost:** $1,000

DIRECTOR TECHNOLOGIES, INC.

☐ Disk Defender
Hardware required: IBM PC, XT and compatibles **Description:** Write protect device for fixed Winchester disks **Introduced:** 1986 **Cost:** $185

FMJ, INC.

☐ Computer Escort
Hardware required: IBM PC, XT, AT and compatibles **Description:** Modular security and desk top storage device; dual-key-lock front cover **Introduced:** 1983

GORDIAN SYSTEMS, INC.

☐ Access Key
Hardware required: IBM PC **Description:** Hand-held, battery powered device is held against flashing pattern on screen; data is optically read by Key and combined with data residing in Key to produce access code entered from keyboard **Cost:** $6,000

☐ Access Key Pad
Hardware required: Most microcomputers **Description:** Used with Access Key **Introduced:** 1986 **Cost:** $30

THE HUGGY SYSTEM

☐ The Huggy System
Hardware required: IBM PC; Apple **Description:** Anti-theft device for computers, printers and other electronic machines **Introduced:** 1978 **Cost:** $15

INDUSTRIAL RESOURCE ENGINEERING, INC.

☐ SCRAMBLER
Hardware required: IBM PC and compatibles **Description:** Prevents unauthorized access to confidential files transmitted over public phone lines; Data Encryption Standard **Introduced:** 1984 **Cost:** $559-$959

INMAC

☐ Guard/Surge Suppressor
Hardware required: IBM PC, XT **Description:** 16-gauge steel cabinet connects CPU to computer stand; roll-out shelf for keyboard, bolts, washers and two keys **Cost:** $199-$279

☐ Thiefstopper
Hardware required: IBM PC **Description:** Motion detector connects to PC's ventilation slots; key required for removal or alarm silencing; includes two keys **Cost:** $99

INTERNATIONAL ELECTRONIC TECHNOLOGY CORP.

☐ K-SafeCard
Hardware required: IBM PC, XT and compatibles **Description:** Expansion card with set of switches can be set for up to eight-digit code; computer can not be operated without proper code sequence; after six unsuccessful attempts have been made, electronic alarm sounds **Introduced:** 1985 **Cost:** $200

KAPAK DESIGN

☐ Lock & Clock
Hardware required: IBM PC and compatibles **Description:** Code Lock for software protection; clock calendar **Units sold:** 200 since 1985 **Cost:** $150

MICRO SECURITY DEVICES, INC.

☐ PC Guardian II
Hardware required: IBM PC, XT, AT, XT/370, 3270 and compatibles **Description:** Prevents unauthorized access to data; locks power switch in either on or off position; protects against theft of monitor, keyboard, computer boards, and system unit **Units sold:** 200,000 since 1984 **Cost:** $49

☐ PC Guardian Theft Prevention
Hardware required: IBM PC, XT, AT, XT/370, 3270 and compatibles; Apple II, IIe, II+ **Description:** Anti-theft protection for computer boards and internal components, keyboard, monitor and system unit **Units sold:** 200,000 since 1985 **Cost:** $25

MICROCOMPUTER ACCESSORIES, INC.

☐ Security Alarm
Hardware required: IBM PC, XT **Description:** Sensitive motion detection circuit triggers piercing siren; locks monitor, keyboard and printer cables to security alarm **Introduced:** 1984 **Cost:** $100

PC ACCESSORIES, INC.

☐ DATA LOCK IV
Hardware required: IBM PC **Description:** Prevents unauthorized access to XT hard disk; fastens to PC cabinet, secures power switch and prevents removal of cover without proper key **Introduced:** 1984 **Cost:** $95

☐ NIP & TUCK
Hardware required: IBM PC **Description:** Secures IBM keyboard, CPU, and expansion boards against theft or damage; non-invasive steel straps **Cost:** $185

RAINBOW TECHNOLOGIES, INC.
SEE AD ON PAGE 237

☐ Software Sentinel
Hardware required: IBM PC, XT, AT and compatibles **Description:** Hardware key embedded with algorithm protects matching software product from unauthorized use; connects parallel port **Units sold:** 50,000 since 1984 **Cost:** $30-$75

SOFTWARE SECURITY, INC.
SEE AD ON PAGE 393

☐ The Block
Hardware required: RS-232C **Description:** Software protection; program transfers to hard disk; DB-25 connectors available **Cost:** $39

STAFF COMPUTER TECHNOLOGY CORP.

☐ The Key
Hardware required: IBM PC, XT, AT; Apple II, II+, IIe; Most microcomputers **Description:** Portable devices control software piracy or unauthorized remote computer access; unrestricted back-up and use of hard disks and LANs **Introduced:** 1983 **Cost:** $15-$225

TACT TECHNOLOGY

☐ MicroSentry
Hardware required: IBM; Apple **Description:** Screens calls directed to computer and diverts calls from modem to extension phone; screens personal and business calls. **Introduced:** 1983 **Cost:** $695

☐ Scrambler
Hardware required: RS-232C **Description:** Hardware encryption device uses the DES algorithm to encrypt transmissions and authenticate identity of remote devices attempting to access computer system. **Introduced:** 1983 **Cost:** $495-$1,225

VOYAGER DEVELOPMENT, INC.

☐ SPR500/550
Hardware required: IBM PC; RS-232C **Description:** Uses ADAPSO Lock and Key Ring concept for software protection, access control and data security through encryption while maintaining transparency; up to eight keys on-line simultaneously **Units sold:** 2,000 since 1985 **Cost:** $55

XTRATEK CORP.

☐ X-File
Hardware required: IBM PC and compatibles **Description:** File data encryption and locking security package; locks/unlocks files with one to eight-character password **Units sold:** 40 since 1985 **Cost:** $79

☐ X-Lock 100
Hardware required: IBM PC and compatibles **Description:** Creates up to 72 accounts, each with one to 16-character passwords; provides resource management function **Units sold:** 50 since 1985 **Cost:** $295

SPEECH/MUSIC SYNTHESIS

ARTIC TECHNOLOGIES

☐ SynPhonix jr
Hardware required: IBM PC*jr* **Description:** *Unlimited vocabulary* capabilities via Text-to-Speech (automatic) or Phonetic Speech Editor (manual); software transparent **Introduced:** 1985 **Cost:** $175

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Speech Attachment
Hardware required: IBM PC, jr **Description:** 196 words and sounds; records speech on diskette through microphone input. **Cost:** $300

ROLAND DG
(division of Roland Corp. US)

☐ MKB-300; MKB-1000
Hardware required: IBM PC **Description:** Master keyboards for music synthesis; MKB-1000 has 88 wooden, piano-action keys; MKB-300 has 76 plastic keys **Introduced:** 1984 **Cost:** $1,295-$2,195

☐ MKS-10 PLANET P
Hardware required: IBM PC **Description:** 16-voice electronic piano module **Introduced:** 1984 **Cost:** $995

☐ MKS-30 PLANET S
Hardware required: IBM PC **Description:** Six-voice programmable polyphonic synthesizer module **Introduced:** *1984* **Cost:** $995

☐ MKS-80 SUPER JUPITER
Hardware required: IBM PC **Description:** Eight-voice, 16 VCO synthesizer accepts 88 keys of information without wrapping; responds to velocity and after-touch data **Introduced:** 1984 **Cost:** $2,495

STREET ELECTRONICS CORP.

☐ Cricket
Hardware required: IBM PC, jr; Apple II, II+, IIe, III and compatibles **Description:** Natural and robotic type voice synthesis; stereo music; sound effects; built-in speaker; headphone jack; on-board clock; cable for RS-232C interface; utility software **Cost:** $180

TOUCH SCREENS

ALPS ELECTRIC (USA), INC.
(subsidiary of Alps Electric Co., Ltd.)
SEE AD ON PAGE 169

☐ FFZT
Hardware required: RS-232C **Description:** Optical touch screen with finger touch operation

BFA SALES
(division of Aquila Technologies Group, Inc.)

☐ Soft-Touch
Hardware required: Apple; IBM PC and compatibles; Sony **Description:** Fits IBM 5151 monochrome monitor or Princeton Graphics Systems 12-inch monitors; bezel contains Soft-Touch circuitry and snaps onto front of monitor; touch resolution: 21 (vertical) X 27 (horizontal); 567 active points

DETECTOR ELECTRONICS CORP.

☐ Touch Screen
Hardware required: Apple; IBM PC **Description:** Resistive mylar membrane; 256 X 256 resolution **Introduced:** 1983

MICROTOUCH SYSTEMS, INC.

☐ Screen-Kit
Hardware required: RS-232C **Software required:** Drivepoint **Description:** Fits most monitors, terminals and flat panel devices; offers high resolution **Introduced:** 1982 **Cost:** $995

PERSONAL TOUCH CORP.

☐ Touch Window-I
Hardware required: IBM PC, XT, AT and compatibles **Description:** Attaches to monitor; used as graphics tablet, menu pad or Interactive Book Pad **Units sold:** 6,000 since 1985 **Cost:** $230

TRACKBALLS

DISC INSTRUMENTS
(a Honeywell subsidiary)

☐ comLYNX
Hardware required: OEM RS-232C; IBM PC, XT, AT **Description:** Emulates the Microsoft mouse **Introduced:** 1986 **Cost:** $119

☐ microLYNX
Hardware required: IBM PC, XT and compatibles **Description:** User programmable to suit application software without requiring any software support or memory **Units sold:** 8,400 since 1985 **Cost:** $195

HONEYWELL INFORMATION SYSTEMS, INC.

☐ uLynx
Hardware required: IBM PC and compatibles **Cost:** $195

T.G. PRODUCTS, INC.

☐ Track Ball
Hardware required: Apple II, IIe; IBM PC **Description:** Omnidirectional guidance system for quick response to rapid movement commands **Units sold:** 35,000 since 1982 **Cost:** $10

OTHER DEVICES

AVOCADO COMPUTER

☐ Grayscaler
Hardware required: IBM PC, XT, AT; Compaq; Columbia **Description:** Converts monochrome monitor to color monitor **Cost:** $60

CAUZIN SYSTEMS, INC.

☐ Softstrip System Reader
Reviewed May 1986 p. 29.
Hardware required: IBM PC and compatibles; Apple II Series, Macintosh **Description:** Optical scanning system reads, decodes and enters data from 5/8" wide strips; strips contain up to 5.5K of encoded data **Introduced:** 1985 **Cost:** $200

HAYES MICROCOMPUTER PRODUCTS, INC.
SEE AD ON PAGE 143

☐ Transet 1000
Hardware required: Microcomputer with RS-232C port **Description:** Frees computer from peripheral operations and allows simultaneous operation of peripherals; print buffering and printer management; port options and controls; background communications (requires modem) **Introduced:** 1985

IGC, INC.

☐ IGC Adapter
Hardware required: IBM PC **Description:** Connects PC through color graphics card to Mitsubishi 3920

PERMA POWER ELECTRONICS, INC.

☐ The Color Commander
Hardware required: IBM PC, XT and compatibles **Description:** Color control center connects between PC and RGB color monitor **Introduced:** 1986 **Cost:** $359

TORI' CORP.

☐ Interceptor
Hardware required: IBM PC, XT, AT; HP 150; Apple Macintosh **Description:** Installs between keyboard and PC; transparent multipoint conferencing via internal 1,200 bps modem **Introduced:** 1986 **Cost:** $795

TRAILRIDGE RESEARCH, INC.
SEE AD ON PAGE 205

☐ Add-A-Slot
Hardware required: IBM PC and compatibles **Description:** Allows an additional expansion board slot to be plugged in between two existing slots **Introduced:** 1986 **Cost:** $45

WGE INTERNATIONAL, LTD.

☐ Tilt and Swivel Power Center
Hardware required: IBM PC and compatibles **Description:** Five individually switched outlets with surge protection; resettable mini breaker **Cost:** $80

Instant Replay

Synthetic Intelligence -
Patent Pending

GENERATES:
DEMOS
PRESENTATIONS
TUTORIALS

Memorize/Instant Replay *remembers how you ran your program, so it can run it again automatically. The memorizer even remembers elapsed time between key strokes, as well as popped up windows. Create amazing self running demos in minutes. Includes variable fast forwarding, keystroke editing, and more ...*

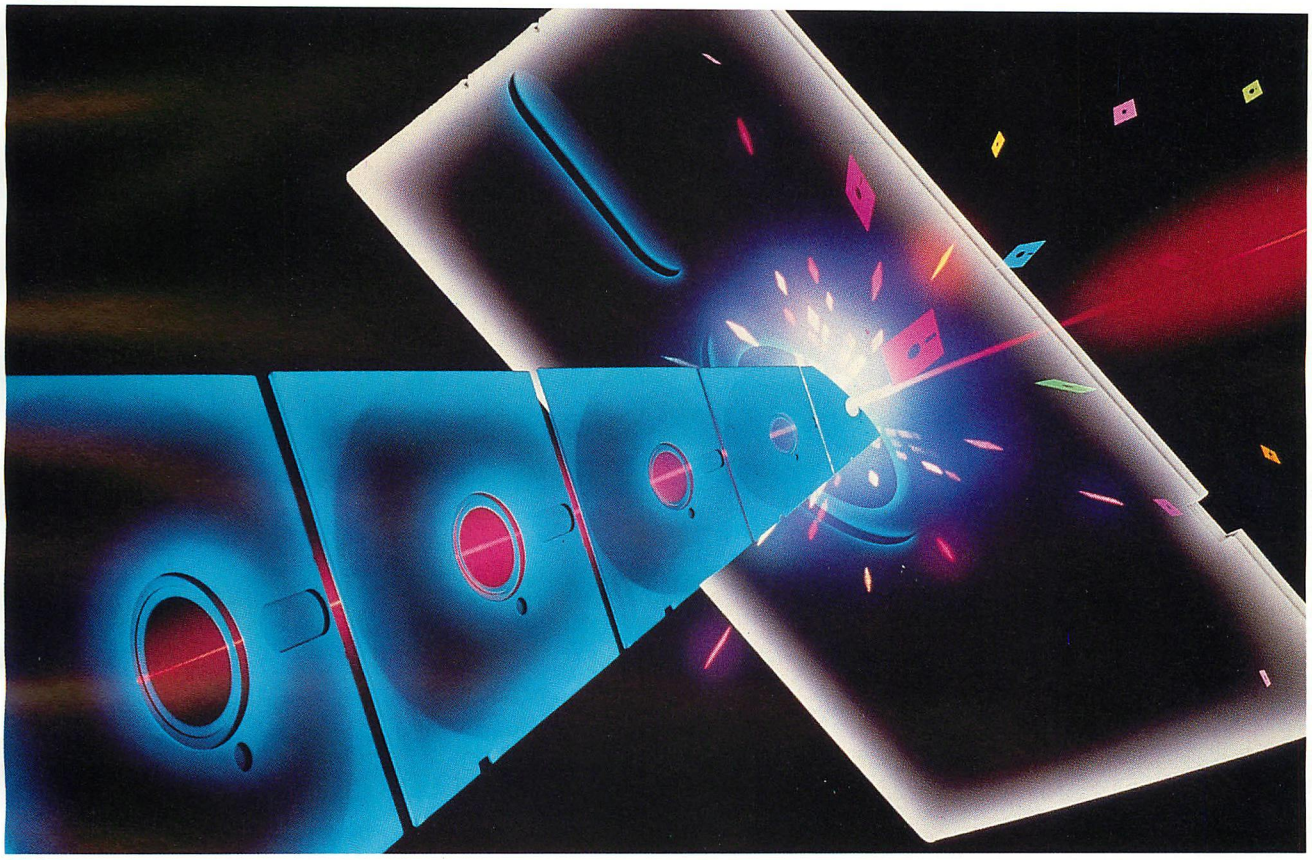
Screen Painter *For creating 100% user designable Pop-Ups and Menu Windows.*

Run-Time Screen Scanner *responds instantly to operator requests. Bounce bars, run programs, run Dos commands, or select new menus, from windows created with screen painter.*

Screen Grabber *for saving any active screens that can be used with the Screen Painter/Processor to create your own slide presentations or demos.*

File Scanner *processes and displays prepared text files automagically.*

Call or Write for Ordering Information



_____ *Instant Replay* ™ *$89.95*
_____ *Demo Diskette* *$ 5.00*
_____ *Poster* *$ 3.00*

60 Day money back guarantee.
For IBM PC / XT / AT and True Compatibles

SYSTEMS SOFTWARE

SYSTEMS SOFTWARE

APPLICATION DEVELOPMENT SYSTEMS

ADVANCED DEVELOPMENT TECHNOLOGIES

☐ Creator

Reduces code requirements. Traps errors. Provides multiple file access. Supports 99 indexes per data file, record locking and unlimited file/record size. Includes screen and report generator.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $99

AIMS + PLUS, INC.

☐ Aimsplus

Stores parameter inputs as data files which drive interpretive software. Provisions for exiting if exception code necessary. Applications access common data base.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,100 since 1978 ☐ Cost: $500-$6,500

☐ Remember

Add-on module for AIMSPLUS. Automates and combines manual procedures as single, menu-selectable process. Documents tasks in report format.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $800-$1,000

☐ Stat Plus

Histogram generator. Add-on module for AIMSPLUS. Displays relations between field and number of occurrences or percent of occurrences in addition to means, variances, standard deviation and total records analyzed.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 200 since 1981 ☐ Cost: $1,000

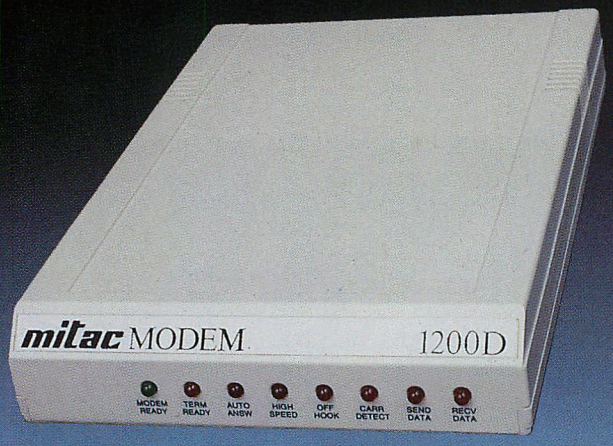
AION CORP.

☐ ADS/PC

Expert system applications development. Provides interactive editors, security, version control, graphics and multiple developer support.

IBM PC, AT ☐ 512 KB req. ☐ Cost: $750-$7,000

ALPHASOFT



☐ F.I.R.S.T. System

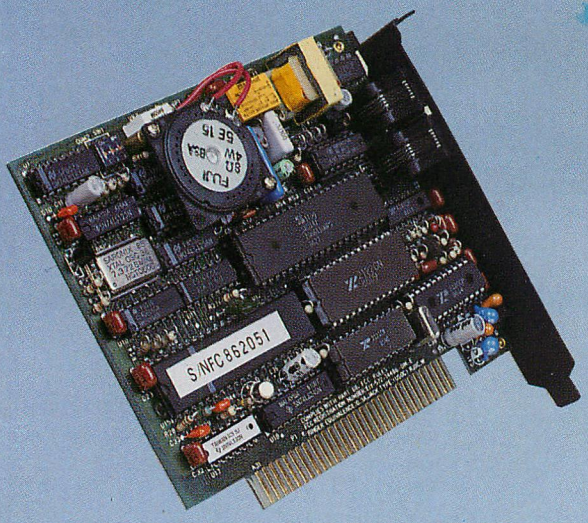
Maintains one or more data files, formats files into any record format, performs on-line full screen file maintenance and inquiry, sorts and selects subset of file by logical comparision criteria and lists sorted file in user-defined report format.

IBM PC ☐ 10 KB req. ☐ Copies sold: 40 since 1979 ☐ Cost: $500 per CPU

TALK IS CHEAP!

Now you can reach out and touch for only $149!

We admit that there is nothing extra special about our external and internal (half-card) modems . . . except for the low $149 price.



Like almost every other 1200 baud modem on the market, Mitac's modems feature:

- **Hayes Compatibility**
- **300-1200 Baud**
- **Auto Answer, Auto Dial**
- **Full or Half-Duplex**
- **One Year Warranty**

Mitac Modem 1200D
External Modem
$149.00 complete

We won't bore you by telling you about the wonder of networking . . . the 2,500 databases you can connect to and get news as it happens . . . stock quotes before the T.V. networks . . . legal or medical advice at the touch of a key. You may even find a "life-long" friend at the end of your connection.

You can even do your banking and shopping on the Mitac Modem . . . or send mail . . . even find a new and better job.

All this for $149.00

- *Plus FREE . . . PC Talk Communication Software*
- *Plus FREE . . . OAG (Official Airlines Guide) membership*

Book your own flight and save!
One booking could save you the price of the modem!

Mitac Modem 1200H
For Mitac computers, IBM, and Compatibles
$149.00

ANDYNE COMPUTING LTD.

☐ PCMascot

Allows real-time system developer to produce application systems which utilize concurrently executing programs to solve control or data acquisition problems. Synchronizes process execution through kernel primitives. Includes interrupt handlers. Kernels include application debug support.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $1,000

ASHTON-TATE

☐ dBASE III: The Developer's Release

Enables third-party developers to build custom applications using a relational DBMS.

IBM PC, XT, AT ☐ 256 KB req.

AT&T

Electronic Photography and Imaging Center

☐ Video Terminate and Stay Resident Software (ATTTSR)

Accessed via MSDOS software interrupt. Develops applications involving display/manipulation of continuous tone images from high-level programming languages. Reduces images to quarter size. Applies data and color compression techniques. Used with Truevision video Display Adapter or Image Capture Board.

IBM PC ☐ Introduced: 1985 ☐ Cost: $100

AUTOMATA DESIGN ASSOCIATES

☐ VML PROLOG

Reviewed Jan 1986 p. 145.

Fifth generation development tool for intelligent systems. Complies to Edinburgh syntax. Provides floating point arithmetic, virtual memory capability, exec function and stream input, debugging, tree-structured dynamically configurable domain system, and grammar rule notation.

IBM PC ☐ 320 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $200

THE BOSTON SOFTWARE WORKS

☐ BSW-Make

Implements UNIX make utility. Builds applications based on dependencies between files. Compiles, assembles or links affected files. Supports most compilers/assemblers, macros for parameterized builds and default rules. Manages text formatting and document preparation.

IBM PC ☐ Cost: $90

BYTEL CORP.

Software Development Division

SEE AD ON PAGE 364

☐ Genifer

Creates structured programs using dBASE III language. Includes data base definitions dictionary. Manages several applications simultaneously. Creates screens, menus and reports. Defines 9 zoom relations between files. Validates data against ranges, lists, separate code files and defaults.

IBM PC ☐ Cost: $395

CANNED KNOWLEDGE CORP.

☐ PROCODE

Generates COBOL business applications. Self-generates written operators guide and integrates all programs into functional system.

IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1983

CAP GEMINI SOFTWARE PRODUCTS, INC.

(division of CAP Gemini Sogeti)

☐ MultiPro

Life cycle automation tool. Links IBM XT or AT to IBM mainframe running VM or MVS. Development tasks downloaded to workstation. Mainframe-resident project library manages components including specifications, flowcharts, data flow diagrams, programs and documentation. Windowing capability.

IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $2,950

COMPUTER CORP. OF AMERICA (CCA)

☐ Accolade

CICS, CICS/VS-DL/I, COBOL and PCDOS application development environment. On-line screen design and map generator, COBOL code generator, data dictionary, full-screen editor, testing facilities, printer despooling system, password, terminal and data security, and source error message and help text maintenance facilities.

IBM PC, XT, AT, 3270-PC ☐ 1,000 KB req. ☐ Copies sold: 75 since 1982 ☐ Cost: $500-$1,500

☐ PC/Workshop

Prototypes, codes, edits and compiles Model 204 DBMS applications at PC without using mainframe resources.

IBM PC, XT, AT ☐ 384 KB req.

CONETIC SYSTEMS, INC.

☐ C/Tools

Data base application generation system and utilities. Performs file, entry form, menu and report creation by answering prompts. Provides utilities for converting, copying and duplicating files.

IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $795 and up

CONVERGENT SOLUTIONS, INC.

☐ Formal Applications Structuring Technique

Library of routines for context management, memory management, function key processing, error handling and forms management. Scrollable form areas. Simulates system functions before writing code. Default screen environment and debug facility.

IBM PC ☐ 512 KB req. ☐ Copies sold: 35 since 1983 ☐ Cost: $4,500

CS LABORATORIES, INC.

☐ C/Script II

Generates RM/COBOL source code for report, file maintenance and inquiry programs. Includes data dictionary and 3 program generators.

IBM PC ☐ Copies sold: 40 since 1982 ☐ Cost: $1,000-$3,500

DASTRA AMERICA, INC.

☐ MU/FO

Includes Real-time Executive, Database Manager and Application Processor modules. Supports disk buffering, transaction file, data security, record lockout, concentric forms, form definition, records/lists, form/report generation, variable records, forms editing, word processor and accounting system.

IBM XT, AT

DATA ACCESS CORP.

SEE AD ON PAGE 309

☐ DataFlex

Reviewed Aug 1985 p. 52.

Comprehensive, transportable application development environment for 8/16 bit, single-/multi-user and LAN systems. Provides programming language, relational DBMS, image screen processor, code/report generator and utilities. Includes file definition, on-line, multi-key ISAM and user-defined macros. Word processing option available.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 40,000 since 1981 ☐ Cost: $750-$1,250

DATA INTERFACE SYSTEMS CORP.

☐ DIS31 (Data Interface System 31)

PC to mainframe full-screen interface to applications developed in COBOL under async driver. Screen/hardcopy function switching, report browsing tools, applications developed with built-in screen painter, and standard file I/O for nonterminal files.

IBM PC ☐ 128 KB req. ☐ Copies sold: 1 since 1984 ☐ Cost: $475

DATAMED RESEARCH, INC.

☐ Miniac

Creates vertical market software. Combines standard UCSD Pascal with Macro language preprocessor plus precompiled units and other standard code. Preserves programmer control over nature and operation of final product. Macros cover file management, sorting, searching, data entry and report writing.

IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1979 ☐ Cost: $450

DIGITAL RESEARCH, INC.

☐ GEM 86 Developer Kit

Designs graphics-based applications for GEM Programmer's Support service. Language bindings and device drivers. Creates raster graphics such as icons, pull-down menu, windows and dialogue-alert boxes.

IBM PC ☐ 512 KB req. ☐ Cost: $500

DIGITALK, INC.

☐ Methods

Implements Smalltalk object-oriented programming environment. Enables PC to access remote UNIX systems via RS-232 port. Reads UNIX files/directories without issuing UNIX commands. Accesses computer bulletin boards via modem. Executes DOS/UNIX commands/programs.

IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $79

DIMENSION SOFTWARE SYSTEMS, INC.

☐ FREEFORM

Front end application development for Britton Lee IDM. Screen builder, report writer and internal language. Applications developed on one host run unaltered on other hosts.

IBM PC ☐ 320 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $15,000

DYNAMIC MICROPROCESSOR ASSOCIATES

☐ FORMULA IV: The Application Creator

Relational data base with ability to run multi-user without networking or hardware modification. Designs custom applications using English-phrase command language. Contains an on-line help facility and free-format report generator. Sorts and updates.

IBM PC, AT, XT ☐ 256 KB req. ☐ Copies sold: 15,000 since 1984 ☐ Cost: $695

EDVENTURE SOFTWARE PUBLISHING, INC.

☐ ESA

Stores and retrieves 250 display formats and data linkages. Validity checking. User-definable display formats and diagrams. Windows. DBMS. Supports engineering, scientific and management science applications, linear programming, project scheduling and solution of linear and nonlinear equations.

IBM PC

FLEXWARE

(division of Microfinancial Corp.)

☐ Application Development System

Application definition using common data dictionary, data base, application modifications and end-user documentation. Provides formatted screen data collection, operator interaction, report writer, query processor, record and file locking and data protection. Allows customization.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 400 since 1975

FORTH, INC.

☐ polyFORTH II ISD 4

Integrated real-time application development system. Includes real-time, multi-tasking/user OS, FORTH high-level language compiler, assembler, editor, interactive debugging aids and utilities.

IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 2,000 since 1973 ☐ Cost: $600-$3,200

FOX & GELLER, INC.

☐ QUICKMAC
Simplifies macro programming. Develops applications while running Lotus 1-2-3. Includes full screen editor, syntax-checker and macro facility.
IBM PC ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $129

FUTURE TECHNOLOGIES INTERNATIONAL, INC.

☐ Environment
Applications generator and information management. Includes relational data access programming. Develops integrated applications comprised of single data base structure. Provides shared information capability. Multiple methods for data I/O. Audit trail capability. Self-documenting.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1981 ☐ Cost: $5,000-$300,000

GATEWAY SYSTEMS CORP.

☐ Synergist
Develops and maintains on-line applications using PC while securing/maintaining data base on HP 3000. Uses fill-in-the-blanks programming. Reduces host utilization. Checks for errors.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $9,000-$22,000

GENERAL DATA SYSTEMS, LTD.

☐ Dx Menu-Driven Interface
DBMS portable environment. Provides interfaces to develop application on-line or on PC with GDS' Dx Data Dictionary, Dx Relational Data Base, Dx Transaction Generator, Dx Source Librarian, Dx Report Generator, Dx Screen Generator, Dx Database Language and Dx Host Language Interfaces.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

☐ Dx System
Supports development and operation of high volume on-line transaction-oriented systems. Combines relational data base technologies centered around a data dictionary with fourth generation language. Includes non-procedural capabilities for screen, report and program generation. Develops portable applications.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983 ☐ Cost: $1,400

GLOBAL TECHNOLOGIES CORP.

☐ dBase Development System
Application development system for dBASE II and III. Provides source, utilities and programs for application development. Includes editor, library manager and windows. User can edit 4 command files on screen.
IBM PC ☐ Cost: $245

H & A COMPUTER SYSTEMS

☐ PXS (Program Executive System)
Applications development and operations extension for DOS. Provides high-level language menu processor, job stream processor, sort, disk utilities, production system control, print spooler and data management for direct, sequential and multi-indexed files with file recovery.
IBM XT, AT ☐ 150 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $590-$1,180

☐ PXS Program Executive System
Application development and operations extension for EDX. Offers high level language, menu processor, job stream processor, screen generator, report generator, partition manager, sort, utilities, documentation system, file management for sequential, direct and multi-indexed files, and automatic file recovery.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 3,500 since 1977 ☐ Cost: $1,500-$3,000

HAWAIIAN VILLAGE COMPUTER SOFTWARE

☐ Turbo ISAM Master
Generates Turbo Pascal programs using Borland's Turbo Database Toolbox. User can add, delete and edit records. Searches data base by key. Provides data base recovery. Supports multiple ISAM files. Interfaces HVCS's Turbo Screen Master.
IBM PC, XT, AT ☐ 196 KB req. ☐ Cost: $125

☐ Turbo Menu Master
Generates Turbo programs with dedicated screens or windows. Includes menu data base. Uses multiple screen colors. Allows entry and reorder of selections. Generates procedure, chain, execute or comment code for each selection.
IBM PC, XT, AT ☐ 196 KB req. ☐ Cost: $55

☐ Turbo Screen Master
Generates multi-screen programs. Allows user-specified field edits and processes. Generates screens independent of user-inserted program statements. Supports structures, arrays and declarations specifications. Redisplays protected field if value changes. Stores fields as Boolean, integer, real, character or string.
IBM PC, XT, AT ☐ 196 KB req. ☐ Cost: $90

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Application Display Management System
Reviewed Apr 1985 p. 149.
IBM no. 6024-119. Application Display Designer modifies screens, handles input and edits application program. Application Display Manager is run-time module to display screens as previously defined while controlling input, editing and keyboard function.
IBM PC, XT, Portable PC, AT, PCjr ☐ 128 KB req. ☐ Cost: $150

☐ EZ-Prep (Cross System Product/Application Generation)
IBM no. 6317-011. Executes IBM 81XX, 43XX, 30XX-based Cross System Product applications on IBM PC series. Supports sequential, relative record and indexed files. Imports and generates host developed applications. Imports application message files. Imports/exports application data files.
IBM PC, Portable PC, XT, AT, XT/370, 3270-PC, 3270-PC/G, 3270-PC/GX ☐ Cost: $1,200

☐ EZ-Run (Cross System Product/Application Execution)
IBM no. 6317-010. Executes EZ-Prep/processed applications and imports/exports application data files. Can be run in IBM TopView environment or invoked from IBM's PROFS/PC.
IBM PC, Portable PC, XT, AT, XT/370, 3270-PC, 3270-PC/G, 3270-PC/GX ☐ Cost: $125

☐ EZ-VU (ISPF/PC Development Facility)
IBM no. 6410-980. Provides screen editor with full-screen support. Creates and modifies screens interactively with program function keys. Sample panel facility creates similar panels from previously defined panels. Panel test facility views panels. Requires EZ-VU Runtime Facility.
IBM PC ☐ 128 KB req.

☐ ISPF XT/370 (Interactive System Productivity Facility)
IBM no. 5668-960/01.
IBM XT/370 ☐ Cost: $600

☐ Personal Computer Organizer
IBM no. 6317-027. Assists in installation of variety of specific applications.
IBM PC, XT, AT, XT/370, AT/370, 3270-PC ☐ 256 KB req. ☐ Cost: $150

INFOCENTRE, LTD.

☐ Speedware/MicroSpeedware
Menu and function key driven fourth generation application development. Designs and generates application source code, IMAGE data bases and customized user documentation. Includes designer, reactor, documentor, key retrieval, DBMS, microreactor and report writer.
IBM PC ☐ 256 KB req. ☐ Copies sold: 700 since 1980

INSPIRATION SYSTEMS, INC.

☐ Prevail - Applications Development Language
Generates customized applications. Couples with Prevail DBMS and Report Writer and has similar statement constructions. Combines data base and ASCII file data. Generates custom reports. Interfaces with other Prevail modules.
IBM PC ☐ 2,000 KB req. ☐ Copies sold: 100 since 1984

INTERNATIONAL SOFTWARE ALLIANCE

☐ Btrieve Record Manager
Builds files based on B-tree structures. Permits random and sequential keyed access to records in data base.
IBM PC ☐ Cost: $245

LANDRUM SOFTWARE, INC.

☐ File Clerk * Reporter
Creates BASIC programs by answering plain English questions. Report writer. Converts data as filing requirements change. Indexing and dynamic file search. Compilable.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 86 since 1982 ☐ Cost: $249

LATTICE, INC.

SEE AD ON PAGE 279

☐ TopView Toolbasket
Designed for application development with IBM's TopView multi-tasking/-window environment. Reduces use of Assembly language when interfacing with TopView. Controls windows, cursor, pointer and printer operations. Accesses TopView's cut and paste facilities. Offers debugging.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $250-$500

LIFEBOAT ASSOCIATES

SEE AD ON PAGE 291

☐ Formula II
Permits 16-bit programs to run in 8-bit environment, with single-user to multi-user modification. Consists of relational data base with sorting and selection, data recovery, English-based query language, form and report creator.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $695

LOGIQUEST, INC.

☐ Application 1
Set of Assembly routines that are extensions to IBM DOS, BASIC and Microsoft C. Creates network applications with choice of file or record locking. Develops and executes applications up to six times faster. Unlimited files, fields, records and 8087/80287 support.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $595

MAINSTAY SOFTWARE CORP.

☐ Mainstay
Develops analytical applications. Includes DBMS, programming language and interface toolkit. Provides environment for information analysis, modeling, forecasting, time-series, analytical data base querying and mathematical and financial functions.
IBM XT, AT ☐ 640 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $1,495

MAJIC SOFTWARE, INC.

☐ Mystic
Applicable to personnel records, MIS, mailing lists, sales and order processing, memberships and subscriptions, invoicing, tax computation, legal systems, medical records and real estate systems. Produces input and enquiry screens, menus, multi-file update and full, selective or conditional reports.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985

MICRO DATA BASE SYSTEMS, INC.

☐ K-Mouse
Mouse processing utility for KnowledgeMan/2. Calls can be imbedded within program logic of any KnowledgeMan/2 procedure.
IBM PC ☐ 320 KB req. ☐ Introduced: 1984 ☐ Cost: $100-$375

MICRO FOCUS, INC.

☐ Sourcewriter
Data dictionary based application generator. Provides data entry with range, lock-up, data-checks, data manipulation, file maintenance, screen-based inquiries, printed reports and service programs.
IBM PC ☐ 48 KB req. ☐ Introduced: 1983

MICRO/SYS

☐ BUS/Bridge
OEM board-level, embedded PROM development system. Accommodates MULTIBUS 8085/8086, MULTIBUS II 80286, VME BUS 68000, STD BUS 8088 and STD BUS Z80.
IBM PC ☐ 256 KB req. ☐ Cost: $1,295-$6,120

MICRO WORKSHOP

☐ Mastering 1-2-3 Macros and Databases
Designed for Lotus 1-2-3 versions 1A and 2. Includes desk and project management, macro-driven data base applications. Uses building block approach to create applications.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $40

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ Multiplan Application Programs
Builds worksheets for budgeting, financial statement ratio analysis and cash flow analysis.
IBM PC, XT ☐ 64 KB req.

MID-AMERICAN CONTROL CORP.

☐ Prompt Data Base Facilities
File definition, screen formatting, data entry, report writer, inquiry and transaction processing with relational data base access method. Integrates with PROMPT Data Language.
IBM XT, AT ☐ 128 KB req. ☐ Copies sold: 400 since 1978 ☐ Cost: $3,000

MIGENT SOFTWARE, INC.

☐ ENRICH
Allows users to take their own methods of doing business and incorporate them into each application. Suited to such applications as client records, financial reports, production/sales updates and office management forms.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 1,200 ☐ Cost: $395

MSI DATA CORP.

☐ ASDS
Creates programs for Azurdata Scorepad handheld terminal using PASCAL. Completed or altered programs transmitted over conventional telephone lines to Scorepad terminal. Provides two-way, error checking communications protocol.
IBM PC ☐ 64 KB req. ☐ Copies sold: 5 since 1983 ☐ Cost: $2,600

NATIONAL MANAGEMENT SYSTEMS

☐ Workstation Builder
Consists of hybrid relational DBMS, communications module for uploading/downloading data with mainframe, cursor-driven menus, report writer, data base update module with editing/validation, data base query facility with ad hoc report generator and procedural script language.
IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $1,995

NCP CO.

☐ Menu
Builds menu-based systems including front-ends, data entry, command language interpreters, data retrieval and mail sending and receiving programs. Validates fields, writes fields to file for data entry and executes DCL command procedures. Includes host language interface.
IBM PC ☐ Cost: $2,500-$25,000; lease plans available

NOVELL, INC.

☐ NetWare/Micro Focus
Allows NetWare users to access applications written in Micro Focus II COBOL. Micro implementation of ANSI level 2 COBOL standard. GSA approved.
IBM PC, XT, AT ☐ Cost: $495

ON-LINE BUSINESS SYSTEMS, INC.

☐ WYLBUR/pc
Provides data base development environment for PC applications programmers. Programmable communications permit communication and file transfer with other micro, mini or mainframe software. Provides full screen text editor, help facility and EXEC application programs.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $550

ORACLE CORP.

☐ SQL*IAF
Application generator and run-time system for forms-based applications. Includes screen painter. Produces multi-table query/update forms. User can apply data editing and validation criteria to data entered into forms. Extension to application generation facility in IBM's SQL/RT.
IBM RT PC ☐ Introduced: 1986 ☐ Cost: $2,000

PARAMETER DRIVEN SOFTWARE, INC. (PDS)

☐ Adept
Allows users to create applications by responding to simple English language prompts. Applications can be written to perform data input, file updates, inquiries, password protection, reporting and business forms printing. Links programs via menus.
IBM PC ☐ 512 KB req. ☐ Copies sold: 1,400 since 1984 ☐ Cost: $4,000

PECAN SOFTWARE SYSTEMS, INC.

☐ Insight Window Designer
Creates integrated window-oriented applications. Virtual library, natural library and configuration utilities. Includes window editor and data entry tools.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $80

☐ Power System Development Environment
Includes full-screen editor, file manager, configuration utilities, library manager, disk recovery tools, I/O interface and USCD Pascal compiler.
IBM PC, PCjr, Portable PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 250,000 since 1980 ☐ Cost: $100

☐ UCSD Pascal Program Development
Text editor, compiler, file handler, library utility and graphics support. Supports choice of p-code or native code or both. Separate compilation, DMA, memory segmentation, conditional compilation, extended precision arithmetics, conformant arrays and procedural parameters.
IBM PC ☐ 64 KB req. ☐ Cost: $80

PENCEPT, INC.

☐ Software Tool Kit
Applications development tool. Allows users to customize Penpad.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $195

PMI

☐ Repertoire
Modula-2 applications development toolkit. Includes full source, more than 200 low-level routines, and 4 high-level subsystems including screen design/display system, editor, natural-language analyzer, and DBMS supporting variable-length records.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1986 ☐ Cost: $64

PRO COMPUTER SCIENCES, INC.

☐ PRO-IV
Portable to ensure long-term value of applications. Developed applications are hardware, OS and data base independent and transportable vertically from micros to minis to mainframes or horizontally across vendor systems.
IBM PC ☐ 100 KB req. ☐ Copies sold: 1,500 since 1981 ☐ Cost: $2,000

QINT DATABASE SYSTEMS CORP.

☐ ADT (Application Development Tool)
Fourth generation language allows application development. Builds micro-based applications. Prototypes large scale mainframe systems. Documents user's view. Runs applications unmodified on QINT/SQL systems.
IBM PC, XT, AT

Q-N-E INTERNATIONAL

☐ Q-Pro 4
Reviewed Jan 1986 p. 126.
Fourth generation data base language. Full-screen editor. Specifies entry fields by placing cursor at entry field position and filling out form to define alpha, numeric or integer attributes and may/must enter or may/must tab instructions.
IBM PC ☐ 256 KB req. ☐ Copies sold: 8,000 since 1981 ☐ Cost: $595-$795

☐ Quic-N-Easi AG
Develops applications by typing desired screen, placing cursor at entry field positions and defining each field's characteristics. Includes menu generator and 15 pre-programmed function keys. Report generator handles 6 files, 255 accumulators, resorting and non-procedural language.
IBM PC ☐ 64 KB req. ☐ Copies sold: 4,000 since 1982 ☐ Cost: $395-$595

REALIA, INC.

SEE AD ON PAGE 295

☐ REALCICS
CICS applications development for IBM mainframe or PC. Converts CICS command-level COBOL programs to form that can be compiled by REALIA COBOL. BMS macro processor produces tables and COBOL copy members required for mapped screen use. Includes map editor.
IBM PC, XT, AT, 3270-PC ☐ 512 KB req. ☐ Cost: $995

REFERENCE TECHNOLOGY, INC.

☐ Clasix STA/F Key
Multiple key information retrieval using IAM to accelerate application development. Allows fixed or variable length records. Indexes fields within data bases stored on read-only optical disks. Interfaces with CLASIX STA/F File.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985

RELATIONAL DATABASE SYSTEMS, INC.

☐ Informix-ESQL/C
Tools for customizing data base use and writing data base applications. Embeds SQL statements and incorporates into C programs. Accesses C functions. Based on industry standard C-ISAM subrouting library.
IBM PC ☐ 512 KB req. ☐ Copies sold: 76,000 since 1985 ☐ Cost: $595 and up

☐ Informix-4GL
Fourth generation application building language. Supports industry standard SQL. Includes custom screen generation, custom menu building, built-in report writer and on-line help. Compatible with INFORMIX SQL.
IBM PC ☐ 640 KB req. ☐ Introduced: 1986 ☐ Cost: $995 up

RELATIONAL TECHNOLOGY, INC.

☐ Ingres/Applications
Fourth generation language for developing forms-based applications without conventional coding. Uses Ingres Relational DBMS' integrated data dictionary. Tests applications with prototyping. Employs visual programming tools to develop/edit forms, implement transactions/queries and define new reports/graphs.
IBM PC, RT ☐ 512 KB req. ☐ Copies sold: 2,000 since 1982

SB ASSISTANT
(division of Advanced Creative Technologies, Inc.)

☐ MultiSolver
Produces finished BASIC applications in word processing, financial planning, GL, data base, mailing list/merge letter, AR, budgets, bar charts, checkbook, invoicing, music composition and appointments.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 10,000 since 1984 ☐ Cost: $295

SOFTWARE DESIGN TOOLS, INC.

☐ X-Tools
Generates program source code for C, PL/M, Pascal, FORTRAN 77, COBOL and BASIC languages. Allows debugging, updating, modification, program testing and documenting. User can define program structure on screen, insert blocks and frame blocks with complex structures or relocate modules.
IBM PC, XT, AT

SOFTWARE MERCHANTS UNLIMITED, INC.

☐ Simple (System Implementation by Example)
Prototyping tool and application generator. Includes relational DBMS. Supports program generation, data entry/editing, logic, query, multiple file updates, program by example, pattern-recognition logic, import/export of foreign files, interruptible processing and non-procedural batch processing.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $695

SPERRY CORP.
Information Systems Group

☐ Personal MAPPER System
Fourth generation language environment. Multi-user. Networking for up to 3 terminals. Provides capability to write macro like procedures called runs.
IBM PC ☐ 256 KB req. ☐ Cost: $2,345

SPRINGTIME SOFTWARE SALES, INC.

☐ CRTForm
Applications generation system. Editor creates and maintains form files. Print utility produces user-specified hard copy and machine language run-time procedures. Programmer can control screen interaction and data entry.
IBM PC ☐ 256 KB req. ☐ Copies sold: 3,000 since 1981 ☐ Cost: $400

THE SUCCESS PRESS

☐ Turbo Pascal Library
Sixty procedures to execute DOS commands or BIOS functions. Reads from the screen, switches displays, searches directories, sets border color and writes directly to display memory. Implements pop-up windows.
IBM PC ☐ Introduced: 1984 ☐ Cost: $25

SYSTEM FACILITIES, INC.

☐ MPS (Microcomputer Programming System)
Develops micro applications. File I/O capabilities include B-Tree ISAM, and random and sequential access. String handling, program chaining and dynamic memory allocation for arrays and file buffers. Creates screen definition files and help files. In-line Assembly coding.
IBM PC ☐ 44-128 KB req. ☐ Copies sold: 35 since 1983 ☐ Cost: $149-$249

TEXAS INSTRUMENTS

☐ NaturalLink Technology Package
Produces NaturalLink natural language interfaces for MSDOS and PCDOS applications. Interface developed on TI Professional computer and linked with application code. Resulting application runs on any TI Professional. Optional run-time library allows application to run on IBM PC.
IBM PC ☐ 512 KB req. ☐ Cost: $1,500

THEOS SOFTWARE CORP.

☐ Assembler
Includes Theos 8 macro assembler and linkage editor. Accesses object file libraries, macros and files with pre-defined symbols for Theos 8 internal block structures.
IBM XT, AT ☐ Cost: $125

TLM, INC.

☐ Magic II
Includes windowing, recursive tasking, interactive relational data base and fourth-generation language functions. Supports LAN multi-user environment with file/record locking. Interactive or batch-oriented tasks. Performs 12 levels of subtasking with 9 available windows. Imports/Exports data to other systems. Supports Novell and IBM PC networks.
IBM PC ☐ 512 KB req.

TOM SOFTWARE, INC.

☐ Speed I Application Development and Data Base Management Utility
Generalized framework for system design. File volume recorded in file index. Design constraint of sector boundaries eliminated, sector boundaries automatically lapped when storing records. Hash access method. Sorts on seven ascending/descending levels, seven range checks.
IBM PC, XT ☐ 28 KB req. ☐ Copies sold: 4,200 since 1977 ☐ Cost: $800-$3,500

TOMINY, INC.

☐ Mach 1 Pad
Generation facility for application development. Includes DBMS with screen design, report generator, program generator and query capabilities. Provides Logic fourth-generation language. Operates in single-user environment.
IBM PC ☐ 128 KB req. ☐ Copies sold: 40 since 1986 ☐ Cost: $400

TOUCH TECHNOLOGIES, INC.

☐ INTOUCH
Application development tool. Includes novice language and extensions for programmers. Interrupts program execution, changes code and continues execution. Supports debugging including tracing program and recording execution times.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $1,000

TYLOG SYSTEMS, INC.

☐ dB WINDOW
dBASE II applications generator. Generates application down to documentation. Includes any number of data bases in an application, five indexes per data base, interactive queries, built-in report generator and password security system. Provides two data bases in one report and disk search for files.
IBM PC ☐ Copies sold: 1,500 since 1982 ☐ Cost: $249

UNICORN SYSTEMS CO.

☐ MicroCICS
Reviewed Dec 1985 p. 171.
Supports CICS testing, debugging and execution. Compatible with mainframe CICS.
IBM AT/370, XT/370 ☐ 768 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $4,495

VERSATERM SYSTEMS, LTD.

☐ VITAL (Versaterm Intelligent Terminal Application Liberator)
Uses data dictionary, forms creation utility, build facility and run time modules to present screens, do syntactical edits and facilitate corrections. Schedules and executes non-resident pre/post-presentation transient processing applications in BASIC, Assembly or other. Communications protocols available.
IBM PC ☐ 256 KB req. ☐ Copies sold: 2,500 since 1982 ☐ Cost: $2,500

VM PERSONAL COMPUTING, INC.

☐ Relay Gold Customizer's Toolbox
Designs communications software. Creates customized screens, menus and interfaces that integrates applications and communications. Uses multiple level password protection, restricting callers to selected directories. Includes Relay GOLD.
IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $500

WANG LABORATORIES, INC.

☐ PC Micro Focus LEVEL II COBOL
COBOL applications development. Components used in standalone/integrated mode. LEVEL II COBOL mainframe-level compiler enables Wang PC to compile/run ANSI'74 COBOL programs. ANIMATOR allows user to observe logical path of program execution. Includes screen generation utility.
IBM PC ☐ 256 KB req. ☐ Cost: $1,750

☐ Software Productivity Package
Consists of PC Multiplan, PC Word Processing, and PC Async Communications.
IBM PC ☐ Cost: $650

WEBCO, INC.

☐ Step-1 Application Generator
For small business. Uses English approach to systems operations with multiple choice menus, user-defined files and record names.
IBM PC, XT, AT ☐ 18 KB req. ☐ Copies sold: 30 since 1981 ☐ Cost: $2,500

COMMUNICATIONS— CONTROL SYSTEMS

ADP DATA SERVICES
(division of Automatic Data Processing, Inc.)

☐ DATAPATH
Links ADP's central computing systems. Screens information and downloads selected data to PC. Integrates data with Lotus 1-2-3 spreadsheet, graphics and management programs.
IBM PC, XT, AT ☐ 160-256 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $300

ADVANCED MICRO TECHNIQUES

☐ Micro-ez-LNK
Provides micros global communications with Western Union's Easylink. Dials, logs on, provides IDs of sending/receiving parties, and formats messages. Supports Electronic Mailbox, Telex I and II, International Telex, Telegram, Cablegram, Mailgram, computer letter, overseas mailgram and Infocom message types.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,100 since 1983 ☐ Cost: $95

AKRON SOFTWARE RESEARCH AND DEVELOPMENT

☐ DSPM (Dual Serial Port Manager)
Interrupt-driven serial port device driver. Buffers received/transmitted data. Implements communication protocols.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $99

ALL EASY CORP.

☐ Datalink
Features a transmit-receive speed of 9600 baud computer to computer, or 1200 baud over telephone lines, plus one-keystroke session control. Provides automatic dial and retry, CRC-16 error checking and full interrupts.
IBM PC ☐ 64 KB req. ☐ Copies sold: 600 since 1981 ☐ Cost: $100-$300

AMERICAN BUSINESS COMPUTER

☐ Electronic Document Exchange

Allows companies doing business with each other to transmit documents including POs, quotes, material releases, invoices, advance ship notices and electronic mail via point-to-point, computer-to-computer or third-party network.

IBM PC ☐ Cost: $2,000

AMERICAN HIGH-TECH INDUSTRIES, INC.

☐ MCS-A/MCS-A Plus (Multifunctional Communications System-Asynchronous)

Controls transfer of data between an unattended central PC and other computers. Supports unlimited terminal emulation.

IBM PC ☐ 192 KB req. ☐ Copies sold: 250 since 1984 ☐ Cost: $295-$1,195

AMERICAN VIDEO TELECONFERENCING CORP.

☐ In-Synch

Provides PC conferencing capabilities. Allows PCs communicating via modem to run applications jointly. Snapshot features capture text or graphic screens to be sent to another user. Allows 2 users to concurrently annotate and highlight any screen. Slide presentation capability.

IBM PC ☐ 384 KB req. ☐ Cost: $150

ANALOG DEVICES, INC.

☐ MCComm-MDOS

Provides runtime data communication between PCDOS hosts and programmable measurement-and-control front ends. Error detection features include checksum, timeout and retry.

IBM PC, XT, AT

ARTISOFT, INC.

☐ Envoy

Allows micros to interact with mainframes as a smart terminal with data capture mode. Provides file transfer and is compatible with data networks, bulletin boards, and electronic mail systems. Enables user to copy, delete, rename, type and catalog files.

IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $50

AST RESEARCH, INC.

SEE AD ON PAGES 161/172/173/174/175

☐ 5250/Async Dialup

Provides async dialup communications with 5251/11 emulation to IBM S/34, 36, 38, attached via twinax cable using AST-5251/11 or AST 5251/11 Plus. Hot-key between concurrent PCDOS and host sessions. Bidirectional file transfer.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $395

AT&T INFORMATION SYSTEMS

☐ Commkit Software AT&T PC Interface

Allows an IBM PC compatible running on MSDOS version 2 to utilize the resources of an AT&T 3B2 computer running UNIX System V.

IBM PC

☐ PC/PBX Connection Software

Converts PC into integrated voice/data workstation. Multi-tasking. Call forwarding, send all calls, priority calling and integration with Unified Messaging features. File transfer between PCs and between PCs and host computers. Async and optional sync terminal emulation. Use of System 75 and 85 modem pooling.

IBM PC ☐ Cost: $175-$700

☐ SoftCall

Provides storage, customized operating instructions and automatic dialing of up to 90 numbers. Adjusts modem to correct baud rate for each number. Log-in sequences with password protection, answer/file, call history logging and auto-redial. Voice/data provides split screen for 2-way data communications.

IBM PC, XT, Portable PC ☐ 128 KB req.

BATTERIES INCLUDED

☐ I*S Talk

Accesses on-line data bases, services such as Dow Jones and CompuServe, E-mail, bulletin boards and intra-computer conversations. Uploads/downloads to any device configuration. Provides 50,000 word real-time spelling checker, 3-levels of macros and memo functions.

IBM PC ☐ Cost: $80

BIT SOFTWARE, INC.

☐ BIT Com

Requires Hayes compatible modem. Accesses on-line services such as Dow Jones or Western Union's Easylink and dials up other PCs. Emulates most ASCII terminals. Sends and receives telex messages. Supports XON/XOFF protocol.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985

BLAISE COMPUTING, INC.

☐ Pascal Asynch Manager

Reviewed Aug 1985 p. 141.

Provides interrupt-driven and polling control over communications ports from within high-level language programs. Consists of toolkit of general routines which drive virtually any async device via RS232 ports, and includes high-level functions that help user develop commonly required communications applications.

IBM PC, XT, AT ☐ 24 KB req. ☐ Introduced: 1984 ☐ Cost: $175

BLAST/COMMUNICATIONS RESEARCH GROUP

☐ BLAST (Blocked Asynchronous Transmission)

File transfer and terminal emulation for micros, minis and mainframes. Includes SDLC/HDLC-like and a full-duplex, sliding-window protocol. Transfers files to and from Lotus 1-2-3, WordStar, dBASE II and VisiCalc. Auto-dials Easy Link and accesses public packet networks.

IBM PC ☐ 64 KB req. ☐ Copies sold: 15,000 since 1980 ☐ Cost: $250

BOS NATIONAL, INC.

☐ Communications (Asynchronous)

Async communications system. Provides multi-user capabilities. Lets file transfer operations take place in background partition of single terminal BOS/5 system, with foreground/background option, enabling interactive tasks while data transfer is in progress.

IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $200

BPI SYSTEMS, INC.

☐ Aura Communications

Allows access to data in other micros or public data bases. Features bi-directional async file transfer, advanced error checking and correction, unattended operations, activity log files and automatic redial/reanswer.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $150

BUTTONWARE, INC.

☐ PC-Dial

Exchanges any data with remote computers. Supports ASCII, X-Modem and X-Modem CRC protocols at speeds of up to 9600 baud. Works with auto-dial and manual dial modems. Multiple automatic log on files. DOS directories and commands from within program. Includes mini text editor and user-defined macros.

IBM PC ☐ 256 KB req. ☐ Copies sold: 12,500 since 1983 ☐ Cost: $60

CARTERFONE COMMUNICATIONS CORP.

(subsidiary of Cable & Wireless)

☐ PC/Reach

PC networking, file transfer, DEC VT-100 emulation, electronic mail, IBM 3278 emulation, data base communications and Telex access.

IBM PC ☐ Copies sold: 300 since 1985 ☐ Cost: $295

CAWTHON SCIENTIFIC GROUP

☐ Chip-Chat

Uploads/downloads files from other micros or mainframes. Also allows computer to act as an intelligent terminal when logging onto remote data bases and computer services. Sends/receives electronic mail.

IBM PC ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $195-$395

☐ Computer Telex Link

Designed for telex service including WU EasyLink, RCA, ITT and TRT. Sends and receives messages anywhere in the world. User may originate mailgrams, telegrams and international cables.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $195-$895

☐ TXL (Telex Link)

Interfaces microcomputers to Telex and TWX networks. Edits, formats and sends telex messages. Incoming telex messages are received, displayed, stamped with date and time and written to disk storage.

IBM PC ☐ 128 KB req. ☐ Introduced: 1978 ☐ Cost: $295-$495

☐ W $ L (Wall $treet Link)

Used with Dow Jones information network. Dials local Tymnet or Telenet number, sends user password and allows access to Dow Jones information with prompts.

IBM PC ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $195-$395

CHANG LABORATORIES, INC.

☐ Link Module

Extracts data from a mainframe or timesharing service. Facilitates external file analysis for insertion to a MicroPlan worksheet.

IBM PC ☐ 64 KB req. ☐ Cost: $295

CIPHERLINK CORP.

☐ Any Databridge

Permits ongoing data exchange between incompatible applications regardless of data formats, hardware or OS. Requires no modifications. Includes calculations peripheral.

IBM PC ☐ 512 KB req. ☐ Copies sold: 16 since 1984 ☐ Cost: $10,000

CLM/SYSTEMS, INC.

☐ COGO-LINK

Transfers data to and from COGO and survey data recorders and other systems. General, survey program and CAD systems interfaces. Requires COGO.

IBM PC, XT, AT, RT ☐ 640 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $2,000

COMMUNICATION MACHINERY CORP.

☐ CASE Kernel (Common Application Service Elements)

Application layer protocol. MAP 2.1 compatible. Includes association active/passive establishment, data exchange, orderly release and user abort.

IBM PC, AT

☐ FTAM 1.0 (File Transfer and Management)

Application layer protocol. MAP 2.1 compatible. Includes file transfer kernel, read, write and file management functional units.

IBM PC, AT

☐ PLC Communications

Serial line protocols interface IBM PC to Allen-Bradley and Gould/Modicon programmable logic controllers. Drivers become resident in the IBM PC and allow any application on the PC to access the logic controllers. Provides BASIC interface subroutines.

IBM PC ☐ 15 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $175; $1,000 source code

COMMUNICATIONS SOLUTIONS, INC. (CSI)

☐ **Disoss/Talk**
Distributes documents to one or more recipients. Retrieves documents sent by other users. Searches libraries to retrieve selected files. Works with Access/DIA to communicate with IBM's DISOSS. Can be used as sound programming base to build user-customized application programs.
IBM PC ☐ Cost: $10,000

COMPUTER SYSTEMS CONSULTANTS

☐ **CModem Telecommunications Program**
Supports dumb-terminal mode, upload and download in non-protocol mode and Christensen mode to allow communication over telecommunications facilities.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $50

COMPUTERLINE

☐ **CS-Talk**
Transfers data files between Plantrac/CS and other systems.
IBM PC, XT, AT ☐ Cost: $750

☐ **Opentrac**
Transfers data files between Plantrac and other systems.
IBM PC, XT, AT ☐ Cost: $750

CONWAY DATA, INC.

☐ **Geo-Econ NetsUser Communications**
Permits log on to Conway Data's Site Net. Allows user to download files. Message capability. Available as add-on to packages in Geo-Econ Software Series.
IBM PC ☐ 256 KB req. ☐ Cost: $150

CORPORATE MICROSYSTEMS, INC.

☐ **MLINK**
General-purpose, async communications system for microcomputers, minicomputers and mainframes. Facilitates data transfer among various computers and OSs. Allows micros or minis to act as remote terminal when connected with another computer.
IBM PC ☐ 100 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $195-$500

CORVUS SYSTEMS, INC.

☐ **Omni Share**
Allows IBM XT to share disk space with other PCs or compatibles. Requires transporter card and wire.
IBM XT ☐ Cost: $795 per connection

COSI

☐ **Tango**
Connects IBM and AT&T PCs running DOS with UNIX computers. Executes MSDOS commands/programs under UNIX hosts. Supports file transfer. Provides terminal emulation of DEC, IBM and Tektronix terminals selectable from UNIX host.
IBM PC ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $195-$295

COSMOS, INC.

☐ **R/COMM**
Interfaces microcomputers, running REVELATION, with mainframes and minis via RS-232C interfaces. Includes code that runs Prime computers.
IBM PC ☐ 320 KB req. ☐ Introduced: 1984 ☐ Cost: $500

DATA GENERAL CORP.

☐ **CEO Connection**
Allows user-transparent, bidirectional file and document transfer and conversion between DG DASHER/One intelligent workstations, IBM PC, XT and AT and DG CEO (Comprehensive Electronic Office) software.
IBM PC, XT, AT

☐ **PC Liaison**
Enables users to transfer files between DG's DG/One and IBM PCs or XTs.
IBM PC, XT ☐ 192 KB req.

DATAMAX CORP.

☐ **BC-Connect**
Allows IBM PCs and compatibles to interconnect with BLIS/COBOL based minicomputers. Terminal emulation and file transfer capabilities.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $750

DATAVIZ, INC.

☐ **Maclink**
Communications package. Moves files from IBM PC to Apple Macintosh.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1985 ☐ Cost: $125

DATEM, LTD.

☐ **dDCM 810; dDCM 810/R; dDCM 810/Q**
Provides development environment to combine MSDOS, iRMX86 and PDP-11/LSI-11 with industrial process control/data acquisition bus. Works with Datem dDCM 800 PC interface module. Includes message packet management, named device interfaces, message protocol support and user-defined message flow control. Manipulates RAM resident dDCM 810 operating environment.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $499-$750

DESERT TECHNOLOGIES
(division of Desert Teksystems Corp.)

☐ **Plexcomm**
Allows PC to concurrently support 10 RS-232 ports at 110 to 9600 baud speed. Runs several applications on single PC simultaneously. Uses communication logics language to control RS-232 port, modems, file transfers, ASCII or EBCDIC data transmissions and special character handling.
IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $995

DIALOG INFORMATION SERVICES, INC.
(subsidiary of Lockheed Corp.)

☐ **Dialoglink**
Contains communications and accounts manager to log amount of time spent connected on-line to Dialog Information Services. User creates and refines search strategies off-line, transmitting research request when dialing up system. Prints information received to disk or printer. Dials other information services.
IBM PC ☐ Cost: $125

DILITHIUM PRESS

☐ **PC to Mac and Back**
Exchanges information between IBM PC and Apple Macintosh, two IBMs, two Macintoshes, or computers with RS232 serial port. Accesses and saves data from CompuServe, The Source and Dow Jones.
IBM PC, XT, PCjr ☐ 128 KB req.

DIRECT*AID, INC.

☐ **Direct Connect**
Reviewed Sep 1984 p. 46.
Captures data to disk or printer; sends files to other computers. Includes XMODEM protocol. Features 25 help screens, screen paging, 9,600 baud throughput, programmable function keys, instant notification of communication errors and display and communication parameters.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $95

DPR SOFTWARE, INC.

☐ **Autotalk**
Allows unattended operation, multiple remote calls and multiple file transfers. Provides password protection.
IBM PC, XT, AT ☐ Cost: $199

DYNACOMP, INC.

☐ **PAB-COM Communications Program**
Allows IBM PC to communicate with another IBM PC, The Source or Dow Jones News Retrieval Service. Features manual or automatic dialing with or without automatic redial or delayed dialing and modes of operation for file transmission, reception or saving.
IBM PC ☐ 64 KB req. ☐ Cost: $40

DYNAMIC MICROPROCESSOR ASSOCIATES

☐ **ASCOM IV**
Allows micros to communicate with mainframes, minis and other micros and logon to timesharing systems. Features interactive, menu-driven and batch operations. Supports auto-answer and auto-dial modems. Compatible with Novell network and Xmodem protocol.
IBM PC ☐ 196 KB req. ☐ Copies sold: 75,000 since 1979 ☐ Cost: $195

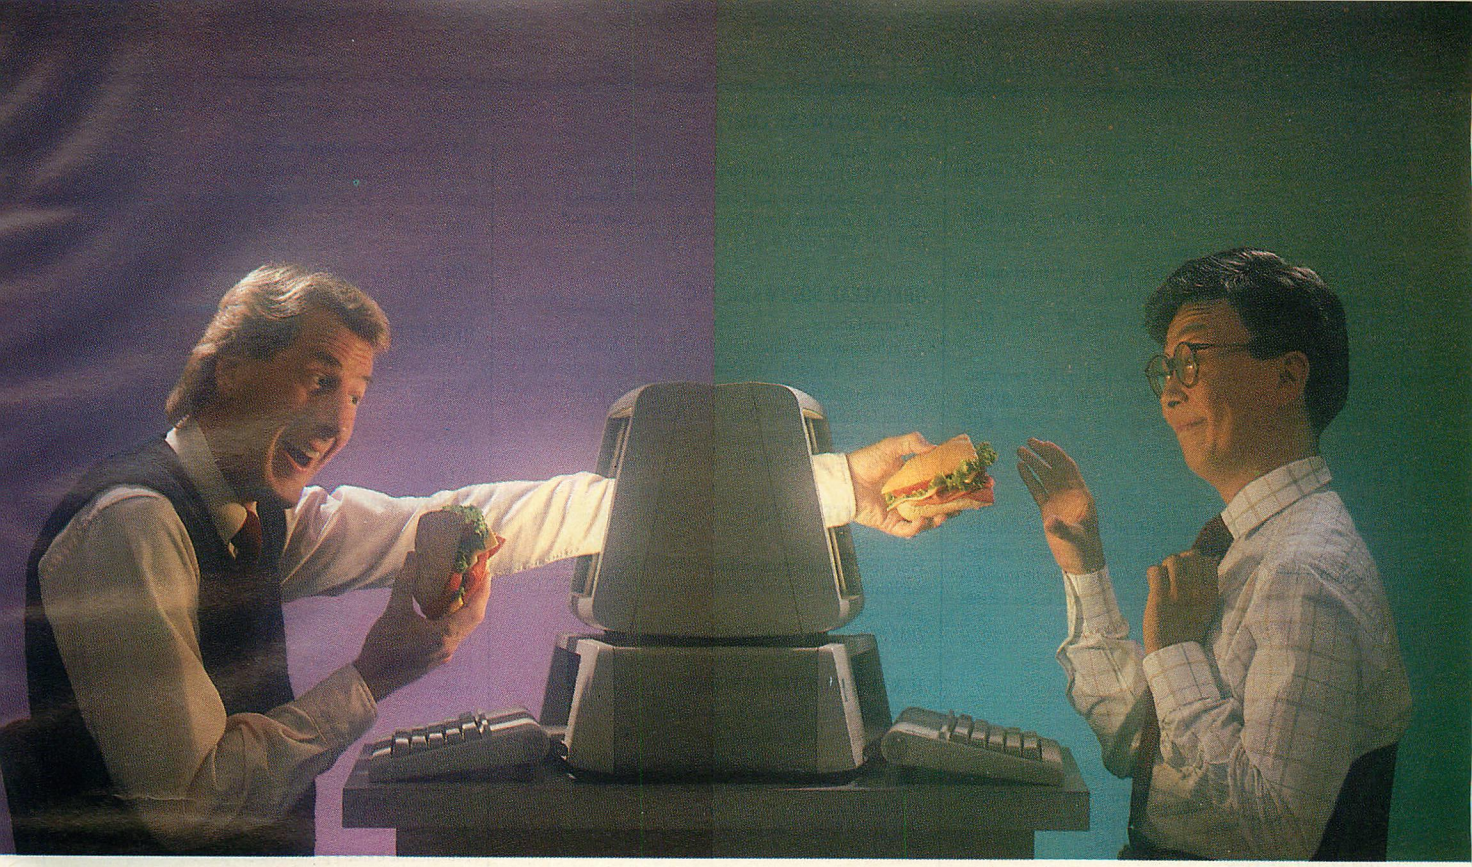
☐ **pcANYWHERE**
Allows terminal/computer with modem to remotely dial up and run PC. Accesses printers, peripherals and data on floppy or hard disk. Possesses keyboard control over PC functions and duplicates PC's screen.
IBM PC, XT, AT ☐ 196 KB req. ☐ Copies sold: 2,500 since 1986 ☐ Cost: $95

EASTMAN COMMUNICATIONS
(a Kodak Co.)

☐ **SYNCRA**
Links 2 or more computers for data transmission.
IBM PC ☐ 64 KB req. ☐ Cost: $695-$995

ELECTRONIC DATA SYSTEMS CORP. (EDS)
Technical Products Division

☐ **Communicator/Text Editor**
Forms intelligent terminal. Communicates with mainframes, minis and micros. Uploads/downloads, edits/creates text files and programs. Auto-dial and auto-log-on commands for THE SOURCE, Dow Jones, CompuServe and IBM's TSO and VM.
IBM PC ☐ 64 KB req. ☐ Cost: $99-$120



FRONTIER TECHNOLOGIES CORP.

☐ **Async Driver**
Allows async communications. Allows communications at 300, 1200 and 9,600 baud rates.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $95-$5,000

☐ **Com 1 Com 2 Driver**
Converts IBM BIOS calls to work with AdCom 2-M or AdCom 2-I communications controllers. Interactive mode. Major modules/subsystems transmit, receive and initialize. Features include baud rate up to 9,600 and hardware interrupt driven.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $95-$5,000

☐ **Compac Z**
Uses async communications through IBM-standard RS-232 interface of Frontier's AdCom 2 series for file transfer and terminal emulation. Reporting capability provides download from terminal screen to printer.
IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **Sync Driver**
Develops application programs for sync operation. Modules include initialize, transmit, receive and status.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $95-$5,000

Give on-site support in 15 cities. Then break for lunch.

Breakfast in Newark. Lunch in Boston. Antacid in Manhattan.

PC support and training people have always assumed it came with the territory. Because the only way to get the job done, it seemed, was to plop down next to the user and solve his problems one-on-one.

That's why we invented Carbon Copy. The ultimate remote control program for IBM PCs, XTs, ATs and compatibles. It lets you work one-on-one anywhere in the world from the comfort of your own office.

Carbon Copy lets you use your local PC to control and monitor any remote PC over an asynchronous communications link. Once you're connected, you can run the program of your choice.

Use your PC to monitor your remote users. This can be a tremendous timesaver for corporate support departments or product developers. If a PC user calls with a software problem, Carbon Copy lets you see what the problem is immediately. So you can solve it on-line. Interactively.

But that's just the beginning. You can also use Carbon Copy to diagnose remote hardware malfunctions. To install and demonstrate software at remote sites without leaving your desk. To train your remote users interactively. To access remotely-located local area networks. To transfer files between PCs at very high speeds, with data compression and encryption.

When Carbon Copy links two PCs, their screens, keyboards, printers and disks act as one. A keystroke entered on one simultaneously appears on the other.

Carbon Copy features include remote printer support, password protection and dial-back security, log file with complete audit trail, support of color and interactive graphics, the ability to switch between data and voice modes, and a chat window for typed conversations.

And as you'd expect, Carbon Copy is so user friendly that there are no complex, technical terms to learn. All commands are either simple menu-driven options or familiar PC-DOS type commands.

Carbon Copy is such a simple solution that it is already being used by training and support departments at most major corporations, computer dealers, and consultants.

See your local dealer and try Carbon Copy for yourself.

Your brain will love it. Your stomach will love it. Simultaneously.

Carbon Copy
The remote possibility.

Meridian Technology

1101 Dove Street, Suite 120
Newport Beach, CA 92660 (714) 476-2224

CIRCLE NO. 228 ON READER SERVICE CARD

☐ **TCP/IP**
Implements transmission control protocol and internet protocol. Provides interactive/on-line mode. Operates with AdCom 2-I Communications Controller.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $695

☐ **Technician Mode Diagnostic**
Allows fault isolation for trouble shooting. Reports functionality of AdCom 2-M Controller (go/no go test).
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $195

☐ **User Mode Diagnostics**
Allows diagnostic on power to be embedded in DOS programs. Reports functionality of ADCom 2-M controller (go/no go test).
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $195

GAMMALINK

☐ **GammaFax**
Enables GammaLink 9,600-bps GammaComm modem board to communicate with CCITT Group III digital facsimile machines over dial-up lines worldwide. Scanned images can be stored as disk files, ASCII files or graphics generated on PC can be sent to remote facsimile machines.
IBM PC, XT, AT ☐ Cost: $2,490

GANDALF DATA, INC.
(subsidiary of Gandalf Technologies, Inc.)

☐ **Switchmux 2000**
Supports async and BSC protocols. Multiplexes data from variety of SNA terminals and X.25 PADs or other bit-sync protocols. Supports ring and string configurations. HDLC and SDLC compatible. Supports speeds up to 19,200 bps.
IBM PC ☐ Cost: $125

GATEWAY COMMUNICATIONS, INC.

☐ **G/SNA PCcom**
Provides SDLC PC-to-PC communications and file transfer. Offers communications between remote PCs and between remote PC and LAN-connected PC without mainframe. Performs remote and local PCDOS syntax commands and interactive message exchange between PCs. Handles bulk data transfer.
IBM PC, XT, AT ☐ 192 KB req.

GATEWAY INFORMATION TECHNOLOGIES, INC.

☐ **Retrieval Series-Gateway Electronic News Search**
Captures, monitors and retrieves incoming Real Time newswire stories. Multi-user, multi-tasking capabilities. Allows remote dial-in.
IBM PC, XT, AT ☐ 1000 KB req.

GENERAL ELECTRIC INFORMATION SERVICES CO. (GEISCO)
(subsidiary of General Electric Co.)

☐ **Connector**
Exchanges data between spreadsheets and data bases on MARK III Service.
IBM PC ☐ Cost: $100 per end user

☐ **FTU (File Transfer Utility)**
Transmits binary and ASCII data between PCs and MARK III Service over async communication lines.
IBM PC ☐ Cost: $100

GLENCO ENGINEERING, INC.

☐ **Private Talk**
Communications package with integrated feature of security using DES. Remote control features implemented to allow user to take full control of remote PC.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $65

GOOD SOFTWARE CORP.

☐ **Let's TALK**
Moves ASCII data and text files between two computers. Transfers files to and from unattended computer. Chooses transfer speed and renames files. Converses through keyboard.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $179

GREENLEAF SOFTWARE, INC.

☐ **CommLibrary**
Asynchronous communications library for C. Runs 16 ports at 9600 baud. Features Xon/Xoff and Xmodem protocols. Includes Hayes series modem controls. Supports Digiboard Com4-II and Com8-II boards, Quadram QuadPort-AT 5 port boards and other multiple port boards.
IBM PC, AT ☐ Cost: $185

GRID SYSTEM CORP.

☐ **Manager**
Provides communications with GRiD Server and GRiD Central, duplicates, moves and erases files, and sets time on GRiD Compass clock.
IBM PC

H & A COMPUTER SYSTEMS

☐ **PCAM PC to Series/1 Access Method**
Handles file transfer and record access between an IBM PC, AT or XT and IBM Series 1. Transfers via telephone link or local attachment. Provides utility to copy data sets for saving files, passing data and retrieving data files.
IBM PC, XT, AT ☐ 34 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $1,050

HAWKEYE GRAFIX

☐ **BBS (Business Board System)**
Provides dial-up information/data entry center via modem for configured text menus and data base files. Distributes/collects information via menu selections. Includes data base utility for data entry forms creation, report generation and file management.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1986 ☐ Cost: $189-$399

☐ **COMMX/PC**
Supports multi-terminal emulation, multi-protocol file transfers, unattended control macros and multi-site dial/parameter directory. Emulates VT100/102/52, IBM3101, WYSE50, TVI950, HP2624/45, ADM 3-A/11 and ADDS/R60. Terminal color controls and status line. Supports XON/XOFF, KERMIT, XMODEM and COMMX micro-mainframe.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 50,000 since 1978 ☐ Cost: $99

☐ **CONSOLX/PC**
Provides remote computer operation for electronic mail and bulletin board systems or use of office computer from home. Includes password option, 300/1200/2400 baud access, test mode and program startup for caller. Allows batch execution after caller logoff.
IBM PC, XT, AT ☐ 32 KB req. ☐ Copies sold: 20,000 since 1978 ☐ Cost: $69

HAYES MICROCOMPUTER PRODUCTS, INC.
SEE AD ON PAGE 143

☐ **Smartcom II**
Reviewed Nov 1984 p. 151.
Manages data transfer. Stored communications parameters include telephone number, baud rate, data format, confidential mode and keyboard definitions. Allows network PCs to share modems and async communications. Includes key autopilot/startup sequences and received file naming. Supports hierarchical file system.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $599

HEADLANDS COMMUNICATIONS CORP.

☐ **PC-TALK III**
Uploads and downloads files. Allows selective character stripping/converting and stores pacing instructions for each entry.
IBM PC ☐ 64 KB req. ☐ Cost: $35

HENSON SYSTEMS, INC.

☐ **SYNCX-Network Workstation 2780**
Provides menu-directed bisync 2780 communications. Works on SIO, 8251A, 2661 and IBM ACA or look-alike chips. Controls word length, parity, printer echo and implementation-specific control.
IBM PC ☐ Copies sold: 5 since 1982 ☐ Cost: $200

HEWLETT-PACKARD CO.

☐ **AdvanceLink for the IBM PC**
Sends and receives files beteen IBM PC data bases and HP Touchscreen, HP 3000 minicomputer or remote data bases.
IBM PC ☐ Cost: $295

☐ **Link**
Provides links among IBM and compatible PCs and HP Portable Plus.
IBM PC

☐ **Monitor/IBM PC**
Works with HP's AdvanceLink on HP Touchscreen PC for ASCII or binary file transfer between 2 systems. Transmits files via full-duplex modems and telephone lines or via an HP 13242H cable.
IBM PC ☐ 128 KB req. ☐ Cost: $95

HILGRAEVE, INC.

☐ **HyperACCESS**
Async communications. Links PC to remote system or utility. Provides file transfer protocols and auto-execute language. Host mode allows remote users to call in, logon and run micro. May run external software from within HyperACCESS while on-line.
IBM PC ☐ 192 KB req. ☐ Copies sold: 5,000 since 1981 ☐ Cost: $149

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ **Access Manager**
IBM no. 6871-461.
IBM PC, XT, 3270-PC ☐ Cost: $400

☐ **APPC/PC (Advanced Program-to-Program Communication for the IBM PC)**
IBM no. 6467-038. Supports SNA application programming interface logical unit (LU) type 6.2 and physical unit (PU) type 2.1. Allows program-to-program communication over IBM Token-Ring Network and SDLC communication links.
IBM PC, XT, AT, Portable PC ☐ 185 KB req. ☐ Cost: $150

☐ **Asynchronous Communications Support**
Reviewed Aug 1984 p. 155.
IBM no. 6024-032.
IBM PC ☐ Cost: $60

☐ **Cluster Program**
IBM no. 6024-107, 182. Enables IBM PCs usable in clustered multi-user configuration. Users share fixed disk, send/receive data, transfer files and control remote access for operators. Sets up no access, read/write only or read/write security keys.
IBM PC, XT, Portable PC, PCjr ☐ Cost: $400 (6024-182)

☐ **Display Manager**
IBM no. 6871-464.
IBM PC, XT, 3270-PC ☐ Cost: $500

☐ **DisplayComm Binary Synchronous Communications**
IBM no. 6024-187. Provides batch data transmission among IBM PCs. Supports IBM Displaywriter, 6670 Information Distributor, 5520 Administrative System, Office System 6 and IBM PCs. Supports multiple data formats.
IBM PC, XT, AT, Portable PC ☐ Cost: $375

☐ **DMS/CMS XT/370**
IBM no. 5748-XXB/01.
IBM XT/370 ☐ Cost: $144

☐ **PC Support/38**
IBM no. 5714-PC1. Provides information exchange and resource sharing between an IBM PC and an IBM S/38. Directs IBM PC print output to an S/38 Printer. Permits access to a maximum of eight virtual disks on the S/38 per PC user.
IBM PC, XT, AT, Portable PC ☐ 384 KB req. ☐ Cost: $995

☐ **Personal Decision Series - Attachment/36 and Attachment/36 Edition**
IBM no. 5727-BRK; 6316-972. Minicomputer-to-PC link. Exchanges tasks and information between host system/36 and IBM PCs.
IBM PC, XT, Portable PC ☐ 256 KB req. ☐ Cost: $150

☐ **Series/1-PC Connect**
IBM no. 5719-CN1. Gives IBM PC access to Series 1 peripherals. Features IBM PC Network Program server function extensions, IBM PC disk emulation/print services, LAN independent services and interprogram communications.
IBM PC, XT, AT ☐ Cost: $400

☐ **4700 Personal Computer Application Services**
IBM no. 6934-406. Allows IBM PC to communicate with IBM 4700 Finance Communication System (FCS) Controller.
IBM PC, XT ☐ Cost: $300

INFORMATION MANAGEMENT CONSULTANTS & ASSOCIATES, INC.

☐ **Remote Data Retrieval System**
Retrieves data from portable 1,200 baud batch terminals, and stores formatted data on IBM PC, XT disk.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 1 since 1983 ☐ Cost: $1,500

THE INFORMATION PEOPLE

☐ **INFOSHARE II Universal Communications Package**
Offers information exchange between micros running CP/M, MP/M or MSDOS. Provides security and terminal emulation/file transfer capabilities.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $149-$250

INFORMATION TECHNOLOGIES, INC.

SEE AD ON PAGE 271

☐ **LinkUp 3270 FTS and FTS 1**
IBM host file transfer that supports TSO, CICS and CMS. Runs as standalone. Does not require host.
IBM PC ☐ Cost: $135

INFOSERVICES

(division of SCS/Compute)

☐ **Co-Partner**
Oversees file transfers between Prime and any micro system using PC-Partner. Provides error-correcting, bi-directional, wildcard and pathname file transfer. Protects file overwrite as query or rename.
IBM PC, XT, AT ☐ Copies sold: 200 since 1986 ☐ Cost: $995

☐ **INFOCOMM**
Transfers ASCII and binary files bi-directionally. Provides conversational mode to convert microprocessor into dumb terminal for routine interactive processing.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $195

INSPIRATION SYSTEMS, INC.

☐ **Prevail - Telecommunications**
Async terminal emulation. Transfers files to/from remote computers. Accesses remote data bases such as Dow Jones or The Source while remaining within Prevail User Interface. Interfaces with other Prevail modules.
IBM PC ☐ 2,000 KB req. ☐ Copies sold: 100 since 1984

INTEL CORP.

☐ **iDCX 96 Distributed Control Executive**
Develops/implements MCS-96 microcontroller designs in real-time applications. Manages/schedules tasks. Handles interrupts. Communicates via messages between tasks. Includes task priority scheme, task-state definitions and pre-emption facility. Supports PL/M 96 and register interfaces.
IBM XT, AT ☐ Cost: $750

INTELLUTION, INC.

☐ **ICM-4 (Intelligent Communications Module)**
Distributed communications support via 4 dedicated serial RS-232C channels and on-board 8088 microprocessor. Includes protocol handling, error detection, message timing and retry handling.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $1,595

INTERACTIVE SYSTEMS CORP. (CA)

☐ **Connect**
Provides transparent connection between user's terminal and port of another computer device.
IBM RT, AT/AIX, PC/IX

☐ **FTP**
Supports local-to-remote and remote-to-local file transfer. Lists remote directory. Deletes remote file. Changes mode of remote file. Supports dedicated and dial-up connections.
IBM RT, AT/AIX, PC/IX

☐ **ICCS (Interactive Corporate Communications System)**
Builds networks of UNIX computers and PCs. Includes office systems and software development applications. Supports mail/messaging, remote systems link, full-screen editor, document formatting, multi-terminal emulators and file transfer.
IBM RT, AT/AIX, PC/IX

☐ **INRemote**
User can submit jobs to and receive output from hosts supporting RJE workstations. Supports multiple hosts. Sends arrival notification for received output via electronic mail. Requires Interactive's IN/card RJE.
IBM RT, AT/AIX, PC/IX

☐ **INterm Host Command Set**
Executes PC applications under host control. Provides file transfers with error correction. Allows files to be copied to host for storage and copied back to PC for processing. User can store sequence of file transfer and program commands in script files.
IBM PC, XT, AT

Who needs DATA SOURCES?

- **DP Managers**
- **MIS Managers**
- **Systems and Operations Managers**
- **Programmer Analysts**

...Product Managers. Engineering Managers and their staff. General Managers. Consultants. Manufacturer's Sales Reps. In short, just about anyone who is involved with information processing.

Data Sources is the only directory offering thorough coverage of the entire industry. It's well-organized, easy-to-use, fast and accurate. That's why it has quickly become the No. 1 DP reference. If you're not already a subscriber, take this opportunity to place your order. We'll ship your first edition immediately.

To enter your Data Sources subscription, call: 1-800-443-0100 Ext. 251

INTERACTIVE TECHNOLOGY CORP.

☐ I.T. COMM
Async communications subroutine library.
IBM PC, XT, AT ☐ 256 KB req.

JONES FUTUREX, INC.

☐ Clear SNA
Supports SDLC protocol and SNA protocols used by IBM 3274 and 3276 control units. Provides 3274 Control Unit, 3278/3279 Display Station, 3287 Printer Model, async terminal support, multiple session screen display, screen to disk copy, print file to disk and disk to host capabilities.
IBM PC, XT, AT

☐ Secure SNA
Provides functionality of Clear SNA. Adds encrypt/decrypt option, IBM Feature Number 3680. Encrypt/decrypt is transparent to user.
IBM PC, XT, AT

KEA SYSTEMS, LTD.

☐ ZSTEMpc-4014
Transfers files to and from host. Communicates with The Source, Compuserve and Dow Jones. Emulates a Tektronix 4014 terminal.
IBM PC, XT, AT, PCjr

KENSINGTON MICROWARE, LTD.

☐ Easy Link Instant Mail Manager
Links PC and Western Union Easylink message service. Integrates word processing, automatic message management, address book management and communications.
IBM PC, XT, XT/370, Portable PC, AT ☐ 256 KB req. ☐ Copies sold: 15,000 since 1985 ☐ Cost: $150

KRONOS, INC.

☐ File Transfer
Creates a simple command file that addresses a Timekeeper, takes reports and stores them on disks. Uses KRONOS Error-Protected Protocol. Functions with KRONOS System 35 and System 70 Timekeepers.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $540

☐ High-Level Communications Interface
Implements KRONOS error-protected protocol. Allows software designer to focus on application programming. Interfaces with KRONOS System 35 and Sytem 70 Timekeepers.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $360

K-TALK COMMUNICATIONS

☐ K-TALK
Includes wild card transfer of all types of files with error checking and automatic correction. Permits user to determine and set number of data bits, stop bits and parity. Features Xmodem compatibility, automatic dialing and login/password support.
IBM PC ☐ 44 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $149

☐ K-TALK-ACCESS
Allows access to LAN with autoanswer, caller to send mail to host micro, user to read/send all types of files, and caller to run other programs.
IBM PC ☐ 32 KB req. ☐ Introduced: 1983 ☐ Cost: $150

LAGUNA LABORATORIES, INC.

☐ Decisionlink 5251/11
Bidirectional file transfer between IBM PCs and S/34, 36, 38.
IBM PC, XT, AT ☐ Introduced: 1984 ☐ Cost: $995

LASALLE MICRO

☐ BackComm
Command language. Built-in EMAIL system. Schedules calls for anytime with repeat. Operates in background while running other programs. Stores 34 million phone numbers. Built-in disk utilities, encryption and compression.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1986 ☐ Cost: $95

LATTICE, INC.

SEE AD ON PAGE 279

☐ SideTalk
Retrieves electronic mail. Schedules data transfers. Sets up bulletin board system. Allows users' telecommunications to be managed independently while system performs other tasks. Includes SCL (Sidetalk Communications Language) to modify/create customized communications processes. SCL controls multi-tasking. Memory-resident or standalone.
IBM PC ☐ 128 KB req. ☐ Cost: $120

LINDBERGH SYSTEMS, INC.

☐ OMNITERM 2
Reviewed Sep 1984 p. 46.
File transfer and terminal emulation facility. Disk-to-disk file transfer. Translation tables for all 256 codes for each I/O device. Transmit editor for on-line editing of single lines. Xmodem error checking, print screen. Handles unattended operation and password security.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $130

LINKWARE CORP.

☐ VAX: Information Server
Link between PC and VAX minicomputers. Up/down loads text and data files. Provides front-end processor capability.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $12,000

MARC ANALYSIS RESEARCH CORP.

☐ LinkMarc
Transfers word processing documents between PCs and minicomputers when used with WordMARC. Allows PC to use minicomputer as print server or file server in centralized environment and perform distributed file functions.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $425

MATHEMATICAL APPLICATIONS GROUP, INC.

☐ Slidelink
IBM PC

MBP SOFTWARE AND SYSTEMS TECHNOLOGY, INC.

SEE AD ON PAGE 293

☐ SNA DIA Communications Software
Includes LU6.2 functionality. Exists as application on top of LU6.2 protocols. User-definable screen interface. Provides document exchange and electronic mail capabilities throughout DISOSS networks. Accesses IBM's Document Library Services.
IBM PC ☐ 128 KB req.

MEAD DATA CENTRAL, INC.

(subsidiary of The Mead Corp.)

☐ NEXIS
Accesses NEXIS news retrieval which contains text from 160 newspapers, wire services, newsletters, professional and trade journals, SEC filings, brokerage and investment banking and OSHA reports. Access to NEXIS provides access to all other Mead Data Central services except LEXIS.
IBM PC, XT, AT, 3270-PC, Portable PC, PCjr ☐ 128-256 KB req.

MEGAWEST SYSTEMS, INC.

☐ MegaNet
Accommodates 110 to 9,600 baud lines over standard RS-232C interface. Uses check characters, retransmits data and operates in bi-directional mode.
IBM PC, XT ☐ 32 KB req. ☐ Copies sold: 75 since 1979 ☐ Cost: $2,000 per 2 CPUs

MERIDIAN TECHNOLOGY, INC.

SEE AD ON PAGE 247

☐ Carbon Copy
Reviewed Apr 1986 p. 84.
Allows remote execution of any PC software from another PC located any place in world. Remote data entry, teleconferencing, and remote system support.
IBM PC, XT, AT ☐ 25 KB req. ☐ Copies sold: 75,000 since 1984 ☐ Cost: $195

M/H GROUP

☐ BlueLink
Disk-to-disk document conversion between IBM DCA Revisable Format and Wang PC Advanced Word Processing. Standard IBM utilities and communication products provide the link between DCA documents and DisplayWrite, DisplayWriter, 5520, System 36 and DISOSS.
IBM PC ☐ Cost: $495

☐ PcCom
Bisync PC to PC communication of any MSDOS file.
IBM PC

☐ TextCom
Transfers documents from Multimate to Wang and from Wang to Multimate. Provides error checking. Sends documents at 1,-200, 2,400 or 4,800 baud. Transfers format settings, tabs, line wrapping, center codes, page ends, underscoring, bolding, superscripts and subscripts.
IBM PC ☐ Cost: $749

☐ W-Link
Disk-to-disk document conversion between Wang Word Processing and Multimate, DisplayWrite I, II, III, WordPerfect and WordStar.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $395

MICHTRON, INC.

☐ MI TERM
Accesses bulletin boards, Compuserve and The Source. Transfers files direct from disk with any remote system. Supports Xmodem and DFT protocols. Sends binary files as electronic mail messages with 2 levels of checksum, extraneous character trapping and embedded comments.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $80

MICRO DATA BASE SYSTEMS, INC.

☐ K-Comm
Communicates with computers at remote locations. Transfers or exchanges data during knowledge processing or within any program from computers at different locations.
IBM PC ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $225-$850

☐ LAN KnowledgeMan/2
Relational data management, third-generation spreadsheet, ad hoc query language, statistical analysis, math functions and calculations, screen I/O management, passwords, read/write controls, encryption security and structured programming language.
IBM PC ☐ 320 KB req. ☐ Introduced: 1984 ☐ Cost: $1,795-$3,325

MICRO DIMENSIONS

☐ PC-COMM
Async communications. Handles up to 9,600 baud. Supports manual/autodial modems and XMODEM and XON/OFF protocols. Stores 26 user-defined frequently called remote locations.
IBM PC ☐ Cost: $50

MICRO-INTEGRATION CORP.

IE Systems Divisions

☐ BIS-HASP
Provides translation, packing/unpacking, and data stream management for RJE multi-leaving HASP, POWER, RES, or JES point-to-point workstation. Supports console commands, assign/unassign device at will, diagnostic tools, on-line statistics, configuration program and 10 international keyboards.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $695

☐ Micro-SNA/5250
Connects PC to IBM S/3X. Supports up to 9 user-configurable display and printer logical units. Runs S/3X tasks in one/all logical units concurrently. Provides application program interface. Emulates Model 5224, 5225 and 5256 printers.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $695

MICROCOM, INC.

☐ Era 2
Transfers files over phone lines, accesses over 175 on-line data bases, conducts meetings, handles electronic mail, sets and stores communication parameters, provides file maintenance commands while connected to another computer and permits unattended data transmission.
IBM PC, XT, PCjr ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $499

☐ MNP (Microcom Networking Protocol)
Allows data communication between similar and dissimilar PCs, networks or mainframes. Allows user to incorporate changes into the basic protocol structure through five layer architecture.
IBM PC, PCjr ☐ Cost: $100

MICROSTAR SOFTWARE, LTD.

☐ MVDI-Communications
NAPLPS-ASCII communications package for accessing videotex and text-only data bases. Automatic dialing facility. Supports different color and monochrome graphics cards.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $75-$100

MICROSTUF, INC.

☐ Remote
Reviewed Apr 1986 p. 84.
Allows operation of PC and software from any location via terminal or PC. Contains electronic mail, supports Crosstalk and Xmodem file transfers. Individual password protection. Dial-up or direct connection supports up to 9,600 bps, autobaud up to 2,400 bps.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $195 (req. on host only)

☐ Transporter
Accommodates unattended data transfer. User creates a task list to send files to or request files from any location, at any time, using non-technical commands.
IBM PC, XT, AT ☐ 96 KB req. ☐ Cost: $295 (includes Crosstalk XVI)

MICROTEC RESEARCH, INC.

SEE AD ON PAGE 304

☐ Communications Utilities
Enables object modules to be downloaded in ASCII or binary format from host to in-circuit emulator. Includes symbolic debugging.
IBM PC

MILLER MICROCOMPUTER SERVICES

☐ Forthcom
Permits RS-232C and telephone communications activities up to 2,400 baud (9,600 baud if direct wired). Runs as terminal on large computers. Spools input to printer. Provides data compression and error checking.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $50

MODCOMP

☐ PC Workstation Interconnect
IBM PC ☐ Cost: $500

MOORE PRODUCTS CO.

☐ Model 321 Expansion Satellite Configuration
Creates data base used for communications between local instrument link and high-level link. Provides data entry, editing and storage. Selects data transferred into LIL/HLL channels. Creates tag name data in origin library. Assigns configuration file ID.
IBM PC

☐ Model 352 SDLC Configuration
Allows entry, editing and storage of configurations. Provides commands for editing, printing, filing and transferring data. Stores configuration information including loop name, file name, author and descriptive comments. User can load, save, delete, upload and download configurations.
IBM PC

M.V. AND ASSOCIATES

☐ EXXTRACT Information Retrieval
Data transfer utility. Accesses field-level mainframe data for downloading, uploading, unattended remote print, and virtual floppy storage on host. Host controls security and data access. Provides user interface and communicates with host to effect data transfers.
IBM PC ☐ 50 KB req. ☐ Copies sold: 35 since 1984 ☐ Cost: $995

MYCROFT LABS, INC.

☐ Maxi-Mite
Multi-protocol async functions including auto-dialing, auto redialing, auto-answer, auto-log on, transfer of binary and text files, ten programmable function keys, supporting mainframe variables and 17 OS commands and carrying Xmodem/batch/CRC/Xtalk/Scom protocols and TWX. Ymodem protocol.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100,000 since 1985 ☐ Cost: $150

☐ Micro-Mite
Originates calls and transfers readable text. Includes preconfigured log ons for on-line data bases.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,000 since 1986 ☐ Cost: $50

☐ Mini-Mite
Includes standard sending and receiving, password protection, preconfigured and log ons, menu- and command-driven, Xmodem/batch, review buffer and printer toggle.
IBM PC ☐ 64 KB req. ☐ Copies sold: 10,000 since 1986 ☐ Cost: $95

☐ Verti-Mite
Designed for individual industries containing key telephone numbers to association, company, government, public or private on-line data bases. Search facility.
IBM PC ☐ 64 KB req.

NETWORK SOFTWARE ASSOCIATES, INC.

☐ AdaptSNA APPC
Provides Advanced Program-to-Program Communications (APPC) functions for implementing LU 6.2 communications applications for PC. Supports peer-to-peer and host-based communications.
IBM PC, XT, AT

NIGHTOWL SOFTWARE, INC.

☐ MEX-PC (Modem EXecutive PC)
Features auto-dial and redial, alternate long distance dialing, list dialing with automatic baud switching and creation of custom phone directories.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $60

NORTHWEST SOFTWARE ASSOCIATES (NWSA)

☐ XFERPC File Transfer Utility
Consists of master program for IBM PC and slave program for Intel MDS. Transfers files of any structure or content. Supports Intel MDS 800, Series IT/III and NETWORK NDS machines under ISIS-II.
IBM PC, XT ☐ 32 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $200

NORTON-LAMBERT CORP.

☐ Close-Up
Connects PCs. Views contents of associate's screens. Prints remotely and locally. Color graphics. Runs Framework or Microsoft Word in graphics mode. Creates Lotus 1-2-3 color graphs simultaneously on both screens. File transfer, movable chat window, and time and billing.
IBM PC, XT, AT ☐ Cost: $195-$245

☐ LYNC Telecommunications Software
Reviewed Apr 1986 p. 84.
Allows information exchange between micros, minis and mainframes, with Telex services, on-line data bases, bulletin boards and electronic mail services. Features unattended use and password protection.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 20,000 since 1980 ☐ Cost: $195

ON-LINE SOFTWARE INTERNATIONAL

☐ Omnilink
Features upload, download, file routing, automatic reformatting, customized menus and functions, English syntax query for selective file transfer download, help, and data dictionary. Ten levels of security.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 320 since 1983 ☐ Cost: $495

PARAGON COMPUTER CONSULTANTS

☐ Fastwire
Transfers files between PCs.
IBM PC

PATHWAY DESIGN, INC.

☐ pcPATH 5250
Allows remote communications between PCs and IBM S/34, 36, 38 on SNA networks. Emulates 5251 Model 12 and attached devices. Includes monochrome and color display support, 5250 command support and special function keys. Bidirectional text/binary data transfer.
IBM PC ☐ 320 KB req. ☐ Introduced: 1986 ☐ Cost: $750

PERSONAL BIBLIOGRAPHIC SOFTWARE, INC.

☐ Pro-Search
Accesses DIALOG 2, BRS and on-line services. Lets user download search results, logon and logoff automatically, and upload search strategies. Tracks and charges back search costs. Prints invoices and monthly accounting reports. Accesses up to 20 other on-line services.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $495

PHOENIX COMPUTER PRODUCTS CORP.

☐ Ptel
File transfer program. Supports ASCII, Kermit, Xmodem, ModemF and Telink. Provides on-screen error correction.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $195

PICK SYSTEMS

☐ MainLink
Bi-directional transfer of any type of data between machines. Moves items, files and accounts. Includes transmission error checking device and PICK/BASIC interface performed by assembler-driven precompiler.
IBM PC, XT, AT ☐ Cost: $295-$395

POLYGON, INC.

☐ poly-COM
Async communications package. Includes both Poly-XFR and Poly-TRM/VT.
IBM PC, PCjr, XT, AT ☐ 64 KB req. ☐ Copies sold: 60,000 since 1981 ☐ Cost: $200

☐ poly-Share
Creates VAX-based libraries of PC applications and files. Allows storage, organization and sharing of PC files and applications among PCs and terminals connected to VAX. Cross indexes entries by category, depositor name and date of entry. Three levels of security.
IBM PC ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $995-$2,795

☐ poly-XFR
Provides communications among host and personal business or microprocessor development systems. Checks for errors, retransmits data and operates bidirectionally.
IBM PC, PCjr, XT, AT ☐ 64 KB req. ☐ Copies sold: 50,000 since 1981 ☐ Cost: $150

POPULAR PROGRAMS, INC.

☐ Pop-Up TeleComm
Autodials phone numbers and connects users to information services including Dow Jones, CompuServe and The Source. Transmits/receives data. Accessible while another program is running. Makes connections through discount long-distance service.
IBM PC, XT, 3270-PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $80

POSEIDON SYSTEMS

☐ POLLPAC
Polls ECRs and POSs locally or over phone lines using Poseidon's PAC. Prepares call parameters. Schedules calls. Edits data files. Sequenced scheduler with programmable number of entries. Report generator produces log and exception reports.
IBM PC, XT, AT ☐ 128 KB req.

RACAL-VADIC
(subsidiary of Racal Electronics, Ltd.)

☐ George
Provides log-on sequences, dialing from directory, ASCII and Xmodem file transfer, unattended operation, built-in message editor, key mapping and password protection. Supports TTY, VT100, VT52, ADM 3A, ADM 31 and TVI912 terminal emulation.
IBM PC ☐ 192 KB req. ☐ Cost: $80

READIWARE SYSTEMS, INC.

☐ ReadiTerm
Command driven async communications program. Emulates VT100, IBM 3101 terminals and XMODEM protocol. Works with any modem or networks at speeds of 110 to 9600 baud.
IBM PC ☐ 96 KB req. ☐ Copies sold: 600 since 1982 ☐ Cost: $125

REAL-TIME COMPUTER SCIENCE CORP. (RTCS)

☐ UCOMM
Transfers programs and data from an IBM PC to an Intel Microprocessor Development System (MDS). Provides batch file transfer and Xmodem protocol and remote directory capabilities.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 10,000 since 1982 ☐ Cost: $250

REXON BUSINESS MACHINES CORP.
(subsidiary of Rexon, Inc.)

☐ PC Harmony
Provides bidirectional file transfer between PC and local or remote Rexon system. Reformats host data into PC application formats during or after downloading from Rexon system. Provides built-in validation and on-line prompting.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985

SHARED SYSTEMS TECHNOLOGIES, INC.

☐ ACE (Advanced Communications Emulator)
Async file transfer program with DEC VT-100 terminal emulation. Options include printer on/off, ignore specified characters during transmission, echo/no echo of characters, display/no display of characters, tab stop setting, handshake protocols, baud rates, character length, parity and stopbits.
IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $95

I. P. SHARP ASSOCIATES, LTD.

☐ Microcomm
Communicates with IPSA communications network.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $50

SIGEA SYSTEMS, INC.

☐ Telecommuter
Allows user to move text files and BASIC programs between TRS-80 Model 100 or other computer and IBM PC or compatible. User creates programs to run over standard telephone lines from remote terminal or computer.
IBM PCjr, PC, XT, AT ☐ 128 KB req. ☐ Cost: $200

☐ Telecommuter-plus
Word processing sytem with access to DOS from editor, file transfer with Xmodem, telcom communications with on-line access to editor, Xmodem and VT-100 emulation, host mode with eight access levels and Xmodem.
IBM PCjr, PC, XT, AT ☐ 128 KB req. ☐ Cost: $400

SOFTCORP, INC.

☐ PC/Freeway
Data communications between 300-9,600 baud, unattended file transfer, auto-dial and auto-answer, and pause during dialing. Maintains directory of 64 phone numbers. Sends and receives in background under IBM's TopView. Includes appointment system for up to 64 appointments. Requires Hayes Smartmodem.
IBM PC, XT, PCjr ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $49

SOFTGUARD SYSTEMS, INC.

☐ Blue Bridge
Allows users to read, write and format 3.5-inch microdiskettes.
IBM PC, XT ☐ Cost: $300-$475

SOFTKLONE DISTRIBUTING CORP.

☐ Mirror
Async data communications and file transfer. Dials, answers and redials. Creates script files and macros. Provides buffer, clock, editing, remote access, error checking, password protection and multi-tasking mode. Emulates DEC VT100/52, IBM 3101, TeleVideo 912C/920/925, TI 940, ADDS Viewpoint and Lear Siegler ADM-3A.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 5,000 since 1985 ☐ Cost: $50

SOFTWARE PUBLISHING CORP.

☐ PFS:Access
Enables access to information, timesharing, communication and home banking services. Remembers dial-up and log-on sequences and provides data encryption. Sends mail using MCI MAIL or Western Union Easylink.
IBM PC, XT, PCjr, Portable PC, AT ☐ Cost: $70-$95

THE SOFTWARE STORE

☐ Mastercom
Smart terminal and file transfer utility. Emulates terminals, captures data disk and/or printer from host system, exchanges files with like system or Christensen Modem 7 protocol equipped system.
IBM PC ☐ 48 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $49

SOFTWARE SYNERGY, INC.

☐ Respond/PC Host
Turns IBM PC or compatible into unattended host for async communications and file transfer with another PC. Auto-answers phone calls and auto-returns to answer mode if disconnected. Uses Xmodem error checking protocols. Two-way keyboard conversation, remote or local disconnect.
IBM PC, XT, AT, Portable PC ☐ 384 KB req. ☐ Cost: $195

☐ Respond/Secure PC Connect
Encrypts, decrypts, and transmits files between communication links. TTY emulation for async communications. Manages files, loads encryption keys, sends to and from encryption board. Includes PC expansion board.
IBM PC ☐ 256 KB req. ☐ Cost: $575

☐ Respond/3270 BSC Remote
Emulates remote 3276/2 controller and display with attached 3287 printer. IBM Bisync line support with configurable poll and station address. Hot key allows return to DOS applications while keeping poll and answer sequence active in background.
IBM PC ☐ 256 KB req. ☐ Cost: $795

☐ Respond/3270 Secure SNA Remote
Supports IBM SDLC protocol and SNA protocols used by IBM 3274 and 3276 control units equipped with IBM's Cryptographic. Encrypts/decrypts data that is stored on disk, transmitted on host network, or sent via public communications facilities. Includes PC expansion board.
IBM PC ☐ 256 KB req. ☐ Cost: $1,995

☐ Respond/3270 SNA Remote
Emulates 3276 Model 12 remote workstation with attached 3287 printer. Connected through sync modem or modem eliminator. PC appears to host as SNA/SDLC type 2 keyboard and display and LU type 1 or 3 printer.
IBM PC ☐ 256 KB req.

☐ Respond/5251/12 Remote
Emulates 5251 Model 12 remote workstation with attached 5256 dot matrix printer to connect to S/34/36/38. Switched, leased point-to-point or multipoint lines at speeds from 1200 bps to 9600 bps through sync modems or modem eliminators. TTY terminal emulation.
IBM PC ☐ 256 KB req. ☐ Cost: $795

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ Commstar VI
Performs terminal support functions. Integrates video, keyboard modem and output devices. Contains 2 modules. Supermodem operates terminal during timesharing. Configurator modifies Supermodem for variety of interactive environments. Interfaces with Compuserve and Teradyne M365.
IBM PC ☐ Cost: $99

☐ Interactive Modem
Allows xmodem protocol transfers between dissimilar computers. Supports several modems for each major computer system. Features automatic set-up. Derivative of Modem 7 program used on 8080 or Z80 computers.
IBM PC ☐ Cost: $30

☐ PC Line Monitor
Replaces communications line monitor. Displays data sent by either end of communications link in ASCII or HEXadecimal, enabling operator to analyze protocol information on communications link. Supports parity modes and baud rates. Combines with portable computer to allow mobility in analyzing communications hardware and software.
IBM PC ☐ Cost: $100

SOUTHEASTERN SOFTWARE

☐ Data Capture
Sends and receives text from disk files or capture buffer, then is viewed, edited, printed, and saved.
IBM PC, XT ☐ Cost: $90-$120

SPEEDS CORP.

☐ SPEEDS
Electronic delivery of computer-executable programs and files. Transmits binary code over standard telephone lines anywhere in the world.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $80

SPERRY CORP.
Information Systems Group

☐ DDP-5000
Sperry no. 7639-01. Communications protocol software. Establishes links among Sperry PCs, Sperry 1100s and other Sperry 5000 systems. Provides file creation, copy and deletion, job submission and cancellation and status determination.
IBM PC

☐ DIS 5000
Sperry no. 7640-01. Enables 5000/60 or 5000/80 to communicate with Series 1100 mainframe, Sperry PC or other Sperry Series 5000 systems. Provides file creation, copy and deletion, job submission or cancellation and status determination.
IBM PC

☐ PARS/IPARS PC Support System
Combines hardware and software and enables Sperry PCs to communicate with IBM-based airline reservation systems. Includes Transport Software, Development Software, Auto VML Software and Dupe Q Software, co-processor based communications board, second communications port and interface cable.
IBM PC ☐ Cost: $1,615

STAG MICROSYSTEMS, INC.

☐ StagCom-1
Operates Stag PROM programmers equipped with serial interface directly from PC. Uploads contents of master device or contents of Stag programmer's RAM from computer. Embedded software can then be printed out for review, edited or transmitted to distant locations.
IBM PC ☐ 256 KB req.

STRATUS COMPUTER, INC.

☐ PC/Connect Term, Host
Allows PC users to access/exchange information with Stratus Continuous Processing system over dial-up/dedicated link. Utilizes Stratus system's fault tolerance. Permits PCs to be used as async terminals. Performs file transfer. Suspends operation under VOS OS to operate PC application.
IBM PC ☐ Cost: $1,000-$2,000

SYNEX SYSTEMS CORP.

☐ PC-Harmony
Links IBM PCs to Wang 2200, Basic Four minicomputers and PICK-based systems.
IBM PC, XT, AT ☐ 360 KB req. ☐ Cost: $595-$695

SYNTAX SYSTEMS, INC.

☐ VIM FileTransfer
Supports bidirectional transfer to VAX and other computers on DECnet network. Performs file and code conversion between PC and VAX file formats.
IBM PC ☐ Copies sold: 70 since 1985 ☐ Cost: $500

TEXAS INSTRUMENTS

☐ TTY Communications
Allows TI Professional to communicate with Teletype terminals in async mode. Applications include replacement of terminal devices, public data base services, news retrieval services and intraoffice communications, distribution of files and programs to micros, data transmission to host and electronic mail.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $60

3COM CORP.

☐ 3+Share User
Local workstation program for file/print and name service.
IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $75

TITN, INC.

☐ ISO Session Layer
Functions include establishment, negotiation of optional services and token management. Performs air control and detection over Ethernet.
IBM PC ☐ 60 KB req. ☐ Copies sold: 5 since 1985

☐ Twice F.T.P.
File transfer protocol. Transfers files over a network.
IBM PC

TOUCHSTONE SOFTWARE CORP.

☐ PCworks
Allows the IBM PC or compatibles to communicate with and transfer data to a UNIX or VAX/VMS system, other PC or Apple Macintosh. Provides terminal emulation, file transfer and electronic mail capabilities. PC may be connected to UNIX system via RS232C async communication line.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1984 ☐ Cost: $195

UNIPRESS SOFTWARE, INC.

☐ Connectables Network: PCworks, MacLine, UniHost, UniHost/VMS
Transfers data between PCs/Macintoshes or between PCs and UNIX or VMS hosts. Provides mail system. Terminal emulation supports ANSI, TTY and VT100/52. Supports ASCII and binary file transfers. Prints or spools output to UNIX or VMS printer.
IBM PC ☐ 150 KB req. ☐ Copies sold: 5,000 since 1985 ☐ Cost: $145-$995

UNITED SOFTWARE INDUSTRIES

☐ ASCII PRO
Accesses remote data bases and news services. Includes terminal emulation, macro programming, on-line help, built-in text editor, data transmission and unattended remote operations.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 25,000 since 1984 ☐ Cost: $100

U.S. DIGITAL CORP.

☐ Copylink
Provides smart terminal simulation, Telex and file transfers between incompatible microsystems. Provides automatic calling, logon, disconnect, unattended remote operation and file handling. Compatible with Bell 103, 212A Hayes modems.
IBM PC ☐ 48 KB req. ☐ Copies sold: 10,000 since 1982 ☐ Cost: $100

☐ Copylink Plus
Allows procedures to be defined for communications in same way that data can be defined with data base software. BASIC-type commands and integral communications programming.
IBM PC ☐ 256 KB req. ☐ Copies sold: 4,000 since 1983 ☐ Cost: $150

US ROBOTICS, INC.

☐ TELPAC
Programs computer with modem commands to enable system to call any other data system. Contains file, telephone, utility, settings and help as subject headings. Includes multiple error detection.
IBM PC ☐ 256 KB req. ☐ Copies sold: 20,000 since 1982 ☐ Cost: $149

USMA COMPUTER CO.

☐ COM-Man
Communciations management system.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 10 ☐ Cost: $295

VICTOR TECHNOLOGIES, INC.

☐ IEEE 488
Allows parallel port to be used for communications with various instruments such as data acquisition and control products, measurement devices, and plotters that conform to the ANSI standard MC1.1 Digital interface for programmable instrumentation.
IBM PC ☐ 128 KB req. ☐ Cost: $195

☐ PC-Comm
Downloads text and object files. Interface-connection is made through the IBM Parallel Printer Adapter and the parallel port on computer.
IBM PC ☐ 128 KB req. ☐ Cost: $175

WANG LABORATORIES, INC.

☐ PC Asynchronous Communications Option
IBM PC ☐ Cost: $100

☐ PC Basic Support Services for WSN File Transfer and VS DP Terminal Emulation
Exchanges documents among Wang Computers. Operates between a Wang Professional and a Wang VS, OIS or other Wang computer. Provides multipoint secondary, X.25 or point-to-point transfer.
IBM PC ☐ 128 KB req. ☐ Cost: $100

☐ PC WSN Multipoint Secondary Transport
IBM PC ☐ Cost: $250

☐ PC WSN Point-Point Transport
IBM PC ☐ Cost: $250

☐ PC/VS Data Exchange Utility
File transfer between Wang PCs and VS systems. Converts PC file to VS print file and sends it directly to VS printer. Transfers data among various spreadsheets such as Lotus 1-2-3, VisiCalc and Multiplan.
IBM PC

☐ UJ-3201 Upgrade to Enhanced Local Communications
IBM PC ☐ Cost: $50

WATCOM PRODUCTS, INC.

☐ JANET/2
Transparent network provides four virtual diskette drives. Virtual diskettes are password protected. File space is defined using 20K to 320K virtual diskettes. Includes printer-spooler facilities.
IBM PC, PCjr, Portable PC ☐ 128 KB req. ☐ Copies sold: 70 since 1983 ☐ Cost: $1,200

WOOLF SOFTWARE SYSTEMS, INC.

☐ Move It
Transfers programs to/from each other. Features file compression, keyboard macros, scripting files, multiple protocol support, infilter and outfilter commands and automatic file send receive.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 25,000 since 1981 ☐ Cost: $125-$150

WORDCRAFT

☐ Micro Link II
Connects micro to other computers. Captures/sends files. Modem error correction. Auto-dial/log-on capabilities.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50,000 since 1981 ☐ Cost: $99

XI SYSTEMS TECHNOLOGY, INC.

☐ DSNM
Dials and distributes any data file and application programs to remote workstations. Accommodates hardware and architecture differences. Supports IBM host mainframe applications defined to VTAM. Designed for Fortune 1000 companies utilizing very large, dial-up/leased line networks.
IBM PC ☐ 320 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $75-$410

COMMUNICATIONS—EMULATION/SIMULATION

ADVANCED TECHNOLOGY CENTER

☐ PC 100/4010
Emulates DEC VT100 and Tektronix 4010 terminals. Transfers ASCII files two-way between host and PC.
IBM PC

☐ PC 100/4105
Emulates DEC VT100, VT52 and Tektronix 4010, 4014 and 4105 color graphics terminals. Features vectors, markers and text. Produces vector drawing at rates up to 25,000 pixels per second, and polygons with 195 patterns and dithers.
IBM PC ☐ 100 KB req. ☐ Copies sold: 10 since 1986 ☐ Cost: $350

AKRON SOFTWARE RESEARCH AND DEVELOPMENT

☐ **ISAC (Integrated Serial Asynchronous Communications)**
Terminal emulation of DEC VT100 and other intelligent terminals through menu driven operation. Includes file transfer capabilities, data filtering and translation, modem control and telephone directory.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $150

ALLOY COMPUTER PRODUCTS, INC.

SEE AD ON PAGE 129

☐ **Link-PC**
Provides keyboard and monochrome display and file transfer capability. Allows PCs to connect to clusters and operate as terminals.
IBM PC, XT, AT ☐ Copies sold: 250 ☐ Cost: $95

ATON INTERNATIONAL, INC.

☐ **Micro/Remote 3270 Emulator**
Emulates 3270 terminal. Enables IBM PC to act as IBM 3275 model 2 terminal. Accesses mainframe-based information. Transfers ASCII/EBCDIC files. Allows PC printer to emulate IBM 328X mainframe printer. Requires IBM's bisync communications adaptor.
IBM PC ☐ 24 KB req. ☐ Introduced: 1984 ☐ Cost: $9,500

ATTACHMATE CORP.

SEE AD ON PAGES 23/255

☐ **3270-PC Emulation Program**
Reviewed Feb 1986 p. 48.
Supports Digital Communications Associates IRMA 3270 interface board and IBM 3278/79 Emulation Adapter. Supports IBM 3270-PC API. Supports up to 4 concurrent 3270 host windows and PC window. Supports optional host graphics. Runs with Attachmate's proprietary 3-N-1 Coax Adapter.
IBM PC ☐ 53 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $395

AVATAR TECHNOLOGIES, INC.

☐ **PA-PLUS**
IBM 3278 emulation provides compatibility with Avatar PA1000 and PA1000E protocol converters. Allows customized keyboard for user-programmable layouts, keystroke record/playback or programmable functions keys. Provides dual-level password security. Supports Concurrent DOS and 3270 sessions.
IBM PC, XT ☐ Introduced: 1985 ☐ Cost: $100

AVOCET SYSTEMS, INC.

☐ **AVSIM Series**
Simulator/debugger for 6805, 6809, 8048, 8051, 6801, 8085 and Z80 families. Simulates chips including RAM/ROM boundaries and on-chip peripherals. Handles interrupts and I/O. Includes breakpoint facility.
IBM PC ☐ 128 KB req. ☐ Cost: $299 (IBM)

BARR SYSTEMS, INC.

☐ **HASP**
HASP emulation of IBM 360/20 and 3777-2. Transmits/receives into IBM's MVS/JES2, MVS/JES3 and VM/RSCS bypassing TSO and CMS. Includes LAN support, concurrent DOS, printer forms control, plotter support and unattended operation.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Copies sold: 2,500 since 1983 ☐ Cost: $890

BOS NATIONAL, INC.

☐ **Communications (2780/3780)**
Provides IBM 2780/3780 emulation.
IBM PC, XT, AT ☐ Cost: $500

THE BOSTON SOFTWARE WORKS

☐ **LC-Term**
Emulates VT102 and selected VT220 functions.
IBM PC ☐ Cost: $150

CALIFORNIA NETWORK SYSTEMS

☐ **PCNetwork/SNA 3270 GateWay**
3270 emulation capabilities. Supports up to 192 concurrent sessions. Toggles between 3270 functions and other DOS applications. File transfer capabilities.
IBM PC, XT, AT ☐ 128-384 KB req. ☐ Cost: $375

CAMBRIDGE COMPUTER CORP.

☐ **PC 73/78**
Emulates Honeywell VIP7200, VIP7300 and VIP7800 series of async terminals. Allows user to escape from emulator and execute DOS command or user program. File transfer includes Kermit, Xmodem and Nonprotocol. Requires async communications adapter.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 3,000 since 1985 ☐ Cost: $295

☐ **PC 77/78**
Emulates Honeywell VIP7700 and VIP7800 series of sync terminals. Provides access to host via multiple windows. Permits remote printing. Requires bisync communications adapter.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 8,000 since 1984 ☐ Cost: $350

CANAAN COMPUTER CORP.

☐ **Multigate-PC Plus**
Stores and accesses PC files transparently on disks of Canaan DCS 5800.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $2,500

CENTURY SOFTWARE

☐ **Term Communications Software**
UNIX/XENIX to UNIX, XENIX, IBM PC or CP/M serial communications, file transfer and VT-100 terminal emulation. Provides 2 error-checking protocols including X-Modem and various non error-checking protocols. Character translation for textfile compatibility. Wildcard file selection transfers entire directories.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 3,500 since 1982 ☐ Cost: $150

CHI CORP.

☐ **Sperry Communications for the IBM PC, XT, AT**
Allows PC to be used for interactive data communications and to transfer files to/from Sperry CPU. Emulations available include IBM 3270, DEC VT-100, Honeywell 77XX and 78XX and UTS 60 MAPPER Graphics.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,916 since 1984 ☐ Cost: $745-$1,120

CLEO SOFTWARE

(a division of Phone 1, Inc.)

☐ **3270 SNA or BSC**
Emulates remote cluster of IBM terminal devices. Controlling PC emulates IBM 3276 Model 2 or 12 under SNA and 3274 Controller while attached PCs emulate 3278 terminals. Allows 3287 printer emulation. Compatible with NETBIOS LANs including Advanced NetWare, PCNet and MSNet.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 27,000 since 1976 ☐ Cost: $625-$4,395

☐ **3780Plus**
Emulates 2780/3780 terminals for RJE and file transfer. Includes point-to-point or multipoint operations, text or binary files transmission/reception, device selection, printer files, log file, serial line monitor and system command allowing DOS commands from within system.
IBM PC ☐ 256 KB req. ☐ Copies sold: 15,000 since 1981 ☐ Cost: $625-$1,595

☐ **5250 SNA**
Accesses IBM S/34, 36, 38 applications. Operates like 5251 or 5294 controller and 5291/92 display device with optional attached printer emulating 5256 device. Includes internal SIC card or SYNC modem to make switched, leased, point-to-point or multipoint connections.
IBM PC, XT, AT

COEFFICIENT SYSTEMS CORP.

☐ **VTERM Version III, Version 4010**
Async communications. VT100, 101, 102, 52, and Tektronix 4010, 4014 emulation. Communicates with DEC, other minis/mainframes. Transfers ASCII and binary files. Host software support for VMS, RSTS, RSX-11 and UNIX. Hot key switches between VTERM and DOS.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 40,000 since 1981 ☐ Cost: $195 (VTERM III); $249 (VTERM 4010)

☐ **VTERM/220**
VT220 terminal emulation with async communications to 19,200 baud. Communicates with DEC and other minis/mainframes. Transfers ASCII and binary files with error correction. Host file transfer for RSTS, VMS BASIC and FORTRAN, UNIX C and RSX-11. Kermit file transfer.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $245

COMMUNICATION RESOURCES

☐ **ACE (Asynchronous Communication Emulators)**
Allows IBM PC or compatible to emulate Honeywell VIP7200 or VIP7300 series terminal. User can interact with PC while on-line to Honeywell system. File transmission facility for GCOS 6 Mod 400 systems. Transmits ASCII or binary data files.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $349

COMMUNICATIONS SOLUTIONS, INC. (CSI)

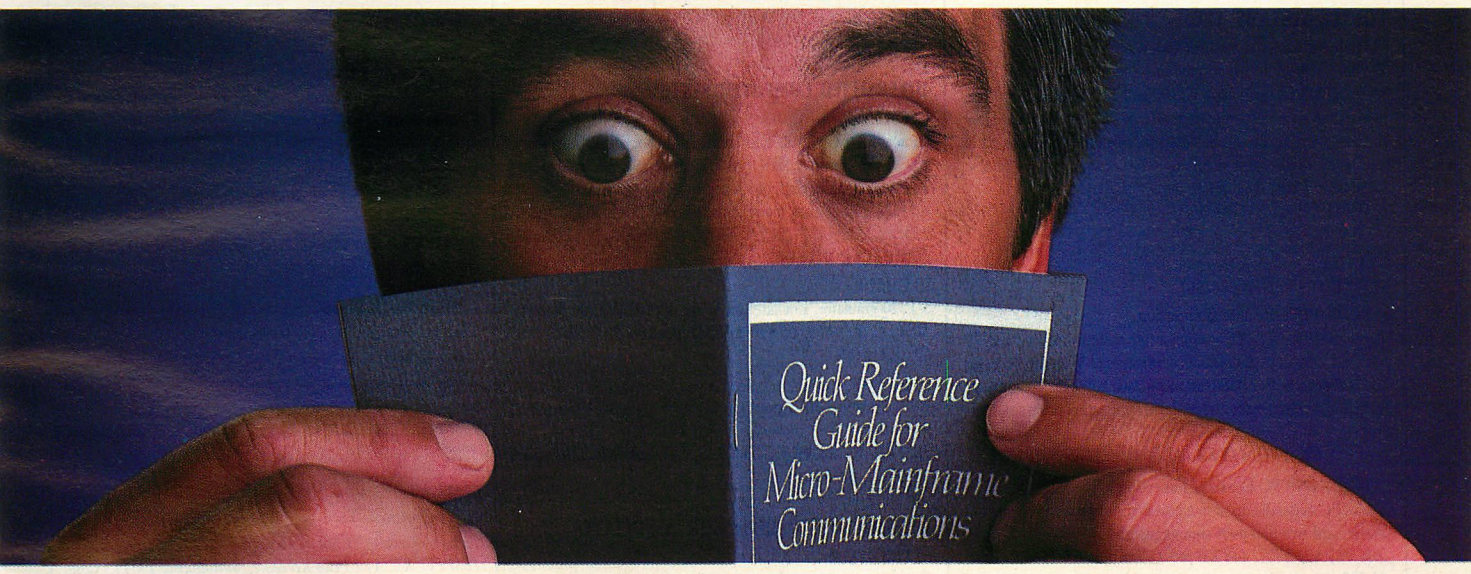
☐ **Access/BSC 3270**
IBM 3270 BSC emulation. Supports interactive or batch terminal operation and communication to printer or disk. Uses target device as cluster controller functioning as gateway for local network-connected devices. Emulates IBM 3274 cluster controller, 3278 and 3279 terminals, and 3287 printer.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984

☐ **Access/DIA**
Emulates IBM Document Interchange Architecture (DIA). High level interface to application programs used to perform document distribution, retrieval and access to DISOSS-based document libraries. DIA command and protocol processing.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985

☐ **Access/SNA APPC**
IBM Advanced Program-to-Program Communication (APPC/LU6.2) emulation. Applications use basic conversational verb interface to send and receive data from IBM host-based applications like DISOSS. End-to-end error reporting capability.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985

☐ **Access/SNA 3270**
IBM 3270 SNA emulation. Supports interactive or batch terminal operation and communication to printer or disk. Target device used as cluster controller functioning as gateway for local network-connected devices. Operates as PU type two with LU 1,2, and 3 support.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983

☐ **Access/SNA 3770**
IBM 3770 SNA cluster controller and 3777-1 RJE workstation emulation. Single and multi-user environments. Supports 3770 logical device including printer, punch, card reader and console. Maintains session log on disk to record RJE console messages.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983



COMMUNIQUE' CORP.

☐ **CQ-HASTE (HASP Station Emulator)**
IBM PC

☐ **CQ-3770-SNA**
IBM PC

☐ **CQ-3780**
IBM PC

HERE'S HELP

Attachmate has answers to your questions about micro-mainframe communications. Hardware answers, software answers and now a guide packed full of answers to some important questions—questions worth asking *before* you make long-term decisions.

What should you know about IBM® standards, multiple sessions, windows, file transfer, API, and graphics?

You'll find the answers and solutions in Attachmate's *Quick Reference Guide for Micro-Mainframe Communications*—with a chart comparing IBM, IRMA®, and Attachmate. For a free copy, call toll free:

1-800-426-6283

Attachmate

Micro-Mainframe Technology: We put our heart in it!

Attachmate Corporation
3241 118th S.E., Bellevue, WA 98005

CIRCLE NO. 165 ON READER SERVICE CARD

COMPUTER TOOLBOX, INC.

☐ Intellicom

Supports real terminal emulations allowing user to call host computer and look like terminal of user's choice. File transfer available. Supports ASCII transfer honoring Xon/Xoff protocol. Error checking protocols include Xmodem, Kermit and CompuServe.

IBM PC ☐ 256 KB req. ☐ Copies sold: 10,000 since 1984 ☐ Cost: $90

COMPUTER VECTORS, INC.

☐ RCOM

Connects IBM PC user to another PC, data banks, networks and services, or to IBM mainframe. Emulates DEC VT-52/100, 3277 and 3279 terminals. Supports full or half duplex, baud rates from 110-9,600, and 230 character auto-dial string for dialing and log ons.

IBM PC, XT, AT ☐ 96 KB req. ☐ Copies sold: 3,600 since 1983 ☐ Cost: $70

CONCEPT TECHNOLOGIES, INC.

☐ Tektronix 4014 Emulation

IBM PC, XT, AT

CONNECT COMPUTER, INC.

☐ CONNECT

Transforms PC into intelligent terminal. Accesses information retrieval services. Communicates with host mainframe, service bureaus and micros. Includes phone directory with auto dial and auto logon procedures, automated conversations, information/data capture, remote access and file transfer. Supports VT100, Kermit, Xmodem.

IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $195

CORVUS SYSTEMS, INC.

☐ Dial-Out Communications Gateway

Provides shared access to modems and communication lines. Allows IBM PCs to emulate VT102 and TTY terminals for communication with host computers. Communicates over Omninet to Corvus Utility Server. Selected service menu features list of frequently used communications services such as The Source, CompuServe and Dow Jones.

IBM PC, XT, AT ☐ Cost: $695

CXI, INC.

SEE AD ON PAGES 266/267

☐ PCOX/PLUS Remote Connection

Turns IBM PC, XT, AT or compatible systems into a 3278/79 terminal to access mainframe applications. Window accesses one host session, PCDOS session and two notepads concurrently. Includes file transfer and uniform application program interface.

IBM PC, XT, AT ☐ 448 KB req. ☐ Cost: $895

☐ PCOX/3270 PC Coaxial Connection

Allows PC to handle up to five host mainframe sessions, one PC session and two notepads simultaneously.

IBM PC, XT, AT ☐ 448 KB req. ☐ Introduced: 1983 ☐ Cost: $1,595

☐ PCOX/3270 PC Remote Connection

Turns IBM PC, XT, AT or compatibles into an IBM 3270 PC. Accesses up to 5 host sessions, 1 PC session, and 2 notepads, simultaneously. File transfer and application program interface.

IBM PC, XT, AT ☐ 448 KB req. ☐ Introduced: 1985 ☐ Cost: $1,190

DATABILITY SOFTWARE SYSTEMS, INC.

☐ RAF (Remote Access Facility)

Allows PC to emulate DEC VT100 terminal in order to link to DEC VAX hosts. Contacts and logs into remote processor. Accesses remote files. Provides remote execution of subroutines and entire programs.

IBM PC, XT, AT ☐ Cost: $125-$395

DATASTREAM NETWORKING

(division of Lee Data Corp.)

☐ Execulink II

File transfer/emulation. Integrates IBM PC with host network by transforming it into 3278 and 3287 emulator that performs 3270-PC file compatible transfer.

IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $195

DIGITAL COMMUNICATIONS ASSOCIATES, INC. (DCA)

☐ IRMAX Graphics

Enables PC to function as IBM 3270-PC with graphics. Requires DCA's IRMA board and a graphics adapter. Operates in SNA environment. Compatible with IBM Graphic Data Display Manager.

IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $1,595

☐ Smart Alec

Reviewed Jul 1986 p. 76.

Communication link between micros and IBM S/34, 36, 38. Provides bi-directional data transfer, data format translation, file chaining, multiple record types, record selection, security options, PC image files and activity logging. Emulates IBM 5251 Model 11, 5291 or 5292 Model 1 terminals and 5256 printer.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $895

DIRECT*AID, INC.

☐ Impersonator

Reviewed Sep 1984 p. 46.

Async communication and emulation for Lear Siegler ADM 3A, DEC VT 52/100, Hazeltine Esprit and 1510, TeleVideo 912/950, IBM 3101 Model 10 and 20, Dasher D210, NCR 7900 and Teletype terminals. Allows custom designed emulators, keyboard redefinition, file transfer using Xmodem protocol. Configuration file learns/remembers log-on procedure.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $245

DIVERSIFIED COMPUTER SYSTEM

☐ EM100

Emulates DEC VT102. Features English, hot key, set-up menus, ASCII file transfer, MODEM 7 binary transfer and MASS-11 Greek characters. Supports a keytronic keyboard, multiple set-up files, 132-column mode and 110-9600 bps mode.

IBM PC, XT, AT, PCjr ☐ 50 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $169

☐ EM220

VT220 emulator. Emulates all VT52, VT102, VT220 features.

IBM PC, XT, AT ☐ 65 KB req. ☐ Copies sold: 2,000 since 1985 ☐ Cost: $169

☐ EM4010

Adds Tektronix 4010 graphics capability to the VT100 terminal emulation.

IBM PC, XT, AT, PCjr ☐ 88 KB req. ☐ Copies sold: 2,500 since 1984 ☐ Cost: $249

DYNAMIC MICROPROCESSOR ASSOCIATES

☐ TERMCOM

Enables micros to replace terminals connected with minis and mainframes. PC emulates conversational and selected block mode terminals while performing async communications. Supports page, message and conversational mode, incoming sequence translation, print and on-line configuration of terminal parameters and operation modes.

IBM PC ☐ 256 KB req. ☐ Copies sold: 2,500 since 1984 ☐ $180

ESCA CORP.

☐ PC17

Emulates Aydin 5217 color graphics display device.

IBM PC ☐ 4,000 KB req. ☐ Copies sold: 7 since 1986 ☐ $700

FIVE PACES SOFTWARE, INC.

☐ Facet

Allows DOS-based PC to be attached to XENIX-based AT

IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $249

FORMULA CONSULTANTS, INC.

☐ Super

Supports UTS-20 ECC control sequence, SO/SI field capabilities, two independent screens for 16 bit microprocessors, control page monitor mode, manual/automatic print installation, windowing, user-defined function keys and sync protocol for microprocessor/host link. Transfers binary, ASCII and word processing files.

IBM PC ☐ 64 KB req. ☐ Copies sold: 30 since 1982 ☐ Cost: $395

FTG DATA SYSTEMS

☐ EMU-TEK (Level 1, Level 2, Five Plus)

Emulates Tektronix 4105 (color) or 4010/4014 (storage) graphics terminal. Communicates with mainframe graphics programs such as PLOT10 and DISSPLA. Level 2 and Five Plus feature VT-100 and VT-640 emulation, plotter support, local zoom and file transfer.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,500 since 1982 ☐ Cost: $295-$495

GATEWAY COMMUNICATIONS, INC.

☐ G/BSC 3270

Provides bisync communications emulating IBM 3274 controller equipped with 3278 terminal.

IBM PC, XT, AT ☐ 192 KB req.

GATEWAY MICROSYSTEMS, INC.

☐ MicroGate PCOM/BSC

Emulates 2780/3780 station. Programmable and bisync communications. Provides interface subroutines for IBM Compiled BASIC, Pascal, C, COBOL and Assembly languages. Auto dial/answer for SyncLink internal PC modems. Transparent/non-transparent communication.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $695-$995

☐ MicroGate RJE/BSC

IBM PC emulates IBM 2780/3780 RJE workstation. Includes unattended command mode files, capability to execute commands recevied from remote computer, and multi-level user help sessions.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $695-$995

☐ MicroGate 3270/BSC

IBM PC emulates IBM 3270. Provides interactive and batch access to host mainframe. Operates up to 9,600 bps via dial-up or leased point-to-point or multi-point telephone lines using bisync protocol.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $995

☐ MicroGate 6540

IBM PC emulates Tandem 6520/6530 terminal. Supports bidirectional transfer of ASCII and binary files.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $295-$300

☐ MicroGate 931

Emulates TI model 940/931, used with TI Business System minicomputers. ASCII and binary file transfer. Operates with any standard PC serial communications port.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $250-$300

GENERAL MICRO SYSTEMS

☐ PC102

Emulates DEC VT100, VT101, VT102 or VT52. Includes U.S. and European ASCII character sets. Permits continuous printing more than 80 columns wide. Full duplex async support and EIA/RS-232C interface.

IBM PC, XT, AT, PCjr ☐ 96 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $139

☐ PC220
Keyboard and screen emulation of DEC VT220, 200, 102, 101, 100 and VT52 terminals. Thirty soft keys, slow scroll at 6 lines/second, 132-column support and status line. Exit to and return from DOS. Includes kermit binary file transfer protocol.
IBM PC, XT, AT ☐ Cost: $169

☐ PC4010
Turns IBM PC, XT or PC compatible into Tektronix 4100 graphics terminal. Functions as DEC VT100/52/102 with file transfer and printer support.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $189

GENESIS MICROSYSTEMS
SEE AD ON PAGE 373

☐ GeneProbe
In-circuit emulator interface and debugging tool.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985

GRAFPOINT

☐ TGRAF-05
Tektronix 4105, 4010, DEC VT100, VT52 emulation. Features 19,200 baud throughout and setup mode for defining parameters. Handles monochrome and color printers and plotters with a resolution of 1,024 X 1,024.
IBM PC, AT, 3270-PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $395-$495

☐ TGRAF-07
Tektronix 4107 emulation. Supports resolutions to 1024 X 1024. Works with ANVIL-4000, PATRAN-G and ANSYS.
IBM PC ☐ Cost: $995

GRANADA SYSTEMS DESIGN, INC.

☐ PC/Sail (Synchronous/Asynchronous Interactive Link)
Allows IBM PC to act as protocol translator to transmit information from async devices to IBM S/34, 36 and 38 users. Uses PC and IBM 5251 Model 12 sync protocol.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ $900

GSS

☐ Solutions GSS-Terminal
Converts desktop graphics micro into Tektronix 4010 terminal. Supports many packages currently existing on mainframe. Micro transmits files and displays host generated graphics on GSS-DRIVERS output devices. Alphanumeric terminals perform host-supported editing.
IBM PC ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $295

H & A COMPUTER SYSTEMS

☐ EDX/PC
Allows EDL programs written under EDX OS for IBM Series 1 to run on IBM PC. Supports multi-tasking emulation. Provides full-screen 4978 emulation with tab and field skip. Supports $IAM and $Sort.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $590

☐ S1Term - 3101 Emulator
3101 block and character mode emulator. Supports dial-up or direct connect, file transfer, hot-key access to background mode and color.
IBM PC, XT, AT ☐ 50 KB req. ☐ Copies sold: 500 since 1986 ☐ Cost: $195

HAWKEYE GRAFIX

☐ XTERM
Emulates VT100/102/52, IBM3101, WYSE50, TVI950, HP2624/45, ADM-3A/11, ADDS/RGO TTY. Removable status bar with time of day, caps and numeric lock status. Supports printer queue.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $49

HENSON SYSTEMS, INC.

☐ CRTXE-Network Workstation with Emulation
Async communications allowing bidirectional file transfer in terminal mode. Emulates terminal codes
IBM PC ☐ Copies sold: 300 since 1981 ☐ Cost: $250

HERSEY MICRO CONSULTING, INC.

☐ MODEM86
Portable communications program. Supports Xmodem/Modem7 protocol. Terminal emulation. DEC VT-100 emulation with Fansi-Console program. Xon/Xoff flow control. Batch processing. Includes file transfer utilities. Interrupt-driven support.
IBM PC, AT ☐ 64 KB req. ☐ Copies sold: 2,000 since 1981 ☐ Cost: $75

HEWLETT-PACKARD CO.

☐ Reflection 1
HP 2392 and DEC VT102 terminal emulation and HP 3000 file transfer. Allows Roman character sets and some unattended operation.
IBM PC

☐ SIM 3278/PC
IBM 3278 terminal emulation and file transfer.
IBM PC

☐ YTERM
Provides communication with IBM and other mainframe computers through IBM 3278 terminal emulation.
IBM PC

HONEYWELL INFORMATION SYSTEMS, INC.

☐ microSystem VIP Emulation
Enables Honeywell and IBM PCs to emulate Honeywell VIP7300 or VIP7800 terminals. Supports dual-host connection via two communications ports. Allows file transfer between PC and host. Requires multifunction communications adapter on PC.
IBM PC, XT, AT ☐ Cost: $400

☐ PC7800
Transforms IBM and compatible PCs or Apple Macintosh computers into Honeywell professional workstations. Provides terminal emulation and transparent file transfer between listed PCs and Honeywell host.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $295

HOUSTON COMPUTER SERVICES, INC.

☐ OCTACOMM/PC - ADDS Terminal Emulation
ADDS Regent 40 and Viewpoint/60 CRT emulator. Connects to host computers as interactive workstations. Block/character-mode file transfer capabilities.
IBM PC, XT, Portable PC ☐ 128 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $125

☐ OCTACOMM/PC - TeleVideo Terminal Emulation
TeleVideo 950 CRT emulator. Connects to host computers as interactive workstations. Block/character-mode file transfer capabilities.
IBM PC, XT, Portable PC ☐ 128 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $125

☐ OCTACOMM/PC - TI 931 Terminal Emulation
Connects to host computers as interactive workstations. Block/character-mode file transfer capabilities.
IBM PC, XT, Portable PC ☐ 128 KB req. ☐ Copies sold: 7,500 since 1984 ☐ Cost: $125

☐ OCTACOMM/PC - TI 940 Terminal Emulation
Connects to host computers as interactive workstations. Block/character-mode file transfer capabilities.
IBM PC, XT, Portable PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $125

☐ OCTACOMM/PC - VT100 Terminal Emulation
DEC VT100 CRT emulator. Connects to host computers as interactive workstations. Block/character-mode file transfer capabilities.
IBM PC, XT, Portable PC ☐ 128 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $125

HUNTSVILLE MICROSYSTEMS, INC.

☐ Development Packages
In-circuit emulators. Includes relocatable macro assembler and symbolic debugger.
IBM PC, XT, AT ☐ Cost: $2,695-$3,695

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Graphics Terminal Emulator
IBM no. 6024-206. Emulates Tektronix 4010, 4100 or Lear Siegler ADM 3A terminal. Allows uploading and downloading of files to ASCII-based hosts. Executes local PC commands without leaving emulator mode. Allows output to display, printer or plotter devices.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Cost: $295

☐ HLLAPI (High Level Language Application Program Interface)
IBM no. 59X9-959. Provides PC programs with ability to emulate terminal operator and communicate series of 3270-PC tasks to 1 of 5 session types including host, PC, notepad, workstation control and to alternate presentation space created within HLLAPI PC session.
IBM 3270-PC ☐ Cost: $195

☐ Intelligent Workstation Support 3101 Emulation
IBM no. 5799-TGC.
IBM XT ☐ Cost: $150

☐ IX 3270-Plus (Interactive Executive)
IBM no. 6317-060. Changes AT into IBM 3270 workstation. Built-in windowing allows multiple sessions to 1 or several hosts. Includes upload/download, suspend/resume, read ahead, browse, record and printer management functions.
IBM AT/XENIX ☐ 1,000 KB req. ☐ Cost: $995

☐ PC Network SNA 3270 Emulation Program
IBM no. 6322-526. Provides communications capability for IBM PCs. Features host-file transfer with file append and screen save, host- or operator-initiated direct print and keyboard mapping.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Cost: $375

☐ PC 3270 Emulation
Allows PCs to communicate around the ring to the 3725 Communication Controller directly attached to Token-Ring Network to access host applications. TopView compatible.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $185-$425

☐ Remote 5250 Emulation Program
IBM no. 6403-645, 685. Attaches IBM PC to IBM S/36 or S/38 via communications lines. Used as standalone computer or 5250 workstation in remote setting. Can be used with PC Support/36.
IBM PC, XT, AT ☐ Cost: $195

☐ RJE File Transfer - DPPX to PC 3270 Emulation
IBM no. 5799-BRQ. Exchanges files between IBM PC or XT and IBM 8100 DPPX/SP system.
IBM PC, XT ☐ Cost: $1,010

☐ RT PC Graphics Terminal Emulator
IBM no. 5669-064. Emulates Tektronix 4010, 4012, 4014 and 4105 protocols and Lear Siegler ADM-3A protocol. Icon-driven user interface. Alpha, vector and graphics input modes. File uploading/downloading to ASCII hosts. Allows various user-specific async host communications protocols.
IBM RT PC ☐ Cost: $600

☐ RT PC 3278/79 Emulation
IBM no. 5669-052. Emulates IBM 3278 Display Station Model 2 or IBM 3279 Color Display Station Model 2A or Model S2A. Base 3270 data-stream support. File transfer. Concurrent operation with AIX OS. Screen copy/print.
IBM RT PC ☐ Cost: $500

☐ SNA 3270 Emulation and SNA RJE Support
IBM no. 6024-036.
IBM PC ☐ Cost: $700

☐ VM/PC (Virtual Machine/PC)
IBM no. 6024-175; 6467-040. Runs IBM 370 VM/CMS programs on IBM AT/370 or XT/370 via IBM 3277/3278/3279 emulation.
IBM AT/370, XT/370 ☐ Cost: $1,150

☐ 3101 Emulation Program
Reviewed Sep 1984 p. 46.
IBM no. 6024-042.
IBM PC ☐ 64 KB req. ☐ Cost: $140

☐ **3270 Binary Synchronous Emulation**
IBM no. 6024-037.
IBM PC ☐ Cost: $700

☐ **3270-PC AT/GX 3277GA Emulator**
IBM no. 6476-047. Accesses 3277GA applications in manufacturing, petroleum and public utilities environments. Requires DOS Release 3.1 or later. Supports RS-232C plotters and digitizers. Local screen copy to IBM 5182, 5201, 4201 and 3852 Printers and local variable zoom. Mouse or tablet cursor control.
IBM 3270-PC AT/GX

☐ **3278/79 Emulation Control Program**
IBM no. 6024-134.
IBM PC, XT ☐ Cost: $235

☐ **5250 Emulation Convenience Kit**
IBM no. 6092-656. Includes electronics, parts and documentation required for an IBM PC to emulate an IBM 5250 without use of a separate program.
IBM PC ☐ Cost: $893

☐ **5250 Emulation Enhanced**
IBM no. 6403-674. Attaches an IBM PC to an IBM S/34, 36 or 38.
IBM PC, XT, AT, Portable PC

☐ **5250 Emulation Program for PC or XT**
IBM no. 6092-651.
IBM PC, XT ☐ Cost: $164

☐ **5520 Attachment Kit**
IBM no. 6403-724, 725. Minicomputer-to-PC link.
IBM PC, XT, 3270-PC, XT/370 ☐ Cost: $1,113 (6403-724); $384 (6403-725)

☐ **5520 Personal Computer Attachment**
IBM no. 6109-558; 7033-703. Terminal emulator
IBM PC, XT ☐ Cost: $284 (6109-558); $164 (7033-703)

ID SYSTEMS CORP.

☐ **TESSY PLUS (Terminal Emulation Software System)**
Allows IBM PC, AT, XT to emulate DEC VT100 and Tektronix 4010, 4014, 4105. Handles file transfer, hot key and hard copy.
IBM PC, AT, XT, Portable PC ☐ 128 KB req. ☐ Introduced: 1986

INFORMATION ANALYSIS SYSTEMS CORP.

☐ **Genterm/ADM3**
Complete Lear Siegler ADM 3A/31 emulation including protected fields, conversational and block modes, auto 2-page operation. Printer, Aux Device support, twenty macro keys, screen to disk. All keys redefinable. Standard communications package features. Site licenses available.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $80

☐ **Genterm/TTY**
Low cost dumb terminal emulation includes transparent mode for viewing control characters, printer, Aux Device support, twenty macro keys, screen to disk. All keys redefinable. On-line documentation and help. Standard communications package features. Site licenses available.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $50

☐ **GENTERM/TV9**
TeleVideo 950 emulation including block, conversational, and monitor modes and editing functions. Printer support. Programmable function keys. Twenty macro keys. Save/restore screen to/from disk. Keys user-defined. Standard communications package features.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $80 (Unit 1); $10,000 (site license)

☐ **Genterm/VT100**
Complete VT100 emulation including alternate keypad, VT52, 132-column via scroll, graphics character set, simulated double height/width characters. Printer, Aux Device support, twenty macro keys, screen to disk. All keys redefinable. Standard communications package features. Site licenses available.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $80

☐ **Genterm/3101**
Complete IBM 3101 emulation including character, block, transparent and program modes. Printer and Aux Device Support. Twenty macro keys, save/restore screen to/from disk. Keys redefinable by user. On-line documentation and help. Standard communications package features. Site licenses available.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $80

INFORMATION TECHNOLOGIES, INC.

SEE AD ON PAGE 271

☐ **LinkUp System Coax PC**
Reviewed Feb 1986 p. 48.
Emulates IBM 3278 display terminal and connects directly to IBM 3274 or 3276 control device or to IBM 43XX computer.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 6,000 since 1984 ☐ Cost: $495

INFOSERVICES

(division of SCS/Compute)

☐ **IST100**
Emulates Prime PST 100. Accesses EMACS, OAS, INFORMATION, SIMPLE and FORMS application programs.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $195

☐ **PC-Partner**
Transfers ASCII and binary files bi-directionally. Supports KERMIT and XMODEM protocols. Protects file overwrite as query or rename. Runs local DOS programs without disconnecting from host. Emulates PST 100 terminal.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 200 since 1986 ☐ Cost: $195

INNER LOOP SOFTWARE

☐ **VDTE 2.1**
IBM PC replaces HP2624, HP2648 and VT52 type display terminals. Transfers ASCII files. Supports block mode for compatibility with most HP3000 software and subset of HP2648 vector graphics plotting sequences. Can use both serial ports. Seven pages off-screen scrolling memory.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,500 since 1983 ☐ Cost: $200

THE INTELLIGENT COMPUTER USERS GROUP

☐ **CP/EM**
CP/M-80 emulation for MSDOS. Includes serial communications programs to aid transfer of programs and data files. Allows data files to be shared between CP/M and MSDOS applications.
IBM PC ☐ 32 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $80

INTELLIGENT TECHNOLOGIES INTERNATIONAL CORP.

☐ **Bisync Exchange 3780**
Emulates IBM 3780/2780. Provides PC to PC 4800 baud communications.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $695

☐ **ClusterNet 3270S**
IBM PC performs IBM 3274 cluster controller functions. Consists of printed circuit board and SNA software. Up to four networked PCs share single modem and access IBM SNA/SDLC ClusterNet mainframe. Requires supplemental 3278 package.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $1,095

☐ **ClusterNet 3278**
Enables IBM PC to emulate 3278/3279.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $495

☐ **Coax Exchange II**
Provides 3278/9 emulation, file transfer capabilities and links directly to IBM 3274 or 3276 cluster controller via coaxial cable.
IBM PC ☐ 96 KB req. ☐ Introduced: 1985 ☐ Cost: $995

☐ **Coax Exchange Plus**
Handles up to ten screen profiles. Accesses concurrently one host session, one PCDOS session and two electronic notepads.
IBM PC ☐ 96 KB req. ☐ Cost: $250

☐ **SNA Exchange**
SNA/SDLC communications. Emulates IBM 3274, 3278/9 with multi-sessioning, 3287 and 3777-1 RJE workstations. Toggles between DOS and 3270 functions.
IBM PC ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $895

INTERACTIVE SYSTEMS CORP. (CA)

☐ **INterm Multi-Terminal Emulator**
Emulates VT100, VT52, Tektronix 4014 and IBM 3101 terminals. Provides bidirectional file transfers. Connects to host via dial-up lines. Controls line/dialing protocols. Stores script or batch files. Supports most popular modems.
IBM PC, XT, AT

☐ **3270 Emulator**
Emulates IBM 3270 terminals, printers and cluster controllers. Provides screen-to-file data capture, multiple concurrent sessions, read-ahead and script directed session control.
IBM RT, AT/AIX, PC/IX

INTERCHART SOFTWARE, INC.

☐ **Talkshow/PC**
Supports emulation of Tektronix graphics terminals, 4027, 4010 and 4100 series, and Hewlett-Packard 7221. Communications, file transfer and off-line recall of mainframe generated charts. Outputs to plotter. Produces electronic slide show. Includes Graphics Master graphics display board.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $395

INTERCOMPUTER COMMUNICATIONS CORP. (ICC)

☐ **ICC/Text Pack II**
Terminal emulation system.
IBM PC

KEA SYSTEMS, LTD.

☐ **ZSTEMpc - D200**
D200/210 emulator. Serial and parallel support. Bidirectional disk file support includes ASCII and error-free, binary, transparent (Xmodem) transfers. Full macro compatibility limited by memory space. Supports user-configurable modes, speed and flow control.
IBM PC ☐ 128 KB req. ☐ Copies sold: 800 since 1984 ☐ Cost: $125

☐ **ZSTEMpc - VT100**
DEC VT100 emulator with VT102 extensions. Double-high/double-wide characters, 132 column support, smooth scrolling, full VT100 graphics. ASCII, KERMIT and XMODEM file transfers. ISO and attribute mapping color support. DOS access, softkey/MACROS, transparent mode, international and DVORAK keyboard support.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 8,000 since 1984 ☐ Cost: $150

KELLY COMPUTER SYSTEMS, INC.

☐ **ViTalComm**
DEC VT100/VT102 emulation. Includes local printer support, performance to 19.2kbps, PC-to-PC communications, nine pages of display memory, auto login, error reporting and statistics. Provides ASCII, Xmodem and ViTalComm file transfer.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $195

KNIGHT-RIDDER SOFTWARE

(division of Knight-Ridder Newspaper, Inc.)

☐ **Picture Link**
Emulates and enhances upon all graphics modes available on the HP 2648 including zoom and rubber band line with similar resolution.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $400

KRONOS, INC.

☐ **CRT Emulator**
Async terminal emulation. Accesses and downloads clock information, and sends to printer. Some clock data storage on disk. Does not use KRONOS Error-Protected Protocol. Operates with KRONOS System 35 and System 70 Timekeepers.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $180

☐ **Host 35**
Terminal emulator and communications interface. Accesses management reports, stores and prints for hard copy verification. Uses KRONOS Error-Protected Protocol. Accesses information via telephone modems.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $720

☐ **Host 70**
Terminal emulator and communications interface. Allows user to download information to System 70 Timekeeper. Accesses, stores and prints reports. Uses KRONOS Error-Protected Protocol. Can access information via telephone modems.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 150 since 1983 ☐ Cost: $720

LANG-ALLAN, INC.

☐ **Bluestreak**
Provides terminal emulation and communication utilities.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $50

☐ **Bluestreak Plus**
Emulates most terminals including VT 100 and IBM 3101. Allows mainframe command to initiate DOS program/file transfer. Runs programs unattended. Uses C, BASIC or Pascal to integrate user-written programs. Configures setup and phone directory at command line. Multiple comports for simultaneous terminal sessions
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $90

LEGIST AUTOMATION, INC.

☐ **STEP/IV**
Simulates Motorola 4000 or 5000 terminals using IBM PC or compatible or another Series 4000, 5000 system. Supports bi-directional file transfer and remote or local printing. Allows networking among Motorola CPUs optionally.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $500

LOCAL DATA, INC.

☐ **FileLynx/3278**
Interfaces PC with IBM mainframe. Provides file transfer and 3278 emulation. Allows variable number of lines per screen transferred with support for formatted screen applications. Features 4-color emulation.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 1,400 since 1983 ☐ Cost: $200

☐ **FileLynx/5251**
Interfaces PC with IBM S/34, 36, 38. Provides file transfer, 5251 display and 5256 printer emulation. Variable number of lines per screen transferred with support for formatted screen applications. Features 4-color emulation and extended attribute support.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $200

☐ **TruLynx/3270-PC**
Emulates IBM 3270 PC control program file transfer capability. Provides 2-level password protection, session outage notification, start, terminate or suspend. Depends on remote connection status. Allows sessions with VM/SP, MVS/TSO and CICS. Hot-key switching between conversational and PC sessions.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $300

☐ **TruLynx/5251-PC**
File transfer and terminal emulation for IBM S/34, 36 and 38. Interfaces PC with IBM S/3X. Provides 5251 terminal emulation plus virtual diskette file transfer facilities. Compatible with host FSU and PCSupport/36-38.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $300

MARK OF THE UNICORN, INC.

☐ **PC/InterComm**
Reviewed Sep 1984 p. 46.
IBM PC emulates VT100. Includes 9600 baud throughput, printer support, file transmit to host, incoming data collection, menu-driven set up mode, 25th status line, 30 function keys and named saved set ups.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $99

MCS GROUP, INC.

☐ **PC/2200 Terminal Communicator**
Provides 2236 terminal emulation for Wang 2200, file transfer for programs and data between 2200 and PC and communications utility. PCs can operate compiled 2200 programs. Provides remote terminal or telephone modem communications. Supports ANSI/ASCII operation and Xmodem protocols.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 84 since 1985 ☐ Cost: $250

MEGAWEST SYSTEMS, INC.

☐ **MegaLink**
Allows interface of RJE devices such as MSI/77 to a Microdata system.
IBM PC, XT ☐ 32 KB req. ☐ Copies sold: 2 since 1980 ☐ Cost: $1,200

MICRO-INTEGRATION CORP.

IE Systems Divisions

☐ **Acculink-Micro**
Allows file transfer between micros and mainframes, minis or other micros. Supports 3 protocols, 7-bit VANs, macro, phone and modem. Printer, disk and file utilities. Emulates VT102, VT100, VT52, IBM 3101, ADM3A and TVI 950.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1979 ☐ Cost: $245

☐ **BIS-3270**
Emulates BSC 3270 control unit with keyboard/display and printer separately addressable or local print key. Features diagnostic tools, send through current 3270 screen format, full status line, configuration program and 10 international keyboards.
IBM PC ☐ 128 KB req. ☐ Copies sold: 40,000 since 1980 ☐ Cost: $695

☐ **BIS-3780**
Provides translation, transparency/nontransparency, data stream management for IBM 3780, 2780, 2770, 3741 RJE workstation or micro to micro. Features console commands at startup or interactively, path name, diagnostics and on-line statistics. Configuration program includes carriage control and 10 international keyboards.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1979 ☐ Cost: $695

☐ **BIS-7705**
Provides translation, polling responses, Honeywell BSC protocol management, screen formatting and time out control for Honeywell VIP 7705 terminal emulation. Includes configuration program, SEND file, help, status line and diagnostics.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $695

☐ **Coaxxsys**
Allows bus-based micros to emulate IBM 3278 display stations using coaxial networks. Permits micro to plug into IBM 3274 or 3276 control units, BSC or SNA. Includes Hot key VM/CMS and TSO file transfer facility. Supports 10 international keyboards.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $995

☐ **Micro-SNA/3270**
Emulates SNA 3274 or 3276 control unit with attached keyboard/display and printer, LU or local print. Automatic restart after disconnect. Features diagnostic tools, send through 3270 screen format, full status line and configuration program including color, 10 international keyboards and NRZ/NRZI.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $695

☐ **Twinaxis**
Emulates up to 4 5250 LU devices including 4 displays or 3 displays and printer. Full printer support. S/36 file transfer facility and virtual disk support. Features hot button, device status reporting and diagnostics. Menu-driven configuration program.
IBM PC ☐ 128 KB req. ☐ Copies sold: 4,000 since 1985 ☐ $895

MICRO SOLUTIONS, INC. (IL)

☐ **UniDOS**
Runs 8-bit CP/M programs on PC. Emulates Z80 microprocessor.
IBM PC ☐ Cost: $70

MICROPLOT SYSTEMS

☐ **PC-Plot III**
Accesses mainframe graphics packages requiring Tektronix 4010 Graphics or DEC VT100 commands. Displays, saves, prints or plots results. Features auto dial, auto logon and file transfer capabilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 12,500 since 1983 ☐ Cost: $95

MICROSTAR SOFTWARE, LTD.

☐ **MVDI-C Communicating Decoder**
NAPLPS videotex terminal emulator. Accesses text services. ASCII terminal emulation is 80 columns. Stores phone numbers and sign-on sequences in directory. Reproduces NAPLPS text and graphics at resolutions of up to 16,384x16,384 picture elements.
IBM PC

MICROSTUF, INC.

☐ **Crosstalk XVI**
Reviewed Jul 1984 p. 90; Sep 1984 p. 46.
Supports Crosstalk, Xmodem and Kermit file transfers. Terminal emulation of TeleVideo 910/920, IBM 3101 ASCII, ADDS Viewpoint, DEC VT-100, VT-52 and TI 940. Provides on-line help, supports auto-dial/auto-answer modems. Network version available.
IBM PC, XT, AT ☐ 96 KB req. ☐ Copies sold: 500,000 ☐ $195

MICROTEC RESEARCH, INC.

SEE AD ON PAGE 306

☐ **Terminal Emulator**
Features local file storage, capability for setting up command files, VT52/100/101/102 emulation, multiple setup files, ASCII or binary file transfer between PC and host Kermit protocol compatibility.
IBM PC

MYCROFT LABS, INC.

☐ **Maxi-Mite +**
Module for Mycroft's MITE emulates many terminals. Selects desired terminal from menu options list. Saves terminal selection, phone number and parameters for recall.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 2,000 since 1985 ☐ Cost: $220

☐ **Mite/MAC**
Turns a microcomputer into an intelligent terminal. Accesses any async ASCII on-line system or exchanges any file. Allows error recovery. Password protection.
IBM PC, XT ☐ 64 KB req.

NCR CORP.

☐ **7900 Terminal Emulator**
Enables NCR Decision Mate V PC to look like non-intelligent Model I Terminal. Permits file transfer between DMV and host. Allows user to have one machine perform functions of two. Reestablishes stored configuration as current and saves into file.
IBM PC ☐ 64 KB req.

NESTAR SYSTEMS, INC.

☐ **IBM SNA Gateway**
IBM PC emulates remote IBM 3274 supporting up to 16 user
IBM PC ☐ 64 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $3,000

☐ **3270 Emulator**
Provides network connections to IBM 3270 mainframe for PLAN Series (Arcnet) users. Server station communicates with network workstations. Allows PCs to act as IBM 3278 display stations.
IBM AT ☐ 64 KB req. ☐ Introduced: 1983

NETWORK SOFTWARE ASSOCIATES, INC.

☐ **AdaptBSC 3270**
Interactive communications between micro and IBM mainframe, using IBM 3270 Bisync protocol. Emulates 3274. Application interface allows customization for existing host terminal applications. Hot button feature allows simultaneous program execution on PC and dialogue with host application program.
IBM PC, AT, XT ☐ 192 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $475

☐ **AdaptSNA PCcom**
Provides communications and file transfer capabilities among IBM PC using IBM SDLC protocol. Can be used in network control centers for software maintenance and distribution.
IBM PC, AT, XT ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $475

☐ **AdaptSNA 3270**
Interactive communications between micro and IBM mainframe using IBM 3270 SNA/SDLC protocol. Emulates 3274. Direct print sessions run concurrently with terminal emulation using DSC and SCS data streams. Hot button allows simultaneous PC program execution and mainframing session. Allows customizations.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $585

THE OPUS CORP.

☐ **WS250 Emulator**
Allows IBM PC, HP 150 or compatible to emulate HP 2622D workstation for HP 250/260. Includes file transfer, direct ASCII mode and drives locally connected printers.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $395

PACKAGED SOLUTIONS, INC.

☐ **BiComm-3270**
MSDOS computers emulate 3271, 3274, 3275 and 3277 terminals with 3284 or 3286 printers. On-line configuration procedure, optional print-to-disk simulation, visual attribute support, local print option, switched or leased line operation and 25th status line.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $895

☐ **BiComM-3700**
Bisync RJE station emulator. Interactive or unattended batch mode operation. Duplicates functions of 2780, 3780, 2770 or 3741 RJE station. Communicates to 19.2k or 9,600 baud. Space compression, printer horizontal format option, transparent data, auto answer and printer initialization code.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 2,025 since 1981 ☐ Cost: $895

PARATECH, INC.

☐ **Tele-Tek**
Emulates Tektronix 4010 series graphics terminal. Features file transfer, local hardcopy capabilities, four-page scroll buffer and log-to-printer.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $99

PATHWAY DESIGN, INC.

☐ **netPATH SNA-3270, SNA-3770**
Allows multiple IBM PCs on LAN to operate on IBM SNA networks. Emulates 3274/76 Control unit. PC shares host communication features. Includes data conversion between host and LAN, session hold, data redirection and programmatic interfaces.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $1,995-$3,995

☐ **pcPATH BSC-2780/3780 (BSC-RJE)**
Allows IBM PC and compatibles remote operation on IBM BSC networks through 2780/3780 RJE station emulation.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $595

☐ **pcPATH BSC-3270**
Allows IBM PC and compatibles remote operation on IBM BSC networks through 3270 emulation. PC appears as 3270 Control Unit with attached devices to host. Supports up to 5 concurrent host communication sessions. User can hot key from any emulation sessions to/from a local DOS application.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $595

☐ **pcPATH SNA-3270**
PC appears as 3270 Control Unit with attached devices to host. Supports up to 5 concurrent host communication sessions. User can hot key to/from any emulation sessions and a DOS application.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $595

☐ **pcPATH SNA-3770**
Allows IBM PC and compatibles remote operation on IBM SNA networks through 3770 RJE station emulation. Supports up to six host communication sessions and unattended operation through enhanced command file language.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $595

PBL ASSOCIATES

☐ **Micro-Tap**
Conversational mode terminal emulation. Transfers pre-selected data and file between Tandem computers and micros. File transfer with unlimited record length. Includes error checking, Tandem's networking abilities and remote dial-up capability.
IBM PC ☐ Copies sold: 10 since 1984

PCX

☐ **Linkup**
Terminal emulation and bi-directional file transfer for remote CP/M system.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $50

PERSOFT, INC. (WI)

☐ **SmarTerm 100**
Reviewed Sep 1984 p. 46.
Emulates DEC VT-100, 101, 102 and 52. Defines eight setup configurations and smart softkeys. Allows ASCII and binary file transfer. Transmits/receives using PDIP protocol. Supports TTY mode. Hot key allows branch to DOS. Xmodem protocol and 132 column display.
IBM PC, AT, XT ☐ 192 KB req. ☐ Copies sold: 30,000 since 1982 ☐ Cost: $149

☐ **SmarTerm 220**
Emulates DEC VT220, 100, 102 or 52. ASCII and binary file transfer. Includes remappable keyboard layout, multi-national character sets, and selective erase. Supports 7- and 8-bit control modes. Supports Kermit.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 3,700 since 1985 ☐ Cost: $195

☐ **SmarTerm 240**
Uses PC as graphics terminal to connect to CAD/CAM mainframe graphics. Emulates DEC VT240, VT125, VT220, VT100, VT102 or VT52 intelligent text terminal, Tektronix 4014 and DEC ReGIS graphics. Includes pop-up windows, branch to DOS, startup command files, host control and remappable keyboard layout. ASCII and binary file transfer. Supports Kermit.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 2,237 ☐ Cost: $295

☐ **SmarTerm 400**
Emulates DG D100, D200, D210, D211, D400 or D410. Multiple display windows with independent vertical scrolling and window erase. Handles margin settings greater than current screen. ASCII and binary file transfer. Supports PDIP and Xmodem protocols. TTY mode accesses timesharing services.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 8,650 since 1983 ☐ Cost: $149

POINT 4 DATA CORP.

☐ **PC Connection**
Allows PC to be operated as Point 4 IRIS-type terminal. Transmits data files including programs between PC and host IRIS system. Provides large-capacity, mass-storage facilities for programs and data. Provides centralized control and security.
IBM PC ☐ 64 KB req. ☐ Copies sold: 70 since 1984 ☐ Cost: $550

POLYGON, INC.

☐ **poly-BSC/RJE**
Emulation for IBM RJE stations. Provides access to inquiry, data entry, program development. Directs printed output to printer or disk, sends/receives text files without software on other system. Communication via BSC protocol using sync ports and modems at 9600 baud.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,500 since 1983 ☐ Cost: $500

☐ **poly-BSC/3270**
PC emulates IBM 3270 sync terminal and printer. Keyboard includes alphanumeric, special attention identifier and cursor control keys. Data sent to printer or disk. Screen images recorded on printer or file.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $500

☐ **poly-COM/220**
Emulates DEC VT52, VT100, VT102 or VT220 terminal. Transfers files between PCs and another PC, minicomputer or mainframe. Includes 132-column on-screen display.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 10,000 since 1985 ☐ Cost: $200

☐ **poly-COM/240**
ReGIS graphics commands emulation and file transfer. Emulation of DEC VT52, 102, 125, 220 and 240. Accesses DEC's Datatrieve, DECslide and DECgraph, ISSCO's DISSPLA and TELL-A-GRAF, BB and N's RS-1 and SAS Institute's SAS/GRAPH. Supports IBM graphics printers and EGA (Enhanced Graphics Adapter).
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 10,000 since 1985 ☐ Cost: $300

☐ **poly-ReGIS**
ReGIS graphics commands emulation.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $165

☐ **poly-TRM/VT**
ASCII terminal emulation to mainframe. PC used as DEC VT102 OR VT52 video terminal. Supports printer attached to PC, menu setup screens and standard async lines and ports at 9600 baud.
IBM PC, PCjr, XT, AT ☐ 64 KB req. ☐ Copies sold: 50,000 since 1981 ☐ Cost: $150

POLYTRON CORP.

SEE AD ON PAGES 348/382

☐ **PolyWindows Talk**
Memory-resident telecommunications and terminal emulation with background operations capability. Operates using scripts. Emulates VT100 terminal. Utilizes existing Crosstalk script files. Requires PolyWindows DeskPlus.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1986 ☐ $79

☐ **PowerCom**
Exchanges files with different computers and networks. Uses Xmodem, Ymodem, X.PC, Kermit and other protocols. Emulates DEC VT100, VT52, VT102, Heath/Zenith H19, Z19 and Lear Siegler ADM-3A terminals. Receives data from 3 remote computers simultaneously. Optional password protection and data encryption facilities.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $179

PRIME COMPUTER, INC.

☐ **PRIMELINK**
Connects IBM and compatible PCs to Prime 50 Series systems. Provides PT200 terminal emulation. Performs file transfer and allows users to store and access PC files on host in PC format through virtual disk capability. Transfers documents created by MultiMate to Prime's OAS for distribution and editing.
IBM PC, XT, AT ☐ Cost: $60 per PC

PROTOCOL COMPUTERS, INC.

☐ PCIterm

Enables PC to communicate with IBM mainframe or S/34, 36, or 38. Provides uploading and downloading of files via direct or dial-up link without host suport, virtual memory screen buffer facility, user definable windows and auto dial and key-in.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 1,200 since 1984 ☐ Cost: $195

QUADRAM

(subsidiary of Intelligent Systems Corp.)

☐ Quad 5251

Reviewed Jul 1986 p. 76.

Permits communications between PC and S/34, 36, 38.

IBM PC, XT, AT, Portable PC ☐ 128 KB req. ☐ Cost: $995

☐ Quadlink

Allows Apple II and II Plus programs on IBM PC, XT and PC compatibles. Use of printers and buffers. Features Apple/IBM compatible game port for entertainment options.

IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $495

RATIONAL DATA SYSTEMS, INC.

☐ Popterm/200

Memory-resident DG D200 terminal emulator. Accesses DG's 32-bit AOS/VS environment. Utilities include Popgen which establishes communications parameters for sessions with various hosts and on-line file capture/transmit.

IBM PC ☐ 60 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $150

REAL-TIME COMPUTER SCIENCE CORP. (RTCS)

☐ iSIM85

ISIS-II 8085 simulator. Allows execution of Intel 8-bit compilers, assemblers and utilities. Converts PC to software development station for Intel processors.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $500

REALIA, INC.

SEE AD ON PAGE 295

☐ Termulator

Emulates DEC VT100 terminal. PC color and character graphics capabilities. Uses COM1 or COM2 communications port, at speeds up to 9600 baud. Uploads/downloads files, using Modem-2 protocol, with error detection and recovery. Corresponding receive/transmit utilities. VT52 escape code sequence recognition.

IBM PC, XT, AT, PCjr, 3270-PC ☐ 64 KB req. ☐ Copies sold: 1,200 since 1982 ☐ Cost: $95

RECOGNITION EQUIPMENT, INC.

☐ Tartan Link

Allows IBM PCs and PC compatibles to emulate Tartan terminals and connect to Tartan network, sharing data between MS-DOS PC applications and Tartan data entry, word processing, and data communications.

IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $1,750

RENEX CORP.

☐ R-Link

Enables IBM PC to emulate an ASCII terminal for connection to IBM 3270 or 5251 systems. Supports file transfer.

IBM PC ☐ 64 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $150

☐ RAP

Enables IBM PC to emulate IBM terminals and accept binary files from host. RAP transfers data in packets in end-to-end transmissions or public data networks. Eliminates echo delay. Provides error transmission.

IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1984

REXON BUSINESS MACHINES CORP.

(subsidiary of Rexon, Inc.)

☐ RTE (Rexon Terminal Emulator)

Allows PC to act as terminal on RECAP-based local or remote Rexon system. Emulates most functions of Rexon 303 and 306 terminals.

IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1985

RHINTEK, INC.

☐ EMU

Emulates Data General's DASHER terminals. Operates full and half duplex, 50-9600 baud. Data overrun prevention of files. Uses COM1 or COM2 port. Honors Xon/Xoff protocol in file output mode. Can be used as line monitor. Displays last 1000 characters.

IBM PC, XT, PCjr ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $115

THE SANTA CRUZ OPERATION, INC. (SCO)

☐ uniPATH SNA

Allow UNIX system based computers to operate on IBM SNA networks through 3270 and 3770 emulation. Appears to host system as IBM 3270 communications controller or 3770 RJE station. Runs as background process maintaining communications line for immediate, on-demand access to host system.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985

SAS INSTITUTE, INC. (NC)

☐ SAS/RTerm Software

Remote communications system. Emulates DEC VT100 terminal and Tektronix 4100 graphics commands. Supports Tektronix 4695 inkjet and IBM PC graphics printers and HP 7470, 7475, 7550 and ColorPro plotters.

IBM PC, 3270-PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 71 since 1985

SCIENTIFIC ENDEAVORS CORP.

☐ VTEK

Emulates DEC VT100, VT102, VT52 and Tektronix 4010/4014. Includes PLOT-10, cross hairs, user-defined keys, duplex, short/long breaks, printer output, ASCII and binary transfer, zoom and shift plots, traffic line monitor mode, 4014 enhanced graphics and VT100 numeric keypad.

IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $150

SIMWARE, INC.

☐ SIM3278/PC

Allows an IBM PC to work with SIM3278/VM or SIM3278/VTAM and function as an IBM 3278 Model 2. Uploads and downloads files. Emulates mainframe style printing on a PC attached printer. Includes an intelligent command file processor that can be customized as user requires.

IBM PC ☐ 192 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $250

SOFTEL, INC.

☐ PC52

Enables PC to function as intelligent terminal. Accesses UNIX mini-computer over standard RS-232 async communications link at transmission rates up to 56KB. Supports screen editing and up to 25 line display for 20 line spreadsheet and 16 color hi res graphics.

IBM PC ☐ 128 KB req. ☐ Copies sold: 2,500 since 1985 ☐ Cost: $140

SOFTRONICS, INC.

☐ Softerm PC

Communications and terminal emulation. Provides exact emulation of 30 terminals including support of conversational and block modes. Provides concurrent operation, file transfers, execution using command files and text editor. Includes data formatting utility that translates downloaded text files.

IBM PC ☐ 128 KB req. ☐ Copies sold: 8,000 since 1984 ☐ Cost: $195

SOFTWARE SOLUTIONS, INC. (CT)

☐ SYNCH 2780/3780

OEM product. Emulates RJE station to communicate with computers supporting IBM 2780, 3780 or 2770 protocols. Using bisync communications protocol, micro and mainframe exchanges messages from keyboard or disk file. Operates as point-to-point and supports transparency, reverse interrupts.

IBM PC ☐ 48 KB req. ☐ Introduced: 1979 ☐ Cost: $500

SOFTWARE SYNERGY, INC.

☐ Respond/All

Async terminal emulation of DEC VT102/100/52, IBM 3101, HP 2621B and TTY and choice of sync terminal emulators including 3270 SNA Remote, 3270 Local, 3270 BSC, 3270 Gateway, 2780/3780 RJE, 5251/12 Remote, 5251/11 Local. Text/binary transfer with error-checking protocols. Unattended mode with remote unattended file transfer.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $945-$1,640

☐ Respond/Async

Async emulation of DEC VT100 and VT52, IBM 3101, HP 2621B, and TTY. Features RESPOND architecture, menu-driven user interface, text and binary file transfer with error-checking protocols, dialogue support, unattended operation, user-defined and XPRESS keys.

IBM PC ☐ 256 KB req. ☐ Cost: $195

☐ Respond/HP 2622A

Emulates HP 2622A terminal to connect to host systems. Transfers data in block/page or block/line modes. Labels user keys. Video enhancements that enable characters to be printed on screen in inverse video, bold face type, blinking or underlined. Includes TTY and other emulators.

IBM PC ☐ 256 KB req.

☐ Respond/Secure Async

Protects async communications. Option for RESPOND/Async. Supports secure session establishment and encrypted file transmission between PC and async host that has similar security features implemented.

IBM PC ☐ 256 KB req. ☐ Cost: $895

☐ Respond/Sync

Sync terminal emulation for 3270 SNA Remote, 3270 Local, 3270 BSC Remote, 3270 Gateway, 2780/3780 RJE, 5251/12 Remote, 5251/11 Local. Provides communication and text and binary file transfer with error-checking protocols between IBM PC or compatibles and micros, minis and mainframes. RESPOND architecture, quick start and menu-driven user interface.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $695-$4,495

☐ Respond/TTY

TTY terminal emulation. Connects PCs to information services, micros, minis and mainframes. RESPOND architecture, quick start, menu-driven user interface, text/binary file transfer with error-checking protocols, dialogue support, unattended mode for remote unattended file transfer, user-defined keys and xpress keys.

IBM PC ☐ 256 KB req. ☐ Cost: $125

☐ Respond/2780/3780 RJE

Transmits/receives files by emulating IBM 2780/3780 RJE terminal. Micro-mainframe transfers. Error checking/correcting techniques with CRC-16, ACK0/ACK1, and other user-defined line control parameters. Provides job file support for arranging batch operations or executing communications transactions.

IBM PC ☐ 256 KB req. ☐ Cost: $795

☐ Respond/3270 Gateway

Allows PC in LAN to communicate synchronously with IBM mainframe through modem. Emulates 3274 while other PCs emulate 3278 remote terminals. Disk drives can emulate 3287 printers, allowing file transfer without any customer-host interface. Supports up to 32 mainframe sessions.

IBM PC ☐ 256 KB req.

☐ **Respond/3270 Local (Coax)**
Emulates IBM 3278 Model 2, 3, or 4 or 3279 Model 2A, 3A terminal. Connects IBM 3274 or 3276 cluster controller or IBM 4321/4331/4361 display/printer adapter using coaxial cable. Control program operates in resident or transient mode.
IBM PC ☐ 256 KB req. ☐ Cost: $995

☐ **Respond/5251/11 Local (Twinax)**
Links PC to IBM S/34/36/38 as direct replacement for 5251 Model 11 terminal. Toggles between DOS and 5251 mode. Drives up to 2 printers as System 3X printers. Emulates up to 4 workstations. TTY emulation for async communications.
IBM PC ☐ 256 KB req.

SOLUTION SYSTEMS

☐ **ZAP**
Emulation for DEC VT52/VT100/VT102 and Tektronix 4010. Async communications. Supports raw text, Xmodem, kermit file transfer, string to any key, automatic redial, unattended operation, optional dump toggle mode, four-boundary scrolling, variable-size graphics characters, XON/XOFF support.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $85-$950

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ **Interactive Terminal**
Receives PC keyboard character and control codes, of which most go to host computer for processing. Monitors communications line and displays data transmitted from host computer.
IBM PC ☐ Cost: $99

SPERRY CORP.

Information Systems Group

☐ **PC SNA and Bisynchronous Connectivity**
Allows Sperry PCs to access IBM's SNA, via 3270 interactive or 3770 remote batch terminal emulation.
IBM PC

☐ **PCWorks and Unihost**
Links Sperry PC with Sperry 5000 or 7000 systems for data file transfer, mail and message send/receive and report printing.
IBM PC

☐ **Series 5000 Uniscope Emulation**
Sperry no. 7776-01; 7777-01. Enables Sperry SVT 1210 or SVT 1220 terminals or Sperry PC to communicate with Sperry 1100 hosts operating in Uniscope environment. Sperry MAPPER, TIP and Demand compatible.
IBM PC

☐ **STEP (Sperry Terminal Emulation Package)**
Transforms Sperry PC into multi-function editing terminal capable of running 8 host sessions concurrently. Emulates Sperry UTS 20, 30, 40 or 60 and DEC VT 52/100/102 terminals.
IBM PC

STERLING SOFTWARE

System Software Marketing Division

☐ **PC-TRACS**
2780/3780 terminal emulator. Enables IBM PC or board compatible micro to perform bisync file transfer to/from PC-compatible micro, mini or mainframe. Includes RJE host emulation, send/receive records, data compression/decompression, and multiple file transfer/receive capabilities.
IBM PC ☐ 64 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $150-$1,780

STOCHOS, INC.

☐ **Microdyn**
Module to maintain files describing various aspects of system dynamics simulation model.
IBM PC ☐ 64 KB req. ☐ Copies sold: 4 since 1982 ☐ Cost: $300

STRAIGHTFORWARD

☐ **Fortyone**
Emulates HP41CV calculator. Programs and debugs HP 41 RPN code. Runs most HP 41 programs without alteration. Programming capabilities include alphanumerics, loops and conditionals, and advance trig functions.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 200 since 1986 ☐ Cost: $100-$115

SUNBELT COMPUTER SYSTEMS, INC.

☐ **TERM82M (82XX Terminal Emulator for MS-DOS)**
Emulates Datapoint's 82XX and 36XX terminals. Enables two-way transfer of ASCII text files by micro and Datapoint's mini. Supports Datapoint's DOS Datashare, RMS Workstation and RMS Datastation.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $395

SYDNEY DEVELOPMENT CORP.

☐ **Sydcom 3270 SNA/SDLC**
Emulates IBM 3274, 3278, 3287 and PU TYPE 2 to ASCII conversion.
IBM PC ☐ Cost: $150,000

SYNTAX SYSTEMS, INC.

☐ **VIM VirtualTerminal**
Allows PC to function like VT100 terminal with 80 columns and 24 lines. Logs in to VAX and executes VAX-resident text editors and other processes. If VAX is part of DECnet network, user can access other computers on DECnet as network virtual terminal.
IBM PC ☐ Copies sold: 75 since 1985 ☐ Cost: $500

SYNTREX, INC.

☐ **IBM PC Connection**
Turns an IBM PC into a Syntrex workstation for connection to file servers in a network situation.
IBM PC, XT ☐ 384 KB req. ☐ Introduced: 1984 ☐ Cost: $600-$900

TANDEM COMPUTERS, INC.

☐ **PC Link**
Links IBM and other MS-DOS micros to Tandem hosts. Emulates Tandem 653X and IBM 327X terminals. Includes PCFORMAT for conversion of Encompass data files to DIF, SYLK, BASIC or ASCII formats. Sends and receives messages via PS Mail.
IBM PC ☐ Cost: $495

TECHLAND SYSTEMS, INC.

(subsidiary of York Research Corp.)

☐ **BlueLynx 2780/3780 Remote Job Entry (BSC)**
Emulates 2780/3780 terminal using BSC. Features Procedure Command Language, which sets up series of commands to send and receive files, branch to other PCL files and exit from emulation mode without operator intervention. Built-in error correcting on both mainframe and PC slide.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1985

☐ **BlueLynx 3270 Advanced COAX**
Reviewed Apr 1986 p. 189.
Emulates an IBM 3278 model 2, 3 or 4 monochrome display station or an IBM 3279 model 2A, 3A or 3B color display station. Features built-in macro language which provides data capture, file transfer or logging on to host or PC applications without adding any new host software.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985

☐ **BlueLynx 3270 Remote & Local and BlueLynx 5251 Remote & Local (Twinax)**
3270 SNA/SDLC remote and local workstation emulator for PC and 5251 Model 12 and 11 emulator. PC, AT or XT acts as standalone distributed processor, on-line terminal.
IBM PC, XT, AT ☐ 23 KB req. ☐ Copies sold: 12,000 since 1982 ☐ Cost: $745-$945

☐ **BlueLynx 5251/11 Local**
Reviewed Jul 1986 p. 76.
Emulates a single 5251/11 terminal with a DOS session on a PC
IBM PC, XT, AT ☐ Introduced: 1985

☐ **VTERM 2**
Async communication and DEC VT100, VT52 emulation. Runs full screen, keypad oriented software like EDT, TECO, WORD11 and EMACS. Accesses data services. Turns PC into intelligent TELEX using services like Western Union's EASYLINK and allows off-line TELEX preparation.
IBM PC, XT, PCjr, AT ☐ 64 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $160

TECHNOLOGICAL SYSTEMS GROUP, INC.

☐ **TEPRO 4010**
Tektronix 4010 emulation with Hercules or IBM Graphics Cards. Full interactive capabilities, off-line review and hard copy to matrix printers.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $80

TELEXPRESS, INC.

☐ **Teleterm EM**
Async communications through RS-232C over telephone lines, protocol converter or direct wire. Emulates a number of host terminals. Telecommunications with comprehensive file upload/download capabilities. Block transfer modes, X-modem and proprietary protocols. Full screen on-line/off-line text editor.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 5,000 since 1981 ☐ Cost: $195-$225

TEXAS INSTRUMENTS

☐ **3101 Communications**
Emulates IBM 3101 Display terminal. Applicable for data entered into forms or fields set by host or for two computer interaction. Dial-up or leased line. Usable with remote computer applications for process control inventory, OE, computer based and operator training.
IBM PC ☐ 128 KB req. ☐ Cost: $140

☐ **3270 Coax Interface**
Accesses IBM host computer data bases. Allows TI computers to emulate IBM 3278 and 3279 display terminals. Downloads mainframe-stored data for local manipulation and storage.
IBM PC ☐ 64-128 KB req. ☐ Cost: $1,195

☐ **3270 SNA Communications**
Accesses SNA host computer as 3270-type terminal. Emulates IBM 3276/12 Cluster Control Unit with single 3278/2 printer. Supports Multiple LU (SLU Type 2 and 3 or Type 1).
IBM PC ☐ 128 KB req. ☐ Cost: $350

☐ **3780 Communications**
Allows TI Professional communication with others. Transfers data synchronously. Attended or unattended data file transfers provide error detection and recovery.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $150

☐ **931 Emulator**
Emulates TI 931, communicates with Business System Series 300, 600 or 800 via direct, switched or dedicated link. Text and binary file transfer using DX10 or DNOS commands. Parallel or serial printer emulation, 300 to 19,200 bps and 911/931 keyboard mode.
IBM PC ☐ 128 KB req. ☐ Cost: $150

THETA SCIENTIFIC, INC.

☐ **ET200**
DG D200 terminal emulator for IBM PC and DEC Rainbow. Accommodates RDOS, AOS and AOS/VS. Allows pausing the screen without losing data. Data sent to screen may be sent to printer or captured on diskette. Integrated file transfer sends PC file with SSI's TranSSit. Compatible with DG's CEO and SSI's WordPerfect.
IBM PC, XT, AT, 3270-PC ☐ 128 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $150

3COM CORP.

☐ 3+3270
Allows PC attached to network to access IBM mainframe emulating 3278/3279 terminal.
IBM PC, XT, AT ☐ Introduced: 1986

TITN, INC.

☐ Twice DSP3270
Allows UNIX systems emulation of IBM 3274, 3271 and 3275 controllers via an X.25 PSDN. Permits printer connected to UNIX system to emulate IBM 3284, 3286, 3287 or 3288 printer.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2 since 1985 ☐ Cost: $40,000 and up

☐ Twice XPAD DSP2780/3780
Allows UNIX systems to emulate BSC IBM 2780 or 3780 batch transmission terminals. User-defined parameters for communications line. Originates or answers calls. Sends mail to user whether or not transmission is successful.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3 since 1985

TORUS SYSTEMS, INC.

☐ AGS (Advanced Gateway Support)
Extends Tapestry network's async communications to provide VT100 emulation. Supports Bridge CS devices for Tapestry networks running on 3Com hardware.
IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $795

TRANSMIT COMMUNICATIONS AND INTELLIGENT TERMINAL SOFTWARE

☐ Communications Software and Intelligent Terminal Software
Provides VT/100 and ADM3 emulation, micro-to-micro or micro-to-mini communications. Automated process control uses prompted English statements. X-Modem protocol, electronic mailbox, auto modem, auto-redial, unattended process control, on-line buffer capture toggle, 40-entry telephone directory with automatic configuration loading, and true break signal. Emulates Honeywell 7809.
IBM PC ☐ 192 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $70

TRISYSTEMS CORP.

☐ TC-3274
Emulates 3274 Terminal Controller in supporting remote PC workstations using SNA/SDLC.
IBM PC, XT, AT

☐ TC-3780/2780
Emulates IBM 3780 RJE workstation. A full emulation of IBM 2780 RJE workstation provided.
IBM PC ☐ 40 KB req.

TURNBULL AUTOMATION, INC.

☐ UPLUS
Allows PC to emulate Sperry U100, U200 or UTSXX with IBM 327X, 2780, 3780 emulation optional. Includes line trace buffer facility and help facility. Supports up to 16 displays file transfer. Screens can be labeled. Keyboard macro capability.
IBM PC ☐ 256 KB req. ☐ Copies sold: 125 since 1984 ☐ Cost: $250-$655

TYMLABS CORP.

☐ PCAccess
Allows IBM PC to emulate HP 2621 display terminal.
IBM PC ☐ Cost: $50

TYMNET, MCDONNELL DOUGLAS NETWORK SYSTEMS CO.

(subsidiary of McDonnell Douglas)

☐ SmarTym 3270
Provides PC access to Tymnet's Async-to-3270 Service. Accesses 3270 host applications. Incorporates X.PC async communications protocol. Allows attached printer to emulate IBM 328X printer. User can redirect print streams to disk file. Provides error correction.
IBM PC ☐ Cost: $175

VICTOR TECHNOLOGIES, INC.

☐ Async
Terminal emulation which allows async communications between a Victor 9000 computer and another computer facility. Includes ASCII file transfer capabilities.
IBM PC ☐ 128 KB req. ☐ Cost: $195

☐ Bisync-86/3780
Emulates IBM RJE products, supporting BSC protocol over range of 1200 to 9600 baud.
IBM PC ☐ 128 KB req. ☐ Cost: $495

☐ TD830 Emulator
Facilities include TD830/MT983 80 by 24 display with TD830 attributes, up to six pages of display, disk storage of screen formats, configurable via a parameter file, auxiliary local printer support, auto TD830 keyboard reconfiguration, and built-in line monitor facility.
IBM PC ☐ 128 KB req. ☐ Cost: $495

☐ 3270 Bisync
Allows communication with mainframe using IBM BSC protocol. Emulates 3271 controller and 3277 display, 3275 display (polled and contention), 3284 or 3286 printer, and operating over range of 1200 to 9600 baud.
IBM PC ☐ Cost: $595

☐ 3276 SNA/SDLC Emulator
Supports 3287 Model 2 printers with 80 X 25 display. Hi-lo intensity. Non-display attributes, automatic or menu-driven configuration supported.
IBM PC ☐ 128 KB req. ☐ Cost: $695

☐ 3278 COAX Emulator
Supports 80 X 24 or 132 X 27 with 25th or 28th line status display. Memory-maintained screen buffer. Auxiliary local printer support, auto 3278 style keyboard reconfiguration and diagnostics.
IBM PC ☐ 128 KB req.

WALKER RICHER AND QUINN, INC.

☐ Reflection Series
Full HP 2392, DEC VT-220, and HP 2623 graphics terminal emulation. Error-free file transfer to/from HP 3000s and VAX under VMS or UNIX. Supports serial and parallel printers and color on IBM PC. Includes command language, terminal memory, horizontal scrolling to 1000 columns.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 25,000 since 1983 ☐ Cost: $199-$449

WANG LABORATORIES, INC.

☐ Burroughs Terminal Emulation
Supports 1,920 character screen, document status line, local printer support, async and sync communications and up to three Burroughs hosts and 16 concurrent communication sessions. Background printing sent to host-addressable PC printer, concurrent with TD/MT terminal emulation.
IBM PC ☐ Introduced: 1984

☐ CP/M-80 Emulation Software
Allows PC with Local Communications Option Card to access optional OS, CP/M-80 application programs, and languages without committing chassis expansion slot to Wang's CP/M Emulator Card.
IBM PC ☐ 256 KB req. ☐ Cost: $240

☐ PC Graphics Workstation Emulation
Enables a Wang Professional to function as a graphics workstation attached to a Wang VS, OIS or Alliance system.
IBM PC ☐ Cost: $200

☐ PC 2780/3780/WPS Option
IBM PC ☐ Cost: $200

☐ PC 3276 SNA/SDLC Emulation
IBM PC ☐ Cost: $400

☐ PC 3276/3275 BSC
IBM PC ☐ Cost: $400

☐ PC 3278 Emulation
IBM PC ☐ Cost: $240

☐ VT-100 Emulation
Provides communication between Wang Professional and DEC host. Emulates VT-52 and VT-100.
IBM PC ☐ 128 KB req. ☐ Cost: $200

WESTERN WARES

☐ ISE - ISIS Emulator
Imitates ISIS-II system calls for testing ISIS programs under CP/M. Paged memory version emulates 64kb ISIS configuration. Supports emulation of Intel ROM monitor entry points. Functions implemented with standard BDOS calls.
IBM PC ☐ 80 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $89

WINTERHALTER, INC.

☐ DataTalker 3270 BSC
Turns micro into remote IBM 3270 interactive bisync terminal. Up to 8 users can share modem, 3705 port and terminal emulator. Features batch key, applications program interface, CalcTran and QuicKScreen. Requires DataTalker PC Plus, DataTalker II or DataTalker PC-8.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $695-$2,395

☐ DataTalker 3270 SNA
Allows microcomputer to emulate remote IBM 3270 SNA interactive terminal. Up to 8 users can share 1 modem, 3705 port and terminal emulator. Features batch key, applications program interface, CalcTran and QuickScreen. Secures data. Requires DataTalker PC Plus, DataTalker II, DataTalker PC or DataTalker PC-8.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $695-$2,395

☐ DataTalker 3780 BSC
Turns micro into IBM 3780/2780 remote batch terminal using bisync protocol. Selects and modifies configuration parameters including buffer size, record size, compression, transmission code and time out delay. Requires DataTalker PC Plus, DataTalker PC or DataTalker II.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $695-$1,095

XICOM TECHNOLOGIES CORP.

☐ 3270/3770 SNA MicroNode
Accesses IBM mainframes over SNA networks by emulating IBM 3274, 3278, 3287 and 3776. Link protocol is SDLC with link class options of multi-point, switched or point-to-point. SNA Type 2 node with LU 1, 2 or 3 support for up to 32 devices.
IBM PC ☐ 256 KB req. ☐ Introduced: 1983

YALE UNIVERSITY COMPUTER CENTER

☐ YTERM
VT100 or DM1520 terminal emulator. Provides error correcting file transfer and session logging from 300 to 9600 baud. Fully compatible with Yale ASCII communications system.
IBM PC, XT, AT, PCjr, Portable PC ☐ 64 KB req. ☐ Copies sold: 2,500 since 1983 ☐ Cost: $50

COMMUNICATIONS— MICRO/MAINFRAME LINKS

ADVANCED TECHNOLOGY INTERNATIONAL, INC.

☐ MAPLE
Development tool for integrated PC to mainframe application. Integrates CICS and PC software and data bases into one system. Multiple file concurrent transfer. Uploads and downloads. Backup of PC files on mainframe. Binary data support. ASCII, Lotus and DIF files support. System tuning capability.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $650-$950

AMERICAN INTERNATIONAL COMMUNICATION CORP.

☐ **Data Communications System 500**
Enables PCs to participate in controlled PC network using dial-up lines and asynchronous modems. Proprietary protocol provides reliable data transfer with retry and recovery allowing for attended or unattended operation. Stands alone or integrates into PC applications. Provides growth path to mainframe communications.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $10,000

ANSWER SYSTEMS
(division of Sterling Software)

☐ **Answer/Link**
Provides transparent link between PC and IBM mainframe through use of mainframe resident virtual diskettes.
IBM PC, XT, AT, 3270-PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $6,200 and up

☐ **dBASE/Answer**
Works with Answer/DB system. Selects and extracts data from the data base on an IBM mainframe. Summarizes data and downloads it to PC. Stores extracted and summarized data on PC's diskette. Usable with dBASE II, dBASE III, FRIDAY or Framework, Lotus 1-2-3 and Multiplan.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 135 since 1983 ☐ Cost: $286-$550

☐ **Lotus/Answer**
Works with Answer/DB on-line retrieval reporting system to access data bases on mainframe computers. Summarizes data and downloads it to PC. Data usable with Lotus 1-2-3 and Symphony.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 140 since 1984 ☐ Cost: $286-$550

☐ **Micro/Answer**
Extracts data from multiple data bases/files within IBM mainframe. Downloads summarized data to IBM PC. Data is usable with Lotus 1-2-3, Symphony, dBASE II, III and Framework.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 140 since 1984 ☐ Cost: $550

AUTOMATED INSURANCE RESOURCE SYSTEMS, INC. (AIRS)

☐ **Airlink**
File transfer between mainframe and micros.
IBM PC ☐ Copies sold: 20 since 1984

AVATAR TECHNOLOGIES, INC.

☐ **IFT/3270**
File transfer program. Transfers text and binary files between PCs and mainframes. Works with PA100 Turbo micro-to-mainframe link. Initiates file transfers during host session, in off-line mode from PCDOS command prompt.
IBM 3270-PC ☐ Cost: $100

CANADA SYSTEMS GROUP

☐ **Allegro**
Micro-to-mainframe link and PC integration. Imports/exports data to other products. Support DOS functions. Productivity tools include calculator, time manager, file cabinet, scratch pad and EDform. Telecommunications options include dialCSG, phone manager and board support for 3278 communications adapters.
IBM XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $495

CDI SYSTEMS, INC.

☐ **Autokey/3270**
Controls 3270 interaction from PC Command file. Accesses screen-image buffer on 3270-PC emulator boards. Executes commands simulating 3270. Handles entire log-on sequences, repetitive input procedures and applications requiring interaction with 3270 screens. Includes command interpreter, communications board configurator attribute display and encrypt/decrypt.
IBM PC, XT, AT, 3270-PC ☐ 128 KB req. ☐ Cost: $69-$149

☐ **FTS**
Transfers files from micros to mainframes. Batch re-execution feature available at any time during interactive menu session.
IBM PC, XT, AT, 3270-PC ☐ 128 KB req. ☐ Cost: $129

☐ **Trio**
Transfers files from IBM mainframe to PC, extracts data and converts extracted data into a spreadsheet or data base format. Prepares data for upload to mainframe data base systems. Accesses PCDOS commands. Interfaces with Symphony and dBASE II and III.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Cost: $395

CENTURY ANALYSIS, INC. (CAI)

☐ **Link/9**
Enables PC data files to be sent to mainframe, through NCR CLC/MLAs, multiplexor, or the CAI OSI. Allows PC to emulate an NCR 7900 Model 1 terminal in dumb mode. Control of transferring data is maintained by PC operator through terminal entries.
IBM PC ☐ 50 KB req. ☐ Copies sold: 25 since 1983 ☐ Cost: $3,500

CINCOM SYSTEMS, INC.

☐ **PC Contact**
Uses existing accounting and security systems, supports DIF and ASCII formats, emulates 3270 and allows active mixing of mainframe and PC data. Sold as a package with SeriesOnePlus Microcomputer Decision Support Software.
IBM PC ☐ 128 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $500

COLLIER-JACKSON, INC.

☐ **Execulink**
Downloads financial data from CJ/Advanced GL to an IBM PC. Returns information from PC to HP 3000 or DEC/VAX computers. Allows user to access CJI's business software data bases, access information and build spreadsheets to simulate what-if situations.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 10 ☐ Cost: $2,000

COMMUNICATIONS SUPPORT GROUP

☐ **FTS (File Transfer System)**
For large volume data transfers. Transfers files between IBM host and other minis, micros and mainframes. Transmits/receives multiple files. Uses bisync 3780 line protocol. Controls multiple lines, dial-out or auto-answer to transfer sequential files.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $7,000 and $1,000 per line installed

COMPUTER ASSOCIATES INTERNATIONAL, INC.

☐ **CA-Link**
Async, bisync, SDLC/SNA and IRMA-based communications offering 3270 terminal emulation and selective data integrity/security. Provides file transfer and reformatting into ASCII, DIF, BASIC and binary.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $1,295

COMPUTER CORP. OF AMERICA (CCA)

☐ **PC/204**
Provides ability to access corporate data stored in MODEL 204 DBMS, download view of data to PCs in DIF file or ASCII format and upload PC files back to MODEL 204.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $17,500

☐ **Prod/Net**
Shares peripherals by connecting PCs into local networks, with data transfer between mainframes and PCs. Offers multi-tasking for micros, icon interfaces, mouse support and file security/integrity. Stores and transmits Wang, Xerox and IBM Displaywriter and DisplayWrite Series documents.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $9,820

COMSHARE, INC.

☐ **W/Communications**
Mainframe communications supporting range of communication paths including async, bisync and protocol converters while ensuring error-free data transmission between PCs and mainframe. Capability to package repetitive PC to host routines including host logons, file transfers and PC processing.
IBM PC, XT, AT ☐ Cost: $5,000-$10,000

☐ **W/Information Gateway**
Includes menu building, communications, basic business graphics, optional 3D modeling, local library management and security. Applications can be packaged and called with single menu choice. Accesses mainframe data from PC. Generates charts.
IBM XT, AT ☐ 512 KB req. ☐ Cost: $450

CONTROL DATA BUSINESS CENTERS (CDBC)

☐ **Orchestrator**
Accounting and micro-mainframe link. Connects CDBC's mainframe allowing nationwide standardization in AP, AR, GL and payroll. Connects with Lotus 1-2-3, Symphony, dBASE III, and HR1.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $3,000

CONTROL DATA CORP.
Science Information Services

☐ **VistaCOM**
Enhancements aid data transmission rate, file transfer protocol and interaction with DOS without exiting. Based on the open systems interconnection architecture of the ISO. Protocol uses Hoffman Coding data compression techniques, a CRC-16 error-checking methods and packet pipelining.
IBM PC, XT, AT ☐ Introduced: 1983

CORE TECHNOLOGY CORP.

☐ **Bridge**
Connects a TI micro to Burroughs mainframe. Provides Burroughs TD830 terminal emulation and file transfer capabilities. Functions supported include status line, multiple pages, background printer address and reverse video.
